

TITLE 19: NATURAL RESOURCES AND WILDLIFE

CHAPTER 1: NATURAL RESOURCES GENERAL PROVISIONS

PART 1: GENERAL PROVISIONS [RESERVED]

PART 2: ADMINISTRATION OF THE NATURAL LANDS PROTECTION ACT

19.1.2.1 ISSUING AGENCY:

Energy, Minerals and Natural Resources Department.

[11-30-95; Recompiled 12/31/01]

19.1.2.2 SCOPE:

These rules govern the role of the state of New Mexico and New Mexico not-for-profit corporations whose primary purpose is the preservation and conservation of unique and ecologically significant lands.

[11-30-95; Recompiled 12/31/01]

19.1.2.3 STATUTORY AUTHORITY:

This rule is made pursuant to the Natural Lands Protection Act, Section 78-5-1 et seq. NMSA 1978 (NLPA), and Section 9-1E NMSA 1978.

[8-9-89; Recompiled 12/31/01]

19.1.2.4 DURATION:

Permanent. [unless a later date is cited at the end of a Section]

[11-30-95; Recompiled 12/31/01]

19.1.2.5 EFFECTIVE DATE:

August 9, 1989.

[11-30-95; Recompiled 12/31/01]

19.1.2.6 OBJECTIVE:

These rules govern the role of the energy, minerals and natural resources department (EMNRD) in joint acquisition and protection of unique and ecologically significant lands in New Mexico by the state of New Mexico and New Mexico corporations. No lands or rights of access shall be acquired through the state's power of eminent domain or any other condemnation process.

[8-9-89, 11-30-95; Recompiled 12/31/01]

19.1.2.7 DEFINITIONS:

- A. "**Access**" means authorization for use, observation, visitation and study.
- B. "**Acquisition**" means obtaining a recordable interest in land by warranty, quit claim or easement and all reasonable costs associated therewith.
- C. "**Consultation**" means suggestion, recommendation or discussion.
- D. "**Cotenant**" means joint tenants, tenants in common or entities holding other undivided interests in land.
- E. "**Destruction**" means diminishment, obliteration or elimination of existing conditions.
- F. "**Education**" means an act or process of imparting knowledge.
- G. "**Habitat**" means the natural place or environment of a species of plant or animal.
- H. "**Lands**" mean real property located within the state of New Mexico.
- I. "**List of projects**" means a prioritized list of lands to be acquired pursuant to the NLPA.
- J. "**Management plan**" means a document with appropriate discussion, maps and illustrations adopted or approved by the secretary setting forth objectives, policies and standards to guide protection, use, observation, visitation and study of acquired lands.
- K. "**Preservation**" means the management of the natural environment in such a way as to ensure the viability of a species of plant or animal.
- L. "**Rare, threatened or endangered species**" means any plant or animal species protected under the provisions of the New Mexico Endangered Plant Species Act of 1985 (Section 75-6-1 NMSA 1978), the New Mexico Wildlife Conservation Act of 1974 (Sections 17-2-37 through 17-2-46 NMSA 1978 (1995 Repl. Pamp.)), and the federal

Endangered Species Act of 1973 (16 U.S.C. 1531-1543) all as may be amended from time to time.

M. "Research" means scholarly or scientific investigation or inquiry conducted on acquired lands pursuant to a management plan and under written arrangements.

N. "Secretary" means the secretary of the energy, minerals and natural resources department or a person designated in writing by the secretary.

[8-9-89, 11-30-95; Recompiled 12/31/01]

19.1.2.8 ADMINISTRATION:

A. The secretary of EMNRD shall administer the NLPA and shall serve as chair of the committee.

B. The secretary shall call meetings as necessary and shall prepare, keep and distribute the committee's record of activities.

C. The secretary, by annual public notice and solicitation, beginning in 1990, shall request nominations for potential lands acquisition for as long as funding is available for the acquisition of lands under the NLPA.

D. The secretary shall develop and maintain a prioritized listing of lands qualified under the Act. The secretary shall review and deliver the list to the committee at least annually.

E. The secretary shall assist the committee with deposit, management and payment of funds for lands acquisition under the NLPA.

F. No lands shall be acquired except from a willing seller and until completion of necessary land purchase procedures including acquisition of land appraisals; title insurance; boundary surveys; requisite title insurance; boundary surveys; requisite investigative reports, clearances, adjunct rights and agreements and improvements needed to protect the property for the purposes defined in the NLPA are completed.

G. For all acquired lands, the secretary may adopt a management plan submitted by the corporation. The secretary may restrict access to the land by the general public to visits conducted under the direct supervision of an employee or designated representative of the managing corporation.

H. No land shall be acquired unless a corporation, as provided in the Act, jointly acquires at least ten percent interest in the land as a cotenant with the state of New Mexico. The secretary shall select a corporation to participate in land purchases under the NLPA. The secretary may assign responsibility for the completion of certain tasks defined in Sections 8.6 and 8.7 [now Subsections F and G of 19.1.2.8 NMAC] to said

corporation. A participating corporation shall annually pay to the state and its political subdivisions a sum equal to an amount which would have been paid by a private landowner in taxes, levies and assessments.

I. In no event shall lands be acquired for greater than fair market value as determined by a qualified appraiser.

[8-9-89, 11-30-95; Recompiled 12/31/01]

PART 3: ADMINISTRATION OF THE NATURAL HERITAGE CONSERVATION ACT

19.1.3.1 ISSUING AGENCY:

Energy, Minerals and Natural Resources Department.

[19.1.3.1 NMAC - N, 7/30/2010]

19.1.3.2 SCOPE:

19.1.3 NMAC applies to application and selection procedures for conservation projects that may receive grants from the natural heritage conservation fund.

[19.1.3.2 NMAC - N, 7/30/2010]

19.1.3.3 STATUTORY AUTHORITY:

19.1.3 NMAC is adopted pursuant to the Laws of 2010, Chapter 83.

[19.1.3.3 NMAC - N, 7/30/2010]

19.1.3.4 DURATION:

Permanent.

[19.1.3.4 NMAC - N, 7/30/2010]

19.1.3.5 EFFECTIVE DATE:

July 30, 2010, unless a later date is cited at the end of a section.

[19.1.3.5 NMAC - N, 7/30/2010]

19.1.3.6 OBJECTIVE:

19.1.3 NMAC's objective is to establish procedures for carrying out the provisions of the Natural Heritage Conservation Act to protect New Mexico's natural heritage, customs and culture including establishing criteria for evaluating possible conservation projects to receive grants from the natural heritage conservation fund.

[19.1.3.6 NMAC - N, 7/30/2010]

19.1.3.7 DEFINITIONS:

A. "Agricultural easement" means a less than fee simple interest in land that is granted in perpetuity, which creates a legally enforceable land protection or preservation agreement and restricts or prohibits the future development, including subdivision, or alteration of the land or the permanent severance of any appurtenant water rights for a purpose other than agricultural production or the natural values of the land. The fee simple ownership remains with the landowner and the landowner continues uses of the land that are consistent with the provisions of the easement with no requirement for public access although the landowner may allow such access.

B. "Agricultural production" means the production for commercial purposes of crops, livestock or livestock products, including the processing or retail marketing of crops, livestock or livestock products that are primarily produced on site by an operator of a working farm, ranch or other agricultural land. The term includes use of land that is devoted to and meets requirements and qualifications for soil conservation programs under an agreement with an agency of the federal government and may include periodic fallowing and practices that promote conservation of land and water on and near the property.

C. "Applicant" means a qualified entity.

D. "Committee" means the natural lands protection committee established pursuant to NMSA 1978, Section 75-5-4(A).

E. "Conservation easement" means a less than fee simple interest in land granted in perpetuity, which creates a legally enforceable land protection or preservation agreement that restricts or prohibits further subdivision and may restrict or prohibit development, commercial and industrial uses or other activities, or alteration of the land or any appurtenant water rights necessary to maintain or preserve certain conservation values (e.g., natural resource, wildlife habitat, scenic, open space, cultural, historic or recreational and educational) on the subject property. The fee simple ownership remains with the landowner and the landowner continues uses of the land that are consistent with the provisions of the easement with no requirement for public access although the landowner may allow such access.

F. "Conservation entity" means a private nonprofit charitable corporation or trust authorized to do business in New Mexico that has tax-exempt status as a public charity

pursuant to the internal revenue code of 1986 and that has the power to acquire, hold or maintain land or interests in land.

G. "Conservation project" means the acquisition of conservation or agricultural easements from a willing seller or a land restoration project that protects the state's natural heritage, customs and culture through action that preserves and conserves water quality and quantity to conserve and restore natural ecosystem function and processes; protects agricultural production on working farms, ranches and other agricultural lands; protects and restores New Mexico's forests and watersheds; conserves and restores wildlife habitat; maintains natural areas; provides outdoor recreation opportunities, including hunting and fishing and trails; or preserves cultural and historic sites with natural resources heritage value.

H. "Department" means the energy, minerals and natural resources department.

I. "Fund" means the natural heritage conservation fund.

J. "In-kind" means property or services that benefit a grant-supported conservation project that are contributed without charge or at less than fair market value. In-kind contributions for purposes of land restoration projects may consist of the cost of operating equipment or equipment rental, goods or services, including labor, directly benefitting the land restoration project and specifically identifiable to the land restoration project. Labor costs included as in-kind shall be documented as reasonable and reference rates applicable to the local area and type of service. In-kind contributions for purposes of agricultural or conservation easements means the donation of interests in real property or the payment of transactional costs such as appraisals, environmental assessments, title insurance or surveys.

K. "Land restoration project" means actions intended to renew a degraded, damaged or destroyed natural land area and associated vegetation or water features through active intervention, where the action is founded upon science-based technical information and prediction of the intervention's outcome such that it stimulates or accelerates natural system health, integrity and sustainability toward a specified outcome. Restoration includes an array of actions including erosion control, reforestation, forest thinning, re-vegetation of disturbed sites, repair of aquatic systems, removal of non-native species of animals and plants and the related sustainable re-establishment of native species, re-establishment of extirpated native species, measures taken to restrict disturbance to areas of crucial habitat or to develop and restore more suitable habitat and improved outdoor recreation opportunities and overall habitat and range improvements for native species benefit. A project includes related assessment and monitoring to judge long-term effectiveness and determine and implement periodic corrective or additional actions needed to achieve objectives.

L. "Natural resource heritage value" means a vegetation community component, animal species assemblage or combination thereof; other naturally occurring

representation of biological diversity; or esthetically appealing vistas of natural landscape that are significant or important.

M. "Partner" means a conservation entity or other individual or entity cooperating or assisting a qualified entity with planning, applying for and executing a conservation project, which is specifically identified in an application, and will be a participant in a public-private conservation project.

N. "Qualified entity" means a state agency, a state educational institution named in Article 12, Section 11 of the constitution of New Mexico, a political subdivision of the state; or, for conservation projects wholly within New Mexico, an Indian tribe or pueblo.

O. "Working farm, ranch or other agricultural land" means land that has been primarily devoted to active agricultural production for at least two of the five years immediately prior to consideration for an agricultural easement or other conservation project.

[19.1.3.7 NMAC - N, 7/30/2010]

19.1.3.8 GENERAL PROVISIONS:

The department administers the Natural Heritage Conservation Act, which establishes a fund and a competitive grant program to select and fund conservation projects. The committee evaluates proposed conservation projects and recommends to the department which proposed conservation projects should receive funding.

[19.1.3.8 NMAC - N, 7/30/2010]

19.1.3.9 ELIGIBLE APPLICANTS:

Only qualified entities may apply for grants from the fund. Conservation entities may not individually apply for or receive grants directly from the fund, but they may partner with qualified entities on conservation projects. If a conservation entity will jointly acquire a conservation or agricultural easement or is a partner on a land restoration project, the conservation entity shall be identified in the application.

[19.1.3.9 NMAC - N, 7/30/2010]

19.1.3.10 CONSERVATION PROJECTS:

Conservation projects that may receive grants from the fund include the following:

A. acquisition of conservation easements from willing sellers by qualified entities, including the department, which may or may not be in partnership with conservation entities;

B. acquisition of agricultural easements from willing sellers by qualified entities, including the department, which may or may not be in partnership with conservation entities; or

C. land restoration projects by qualified entities, including the department, which may or may not be in partnership with conservation entities.

[19.1.3.10 NMAC - N, 7/30/2010]

19.1.3.11 GRANT APPLICATION PROCESS:

A. If funding is available, the department may establish one or more competitive grant application cycles each calendar year and specify the required format, forms and deadline for application submittal. Each application cycle announcement shall specify any priority area, ecological, geographic, funding, type of project or other limitations applicable to that cycle, as related to funds available, accomplishments to date and criteria specified in Subsection C of 19.1.3.12 NMAC.

B. The applicant shall submit an application in a format specified by the department that includes at a minimum the following information:

(1) the type of conservation project (e.g., conservation easement, agricultural easement or land restoration);

(2) the applicant's address, contact information and contact person;

(3) the landowner's address and contact information;

(4) general information about the property including a legal description of the property;

(5) information demonstrating how the proposed conservation project meets the requirements of the Natural Heritage Conservation Act, 19.1.3.12 NMAC and the criteria in Subsection B of 19.1.3.12 NMAC;

(6) for grant applications seeking funding to acquire a conservation easement or agricultural easement:

(a) property details supplied by the landowner to the qualified entity, including ownership interests, liens, mortgages and encumbrances;

(b) a draft deed of conservation easement or deed of agricultural easement or a descriptive list of intended easement provisions including acreage, building envelopes, conservation provisions and reserved uses;

(c) a written statement from the landowner that the landowner wishes to sell a conservation easement or agricultural easement to the applicant;

(d) a written description of the applicant's authority to acquire and hold land or interests in land, including conservation easements or agricultural easements; and

(e) a written statement or other proof that the applicant has the experience and the ability to manage lands for conservation, natural resource heritage value or agricultural value;

(7) for land restoration projects, a statement describing the intended land restoration activities with specific objectives and a designated project manager identified to be responsible for implementation of the approved project including overseeing contractor or subcontractor administration, providing liaison with affected landowners, ensuring technical viability of the project, ensuring funds expended are within budget and obtaining any necessary permits;

(8) the name of any qualified entities or conservation entities that are partnering with the qualified entity on the conservation project, a description of each entity's role and contribution and a written commitment from each conservation entity identifying that entity's proposed responsibilities and contributions;

(9) how the conservation project relates to applicable state, tribal, county or local plans;

(10) projected beginning and completion dates for the conservation project and a schedule of activities required to complete the conservation project with projected beginning and completion dates for those activities;

(11) a full budget for the project detailing the costs and in-kind contributions, if any; and

(12) a list of any permits, certifications and clearances needed to implement the project.

C. The department shall review applications for timeliness and completeness before providing the grant applications it has received to the committee. The committee may consider the grant applications at a regularly scheduled meeting or at a special meeting scheduled for the purpose of considering grant applications.

[19.1.3.11 NMAC - N, 7/30/2010]

19.1.3.12 APPLICATION REVIEW:

A. The committee shall review applications that are timely, that are complete and that comply with the Natural Heritage Conservation Act and 19.1.3 NMAC and evaluate

them against the criteria in Subsection B of 19.1.3.12 NMAC. The committee may reject untimely applications, incomplete applications or applications that do not comply with the Natural Heritage Conservation Act or 19.1.3 NMAC. The department secretary, upon request by the committee, may provide technical assistance through staff assignment or a group of public agency and private individuals selected to assist during a specified review cycle. After review, the committee shall make its recommendations on all evaluated conservation projects to the department.

B. The committee shall evaluate applications for conservation projects based upon the following criteria:

- (1) the degree to which the conservation project serves the purposes of the Natural Heritage Conservation Act;
- (2) the extent of cash and in-kind matching financial support for the conservation project from sources other than the state, in context with the amount of funding requested and available overall;
- (3) the applicant's and partner's technical qualifications and its ability to complete and maintain the proposed conservation project;
- (4) the degree to which the conservation project fosters and integrates with existing conservation plans, strategies and initiatives;
- (5) the potential for benefits at the landscape and ecosystem scale;
- (6) the potential for improved public access for outdoor recreation opportunities, including hunting and fishing;
- (7) the potential for economic benefits, including direct commerce and ecosystem services, of the completed conservation project;
- (8) complementary or strategic values through proximity to other conservation actions, priorities or projects;
- (9) conservation project readiness for completion on a timely schedule;
- (10) degree and extent of partner involvement;
- (11) the likelihood that the conservation project as proposed will have long-term success in achieving its purposes and will have long-term sustainability, including involvement of land dedicated to conservation purposes and an explicit monitoring plan.

C. The committee will evaluate and categorize applications according to the following matrix of factors and relative values and base its assessment and recommendations on the matrix. The committee has discretion to determine how to use

the information from the matrix to determine value assignments among features of each application, in consideration of any limitations identified in the application cycle announcement as provided for in Subsection A of 19.1.3.11 NMAC.

Factor	Level 4	Level 3	Level 2	Level 1
Serves purposes of the Natural Heritage Conservation Act	Clearly serves all purposes	Clearly serves multiple purposes	Clearly serves one purpose and may serve others	Questionable if any purposes are adequately served
Extent of matching cash and in-kind financial support	Applicant/Partner provide more than 75% of project costs	Applicant/Partner provide 50 to 75% of project costs	Applicant/Partner provide 25 to 49% of project costs	Applicant/Partner provide less than 25% of project costs
Qualifications and ability of applicant and partners to complete and maintain proposed project	Substantial past experience and continuing capability to do proposed work and follow-up	Demonstrated completions of similar work and is fully structured to do similar work	Demonstrates some past ability and basic documented qualifications and infrastructure	Indicates uncertain capability or has no prior experience and necessary infrastructure
Degree of fostering existing conservation plans, strategies and initiatives (PSIs) specified in the cycle announcement	Project has substantial relation to most PSIs and directly fosters several	Project clearly fosters multiple PSIs and directly relates to several	Project has clear relation to one PSI and possible service to others	Project has uncertain relation to any PSIs or no clear degree of fostering
Potential for benefits at landscape or ecosystem scale	Substantial landscape and ecological scale benefits are evident in completed work	Substantial landscape or ecological scale benefits are evident in completed work	Desired scale benefits are evident, but are judged minimal	No clear benefits are evident at desired scale

Factor	Level 4	Level 3	Level 2	Level 1
Potential for improved public access to outdoor recreation opportunities on or off project site	Multiple enhanced recreation opportunities are evident, including hunting and fishing	Some enhanced outdoor recreation opportunities are evident and have prospect for growth	Some enhanced outdoor recreation opportunities are evident but are limited	Proposal has no discernible outdoor recreation elements
Potential economic benefits of completed project	Project has multiple economic benefits at multiple scales	Project has some economic benefits locally and broader	Project shows economic benefits, at least locally	Project has no discernible economic benefits
Complementary or strategic values through proximity to other ongoing or completed conservation actions, including any priority areas formally identified by the committee	Project is within a priority area or directly links to nearby completed or ongoing conservation actions and provides added heritage values	Project is within a priority area but has limited relationship to other conservation actions that will provide synergistic heritage values	Project is not within a priority area but has proximity to other actions that may provide synergy or economy of scale or cost effectiveness	Project has no proximity to other conservation endeavors and is not otherwise distinctive as a starting point
Degree of readiness to start and complete project on timely schedule	Readiness and time schedule are clear and background work is complete; timely execution is essentially assured	Readiness and time schedule are clear and reasonable to the project, but could experience some delay	Readiness and time schedule are clear, but have acknowledged or likely delays inconsistent with the nature of the project	Readiness and completion scheduling is unspecified, unclear or uncertain

Factor	Level 4	Level 3	Level 2	Level 1
Degree and extent of partner involvement	Multiple entity project where reasonable partnering is included with clear and substantive involvement and contribution	Multiple entity project where reasonable partnering is included beyond minimal but is not extensive	Single or multiple entity project where partnering is included, but is minimal	Single entity project with no partner involvement when such partnership is possible and advised
Likely long-term success and sustainability	Project is well-described and accomplishable with substantive provisions for sustained maintenance and routine outcome assurance	Project is well-described and accomplishable with basic provisions for sustained maintenance and periodic outcome assessment	Project is inherently achievable but contains limited provisions for maintenance over the long-term	Project appears basically achievable, but long-term outcome is questionable or uncertain

D. A summary of committee judgments, without attribution to individual committee members, among factors described in Subsection C of 19.1.3.12 NMAC will be made public regarding all applications that are recommended to the department for funding and those that are not recommended to be funded.

[19.1.3.12 NMAC - N, 7/30/2010]

19.1.3.13 GRANT AWARDS:

A. A conservation project involving acquisition of a conservation or agricultural easement requires an appraisal that establishes the fair market value of the conservation or agricultural easement and meets United States treasury regulations and the uniform standards of professional appraisal practice before the department will disburse the funds to the qualified entity.

B. In addition, for conservation projects involving acquisition of a conservation or agricultural easement, the qualified entity or partner conservation entity shall provide as specified by the department documents including a title commitment; phase I environmental site assessment and, if needed based on phase I environmental site assessment, a phase II environmental site assessment; a title opinion certifying that the landowner owns the minerals rights or a report, satisfactory to the department, from a professional geologist that the probability of surface mining occurring on such property is so remote as to be negligible; and if deemed necessary by the department, a property

boundary survey. If the landowner owns the mineral rights, an easement shall prohibit subsequent sale or development of mineral rights by the landowner granting the conservation or agricultural easement. A baseline documentation report of the property shall be recorded with the deed of conservation easement or agricultural easement in the office of the applicable county clerk.

C. Agricultural and conservation easements shall contain a provision that if a qualified entity, other than the department, or a partner conservation entity fails to enforce the easement as determined by a court or if either the qualified entity or conservation entity cease to exist, that the easement will go to another qualified entity or partner conservation entity as specified in the easement and agreed to by that qualified entity, or otherwise the easement shall become vested in the department as recommended by the department and other extant easement right holders. Any qualified entity's interest in an easement shall only go to another governmental entity. The department shall have the option to provide similar rights of enforcement or possession to other governmental entities (e.g., federal partners) where such partners have similar rules, regulations or requirements and demonstrated capacity to manage or enforce easements.

D. Grant awards may be approved for use to pay transactional costs for easement projects such as appraisals, title insurance, title opinions, surveys or environmental reviews up to three percent of the total value of the conservation project funded or 10 percent of the amount of the grant, whichever is less. The committee and the department may consider and approve grant requests for paying only transaction costs for easement projects, subject to the grant being for up to three percent of the total value of the conservation project or \$45,000, whichever is less.

E. Overhead and administrative expenses used as in-kind contributions may be no more than 10 percent of the total cost of a project.

F. A qualified entity or conservation entity may use contractors or subcontractors so long as their use is explained in the application, all applicable procurement requirements are met and the contractors or subcontractors are identified by name in the application, to the extent known. If contractors or subcontractors are identified in the application, the qualified entity or entities shall include documentation in the application that demonstrates all applicable procurement requirements were met. The qualified entity or entities associated with an approved project shall be wholly responsible for the project execution and performance, whether or not contractors or subcontractors are used. Use of contractors or subcontractors not identified in an application shall require the department's prior written approval.

G. Prior to commencing any work, any contractors or subcontractors may be required to furnish state certification from insurers for coverage in the minimum amounts as designated by the state. Appropriate coverage shall be maintained in full force and effect during the term of the project and shall not serve to limit any liabilities or any other

contractor obligations. The state and the department must be added as additional insured as required by statute, agreement or other obligation.

[19.1.3.13 NMAC - N, 7/30/2010]

19.1.3.14 PUBLIC-PRIVATE CONSERVATION PROJECTS:

A. Conservation or agricultural easements. Conservation projects that are the joint acquisition of a conservation easement or agricultural easement by a qualified entity and a conservation entity and are funded in part with a grant to a qualified entity shall meet the following requirements.

(1) The qualified entity and conservation entity shall hold title to the conservation easement or agricultural easement as cotenants having undivided interests in proportion to each entity's share of the acquisition.

(2) The conservation entity shall acquire no less than 10 percent of the easement as a percentage of the appraised easement value and may do so through cash or in-kind contributions to the total project value not paid by a qualified entity. If an in-kind contribution, no portion of that contribution shall be comprised of the portion of a donation by a landowner for which the landowner has been previously compensated through a state tax incentive or credit, but nothing in this provision shall diminish the ability for any landowner to be eligible to apply for any state tax incentive or credit.

(3) The conservation entity, as part of the qualified entity's application, shall submit a plan for the conservation and stewardship of the lands for which the conservation entity and the qualified entity are responsible. The plan shall comply with the purposes of the Natural Heritage Conservation Act and shall specifically identify the entity responsible for ongoing monitoring and stewardship.

B. Land restoration. When a conservation entity has partnered with a qualified entity on a land restoration project that is funded in part with a grant to a qualified entity, the following requirements apply.

(1) The conservation entity shall provide at least 10 percent of the cost of the conservation project and may do so, all or in part, through cash or in-kind contributions to the total project cost not paid by a qualified entity.

(2) The qualified entity shall submit a plan for management of the lands for which the qualified entity and conservation entity are responsible. A conservation entity partner may prepare the management plan. The management plan shall comply with the purposes of the Natural Heritage Conservation Act and shall specifically identify the entity responsible for ongoing management, stewardship and monitoring.

[19.1.3.14 NMAC - N, 7/30/2010]

19.1.3.15 MONITORING REPORT REQUIREMENTS:

A. Qualified entities awarded grants from the fund shall submit annual reports, by December 1 each year, to the department for 10 years after the date of the acquisition of the conservation or agricultural easement or the date of a grant agreement for a land restoration project, unless a longer or shorter monitoring period is mutually agreed in writing among the department and the qualified entity. On joint public-private conservation projects, the qualified entity may delegate this requirement to a conservation entity. The designated responsible qualified entity or conservation entity shall document easement monitoring activities in perpetuity and keep all documentation available for review by the department at any time. Annual reporting and perpetual documentation shall describe the subject property's management by the landowner and include the details of the qualified entity's and any partner conservation entity's stewardship and monitoring activities. For land restoration projects, the report shall provide at least a qualitative assessment of the degree to which the project has accomplished or is accomplishing the objectives specified in the land restoration project application and grant agreements. Monitoring involves assessment of a conservation project for indications that the pre-specified objectives and intent are being met or that trends are in that direction; there is no requirement for scientific-based, cause-effect research and data collection unless such efforts are specifically made a part of the project agreement at the outset or in subsequent amendments of the agreement. The qualified entity or any designated partner entity shall collect sufficient baseline information during the first year of the project such that subsequent monitoring and description of change can be accomplished.

B. A qualified entity's failure to comply with the reporting or documentation requirements, including ensuring proper reporting or documentation by the conservation entity if this requirement is delegated, may disqualify the qualified entity from receiving future grant funding.

[19.1.3.15 NMAC - N, 7/30/2010]

19.1.3.16 COMPLIANCE:

The department may audit a qualified entity's or conservation entity's records including stewardship records, financial statements and supporting records relating to the grant award. The qualified entity shall retain such documents pursuant to state and federal requirements, except for stewardship records, which the qualified or conservation entity shall maintain for 10 years, unless a longer or shorter period is mutually agreed in writing among the department and the qualified entity. If the qualified entity is partnering with a conservation entity, the qualified entity shall have a written agreement with the conservation entity that requires the conservation entity to maintain its records for the same time period and allow the department to audit those records. The department may terminate a grant agreement or disqualify a qualified entity from receiving future grants upon discovery of a violation of the terms of the grant agreement or 19.1.3 NMAC.

[19.1.3.16 NMAC - N, 7/30/2010]

19.1.3.17 STATUS REPORTING:

The department shall report, including committee outcomes, annually by December 15 to the governor and legislature on status of applications and funded projects.

[19.1.3.17 NMAC - N, 7/30/2010]

PART 10 COMMUNITY ENERGY EFFICIENCY DEVELOPMENT (CEED) PROGRAM

19.1.10.1 ISSUING AGENCY:

Energy, Minerals and Natural Resources Department.

[19.1.10.1 NMAC – N, 5/16/2023]

19.1.10.2 SCOPE:

Part 19.1.10 NMAC applies to all eligible entities applying for a grant from the community energy efficiency development (CEED) program.

[19.1.10.2 NMAC – N, 5/16/2023]

19.1.10.3 STATUTORY AUTHORITY:

Part 19.1.10 NMAC is authorized pursuant to Subsection B of 62-17A-3 NMSA 1978, and Subsection E of Section 9-1-5 NMSA 1978.

[19.1.10.3 NMAC – N, 5/16/2023]

19.1.10.4 DURATION:

Permanent.

[19.1.10.4 NMAC – N, 5/16/2023]

19.1.10.5 EFFECTIVE DATE:

May 16, 2023, unless a later date is cited at the end of a section.

[19.1.10.5 NMAC – N, 5/16/2023]

19.1.10.6 OBJECTIVE:

The objective is to establish procedures for administering the program, adopt application requirements and evaluation criteria, and define the purposes and qualifications for which CEED program funding may be utilized.

[19.1.10.6 NMAC – N, 5/16/2023]

19.1.10.7 DEFINITIONS:

For additional definitions, refer to Section 62-17A-2 NMSA 1978.

A. "Act" means the Community Energy Efficiency Development Block Grant Act, 62-17A NMSA 1978.

B. "Affordable housing assessment" means a calculation of rent or a mortgage that is no more than thirty percent of the United States department of housing and urban development's state income limits as updated each year for low-income, very low-income residents, and residents whose income is thirty percent of the state median income.

C. "Applicant" means one or more representatives of an eligible entity writing an application for a CEED program grant.

D. "Division director" means the director of the department's energy conservation and management division.

E. "Eligible entity" means an organization that may apply for a grant from the CEED program and includes an Indian nation, tribe, or pueblo; county; municipality; or the New Mexico mortgage finance authority (MFA).

F. "Program" means the CEED program administered by the division.

G. "Type one projects" means projects which have the eligibility requirements described in subsection 19.1.10.12 NMAC.

H. "Type two projects" means projects by the MFA which have the eligibility requirements described in subsection 19.1.10.13 NMAC.

[19.1.10.7 NMAC – N, 5/16/2023]

19.1.10.8 PURPOSE:

Community energy efficiency projects are projects that provide improvements to residential buildings in an underserved community that will, in the aggregate, reduce energy consumption, energy-related operating costs, carbon intensity of energy consumption, or a combination thereof. These projects will target the adoption of energy-efficient consumer behavior, equipment, or devices that result in a decrease in

energy consumption without reducing the amount or quality of energy services. This includes health and safety measures, including those that use efficient equipment or devices to improve indoor air or drinking water quality. It is the responsibility of the applicant to demonstrate how the proposed projects correspond to these requirements.

[19.1.10.8 NMAC – N, 5/16/2023]

19.1.10.9 ELIGIBILITY:

A. Entity categories. The CEED program will fund entities in the following categories when funds are available:

- (1) an Indian nation, tribe, or pueblo;
- (2) a county;
- (3) a municipality; and
- (4) the MFA.

B. Project location. The CEED program shall only award grants to eligible entities for a community energy efficiency project located in New Mexico.

[19.1.10.9 NMAC – N, 5/16/2023]

19.1.10.10 APPLICATION PROCESS:

A. Application acceptance. To apply for a CEED program grant, an applicant shall:

- (1) obtain the division-developed CEED program application from the division,
- (2) conform to the application instructions determined by the division,
- (3) submit the completed application to the division.

Applications will be accepted by approved electronic application system, or alternate submission options may be authorized by the division director upon request.

B. Application completeness.

(1) Upon receipt of applications, division staff will review for eligibility, completeness, and compliance with the rule and application instructions.

(2) In the event that the application is incomplete, the applicant will be notified by the division. The applicant must then submit the information requested in connection

with an incomplete application in the timeframe established by the division. Applicants that do not respond in the established timeframe may be disqualified.

(3) The division will determine whether an application is complete, and its decision is final.

(4) Approval will be granted in two stages. Preliminary approval requires an application submission and division selection. Final approval requires an additional grant of authority submission as required in 19.1.10.16 NMAC before full division approval may be granted.

C. Application review. The division may consult appropriate agencies or experts for information and advice concerning technical aspects and evaluation of any application.

D. Additional criteria. The division may require applications meet additional criteria consistent with the goal of improving the energy efficiency, livability, or public health and safety of affordable housing in underserved communities.

[19.1.10.10 NMAC – N, 5/16/2023]

19.1.10.11 APPLICATION SUBMISSION CYCLE:

Contingent upon availability of funds and state appropriations, the division will request applications on an annual cycle that aligns with the state government's fiscal year. The division will determine and announce the application due date(s) for each application cycle no less than 60 days before each application due date.

[19.1.10.11 NMAC – N, 5/16/2023]

19.1.10.12 TYPE ONE PROJECTS: APPLICATION REQUIREMENTS FOR AN INDIAN NATION, TRIBE, OR PUEBLO; COUNTY; MUNICIPALITY; OR THE NEW MEXICO MORTGAGE FINANCE AUTHORITY:

Applications for CEED Program type one project grant funding shall include the following sections:

A. Applicant contact information. This section identifies the full legal name and address of the applicant entity, and the name, title, telephone number, and e-mail address for the person(s) authorized to negotiate a contract on behalf of the entity. Identify names, titles, telephone numbers, and e-mail addresses of person(s) to be contacted for clarification.

B. Project description. This section of the application shall clearly describe the community energy efficiency project that is being proposed, the selected geographic areas or property addresses where the project will take place, data detailing the

justification for selection, how the project would support infrastructure improvements for affordable housing, and how the project would provide energy efficiency improvements to residential buildings in an underserved community.

C. Community description. This section of the application shall clearly identify the targeted underserved community and describe the energy-related needs of the community and the benefits this community would receive if the proposed project was implemented.

D. Participant eligibility requirements. Applicants shall demonstrate the ability to determine which participant households within the proposed community meet the eligibility criteria. Applicants are responsible for determining if and certifying that a household is eligible for this program. Applicants must certify that the households receiving services have been verified for eligibility prior to the commencement of project work. The division reserves the right to audit project eligibility at the discretion of the division. Eligible households include:

(1) residential housing units occupied by low-income individuals, couples, or families whose annual household adjusted gross income, as defined in section 62 of the federal Internal Revenue Code of 1986, as amended or renumbered, does not exceed two hundred percent of the federal poverty level, within an underserved community; or

(2) residential housing units within an underserved community that otherwise meet the criteria for housing that is affordable to low-income persons,

(3) low income verified by the applicant by any of the following methods:

(a) Direct income verification by the most recent tax returns of the household.

(b) Eligibility is assumed if, within five years of household application:

(i) person(s) within the household receives federal or state disability assistance;

(ii) person(s) within the household receives SNAP food benefits;

(iii) person(s) within the household receives TANF temporary assistance benefits;

(iv) person(s) within the household receives medicaid or children's health insurance program benefits;

(v) person(s) within the household participates in a utility low-to-moderate income program.

(c) Affordable housing verification can be evidenced by the fact that the resident receives low-income housing benefits or by mortgage or rental agreement.

(d) Other methods of eligibility must be approved by the division prior to application submission.

E. Scope of work. Applications shall detail the energy efficiency measures that will be implemented for the targeted households and demonstrate how these measures will address the energy-related needs of those households. This demonstration should include, as appropriate, the estimated reduction of energy use that will come from implementation of these measures, the estimated reduction of energy cost that will come from implementation of these measures, and the estimated reduction in carbon intensity of energy consumption. The description should also include the average impact by household along with the aggregated impact of the project, a timeline for implementation, the approach for maximizing project benefits, and metrics which will determine success in implementation. Metrics proposed in applications may be tailored to the individual project.

F. Partnerships. Applications shall detail the partnerships that the applicant(s) have established to achieve project implementation, including:

(1) one or more service providers, including subcontractors that will use local safety and code standards to implement the energy efficiency measures in targeted households and the experience of the service provider in working with the target underserved community. If the service provider has committed to employ apprentices from a registered apprenticeship program that promotes diversity or provides paid internships to persons from the targeted underserved community, this should be detailed in this section; and

(2) one or more community partners that have identified and worked with targeted households to implement the project and the experience of the community partner in working with the target underserved community. If the community partner has committed to employ apprentices from a registered apprenticeship program that promotes diversity or provides paid internships to persons from the targeted underserved community, this should be detailed in this section.

G. Budget. Applications shall detail the project budget including anticipated expenditures for the entire project and additional funding sources that would complement the CEED program grant, if obtained. The project should strive to maximize benefits in the community to the greatest extent practicable and be reflected in the amount sought per household. The budget should include the total project amount, the average amount per household, administrative costs, partnership expenses, and any other applicable expenses that are being requested.

19.1.10.13 TYPE TWO PROJECTS: APPLICATION REQUIREMENTS FOR THE NEW MEXICO MORTGAGE FINANCE AUTHORITY:

Applications for CEED program type two project grant funding shall include the following sections:

A. Applicant contact information. This section identifies the name, title, telephone number, and e-mail address for the person or persons authorized to negotiate a contract on behalf of the applicant entity. Identify names, titles, telephone numbers, and e-mail addresses of persons to be contacted for clarification.

B. Project description. This section of the application shall clearly describe the community energy efficiency project that is being proposed, the address of the property or properties where the project will take place, how the project would support infrastructure improvements for affordable housing that would complement and not duplicate other energy efficiency programs in the state; and

(1) sets forth the energy efficiency improvements to residential housing units, regardless of whether the residential housing units are located in an underserved community, provided that the residential housing units meet the eligibility criteria established by the MFA; and

(2) describes how energy efficiency improvements to the residential housing units will help to reduce the energy burden of low-income households that may not qualify for other energy efficiency programs in the state.

C. Scope of work. Applications shall detail the energy efficiency measures that will be implemented for the targeted households and demonstrate how these measures will address the energy-related needs of those households. The application should include, as appropriate, the estimated reduction of energy use that will come from implementation of these measures, the estimated reduction of energy cost that will come from implementation of these measures, and the estimated reduction in carbon intensity of energy consumption. The description should also include the average impact by household along with the aggregated impact of the project, a timeline for implementation, the approach for maximizing project benefits, and metrics which will determine success in implementation.

D. Partnerships. Applications shall detail the partnerships that the applicant(s) have established to achieve project implementation, including:

(1) one or more service providers, including subcontractors that will use local safety and code standards to implement the energy efficiency measures in targeted households and the experience of the service provider in working with the target underserved community. If the service provider has committed to employ apprentices from a registered apprenticeship program that promotes diversity or provides paid

internships to persons from the targeted underserved community, this should be detailed in this section; and

(2) one or more community partners that will identify and work with targeted households to implement the project and the experience of the community partner in working with the targeted underserved community. If the community partner has committed to employ apprentices from a registered apprenticeship program that promotes diversity or provides paid internships to persons from the targeted underserved community, this should be detailed in this section.

E. Budget. Applications shall detail the project budget including anticipated expenditures for the entire project and additional funding sources that would complement the CEED program grant, if obtained. The project should strive to maximize benefits in the community to the greatest extent practicable and be reflected in the amount sought per household. The budget should include the total project amount, the average amount per household, administrative costs, partnership expenses, and any other applicable expenses that are being requested.

[19.1.10.13 NMAC – N, 5/16/2023]

19.1.10.14 APPLICATION EVALUATION CRITERIA FOR PROJECTS FROM AN INDIAN NATION, TRIBE, OR PUEBLO; COUNTY; OR MUNICIPALITY:

Applications will be scored by the division based on the following criteria that include but are not limited to:

A. Application completeness. The division will review the entire application to see that it contains all application requirements for the specific project type.

B. Capability to meet the scope of work described. The division will consider the project timeline, appropriateness of energy efficiency measures to be implemented, qualifications of project team members including subcontractors and community partners, and the ability to complete the project financially if the total budget exceeds the amount requested.

C. Budgetary considerations. The division will consider the total proposed budget as well as the average amount requested per household, prioritizing applications which propose to maximize project benefits in the community to the greatest extent feasible. The division may ask the applicant for additional documents to support the proposed budget if deemed necessary.

D. Energy reduction potential. The division will consider the estimated reduction of energy use that will come from implementation of the proposed measures, the estimated reduction of energy cost that will come from implementation of the proposed measures, and the estimated reduction in carbon intensity of energy consumption from implementation of the proposed measures.

E. Geographic diversity. The division will consider the geographic diversity of applications submitted in each application cycle.

F. Partnership experience. The division will consider the experience of each community partner and service provider identified in the application in working with the targeted underserved community.

G. Workforce impact. The division will consider whether the partners identified in the application employ apprentices from a registered apprenticeship program that promotes diversity or if they provide paid internship to persons from the targeted underserved communities.

H. Replicability. The division will consider the value of the project as a demonstration project to provide data for the effectiveness of implementing similar projects elsewhere.

I. Underserved community benefits. The division will consider the degree to which the project benefits an underserved community, including any non-energy benefits and health benefits provided by the project.

J. Additional criteria. If the criteria are published in the project solicitation, the division may also consider:

- (1) the degree to which the project will protect public health, including protecting underserved communities from a public health threat;
- (2) the degree to which the project will contribute to economic recovery; or
- (3) the degree to which the project will reduce economic hardship of individual families due to the coronavirus COVID-19 pandemic.

[19.1.10.14 NMAC – N, 5/16/2023]

19.1.10.15 APPLICATION EVALUATION CRITERIA FOR PROJECTS FROM THE NEW MEXICO MORTGAGE FINANCE AUTHORITY:

Applications will be scored by the division based on the following criteria, that include but are not limited to:

A. Application completeness. The division will review the entire application to see that it contains all application requirements for the specific project type.

B. Capability to meet the scope of work described. The division will consider the project timeline, appropriateness of energy efficiency measures to be implemented, qualifications of project team members including subcontractors and community

partners, and the ability to complete the project financially if the total budget exceeds the amount requested.

C. Budgetary considerations. The division will consider the total proposed budget as well as the average amount requested per household, prioritizing applications which propose to maximize project benefits in the community to the greatest extent feasible. The division may ask the applicant for additional documents to support the proposed budget if deemed necessary.

D. Energy reduction potential. The division will consider the estimated reduction of energy use that will come from implementation of the proposed measures, the estimated reduction of energy cost that will come from implementation of the proposed measures, and the estimated reduction in carbon intensity of energy consumption from implementation of the proposed measures. The division will also consider if the community served would not be likely to otherwise receive energy efficiency improvements through other state programs.

E. Geographic diversity. The division will consider if the application would promote the geographic diversity of the portfolio of community energy efficiency projects.

F. Partnership experience. The division will consider the experience of each community partner and service provider identified in the application in working with the targeted underserved community.

G. Additional criteria. The division will consider if the application would help create a portfolio of community energy efficiency projects that would best meet the goals of the CEED Block Grant Act.

[19.1.10.15 NMAC – N, 5/16/2023]

19.1.10.16 FINAL APPROVAL OF APPLICATIONS:

A. Indian nation, tribe, or pueblo: If applicable based on statute, prior to the division's final approval of an application, an applicant that is an Indian nation, tribe, or pueblo must provide the division with a copy of a resolution enacted by the Indian nation, tribe, or pueblo that provides approval for a specific CEED program grant and must include in the resolution the terms and conditions of the grant approved by the division. If such a resolution is not supplied to the division, final approval of the application shall not be issued.

B. County or municipality: If applicable based on statute, prior to the division's final approval of an application, an applicant that is a county or municipality must provide a copy of the ordinance enacted by the county or municipality that provides the county's or municipality's formal approval for a specific CEED program grant and must include in the ordinance the terms and conditions of the grant approved by the division.

If such a resolution is not supplied to the division, final approval of the application shall not be issued.

C. New Mexico Mortgage Finance Authority:

(1) Required grant of authority. If applicable based on statute, prior to the division's final approval of an application from the MFA for a CEED program grant, the MFA shall provide the division with formal approval of the MFA to accept a specific CEED program grant. If this is not supplied to the division, final approval of the application shall not be issued.

(2) Project coordination. The division and the MFA shall coordinate the work done pursuant to CEED Program grants in the state to implement energy efficiency measures.

D. Contracts: For selected project applications, the division will approve and enter into contracts with grantees to implement selected community energy efficiency projects. All contracts shall have project performance measures, penalties, or other provisions that ensure the successful completion of the projects and shall require reporting on project performance, energy savings, and non-energy benefits resulting from the energy efficiency measures.

[19.1.10.16 NMAC – N, 5/16/2023]

19.1.10.17 FUNDING:

Funding for CEED program projects may come from state, federal, other eligible funding sources, or a combination thereof.

A. If the funding source requires a set-aside allotment, entity categories shall have a percentage allotment of available funding reserved in any given fiscal year. If an allotment is not reached in any given entity category, the division will decide how to leverage the remaining funds against eligible projects.

B. If a set budgetary amount is identified in the application instructions, projects exceeding that amount which have provided justification and demonstrated need for the additional cost may request consideration for the increased amount, to be approved at the discretion of the division director.

[19.1.10.17 NMAC – N, 5/16/2023]

19.1.10.18 RECORD KEEPING AND REPORTING:

Successful applicants receiving CEED program grants shall submit progress and expenditure reports, including a final report, in accordance with the requirements of their respective contract or agreement. Reporting requirements may be on a project-specific

basis. The division will process reimbursements for costs that are incurred no more than once per month. The division will notify applicants as necessary of the funding source(s) applied to their projects and any associated reporting and compliance requirements associated with the funding. Applicants shall be responsible for satisfying any such requirements associated with an identified funding source as part of the grant solicitation or award in addition to the requirements of this part.

[19.1.10.18 NMAC – N, 5/16/2023]

19.1.10.19 ADMINISTRATIVE AND LEGAL REQUIREMENTS:

A. Environmental and cultural resources compliance for projects anticipating ground disturbance. Successful applicants receiving CEED program funding shall provide a statement to demonstrate acknowledgement of compliance with all applicable federal, state, and local environmental and cultural resources laws.

B. Administrative compliance. Successful applicants receiving CEED program funding shall adhere to all applicable federal and state fiscal or procurement laws and any other applicable procurement procedures established by the division, in order to ensure that grant funds are expended in accordance with state and federal law including rules and regulations.

C. Program oversight. Successful applicants receiving CEED program funding shall be subject to periodic monitoring by the division to ensure compliance with applicable laws, rules, and regulations; the grant contract or agreement; and the program guidelines.

(1) Entities must cooperate fully with such evaluations, including, but not limited to, making all financial and program records available for inspection and personnel available for interview.

(2) If an entity materially fails to comply with the CEED program terms and conditions, whether stated in a law, statute, rule, regulation, assurance, application, or notice of award, the division director may take one or more enforcement actions, including terminating the grant, imposing specific conditions upon the award, or other remedies that may be legally available.

[19.1.10.19 NMAC – N, 5/16/2023]

19.1.10.20 VARIANCES:

Written requests for a variance from any of the provisions of this rule shall:

A. state the reasons for the variance request;

B. identify each of the sections of this rule for which a variance is requested;

C. describe the effect the variance will have, if granted, on compliance with this rule;

D. describe how granting the variance will not compromise, or will further, the purposes of this rule; and

E. indicate why the proposed variance is a reasonable alternative to the requirements of this rule.

[19.1.10.20 NMAC – N, 5/16/2023]

19.1.10.21 MAINTENANCE AND INSPECTION OF PUBLIC RECORDS ACT/CONFIDENTIAL INFORMATION:

All information obtained regarding the project, including pre-applications, applications for funding, and reports are subject to disclosure, in response to requests received under provisions of the New Mexico Inspection of Public Records Act, Sections 14-2-1 to 14-2-12 NMSA 1978. Information that could reasonably be considered to be proprietary, privileged or confidential commercial or financial information must be identified as such by the applicant. The division will maintain the confidentiality of that information only to the extent permitted by law.

[19.1.10.21 NMAC – N, 5/16/2023]

CHAPTER 2: STATE TRUST LANDS

PART 1: GENERAL PROVISIONS [RESERVED]

PART 2: LEASING FOR GENERAL MINING

19.2.2.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501.

[9.2.2.1 NMAC - N, 03/14/2001]

19.2.2.2 SCOPE:

Pursuant to Article XIII, Section 2, of the New Mexico State Constitution, the commissioner has jurisdiction over all lands and related resources that the United States granted and confirmed to the state of New Mexico under the New Mexico Enabling Act. This rule, 19.2.2 NMAC, governs the exploration for and development of minerals, as defined herein, within the commissioner's constitutional jurisdiction. This rule also governs reclamation of trust lands affected by mining. This rule does not apply to mining activity authorized and carried out pursuant to other rules of the commissioner of public lands.

[19.2.2.2 NMAC - N, 03/14/2001]

19.2.2.3 STATUTORY AUTHORITY:

N.M. Const. Art. XIII; Section 19-1-1 *et seq.* NMSA 1978; Section 19-6-1 *et seq.* NMSA 1978; Section 19-7-1 *et seq.* NMSA 1978; Section 19-8-1 *et seq.* NMSA 1978; Section 19-14-1 *et seq.* NMSA 1978.

[19.2.2.3 NMAC - N, 03/14/2001]

19.2.2.4 DURATION:

Permanent.

[19.2.2.4 NMAC - N, 03/14/2001]

19.2.2.5 EFFECTIVE DATE:

March 14, 2001, unless a later date is cited at the end of a section.

[19.2.2.5 NMAC - N, 03/14/2001; A, 06/30/2016]

19.2.2.6 OBJECTIVE:

The objectives of 19.2.2 NMAC are to obtain revenues from production of minerals; to assure protection and maintenance of trust surface estate and minerals; to provide standard lease terms and conditions; and to provide an efficient process for mineral leasing.

[19.2.2.6 NMAC - N, 03/14/2001]

19.2.2.7 DEFINITIONS:

As used in 19.2.2 NMAC, the following terms have the meaning set forth in this section unless otherwise indicated in the text of this rule.

A. "Arm's-length sales price" means the sales price resulting from a good faith sale of minerals between an unaffiliated seller and buyer who have comparable negotiating power, the seller being under no obligation to sell and the buyer being under no obligation to purchase. Where minerals are not actually sold in an arm's-length transaction, the arm's-length sales price shall be estimated by the lessee, using methods approved by the commissioner, in accordance with Sections 55-2-723 & 724, NMSA 1978 of the New Mexico Uniform Commercial Code or other comparable method.

B. "Commissioner" means the commissioner of public lands. The commissioner is the executive officer of the NMSLO and may delegate to NMSLO staff the performance of duties required of the commissioner under this rule.

C. "Comparable law" means a federal, state or local regulatory program that the commissioner determines, in writing, is applicable to mining activity and which will, as a practical matter, assure reclamation of trust surface estate to substantially the same standard required under the New Mexico Mining Act. The issue of whether a given regulatory program constitutes comparable law will arise only where the mining activity in question is not regulated under the New Mexico Mining Act.

D. "Contiguous" means adjoining and having at least one common side or boundary.

E. "Financial assurance" means a bond, surety, letter of credit, certificate of deposit or other instrument obtained for the purpose of guarantying performance of an obligation.

F. "Lease or mineral lease" means a lease issued under this 19.2.2 NMAC that must be obtained prior to exploring for, extracting or producing minerals.

G. "Legal subdivision" means legal subdivision as used and recognized by the federal bureau of land management and the NMSLO, ordinarily consisting of forty acres, more or less, or one sixteenth part of a standard section, including lots as designated by the U.S. survey plats.

H. "Lessee" means the persons who, according to the records of the NMSLO, are contractually obligated to the commissioner under a mineral lease. "Lessee" includes the lessee's successors in interest and approved assignees of the lease.

I. "Mine development plan" means a written plan that provides for the efficient and orderly development of mineral reserves and prevention of waste of surface and subsurface resources within the commissioner's jurisdiction.

J. "Minerals" means all natural substances within the commissioner's jurisdiction that can be extracted, taken or otherwise derived from the earth, except as expressly excluded hereunder. **Exclusions:** For purposes of 19.2.2 NMAC, "mineral" does not include potassium, sodium, sulfur, phosphorus, common salt, oil and gas, coal, shale, clay, gravel, building stone, and building materials, including gypsum, timber or any material leased or disposed of under another rule issued by the commissioner.

K. "Mining activity" means, except as excluded hereunder, any activity that satisfies the following two-part test. First, the activity physically or chemically disturbs or alters lands, minerals or other resources within the commissioner's jurisdiction. Second, the purpose of the activity is to explore for, extract and/or produce minerals, or the activity is incidental to or related to such exploration, extraction and/or production.

Exclusions: "mining activity" does not include any activity authorized and carried out pursuant to other rules issued by the commissioner.

L. "Mining and minerals division or MMD" means the mining and minerals division of the New Mexico department of energy, minerals and natural resources, or any successor agency that may become responsible for enforcing the New Mexico Mining Act.

M. "New Mexico Mining Act or Mining Act" means the New Mexico Mining Act, Section 69-36-1 *et seq.* NMSA 1978.

N. "NMSLO" means the state land office created by Section 19-1-1 NMSA 1978, the executive officer of which is the commissioner.

O. "Paying quantities" means the quantity of minerals that must be produced from the premises and sold in a given lease year to carry on a profitable mining operation on the premises. For purposes of this rule, "paying quantities" does **not** include minerals extracted from outside the premises, even though such lands may comprise part of the same overall mining operation.

P. "Permitting agency" means MMD or, if the New Mexico Mining Act is not applicable to the mine site at issue, the government agency or agencies responsible for enforcing comparable law, if any.

Q. "Premises" means the lands encumbered by the mineral lease as originally issued and described therein.

R. "Production" means any extraction of minerals by any means whatsoever, except as expressly excluded hereunder. **Exclusions:** "production" does not include: (1) the extraction of minerals for the purpose of exploring, testing or sampling, unless these minerals are beneficially used or sold or otherwise disposed of for value; or (2) the removal of overburden, waste rock, matrix or host rock, soil or the like, unless minerals derived from these materials are beneficially used, sold or otherwise disposed of for value.

S. "Reclamation plan" means a written document approved by the commissioner that consists of: (1) the mining permit(s) issued by the permitting agency, and (2) any additional requirements deemed necessary by the commissioner. As used herein, "reclamation plan" includes the original reclamation plan and any additional plans approved by the commissioner.

T. "Schedule of fees" means a list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

U. "Special minerals" means rare earth minerals, precious and semi-precious stones, uranium, thorium or any other minerals which have been or may hereafter be determined to be essential to the production of fissionable materials.

V. "Trust" means the trust created by congress under the New Mexico Enabling Act of June 20, 1910, and accepted by the state of New Mexico under Articles XIII and XIV of the New Mexico Constitution.

W. "Trust surface estate" means "public lands of the state," as identified in Article XIII, Section 1 of the New Mexico Constitution, in which the state holds legal title to the surface estate. "Trust surface estate" includes "public lands of the state" that are subject to a purchase contract until the commissioner issues the patent conveying the state's legal interest therein to the contract purchaser.

[19.2.2.7 NMAC - N, 03/14/2001; A, 06/30/2016]

19.2.2.8 PROHIBITIONS:

A. No person shall explore for, extract or produce minerals unless authorized by a mineral lease issued under this rule.

B. Notwithstanding the issuance of a mineral lease or special use permit, no person shall conduct any mining activity unless such activity is authorized under a permit or other authorization issued pursuant to the New Mexico Mining Act or comparable law.

[19.2.2.8 NMAC - N, 03/14/2001]

19.2.2.9 THE NMSLO IS A LAND MANAGEMENT AGENCY:

The NMSLO constitutes a "land management agency" within the meaning of the regulations promulgated under the New Mexico Mining Act by the mining and minerals division.

[19.2.2.9 NMAC - N, 03/14/2001]

19.2.2.10 RECREATION PERMITS:

The premises shall not be open to recreational access under Title 19 Chapter 2 Part 19, *Relating to Recreational Access to State Trust Lands*.

[19.2.2.10 NMAC - N, 03/14/2001]

19.2.2.11 GENERAL PROCESS FOR OBTAINING A MINERAL LEASE:

The general process for obtaining a mineral lease is as follows: First, the area where the minerals are located is shown as open to general mining on the tract books of the

NMSLO (see 19.2.2.12 NMAC). Second, the commissioner, after determining that development of minerals in the area appears to be in the best interest of the trust, publishes notice of a mineral lease sale (see 19.2.2.14 NMAC). Third, the commissioner conducts a public auction at which bidders compete for a mineral lease by seeking to offer the highest bonus (see 19.2.2.15 NMAC, 19.2.2.16 NMAC and 19.2.2.17 NMAC). The bonus is the amount the bidder offers to pay the trust in return for obtaining a mineral lease and is in addition to other payments that may be required under the mineral lease or this rule, such as royalties, rents and fees. Fourth, the highest bidder (the one offering the highest bonus) submits a disclosure statement to the commissioner (see 19.2.2.19 NMAC, 19.2.2.20 NMAC and 19.2.2.21 NMAC). Fifth, unless the commissioner declares the sale void or withdraws the subject area from general mining, the commissioner and the highest bidder will enter into a mineral lease (see 19.2.2.22 NMAC and 19.2.2.23 NMAC).

[19.2.2.11 NMAC - N, 03/14/2001]

19.2.2.12 LANDS OPEN TO GENERAL MINING:

Mineral leasing under 19.2.2 NMAC will be considered only in areas shown as open for general mining upon the tract books of the NMSLO. The commissioner may designate areas for mineral leasing based upon the recommendations of the commissioner's staff or upon nomination submitted to the commissioner.

[19.2.2.12 NMAC - N, 3/14/2001; A, 6/11/2019]

19.2.2.13 COMMISSIONER MAY WITHHOLD LANDS:

Notwithstanding any other provision of 19.2.2 NMAC, and at any time prior to execution of a mineral lease, the commissioner may, at the commissioner's discretion, withhold from mineral leasing any area subject to the commissioner's jurisdiction.

[19.2.2.13 NMAC - N, 03/14/2001]

19.2.2.14 NOTICE OF SALE:

Prior to holding a competitive bid sale for mineral leasing under 19.2.2 NMAC, the commissioner will provide notice to the public. The notice will set forth the place, date and time of the sale. The notice will describe the area to be covered by the mineral lease and the royalty amount and provide any other necessary details of the sale, including whether there shall be a minimum bid and whether the sale shall be by sealed or oral bid. At least ten days prior to the date of sale, NMSLO will post the notice in a conspicuous place in the New Mexico state land office building in Santa Fe, New Mexico, publish it in a paper of local circulation where the minerals are located and mail it to all persons who have requested such notice in writing.

[19.2.2.14 NMAC - N, 03/14/2001]

19.2.2.15 APPLICATION AND BIDDING PROCESS:

When the commissioner decides to offer a mineral lease for sale, the commissioner will auction the lease by requesting sealed or oral bids in accordance with the notice of sale. Persons shall bid by offering to pay a bonus for the mineral lease. Unless the commissioner declares the sale void or withholds the subject area from general mining, the commissioner and the highest bidder will enter into a mineral lease after payment in full of the bonus and first-year's rent. (The "highest bidder" is the person who offers the highest bonus.)

[19.2.2.15 NMAC - N, 03/14/2001]

19.2.2.16 SEALED BIDS:

If the commissioner decides to conduct the public auction by sealed bid, this section shall govern the bidding process.

A. Bidders shall submit their bid to the commissioner in a sealed envelope pursuant to the instructions provided in the notice of sale. The sealed envelope shall include a completed mineral lease application, which shall be in a form prescribed by the commissioner; and payment of the non-refundable application fee as set forth in the schedule of fees. Bidders shall offer and set out the amount of their bid on the mineral lease application.

B. Bids shall be received up to the hour set in the notice of sale, and all bids will be opened at the appointed hour.

C. The bidder offering the highest bonus shall be deemed the highest bidder.

D. Subject to 19.2.2.13 NMAC and 19.2.2.22 NMAC, the commissioner shall enter into a mineral lease with the highest bidder pursuant to 19.2.2.23 NMAC.

[19.2.2.16 NMAC - N, 03/14/2001; A, 06/30/2016]

19.2.2.17 ORAL BIDS:

If the commissioner decides to conduct the public auction by oral bid, this section shall govern the bidding process.

A. Bidders shall register with NMSLO and obtain an identification number pursuant to the instructions in the notice of sale.

B. Bidders shall make their bids orally at the time and place specified in the notice of sale.

C. The bidder offering the highest bonus shall be deemed the highest bidder. Provided, however, that before close of business on the day of the auction, the highest bidder must submit a completed mineral lease application to the commissioner and pay the non-refundable application fee as set forth in the schedule of fees.

D. Subject to 19.2.2.13 NMAC and 19.2.2.22 NMAC, the commissioner shall enter into a mineral lease with the highest bidder pursuant to 19.2.2.23 NMAC.

[19.2.2.17 NMAC - N, 03/14/2001; A, 06/30/2016]

19.2.2.18 TIE BIDS:

In the event the sale is by sealed bids and two or more bidders submit the highest bonus, then the commissioner may provide written notice of a tie to all bidders for the tract. Such notice may request the bidders to offer an additional bonus in the manner specified in the notification letter. Alternatively, the commissioner may declare the sale void.

[19.2.2.18 NMAC - N, 03/14/2001]

19.2.2.19 DISCLOSURE STATEMENT REQUIRED:

A. Within fifteen days of being notified that it is the highest bidder, the highest bidder shall either submit a new disclosure statement to NMSLO or supplement an active disclosure statement previously submitted to NMSLO under 19.2.2.21 NMAC.

B. A person with personal knowledge of the information supplied shall sign and acknowledge the disclosure statement under oath.

C. The highest bidder shall assure that its disclosure statement is correct, accurate and complete. Before issuing a mineral lease, the commissioner may require the highest bidder to provide additional information or clarification. The highest bidder may be disqualified if the commissioner determines that the disclosure statement substantially misrepresents the highest bidder's qualifications or environmental compliance history. If such misrepresentation is discovered after the lease is executed, then the commissioner may cancel the lease and the lessee shall forfeit all rent, bonus and all other sums paid on account of the lease. However, in determining the correctness, accuracy and completeness of the disclosure statement, the commissioner will not consider new or changed circumstances occurring after the mineral lease is issued.

D. Pursuant to Section 19-1-2.1 NMSA 1978, the commissioner shall hold confidential "any confidential contract, reserve data or other confidential information" in the disclosure statement that is clearly marked as "confidential". Only information that is actually covered under Section 19-1-2.1 NMSA 1978 will be held as confidential.

[19.2.2.19 NMAC -N, 03/14/2001]

19.2.2.20 CONTENTS OF DISCLOSURE STATEMENT:

The highest bidder shall provide the following information in its disclosure statement:

- A.** identity of the highest bidder's predecessor and parent organizations and affiliates, if any;
- B.** description of the highest bidder's previous mining experience, including a list of mines currently or previously operated by the highest bidder;
- C.** list of any and all financial assurances designed to assure performance of an obligation that the highest bidder has forfeited in the past ten years; (If the highest bidder is a corporation, partnership, limited liability company or the like, include in the list all forfeitures of entities identified in Subsection A);
- D.** list of any and all penalties and fines in excess of five hundred dollars that the highest bidder has paid in the past ten years for violating or allegedly violating any permit or law whose primary purpose is to protect or assure reclamation of the environment;
- E.** list of all persons who could exercise management control over how the highest bidder conducts mining activity;
- F.** type of minerals (if known) and basis for believing a successful mine can be established in the area of interest;
- G.** proposed methods of exploration and extraction (if known);
- H.** descriptions of any mitigating circumstances that may help explain negative information (such as payment of penalties, etc); and
- I.** other information requested by the commissioner that is pertinent to assessing the highest bidder's qualifications, environmental track record and intentions regarding the area to be covered by the mineral lease.

[19.2.2.20 NMAC - N, 03/14/2001]

19.2.2.21 PRE-QUALIFICATION:

Any person may apply to become pre-qualified to be eligible to obtain a mineral lease by submitting a disclosure statement to the commissioner. Unless submitted for the purpose of obtaining the commissioner's approval for assignment of a particular lease, the disclosure statement need not reference any particular sale, tract or proposed mining project. The commissioner shall evaluate the disclosure statement as soon as

practicable and notify the person, in writing, whether or not the person would be considered a qualified potential lessee. Pre-qualification under this section shall lapse automatically two years after it is submitted, at which time another disclosure statement may be submitted. Notwithstanding a person's pre-qualification under this section, the commissioner reserves the right to require submission of additional information.

[19.2.2.21 NMAC - N, 03/14/2001]

19.2.2.22 COMMISSIONER'S RIGHT TO DECLARE SALE VOID:

Prior to execution of a lease, the commissioner may determine that the mineral sale is not in the best interest of the trust and declare the sale void. The commissioner may declare a sale void if the commissioner determines that the bids are too low, not in accordance with law or otherwise not in the best interest of the trust. The commissioner may declare a sale void based on the disclosure statement or other information available to the commissioner. Prior to declaring a sale void under this section, the commissioner may provide the highest bidder with an opportunity to submit additional or new information, explanation or argument as to why the sale should not be declared void.

[19.2.2.22 NMAC - N, 03/14/2001]

19.2.2.23 MINERAL LEASE:

A. Unless the commissioner declares the sale void or withholds the lands from mining, the commissioner and the highest bidder shall enter into a mineral lease. The commissioner shall prepare a proposed mineral lease in accordance with this rule, in triplicate, and mail all three originals to the highest bidder. If the highest bidder agrees to all terms and conditions of the proposed mineral lease, the highest bidder shall sign the originals and return all three to the commissioner, together with a certified check or money order covering the offered bonus and first-year's rent. The commissioner shall thereafter sign the mineral lease and return one fully executed original to the highest bidder.

B. Mineral leases are to be made upon forms prescribed and furnished by the commissioner and shall, in addition to the terms set out in this rule, contain such terms as the commissioner deems necessary.

C. Leases issued under 19.2.2 NMAC shall cover a specified area conforming to a legal subdivision or subdivisions. The area covered shall not exceed sixteen subdivisions, being six hundred and forty acres more or less, all of which shall be contiguous. Provided, however, that leases issued in exchange for existing permits as provided by Section 19-8-17 NMSA 1978 need not be contiguous if all legal subdivisions are located within the same township and range.

D. The commissioner will not issue a mineral lease in the name of more than two persons. The commissioner will recognize only those persons named on the lease, or an approved assignment of a lease, as the lessee of record. In the case of a trust, the trust must be express and in writing, and a copy of the declaration of trust must be filed with the commissioner. If more than two trustees are named, the lease shall be granted in the names of no more than two trustees acting as attorneys-in-fact for all trustees.

[19.2.2.23 NMAC - N, 03/14/2001]

19.2.2.24 RECLAMATION PLAN REQUIRED:

Notwithstanding the issuance of a mineral lease, no mining activity shall be conducted on trust surface estate except in accordance with a written reclamation plan approved by the commissioner. Reclamation plans consist of the mining permit or other authorizations issued by the permitting agency and any supplemental requirements deemed necessary by the commissioner to assure adequate protection and reclamation of trust surface estate. Upon approval by the commissioner, the reclamation plan shall automatically be incorporated into the mineral lease without the necessity of further agreement between the lessee and the commissioner. A violation of the reclamation plan shall constitute a violation of the mineral lease.

[19.2.2.24 NMAC - N, 03/14/2001]

19.2.2.25 OBTAINING PERMIT FROM THE PERMITTING AGENCY:

A. The lessee shall apply for a permit from the permitting agency in accordance with the New Mexico Mining Act or comparable law, whichever applies. The lessee shall submit copies of its permit application and all supporting documents to the commissioner at the same time that it submits these materials to the permitting agency. The lessee shall also promptly submit copies to the commissioner of all correspondence, reports and other documents regarding the lessee's permit application.

B. The lessee's permit application and supporting documents shall fully disclose the intended mining activity to the permitting agency and the commissioner. The commissioner will review the lessee's application and supporting documents and participate in the permitting process.

C. If the permitting agency requires the land management agency or landowner to approve a proposed permit prior to issuance, the commissioner may withhold such approval if the commissioner determines that a proposed mining activity is not in the best interest of the trust. At the written request of the commissioner, the lessee shall withdraw any such proposed mining activities from its permit application.

[19.2.2.25 NMAC - N, 03/14/2001]

19.2.2.26 SUPPLEMENTAL REQUIREMENTS:

A. After the lessee obtains the permit or other final authorization from the permitting agency in accordance with 19.2.2.25 NMAC, the lessee shall submit a complete and accurate copy of the permit or other authorization to the commissioner. The commissioner will review the permit or other authorization to determine whether to include any supplemental requirements in the reclamation plan.

B. If the commissioner determines that supplemental requirements are needed, the commissioner will notify the lessee of the specific areas of concern, and the lessee shall thereafter propose supplemental requirements to address these concerns. The commissioner will review the lessee's proposal and notify the lessee of any deficiencies, which the lessee shall address in a subsequent submittal. The process of submittal and review shall be repeated until the commissioner approves the lessee's proposed supplemental requirements.

[19.2.2.26 NMAC - N, 03/14/2001]

19.2.2.27 ISSUANCE OF RECLAMATION PLAN:

After the permitting agency issues the mining permit or other authorization and commissioner reviews the permit and approves any supplemental requirements, the commissioner will prepare a reclamation plan. The reclamation plan will consist of the permit or other authorization issued by the permitting agency, incorporated by reference, and any supplemental requirements imposed by the commissioner. The lessee shall sign and acknowledge the plan, in triplicate, and return all three originals to the commissioner. The commissioner shall thereafter approve the reclamation plan by signing the plan, in triplicate, and returning one fully executed original to the lessee.

[19.2.2.27 NMAC - N, 03/14/2001]

19.2.2.28 STRICT COMPLIANCE WITH RECLAMATION PLAN:

The lessee shall conduct mining activity in strict compliance with an approved reclamation plan. The reclamation plan in effect at any given time authorizes only such mining activity as is authorized under the permit or other authorization issued by the permitting agency and expressly incorporated by reference into the plan.

[19.2.2.28 NMAC - N, 03/14/2001]

19.2.2.29 ADDITIONAL RECLAMATION PLANS:

The lessee shall obtain an additional reclamation plan before conducting any mining activity that is not authorized under its existing reclamation plan. The lessee shall obtain the additional reclamation plan to cover the new mining activity by following the procedure set out in 19.2.2.25 NMAC through 19.2.2.27 NMAC. The original and all additional reclamation plans approved by the commissioner shall remain in full force and effect unless otherwise provided in the latest plan approved by the commissioner.

In the event of a direct conflict between the most current reclamation plan and any earlier plan, the most current plan shall govern.

[19.2.2.29 NMAC - N, 03/14/2001]

19.2.2.30 SURVIVAL OF RECLAMATION PLAN REQUIREMENTS:

The lessee's obligation to reclaim the trust surface estate in accordance with the reclamation plan in effect at the time the mineral lease is suspended, relinquished or otherwise terminated for any reason shall survive such suspension, relinquishment or termination and continue so long thereafter as lessee's liability under the Mining Act or comparable law continues. In the event of such suspension, relinquishment or termination of the mineral lease, the commissioner will provide the lessee with written authorization to enter the premises to carry out the reclamation plan.

[19.2.2.30 NMAC - N, 03/14/2001]

19.2.2.31 MINE DEVELOPMENT PLAN REQUIRED:

No minerals shall be produced except in substantial compliance with a written mine development plan approved by the commissioner. The mine development plan shall provide for efficient and orderly development of mineral reserves and prevention of waste. The mine development plan shall be consistent with the lessee's obligation to reclaim the premises. The requirements of the mine development plan shall, upon approval by the commissioner, be incorporated automatically into the mineral lease without the necessity of further agreement between the lessee and the commissioner. Failure to substantially comply with the mine development plan shall constitute a violation of the mineral lease.

[19.2.2.31 NMAC - N, 03/14/2001]

19.2.2.32 OBTAINING A MINE DEVELOPMENT PLAN:

The lessee shall submit a proposed mine development plan to the commissioner, who shall review the plan and thereafter notify the lessee, in writing, of any deficiencies. The lessee shall then submit a modified proposal addressing the deficiencies and any other issues raised by the commissioner. This process of submittal and review shall be repeated until the commissioner and lessee reach agreement on the plan. Once agreement is reached, the lessee shall sign and acknowledge the mine development plan, in triplicate, and return all originals to the commissioner. The commissioner shall thereafter approve the plan by signing all three originals and returning one original to the lessee.

[19.2.2.32 NMAC - N, 03/14/2001]

19.2.2.33 MODIFICATION OF MINE DEVELOPMENT PLAN:

If the lessee determines that it is no longer feasible or economically prudent to follow the approved mine development plan, the lessee shall submit a proposed modification of the plan to the commissioner, together with the reasons that modification is required. The lessee shall seek the commissioner's approval for the modification by following the procedure set out in 19.2.2.32 NMAC. The lessee shall continue to comply with the existing mine development plan until the commissioner approves the modification. The commissioner may refuse to approve any modification that the commissioner determines is not in the best interest of the trust.

[19.2.2.33 NMAC - N, 03/14/2001]

19.2.2.34 RESTRICTION ON PERMANENT PITS, PILES AND IMPOUNDMENTS:

No permanent pit, pile, impoundment or any other permanent manmade feature or improvement shall be placed on trust surface estate unless specifically approved by the commissioner. The commissioner may refuse to approve any such permanent feature or improvement that would prevent productive post-mining use of the affected land, as determined by the commissioner, unless the lessee fully compensates the trust for the loss of such land through purchase or other arrangement approved by the commissioner.

[19.2.2.34 NMAC - N, 03/14/2001]

19.2.2.35 NO PROCESSING OR STOCKPILING OF OFF-LEASE MATERIALS:

A mineral lease issued under this rule grants the lessee the right to enter the premises for mining purposes, together with the right to use and occupy so much of the premises as may be necessary or convenient to carry out such mining purposes. A mineral lease does not authorize the lessee to process or stockpile minerals, waste rock, ore, overburden or other materials obtained from off-lease sources. Therefore, unless authorized under a separate commercial lease issued by the commissioner, no minerals, waste rock, ore, overburden or other materials obtained from off-lease sources shall be processed or stockpiled on the trust surface estate covered by a mineral lease.

[19.2.2.35 NMAC - N, 03/14/2001]

19.2.2.36 FINANCIAL ASSURANCE FOR ROYALTIES:

Unless waived by the commissioner in writing, and before the commencement of mining activity, the lessee shall provide financial assurance to guarantee payment of royalties and to comply with the terms and conditions of the mineral lease other than reclamation, which is covered under 19.2.2.39 NMAC. The commissioner will determine the amount of financial assurance required.

[19.2.2.36 NMAC - N, 03/14/2001]

19.2.2.37 FINANCIAL ASSURANCE FOR SURFACE IMPROVEMENTS:

Before commencement of mining activity, the lessee shall execute and provide financial assurance to secure payment for potential injuries to tangible improvements upon the trust surface estate covered by a mineral lease that may result from the lessee's mining activity. The commissioner shall fix financial assurance under this section in an amount not less than five thousand dollars. The financial assurance shall be in favor of the state of New Mexico, but held for the benefit of the state's contract purchasers, patentees and surface lessees with pre-existing rights to the trust surface estate. Provided that, in lieu of said financial assurance, the commissioner may accept a waiver of financial assurance, duly executed or acknowledged by the owners of the improvements.

[19.2.2.37 NMAC - N, 03/14/2001]

19.2.2.38 CONSOLIDATION OF FINANCIAL ASSURANCE FOR MULTIPLE LEASES:

Lessees having multiple leases with the commissioner may, with the approval of the commissioner, provide one instrument to fulfill their total financial assurance obligations under all such leases regarding the protection of tangible surface improvements. The commissioner shall fix the amount of the lessee's consolidated financial assurance obligation, which amount shall not be less than twenty-five thousand dollars. The lessee's obligation to provide financial assurance for payment of royalties and reclamation of trust surface estate is not eligible for coverage under this section.

[19.2.2.38 NMAC - N, 03/14/2001]

19.2.2.39 FINANCIAL ASSURANCE FOR RECLAMATION:

The financial assurance required under 19.2.2.36 NMAC, 19.2.2.37 NMAC and 19.2.2.38 NMAC is in addition to that which the permitting agency may require pursuant the New Mexico Mining Act or comparable law, whichever applies. If the commissioner determines that the amount or coverage of financial assurance required by the permitting agency is insufficient to adequately protect and reclaim trust surface estate, the commissioner may require the lessee to provide additional financial assurance as a supplemental requirement under 19.2.2.26 NMAC.

[19.2.2.39 NMAC - N, 03/14/2001]

19.2.2.40 FORM OF FINANCIAL ASSURANCE:

Forms for all financial assurance instruments required by the commissioner shall either be prescribed by the commissioner or be in a form approved by the commissioner. In addition, the permitting agency must approve the form of financial assurance required for reclamation in accordance with that agency's governing law and regulations.

[19.2.2.40 NMAC - N, 03/14/2001]

19.2.2.41 INSPECTIONS:

A. The commissioner has the right to inspect all records and books of account pertaining to the operations under a mineral lease, including records and books relating to mining, production, extraction, processing, transportation, reduction, returns and reclamation. At the request of the commissioner, the lessee shall furnish such reports, books, records, samples, logs, assays or cores, as the commissioner deems reasonably necessary to the proper administration of the lease.

B. The commissioner has the right to enter the premises and the facilities located thereon to inspect operations thereon, to conduct a field audit and to inspect the records and books referred to in Subsection A of this section. To facilitate field audits and inspections under this subsection, the lessee shall keep originals or true and accurate copies of all of the foregoing records, books, documents and sample materials on the premises unless otherwise approved by the commissioner in writing.

C. The lessee shall allow the permitting agency, the New Mexico environment department, and any government agency to enter the premises and the facilities located thereon to conduct activities or inspection consistent with such agencies' regulatory jurisdiction over lessee's operations or mining activity.

D. No prior notice is required under this section. Failure to timely comply with this section by the lessee, and failure to correct violations noted as a result of site inspections provided hereunder, shall constitute a breach subjecting the lease to cancellation.

[19.2.2.41 NMAC - N, 03/14/2001]

19.2.2.42 STATUTORY COVENANTS:

All mineral leases made under 19.2.2 NMAC shall include and be subject to the statutory covenants to operate and develop the premises and minerals under lease in a workmanlike manner, as set forth at Section 19-8-13 NMSA 1978 and to market and develop, as set forth at Section 19-8-23 NMSA 1978. These covenants are in addition to those that may be implied under the common law.

[19.2.2.42 NMAC - N, 03/14/2001]

19.2.2.43 COMPLIANCE WITH LAWS:

The lessee shall be responsible for compliance with all laws, regulations, rules, ordinances, permits, licenses and other requirements applicable to the leasehold estate and the operations thereon. Upon receiving notice from a government agency of an actual, potential or alleged violation of law, the lessee shall promptly notify the

commissioner of the alleged violation and provide copies of all related documents to the commissioner.

[19.2.2.43 NMAC - N, 03/14/2001]

19.2.2.44 PRIMARY TERM OF MINERAL LEASE:

A. All mineral leases shall be for a primary term of three years and so long thereafter as minerals are produced or mined in paying quantities.

B. Annual rent during the primary term shall be one dollar per acre, which amount shall be paid in advance each year.

[19.2.2.44 NMAC - N, 03/14/2001]

19.2.2.45 SECONDARY TERM OF MINERAL LEASE:

A. If minerals are not produced or mined in paying quantities during the primary term, then the lessee may continue the lease in full force and effect through a secondary term. The secondary term shall be two years and so long thereafter as minerals are produced or mined in paying quantities.

B. Annual rent during the secondary term shall be ten dollars per acre, which amount shall be paid each year in advance.

[19.2.2.45 NMAC - N, 03/14/2001]

19.2.2.46 TERTIARY TERM OF MINERAL LEASE:

A. If minerals are not produced or mined in paying quantities during the primary or secondary term, then the lease may be continued into the tertiary term. The tertiary term shall be five years and so long thereafter as minerals are produced or mined in paying quantities.

B. Annual rent during the tertiary term shall be three dollars per acre, which amount shall be paid each year in advance.

[19.2.2.46 NMAC - N, 03/14/2001]

19.2.2.47 QUATERNARY TERM OF MINERAL LEASE:

A. If minerals are not produced or mined in paying quantities during the primary, secondary or tertiary term, then the lease may be continued into the quaternary term. The quaternary term shall be five years and so long thereafter as minerals are produced or mined in paying quantities.

B. Annual rent during the quaternary term shall be ten dollars per acre, which amount shall be paid each year in advance.

[19.2.2.47 NMAC - N, 03/14/2001]

19.2.2.48 ADVANCE ROYALTY DURING QUATERNARY TERM:

A. In the eleventh year of the lease, the lessee shall pay, in addition to rent, ten dollars per acre as an advance royalty.

B. In the twelfth year of the lease, the lessee shall pay, in addition to rent, twenty dollars per acre as an advance royalty.

C. In the thirteenth year of the lease, the lessee shall pay, in addition to rent, thirty dollars per acre as an advance royalty.

D. In the fourteenth year of the lease, the lessee shall pay, in addition to rent, forty dollars per acre as an advance royalty.

E. In the fifteenth year of the lease, the lessee shall pay, in addition to rent, fifty dollars per acre as an advance royalty.

[19.2.2.48 NMAC - N, 03/14/2001]

19.2.2.49 CREDIT FOR ADVANCE ROYALTIES:

Upon the commencement of production of minerals in paying quantities, the principal sum paid as an advance royalty for the year in which such production commences, and the principal sums so paid for the two previous years, shall be credited against the royalty otherwise payable to the commissioner.

[19.2.2.49 NMAC - N, 03/14/2001]

19.2.2.50 CESSATION OF PRODUCTION BEFORE EXPIRATION OF SET TERMS:

If production in paying quantities commences during the primary or any subsequent term and thereafter ceases before the quaternary term would have expired had there been no such production, then the lease shall be deemed a "non-producing" lease on the date that production in paying quantities ceases. Notwithstanding such cessation of production in paying quantities, a non-producing lease shall not expire if the lessee continues to pay rent and, if the lease is in its quaternary term, advanced royalties. The lessee may maintain the mineral lease in effect under this section until the end of the quaternary term and so long thereafter as minerals are produced in paying quantities.

[19.2.2.50 NMAC - N, 03/14/2001]

19.2.2.51 CESSATION OF PRODUCTION AFTER EXPIRATION OF SET TERMS:

If for any reason beyond the lessee's control, production in paying quantities ceases after the quaternary term would have expired, then the lessee may, with the written approval of the commissioner, continue the lease from year to year for an additional period not to exceed three years. The lessee shall continue to pay in advance the annual rental at the rate provided in the quaternary term and an advance royalty of sixty dollars per acre per each year of the extended term.

[19.2.2.51 NMAC - N, 03/14/2001]

19.2.2.52 SUSPENSION OF MINERAL LEASE:

After notice and hearing, the commissioner shall suspend a mineral lease for a period not exceeding five years if the commissioner finds:

- A.** the lessee is not in default;
- B.** suspension of the lease will not affect compliance with safety, reclamation or environmental requirements;
- C.** the lessee submitted a written request for suspension to the commissioner prior to expiration of the lease;
- D.** the lessee submitted adequate evidence, as determined by the commissioner, to prove that the discovery on the premises of an ore body containing valuable mineral deposits in merchantable quality and quantity; and
- E.** temporary conditions beyond the lessee's control have precluded mining on the premises except at an economic loss or at an unreasonable threat to safety.

[19.2.2.52 NMAC - N, 03/14/2001]

19.2.2.53 LESSEE'S OBLIGATIONS DURING SUSPENSION OF MINERAL LEASE:

All lease obligations, including the obligation to pay rent and royalties, shall be suspended during the period the mineral lease is suspended. Provided, however, that the lessee shall pay the annual rental required in Section 19-8-19.1 NMSA 1978 for each year of suspension. Suspension of a mineral lease shall not operate to relieve the lessee from its obligations under the New Mexico Mining Act.

[19.2.2.53 NMAC - N, 03/14/2001; A, 06/30/2016]

19.2.2.54 NOTICE OF COMMENCEMENT OF PRODUCTION:

Within five days after commencing production, the lessee shall notify the commissioner of such production in writing, giving the date that production commenced, and stating specifically the legal subdivision, section, township and range where production occurred. The lessee shall provide the same notice where production re-commences after a period of cessation lasting three consecutive months or longer.

[19.2.2.54 NMAC - N, 03/14/2001]

19.2.2.55 AMOUNT OF ROYALTY:

In addition to annual rentals, the lessee shall pay royalty on production as determined by the commissioner and as specified in the notice of sale and the lease. For all minerals except special minerals, the royalty shall be no less than two percent of the gross returns less the actual and reasonable transportation and smelting or reduction costs up to fifty percent of the gross returns. Gross returns shall be based on the arm's-length sales price of the produced minerals and shall include, if applicable, all premiums, bonuses and other consideration of any kind received by the lessee for the minerals produced from the premises. The lessee shall calculate royalty for special minerals in exactly the same manner as for other minerals, except that the royalty percentage shall be no less than five percent of the gross returns.

[19.2.2.55 NMAC - N, 03/14/2001]

19.2.2.56 PAYMENT OF ROYALTY AND ACCOUNTING:

The lessee shall pay the correct amount of royalty to NMSLO on the twentieth day of the month following the month of use, sale or other disposal of minerals. On the same day, the lessee shall submit to NMSLO a production and royalty statement, accounting for the production and royalty for the previous calendar month. Such statements shall be prepared upon forms prescribed and furnished by the commissioner and in accordance with instructions accompanying the forms.

[19.2.2.56 NMAC - N, 03/14/2001]

19.2.2.57 LEASE ASSIGNMENTS MUST BE APPROVED BY COMMISSIONER:

The lessee may assign a mineral lease, in whole or in part, only if the commissioner approves the assignment. No purported assignment will bind the state of New Mexico, or change the lessee of record, unless approved in writing by the commissioner. Provided, however, that a mere change in the name of the mineral lessee will not constitute an assignment requiring approval by the commissioner. The lessee shall promptly notify the commissioner, in writing, of any change in name or mailing address.

[19.2.2.57 NMAC - N, 03/14/2001]

19.2.2.58 APPROVAL OF LEASE ASSIGNMENTS:

The commissioner will approve an assignment of mineral lease, in whole or in part, if the commissioner finds:

- A. the assignment does not create an undivided interest in the lease or any part thereof;
- B. the assigned portion of the premises is not less than a legal subdivision;
- C. the assignment is executed in the proper form and by the proper person;
- D. the lease is in good standing as to the assigned portion of the premises;
- E. no litigation is pending that could affect the lease or the interest of any person therein;
- F. the assignee has been pre-qualified pursuant to 19.2.2.21 NMAC; and
- G. the assignment will not adversely affect the interests of the trust.

[19.2.2.58 NMAC - N, 03/14/2001]

19.2.2.59 FORM OF ASSIGNMENTS:

Assignments of mineral leases shall be upon forms prescribed and furnished by the commissioner. The commissioner's approval of an assignment shall be noted on all copies of the assignment. Assignments shall be executed and acknowledged in the same manner prescribed for conveyance of real estate and shall be filed in triplicate with the commissioner. One original shall be recorded permanently, the second filed and the third returned to the assignee.

[19.2.2.59 NMAC - N, 03/14/2001]

19.2.2.60 ASSIGNMENT FEE:

The non-refundable fee for filing an assignment of a mineral lease shall be set forth in the schedule of fees.

[19.2.2.60 NMAC - N, 03/14/2001]

19.2.2.61 EFFECT OF ASSIGNMENT:

Upon approval by the commissioner of a valid mineral lease assignment, the assignor shall stand relieved from all lease obligations to the commissioner with respect to the state trust resources embraced in the assignment. The state shall likewise be relieved from all obligations to the assignor as to such resources. Upon assignment, the assignee shall succeed to all of the rights and privileges of the assignor with respect to

the assigned lease and shall, upon assignment, be liable for all obligations of the assignor as to the commissioner. Nothing in this section shall relieve any person from liability under the New Mexico Mining Act, comparable law, or any permit or authorization issued thereunder.

[19.2.2.61 NMAC - N, 03/14/2001]

19.2.2.62 PRODUCTION IN PAYING QUANTITIES HOLDS LEASE AND ALL ASSIGNMENTS:

Production of minerals in paying quantities from anywhere on the premises, as defined by the original lease, will continue the term of the lease and all assignments thereof.

[19.2.2.62 NMAC - N, 03/14/2001]

19.2.2.63 SUBLEASING PROHIBITED:

The lessee shall not sublease the mineral lease.

[19.2.2.63 NMAC - N, 03/14/2001]

19.2.2.64 SIDE AGREEMENTS

Notwithstanding any other provision herein, side agreements that do not constitute assignments but which define or set out the various interests of other parties in a mineral lease may be filed with the commissioner as miscellaneous instruments upon payment of the filing fee set out in the schedule of fees. Such filing shall constitute constructive notice to the world of the existence and the contents thereof. Side agreements are not binding upon the commissioner and do not change the lessee's obligations under any mineral lease. The lessee of record shall remain responsible for compliance with the terms and conditions of the mineral lease.

[19.2.2.64 NMAC - N, 03/14/2001]

19.2.2.65 TRANSFER OF RESIDENT DECEDENT'S LEASE:

To transfer an interest in a lease owned by a deceased resident of New Mexico to the decedent's heirs or devisees, proper probate proceedings must be held in accordance with the New Mexico Probate Code. Certified copies of such proceedings showing proper legal authority to transfer shall be filed with the commissioner. Provided, however, that where lawful transfer occurs outside of probate, the purported transferee shall file with the commissioner the death certificate of the lessee and all instruments effecting transfer of the lease.

[19.2.2.65 NMAC - N, 03/14/2001]

19.2.2.66 TRANSFER OF NON-RESIDENT DECEDENT'S LEASE:

To transfer an interest in a lease owned by a nonresident decedent (a person who was not a resident of New Mexico at the time of the person's death) to the decedent's heirs or devisees, the decedent's estate must be probated in the state of such decedent's residence and ancillary proceedings conducted in the proper New Mexico court. Certified copies of the proceedings showing proper legal authority to transfer shall be filed with the commissioner. Provided, however, that where lawful transfer occurs outside of probate, the purported transferee shall file with the commissioner the death certificate of the lessee and all instruments effecting transfer of the lease.

[19.2.2.66 NMAC - N, 3/14/2001; A, 6/11/2019]

19.2.2.67 CANCELLATION OF MINERAL LEASE AND OPPORTUNITY TO CURE:

The commissioner may cancel any mineral lease for non-payment of rentals, non-payment (or underpayment) of royalties and for violation of any of the terms, covenants or conditions of the mineral lease. However, before any such cancellation shall be made, the commissioner shall mail a thirty-day notice of cancellation to the lessee, by registered or certified mail, at the address of the lessee shown by the records of the NMSLO. The thirty-day notice shall specify the default for which the lease is subject to cancellation. If the default is not cured within thirty days after the commissioner mails the notice, then the commissioner may enter cancellation. No proof of receipt of such notice is necessary for cancellation. The lessee shall be liable for all reasonable attorneys fees and costs incurred by the commissioner in enforcing the terms of the lease, including fees and costs incurred in regaining possession of and reclaiming the premises.

[19.2.2.67 NMAC - N, 03/14/2001]

19.2.2.68 RELINQUISHMENT OF MINERAL LEASE:

With the consent of the commissioner, a mineral lease in good standing may be relinquished, in whole or in part, upon approval of the commissioner and payment of the non-refundable filing fee in accordance with the schedule of fees. However, the commissioner will not approve relinquishment of an undivided interest in a lease or less than a legal subdivision. Relinquishment does not relieve the lessee from its obligation to reclaim the trust surface estate.

[19.2.2.68 NMAC - N, 03/14/2001]

19.2.2.69 RESERVATIONS:

All rights not expressly granted under the mineral lease are reserved to the commissioner. Notwithstanding the issuance of a mineral lease, the commissioner specifically reserves the right to:

- A. lease the premises for grazing, agricultural or commercial purposes;
- B. lease the premises for oil and gas exploration and extraction;
- C. lease the premises for the development of geothermal resources;
- D. sell the premises subject to the mineral lease, reserving all minerals of whatsoever kind to the state of New Mexico; and
- E. issue rights of way and easements over, upon or across trust surface estate for any purpose, including but not limited to, public highways, railroads, tramways, telegraph, telephone and power lines, pipelines, irrigation works, mining, logging and for exploration and development of geothermal resources.

[19.2.2.69 NMAC - N, 03/14/2001]

19.2.2.70 WAIVER OF RESERVATIONS:

The commissioner may, at the commissioner's discretion, agree not to exercise one or more of the rights reserved under 19.2.2.69 NMAC upon payment of additional consideration determined by the commissioner.

[19.2.2.70 NMAC - N, 03/14/2001]

19.2.2.71 COMMISSIONER'S STATUTORY RIGHT TO PURCHASE PRODUCTION:

The commissioner has the right to purchase at any time and from time to time, at the market price prevailing in the area on the date of purchase, all or part of the minerals that may be produced from the premises. (The commissioner may waive this reservation by following the procedure set out in Section 19-14-2 NMSA 1978.)

[19.2.2.71 NMAC - N, 03/14/2001]

19.2.2.72 ROAD DEVELOPMENT:

Lessees shall comply with the requirements for development and closure of roads set forth in 19.2.20 NMAC.

[19.2.2.72 NMAC - N, 03/14/2001]

19.2.2.73 TRESPASS AND PREVENTION OF WASTE:

Lessees shall protect the premises and mineral estate from waste or trespass in accordance with Sections 19-6-1 *et seq.* NMSA 1978.

[19.2.2.73 NMAC - N, 03/14/2001]

19.2.2.74 WATER RIGHTS:

The lessee shall obtain and exercise water rights on the premises only as approved in writing by the commissioner, in a manner consistent with the mineral lease, the rules issued by the commissioner and New Mexico water law.

[19.2.2.74 NMAC - N, 03/14/2001]

19.2.2.75 VENUE AND APPLICABLE LAW:

All legal actions regarding mineral leases issued under 19.2.2 NMAC shall be brought in the First Judicial District, Santa Fe, New Mexico. New Mexico law shall govern.

[19.2.2.75 NMAC - N, 03/14/2001]

19.2.2.76 JOINT AND SEVERAL LIABILITY:

Where two persons are both lessees under the same mineral lease, they shall be jointly and severally liable for all obligations imposed by such lease.

[19.2.2.76 NMAC - N, 03/14/2001]

19.2.2.77 NO WAIVER:

The delay of the commissioner in asserting any right of the state under the mineral lease shall under no circumstances constitute a waiver of such right.

[19.2.2.77 NMAC - N, 03/14/2001]

19.2.2.78 INTEREST ON LATE PAYMENTS:

Lessee shall pay interest at the rate of one percent per month on any late payment of rents, royalties or other payments required under the mineral lease. If the lessee fails to pay the entire amount owed, then interest shall accrue on the unpaid portion. Interest shall begin to accrue on the day the payment becomes due and continue to accrue daily until payment is made.

[19.2.2.78 NMAC - N, 03/14/2001]

19.2.2.79 REMOVAL OF IMPROVEMENTS:

Upon termination of the mineral lease by reason of forfeiture, surrender, expiration of term or for any other reason, lessee may, pursuant to Section 19-8-29, remove all improvements and equipment as can be removed without material injury to the premises; provided, however, that all rents and royalties have been paid and that such removal is accomplished within two years from the termination date or before such earlier date as the commissioner may set upon thirty (30) days' written notice to the lessee. All improvements and equipment remaining upon the premises after the removal date as set in accordance with this section shall be forfeited to the state of New Mexico without compensation, unless such forfeiture is disclaimed by the commissioner. Notwithstanding the foregoing, the commissioner may require the lessee to remove any and all improvements from the premises and to reclaim any surface disturbance caused by such removal in accordance with its reclamation plan.

[19.2.2.79 NMAC - N, 03/14/2001]

19.2.2.80 ADDITIONAL TERMS AND CONDITIONS:

The commissioner may include in any mineral lease additional terms and conditions not set out in this rule, as the commissioner deems appropriate.

[19.2.2.80 NMAC - N, 03/14/2001]

PART 3: LEASING OF POTASSIUM, SULPHUR, SODIUM, PHOSPHORUS, AND SIMILAR MINERALS, AND THEIR SALTS AND COMPOUNDS EXCEPT SODIUM CHLORIDE

19.2.3.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501, Phone: (505) 827-5713.

[12/31/1999; 19.2.3.1 NMAC - Rn, 19 NMAC 3. SLO 3.1, 9/30/2002]

19.2.3.2 SCOPE:

This rule pertains to all potassium, sulphur, sodium, phosphorus, and similar minerals, and their salts and compounds except sodium chloride on those lands held in trust by the commissioner of public lands under the terms of the Enabling Act and subsequent legislation (trust lands). This rule governs lessees of trust lands entered into subsequent to the date of this rule.

[12/31/1999; 19.2.3.2 NMAC - Rn, 19 NMAC 3. SLO 3.2, 09/30/2002]

19.2.3.3 STATUTORY AUTHORITY:

The commissioner's authority to manage the trust lands is found in N.M. Const., art. XIII, and in Section 19-1-1 NMSA 1978. The authority to promulgate this rule is found in Section 19-1-2 NMSA 1978.

[12/31/1999; 19.2.3.3 NMAC - Rn, 19 NMAC 3. SLO 3.3, 9/30/2002]

19.2.3.4 DURATION:

Permanent.

[12/31/1999; 19.2.3.4 NMAC - Rn, 19 NMAC 3. SLO 3.4, 9/30/2002]

19.2.3.5 EFFECTIVE DATE:

March 1, 1984, unless a later date is cited at the end of a section.

[12/31/1999; 19.2.3.5 NMAC - Rn, 19 NMAC 3. SLO 3.5, 9/30/2002; A, 6/30/2016]

19.2.3.6 OBJECTIVE:

The objective of 19.2.3 NMAC is to provide for the orderly and lawful administration, and the appropriate development of those minerals covered by this rule on trust lands.

[12/31/1999; 19.2.3.6 NMAC - Rn, 19 NMAC 3. SLO 3.6, 09/30/2002]

19.2.3.7 DEFINITIONS:

"**Schedule of fees**" means a list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

[12/31/1999; 19.2.3.7 NMAC - Rn, 19 NMAC 3. SLO 3.7, 9/30/2002; A, 6/30/2016]

19.2.3.8 LANDS SUBJECT TO LEASE:

Applications to lease will be considered only for such lands as may be shown to be open for leasing upon the tract books of the New Mexico state land office and, although priority in time of filing ordinarily will determine the preference right to lease, the commissioner reserves the right to reject all applications, at any time before lease issues, and to withhold from leasing or to offer the lease to the highest bidder therefor. Leases may not exceed two thousand five hundred sixty (2,560) acres.

[12/31/1999; 19.2.3.8 NMAC - Rn, 19 NMAC 3. SLO 3.8, 9/30/2002]

19.2.3.9 APPLICATIONS:

Each application for lease shall be made with ink or with typewriter, in duplicate, upon forms to be prescribed and furnished by the commissioner, which application shall be acknowledged, shall be accompanied by an application fee as set forth in the schedule of fees, and shall be accompanied by the first (1st) year's rental. In addition, it shall be accompanied by an appraisal, under oath, of the lands and minerals made by some disinterested party upon forms furnished by the New Mexico state land office.

[12/31/1999; 19.2.3.9 NMAC - Rn, 19 NMAC 3. SLO 3.9, 9/30/2002; A, 6/30/2016]

19.2.3.10 TERM:

Leases will be made upon forms prescribed and furnished by the commissioner and ordinarily will be for a term of 10 years and so long thereafter as said minerals or any of them are produced in paying quantities from the lands. The commissioner reserves the right to issue leases for a lesser primary or fixed term than 10 years when under the circumstances the commissioner deems a shorter term to be in the best interests of the trust. (See 19.2.3.14 NMAC for extension of term by suspension of production).

[12/31/1999; 19.2.3.10 NMAC - Rn, 19 NMAC 3. SLO 3.10, 9/30/2002; A, 6/11/2019]

19.2.3.11 RENTAL:

The rental charge for such leases will be negotiated but shall in no event be less than ten cents (\$.10) per acre, or fraction thereof, payable annually in advance, but the minimum first (1st) year's rental will be one hundred dollars (\$100.00) in any event as provided by Section 19-8-4 NMSA 1978.

[12/31/1999; 19.2.3.11 NMAC - Rn, 19 NMAC 3. SLO 3.11, 9/30/2002]

19.2.3.12 ROYALTIES; REDUCTION IN MINIMUM ROYALTIES:

A. Royalties will be established by the commissioner on a negotiated basis and such royalty shall be computed on the gross value of the product after processing, without deductions of any kind, regardless of the place of sale. The minimum royalty rates for potassium chlorides and sulphates shall be as follows:

(1) POTASSIUM CHLORIDES* ROYALTY RATE

(Grade of Ore Mined)

10.00% K20 or less 2.00%

**

**

17.09% K20 or more 5.00%

*(Mined by conventional methods and based on the K20 grade, as sylvite.)

**Intervening ore grade increments are to be proportioned to the foregoing royalty rate limits and royalty rate to be computed according to the formula:

Royalty rate = 2.00% + [(% K20 grade mined - 10.00% K2O) x 0.423077], the K2O grade mined and royalty rate to be determined to the nearest 0.00 percent.

(2) SULPHATES ROYALTY RATE

Langbeinite 2.50%

B. At the discretion of the commissioner and upon the showing of good cause, the royalties set out above in subsection A of 19.2.3.12 NMAC may be reduced. The lessee must submit a written request to the commissioner outlining the expenses and costs of operating the entire lease, the income from the sale of any leased products and all facts tending to show whether the mines can be successfully operated upon the royalty fixed in the lease.

[12/31/1999; 19.2.3.12 NMAC - Rn, 19 NMAC 3. SLO 3.12, 9/30/2002]

19.2.3.13 OPERATIONS BEFORE DISCOVERY:

A. Leases will require the lessee, within twelve (12) months from date of lease, unless extension be granted, to begin actual drilling upon the leased lands with machinery and equipment suitable for taking and preserving a core and to prosecute such drilling with reasonable diligence to a prescribed depth or to a depth as may be necessary to penetrate the formations containing the minerals for which the lease has been issued.

B. Upon completion of the first (1st) test bore, it will be required that an additional test bore shall be drilled each year thereafter until the number of bores completed shall equal the number of sections of land contained in the lease. Should fractions of sections be involved, a minor fraction of a section shall be disregarded and a major fraction shall be treated as a full section.

C. Leases shall provide, however, that where the deposits of the minerals are so situated that prospecting work may effectually be carried on by shafts, tunnels, open cuts or in any manner other than by drilling testbores, such prospecting work may be accepted in lieu of drilling.

D. In cases where there has been discovery of minerals in commercial quantities on the lands, or any production of any such minerals on such state land on a commercial basis has begun, any lease may provide for a specified minimum annual production of such minerals in lieu of the requirements of this rule.

[12/31/1999; 19.2.3.13 NMAC - Rn, 19 NMAC 3. SLO 3.13, 9/30/2002]

19.2.3.14 OPERATIONS AFTER DISCOVERY:

If minerals in commercial quantities shall be discovered on the leased lands, the lessee shall be required to develop and produce the same in commercial quantities with reasonable diligence; provided, however, the commissioner may, after hearing, authorize the suspension of production on such lease or leases for a period not to exceed five (5) years at any one (1) time and in no event shall any suspension be for more than ten (10) years from the date on which the term of the lease would have expired in the absence of suspension of production. Suspensions under this Rule will not be granted unless the commissioner finds:

A. temporary conditions exist, with regard to the leased land being mined, which would operate to prevent the mining of the maximum mineable ore in keeping with safe mining practices;

B. separate parts of the lands covered by the lease are so situated with respect to other lands owned or leased by the lessee that lessee should be allowed a reasonable time to reach and mine the various parts of the lands covered by the lease in keeping with an orderly mining program and with a view to the proper development and mining of the entire area of which various parts of the lands covered by the lease and other lands are an integral part; or

C. temporary marketing conditions are such that the lease cannot be mined and operated except at a loss. Suspensions hereunder extend the term of the lease to coincide with the term of the suspension.

[12/31/1999; 19.2.3.14 NMAC - Rn, 19 NMAC 3. SLO 3.14, 9/30/2002]

19.2.3.15 SPECIAL AREA REQUIREMENTS:

The following requirements, applicable only to the area hereinafter named, shall be in addition to, and not in exclusion of, any other rule.

A. Mining of minerals held in solution in the natural brines shall be permitted within the area west of the Pecos river south of the south boundary of township 20 south, east of the east boundary of range 21 east, and north of the state line.

B. Any wells drilled upon leases issued pursuant to the rules herein, which wells lie within any declared underground water basin, shall, in addition to said rules, conform to the requirements of the state engineer.

C. Location, drilling and well record reports will be required to be submitted to the New Mexico state land office on all wells drilled. The standard forms of the New Mexico oil conservation commission shall be used in submitting these reports.

D. An analysis of the brine, or solution, found in each well must be submitted upon completion of the well, and annually on the anniversary date of the lease thereafter;

provided, however, that such an analysis may be required to be submitted more often if deemed necessary by the commissioner.

E. Production reports showing the number of gallons of solution produced by each well in each month shall be submitted monthly in connection with royalty reports showing mineral production, amount sold and the sale price. Such reports shall be submitted no later than the twentieth (20th) day of the next succeeding month.

F. In all cases, there shall be reserved to the state a royalty of not less than five percent (5%) of the amount of value of the minerals produced, such royalty to be computed upon the value of said minerals delivered at the nearest or most accessible railroad shipping point. After the primary term of the lease, royalty shall be at the rate of eight percent (8%) of the next sale price, computed as above.

G. The minimum rental charge for leases will be ten cents (\$.10) per acre, payable annually in advance, but the minimum rental shall be no less than one hundred dollars (\$100.00) in any event. An application fee as set forth in the schedule of fees will be charged in addition thereto for each application.

H. A good and sufficient bond as provided in 19.2.3.17 NMAC shall be filed before a lease may be issued; provided, however, that such bond shall be conditioned to conform with all the provisions of the lease including but not limited to drilling and plugging requirements.

I. A lease that includes land held under purchase contract(s), or previously patented with reservation of the minerals to the State, shall comply with additional bond requirements as provided by law.

J. A minimum of one (1) well must be drilled for each three hundred twenty (320) acres or fraction thereof encompassed in the lease, must be drilled at the rate of one (1) well the first (1st) year, two (2) the second (2nd) year, and four (4) per year thereafter until the minimum number of wells shall have been drilled. A well, in order to be included in the calculation of minimum requirements, shall be drilled to a depth of seven hundred fifty (750) feet, or through the brine horizon.

K. The term of the lease contemplated herein shall be for a five (5) year definite term, and so long thereafter as said minerals or any of them, in paying quantities, are produced by the lessee from the lands embraced in such lease, subject to all of their terms and conditions as set forth in such lease.

[12/31/1999; 19.2.3.15 NMAC - Rn, 19 NMAC 3. SLO 3.15, 09/30/02; A, 6/30/2016]

19.2.3.16 REPORTS AND INSPECTION:

Monthly reports of operations, production and sale of minerals or materials will be required of lessee to be filed with the commissioner on or before the 20th day of the

month following the end of the calendar month of production upon forms prescribed and furnished by the commissioner. The records, books of account and operations pertaining to the mining, extraction, transportation, production, returns, and sales of all ores or minerals taken from the leased lands shall be open and available for field audit and for inspection by the commissioner or the commissioner's authorized agents at all reasonable times.

[12/31/1999; 19.2.3.16 NMAC - Rn, 19 NMAC 3. SLO 3.16, 9/30/2002; A, 6/11/2019]

19.2.3.17 SURETY:

A. A corporate surety lease performance and surface users improvement damage bond or other surety shall be filed with the commissioner before a lease shall be issued. Such bond shall be in the amount of not less than five hundred dollars (\$500.00) for each section or fraction thereof under lease to the same lessee. Under this rule, 16 legal subdivisions, whether or not included in the same numbered lease, shall be considered a section. Standard bond forms will be furnished by the commissioner upon request.

B. Once production is had upon any land leased to a lessee, whether upon one or more leases, such lessee shall file with the commissioner either a new lease performance bond or other surety or shall increase the lessee's existing bond or surety to the sum of ten thousand dollars (\$10,000.00). Provided, however, the commissioner from time to time, for good cause shown, may increase the amount of such lease performance bond to an amount which the commissioner deems necessary to protect the interests of the trust.

C. With the approval of the commissioner, a twenty-five thousand dollar (\$25,000.00) bond or other surety may be used at the option of lessee for the use and benefit of the commissioner, to secure surface improvement damage and the performance of the lessee as lessee under one or more state leases or permits for minerals, oil and gas, coal or geothermal resources, or as holder under one or more state rights of way or easements which the lessee has executed with the commissioner. The lessee will be obligated to perform and keep all terms, covenants, conditions and requirements of all state leases for minerals, oil and gas, coal or geothermal resources and of all state rights of way and easements executed with the commissioner, including the payment of royalties when due and compliance with all established mining plans and reclamation requirements.

[12/31/1999; 19.2.3.17 NMAC - Rn, 19 NMAC 3. SLO 3.17, 09/30/02; A, 6/11/2019]

19.2.3.18 ASSIGNMENT AND RELINQUISHMENT:

No assignment of a lease or any portion thereof will be made except with the approval of the commissioner upon such terms and conditions as the commissioner may require. All assignments shall be upon forms prescribed and furnished by the commissioner,

which shall recite, among other things, the consideration received for the assignment. In the event a lessee desires to transfer a portion of the lease, the lessee may do so with the approval of the commissioner by relinquishing that portion to the commissioner in order that a new and separate lease may be issued to the third party. Any lease in good standing may, with the approval of the commissioner and the payment of a fee as set forth in the schedule of fees, be relinquished to the state of New Mexico.

[12/31/1999; 19.2.3.18 NMAC - Rn, 19 NMAC 3. SLO 3.18, 9/30/2002; A, 6/30/2016; A, 6/11/2019]

19.2.3.19 CANCELLATION:

Leases may be canceled for breach or violation of any of the terms or conditions of the lease or of these rules and regulations; provided, however, that before any such cancellation shall be made, the commissioner shall mail to the lessee, by registered mail addressed to the post office address of such lessee as shown by the records, a thirty (30) day notice of intention to cancel said lease, specifying the default for which the lease is subject to cancellation. Thirty (30) days after such mailing the commissioner may enter cancellation unless the lessee shall have sooner remedied the default to the satisfaction of the commissioner.

[12/31/1999; 19.2.3.19 NMAC - Rn, 19 NMAC 3. SLO 3.19, 9/30/2002]

19.2.3.20 RESERVATION OF RIGHT TO PURCHASE PRODUCTION:

The commissioner reserves a continuing option to purchase at any time, and from time to time, at the market price prevailing in the area on the date of purchase, all or part of the minerals that may be produced from the lands embraced in all leases issued on or after June 11, 1973. The commissioner may waive this reservation by following the statutory procedure set out in Section 19-14-2 NMSA 1978.

[12/31/1999; 19.2.3.20 NMAC - Rn, 19 NMAC 3. SLO 3.20, 9/30/2002]

19.2.3.21 [RESERVED]

[12/31/1999; 19.2.3.21 NMAC - Rn, 19 NMAC 3. SLO 3.21, 9/30/2002; Repealed, 6/30/2016]

PART 4: RELATING TO LEASING OF STATE LANDS FOR SODIUM CHLORIDE OR COMMON SALT

19.2.4.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501, Phone: (505) 827-5713.

[12/31/1999; 19.2.4.1 NMAC - Rn, 19 NMAC 3. SLO 4.1, 9/30/2002]

19.2.4.2 SCOPE:

This rule pertains to all sodium chloride or common salt on those lands held in trust by the commissioner of public lands under the terms of the Enabling Act and subsequent legislation (trust lands). This Rule governs the lessees of such trust lands entered into subsequent to the date of this rule.

[12/31/1999; 19.2.4.2 NMAC - Rn, 19 NMAC 3. SLO 4.2, 9/30/2002]

19.2.4.3 STATUTORY AUTHORITY:

The commissioner's authority to manage the trust lands is found in N.M. Const., art. XIII, and in Section 19-1-1 NMSA 1978. The authority to promulgate this rule is found in Section 19-1-2 NMSA 1978.

[12/31/1999; 19.2.4.3 NMAC - Rn, 19 NMAC 3. SLO 4.3, 9/30/2002]

19.2.4.4 DURATION:

Permanent.

[12/31/1999; 19.2.4.4 NMAC - Rn, 19 NMAC 3. SLO 4.4, 9/30/2002]

19.2.4.5 EFFECTIVE DATE:

January 20, 1984, unless a later date is cited at the end of a section.

[12/31/1999; 19.2.4.5 NMAC - Rn, 19 NMAC 3. SLO 4.5, 9/30/2002; A, 6/30/2016]

19.2.4.6 OBJECTIVE:

The objective 19.2.4 NMAC is to provide for the orderly and lawful administration, and the appropriate development of sodium chloride or common salt resources on trust lands.

[12/31/1999; 19.2.4.6 NMAC - Rn, 19 NMAC 3. SLO 4.6, 9/30/2002]

19.2.4.7 DEFINITIONS:

"Schedule of fees" means a list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

[12/31/1999; 19.2.4.7 NMAC - Rn, 19 NMAC 3. SLO 4.7, 9/30/2002; A, 6/30/2016]

19.2.4.8 LANDS SUBJECT TO LEASE:

Application to lease will be considered only for such lands as may be shown to be open for leasing upon the tract books of the New Mexico state land office and, although priority in time of filing ordinarily will determine the preference right to lease, the commissioner reserves the right to reject all applications at any time before lease issues, and to withhold from leasing or to offer the lease to the highest bidder therefor.

[12/31/1999; 19.2.4.8 NMAC - Rn, 19 NMAC 3. SLO 4.8, 9/30/2002]

19.2.4.9 APPLICATIONS:

Each application for lease shall be made with ink, or with typewriter, in duplicate, upon forms to be prescribed and furnished by the commissioner. The application shall be acknowledged, shall be accompanied by the fee as set forth in the schedule of fees (nonrefundable), and shall be accompanied by the first (1st) year's rental as prescribed by 19.2.4.12 NMAC. In addition, the application shall be accompanied by an appraisal of the land and minerals made under oath by some disinterested party familiar with the land upon forms prescribed and furnished by the New Mexico state land office.

[12/31/1999; 19.2.4.9 NMAC - Rn, 19 NMAC 3. SLO 4.9, 9/30/2002; A, 6/30/2016]

19.2.4.10 TERM:

Leases will be made upon forms prescribed and furnished by the commissioner and ordinarily will be for a term of 10 years and as long thereafter as salt in paying quantities shall be produced from the leased land. The commissioner reserves the right to issue leases for a primary or fixed term less than 10 years when under the circumstances the commissioner deems a shorter term to be in the best interest of the trust.

[12/31/1999; 19.2.4.10 NMAC - Rn, 19 NMAC 3. SLO 4.10, 9/30/2002; A, 6/11/2019]

19.2.4.11 ROYALTY:

Royalties shall be determined through negotiation, but shall not be less than ten (10) percent of the actual sale price of the salt at the place of extraction. The royalty shall be paid quarterly and the commissioner may prescribe advance royalty to be paid annually on or before the anniversary date of the lease in such sums as the commissioner may determine in each case before issuance of the lease. Royalty accruing for the lease year for which such advance royalty payments are made will be credited against the advance royalty payment made for that year.

[12/31/1999; 19.2.4.11 NMAC - Rn, 19 NMAC 3. SLO 4.11, 9/30/2002]

19.2.4.12 RENTAL:

In lieu of advance royalty as provided in 19.2.4.11 NMAC, the lease may provide for payment of an annual payment at a negotiated rate, but not less than twenty-five dollars (\$25.00) for each legal subdivision of forty (40) acres, more or less.

[12/31/1999; 19.2.4.12 NMAC - Rn, 19 NMAC 3. SLO 4.12, 9/30/2002]

19.2.4.13 REPORTS AND INSPECTION:

Quarterly reports of operation, production and sale of salt shall be filed by the lessee on or before the 20th day of the month following the last day of the reporting quarter. Such reports shall be upon forms prescribed and furnished by the commissioner. The records, books of account, and operations pertaining to mining, extraction, transportation, production, returns and sales of all salt shall be open and available for field audit and inspection by the commissioner or the commissioner's authorized agents at all reasonable times.

[12/31/1999; 19.2.4.13 NMAC - Rn, 19 NMAC 3. SLO 4.13, 9/30/2002; A, 6/11/2019]

19.2.4.14 SURETY:

A. A corporate surety, performance and improvement damage bond in such sum as the commissioner in each case may prescribe (minimum of five hundred dollars \$500.00 for a single lease bond and one thousand dollars \$1,000.00 for a multiple lease or blanket bond) executed by the lessee with satisfactory surety shall be executed by the lessee before a lease is issued.

B. With the approval of the commissioner, a twenty-five thousand dollar (\$25,000.00) bond or other surety may be used at the option of lessee for the use and benefit of the commissioner, to secure surface improvement damage and the performance of the lessee as lessee under one (1) or more state leases or permits for minerals, oil and gas, coal or geothermal resources or as holder under one (1) or more state rights of way or easements which the lessee or its successors or assigns has executed with the commissioner. The lessee will be obligated to perform and keep all terms, covenants, conditions and requirements of all state leases for minerals, oil and gas, coal, or geothermal resources and of all state rights of way and easements executed with the commissioner including the payment of royalties when due and compliance with all established mining plans and reclamation requirements.

[12/31/1999; 19.2.4.14 NMAC - Rn, 19 NMAC 3. SLO 4.14, 9/30/2002]

19.2.4.15 ASSIGNMENT AND RELINQUISHMENT:

No lease may be assigned or relinquished without the written approval of the commissioner upon such terms and conditions as the commissioner may require and

the payment of the fee as set forth in the schedule of fees. All assignments shall be upon forms prescribed by the commissioner and shall recite, among other things, the consideration received for the assignment.

[12/31/1999; 19.2.4.15 NMAC - Rn, 19 NMAC 3. SLO 4.15, 9/30/2002; A, 6/30/2016; A, 6/11/2019]

19.2.4.16 CANCELLATION:

Leases may be canceled for breach or violation of any of the terms or conditions of the lease or of these rules; provided, however, that before any such cancellation shall be made, the commissioner shall mail to the lessee, by registered mail, addressed to the post office address of such lessee as shown by the New Mexico state land office records, a thirty (30) day notice of intention to cancel said lease, specifying the default for which the lease is subject to cancellation. Thirty (30) days after such mailing, the commissioner may enter cancellation unless the lessee shall have sooner remedied the default to the satisfaction of the commissioner.

[12/31/1999; 19.2.4.16 NMAC - Rn, 19 NMAC 3. SLO 4.16, 9/30/2002]

19.2.4.17 RESERVATION OF RIGHT TO PURCHASE PRODUCTION:

The commissioner reserves a continuing option to purchase at any time, and from time to time, at the market price prevailing in the area on the date of purchase, all or part of the minerals that may be produced from the lands embraced in all leases issued on or after June 11, 1973. The commissioner may waive this reservation by following the statutory procedure set out in Section 19-14-2 NMSA 1978.

[12/31/1999; 19.2.4.17 NMAC - Rn, 19 NMAC 3. SLO 4.17, 9/30/2002]

19.2.4.18 [RESERVED]

[12/31/1999; 19.2.4.18 NMAC - Rn, 19 NMAC 3. SLO 4.18, 9/30/2002; Repealed, 6/30/2016]

PART 5: RELATING TO LEASES AND PERMITS FOR CALICHE, GYPSUM, CLAY, SAND, GRAVEL, STONE, SHALE, PERLITE, VOLCANIC DEPOSITS, AND BORROW DIRT

19.2.5.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, Santa Fe, New Mexico 87501.

[5/14/1999; 19.2.5.1 NMAC - Rn, 19 NMAC 3. SLO 5.1, 9/30/2002]

19.2.5.2 SCOPE:

Current and future lessees of state trust lands.

[5/14/1999; 19.2.5.2 NMAC - Rn, 19 NMAC 3. SLO 5.2, 9/30/2002]

19.2.5.3 STATUTORY AUTHORITY:

NMSA sections 1978 19-1-23 and 19-8-12.

[5/14/1999; 19.2.5.3 NMAC - Rn, 19 NMAC 3. SLO 5.3, 9/30/2002]

19.2.5.4 DURATION:

Permanent.

[5/14/1999; 19.2.5.4 NMAC - Rn, 19 NMAC 3. SLO 5.4, 9/30/2002]

19.2.5.5 EFFECTIVE DATE:

May 14, 1999, unless a later date is cited at the end of a section.

[5/14/1999; 19.2.5.5 NMAC - Rn, 19 NMAC 3. SLO 5.5, 9/30/2002; A, 6/30/2016]

19.2.5.6 OBJECTIVE:

To provide the general terms and conditions for the mining of caliche, gypsum, clay, sand, gravel, stone, shale, perlite, volcanic deposits and borrow dirt on trust lands. Mining for caliche may be by short-term permit or long-term lease.

[5/14/1999; 19.2.5.6 NMAC - Rn, 19 NMAC 3. SLO 5.6, 9/30/2002]

19.2.5.7 DEFINITIONS:

"**Schedule of fees**" means a list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

[5/14/1999; 19.2.5.7 NMAC - Rn, 19 NMAC 3. SLO 5.7, 9/30/2002; A, 6/30/2016]

19.2.5.8 LANDS AND MINERALS SUBJECT TO LEASE OR PERMIT:

A. Leases may be issued for the extraction of caliche, gypsum, clay, sand, gravel, stone, shale, perlite, volcanic deposits, and borrow dirt only for those lands shown to be open for leasing of that mineral by the tract books of the state land office.

B. The commissioner may issue permits, which are expected to last no more than fifteen (15) days, for removal of caliche on lands with existing pit sites ("community pit") and for the removal of other minerals listed in this rule.

C. An oil and gas lessee may use caliche necessarily disturbed from acreage under the oil and gas lease only pursuant to 19.2.5.11 NMAC or may obtain a lease for caliche.

[5/14/1999; 19.2.5.8 NMAC - Rn, 19 NMAC 3. SLO 5.8, 9/30/2002]

19.2.5.9 LEASES:

A. Application to lease.

(1) Applications for lease shall be submitted in duplicate upon forms prescribed by the commissioner and shall contain the following:

(a) a nonrefundable application fee in the amount set forth in the schedule of fees;

(b) a legal description of the location of the lands to be leased;

(c) an approximation of the amount of material to be removed during the term of the lease;

(d) the necessary surety;

(e) the required rental payment as set forth in the rent schedule;

(f) a signed and completed environmental questionnaire; and

(g) a plat (prepared by the applicant or designated agents) which is drawn to scale showing the location of the area of the pit site or the area to be mined, if requested by the commissioner.

(2) When the estimated amount of material to be removed is in excess of 40,000 cubic yards, or upon the discretion of the commissioner, such lease may be issued by competitive bid upon the following procedure:

(a) Advertisement. The commissioner shall advertise the sale through publication in a newspaper of general circulation in the area where the material is located, on the same day, once a week, for two consecutive weeks.

(b) Notice. The notice of the sale by competitive bid shall also be posted in a conspicuous place at the state land office.

B. Mine operation plan and mine reclamation plan for a lease.

(1) For any lease where it is anticipated that the total surface area disturbed will exceed one acre, the lessee shall submit a mine operation plan and a mine reclamation plan to be approved by the commissioner prior to lease issuance.

(2) The operation plan shall include, but is not limited to, a plan for the orderly development of the reserves. The operation plan shall specify, if applicable, locations and methods of topsoil and overburden stockpiles, tailings disposal, dams or impoundments, slope stabilization methods, runoff diversions, solid and liquid waste disposal, spill reporting and cleanup, sediment control, security and access control, blasting, archaeological, and endangered species clearances, and other applicable information specific to the mining operation, including a list of all required federal and state permits. If the total area to be disturbed is greater than 10 acres, the mine operation plan shall be prepared by a registered professional engineer.

(3) The commissioner may require a hydrologic demonstration that groundwater will not be adversely impacted. The demonstration may include, if applicable, a plat and topographic map showing the location of the lease area in relation to governmental surveys, highways or roads giving access to the mine site, and watercourses, water wells and dwellings within one-half mile of the lease area; and geological/hydrologic evidence demonstrating that surface or subsurface activity will not degrade or otherwise impact ground or surface water. This evidence may include a geological/hydrological discussion of the area and the uppermost aquifer.

(4) The reclamation plan shall address reclamation of all areas disturbed by operations conducted on the lease. The reclamation plan shall consist of reclamation specifics and shall set out the schedule of implementation on a continuing basis during the life of the lease relative to operation, maintenance, contouring, water and sediment control, cleanup and reseeding. Reclamation shall be performed contemporaneously with mining wherever possible.

(5) Upon approval, the mine operation plan and the mine reclamation plan shall be incorporated in the lease by reference and the provisions of the approved plans shall be enforceable in the same manner as any other covenant of the lease.

C. Lease rental. An annual rental rate for leases shall be set according to the rent schedule for each 40 acre tract or subdivision under lease, or any portion thereof.

D. Payment for minerals under lease.

(1) The purchase price to be assessed on mineral leases shall be based on market value, but, except as provided in Paragraphs (2) and (3) of Subsection D of 19.2.5.9 NMAC, shall be no less than those on the following schedule:

(a) Gypsum, clay, sand, gravel, stone, shale, perlite, volcanic deposits

Amount	Minimum purchase price
No Limit	\$.55/loose cu. yd.

(b) Borrow dirt

Amount	Minumum purchase price
No Limit	\$.40/loose cu. yd.

(2) For all leases for which the mineral extraction is projected to exceed 5000 cubic yards per year, the commissioner may require the lessee to install and utilize a scale, which has a valid certification from the New Mexico department of agriculture, to measure the amount of minerals mined. For such leases, the purchase price, by weight, shall not be less than the purchase price, by volume, specified in Paragraph (1) of Subsection D of 19.2.5.9 NMAC converted to purchase price, by weight. Factors used to convert volume to weight shall be specified by the commissioner and based on actual density measurements, if available, or, if such measurements are not available, on generally accepted scientific formulas.

(3) Upon the approval of the commissioner, any lessee not required to calculate purchase price by weight under Paragraph (2) of Subsection D of 19.2.5.9 NMAC may use such method to calculate purchase price.

(4) Purchase payments for mineral extraction on leases are to be made by the 20th day of each month following extraction.

E. Term of lease.

(1) The term of each lease shall be determined by the commissioner based upon such considerations as the length of time required by the applicant, the demand for the pit site, as well as other relevant factors. However, except as provided in Paragraph (2) of Subsection E of 19.2.5.9 NMAC, no lease shall be issued for longer than five years.

(2) Upon a showing by an applicant that a term greater than five years is necessary, the commissioner, in the commissioner's discretion, may issue a lease for a term of five years and so long thereafter as annual production purchases or annual minimum production payments paid in lieu of actual production purchases exceed a minimum amount specified in the lease (but not less than fifty dollars (\$50.00) per acre

of the leased premises). The applicant must demonstrate that capital expenditures, both on and off the leased premises, needed to commence and sustain mine development, production and reclamation and/or processing plants or manufacturing facilities are so great that they cannot be recouped within five years with a reasonable and prudent mine production rate. In any lease issued under this paragraph, the commissioner shall include such rental, reclamation, and any other provisions as the commissioner deems are in the best interest of the trust, and shall specify the period of nonproduction which constitutes abandonment of the lease. Any lease issued under this paragraph shall contain a provision for redetermination of the purchase price and the amount of minimum production payments. The redetermination of the purchase price shall occur annually after the first year of the lease and the redetermination of the amount of minimum production payments shall occur annually after the 15th year of the lease. The redetermined purchase price and amount of minimum production payments shall equal the initial purchase price and amount of minimum production payments, respectively, multiplied by a fraction, the denominator of which is the published, *producer price index for commodities, commodity category 13, non-metallic mineral products*, existing on the date that the lease is issued and the numerator of which is the same index existing on the date of the redetermination.

F. Assignment, subleasing, and relinquishment of a lease.

(1) Except as provided in Paragraph (2) of Subsection F of 19.2.5.9 NMAC, no lease under this rule may be assigned or subleased. A lease in good standing may, with the approval of the commissioner and the payment of a fee set forth in the schedule of fees, be relinquished to the state of New Mexico. Relinquishment does not relieve the lessee of any obligations regarding reclamation, unless the commissioner determines that reclamation is not necessary or the duty to reclaim has been assigned and approved by the commissioner.

(2) Any lease issued under Paragraph (2) of Subsection E of 19.2.5.9 NMAC, and in good standing, may, with the written approval of the commissioner, upon such terms and conditions as may be required, and payment of a fee set forth in the schedule of fees, be assigned or sublet to third persons. However, no assignment of an undivided interest or any assignment or sublease of less than a legal subdivision shall be recognized or approved. Provided further, however, the record owner of any such lease may enter into any contract for the development of the leasehold premises or any portion thereof, or may create overriding royalties or obligations payable out of production, or enter into any other agreements with respect to the development of the leasehold premises or disposition of the production therefrom. It shall not be necessary for any such contracts, agreements or other instruments to be approved by the commissioner; but nothing herein shall relieve the record owner of such lease from complying with any of the terms or provisions thereof. All assignments shall be formally executed by the proper parties upon forms prescribed and furnished by the commissioner and shall recite, among other things, the consideration received for the assignment. Assignments shall be filed in triplicate in the office of the commissioner. The original copy of each assignment will be recorded and filed as a public record in the

state land office and one copy will be returned to the assignee. Ordinarily, leases shall be transferred or assigned in the names of no more than two persons or legal entities.

G. Cancellation, revocation of a lease. Leases may be cancelled for breach or violation of any of the terms or covenants of the lease or of these rules and regulations. Before any such cancellation shall be made, the commissioner shall mail the lessee, by registered or certified mail, sent to the address of such lessee as shown by the records, a 30 - day notice of intention to cancel said lease, specifying the breach or violation for which the lease is subject to cancellation. Thirty days after such mailing, cancellation of the lease may be made unless the lessee shall have sooner remedied the breach or violation to the satisfaction of the commissioner. No cancellation shall be made if the breach or violation is such that it cannot be remedied within 30 days, if the lessee has commenced action to remedy the breach or violation within the 30 days, and if the lessee diligently proceeds with the remedial action until the breach or violation is finally remedied to the satisfaction of the commissioner.

H. Reservation of right to purchase production from a lease. The commissioner reserves a continuing option to purchase at any time and, from time to time, at the market price prevailing in the area on the date of the purchase, all or part of the minerals that may be produced from the lands embraced in all leases. The commissioner may waive this reservation by following the statutory procedure set out in Section 19-14-2 NMSA 1978, as amended.

[5/14/1999; 19.2.5.9 NMAC - Rn, 19 NMAC 3. SLO 5.9, 9/30/2002; A, 6/30/2016; A, 6/11/2019]

19.2.5.10 PERMITS:

A. Application for community caliche pit permit.

(1) Application for community caliche pit permits may be obtained either by directly contacting the oil, gas and minerals division of the state land office in Santa Fe or by filing an application with the Hobbs field office for sites in Roosevelt, Chaves, Eddy, and Lea counties. All payments made at the Hobbs field office shall be by check or money order, including application and permit fees, purchase payment, rentals and sureties.

(2) Each application for a community caliche pit permit must contain the following:

(a) a nonrefundable application fee set forth in the schedule of fees;

(b) a legal description of the location of the land to be mined or the pit site number (if known);

(c) the necessary surety required by Paragraph (2) of Subsection B of 19.2.5.12 NMAC; and

(d) either an advance payment or performance bond, as follows:

(i) advance payment of ten percent of market value, as determined by the commissioner, if the total amount due under Subsection C of 19.2.5.10 NMAC will exceed two thousand dollars (\$2,000.00) with the remaining amount due upon completion of the project; or

(ii) a performance bond in the amount of two thousand dollars (\$2,000.00);

(e) once the application is completed and the availability of the pit site is confirmed, the permit shall be issued by the Hobbs field office or by the Santa Fe office; the permit must be in the possession of the permittee at all times at the pit site location and while the extractions are taking place or the permittee may be subject to payment of double the amount due.

B. Application for mineral permit, other than caliche. Application for permits for extraction of minerals covered under this rule, other than caliche, shall be on forms approved by the commissioner and subject to specific terms at the discretion of the commissioner.

C. Payment for caliche under a community caliche pit permit.

(1) The purchase price to be assessed on the community caliche pit permits shall be negotiated and based on market value as determined by the commissioner, but, shall be no less than those on the following schedule: caliche:

(a) southern Lea county (township 16 south through 20 south, range 32 east through 39 east; and township 21 south through 26 south, range 32 east through 38 east.):

Amount	Minimum purchase price
first 7,000 cu. yds.	\$1.45/loose cu. yd.
next 3,000 cu. yds.	\$1.00/loose cu. yd.
amounts over 10,000 cu. yds.	\$.55/loose cu. yd.

(b) all other areas:

Amount	Minimum purchase price
---------------	-------------------------------

first 7,000 cu. yds. \$.85/loose cu. yd.

amounts over 7,000 cu. yds. \$.55/loose cu. yd.

(2) The payment due on permits shall be made within 30 days after expiration of the permit.

D. Term of community caliche pit permit and other mineral permits.

(1) The term of each permit shall be determined by the commissioner based upon such considerations as the length of time required by the applicant, the demand for the pit site, as well as other relevant factors; provided, however, that, except as provided in Paragraph (2) of Subsection D of 19.2.5.10 NMAC, no permit shall be issued for longer than 15 days.

(2) If delays beyond the control of the permittee are incurred in the removal of the minerals, or if the permittee can show that the permittee will diligently mine the mineral for a longer period, then the commissioner may, in the commissioner's discretion, extend a permit period beyond 15 days.

E. Assignment, subleasing of community caliche pit and other mineral permits. No community caliche pit permit or other mineral permit under this rule may be assigned or subleased.

F. Cancellation, revocation of a community caliche pit and other mineral permits. A permit may be cancelled or revoked at any time by the commissioner for breach or violation of the terms or covenants of the permit or these rules and regulations. A cancellation or revocation does not relieve the permittee of any reclamation duties.

[5/14/1999; 19.2.5.10 NMAC - Rn, 19 NMAC 3. SLO 5.10, 9/30/2002; A, 6/11/2019]

19.2.5.11 USE OF NECESSARILY DISTURBED CALICHE FROM OIL AND GAS LEASE ACREAGE:

The commissioner shall make no charge for caliche necessarily moved within the roadbed or within the perimeter of a specific well pad while in the process of developing oil and natural gas under a state oil and gas lease, subject to the following conditions.

A. Only caliche derived from the cellar and reserve pit or cut and fill, which is necessarily disturbed in the process of building an access road and/or that oil and gas well location, may be used without charge.

B. Caliche necessarily disturbed during construction must remain within the boundaries of the oil and gas lease. If excess caliche exists from a necessary disturbance, that caliche may only be moved from that location to another well site

within the lease once an operator or lessee of record obtains a permit and compensates the commissioner pursuant to the terms of a community caliche pit permit.

C. Only caliche excavated during cut and fill construction of a well pad or roads built to 19.2.20 NMAC standards will be considered necessarily disturbed.

[5/14/1999; 19.2.5.11 NMAC - Rn, 19 NMAC 3. SLO 5.11, 9/30/2002]

19.2.5.12 GENERAL TERMS FOR ALL LEASES AND PERMITS:

A. Performance reports, reclamation and inspection for leases, community caliche pit and other mineral permits.

(1) Upon termination of a lease or permit, the lessee or permittee shall submit a final report, on the forms prescribed by the commissioner, which shall specify the amount produced under the lease or permit and other information on the operations required by the commissioner. These forms shall be returned to the commissioner along with the final purchase payment.

(2) For areas disturbed by mineral operations, reclamation will be required; however, the commissioner may waive such requirements if it is determined to be in the best interest of the trust to keep the pit open.

(3) The records, books of account and operations pertaining to mining, extraction, transportation, production and sales of minerals taken from leased and permitted lands shall be open and available for inspection or field audit by the commissioner or the commissioner's authorized agents at all reasonable times.

B. Surety for leases, community caliche pit and other mineral permits.

(1) Leases: The following bonds are required for each lease issued under this rule

(a) a performance bond or other surety in an amount set by the commissioner; and

(b) a minimum damage bond or other surety of at least five thousand dollars (\$5,000.00).

(2) Community caliche pit and other mineral permits. A permittee under this rule must submit the following bonds:

(a) a minimum damage bond or other surety of at least five thousand dollars (\$5,000.00); and

(b) when the estimated purchase price exceeds two thousand dollars (\$2,000.00), and the permittee did not pay ten percent of market value upon application for a permit, the permittee must provide a performance bond in the amount of two thousand dollars (\$2,000.00); the commissioner or the commissioner's authorized agent may, in the commissioner's discretion, waive the requirement for surety upon a showing by the applicant that the permit will be used for the removal of a small, incidental amount of materials.

(3) The required sureties shall be filed at the time of execution of the permit or lease unless a different filing date is allowed by the commissioner.

(4) A surety for damage on purchase contract or patented surface land shall not be less than five thousand dollars (\$5,000.00) for a single lease or not less than ten thousand dollars (\$10,000.00) for multiple leases.

(5) Sureties shall be either bonds issued by a bonding company acceptable to the commissioner or letters of credit or other surety acceptable to the commissioner.

(6) Megabond. With the approval of the commissioner, in lieu of the separate surface improvement damage and performance bonds or other surety, a twenty-five thousand dollar (\$25,000.00) bond or other surety may be used at the option of lessee for the use and benefit of the commissioner, to secure surface improvement damage and the performance of the lessee as lessee under one or more state leases or permits for minerals, oil and gas, coal or geothermal resources, or as holder under one or more state rights of way or easements which the lessee or its successors or assigns has executed with the commissioner. The lessee will be obligated to perform and keep all terms, covenants, conditions and requirements of all state leases or permits for minerals, oil and gas, coal or geothermal resources and of all state rights of way or easements executed with the commissioner, including the payment of royalties when due and compliance with all established mining plans and reclamation requirements.

C. Surface operations and reclamation for leases, community caliche pit and other mineral permits. Surface trash and waste disposal:

(1) Lessees and permittees shall remove all surface trash and debris caused by their operations from the lease and permit area and shall keep the lease and permit premises free and clear of trash and debris. The commissioner may require the lessee or permittee to fence the lease or permit area.

(2) Hazardous or toxic wastes or petroleum products may not be disposed of on the lease or permit premises, and all such materials used in the operations must be removed from the lease area immediately upon termination of the lease or permit. Due care shall be used to prevent leaks and spills of such materials; clean up of any spills and reclamation of the area shall be performed in consultation with the commissioner.

[5/14/1999; 19.2.5.12 NMAC - Rn, 19 NMAC 3. SLO 5.12, 9/30/2002; A, 6/11/2019]

PART 6: RELATING TO COAL LEASES ON STATE LAND

19.2.6.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501, Phone: (505) 827-5713.

[12/31/1999; 19.2.6.1 NMAC - Rn, 19 NMAC 3. SLO 6.1, 9/30/2002]

19.2.6.2 SCOPE:

This rule pertains to all coal resources on those lands held in trust by the commissioner of public lands under the terms of the Enabling Act and subsequent legislation (trust lands). This rule governs lessees of such trust lands entered into subsequent to the date of this rule.

[12/31/1999; 19.2.6.2 NMAC - Rn, 19 NMAC 3. SLO 6.2, 9/30/2002]

19.2.6.3 STATUTORY AUTHORITY:

The commissioner's authority to manage the trust lands is found in N.M., Const. art. XIII, and in Section 19-1-1 NMSA 1978. The authority to promulgate this rule is found in Section 19-1-2 NMSA 1978.

[12/31/1999; 19.2.6.3 NMAC - Rn, 19 NMAC 3. SLO 6.3, 9/30/2002]

19.2.6.4 DURATION:

Permanent.

[12/31/1999; 19.2.6.4 NMAC - Rn, 19 NMAC 3. SLO 6.4, 9/30/2002]

19.2.6.5 EFFECTIVE DATE:

August 23, 1989, unless a later date is cited at the end of a section.

[12/31/1999; 19.2.6.5 NMAC - Rn, 19 NMAC 3. SLO 6.5, 9/30/2002; A, 6/30/2016]

19.2.6.6 OBJECTIVE:

The objective of 19.2.6 NMAC is to provide for the orderly and lawful administration, and the appropriate development of coal resources on trust lands by implementing House Bill 433 of the first session of the thirty-ninth legislature (Laws 1989, Chapter 200) and to specify, by regulation, provisions to be included in all coal leases issued by the commissioner of public lands after the effective date of this rule.

[12/31/1999; 19.2.6.6 NMAC - Rn, 19 NMAC 3. SLO 6.6, 9/30/2002]

19.2.6.7 DEFINITIONS:

As used in 19.2.6 NMAC and state coal leases:

A. "Logical mining unit" - means an area under the effective control of a single operator, which is capable of being developed and operated in an efficient, economical and orderly manner as a single operation;

B. "Market value" - means the amount a knowledgeable and willing buyer would pay a knowledgeable and willing seller for equivalent coal FOB at the minemouth under an arm's-length sales contract. Market value can be determined by examining comparable arm's-length sales in the same coal field, by examining arm's-length sales of coal in other fields and making adjustments for differences, or by determining a downstream value for the subject coal or coal product and netting back actual and reasonable costs to arrive at a FOB minemouth value;

C. "Mine plan" - means a brief summary of how and when the leased lands will be developed. The plan should include anticipated dates for obtaining the necessary permits, commencing mining operations, and completing operations; should state anticipated annual production levels from the opening of the mine until its closing; should identify anticipated markets; and should show the planned progression and time frames for mining and reclaiming each tract within the logical mining unit;

D. "Proceeds" - means the total consideration accruing to the coal seller, without deduction of any kind. It includes but is not limited to: reimbursements, payments or credits for advanced prepaid reserve payments subject to recoupment through reduced prices in later sales; advanced exploration or mine development costs that are subject to recoupment through reduced prices in later sales; any other consideration given to the seller or any action taken or not taken in exchange for reduced prices; take-or-pay payments; and tax reimbursements. It is the intent of this Rule that lessees act as prudent operators in obtaining the maximum possible prices. Therefore, "proceeds" shall equal the highest price a prudent operator may receive under its contract. Also, if the operator fails to take proper or timely action to receive price increases to which it is entitled, and which action would have been taken by a prudent operator, then "proceeds" shall equal that obtainable price; and

E. "Recoverable reserves" - means the commercially mineable reserve base excluding all coal that will be left such as in pillars, fenders and property barriers. Generally, recoverable reserves will be based on quantities identified in the mine plan; however, with the concurrence of the commissioner, the amount of recoverable reserves may be changed as new information is developed.

F. "Schedule of fees" - means a list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state

land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

[12/31/1999; 19.2.6.7 NMAC - Rn, 19 NMAC 3. SLO 6.7, 9/30/2002; A, 6/30/2016]

19.2.6.8 LANDS SUBJECT TO LEASE-COMPETITIVE BID:

Coal mining leases may be issued upon acreage shown to be open upon the New Mexico state land office tract books. Leases shall be issued only to the highest bidder either by sealed bid or at public auction; provided, however, the commissioner may in the commissioner's discretion withhold any tract from leasing and may reject all bids offered for any tract, if the commissioner determines that withholding or rejection is in the best interests of the trust.

[12/31/1999; 19.2.6.8 NMAC - Rn, 19 NMAC 3. SLO 6.8, 9/30/2002; A, 6/11/2019]

19.2.6.9 APPLICATIONS:

Applications for coal leases shall be made in ink or typewritten, in duplicate, upon forms to be prescribed by the commissioner. The application shall be acknowledged and shall be accompanied by a minimum initial charge of five hundred dollars (\$500.00) or the first (1st) year rental, whichever is greater, plus a nonrefundable application fee as set forth in the schedule of fees.

[12/31/1999; 19.2.6.9 NMAC - Rn, 19 NMAC 3. SLO 6.9, 9/30/2002; A, 6/30/2016]

19.2.6.10 NOTICE OF SALE:

On or before twenty (20) days prior to the date of any coal lease sale, notice of the sale shall be posted in a conspicuous place in the New Mexico state land office in Santa Fe specifying the place, date, and hour of sale and containing a description of the lands to be offered for lease, with a statement of the minimum bid which will be accepted and whether the lands will be offered by sealed bid or by public auction. In addition, the notice shall be mailed by regular mail to all persons requesting notice of coal lease sales.

[12/31/1999; 19.2.6.10 NMAC - Rn, 19 NMAC 3. SLO 6.10, 9/30/2002]

19.2.6.11 ACCEPTANCE OF BIDS:

Up to the hour set for such sale, the commissioner will receive sealed bids for a coal lease upon any tract of land described in the posted notice. All sealed bids submitted will be opened at the hour mentioned in the notice and, if the tract is designated in the notice of sale as being offered for sealed bid, then the lease will be awarded to the highest and best sealed bid. If the tract is designated in the notice of sale as being

offered for sale at public auction, then any sealed bid received will be considered as the first (1st) oral bid for the subject tract.

[12/31/1999; 19.2.6.11 NMAC - Rn, 19 NMAC 3. SLO 6.11, 9/30/2002]

19.2.6.12 TIE BIDS:

When two or more sealed highest and best bids received for the same tract of land are equal and if such highest and best bidders are present and cannot agree, by stipulation in writing, on how the tract shall be awarded, the commissioner or the commissioner's designee shall call such equal highest and best bidders before the commissioner on the same day the bids are opened, and again offer such tract at auction to such bidders only, and grant such lease to the highest and best bidder. If such bidders are not present when the bids are opened, then the commissioner will notify the bidders to submit sealed proposals within 10 days next following the date of the sale.

[12/31/1999; 19.2.6.12 NMAC - Rn, 19 NMAC 3. SLO 6.12, 9/30/2002; A, 6/11/2019]

19.2.6.13 LIMITATIONS TO NOT MORE THAN TWO (2) PERSONS OR LEGAL ENTITIES -- WAIVER:

As a matter of administration and without affecting property rights in coal leases, whenever more than two (2) persons or legal entities apply for the issuance of a coal lease, the commissioner shall grant the lease in the names of no more than two (2) persons acting as attorneys-in-fact for all potential interest owners. In the case of a trust, the trust must be express and a copy of the creating document filed with the commissioner. If more than two (2) trustees are named, a lease shall be granted in the names of no more than two (2) trustees acting as attorneys-in-fact for all trustees. The limitations in this Rule may be waived by the commissioner for good cause.

[12/31/1999; 19.2.6.13 NMAC - Rn, 19 NMAC 3. SLO 6.13, 9/30/2002]

19.2.6.14 TERM OF LEASE:

State coal leases shall be issued for the following terms:

A. A primary of five (5) years;

B. If, at the end of the primary term, the lessee has submitted a mine plan, which is not subsequently disapproved by the commissioner within three (3) months after submission, and the lessee has either incorporated the leased land with adjacent land (if necessary) into a logical mining unit or has shown to the satisfaction of the commissioner that adjacent land, needed to form the logical mining unit, is federal land which has not been available for coal leasing but that the lessee has incurred substantial costs in developing the leased land, then the coal lease shall not expire at

the end of the primary term but shall continue for a secondary term of an additional five (5) years; and

C. If, at the end of the secondary term, the lessee is producing coal at an average annual rate of either one percent (1%) of the estimated recoverable reserves from the leased lands or one percent (1%) of the estimated recoverable reserves from the logical mining unit, then the lease shall not expire but shall continue as long as the one percent (1%) production is maintained. Provided, that, for purposes of determining if the one percent (1%) annual production has been maintained during any year after the end of the second (2nd) year following the beginning of production, the annual production, averaged over the previous three (3) years, shall be used. For purposes of this provision, annual rates of production shall be measured from lease anniversary date to lease anniversary date.

[12/31/1999; 19.2.6.14 NMAC - Rn, 19 NMAC 3. SLO 6.14, 9/30/2002]

19.2.6.15 PRODUCTION ROYALTIES:

State coal leases shall provide for a royalty of twelve and one-half percent (12 1/2%) of the proceeds received from the sale of all surface-mined coal or, at the option of the commissioner, the market value of the surface-mined coal, and eight percent (8%) of the proceeds received from the sale of all underground-mined coal or, at the option of the commissioner, the market value of the underground-mined coal. The royalty rate may be reduced by the commissioner upon a showing that the leases for the non-state lands in the same logical mining unit provide for a lower rate or that the leased lands will be bypassed and not mined without a rate reduction.

[12/31/1999; 19.2.6.15 NMAC - Rn, 19 NMAC 3. SLO 6.15, 9/30/2002]

19.2.6.16 ADVANCE ROYALTIES:

In lieu of the actual production requirement, expiration of a lease may be prevented by the timely payment of an advance royalty equal to the estimated royalty obligation which would be due if one percent (1%) of the recoverable reserves of the leased land were produced. Payment of the advance royalty on or before a lease anniversary date will act to extend the lease until the next ensuing anniversary date; provided, however, that the lease shall not be extended for more than ten (10) years by payment of advance royalties. Any credit later taken for advance royalties against actual production royalties due shall not exceed fifty percent (50%) of the total royalty due for any single reporting period.

[12/31/1999; 19.2.6.16 NMAC - Rn, 19 NMAC 3. SLO 6.16, 9/30/2002]

19.2.6.17 EXPLORATION SURETY:

Before the issuance of a state coal lease, the lessee shall execute and file with the commissioner a good and sufficient exploration bond or other appropriate surety in an amount equal to fifteen dollars (\$15.00) for each acre of the leased premises to ensure compensation for damage to the surface or surface improvements caused by exploration activities on the leased lands. Any surety filed with the commissioner pursuant to the provisions of this rule, shall be released by the commissioner either upon the acceptance of a development bond or surety pursuant to 19.2.6.18 NMAC or upon the termination of the lease and a showing that compensation has been paid for any damage to the surface or surface improvements caused by exploration activities. The commissioner, in the commissioner's discretion, may allow an exploration bond filed with the mining and minerals division of the energy, minerals and natural resources department pursuant to the Surface Mining Act to satisfy the requirement of this rule.

[12/31/1999; 19.2.6.17 NMAC - Rn, 19 NMAC 3. SLO 6.17, 9/30/2002; A, 6/11/2019]

19.2.6.18 DEVELOPMENT SURETY:

A. Before commencing excavation operations or development upon leased lands, a lessee shall execute and file with the commissioner a good and sufficient bond or other appropriate surety in an amount to be fixed by the commissioner and based upon the approved mine plan to:

(1) guarantee the performance of all covenants and obligations under the coal lease, including the obligation to pay royalties;

(2) ensure that all aspects of mining operations and reclamation operations are conducted in conformity with the mine permit issued by the mining and minerals division of the energy, minerals and natural resources department pursuant to the Surface Mining Act;

(3) ensure compensation for damage to the surface or surface improvements in the absence of an agreement between the coal lessee and any surface owner.

B. A bond filed with the mining and minerals division of the energy, minerals and natural resources department pursuant to the Surface Mining Act will satisfy the requirements in Subsection B of 19.2.6.18 NMAC unless the commissioner, in the commissioner's discretion, determines that the bond filed with the mining and minerals division is insufficient. Any bond or surety filed with the commissioner pursuant to the provisions of this Rule shall be released by the commissioner upon a showing that the lessee has complied with the obligations as specified in Subsections A, B and C of 19.2.6.18 NMAC.

C. With the approval of the commissioner, a twenty-five thousand dollar (\$25,000.00) bond or other surety may be used at the option of lessee for the use and benefit of the commissioner, to secure surface improvement damage and the performance of the lessee as lessee under one or more state leases or permits for

minerals, oil and gas, coal or geothermal resources, or as holder under one or more state rights of way or easements which the lessee or its successors or assigns has executed with the commissioner. The lessee will be obligated to perform and keep all terms, covenants, conditions and requirements of all state leases for minerals, oil and gas, coal, or geothermal resources and of all state rights of way and easements executed with the commissioner including the payment of royalties when due and compliance with all established mining plans and reclamation requirements.

[12/31/1999; 19.2.6.18 NMAC - Rn, 19 NMAC 3. SLO 6.18, 9/30/2002; A, 6/11/2019]

19.2.6.19 ASSIGNMENTS:

Any lease in good standing may, with the written approval of the commissioner, upon such terms and conditions as the commissioner may require, and payment of the fee as set forth in the schedule of fees, be assigned or sublet to third persons; provided, however, no assignment of an undivided interest nor any assignment or sublease of less than a legal subdivision shall be recognized or approved. Provided further, however, the record owner of any coal lease may enter into any contract for the development of the leasehold premises or any portion thereof, or may create overriding royalties or obligations payable out of production, or enter into any other agreements with respect to the development of the leasehold premises or disposition of the production therefrom, and it shall not be necessary for any such contracts, agreements or other instruments to be approved by the commissioner; but nothing herein shall relieve the record title owner of such lease from complying with any of the terms or provisions thereof. All assignments shall be formally executed by the proper parties upon forms prescribed and furnished by the commissioner and shall recite, among other things, the consideration received for the assignment. Assignments shall be filed in triplicate in the New Mexico state land office in Santa Fe. The original copy of each assignment will be recorded and filed as a public record in the New Mexico state land office and one copy will be returned to the person entitled to the same. Ordinarily, leases shall be transferred or assigned in the names of no more than two persons or legal entities as provided in 19.2.6.13 NMAC.

[12/31/1999; 19.2.6.19 NMAC - Rn, 19 NMAC 3. SLO 6.19, 9/30/2002; A, 6/30/2016; A, 6/11/2019]

19.2.6.20 ASSIGNMENT BY CONSOLIDATION:

In cases where corporations consolidate, transfer of coal interest to the newly created corporation shall be accomplished pursuant to 19.2.6.19 NMAC.

[12/31/1999; 19.2.6.20 NMAC - Rn, 19 NMAC 3. SLO 6.20, 9/30/2002]

19.2.6.21 ASSIGNMENT BY MERGER:

In cases where two (2) or more corporations merge, transfer of coal interests to the surviving corporation shall be accomplished by filing with the commissioner a copy of the merger agreement or certificate of merger. Thereafter, the coal lease shall be transferred on the books of the New Mexico state land office in the name of the surviving corporation.

[12/31/1999; 19.2.6.21 NMAC - Rn, 19 NMAC 3. SLO 6.21, 9/30/2002]

19.2.6.22 ASSIGNMENT BY REORGANIZATION:

Where the assets of any corporation are taken over under court order by a corporation, the procedure will follow the provisions of the court order, which should direct separate assignments to be executed and filed for approval in the New Mexico state land office.

[12/31/1999; 19.2.6.22 NMAC - Rn, 19 NMAC 3. SLO 6.22, 9/30/2002]

19.2.6.23 [RESERVED]

[12/31/1999; 19.2.6.23 NMAC - Rn, 19 NMAC 3. SLO 6.23, 9/30/2002; Repealed, 6/30/2016]

19.2.6.24 LEASES ISSUED PRIOR TO JULY 1, 1989:

The owner of any coal lease issued prior to July 1, 1989, and maintained in good standing according to the terms and conditions thereof and all applicable statutes and regulations may, upon the expiration thereof, obtain a new lease for the leased lands, without having to submit a competitive bid, by filing an application therefor with the commissioner and paying the application fee as set forth in the schedule of fees. The form of the new lease shall be as prescribed in 19.2.6.26 NMAC.

[12/31/1999; 19.2.6.24 NMAC - Rn, 19 NMAC 3. SLO 6.24, 9/30/2002; A, 6/30/2016]

19.2.6.25 EFFECTIVE DATE:

The provisions of 19.2.6 NMAC shall apply to all coal leases issued by the commissioner on or after July 1, 1989.

[12/31/1999; 19.2.6.25 - Rn, 19 NMAC 3. SLO 6.25, 9/30/2002]

19.2.6.26 FORM OF LEASE:

Coal leases shall be of the following form and shall contain the following provisions:

(SAMPLE ONLY)

NEW MEXICO STATE LAND OFFICE

COAL MINING LEASE

APPLICATION NO. _____ LEASE NO. _____

THIS AGREEMENT, dated this _____ day of _____, _____, made and entered into between the STATE OF NEW MEXICO, acting by and through the undersigned, its COMMISSIONER OF PUBLIC LANDS, hereinafter called the "lessor", and _____,

hereinafter called the "lessee".

WITNESSETH:

WHEREAS, lessee has filed in the New Mexico State Land Office an application for a coal lease for the purpose of exploring for, mining, developing, and producing coal upon the lands hereinafter described, and has tendered _____ (\$ _____), for the first annual rental payment, together with the application fee as set forth in the schedule of fees, and _____ (\$ _____), for a bonus;

NOW THEREFORE, in consideration of the above tender, receipt of which is acknowledged, and the COVENANTS herein, lessor hereby grants, and leases to lessee, exclusively, for the sole and only purpose of exploring for, mining, developing, producing, and removing coal in, upon or under the following described lands in _____ County, New Mexico:

together with the right to use so much of the surface as is reasonably necessary to explore for, mine, develop, produce, and remove the coal.

TO HAVE AND TO HOLD the said lands and privileges granted hereunder for a primary term of five (5) years.

IN CONSIDERATION OF THE PREMISES, THE PARTIES COVENANT AND AGREE AS FOLLOWS:

1. As royalty, lessee shall pay to lessor twelve and one-half percent (12 1/2%) of the proceeds received from the sale of all surface-mined coal or, at the option of the lessor, the market value thereof, and eight percent (8%) of the proceeds received from the sale of all underground-mined coal or, at the option of the lessor, the market value thereof. The royalty rate may be reduced by the lessor upon a showing by the lessee that the leases for non-state coal in the same logical mining unit provide for a lower rate or that the lands leased hereunder will be bypassed and not mined without a rate

reduction. Such royalty is due in full on the last day of the month following the calendar month of sale and shall be reported to the lessor, together with such other information as may be required by the lessor, upon forms prescribed by the lessor. In the event of a dispute as to the amount of royalty due, the lessee shall assume the burden of proof in any court action arising out of such dispute.

2. As rental, lessee shall pay to lessor annually on or before each anniversary date of this lease the sum of five dollars (\$5.00) per acre or fraction thereof, such rental payments to continue so long as this lease shall remain in force.

3. Lessee agrees to pay interest on delinquent royalty and rental payments at the rate of one percent (1%) per month, or fraction thereof, accruing from the date said payment becomes due.

4. If, at the end of the primary term, the lessee has submitted a mine plan, which is not subsequently disapproved by the lessor within three (3) months after submission, and the lessee has either incorporated the land leased hereunder with adjacent land into a logical mining unit or has shown to the satisfaction of the lessor that the adjacent land is federal land which has not been available for coal leasing but that the lessee has incurred substantial costs in developing the leased land, then this lease shall not expire at the end of the primary term but shall continue for a secondary term of an additional five (5) years.

5. If, at the end of the secondary term, the lessee is producing coal at an average annual rate of either one percent (1%) of the estimated recoverable reserves from the leased lands or one percent (1%) of the estimated recoverable reserves from the logical mining unit, then this lease shall not expire but shall continue as long as the one percent (1%) production is maintained. Provided, that, for purposes of determining if the one percent (1%) annual production has been maintained during any year after the end of the second (2nd) year following the beginning of production, the annual production averaged over the previous three (3) years, shall be used. For purposes of this paragraph, annual rates of production shall be measured from lease anniversary date to lease anniversary date.

6. In lieu of actual production at or after the end of the secondary term hereof, lessee may prevent the expiration of this lease by the timely payment of an advance royalty equal to the estimated royalty obligation which would be due if one percent (1%) of the recoverable reserves in the lands leased hereunder were produced. Payment of such advance royalty on or before a lease anniversary date will act to prevent the expiration of this lease until the next ensuing lease anniversary date; provided, that this lease shall not be extended for more than ten (10) years by payment of advance royalties. Any credit later taken in any month for advance royalties shall not exceed fifty percent (50%) of the actual production royalty due for that month.

7. The lessee, with the written approval of the lessor, may assign or sublet this lease in whole or in part; provided, however, that no assignment of an undivided interest

nor any assignment or sublease of less than a legal subdivision shall be recognized or approved by the lessor. Provided further, however, the lessee may enter into any contract for the development of the leasehold premises or any portion thereof, or may create overriding royalties or obligations payable out of production, or enter into any other agreements with respect to the development of the leasehold premises or disposition of the production therefrom, and it shall not be necessary for any such contracts, agreements, or other instruments to be approved by the lessor; but nothing herein contained shall relieve the lessee from complying with any of the terms or provisions hereof.

8. Lessee, including lessee's heirs, assigns, agents, and contractors shall at lessee's own expense fully comply with and conform to accepted operational standards and practices in general use in the industry and all laws, regulations, rules, ordinances, and requirements of the city, county, state, federal authorities and agencies, in all matters and things affecting the premises and operations thereon which may be enacted or promulgated under the governmental police powers pertaining to the public health and welfare, including but not limited to conservation, reclamation, sanitation, aesthetics, pollution, cultural properties, fire, and ecology. Such agencies are not to be deemed third (3rd) party beneficiaries hereunder; however, this clause is enforceable by the lessor in the same manner as other covenants of this lease.

9. The lessor or lessor's authorized representative shall have the right to enter the leased lands for the purpose of measuring the cubical contents of every opening from which coal has been extracted and to otherwise inspect the leased lands to ensure that proper royalties have been paid. The lessor or lessor's representative shall have the right to inspect all records, books, or accounts pertaining to the mining, extraction, transportation, and marketing of coal produced from the leased lands and, at the request of the lessor, the lessee shall furnish contracts, reports, samples, logs, assays, or cores within reasonable bounds as the lessor may determine to be necessary to the proper administration of the leased lands and this lease. In addition, lessee shall furnish annually and at such other times as the lessor may require, plats, maps, or tracings, clearly and accurately showing all development work upon the leased lands, and other related information, with a report as to all buildings, structures, or other work placed in or upon the leased lands, and a statement as to the amount and grade of coal produced and sold.

10. The value of any unpaid royalty shall become a prior lien upon the production from the leased lands and the improvements situated thereon.

11. Before commencing excavation operations or development upon the leased lands, the lessee shall execute and file with the lessor a good and sufficient bond or other appropriate surety in an amount to be fixed at that time by the lessor and based upon the approved mine plan to:

A. Guarantee the performance of all covenants and obligations under this lease, including the obligation to pay royalties;

B. Ensure that all aspects of mining operations and reclamation operations are conducted in conformity with the mine permit issued by the Mining and Minerals Division of the Energy, Minerals and Natural Resources Department pursuant to the Surface Mining Act; and

C. Ensure compensation for damage to the surface or surface improvements in the absence of an agreement between the lessee and any surface owner.

A bond filed with the Mining and Minerals Division of the Energy, Minerals and Natural Resources Department pursuant to the Surface Mining Act will satisfy the requirements of Subsection B of this Paragraph unless the lessor, in the lessor's discretion, determines that the bond filed with the Mining and Minerals Division is insufficient. Any bond, filed with the lessor pursuant to the provisions of this Paragraph, shall be released by the lessor upon a showing that lessee has complied with the obligations as specified in Subsections A, B, and C of this Paragraph.

12. Lessor may cancel this lease for nonpayment of rentals, nonpayment of royalties, or violation of any of the terms or covenants thereof; provided, however, that before any such cancellation shall be made, lessor, must mail to lessee, by registered or certified mail addressed to the post office address of the lessee shown by the lease, or by specific written notice of change of address furnished by lessee, a thirty (30) day notice of intention to cancel this lease, specifying the default for which the lease is subject to cancellation. No proof or receipt of notice shall be necessary and thirty (30) days after such mailing, lessor may enter cancellation unless lessee shall have sooner remedied the default; provided, that if the violation cannot be remedied within the thirty (30) day period and the lessee shall have commenced operations to substantially remedy the violation within such period, the lease shall not be canceled as long as lessee diligently pursues actions necessary to remedy the violation.

13. With the consent of the lessor this lease may be relinquished in whole or in part; provided, that the lessor will not approve any relinquishment of an undivided interest nor less than a legal subdivision. When filed and approved, such relinquishment shall be effective from the date of filing. Upon relinquishment of the lease, lessee shall be relieved from further obligations and liabilities hereunder as to the lands surrendered subject, however, to the continued obligations to: make payment of all accrued rentals and royalties; protect or restore the surface and surface resources consistent with the mine permit issued by the Mining and Minerals Division of the Energy, Minerals and Natural Resources Department; and to otherwise perform other obligations accrued under the lease.

14. Coalbed methane gas is specifically excluded and reserved from this lease, except for small incidental quantities which may have to be vented or flared to achieve access to coal. Although lessee may engage in insitu coal gasification in order to remove coal, such gasification shall not disturb or diminish commercial quantities of coalbed methane gas.

15. Lessee may make or place such improvements and equipment upon the leased land as may be reasonably necessary to explore for, mine and remove coal, and upon termination of this lease for any reason, lessee may remove such improvements and equipment as can be removed without material injury to the premises; provided, however, that all rentals and royalties have been paid and that such removal is accomplished within one hundred eighty (180) days of the termination date. All improvements and equipment remaining upon the premises after the removal date, as set forth in accordance with this Paragraph, shall be forfeited to lessor without compensation.

16. Lessee shall not mortgage any improvements placed upon the land.

17. The State has a continuing option to purchase at any time and from time to time, at the market price prevailing in the area on the date of purchase, all or any part of the coal that will be produced from the lands covered by this lease.

18. All the obligations, covenants, agreements, rights, and privileges of this lease shall extend to and be binding and inure to the benefit of the lawful and recognized assigns or successors in interest of the parties hereto.

19. Lessor reserves to itself the right to lease, sell, or otherwise dispose of the surface or other mineral deposits in the lands leased and the right to continue existing uses upon or in the leased lands, including issuing leases for mineral deposits not covered hereunder or the approval of easements or rights of way. Lessor shall condition such uses to prevent unnecessary or unreasonable interference with rights of lessee as may be consistent with concepts of multiple use and multiple mineral development.

20. Lessee shall be liable and agree to pay for all damage to livestock, growing crops, water, or other tangible improvements on the leased lands as may be suffered by reason of development, use, and occupation of the lands by lessee.

21. Any and all water rights developed on the leased lands by lessee shall be developed in the name of lessor. Lessee, at its own expense, shall comply with all regulations of, and obtain all necessary permits from, the office of the State Engineer. Lessee shall have the full and free use of such water rights for lease operations during the term of the lease. Upon expiration or termination of the lease, such water rights shall be retained by lessor. During the term of the lease, lessee shall preserve, protect, and defend such water rights.

22. Lessee shall save and hold harmless, indemnify, and defend the State of New Mexico, the commissioner of Public Lands, and the commissioner's agents in their official and individual capacities, of and from any and all liability claims, losses, or damages arising out of or alleged to arise out of or indirectly connected with the operations of lessee hereunder, off or on the leased lands, or the presence on said lands of any agent, contractor, or subcontractor of lessee. All terms and provisions of this instrument shall be binding upon the contractors and subcontractors of lessee in

like manner as the same are binding upon lessee, and all acts and doings of said contractors and subcontractors shall be deemed and treated as the same and held responsible by lessee.

23. Lessee shall exercise reasonable diligence, care, and skill in the operating of the leased lands in accordance with standard and approved mining methods and practices. Lessee shall conduct all exploration, development, and mining operations in a good workmanlike manner having due regard to the health and safety of employees, the prevention of waste, and the preservation of the property for further productive operations. All mining and related productive operations are to be subject to inspection by lessor or lessor's duly authorized agent.

24. See attached stipulations, if any, hereby made part of this lease.

IN WITNESS WHEREOF, the State of New Mexico has hereunto signed and caused its name to be signed by its commissioner of Public Lands thereunto duly authorized, with the seal of the commissioner's office affixed, and the lessee has signed this agreement to be effective the day and year above written.

PART 7: RELATING TO GEOTHERMAL RESOURCES LEASES

19.2.7.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501, Phone: (505) 827-5713.

[12/31/1999; 19.2.7.1 NMAC - Rn, 19 NMAC 3. SLO 7.1, 9/30/2002]

19.2.7.2 SCOPE:

This rule pertains to all geothermal resources on those lands held in trust by the commissioner of public lands under the terms of the Enabling Act and subsequent legislation (trust lands). This rule governs the lessees of such trust lands entered into subsequent to the date of this rule.

[12/31/1999; 19.2.7.2 NMAC - Rn, 19 NMAC 3. SLO 7.2, 9/30/2002]

19.2.7.3 STATUTORY AUTHORITY:

The commissioner's authority to manage the trust lands is found in N.M. Const., Art. XIII, and in Section 19-1-1 NMSA 1978. The authority to promulgate this rule is found in Section 19-1-2 NMSA 1978.

[12/31/1999; 19.2.7.3 NMAC - Rn, 19 NMAC 3. SLO 7.3, 9/30/2002]

19.2.7.4 DURATION:

Permanent.

[12/31/1999; 19.2.7.4 NMAC - Rn, 19 NMAC 3. SLO 7.4, 9/30/2002]

19.2.7.5 EFFECTIVE DATE:

January 20, 1984, unless a later date is cited at the end of a section.

[12/31/1999; 19.2.7.5 NMAC - Rn, 19 NMAC 3. SLO 7.5, 9/30/2002; A, 6/30/2016]

19.2.7.6 OBJECTIVE:

The objective of 19.2.7 NMAC is to provide for the orderly and lawful administration and the appropriate development of geothermal resources on trust lands.

[12/31/1999; 19.2.7.6 NMAC - Rn, 19 NMAC 3. SLO 7.6, 9/30/2002]

19.2.7.7 DEFINITIONS:

The following terms as used in this rule shall have the meaning here indicated, unless otherwise clearly stated in the text:

A. "Geothermal resources" - The natural heat of the earth or the energy, in whatever form, below the surface of the earth present in, resulting from, or created by, or which may be extracted from this natural heat and all minerals in solution or other products obtained from naturally heated fluids, brines, associated gasses, and steam, in whatever form, found below the surface of the earth, but excluding oil, hydrocarbon gas and other hydrocarbon substances.

B. "Lessee" - The original geothermal lessee and the assignee of an assignment duly approved and recognized by the commissioner pursuant to 19.2.7.29 NMAC through 19.2.7.36 NMAC.

C. "Land" - Includes all land owned by the state, all land owned by school districts, beds of navigable navigable rivers and lakes, submerged lands, and lands in which mineral rights have been reserved to the state.

D. "Legal subdivision" – Legal subdivision as used and recognized by the general land office of the United States and the New Mexico state land office, ordinarily consisting of forty (40) acres, more or less, or one- sixteenth (1/16) part of a standard section, including lots as designated by the U.S. survey plats.

E. "Contiguous" - Adjoining and having at least one (1) common side or boundary.

F. "Tract books" - That set of tract books kept and maintained at the New Mexico state land office.

G. "Person" - Individual or corporation, but does not include partnership or any other unincorporated association.

H. "Lease" - A lease for the extraction and removal of geothermal resources from state trust lands.

I. "Well" - Any well for the discovery of geothermal resources, or any well on lands producing geothermal resources or reasonably presumed to contain geothermal resources.

J. "Schedule of fees" - A list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

[12/31/1999; 19.2.7.7 NMAC - Rn, 19 NMAC 3. SLO 7.7, 9/30/2002; A, 6/30/2016]

19.2.7.8 APPLICATION FOR LEASE:

State trust lands may be leased only upon application made to the commissioner in a manner prescribed in these rules and under the Geothermal Resources Act of 1967.

[12/31/1999; 19.2.7.8 NMAC - Rn, 19 NMAC 3. SLO 7.8, 9/30/2002]

19.2.7.9 LANDS SUBJECT TO LEASE:

Application to lease will be considered only for such lands as may be shown to be open upon the tract books of the New Mexico state land office or for those for which existing leases have been officially canceled or have expired and such action noted on the mineral tract books of the New Mexico state land office. Lands of other school districts or state agencies shall be available for leasing only after written request by the governing board of public officials having ordinary jurisdiction of such lands.

[12/31/1999; 19.2.7.9 NMAC - Rn, 19 NMAC 3. SLO 7.9, 9/30/2002]

19.2.7.10 FORMAL REQUIREMENTS FOR APPLICATIONS:

A. Each application for lease shall be made with ink, or with typewriter using a record ribbon, in duplicate, upon forms to be prescribed by the commissioner, which application shall be acknowledged before an officer authorized to administer oaths, shall be accompanied by the application fee as set forth in the schedule of fees, which fee shall not be refunded, and shall be accompanied by the amount of the first (1st) year's rental and bonus offered, if any such bonus is offered, together with an appraisal of the value of the land for geothermal lease purposes made under oath by some disinterested party who is familiar therewith.

B. A separate check or other remittance covering the fee, rentals and bonus, if any, shall be submitted with each separate application to which applicable; however, the commissioner may waive this requirement when extreme hardship to the applicant would otherwise result.

[12/31/1999; 19.2.7.10 NMAC - Rn, 19 NMAC 3. SLO 7.10, 9/30/2002; A, 6/30/2016]

19.2.7.11 APPLICATIONS WITHOUT DEPOSIT REJECTED:

Applications not accompanied by the proper fees, money or deposit, shall immediately be stamped "Rejected, No Deposit" and shall not be deemed a proper application. In computing proper rental to be due in this connection, the acreage as shown on the New Mexico state land office tract books shall be the basis. Rentals for application purposes are to be computed at the minimum rate of one dollar (\$1.00) per acre or fraction thereof, unless otherwise specified by the commissioner.

[12/31/1999; 19.2.7.11 NMAC - Rn, 19 NMAC 3. SLO 7.11, 9/30/2002]

19.2.7.12 SEPARATE APPLICATIONS:

Separate applications shall be made for each lease and application shall be deemed for all acreage listed thereon or for that part thereof as may be available for leasing. If an application covers more than two thousand five hundred sixty (2,560) acres, or if all legal subdivisions applied for are not contiguous, the application shall be rejected; provided, however, if an application covers less than six hundred forty (640) acres, or if all legal subdivisions are not contiguous, the application shall be rejected; provided,

however, a lease, or leases, may be issued covering less than six hundred forty (640) acres if the subdivision or parcel is isolated from and not contiguous with other parcels available for lease. An application which covers less than a legal subdivision or less than an entire parcel in the case of a navigable river or lake bed shall be rejected.

[12/31/1999; 19.2.7.12 NMAC - Rn, 19 NMAC 3. SLO 7.12, 9/30/2002]

19.2.7.13 MISCELLANEOUS LANDS:

Lands of other state agencies or school districts (other than state trust lands or escheat lands under the direct control of the commissioner) shall be leased only after the agency or body controlling same has made request in writing to the commissioner to make same available for leasing and after such lands have been posted to the mineral tract books as herein provided. Premature applications covering such lands shall be rejected. Lands sold prior to July 17, 1967, with minerals reserved, shall be leased only after consultation with the surface patentee or contract purchaser. In addition, in the event the lessee's operation will involve appropriation of water, which is under the jurisdiction of the state engineer, written permission of the state engineer will be required before operations can commence. A copy of the written authorization of the state engineer to appropriate water shall be filed with the commissioner before water is appropriated.

[12/31/1999; 19.2.7.13 NMAC - Rn, 19 NMAC 3. SLO 7.13, 9/30/2002]

19.2.7.14 ONE (1) APPLICANT:

If more than one (1) person shall sign an application, the first (1st) name appearing thereon shall be considered as the bona fide applicant and the lease shall issue only in the name first listed. Such person only will be recognized by the commissioner as the lessee and sole record holder. This Rule specifically applies to cases of partnerships and other unincorporated associations; however, said agreements defining and setting out the various interests of other parties in the lease may be filed with the commissioner as miscellaneous instruments, and when so filed shall constitute constructive notice to the world of the existence and the contents thereof; provided, however, that the commissioner shall look solely and only to the lessee record holder for compliance with the terms and conditions of the lease, and the commissioner shall not be a necessary party to any dispute or controversy arising out of or because of such side agreement. Notices hereunder and under the Geothermal Resources Act required to be given to the lessee by the commissioner shall be sufficient if mailed to the record lessee.

[12/31/1999; 19.2.7.14 NMAC - Rn, 19 NMAC 3. SLO 7.14, 9/30/2002]

19.2.7.15 PRIORITY OF APPLICANTS - LIMITATIONS:

A prior application, if submitted in accordance with these rules and if in proper form, shall ordinarily be given a preference right to lease; provided, however, that neither this provision nor any other provision or combination of provisions contained in these rules

shall ever be construed to limit the power of the commissioner to withhold at any time any tract or tracts from leasing for geothermal resources purposes, if in the commissioner's opinion the best interests of the trust, or the state agency involved would be served by so doing, and no such provision or provisions shall ever be construed so as to prohibit the commissioner from rejecting any application at any time prior to approval and issuance of lease, and to offer said tract or tracts for lease at public auction as provided in 19.2.7.21 NMAC through 19.2.7.26 NMAC, inclusive.

[12/31/1999; 19.2.7.15 NMAC - Rn, 19 NMAC 3. SLO 7.15, 9/30/2002; A, 6/11/2019]

19.2.7.16 APPLICATION BY MAIL - SIMULTANEOUS APPLICANTS:

A. Applications received in the same delivery of open mail shall be deemed to have been filed simultaneously and shall be stamped as of the date and hour delivery was made to the New Mexico state land office.

B. When newly acquired acreage is posted to the tract books, or when open acreage is designated upon the tract books to be open acreage after having been previously leased or withdrawn from leasing by the commissioner, all applications for lease filed thereon within three (3) New Mexico state land office work days after such posting or designating, shall be considered as simultaneous applications.

C. In computing the time, the day of relinquishment, expiration, posting or designation shall be disregarded.

[12/31/1999; 19.2.7.16 NMAC - Rn, 19 NMAC 3. SLO 7.16, 9/30/2002]

19.2.7.17 DISPOSAL OF SIMULTANEOUS APPLICATIONS:

When simultaneous applications for lease are filed for the same lands, they may be disposed of in either of the following methods, as the commissioner may decide:

A. by submission of amended applications by the applicant in which case preference will be given to the applicant offering the highest bonus; or

B. by rejecting all applications and offering the lands for lease at public auction in the manner provided in 19.2.7.21 NMAC through 19.2.7.26 NMAC, inclusive.

[12/31/1999; 19.2.7.17 NMAC - Rn, 19 NMAC 3. SLO 7.17, 9/30/2002]

19.2.7.18 COMMISSIONER MAY WITHHOLD LAND FROM LEASING - POSTING TO TRACT BOOK:

The commissioner, at the commissioner's discretion, may at any time either before or after application is made, withhold any tract, subdivision or parcel of land from leasing, if in the commissioner's opinion the best interest of the trust would be served.

Immediately after making determination to withhold any tract or tracts, the commissioner shall reject any and all pending applications and enter a proper notation upon the tract books, indicating the action taken and the date thereof. If and when thereafter the commissioner shall determine said lands again to be open for leasing, the commissioner shall enter a notation on the tract books to that effect, and the provisions of 19.2.7.16 NMAC (three day rule) shall apply from the date of said notation. Provided, further, that should the commissioner so determine said lands again to be open for leasing within six months from the date of withdrawal, the commissioner shall give 15 days advance written notice to all previously rejected applicants, if any.

[12/31/1999; 19.2.7.18 NMAC - Rn, 19 NMAC 3. SLO 7.18, 9/30/2002; A, 6/11/2019]

19.2.7.19 APPLICANTS REJECTED - LEASE AUCTIONED:

The commissioner may, at the commissioner's discretion, reject any pending application for lease and offer the acreage embraced therein for lease upon competitive bidding by sealed bids or at public auction to the bidder offering the highest bonus in addition to the minimum annual rentals as set by the commissioner.

[12/31/1999; 19.2.7.19 NMAC - Rn, 19 NMAC 3. SLO 7.19, 9/30/2002; A, 6/11/2019]

19.2.7.20 KNOWN GEOTHERMAL FIELDS:

Lands classified as "known geothermal fields" as provided in Section 6 of the Geothermal Resources Act (Section 19-13-6 NMSA 1978) shall be withdrawn, such withdrawal posted to the tract books, and such lands shall be leased at public auction only as provided in 19.2.7.18 NMAC, 19.2.7.19 NMAC, and 19.2.7.21 NMAC through 19.2.7.26 NMAC, inclusive.

[12/31/1999; 19.2.7.20 NMAC - Rn, 19 NMAC 3. SLO 7.20, 9/30/2002]

19.2.7.21 PUBLIC AUCTION SALE DATE:

Regular lease sales will ordinarily be held on the third (3rd) Thursday of each month, or on the next business day following where the third (3rd) Thursday falls on a holiday. Special sales may also be held on other dates at the discretion of the commissioner.

[12/31/1999; 19.2.7.21 NMAC - Rn, 19 NMAC 3. SLO 7.21, 9/30/2002]

19.2.7.22 NOTICE OF SALE POSTED - SEALED OR ORAL BIDS:

Before any regular or special sale shall be held, the commissioner shall post in a conspicuous place in the New Mexico state land office, not less than ten (10) days before the date of the sale, a notice of same, specifying the place, date and hour of the sale, and containing a description of the lands to be offered for lease and indicating whether the sale is to be by sealed bids or at oral public auction.

[12/31/1999; 19.2.7.22 NMAC - Rn, 19 NMAC 3. SLO 7.22, 9/30/2002]

19.2.7.23 SEALED BIDS PROCEDURE:

In the event the sale is to be by sealed bids, bids will be received up to the hour set in the notice of sale, and all bids submitted will be opened at the appointed hour, and the lease will be awarded to the highest bidder, subject to the right of the commissioner to reject all bids if the commissioner shall deem the bids too low or shall deem it in the best interest of the trust to do so. In the event of such rejection, the action taken, the date and hour thereof, and reason therefor, shall be indicated on the tract books, in the same manner as provided in 19.2.7.18 NMAC. Sealed bids will be accompanied by remittance covering application fee, first year's rental and bonus offered.

[12/31/1999; 19.2.7.23 NMAC - Rn, 19 NMAC 3. SLO 7.23, 9/30/2002; A, 6/11/2019]

19.2.7.24 ORAL BIDS - PROCEDURE:

In the event sale is by public auction, the successful bidder will be required to pay the filing fee as set forth in the schedule of fees, the first (1st) year's rental and bonus offered on or before close of business on the date of sale.

[12/31/1999; 19.2.7.24 NMAC - Rn, 19 NMAC 3. SLO 7.24, 9/30/2002; A, 6/30/2016]

19.2.7.25 WHERE NO BIDS RECEIVED:

If no bids are received for any tract described in the notice, said tract shall be considered as withdrawn until further notice and proper notations made upon the mineral tract books.

[12/31/1999; 19.2.7.25 NMAC - Rn, 19 NMAC 3. SLO 7.25, 9/30/2002]

19.2.7.26 TIE BIDS:

In the event the sale is by sealed bid and in the event two (2) or more highest bids are received for the same tract, offering the same bonus, the lease shall be disposed of by submission of amended applications by the applicants, in which case preference will be given to the applicant offering the higher bonus.

[12/31/1999; 19.2.7.26 NMAC - Rn, 19 NMAC 3. SLO 7.26, 9/30/2002]

19.2.7.27 FORMS:

Leases are to be made upon forms prescribed and furnished by the commissioner.

[12/31/1999; 19.2.7.27 NMAC - Rn, 19 NMAC 3. SLO 7.27, 9/30/2002]

19.2.7.28 LIMITATIONS OF ACREAGE:

No person, association or corporation shall take, hold, own or control any interest, direct or indirect, in state geothermal resources leases exceeding fifty-one thousand two hundred (51,200) acres.

[12/31/1999; 19.2.7.28 NMAC - Rn, 19 NMAC 3. SLO 7.28, 9/30/2002]

19.2.7.29 LIMITATIONS ON ASSIGNMENTS - MANNER OF EXECUTION:

Subject to such conditions as the commissioner may require, leases may be assigned in whole or in part; however, no assignment of an undivided interest in a lease or any part thereof, or any assignment of less than a legal subdivision or tract shall be recognized or approved by the commissioner. Such assignments shall be executed and acknowledged in the same manner prescribed for conveyance of real estate and shall be filed in triplicate with the commissioner. One (1) copy shall be recorded permanently, another filed, and the third (3rd) copy returned to the assignee. The approval of the commissioner shall be noted upon all copies.

[12/31/1999; 19.2.7.29 NMAC - Rn, 19 NMAC 3. SLO 7.29, 9/30/2002]

19.2.7.30 FORMS AND FEE:

All assignments shall be upon forms prescribed and furnished by the commissioner which shall recite, among other things, the consideration paid for the assignment. The fee for filing shall be as set forth in the schedule of fees.

[12/31/1999; 19.2.7.30 NMAC - Rn, 19 NMAC 3. SLO 7.30, 9/30/2002; A, 6/30/2016]

19.2.7.31 REFUSAL AND CONDITIONS:

The commissioner may refuse to approve any assignment and may condition the commissioner's approval on such additional terms and compensation as the commissioner may deem in the best interests of the trust.

[12/31/1999; 19.2.7.31 NMAC - Rn, 19 NMAC 3. SLO 7.31, 9/30/2002; A, 6/11/2019]

19.2.7.32 EFFECT OF COMMISSIONER'S APPROVAL - MISCELLANEOUS INSTRUMENTS:

Upon approval of the commissioner, the assignor shall be relieved from all obligations owing to the state of New Mexico with respect to the lands embraced in the assignment, and the state shall likewise be relieved from all obligations to the assignor as to the said lands, and the assignee shall succeed to all the rights and privileges of the assignor and assumes all of the duties and obligations of the assignor as to the said lands; provided, however, any record owner of any lease may enter into any contract for the

development of the leasehold premises or any portion thereof, or may create overriding royalties or obligations payable out of production, or enter into any agreements with respect to the development or operation of the leasehold premises. It shall not be necessary for any such contracts, agreements or other instruments to be approved by the commissioner, but nothing contained in these rules shall relieve the record title owner of such lease from complying with any of the terms or provisions thereof, and the commissioner shall look solely and only to such record owner for compliance therewith, and in any controversy respecting any such contracts, agreements or other instruments, the commissioner shall not be a necessary party. All such contracts, agreements and other instruments may be filed either in the office of the commissioner or recorded in the office of the county clerk wherein the lands are situated, and the filing and recording thereof shall constitute notice to the world of the existence and the contents thereof, except as to the commissioner. The fee for filing such miscellaneous instruments with the commissioner shall be as set forth in the schedule of fees.

[12/31/1999; 19.2.7.32 NMAC - Rn, 19 NMAC 3. SLO 7.32, 9/30/2002; A, 6/30/2016]

19.2.7.33 EFFECT OF ASSIGNMENT ON PRODUCTION:

When any assignment of a portion of the lease shall be approved by the commissioner, the assigned and the retained portions of the lease shall be treated and considered as separate leases for the purpose of determining whether the lessee or lessees have a right of renewal for succeeding five (5) year terms, and also for the purpose of bonding as provided in 19.2.7.37 NMAC, 19.2.7.38 NMAC, and 19.2.7.39 NMAC.

[12/31/1999; 19.2.7.33 NMAC - Rn, 19 NMAC 3. SLO 7.33, 9/30/2002]

19.2.7.34 ASSIGNMENTS TO BE RECORDED IN NEW MEXICO STATE LAND OFFICE:

Assignments must be accompanied by the filing fee as set forth in the schedule of fees and filed with the commissioner within one hundred (100) days after having been signed by the assignor as shown upon the face of the instrument and not from the date of acknowledgment. Those presented after expiration of that time shall not be approved unless it can be shown to the satisfaction of the commissioner that extreme hardship will result to one (1) or more of the parties and that no prejudice to the rights of the state of New Mexico will occur. An additional fee as set forth in the schedule of fees will be charged for each such assignment (or each group of assignments, if the same basic facts are involved) to cover expense of investigation and records search.

[12/31/1999; 19.2.7.34 NMAC - Rn, 19 NMAC 3. SLO 7.34, 9/30/2002; A, 6/30/2016]

19.2.7.35 RESIDENT DECEDENT'S LEASE:

To effect transfer of an interest in a lease owned by a deceased resident of New Mexico, proper probate proceedings must be had in accordance with the New Mexico

Probate Code, and certified copies of such proceedings showing proper legal authority to transfer must be filed with the commissioner.

[12/31/1999; 19.2.7.35 NMAC - Rn, 19 NMAC 3. SLO 7.35, 9/30/2002]

19.2.7.36 FOREIGN DECEDENT:

In the event a decedent owner of a lease was a resident of a state other than New Mexico, the estate must be probated in the state of such residence and ancillary proceedings conducted in the proper New Mexico court, and certified copies of such proceedings showing proper legal authority to transfer must be filed with the commissioner. Provided, however, where the decedent died on or after July 1, 1976, the lease may be transferred upon the foreign personal representative's compliance with the provisions of the New Mexico Probate Code.

[12/31/1999; 19.2.7.36 NMAC - Rn, 19 NMAC 3. SLO 7.36, 9/30/2002]

19.2.7.37 SURETY TO PROTECT SURFACE LESSEE WAIVERS:

A. Before any lessee shall commence development or operations, including any and all prospecting activities upon the lands, such lessee shall execute and file with the commissioner a sufficient bond or other surety, in an amount to be fixed by the commissioner, but not less than five thousand dollars (\$5,000.00), in favor of the state of New Mexico, for the benefit of the state, its contract purchaser, patentee, or surface lessee, to secure payment for any damages to the leased land or tangible improvements upon the leased land as may be suffered by reason of development and operations upon the land by the lessee.

B. The bond may be either a corporate or individual surety bond and such sureties may be required to furnish proof that their net worth free and clear of all indebtedness or claims equals or exceeds the amount of the obligation. In lieu of said bond, with the commissioner's consent, the lessee may file with the commissioner a waiver of bond or other surety duly executed and acknowledged by the applicable surface owner or holders owning improvements.

[12/31/1999; 19.2.7.37 NMAC - Rn, 19 NMAC 3. SLO 7.37, 9/30/2002]

19.2.7.38 PERFORMANCE SURETY:

Before a lease shall issue, the lessee shall file with the commissioner a bond or other surety in an amount to be set by the commissioner which the commissioner deems necessary to guarantee payment of royalties to become due the state of New Mexico. With the approval of the commissioner, in lieu of separate surface improvement damage and performance bonds, a twenty-five thousand dollar (\$25,000.00) bond or other surety may be used at the option of lessee for the use and benefit of the commissioner, to secure surface improvement damage and the performance of the lessee as lessee

under one or more state leases or permits for minerals, oil and gas, coal or geothermal resources, or as holder under one or more state rights of way or easements which the lessee has executed with the commissioner. The lessee will be obligated to perform and keep all terms, covenants, conditions and requirements of all state leases for minerals, oil and gas, coal or geothermal resources, and of all state rights of way and easements executed with the commissioner, including the payment of royalties when due and compliance with all established mining plans and reclamation requirements.

[12/31/1999; 19.2.7.38 NMAC - Rn, 19 NMAC 3. SLO 7.38, 9/30/2002; A, 6/11/2019]

19.2.7.39 FORMS:

Forms for all bonds are prescribed and furnished by the commissioner.

[12/31/1999; 19.2.7.39 NMAC - Rn, 19 NMAC 3. SLO 7.39, 9/30/2002]

19.2.7.40 ROYALTY REPORTS:

Lessees shall file royalty reports as such times and upon forms as may be prescribed by the commissioner.

[12/31/1999; 19.2.7.40 NMAC - Rn, 19 NMAC 3. SLO 7.40, 9/30/2002]

19.2.7.41 [RESERVED]

[12/31/1999; 19.2.7.41 NMAC - Rn, 19 NMAC 3. SLO 7.41, 9/30/2002]

19.2.7.42 COLLATERAL ASSIGNMENTS OF LEASES:

Collateral assignments of leases shall be filed in duplicate upon forms provided by the commissioner together with the filing fee as set forth in the schedule of fees.

[12/31/1999; 19.2.7.42 NMAC - Rn, 19 NMAC 3. SLO 7.42, 9/30/2002; A, 6/30/2016]

19.2.7.43 CO-OPERATIVE OR UNITIZED DEVELOPMENT FOR OPERATION OF LEASES:

The commissioner may, after public hearing, approve cooperative or unit development for operation of leases under the provisions of Section 14 of the Geothermal Resources Act (Section 19-13-14 NMSA 1978) upon the commissioner's determining that such will be in the interest of conservation of geothermal resources and where the commissioner finds such would be to the best interests of the trust or the agency with jurisdiction over the lands involved.

[12/31/1999; 19.2.7.43 NMAC - Rn, 19 NMAC 3. SLO 7.43, 9/30/2002; A, 6/11/2019]

19.2.7.44 [RESERVED]

[12/31/1999; 19.2.7.44 NMAC - Rn, 19 NMAC 3. SLO 7.44, 9/30/2002; Repealed, 6/30/2016]

PART 8: RELATING TO AGRICULTURAL LEASES

19.2.8.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501, Phone: (505) 827-5713.

[6/29/96; 19.2.8.1 NMAC - Rn, 19 NMAC 3 SLO 8.1, 09/30/02]

19.2.8.2 SCOPE:

Current and future lessees of state trust lands.

[6/29/96; 19.2.8.2 NMAC - Rn, 19 NMAC 3 SLO 8.2, 09/30/02]

19.2.8.3 STATUTORY AUTHORITY:

Section 19-1-23 NMSA 1978.

[6/29/96; 19.2.8.3 NMAC - Rn, 19 NMAC 3 SLO 8.3, 09/30/02]

19.2.8.4 DURATION:

Permanent.

[6/29/96; 19.2.8.4 NMAC - Rn, 19 NMAC 3 SLO 8.4, 09/30/02]

19.2.8.5 EFFECTIVE DATE:

June 29, 1996, unless a later date is cited at the end of a section.

[6/29/96; 19.2.8.5 NMAC - Rn, 19 NMAC 3 SLO 8.5, 09/30/02; A, 06/30/16]

19.2.8.6 OBJECTIVE:

To clarify the definition of an agricultural lease, add specific guidelines for conducting appraisals of improvements located on state trust lands, update and clarify the procedures for documenting a lessee's improvements, delete the provision allowing applications to lease a part of the state trust lands held under an existing lease, require a lessee to fence land held under an agricultural lease unless the land is managed in conjunction with adjoining land, add language clarifying when a sublease is created,

clarify aspects of processing multiple applications ("competitive bids") to lease the same trust land, and address other aspects of leasing lands under an agricultural lease of state trust lands.

[6/29/96; 19.2.8.6 NMAC - Rn, 19 NMAC 3 SLO 8.6, 09/30/02]

19.2.8.7 DEFINITIONS:

The following terms as used in this rule shall have the meaning indicated unless otherwise clearly stated in the text:

A. "Agricultural lease" - The commissioner's conveyance, in writing, of the right to use and possess the surface of specified state land for the production of crops and other products of the soil, animal husbandry or for other related uses. An agricultural lease may be subject to such other rights and uses on the same land as the commissioner may authorize in writing. The lease instrument shall be in a form and contain such provisions as may be prescribed by the commissioner, which provisions shall be deemed to include all pertinent statutes and state land office Rules in effect at lease issuance or as thereafter amended or promulgated.

B. "Agricultural sublease" - A transaction or arrangement whereby a lessee grants to another rights or interests conveyed to the lessee by an agricultural lease. A sublease is created when the lessee transfers to another either the possession of the leased premises, or a portion thereof, or the management and control of crops and other products of the soil, animals, or other permitted uses located on the leased premises. A sublease is not created when the lessee retains possession of the leased premises and manages and controls crops and other products of the soil or animals located on the leased premises but not owned by the lessee.

C. "Authorized improvements" - Improvements placed, made or developed on state lands by a lessee with the express written consent of the commissioner; improvements placed, made or developed on state lands by a lessee that are valued within the limitations prescribed by Section 19-7-51 NMSA 1978; improvements placed, made or developed on state lands prior to March 1, 1955; and, improvements placed, made or developed on state lands after March 1, 1955, but prior to March 1, 1975, provided such improvements are approved in writing by the commissioner on or before October 31, 1993.

D. "Cultivated land" - State trust land suitable for the production of crops or other products of the soil. Cultivated land may be dry cropland, irrigated cropland, orchards or regularly irrigated pasture.

E. "Dry cropland" - Cultivated land for which rainfall is the only source of water to produce crops.

F. "Grazing land" - State trust land suitable for the production and utilization of native forage and on which the ecological plant community is suitable for animal husbandry.

G. "Irrigated cropland" - Cultivated land for which the primary supply of water to produce crops is from a man-made diversion of ground water or surface water.

H. "Lessee" - The party of record at the state land office who leases state trust land from the commissioner under an agricultural lease.

I. "Open acreage" - State trust land which is not leased and has not been withdrawn from leasing by the commissioner as shown on the state land office departmental tract books.

J. "Replacement cost less physical deterioration or functional obsolescence" - The cost of replacing the improvements, at current prices, with improvements having the same utility equivalent, less a deduction for the total loss in value arising from the physical deterioration or functional obsolescence of the improvement.

K. "Schedule of fees" - A list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

L. "Simultaneous applications" - Two or more valid agricultural lease applications that apply to lease the same land and that are received at the state land office on the same regular work day.

M. "State trust land" - Land depicted as within the care, custody and control of the commissioner of public lands by the state land office master title tract books.

N. "Unauthorized improvements" - Improvements other than authorized improvements placed, made or developed on state trust lands.

[3/11/81, 1/20/84, 9/30/85, 12/1/92, 6/29/96; 19.2.8.7 NMAC - Rn, 19 NMAC 3 SLO 8.7, 09/30/02; A, 04/15/10; A, 06/30/16]

19.2.8.8 AGRICULTURAL LEASES:

A. The commissioner may lease state trust land for agricultural purposes in such manner and upon such terms as the commissioner determines to be in the best interests of the trust for which the lands are held by the state.

B. Each agricultural lessee shall protect the leased state trust lands from waste and trespass.

C. One who leases state trust lands shall fence the lands leased, unless such lands shall be used and managed in conjunction with adjacent land, or are subject to an exchange of use agreement.

D. Agricultural leases shall be issued for animal husbandry, cultivated land or both, or for other related uses.

E. The commissioner may, at any time, withhold state trust land from agricultural leasing or reject applications to lease, whether such applications are to lease open acreage, to renew an existing lease, or to lease land already under lease to another, if the commissioner determines such action is in the best interests of the trust for which the land is held.

F. All agricultural leases shall be upon forms prescribed by the commissioner and shall contain such terms and conditions as are required by law or as are deemed appropriate by the commissioner. Each lease shall have only one (1) mailing address of record at the state land office regardless of the number of lessees under the lease, and the commissioner shall mail all lease notices to such address of record and no other.

G. Agricultural leases with terms of five (5) years or less may be issued by the commissioner without advertisement or public auction. All such leases shall commence on October 1st and expire on September 30th; provided, however, leases on open acreage issued after October 1st shall bear the actual date of execution and shall be issued for the balance of that lease year plus no more than four (4) additional years.

H. Outstanding agricultural leases and permits on lands acquired by the state of New Mexico from the United States shall be honored until their expiration. The lessees under such leases shall have the right as provided by law to match competitive lease bids and obtain new leases.

[12/1/92, 6/29/96; 19.2.8.8 NMAC - Rn, 19 NMAC 3 SLO 8.8, 09/30/02; A, 04/15/10]

19.2.8.9 APPLICATIONS TO LEASE:

A. Requirements for all applications. Applications for agricultural leases may be filed for state trust lands shown on the state land office departmental tract books as either open acreage or land under lease at the time an application is submitted. The commissioner shall reject any application to lease state trust lands, whether held under an existing lease or not under lease at the time application is made, if the commissioner determines that the award of a lease to the applicant would not be in the best interests of the trust.

(1) A single application shall not be accepted for lands held under more than one existing lease or for both open acreage and lands held by an existing lease.

(2) All agricultural lease applications shall be made under oath on forms prescribed by the commissioner.

(3) All agricultural lease applications for open acreage or competitive bid shall include a sworn appraisal of the land applied for, and all improvements located thereon, made by a disinterested party who has personal knowledge and ability to provide a true and accurate assessment of the value of the land and the improvements. An existing lessee applying for a new lease on trust land which the lessee currently leases, in lieu of an appraisal of the improvements, shall submit a listing of all improvements located on the land, but need not submit an appraisal of the land.

(a) All appraisals of improvements made for the purposes of this rule shall be made on the basis of replacement cost less a deduction for the total loss in value arising from the physical deterioration or functional obsolescence of the improvements, and a value shall be listed separately for each improvement.

(b) The inclusion of unauthorized improvements on any appraisal or listing of improvements submitted to the commissioner for any purpose shall not be interpreted as approval of those improvements by the commissioner. Improvements shall be approved only as provided under 19.2.8.17 NMAC "agricultural improvements" below.

B. Application requirements for open acreage. In addition to the requirements set forth in Subsection A above, agricultural lease applications for open acreage shall be accompanied by:

(1) the lease application filing fee as set forth in the schedule of fees;

(2) the deposit of a sum equal to the first year's offered rental, which shall in no case be less than the minimum rent in the schedule of fees, or if fewer than 12 months remain in the period between the date of lease application and the following September 30th, the deposit of an amount equal to the first year's offered rental reduced on a pro rata basis by month; and,

(3) the deposit of a sum equal to the appraised value of the authorized improvements on the land applied for or a bill of sale or waiver of payment signed by the holder of the right to compensation for such improvements.

C. Simultaneous applications for open acreage. Upon receipt of simultaneous applications for open acreage, the lease shall be awarded to the applicant offering the highest annual rental or, at the commissioner's discretion, the applications may be rejected; and

(1) the applicants permitted to submit confidential sealed lease bids on forms and pursuant to procedures prescribed by the commissioner with the lease awarded to the applicant who by the date and time specified by the commissioner submits the highest sealed bid, if to anyone; or

(2) the open acreage leased by advertised, competitive bid to the bidder offering the highest annual rental, if to anyone.

D. Application requirements for renewal. In addition to the requirements set forth in Subsection A above, agricultural lease applications for a new lease on lands held by the applicant under an existing lease shall:

(1) be accompanied by the lease application filing fee as set forth in the schedule of fees;

(2) be accompanied by the first year's offered rental, which shall in no case be less than the minimum rent in the schedule of fees; and

(3) be filed with the commissioner on or before August 1st of the year in which the existing lease is to expire; the failure to submit the application on or before August 1st shall result in the forfeiture of the lessee's right to obtain the lease by matching the highest annual rental offered by other applicants to lease the same land.

E. Application requirements for competitive bids. In addition to the requirements set forth in Subsection A above, agricultural lease applications to lease lands leased to another under an existing lease shall be made for the entire acreage under lease. Such applications shall be made on or before September 1st in the year in which the existing lease is to expire, and shall be accompanied by:

(1) the lease application filing fee as set forth in the schedule of fees;

(2) the deposit of a sum equal to the first year's offered rental which shall in no case be less than the minimum rent in the schedule of fees; and

(3) the deposit by money order, cashier's check or certified check of a sum equal to the appraised value of the authorized improvements on the land applied for, or a bill of sale or waiver of payment signed by the holder of the right to compensation for such improvements.

F. Determination of competitive bids. In the event more than one application is filed to lease lands held by an existing agricultural lease, the lease shall be awarded to the applicant offering the highest annual rental, provided that such award is in the best interest of the trust. If, however, the lease is not in default and one of the applicants is the lessee under the existing lease who correctly applied for the new lease prior to August 1st, the commissioner shall notify the lessee in writing of the amount of the highest annual rental offered by another applicant for the lease and the name and address of the applicant offering the highest annual rental. If the lessee matches such offer on or before September 30th, the new lease shall be awarded to the lessee, if to anyone. If the lessee does not apply to lease the land on or before August 1st, and more than one lease application is made on the leased land on or before September 1st, the commissioner, in the commissioner's discretion, may award the lease to the

applicant offering the highest annual rental, provided that such award is in the best interest of the trust. Alternatively, the commissioner may implement the procedures applicable in instances of simultaneous application set out in Subsection C above.

G. Improvement value disputes. The value of the improvements, if in dispute, shall be determined by the commissioner's appraisal. If there is a dispute over the value of the improvements as determined by the commissioner, the disputing party must file a contest to determine such value. The parties to such a contest shall be the existing lessee and the competitive bidder.

H. Sealed bids. A lessee or applicant submitting a sealed bid in response to the commissioner's request for sealed bids, shall not be permitted to change or supplement that bid after it has been submitted.

I. Non-conforming applications. Any lease application which does not comply with the requirements of this Section 19.2.8.9 NMAC shall be subject to rejection.

(1) If the rejected application is to renew a lease, and such application is not corrected in time, the applicant shall fail to retain the right to match a competitive bid set out in Section 19-7-49 NMSA 1978.

(2) In the commissioner's discretion, but only in cases where there is no competitive bid, the commissioner may, pursuant to Section 19-7-4 NMSA 1978, grant additional time to correct minor errors or omissions in an application.

[3/11/1981, 1/20/1984, 9/30/1985, 12/1/1992, 6/29/1996; 19.2.8.9 NMAC - Rn, 19 NMAC 3 SLO 8.9, 9/30/2002; A, 4/15/2010; A, 6/30/2016; A, 6/11/2019]

19.2.8.10 WITHDRAWAL:

A. The commissioner may withdraw from an agricultural lease during its term up to one-half the leased acreage not to exceed six hundred and forty (640) acres provided that:

(1) the commissioner has received a bona fide offer to lease or purchase the lands proposed for withdrawal for uses other than agricultural uses and the offered rental or purchase price indicates the land has a current higher and better value for uses other than agricultural uses;

(2) the commissioner makes a written determination that such withdrawal is in the best interests of the trust for which the land is held and that the land to be withdrawn has a current higher and better value for uses other than agricultural uses; and

(3) the commissioner mails notice of the withdrawal to the lessee by certified mail at least ninety (90) days prior to the date the withdrawal is to be effective and includes with the notice:

(a) a copy of the written determination described in Paragraph (2) of Subsection A of 19.2.8.10 NMAC;

(b) a description of the land to be withdrawn sufficiently detailed to permit identification and location of the land with reasonable accuracy;

(c) the appraised value for uses other than agricultural uses, of the land to be withdrawn; and

(d) a notice to vacate that sets forth the date the withdrawal is to be effective.

B. The commissioner shall not withdraw a portion of the leased lands pursuant to this rule if such withdrawal would adversely affect the lessee's use of water on the remaining portion of the leased lands, unless the lessee has a reasonable alternative to mitigate the adverse effect.

C. The commissioner shall refund to the lessee on a pro rata basis rentals paid in advance on the withdrawn lands for the period of time between the effective withdrawal date and the next following rental payment due date.

D. Upon the sale or lease of the withdrawn land, the owner or subsequent lessee shall fence the withdrawn land from adjoining land that is under agricultural lease.

E. A lessee from whom leased lands are withdrawn, who is entitled to compensation for improvements on lands withdrawn, shall receive such compensation from the subsequent lessee or purchaser of the lands withdrawn, as provided by statute and this rule.

[12/1/92, 6/29/96; 19.2.8.10 NMAC - Rn, 19 NMAC 3 SLO 8.10, 09/30/02]

19.2.8.11 RENTAL:

A. In the absence of a competitive bid, the annual rental for grazing land leased under an agricultural lease shall be determined by the following formula:

Annual rental = \$0.0474 (Base Value) x Carrying Capacity (CC) x Acreage x Economic Variable Index (EVI).

(1) The EVI in any year (t), October 1st through September 30th, is the ratio of the value of a state land office adjustment factor for that year (SLOAF_t) to the value of that same adjustment factor calculated for the base year 1987 (SLOAF₈₇), i.e., SLOAF_t : SLOAF₈₇, or SLOAF_t divided by SLOAF₈₇ (1987 base = 135).

(2) To determine the SLOAF for each year (t+1), the commissioner shall use the following formula, in which the three indices (the western states forage value index (FVI), beef cattle price index (BCPI), and the prices paid index (PPI)) correspond to the

United States department of agriculture's annually published indices for the immediately preceding year (t): $SLOAF_{t+1} = -14.92 + (1.57 \times FV_{It}) + (0.26 \times BCPI_{It}) - (0.67 \times PPI_{It})$.

B. The commissioner shall determine the carrying capacity for grazing land in accordance with Section 19-7-29 NMSA 1978, which may be redetermined. A lessee seeking a reevaluation and redetermination of the carrying capacity shall submit such forms as may be prescribed by the commissioner.

C. Notwithstanding the application of the formula to determine lease rentals for grazing land, the annual rental shall not be less than the minimum rent set forth in the schedule of fees nor shall it be decreased or increased by more than thirty-three and one-third percent of the preceding year's rental for the same land.

D. The rental for cultivated land or land leased under an agricultural lease for other uses shall be determined by the commissioner.

E. In computing rental on leases issued after October 1st, the rental for a part of a month shall be the same as the rental for a full month.

[3/11/1981, 4/28/1982, 1/20/1984, 9/30/1985, 12/1/1992, 6/29/1996; 19.2.8.11 NMAC - Rn, 19 NMAC 3 SLO 8.11, 9/30/2002; A, 6/11/2019]

19.2.8.12 SUBLEASING:

A. The sublease of an agricultural lease or any portion thereof may be made only with the prior written consent of the commissioner.

(1) A sublease without the written consent of the commissioner prior to such use or occupancy commencing shall be in violation of Sections 19-6-3 and 5 NMSA 1978.

(2) Sublease applications not submitted to the commissioner for approval within thirty (30) days of their actual execution shall be rejected.

B. Applications to sublease shall be made under oath, on forms prescribed by the commissioner and shall be accompanied by the first year's sublease payment.

C. The sublease payment shall be made by the lessee, in advance, in addition to the annual lease rental, in an amount equal to twenty percent (.20) of the current annual lease rental, but in no instance less than the minimum rent in the schedule of fees for each year or any portion of a year in the sublease term.

(1) Sublease payments shall be computed on an annual basis from October 1st of each year to the following September 30th, and shall be due on the date of sublease application and thereafter, following sublease approval, on the date the annual lease rental is due.

(2) Sublease payment for a portion of a year shall not be prorated but shall be in the same amount as the sublease payment for a full year.

D. No sublease term shall extend beyond the term of its base lease and lease assignment shall result in the automatic termination of any sublease.

[3/11/81, 1/20/84, 9/30/85, 4/8/87, 12/1/92, 6/29/96; 19.2.8.12 NMAC - Rn, 19 NMAC 3 SLO 8.12, 09/30/02; A, 04/15/10]

19.2.8.13 RELINQUISHMENT:

A. With the prior written consent of the commissioner, the release of all outstanding collateral assignments, and the payment to the commissioner of the relinquishment filing fee as set forth in the schedule of fees, any lessee may relinquish to the state a lease that is not in default and the lease shall be cancelled.

(1) The relinquishment filing fee shall be waived if the relinquishment is at the request of the commissioner.

(2) Relinquishments shall be made on forms and in the manner prescribed by the commissioner.

B. A relinquishment without the written consent of the commissioner shall be null and void.

[3/11/81, 1/20/84, 9/30/85, 12/1/92; 19.2.8.13 NMAC - Rn, 19 NMAC 3 SLO 8.13, 09/30/02; A, 06/30/16]

19.2.8.14 ASSIGNMENTS:

A. With the written consent of the commissioner and the payment to the commissioner of the assignment filing fee as set forth in the schedule of fees, a lessee may assign the lease or the lease rights to any part of the land held thereunder for the remainder of the lease term, provided the lease is not in default and any outstanding collateral lease assignments have either been released or the prospective lease assignee has agreed in writing to assume or take the lease subject to the rights of the collateral assignees. Lease assignments shall be made under oath, upon forms prescribed by the commissioner and shall be accompanied by the lease assignment filing fee.

B. Upon the commissioner's approval in writing of the lease assignment, the assignment form shall become the leasing instrument.

C. An assignment without the written consent of the commissioner shall be null and void.

D. The assignment of an agricultural lease does not assign the appurtenant water rights. The transfer of water rights to an assignee requires the use of the transfer of ownership form provided by the office of the state engineer.

[3/11/81, 1/20/84, 9/30/85, 12/1/92, 6/29/96; 19.2.8.14 NMAC - Rn, 19 NMAC 3 SLO 8.14, 09/30/02; A, 04/15/10; A, 06/30/16]

19.2.8.15 COLLATERAL ASSIGNMENTS:

A. With the prior written consent of the commissioner and the payment to the commissioner of the collateral assignment fee as set forth in the schedule of fees, a lessee may assign as collateral security a lease that is not in default; provided, however, that the collateral assignment of more than one (1) lease to secure the same indebtedness shall be made by separate assigning instruments. The collateral assignment of a lease shall not prevent its cancellation by the commissioner.

B. Collateral assignments shall be made upon forms prescribed by the commissioner and shall be accompanied by the collateral assignment fee as set forth in the schedule of fees.

C. The foreclosure of collateral assignments shall be accomplished in the manner provided by law for the foreclosure of chattel mortgages. Upon the filing with the commissioner of documentation proving the bona fide foreclosure and purchase of the lease and the cure of any lease defaults, completed assignment forms, and the required fee, the lease shall be assigned to the purchaser at the foreclosure sale, if such purchaser is otherwise qualified to lease state trust lands.

D. The release of collateral assignments shall be accomplished by the collateral assignee's executing and filing with the commissioner a release upon a form prescribed by the commissioner and accompanied by the release of collateral assignment fee as set forth in the schedule of fees.

(1) The failure of a collateral assignee to execute and file with the commissioner the release of a collateral assignment upon the satisfaction of the debt secured by the assignment shall subject the assignee to the risk of criminal penalties and civil liabilities as provided by law.

(2) The personal representative in the probate of a deceased collateral assignee's estate may release collateral assignments by executing and filing with the commissioner the release and certified copies of such other documents as the commissioner may require.

[3/11/81, 1/20/84, 9/30/85, 12/1/92, 6/29/96; 19.2.8.15 NMAC - Rn, 19 NMAC 3 SLO 8.15, 09/30/02; A, 06/30/16]

19.2.8.16 TRANSFER OF LEASE UPON LESSEE'S DEATH:

A. Certified copies of letters testamentary and the final order in probate or the final order determining heirship, together with the miscellaneous instruments, filing fee and such other documents as the commissioner may require shall be filed with the commissioner in order to transfer a deceased lessee's interest in an agricultural lease. The agricultural lease may be carried on the records of the state land office in the name of the estate until probate or a judicial proceeding determining heirship has been completed.

B. The personal representative of the estate, subject to the normal approval processes of the commissioner, may assign the lease by:

(1) filing with the commissioner certified copies of the death certificate and letters testamentary;

(2) executing the necessary assignment forms;

(3) paying to the commissioner the lease assignment filing fee as set forth in the schedule of fees; and

(4) filing with the commissioner such other documents as the commissioner may require.

C. Except for leases executed by two (2) or more lessees designated as joint tenants with the right of survivorship, in the absence of probate, the lease interest of a deceased lessee shall be transferred on the records of the state land office during the term of the lease only by filing with the commissioner a certified copy of the certificate of death, the affidavits of the legal heirs as to their claims and the absence of conflicting claims, and such other documentation as the commissioner may require together with the miscellaneous instruments filing fee as set forth in the schedule of fees.

D. If a lease is executed by two (2) or more lessees designated as joint tenants with the right of survivorship, the interest of a deceased lessee may be transferred to the surviving lessees on the records of the state land office by filing with the commissioner the certificate of death together with the miscellaneous instruments filing fee.

E. If the heirs of a deceased lessee include minor children, a certified copy of the proceedings of the appointment of a guardian, conservator or guardian ad litem, together with such other documents as the commissioner may require and the miscellaneous instruments filing fee shall be filed with the commissioner to transfer the deceased lessee's interest in the lease.

F. The lease interest of a non-resident deceased lessee may be transferred by complying with Sections 45-4-101 to -401 NMSA 1978 and any successor provisions and by filing with the commissioner such documents as the commissioner may require together with the miscellaneous instruments filing fee.

[3/11/81, 1/20/84, 9/30/85, 12/1/92, 6/29/96; 19.2.8.16 NMAC - Rn, 19 NMAC 3 SLO 8.16, 09/30/02; A, 06/30/16]

19.2.8.17 AGRICULTURAL IMPROVEMENTS:

A. Improvements shall not be placed, made or developed on state trust land without the express written consent of the commissioner unless the cost of the improvement and its placement is within the cost limitations prescribed by Section 19-7-51 NMSA 1978. Improvements shall be placed, made or developed on state trust land only by the lessee of the land on which the improvements are to be located.

B. Applications to place, make or develop improvements on state trust lands held by an agricultural lease shall be made by the lessee upon forms and in the manner prescribed by the commissioner prior to initiation of placement or construction. Each application to place improvements shall:

- (1)** set forth the type and kind of improvements to be placed, made or developed and their estimated cost;
- (2)** specify the legal subdivisions on which the improvements are to be located; and
- (3)** be accompanied by the filing fee specified in the schedule of fees.

C. Inclusion of unauthorized improvements on any appraisal or listing of improvements submitted to the commissioner for any purpose shall not serve as an application to make, place or develop improvements on state trust lands or be construed as approval of those improvements by the commissioner.

D. Upon completion of an authorized improvement, the lessee shall, by sworn affidavit, notify the commissioner of the improvement's actual cost of acquisition, construction or placement.

E. Removal:

(1) All authorized improvements other than fences and growing crops shall be deemed permanent improvements and shall be removed only upon those terms and conditions to which the commissioner has agreed in writing prior to removal.

(2) All unauthorized improvements placed, made or developed on state trust lands by one acting in the capacity of the lessee of the land on which they are located shall be removed unless the lessee applies for, and the commissioner grants, approval of the improvements. The removal of such unauthorized improvements shall be pursuant to terms and conditions established by the commissioner and shall be solely at the expense of the lessee.

(3) Unauthorized improvements placed, made or developed on state trust land by one not acting in the capacity of the lessee of the lands on which the improvements are located shall be subject to removal, sale or other disposition at the commissioner's discretion.

F. Compensation: A purchaser or lessee of state trust lands on which authorized improvements are located shall provide to the commissioner:

(1) a bill of sale or waiver of payment signed by the holder of the right to improvement compensation; or

(2) payment of the value of such improvements as determined by the commissioner's appraisal. Payment of the value of authorized improvements received by the commissioner shall be remitted to the holder of the right to improvement compensation.

(3) Except as provided below, the commissioner shall recognize the compensability at one hundred (1.00) percent of value for authorized improvements.

(4) The commissioner shall recognize the compensability of all or any of the unauthorized improvements placed on state trust lands by one acting in the capacity of the lessee at any percentage of value, including zero (0.00) percent, but in no case more than seventy-five (.75) percent of value.

(5) The compensability of unauthorized improvements placed, made or developed on state trust lands by one not acting in the capacity of the lessee of the lands on which the improvements are located may be recognized at any percentage of value by the commissioner, including zero percent of value.

(6) In any instance when a lessee's improvements have been cost-shared with a government entity or through a grant, the lessee's compensation shall be equal to the percent, if any, of the original cost paid by the lessee, which percent shall be applied to the value described in Subsection F of 19.2.8.17 NMAC above.

[3/11/81, 1/20/84, 9/30/85, 11/4/88, 8/8/89, 12/1/92, 6/29/96; 19.2.8.17 NMAC - Rn, 19 NMAC 3 SLO 8.17, 09/30/02; A, 04/15/10]

19.2.8.18 CANCELLATION:

A. The commissioner may cancel any agricultural lease:

(1) obtained by fraud;

(2) executed through mistake or without authority of law;

(3) that is in default for violation of any of the lease terms, covenants or conditions, which include these rules and applicable statutes, including nonpayment of rentals; or

(4) that is in default for the lessee's failure to protect the leased lands from trespass or waste.

B. The commissioner may enter lease cancellation thirty (30) days after providing the lessee and any collateral assignees with notice of default by certified mail.

(1) Lease cancellation shall not be made if, within such thirty (30) day period, the lessee shall either comply with the commissioner's demands for cure, or appear before the commissioner and show good cause, as determined by the commissioner, why the lease should not be cancelled.

(2) The commissioner may at any time enforce the lien against improvements to satisfy delinquent rentals.

[3/11/81, 9/30/85, 12/1/92, 6/29/96; 19.2.8.18 NMAC - Rn, 19 NMAC 3 SLO 8.18, 09/30/02]

19.2.8.19 CONVERSION:

A. Land held under an agricultural lease may be reclassified from grazing land to cultivated land or from cultivated land to grazing land and the lease amended to permit such use after conversion upon application to the commissioner and receipt of the commissioner's written consent to convert the use of the land.

B. Applications to convert shall be made under oath on forms prescribed by the commissioner and accompanied by:

(1) the conversion application filing fee as set forth in the schedule of fees;
and

(2) a reclamation plan to be implemented in the event the commissioner determines the conversion has been unsuccessful and the converted land should revert to its prior use.

C. The commissioner's approval of the application to convert and the issuance of an amended lease may be conditioned upon the lessee's obtaining sufficient surety for the benefit of the state of New Mexico to guarantee the land's restoration in the event of lease default, cancellation, relinquishment or termination for any reason, or the reversion of the land to its prior use.

D. Upon conversion, the lessee shall pay to the commissioner an amount equal to the difference between the grazing land rental and the cultivated land rental as

determined by the commissioner for the period between the date of conversion and the first following rental payment due date.

E. In the event converted land reverts to its prior use, the lessee, at the lessee's own expense, shall restore the land to a stabilized condition through reclamation and revegetation implemented pursuant to the reclamation plan submitted with the application to convert. No reduction in rentals due to the reversion shall be effective until such plan has been implemented to the commissioner's satisfaction.

[3/11/1981, 4/28/1982, 1/20/1984, 9/30/1985, 12/1/1992, 6/29/1996; 19.2.8.19 NMAC - Rn, 19 NMAC 3 SLO 8.19, 9/30/2002; A, 6/30/2016; A, 6/11/2019]

19.2.8.20 RANGE STEWARDSHIP INCENTIVE PROGRAM:

A. Agricultural lessees who have leased state trust lands for grazing purposes for at least five years may apply for a twenty-five percent reduction in agricultural lease rentals by demonstrating through the range stewardship incentive program that they have been good stewards of their leased state trust land. Only state trust lands leased for grazing purposes and not subject to a sublease shall be eligible for participation in the range stewardship incentive program.

B. State trust lands included in the range stewardship incentive program shall be evaluated and classified by the commissioner according to the range condition and trend.

(1) The commissioner's evaluation and classification shall be based on the commissioner's verification of a sworn range condition and trend analysis and classification recommendation by a disinterested party with training or experience in rangeland evaluation. Said party shall certify that said party personally inspected the lands evaluated, that said party has no interest in or claim against the lands evaluated and that any fee charged for such evaluation is not related to the classification recommendation.

(2) Range condition shall be rated as either excellent, good, fair, or poor depending on the degree of difference between the range site's state of vegetation and the highest natural development of the plant community that could sustain itself under the prevailing climatic and soil conditions for the site.

(3) Range trend shall be rated as either improving, static, or declining depending on the direction of change in range condition over time.

C. Upon request, the commissioner shall provide to interested parties information explaining the range stewardship incentive program, instructions for applying to participate in the program, a description of the procedures necessary to collect the range data required for the commissioner's evaluation and classification of the leased lands, and a list of names and addresses of those who have successfully completed a

course in rangeland evaluation offered regularly by New Mexico state university and the state land office and who have made their names and addresses available to the commissioner for distribution to the public.

(1) Applications to participate in the range stewardship incentive program shall be made in the form prescribed by the commissioner, shall contain such information as the commissioner may require, and shall include a sworn range condition and trend analysis and classification recommendation by a disinterested party with experience or training in rangeland evaluation. The analysis and recommendation shall cover all state trust lands leased to the applicant for grazing purposes. No application fee shall apply.

(2) Only lessees of state grazing land under an existing lease may participate in the range stewardship incentive program. Only state lessees who participate in the program, who have leased state trust lands for grazing purposes for at least the immediately preceding five years, and whose leased lands include acreage classified by the commissioner as excellent-improving, excellent-static, good-improving or good-static shall pay the reduced rental.

D. All state trust land leased to the applicant for grazing purposes shall be included in the range stewardship incentive program upon completion of the commissioner's evaluation and classification of the acreage.

(1) Acreage that is classified by the commissioner as either excellent-improving, excellent-static, good-improving or good-static shall qualify for the rental reduction on a per acre basis.

(2) Acreage that is classified by the commissioner as either fair or poor condition or declining trend shall not qualify for the rental reduction but shall be included in the range stewardship incentive program.

E. In order to continue to participate in the range stewardship incentive program and to enjoy any applicable rental reduction, the participating lessee shall provide to the commissioner, no earlier than November 1st and no later than February 1st in the lease year immediately preceding the final year in the lease term, a sworn range condition and trend analysis and classification recommendation on the leased acreage by a disinterested party with training or experience in rangeland evaluation. The commissioner's verification of such analysis and recommendation shall provide the basis for the commissioner's reevaluation and any reclassification of the leased acreage.

(1) The lessee's failure to timely submit such range condition and trend analysis and classification recommendation shall terminate the lessee's participation in the program. Upon the lessee's reapplication and the commissioner's reevaluation and reclassification of the leased grazing lands, however, participation in the program shall again commence.

(2) Upon the lessee's continued participation in the program and the commissioner's reevaluation and reclassification of acreage from fair or poor condition or declining trend to excellent-improving, excellent-static, good-improving or good-static, the rental reduction shall apply to such reclassified acreage on a per acre basis.

(3) Upon the termination of the lessee's participation in the program any rental reduction shall cease to apply. Upon the commissioner's reevaluation and reclassification of excellent-improving, excellent-static, good-improving or good-static acreage to fair or poor condition or declining trend, the rental reduction shall cease to apply to such reclassified acreage.

(4) Upon the transfer or granting of a lease containing reduced rental acreage to one who is not qualified to pay the reduced rental, participation in the range stewardship incentive program may continue but any rental reduction shall cease to apply.

(5) Program participation shall continue and rental reduction shall continue or commence in those instances in which a participating lessee who is qualified to pay the reduced rental obtains a lease on lands included in the range stewardship incentive program that are classified as excellent-improving, excellent-static, good-improving or good-static, including those instances in which the lease is obtained by the lessee's exercise of the preference right or by the lessee's competitive bid.

[12/1/1992, 6/29/1996; 19.2.8.20 NMAC - Rn, 19 NMAC 3 SLO 8.20, 9/30/2002; A, 6/11/2019]

19.2.8.21 SURFACE DAMAGES:

A. If lessee is involved in litigation with any other persons or entities for damages connected with their leased trust land, lessee must notify the commissioner as soon as practicable. This notice requirement does not apply to any litigation involving only the lessee's personal or real property.

B. The notice must be in writing, describe the litigation, and give the case name and court docket number; and the notice must be mailed by certified mail to the Commissioner of Public Lands, Office of General Counsel, P.O. Box 1148, Santa Fe, New Mexico 87504.

C. The commissioner will decide within thirty (30) days after receiving the notice whether to participate in the litigation. If the commissioner decides to participate, lessee will not oppose the commissioner's participation in the litigation; but lessee can choose to oppose or support the commissioner's claims in the litigation. No response from the commissioner within thirty (30) days shall be deemed a decision not to participate. The commissioner's non-participation shall not be a waiver of any claim regarding damages to the trust lands.

PART 9: BUSINESS LEASING

19.2.9.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501.

[19.2.9.1 NMAC - N, 5/15/2001]

19.2.9.2 SCOPE:

Pursuant to Article XIII, Section 2, of the New Mexico State Constitution, the commissioner has jurisdiction over all lands and related resources that the United States granted and confirmed to New Mexico under the New Mexico Enabling Act. This rule, 19.2.9 NMAC, governs the granting of business leases for commercial and business leasehold uses, as well as surface uses that are not otherwise provided for under other state land office rules, on those lands within the commissioner's constitutional jurisdiction.

[19.2.9.2 NMAC - N, 5/15/2001]

19.2.9.3 STATUTORY AUTHORITY:

N.M. Const. Art. XIII; Section 19-1-1 *et seq.* NMSA 1978; Section 19-7-1 *et seq.* NMSA 1978.

[19.2.9.3 NMAC - N, 5/15/2001]

19.2.9.4 DURATION:

Permanent.

[19.2.9.4 NMAC - N, 5/15/2001]

19.2.9.5 EFFECTIVE DATE:

May 15, 2001, unless a later date is cited at the end of a section.

[19.2.9.5 NMAC - N, 5/15/2001; A, 6/30/2016]

19.2.9.6 OBJECTIVE:

The objectives of 19.2.9 NMAC are to obtain revenues from business leasing; to assure protection and maintenance of trust lands; to provide standard lease terms and conditions; and to provide an efficient process for business leasing.

[19.2.9.6 NMAC - N, 5/15/2001]

19.2.9.7 DEFINITIONS:

As used in 19.2.9 NMAC, the following terms have the meaning set forth in this section. A business lease may add detail to a definition to accommodate lease specific issues.

A. "Approval" means written approval and includes only that which has been expressly approved and nothing further which might be implied.

B. "Assignment" means any direct or indirect transfer of a lessee's interest in a business lease or improvements, including, but not limited to, any conditional transfer or transfer by operation of law.

C. "Authorized improvements" means improvements which have the approval of the commissioner prior to being placed, developed, created, or constructed on, or obtained or developed for the benefit of, or made appurtenant to trust lands, or which have subsequently received that approval.

D. "Bid lease" means a business lease entered into by the commissioner after the public advertisement and public auction required by the Enabling Act.

E. "Business lease" means a written lease of trust lands issued under this rule, 19.2.9 NMAC, for business, commercial, residential, industrial, or real estate planning and development purposes, or for surface uses that are not otherwise provided for under other state land office rules. The commissioner, in the commissioner's discretion, shall resolve any uncertainty about whether a lease is a business lease.

F. "Collateral assignment" means the conditional assignment to a creditor as security for a debt of a lessee's personal property interest in a business lease or improvements.

G. "Commissioner" means the commissioner of public lands. The commissioner is the executive officer of the state land office and may delegate to state land office staff the performance of duties required of the commissioner under this rule.

H. "Improvements" means any of the following:

(1) any item of tangible property developed, placed, created or constructed on trust lands including, but not limited to, buildings, roadways, equipment and fixtures;

(2) water rights appurtenant to trust lands, including without limitation any water rights developed or used on trust land for the benefit of the trust land; and,

(3) any tangible or intangible property, rights, approvals or privileges obtained or developed for the benefit of, or made appurtenant to, trust lands that are designated as improvements in a business lease.

I. "**Improvement value credit**" means a credit granted by the commissioner for permanent improvements which entitles the holder of the credit to certain rights upon the subsequent lease or sale of trust lands as provided in this rule and in a business lease.

J. "**Lessee**" means the party of record at the state land office, who leases trust land from the commissioner under a business lease.

K. "**Mortgage**" means the mortgage to a creditor as security for a debt of a lessee's personal property interest in a business lease or improvements.

L. "**Non-bid lease**" means a business lease entered into by the commissioner without public advertisement and public auction for a term not to exceed five years, or for a term not to exceed twenty-five years pursuant to Section 19-7-54 or 19-7-55 NMSA 1978.

M. "**Permanent improvements**" means those authorized improvements that a business lease specifies shall not be removed upon the termination of the lease. "Permanent improvements" shall include water rights appurtenant to trust land and equipment and fixtures necessary for the development of the water.

N. "**Removable improvements**" means authorized improvements that are not permanent improvements.

O. "**Rent**" means the total of estimated rent payments, including all periodic rents with applicable rent adjustments, percentage rents, initial or periodic fees, or any other incentive payment due during the lease term, and any other payments identified as rent in a business lease.

P. "**Rent adjustment**" means a periodic increase of any rent amount.

Q. "**Schedule of fees**" means a list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

R. "**State land office**" means the New Mexico state land office.

S. "Sublease" means a transaction or arrangement whereby a business lessee transfers to another either the use or possession of all or part of leased trust land, or the management and control of all or part of the improvements located on leased trust land.

T. "Termination" means the end of a business lease whether by cancellation, relinquishment or the expiration of the lease term.

U. "Trust" means the land trust established by the Enabling Act (Act of June 20, 1910, 36 Statutes at Large 557, Chapter 310), and that trust's assets, which are administered through the state land office by the commissioner.

V. "Trust land" means all land owned by the trust.

W. "Unauthorized improvements" means improvements that have not received the commissioner's approval.

[19.2.9.7 NMAC - N, 5/15/2001; A, 6/30/2016; A, 6/11/2019]

19.2.9.8 LEASING STANDARDS:

A. The surface estate of any trust land may be leased under a business lease at the discretion of the commissioner. A business lease may include more than one use, and may encompass more than one parcel of trust land. For lands already under any surface lease, the applicant shall comply with the procedures in 19.2.9.21 NMAC.

B. After receipt of an application as provided in 19.2.9.9 NMAC, the commissioner may request additional information from the applicant, as provided in 19.2.9.10 NMAC, and may enter into negotiations for a non-bid lease.

C. After receipt of an application as provided in 19.2.9.9 NMAC, or on the commissioner's own initiative, the commissioner may offer to lease trust land under a bid lease as provided in 19.2.9.11 NMAC.

D. Any applicant may withdraw an application for a business lease at any time.

E. Notwithstanding any other provision of 19.2.9 NMAC, and at any time before the execution of a business lease, the commissioner may, at the commissioner's discretion, reject any application or bid submitted under 19.2.9 NMAC and may withhold from business leasing any trust land subject to the commissioner's jurisdiction.

[19.2.9.8 NMAC - N, 5/15/2001; A, 6/11/2019]

19.2.9.9 APPLICATION TO LEASE:

Any person may propose that the commissioner enter into a business lease by submitting an application on forms prescribed by the commissioner.

A. The application shall, at minimum, be made under oath and shall identify the applicant, the trust land proposed for leasing and the proposed uses of the trust land, including any proposed improvements.

B. The application shall include a written appraisal of the trust land proposed for lease made under oath by a disinterested and credible person. All statements contained in such appraisements, except as to the true value of the land appraised, must be based upon personal knowledge and not upon information and belief. No such appraisal shall be conclusive upon the commissioner.

C. The application shall include a nonrefundable application fee in the amount established in the schedule of fees.

[19.2.9.9 NMAC - N, 5/15/2001]

19.2.9.10 SUPPLEMENTAL INFORMATION:

After review of an application and before entering into a business lease, the commissioner may require additional information and documentation from an applicant, including, but not limited to, an appraisal of the trust land proposed for lease, a survey of the land, a detailed development plan of the land, environmental analyses of the land, and cultural or biological resource investigations of the land.

[19.2.9.10 NMAC - N, 5/15/2001]

19.2.9.11 BID LEASE:

The commissioner may, under the following procedures, offer a bid lease to the highest and best bidder at a public auction held at the county seat of the county where the offered trust land, or the major portion of the offered land, is located.

A. Appraisal. After a preliminary determination that a bid lease might be advantageous to the trust, the commissioner will cause an appraisal to be made. The appraisal will cover the trust land proposed for lease and any permanent improvements on, appurtenant to, or obtained or developed for the benefit of, the land. Thereafter, if the commissioner determines to offer the land for bid lease, a copy of the appraisal will be furnished to the applicant, if any, and to the holder of the improvement value credit as well as to any other interested parties. Prior to the advertisement of the lease sale, the commissioner shall determine that the terms of the bid lease being offered provide a return to the trust over the duration of the bid lease that is a fair rental value based on the appraisal.

B. Advertisement. A notice of the lease sale shall be published once each week for ten (10) consecutive weeks in a newspaper of general circulation published in Santa Fe, and in a newspaper of general circulation published nearest the offered land.

C. Notice. The notice of lease sale shall contain:

- (1) The date, time and place of the auction;
- (2) A description of the trust land offered for lease, and any limitations on the uses of the land including any local land use restrictions, covenants, master plans or any restrictions established by the commissioner;
- (3) A summary of the basic provisions of the bid lease, including the term (and any extension periods), the rent (if fixed and not based on the highest bid) and the allowable uses of the trust land offered for lease;
- (4) Any requirements or qualifications for bidders;
- (5) The amounts that a bidder must deposit to pay the costs of the lease sale, the first rental payment and any improvement value credits;
- (6) A brief description of how the commissioner will determine the highest and best bidder; and
- (7) The name of a person to contact at the state land office for additional information on the auction and the trust land offered for lease.

D. Deposit. To qualify as a bidder, the prospective bidder shall deposit with the commissioner before the auction or at such other time provided in the notice of lease sale, the following amounts which shall be listed in the notice:

- (1) The costs of the lease sale. The successful bidder shall pay the reasonable costs and expenses related to the lease sale, whether incurred by the state land office or by another entity at the request of the state land office. Such costs and expenses may include, but are not limited to, the costs of appraisals, surveys, advertising, land use planning and brokerage or other real estate fees;
- (2) The first rental payment under the bid lease; and
- (3) If the offered trust land includes permanent improvements, either a sum equal to the improvement value credit attributable to the permanent improvements or a bill of sale or a waiver of payment signed by the holder of the improvement value credit or a bond sufficient to cover the value of the improvements if an appeal of the appraised value is to be taken, unless the prospective bidder is the holder of the improvement value credit. The improvement value credit shall be calculated and paid as provided in 19.2.9.18 NMAC. Upon completion of the lease sale, the commissioner shall return any deposits from unsuccessful bidders.

E. Qualification of bidders. The commissioner may establish additional qualifications for bidders based on the nature of the bid lease and the proposed uses of the offered trust land.

F. Due diligence. All bidders must undertake their own due diligence in preparation for the lease sale, including, but not limited to, inspecting the offered trust land and reviewing pertinent records and files of the state land office and other public agencies. A prospective bidder must obtain the approval of the commissioner before entering on trust land. The notice of lease sale may provide that additional information concerning the offered trust land is available at the state land office for viewing by any interested parties. The additional information may include, without limitation, a draft bid lease or a summary of bid lease provisions.

G. Auction. The auction may be conducted by oral auction or by the acceptance of sealed bids or proposals at the time of the auction. If awarded at all, the bid lease shall be awarded to the highest and best bidder.

H. Highest and best bidder. In determining the highest and best bidder, the commissioner shall establish criteria that will be described in the notice of lease sale. The criteria shall enable the commissioner to select the bid that is in the best interests of the trust considering the requirements of the bid lease and the proposed uses of the offered trust land. In addition to any offered bonus or rental amounts, the commissioner may, as appropriate, consider the qualifications of the bidders to develop the land or to construct the improvements contemplated by the proposed bid lease, and to provide the trust with sustainable long-term returns. The commissioner may divide the bid process into stages, and review the qualifications of bidders prior to, or in addition to, reviewing any financial proposals.

I. Execution of bid lease. The successful bidder must deposit with the commissioner all amounts due for the lease sale, including any bonus bid, no later than five business days after the auction, and shall, within thirty days after the auction, enter into the bid lease. The commissioner may extend the period for entering into a bid lease to no greater than one hundred twenty days after the auction. The final bid lease shall not contain any provisions that vary from those described in the notice of lease sale. If the successful bidder does not deposit with the commissioner any amounts due, or enter into the bid lease offered by the commissioner, within the prescribed time periods, the commissioner may reject the bid and either declare another bidder to be the highest and best, or terminate the lease sale.

[19.2.9.11 NMAC - N, 5/15/2001]

19.2.9.12 BUSINESS LEASE:

A. Prerequisites. Before taking possession of the leased trust land, the lessee must provide the commissioner with a legal description and a survey plat showing the exact location of the land.

(1) A legal description must be given in aliquot parts of at least forty (40) acres, or in some other form as may be required by the commissioner such as survey metes and bounds. The description shall include a reference to all encumbrances, easements, or other servitudes burdening or benefiting the trust land.

(2) The commissioner may provide specific instructions on the requirements for a survey plat.

B. Leases. All business leases shall be in a form and contain such provisions as may be prescribed by the commissioner from time to time, which provisions shall be deemed to include all pertinent statutes and state land office rules in effect at the time of lease issuance.

C. Conditions. The commissioner shall establish conditions in a business lease necessary for providing a secure return to the trust, managing the trust land in a commercially reasonable manner and protecting the trust land and any natural and cultural resources on the trust land from waste. Each lessee under a business lease shall have an affirmative duty to diligently prevent and protect against trespass and waste on trust land.

D. Uses. A business lease shall designate the allowable uses of the leased trust land. A business lease may be issued for any use of the surface estate not otherwise provided for under other state land office rules.

(1) The commissioner may establish restrictions on the uses of the trust land, including restrictions contained in local land use rules, covenants or land use plans.

(2) A business lease may be issued to authorize the planning of trust land or the development of trust land pursuant to an approved plan. The lease may require that the lessee obtain local government approvals of the land use plan prior to development. The lease may provide for development to occur in phases, which phases may require further leases or sales of trust land.

E. Rent. Unless otherwise provided in a lease, rent shall be paid in advance in annual installments.

(1) If a business lease has a term of more than five years, the lease shall provide for a rent adjustment of any fixed periodic rent to occur no less often than every five years.

(2) As provided in Section 19-7-34 NMSA 1978, the commissioner shall have a first lien on any improvements on the leased trust land, prior and superior to any other lien or encumbrance, whether created with or without notice of the lien, for rental due or to become due. When any rental is due and unpaid the commissioner may attach all improvements or a portion of the improvements sufficient to pay the unpaid rental together with all costs incurred in the enforcement of the lien.

(3) The commissioner may, upon request and upon provision of adequate security as determined by the commissioner, agree to withhold enforcement of the rental lien. Adequate security may include prepayment of lease rent or some other acceptable form of financial assurance.

F. Mineral reservation. Each business lease shall reserve the mineral estate of the trust land to the commissioner and shall reserve the right to lease the mineral estate, or any portion of the mineral estate, for exploration, development, conservation and production of the mineral resources, including oil and natural gas. The reservation shall include all rights of access over, through or across trust lands necessary for a mineral lease. The commissioner may, in a business lease, agree, upon payment of an additional annual rent, not to exercise the right to lease the trust's mineral rights during the term of the lease. The additional rent shall be sufficient to compensate the trust based on the commissioner's evaluation of the potential mineral value associated with the leased trust land.

G. Easements and right of way. Each business lease shall reserve to the commissioner the right to grant easements and right of way across trust land for any legal purpose. A business lease may provide that any easements or right of way granted across leased trust land shall be located to avoid unreasonable interference with the uses allowed under the lease. A business lease may require that the lessee acquire from the commissioner easements or right of way necessary for the development of the trust lands and may also require or allow the lessee to assign or dedicate its interest in easements or right of way to a public entity.

[19.2.9.12 NMAC - N, 5/15/2001]

19.2.9.13 LEASE EXTENSION AND NEW LEASE:

A. Bid lease. The term of a bid lease may not be extended except as provided in the notice of lease sale and the original bid lease.

B. Non-bid lease. The term of a non-bid lease may not be extended. If, prior to the expiration of a non-bid lease, the lessee wants a new non-bid lease, for the same trust land and the same use, that will commence at the expiration of the current lease, and if the lessee has complied with all the terms of its lease, the lessee shall submit a sworn application, on such forms as the commissioner may require or provide, for a new lease. The commissioner may establish, in a business lease, additional requirements for applying for a new lease.

C. Discretion. Nothing in this rule shall limit the discretion of the commissioner, at the expiration of a business lease, to determine whether it is in the best interests of the trust to reject all applications to lease, or to offer a new non-bid lease on such terms as the commissioner determines or to sell or lease the trust land through a bid process.

[19.2.9.13 NMAC - N, 5/15/2001]

19.2.9.14 SUBLEASE AND ASSIGNMENT:

A. Any assignment or sublease for use of trust lands is void without the approval of the commissioner. The commissioner's approval may be conditioned upon such terms or requirements as are deemed to be in the best interests of the trust. The commissioner may, in a lease, pre-approve certain assignments or subleases that the commissioner deems to be in the best interests of the trust.

(1) No assignment or sublease of trust lands under a business lease shall be approved unless the lessee is in compliance with the terms of the lease.

(2) The commissioner's approval of a sublease or assignment shall not relieve the lessee from any liability that may have arisen before the sublease or assignment. The commissioner's approval of a sublease shall not release the lessee from its continuing and primary liability for performance of all terms and obligations under the lease.

(3) The commissioner's approval of a sublease or assignment will not constitute approval of any subsequent sublease or assignment.

B. Applications to sublease or assign shall be made by the current lessee under oath, on forms prescribed by the commissioner, and shall be accompanied by the fees shown on the schedule of fees.

C. No assignment or sublease shall extend the term of a business lease and the lessee shall inform its sublessee or assignee of the terms and conditions of the lessee's business lease.

D. The termination of a business lease shall automatically, and without notice, terminate any sublease, unless otherwise agreed to in writing by the commissioner.

E. A lessee or sublessee may not transfer, change the purpose or use, or move the point of diversion of any water rights that are appurtenant to trust land without the prior approval of the commissioner.

[19.2.9.14 NMAC - N, 5/15/2001; A, 6/11/2019]

19.2.9.15 COLLATERAL ASSIGNMENTS AND MORTGAGES:

A. Unless otherwise provided in a business lease, and subject to the prior approval of the commissioner, a lessee's interest in a business lease or improvements may be collaterally assigned or mortgaged by the lessee. An approved collateral assignee or mortgagee shall have a lien on the lessee's interest in the lease, as well as any improvements covered by the collateral assignment or mortgage, but shall not have a lien on the commissioner's interest in the lease and any improvements, or in the commissioner's reversionary interest in the real and personal property subject to the

lease. Any attempt to collaterally assign or mortgage a lessee's interest in a business lease, or in any improvements, without the approval of the commissioner, shall be void and shall not vest the purported collateral assignee or mortgagee with any right, title, interest, claim or privilege with respect to such lease or improvements.

(1) A lessee shall apply to the commissioner to collaterally assign or mortgage the lessee's interest in a business lease or any improvements in writing, under oath, and on such form as may be prescribed by the commissioner. The lessee shall include a copy of the proposed collateral assignment agreement or mortgage and pay any applicable fees set out in the schedule of fees.

(2) The commissioner may approve the collateral assignment or mortgage subject to such terms and conditions which the commissioner deems to be in the best interests of the trust.

B. If the commissioner gives written notice to a business lessee of a breach of the lease by the lessee, the commissioner shall also give written notice of the breach to an approved collateral assignee or mortgagee of the business lessee. Such notice shall be sent by certified mail to the most current name and address of the collateral assignee or mortgagee provided to the commissioner and no proof of receipt of such notice by the collateral assignee or mortgagee shall be required.

C. An approved collateral assignee or mortgagee shall have the right to cure a lessee's breach within the time periods provided to the lessee under the lease. A business lease may provide that a collateral assignee or mortgagee may succeed to the rights and duties of the lessee of the business lease under such conditions as are provided in the lease. The commissioner's approval of a collateral assignment or mortgage of improvements does not change the status of any improvements as authorized, unauthorized, removable or permanent improvements.

D. A collateral assignee or mortgagee shall take its interest subject to the following terms and conditions, and the lessee is required to give notice of such terms and conditions to its collateral assignee or mortgagee upon making a collateral assignment or mortgage.

(1) The commissioner is entitled to notice of all proceedings, judicial or non-judicial, to enforce or foreclose the collateral assignment or mortgage.

(2) Any successor in interest to a lessee's interest in a business lease, or in any improvements, that acquires an interest in such property as the result of the enforcement or foreclosure of a collateral assignment or mortgage, or an assignment or conveyance in lieu of such enforcement or foreclosure, shall be deemed to be an assignee under section 19.2.9.14 NMAC, and will be subject to the approval of the commissioner. Such approval will not be unreasonably withheld; but no successor in interest will be approved by the commissioner unless all sums due under the terms of the lease have been paid in full, and all other pending duties discharged, or unless

arrangements satisfactory to the commissioner are made to fully pay such sums or discharge such duties.

[19.2.9.15 NMAC - N, 5/15/2001; A, 6/11/2019]

19.2.9.16 APPROVAL OF IMPROVEMENTS:

No improvements shall be placed, developed, created or constructed on trust land, or obtained or developed for the benefit of trust land, or made appurtenant to trust land without the prior approval of the commissioner. Such approval may be conditioned upon certain requirements imposed by the commissioner which may include, without limitation, the provision of a bond or other adequate security to assure proper removal of improvements from trust land and the restoration of trust land.

A. A request for the commissioner's approval shall be made in writing on such forms and in such manner as may be required by the commissioner, and shall be accompanied by the fee set forth in the schedule of fees. The commissioner shall not be obligated to approve any improvements.

B. A business lease may identify existing and proposed improvements that are approved by the commissioner when the commissioner determines it is in the best interests of the trust.

C. If the commissioner does not grant prior approval for improvements, the commissioner may, in the best interests of the trust, approve improvements after the improvements have been placed, developed, created or constructed on, obtained or developed for the benefit of, or made appurtenant to trust land.

[19.2.9.16 NMAC - N, 5/15/2001; A, 6/11/2019]

19.2.9.17 REMOVAL OF IMPROVEMENTS:

A. Upon the termination of a business lease, all removable or unauthorized improvements shall be removed from the trust land unless otherwise provided in the lease or in writing by the commissioner.

(1) No improvement may be removed without the commissioner's approval if a lessee owes rent or any other sums to the commissioner or if any material duties required under the lease remain unperformed.

(2) The commissioner may require, in writing, that designated unauthorized improvements be left in place. Such improvements shall become the property of the commissioner and no person shall be entitled to any improvement value credit for such improvements.

(3) Any improvements left on trust lands without the commissioner's approval shall remain the property and liability of the lessee and shall constitute a nuisance until removed or abandoned. The commissioner may elect to either take any necessary action to abate such nuisance, with all costs and fees incurred in so doing to be additional rent due from the lessee under the lease, or to declare that the improvements are abandoned and have become the property of the commissioner.

B. In all cases where improvements are removed from trust land, the lessee shall be solely liable for the restoration of the trust land to its condition prior to the placement of such improvements. The lessee's obligation to remove improvements and to restore the trust land shall survive the termination of the lease.

C. All costs, fines and fees incurred by the commissioner as a result of improvements left on trust lands without the commissioner's approval, and all costs, fines and fees incurred as a result of damage or waste to trust lands and their improvements during the term of the lease, or arising from or in connection with the lessee's use and occupancy of the trust lands, shall remain the sole liability of the lessee and shall be deemed additional rent due at the time incurred.

[19.2.9.17 NMAC - N, 5/15/2001]

19.2.9.18 IMPROVEMENT VALUE CREDIT:

A. Personal property. Unless otherwise provided in a business lease or in this rule, improvements shall be the property of the lessee. The interest of a lessee in a business lease and in the improvements is a personal property interest. Unless otherwise provided in a business lease, improvement value credit is only granted for permanent improvements and is not granted for removable or unauthorized improvements. Water rights that are appurtenant to trust land shall be developed and held in the name of the commissioner.

B. When payable. When trust lands are sold or leased to a person other than the holder of any improvement value credit, the successor in interest shall pay to the commissioner the amount of the improvement value credit, if any. The commissioner shall pay to the holder of the improvement value credit the amount paid by the successor in interest, less any rent, costs or damages owed to the commissioner.

(1) In lieu of such payment, a successor in interest may file with the commissioner a bill of sale or waiver of payment signed by the holder of the improvement value credit or, if an appeal of the appraised value is taken, a bond sufficient to cover the value of the improvements as determined by the commissioner.

(2) Except for the transfer of funds for improvement value credit paid by a successor in interest as provided in this subsection, the commissioner shall not be liable for the payment of any improvement value credits. The commissioner may require a release or indemnity from the party receiving payment of the improvement value credit.

(3) The holder of the improvement value credit must be identified in the records of the state land office. Unless otherwise provided in a lease or in an assignment, collateral assignment or mortgage of improvements approved by the commissioner and filed with the state land office, the commissioner shall treat the former lessee as the holder of the improvement value credit and the party entitled to payment of any improvement value credit.

C. Calculation of improvement value credit. Unless otherwise provided in a lease, the holder of the credit is entitled to all of the improvement value credit attributable to the permanent improvement.

(1) A business lease may provide that the commissioner shall receive a specified portion of the improvement value credit attributable to a permanent improvement.

(2) Unless otherwise provided in a lease or in a statute, the improvement value credit will be the amount, if any, which the permanent improvement adds to the value of the trust land. The added value shall be determined, at the expense of the lessee or the holder of the credit, by an appraisal conducted by a certified real estate appraiser. The appraisal shall be submitted to the commissioner for review and approval. The commissioner may obtain further appraisals to ascertain the improvement value. The commissioner may require a successor in interest to reimburse the costs of appraising the improvements.

(3) The commissioner shall determine the value of the improvements and the commissioner's determination shall be final unless the holder of the improvement value credit initiates a contest as provided under Section 19-7-64 NMSA 1978.

(4) A business lease may provide that an improvement value credit may be lost or depreciated if, after termination of the business lease, there is no successor in interest other than the commissioner.

[19.2.9.18 NMAC - N, 5/15/2001; A, 6/11/2019]

19.2.9.19 RELINQUISHMENT:

A. A lessee may, with the approval of the commissioner, relinquish to the commissioner the lessee's interest in a business lease. The commissioner may, in a business lease, establish conditions pursuant to which the lessee may, at prescribed times, relinquish all or portions of the lease.

B. A lessee may request relinquishment of the lease on forms prescribed by the commissioner and upon payment of a relinquishment fee, provided that:

(1) the lessee is in compliance with the terms of the lease; and,

(2) all improvements made pursuant to the lease on, for, or appurtenant to the lands leased have been approved by the commissioner and arrangements satisfactory to the commissioner have been made for either the removal or the retention of the improvements.

C. A lessee shall not, by relinquishment, avoid or be released from any liability for known or unknown waste or damage to trust lands, including but not limited to environmental damage, arising from or connected with lessee's use or occupancy of trust lands.

D. A relinquishment shall not be valid or effective until approved by the commissioner. Any attempted relinquishment of the lease, without the commissioner's approval, shall be a breach of the lease.

E. Upon relinquishment, a lessee shall not be entitled to the refund of any rent previously paid; however, a lessee seeking relinquishment in response to a request by the commissioner shall not be charged a fee, and shall be entitled to a pro-rata refund of prepaid rent to be paid only by the successor lessee, purchaser or other successor in interest, if any.

[19.2.9.19 NMAC - N, 5/15/2001]

19.2.9.20 DEFAULT; REMEDIES:

Unless otherwise provided in a business lease, a lessee shall be in default under a business lease if a breach of the lease is not cured within thirty days after the commissioner gives written notice of the breach to the lessee. A breach of the lease may include, without limitation, a failure to pay any rent or other monetary obligation due under the lease, or a violation of any term, condition, or covenant of the lease, or the failure to perform or observe any other obligation of the lessee under the lease.

A. **Notice.** Written notice of a breach shall be sent to the lessee, and to the holder of any collateral assignment or mortgage, at their addresses of record at the state land office, by certified mail. The commissioner need only provide proof of mailing to establish satisfactory compliance with this notice requirement.

B. **Remedies.** On the default of a lessee, the commissioner shall have all the remedies available to the commissioner at law or in equity in New Mexico, and as provided in the business lease, including, without limitation, terminating the lease, retaking possession of the leased trust land with or without termination of the lease, and proceeding to recover any damages, including damages for any unpaid or unperformed obligations of the lessee.

[19.2.9.20 NMAC - N, 5/15/2001]

19.2.9.21 EXISTING LEASES:

Except as provided in this section, the commissioner may not lease under a business lease any trust land currently leased under an existing surface lease unless the existing lessee relinquishes the existing lessee's interest in the trust land or the commissioner exercises any right of withdrawal of land which the commissioner may have. Notwithstanding the foregoing, the commissioner may determine that a proposed business lease will not unreasonably interfere with the authorized uses under an existing lease, and may allow a new business lease in compliance with the following requirements.

A. The new business lease shall identify the existing lease, shall state that the new business lessee's rights and privileges are subject to the existing lessee's rights and privileges under the existing lease, unless waived or amended, and shall provide that the new business lessee will not interfere with the uses permitted under the existing lease.

B. The existing lessee must consent in writing to the new business lease.

[19.2.9.21 NMAC - N, 5/15/2001; A, 6/11/2019]

PART 10: EASEMENTS AND RIGHTS-OF WAY

19.2.10.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office.

[19.2.10.1 NMAC - Rp, 19.2.10.1 NMAC, 6/30/2004]

19.2.10.2 SCOPE:

This part covers all easements and rights of way granted over, upon, through, or across, trust lands for pipelines, public highways, railroads, tramways, telegraph, fiber optic, telephone and power lines, irrigation works, mining, logging, and for other purposes, except easements or rights of way granted in a lease, or salt water disposal easements covered by 19.2.11 NMAC, or water easements covered by 19.2.12 NMAC.

[19.2.10.2 NMAC - Rp, 19.2.10.2 NMAC, 6/30/2004]

19.2.10.3 STATUTORY AUTHORITY:

N.M. Const., Art. XIII; NMSA 1978 Sections 19-1-1 and 19-7-57. The authority to promulgate this part is found in Section 19-1-2 NMSA 1978.

[19.2.10.3 NMAC - Rp, 19.2.10.3 NMAC, 6/30/2004]

19.2.10.4 DURATION:

Permanent, unless otherwise provided in a specific section of this part.

[19.2.10.4 NMAC - Rp, 19.2.10.4 NMAC, 6/30/2004]

19.2.10.5 EFFECTIVE DATE:

June 30, 2004, unless a later date is cited at the end of a section.

[19.2.10.5 NMAC - Rp, 19.2.10.5 NMAC, 6/30/2004]

19.2.10.6 OBJECTIVE:

The objective of this part is to provide for the orderly and lawful administration and the appropriate granting of easements and rights of way on trust lands.

[19.2.10.6 NMAC - Rp, 19.2.10.6 NMAC, 6/30/2004]

19.2.10.7 DEFINITIONS:

A. "Appraisal" means an appraisal as defined in Section 61-30-3A NMSA 1978.

B. "Commissioner" means the New Mexico commissioner of public lands, and the commissioner's appointees under Section 19-1-7 NMSA 1978, acting within the scope of their authority. The commissioner may delegate to state land office staff the performance of functions required of the commissioner under this part.

C. "Easement" means a right or privilege granted by the commissioner, to use a defined area of trust lands for a prescribed purpose and time, which right can be terminated as provided in this part.

D. "Right of way" means a right or privilege granted by the commissioner, to pass over, upon, through, or across, a defined area of trust lands for a prescribed purpose and time, which right can be terminated as provided in this part.

E. "Fair market value" means the value that a willing buyer would pay a willing seller for a right of way or easement in the open market as set forth in a price schedule adopted by the commissioner or as otherwise determined, in the commissioner's discretion, by an appraisal or field inspection.

F. "Field inspection" means an on-site inspection of a right of way or easement, made by authorized state land office personnel, which, if required under the price schedule or otherwise appropriate, may include specialized services such as market analysis or a determination of fair market value.

G. "Price schedule" means a schedule, adopted by the commissioner pursuant to this Part 10, showing the consideration due for the acquisition of an easement or right of

way, which schedule shall be reviewed periodically by the commissioner and revised by the commissioner, when the commissioner deems it necessary, to reflect changes in the fair market value of easements and rights of way. A price schedule may incorporate varying considerations to account for the different uses, sizes, and locations, of easements and rights of way. The adoption of a price schedule and any revision thereof shall be preceded by reasonable public notice and the opportunity for public comment. Public notice shall consist of publication on the state land office website, and such other means as the commissioner may determine are appropriate, including but not limited to direct notification by mailing or electronic means to known interested parties. The time permitted for public comment shall be determined by the commissioner in the commissioner's discretion.

H. "Purchase contract lands" means trust lands being purchased under a contract.

I. "Schedule of fees" means a list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

J. "State land office" means the New Mexico state land office.

K. "Trust" means the trust created by the New Mexico Enabling Act and administered by the commissioner.

L. "Trust lands" means those lands, their natural products and all rights, privileges, or assets, which are derived from them, and which are under the care, custody, and control of the commissioner.

[19.2.10.7 NMAC - Rp, 19.2.10.7 NMAC, 6/30/2004; A, 6/30/2016; A, 6/11/2019]

19.2.10.8 NO RIGHTS TO BE OBTAINED BY PRESCRIPTION:

Easements or rights of way on trust lands may be acquired only by application and grant made in compliance with this part and applicable laws. No easement, right of way, or other interest in trust lands may be acquired by prescription, or pursuant to any other legal doctrine, except as provided by statute.

[19.2.10.8 NMAC - Rp, 19.2.10.8 NMAC, 6/30/2004]

19.2.10.9 TRESPASS:

A. Any use of trust lands for right of way or easement purposes prior to the grant of a right of way or easement as provided by this Part 10 shall constitute an unauthorized use of such lands and will be deemed a trespass. The use of trust lands for easement

or right of way purposes, if based upon any approval by any means other than as provided for in this Part 10, will likewise be deemed a trespass. However, in extenuating circumstances and for good cause shown, the commissioner may, in the commissioner's discretion and upon written request, waive the trespass penalties set out below when the trespass consists of an inadvertent failure to obtain or renew an easement or right of way and that failure is promptly corrected when discovered.

B. Upon notification or determination that an unauthorized use exists, the commissioner shall initiate criminal or civil trespass sanctions, or both, against the unauthorized user; provided, however, that prior to the initiation of such action, the commissioner may attempt to remedy the trespass non-judicially by such means as the commissioner deems best including, but not limited to: 1) offering the unauthorized user the opportunity to terminate the unauthorized use, restore the lands to their condition prior to the unauthorized use, and pay the pro-rated fair market value of the unauthorized use through the date of termination; or, 2) offering to ratify the unauthorized use upon receipt of the required consideration plus the applicable trespass penalty set forth in Subsection D of 19.2.10.9 NMAC below. The commissioner shall not initiate or otherwise pursue criminal or civil trespass sanctions against an unauthorized user if that unauthorized user accepts and complies with any non-judicial remedy offered by the commissioner to remedy the unauthorized use.

C. All time limitations imposed upon an unauthorized user by the commissioner when offering non-judicial remedies shall be reasonable, but in no case shall any such limit be less than 10 days nor more than 60 days.

D. Trespass penalties: All trespass penalties are due in addition to the consideration due under 19.2.10.15 NMAC below.

(1) An unauthorized user must pay the following trespass penalty:

(a) for the first occurrence of unauthorized use, one hundred percent of the applicable fair market value;

(b) for the second occurrence, five hundred percent of the applicable fair market value;

(c) for the third occurrence, one thousand percent of the applicable fair market value;

(d) for the fourth and subsequent occurrences, one thousand percent of the applicable fair market value and the grant of easement or right of way is limited to a maximum five-year term at the applicable fair market value for a 35-year term;

(2) Any occurrence of trespass preceded by five years of non-occurrence by the party in trespass will be treated as a first occurrence.

(3) In the commissioner's sole discretion, applicable trespass penalties will be reduced by no more than fifty percent if the trespass is self-reported before the commissioner learns of it from any other source.

(4) The trespass penalties described above apply only to unauthorized uses that commence on or after February 28, 2002. The trespass penalty for an unauthorized use that commenced prior to that date is one hundred percent of the fair market value.

[19.2.10.9 NMAC - Rp, 19.2.10.9 NMAC, 6/30/2004; A, 6/11/2019]

19.2.10.10 LANDS SUBJECT TO APPLICATION:

An applicant must review state land office records to determine which rights, if any, have been conveyed to or contracted for by third parties, which would limit or prohibit the commissioner's issuance of additional interests. As to lands under purchase contract, see 19.2.10.29 NMAC.

[19.2.10.10 NMAC - Rp, 19.2.10.10 NMAC, 6/30/2004]

19.2.10.11 SURVEY PERMISSION:

Anyone desiring to apply for an easement or right of way covering trust lands shall, prior to entry for surveying activities, file with the commissioner a written notice of intent to conduct a survey of the proposed location of such easement or right of way.

A. Such written notice, which may be in letter form, shall adequately describe the proposed project, including the purpose and general location (giving section, township and range coordinates).

B. The written notice shall contain the following agreement: "The undersigned applicant indemnifies and holds harmless the commissioner, the commissioner's agents and employees, and any authorized lessees of the state of New Mexico, against any and all liability for loss of life, personal injury and property damage due to survey or related activities of the applicant, or by employees, contractors or subcontractors of the applicant." In lieu of such agreement, the applicant may submit a surety bond in an amount acceptable to the commissioner.

C. Upon receipt of the notice, the commissioner shall first determine whether the requested survey is, in fact, trust lands, and if the notice and agreement are acceptable. If accepted, the applicant and any surface lessees will be notified, and the applicant will be informed of any conditions being imposed on the proposed entry by the commissioner. Failure to comply with such conditions may result in the denial of a subsequent application for a right of way or easement.

[19.2.10.11 NMAC - Rp, 19.2.10.11 NMAC, 6/30/2004; A, 6/11/2019]

19.2.10.12 SURVEY PLAT:

A. Unless waived by the commissioner pursuant to 19.2.10.13 NMAC, each application for an easement or right of way shall include a survey plat, which describes the location (by quarter-section parts or lots, township, and range coordinates) of the proposed easement or right of way. The survey plat shall be based upon an actual survey on the ground and shall include a plat prepared in accordance with the Minimum Standards for Surveying in New Mexico as set out by the New Mexico board of registration for professional engineers and surveyors, by a professional surveyor who is registered in New Mexico or exempt from registration under the provisions of the Engineering and Surveying Practice Act, Sections 61-23-I to -32 NMSA 1978, or its successor provisions. The survey plat shall be properly certified showing the surveyor's state of registration and registration number. The survey plat shall show the centerline of the proposed easement or right of way or, if there is no centerline, then the area of the proposed easement or right of way. The survey plat shall identify every point where the proposed easement or right of way enters or leaves state trust land, crosses a section line, fence, road, pipeline, telephone line, irrigation works, or any other visible boundary, use, or easement. The survey plat shall show the location of all improvements in the close proximity of the easement or right of way. The survey plat shall show ties to section and quarter section corners, and measurements shall be to the nearest tenth of a foot with bearings expressed to the nearest minute. In no case shall the smallest unit of angular measurement be more than one minute. Acreage shall be computed to the nearest one hundredth of an acre and the survey plat shall show the number of acres, and the number of rods, included in the proposed easement or right of way in each legal subdivision of 40 acres, more or less.

B. When the requirement to submit a survey plat in accordance with Subsection A of 19.2.10.12 NMAC has been waived pursuant to 19.2.10.13 NMAC, then the applicant must provide to the commissioner a plat (prepared by the applicant, or the applicant's designated agent), drawn to scale, and showing the location of the easement or right of way and indicating the approximate number of acres and rods to be taken, as well as the legal description (by quarter-section parts or lots, township, and range coordinates) of the lands to be burdened by the proposed easement or right of way in the form required by Subsection A of 19.2.10.12 NMAC.

[19.2.10.12 NMAC - Rp, 19.2.10.12 NMAC, 6/30/2004; A, 6/11/2019]

19.2.10.13 APPLICATION FORM:

Written application for any grant of an easement or right of way shall be made upon forms prescribed and furnished by the commissioner. Such application shall be made under oath, and contain the following:

A. the application fee as set forth in the schedule of fees;

B. the field inspection fee as set forth in the schedule of fees, which fee may, in the discretion of the commissioner, be waived where the applicant is a governmental body which is prohibited by law from paying fees; and,

C. a legal description of the trust lands to be burdened by the proposed easement or right of way, together with a survey plat as provided under Subsection A of 19.2.10.12 NMAC; provided, however, that the requirement to submit a survey plat in accordance with Subsection A of 19.2.10.12 NMAC may be waived, in the discretion of the commissioner, upon a showing of good cause or undue hardship; all requests for waivers, setting forth the basis of the request, must be submitted in writing to the commissioner; in the event a waiver is granted, the applicant shall comply with the requirements set forth in Subsection B of 19.2.10.12 NMAC.

[19.2.10.13 NMAC - Rp, 19.2.10.13 NMAC, 6/30/2004; A, 6/30/2016]

19.2.10.14 TENURE:

Easements and rights of way granted under this part shall be granted for a term, which the commissioner, in the commissioner's discretion, deems in the best interests of the trust. Under no circumstances will the commissioner grant an easement or right of way for a perpetual term or as a fee simple grant.

[19.2.10.14 NMAC - Rp, 19.2.10.14 NMAC, 6/30/2004; A, 6/11/2019]

19.2.10.15 CONSIDERATION:

A. For telecommunications, electric line, and pipeline easements and rights-of-way, consideration for the grant of a right of way or easement shall be in an amount determined by the applicable price schedule unless the commissioner, in the commissioner's discretion, elects to establish the price through separate field inspection or appraisal, and/or subsequent negotiation, taking into account the circumstances and damage to remaining lands; for all others, consideration shall be determined by field inspection or appraisal, and/or subsequent negotiation, or such other method as the commissioner in the commissioner's discretion deems best. In each case however, unless a credit is allowed pursuant to Subsection B of 19.2.10.15 NMAC below, consideration shall not be less than the fair market value of the interest to be granted. This Section 19.2.10.15 applies to all federal, state, county, municipal, or other governmental agencies, as well as quasi-governmental bodies or organizations, as if they were private parties.

B. For gathering pipelines, salt water disposal pipelines and other pipelines not used for main transmission, the commissioner may authorize a credit of up to thirty percent of the fair market value of the interest to be granted if, after a written showing by the applicant, the commissioner, in the commissioner's sole discretion, determines: 1) that the grant of an easement or right of way, with a credit, will enhance oil and gas production from trust lands; 2) that the royalties resulting from the enhanced oil and gas

production will far exceed any benefits derived from receiving fair market value from the grant of easement or right of way; and 3) that granting the credit is in the best interests of the trust. If such a credit is authorized, the grantee shall pay the fair market value less the amount of the credit.

C. An applicant for an easement or right of way may apply to use an existing right of way or easement. The application must be accompanied by: a) the written consent of the existing user for the proposed second use, if different from the applicant; and b) if a discount is being requested, an appraisal, satisfactory to the commissioner, comparing the damage to trust lands that will result from the proposed easement or right of way and the damage that would be caused by that same right of way or easement if located adjacent to the proposed one. Other factors supporting a discount may be included for the commissioner's consideration. In cases where a second use is approved by the commissioner within an existing right-of-way or easement, the commissioner may, based upon the approved appraisal, and if the commissioner deems it in the best interests of the trust, discount the consideration for the second grant by no more than twenty percent.

D. No applicant may have both the Subsection B of 19.2.10.15 credit and the Subsection C of 19.2.10.15 discount above. If both are applied for, the commissioner in the commissioner's discretion will determine which, if any, will be allowed.

[19.2.10.15 NMAC - Rp, 19.2.10.15 NMAC, 6/30/2004; A, 6/11/2019]

19.2.10.16 EASEMENT OR RIGHT OF WAY DIMENSIONS:

The commissioner shall determine the minimum dimensions of easements and rights of way, which determinations may be changed from time to time or waived in the commissioner's discretion.

[19.2.10.16 NMAC - Rp, 19.2.10.16 NMAC, 6/30/2004; A, 6/11/2019]

19.2.10.17 ACCESS PERMITS:

The rights granted by the commissioner in any right of way or easement shall not include any right of access over, or right to use, trust lands not within the actual dimensions of the right of way or easement. If a right of way or easement is not large enough to permit vehicular or other access necessary for the maintenance, repair, or improvement, of the right of way or easement, or for other permitted activities within the right of way or easement, access in such cases must be obtained by applying for and receiving a temporary access permit from the commissioner using such form or forms, and subject to the payment of such fees and costs, as the commissioner deems in the best interests of the trust and promulgates from time to time. Temporary access permits may also be issued to prospective applicants for rights of way or easements to allow them to conduct pre-application assessments. Each entry upon trust lands without an

access permit as required by 19.2.10.17 NMAC shall be a separate trespass under 19.2.10.9 NMAC above.

[19.2.10.17 NMAC - Rp, 19.2.10.17 NMAC, 6/30/2004]

19.2.10.18 DAMAGE SURETY:

A. The holder of an easement or right of way is required to compensate the state or its lessee, patentee, or purchase contract holder, for the reasonable value of any measurable damage done to improvements or other property, belonging to the person claiming such damages, lawfully upon the trust lands burdened by the easement or right of way. Before an easement or right of way may be issued, the applicant shall file with the commissioner a bond or other surety in an amount determined by the commissioner to be sufficient to cover such damages; provided, however, that the commissioner, in the exercise of the commissioner's discretion, may waive this requirement if the applicant agrees to furnish to the commissioner, upon request, the names and addresses of its construction contractors, and if at least one of the following additional conditions is met:

(1) each lessee, patentee or purchase contract holder of the trust lands burdened by the easement or right of way provides a written waiver of this surety bond requirement; or,

(2) the applicant is a governmental agency which is prohibited by law from posting a surety bond and lawfully assumes sole and complete contractual liability for any damages arising from or in connection with its survey or use of the right of way or easement; or,

(3) the applicant is a governmental agency which is not immune from suit or is otherwise required by law to pay such damages and is thereby its own insurer, and lawfully assumes sole and complete contractual liability for any damages arising from or in connection with its survey or use of the right of way or easement; or,

(4) the commissioner, in the commissioner's discretion, is satisfied that each lessee, patentee or contract holder will be afforded adequate protection other than through the posting of a bond or other surety by the applicant.

B. With the approval of the commissioner, a \$25,000.00 bond, or one in any other amount that is determined by the commissioner from time to time to be in the best interests of the trust, or a different surety acceptable to the commissioner, may be used for more than one easement or right of way which the grantee has executed with the commissioner.

[19.2.10.18 NMAC - Rp, 19.2.10.18 NMAC, 6/30/2004; A, 6/11/2019]

19.2.10.19 EXPEDITED APPLICATION:

Upon the request of an applicant, satisfactorily demonstrating an emergency situation, an application for an easement or right of way may be expedited as follows:

A. If the applicant does not already have one, the application may be sent to the applicant by fax or in electronic format.

B. The applicant must complete the application and return it with an offered rental and the appropriate fees.

C. A telephonic inquiry will then be made to the appropriate state land office personnel for verbal recommendations regarding the application and the proper fee per unit to be charged.

D. After evaluating the verbal recommendation from the state land office personnel, an easement or right of way will be prepared along with a request for additional rental if necessary and faxed to the applicant.

E. Upon return of the faxed and signed notarized easement, along with payment of or an acceptable agreement to pay additional rental if requested, the applicant will, within three days of receipt, be given verbal or fax approval.

[19.2.10.19 NMAC - N, 6/30/2004]

[19.2.10.19 NMAC EXPEDITED APPLICATION is a new section added and replaces 19.2.10.19 NMAC CONSTRUCTION REPORTS. The old section headed CONSTRUCTION REPORTS is now 19.2.10.20 NMAC below]

19.2.10.20 CONSTRUCTION REPORTS:

The holder of an easement or right of way shall notify the commissioner immediately when any historic or prehistoric ruin or monument, or any object of historical, archeological, or scientific value is discovered upon or within the easement or right of way. Upon such discovery, the holder of the easement or right of way shall immediately refrain from further use or disturbance of the discovery area, or any related areas where further discoveries are likely, until the commissioner has consented in writing to any further activity upon or use of the easement or right of way and notified such other authorities as the commissioner deems it in the best interests of the trust to notify.

[19.2.10.20 NMAC - Rp, 19.2.10.19 NMAC, 6/30/2004]

19.2.10.21 AFFIDAVIT OF COMPLETION:

Upon the completion of construction of any easement or right of way, the holder of the easement or right of way shall, within 60 days after completion of construction, file with the commissioner an affidavit of completion. Failure to file such affidavit in accordance

with this section shall subject the easement or right of way to termination in accordance with the provisions of this part.

[19.2.10.21 NMAC - Rp, 19.2.10.20 NMAC, 6/30/2004]

19.2.10.22 CONFLICT OF USE:

Unless otherwise authorized in writing by the commissioner, an easement or right of way shall not be used for any other or additional purposes or by any other or additional parties except those expressly identified in the grant of easement or right of way. Unless expressly stated otherwise in the grant of easement or right of way, the commissioner reserves the right to grant easements or rights of way to third parties over, under, upon, through, across or parallel to an existing easement or right of way; provided, however, that the commissioner shall not approve such subsequent easements or rights of way if, in the commissioner's discretion, such co-use would present a safety hazard or otherwise unreasonably interfere with the existing easement or right of way. When a subsequent easement or right of way is permitted, the commissioner will require the subsequent grantee to post a bond or other surety to insure payment of damages, if any, which are done to the prior grantee's improvements and installations unless the prior grantee waives this requirement.

[19.2.10.22 NMAC - Rp, 19.2.10.21 NMAC, 6/30/2004; A, 6/11/2019]

19.2.10.23 AMENDMENTS:

Any holder of an existing easement or right of way desiring to change the use, or widen or otherwise alter the easement or right of way shall make application to do so by following the same procedure as is used in making an application for a new easement or right of way. Depending on the scope of the proposed change to the easement or right of way, the commissioner may waive certain application requirements, such as the survey plat or the application fee.

[19.2.10.23 NMAC - Rp 19.2.10.22 NMAC, 6/30/2004]

19.2.10.24 ASSIGNMENT - RELINQUISHMENT:

An easement or right of way may be assigned to third parties or relinquished to the state with the prior written approval of the commissioner and upon such terms and conditions as the commissioner may prescribe, and payment of the fee as set forth in the schedule of fees. The commissioner may waive the relinquishment fee when relinquishment is to accommodate a request or demand of the commissioner.

[19.2.10.24 NMAC - Rp, 19.2.10.23 NMAC, 6/30/2004; A, 6/30/2016; A, 6/11/2019]

19.2.10.25 RENEWAL OF EASEMENT OR RIGHT OF WAY:

Prior to the expiration date of any easement or right of way heretofore or hereafter granted for a limited term of years, an application may be submitted for a renewal of the grant. If the renewal involves no change in the location or status of the original easement or right of way, the applicant may file with the application a statement under oath setting out this fact, and the commissioner, in the commissioner's discretion, may extend the grant for an additional term upon payment of such additional consideration as the commissioner determines is appropriate; provided, however, that in no case shall such consideration be less than the fair market value of the interest granted unless a credit is allowed by this part.

[19.2.10.25 NMAC - Rp, 19.2.10.24 NMAC, 6/30/2004; A, 6/11/2019]

19.2.10.26 TERMINATION OF EASEMENT OR RIGHT OF WAY:

Any easement or right of way granted by the commissioner on trust land may be terminated in whole or in part for failure to comply with any term or condition of the grant or any applicable laws or regulations. Upon determination by the commissioner that an easement or right of way is subject to termination pursuant to the terms or conditions of the grant or applicable laws or regulations, the commissioner shall give the grantee a written 30-day notice at the address shown most recently in the records of the state land office, and if the grantee fails to remedy the problems set out in the notice to the satisfaction of the commissioner, then the commissioner shall issue an appropriate instrument terminating the easement or right of way, which instrument shall be placed in the public records of the state land office with a copy to the former grantee.

[19.2.10.26 NMAC - Rp, 19.2.10.25 NMAC, 6/30/2004]

19.2.10.27 ABANDONMENT:

Abandonment of all or part of an easement or right of way by a grantee shall consist of the non-use of all or part of a granted easement or right of way for the purposes authorized in the granting instrument for a period of one year. Upon discovering evidence of abandonment, the commissioner shall notify the grantee by written notice sent by regular mail to the grantee's last known address as shown in the records of the state land office, giving the grantee 60 days to prove that abandonment did not occur, all to the commissioner's satisfaction. Failure to do so shall result in the termination of the easement or right of way due to the failure of a condition subsequent, and upon such termination the easement or right of way shall automatically vest in the commissioner without further action or notice required. Any non-use of a portion of an easement or right of way for a period of one year shall, at the commissioner's discretion, be deemed an abandonment of that portion so used and subject to termination.

[19.2.10.27 NMAC - Rp, 19.2.10.26 NMAC, 6/30/2004]

19.2.10.28 RECLAMATION AND RESTORATION:

Any person who enters upon trust lands for purposes of surveying or constructing an easement or right of way shall take all steps necessary to preserve and protect the natural environmental conditions of the land, including reclamation of disturbed areas by leveling or terracing and reasonable attempts at re-vegetation where appropriate. Re-vegetation shall include the establishment of suitable grasses and forbs in accordance with applicable state land office rules and policies. The grantee of any right of way or easement shall consult with the commissioner regarding reclamation prior to undertaking reclamation and shall make reasonable attempts at restoration.

[19.2.10.28 NMAC - Rp, 19.2.10.27 NMAC, 6/30/2004]

19.2.10.29 EASEMENTS OR RIGHTS OF WAY OVER PURCHASE CONTRACT LANDS:

A. The commissioner may, on the basis of the state's legal title and subject to the terms and conditions of the applicable purchase contract, approve and record easements and rights of way over, upon, through or across purchase contract lands on the following terms and conditions:

(1) submission of an application by the easement or right of way applicant on the form prescribed by the commissioner accompanied by an original or certified copy of the easement or right of way executed between the applicant and the purchase contract holder;

(2) payment of the administrative fee as set forth in the schedule of fees for the approval and recording of the easement or right of way; and,

(3) submission of a legal description of the property to be burdened by the easement or right of way, together with a survey plat as provided in 19.2.10.12 NMAC.

B. The commissioner shall reject any application and initiate necessary legal proceedings to prevent the construction of any easement or right of way or the use of any easement or right of way that will diminish or impair the state's legal title to the purchase contract lands.

[19.2.10.29 NMAC - Rp, 19.2.10.28 NMAC, 6/30/2004; A, 6/30/2016]

19.2.10.30 INFORMAL RECONSIDERATION:

Any party aggrieved by a decision related to the payment of amounts due for any easement or right of way granted or applied for under this part, may request an informal reconsideration of such decision by written request made to the commissioner. Such request shall describe the decision for which reconsideration is requested, state the grounds for reconsideration and the relief sought, and be submitted to the commissioner within 15 days after the date of the decision for which reconsideration is requested. Any such request will be reviewed and decided by the commissioner in an expeditious

manner, with or without an oral presentation by the aggrieved party. The right to request informal reconsideration shall be in addition to, and not in lieu of, any right of contest available to the aggrieved party, and the filing of a request for informal reconsideration shall not extend any deadline for initiating a contest proceeding.

[19.2.10.30 NMAC - Rp, 19.2.10.29 NMAC, 6/30/2004]

[The old section 19.2.10.30 NMAC PRICE SCHEDULE: TELECOMMUNICATIONS EASEMENTS AND RIGHTS OF WAY is repealed, effective 6/30/2004]

PART 11: RELATING TO SALT WATER DISPOSAL SITE EASEMENTS

19.2.11.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501, Phone: (505) 827-5713.

[12/31/1999; 19.2.11.1 NMAC - Rn, 19 NMAC 3. SLO 11.1, 9/30/2002]

19.2.11.2 SCOPE:

This rule pertains to all salt water disposal site easements on those lands held in trust by the commissioner of public lands under the terms of the Enabling Act and subsequent legislation (trust lands). This rule governs the grantees of all salt water disposal site easements on such trust lands entered into subsequent to the date of this rule.

[12/31/1999; 19.2.11.2 NMAC - Rn, 19 NMAC 3. SLO 11.2, 9/30/2002]

19.2.11.3 STATUTORY AUTHORITY:

The commissioner's authority to manage the trust lands is found in N.M. Const., Art. XIII, and in Section 19-1-1 NMSA 1978. The authority to promulgate this rule is found in Section 19-1-2 NMSA 1978.

[12/31/1999; 19.2.11.3 NMAC - Rn, 19 NMAC 3. SLO 11.3, 9/30/2002]

19.2.11.4 DURATION:

Permanent.

[12/31/1999; 19.2.11.4 NMAC - Rn, 19 NMAC 3. SLO 11.4, 9/30/2002]

19.2.11.5 EFFECTIVE DATE:

January 20, 1984, unless a later date is cited at the end of a section.

[12/31/1999; 19.2.11.5 NMAC - Rn, 19 NMAC 3. SLO 11.5, 9/30/2002; A, 6/30/2016]

19.2.11.6 OBJECTIVE:

The objective of 19.2.11 NMAC is to provide for the orderly and lawful administration, and the appropriate use and development of salt water disposal site easements on trust lands.

[12/31/1999; 19.2.11.6 NMAC - Rn, 19 NMAC 3. SLO 11.6, 9/30/2002]

19.2.11.7 DEFINITIONS:

"**Schedule of fees**" means a list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

[12/31/1999; 19.2.11.7 NMAC - Rn, 19 NMAC 3. SLO 11.7, 9/30/2002; A, 6/30/2016]

19.2.11.8 APPLICABILITY OF RULES:

The following rules govern the issuance of easements upon state trust lands for sites for the underground disposal of salt water produced in connection with oil and gas operations. Because an oil and gas lessee is entitled to use so much of the land as is necessary to explore for and remove the oil and gas, the lessee does not need additional permission of the commissioner to dispose of the salt water upon or under the leased land so long as the water being disposed of is produced exclusively from wells upon the state trust land and so long as it is reasonable under the circumstances to do so. Conversely, if any of the salt water to be injected is produced from land not under the applicant's state oil and gas lease, then the applicant, in addition to a disposal site easement, will be required to secure a regular right of way and easement for a pipeline, roadway, or other means of conveyance under the rules pertaining to right of way and easements generally. (See 19.2.10 NMAC "Rules Relating to Easements, and Rights of Way".) Permission to dispose of produced salt water in natural salt lakes, or other surface facilities located upon state trust lands and approved by the New Mexico oil conservation commission, shall be given at the discretion of the commissioner by means of issuance of a "business lease." (See 19.2.9 NMAC "Business Leasing".)

[12/31/1999; 19.2.11.8 NMAC - Rn, 19 NMAC 3. SLO 11.8, 9/30/2002; A, 6/11/2019]

19.2.11.9 LANDS AVAILABLE FOR DISPOSAL SITE EASEMENTS:

A. Subject to the commissioner's right to exercise the commissioner's discretion, all lands listed as state owned on New Mexico state land office tract books are subject to application for salt water disposal easement sites; however, reference must be had to

New Mexico state land office records in each case to determine which prior rights, if any, have been conveyed to or contracted for by third parties which would limit or prohibit the commissioner from issuing a salt water disposal site easement. In any case, such easements are issued subject to prior rights.

B. The commissioner reserves the right to refuse to grant an easement when to do so would be detrimental to the trust. The following are some of the factors which may have bearing on the commissioner's decision:

(1) That an abandoned oil or gas well may have greater value for foreseeable future oil or gas production from a different zone.

(2) That the salt water storage space proposed to be used may be needed for disposal of salt water produced from wells on state trust lands in the foreseeable future.

(3) That disposal of salt water in the particular zone may interfere with development and production of oil and gas or other minerals owned by the state of New Mexico in trust.

C. Although applications will be accepted for filing on disposal sites prior to the approval of the disposal facility or operation by the New Mexico oil conservation division, the commissioner may withhold or deny issuance of the salt water disposal easement pending approval or disapproval by the New Mexico oil conservation division.

[12/31/1999; 19.2.11.9 NMAC - Rn, 19 NMAC 3. SLO 11.9, 9/30/2002; A, 6/11/2019]

19.2.11.10 APPLICATION:

Each application for a salt water disposal easement shall be made in ink or typewritten upon forms prescribed and furnished by the commissioner, under oath, and accompanied by the following:

A. a filing fee as set forth in the schedule of fees;

B. a plat showing disposal well and wells from which produced salt water is to be disposed together with pipelines and haul roads;

C. if the land is under an oil and gas lease, the written consent of the record owner that the easement may be issued, or in the event of the record owner's refusal to consent, then a statement of the reasons, if any, given for the refusal;

D. statement as to the estimated number of barrels of salt water to be disposed; and

E. a written appraisal of the land made under oath by some disinterested and credible person familiar with the land. All easements, except as to the true value of the land, must be based upon personal knowledge and not upon information and belief.

[12/31/1999; 19.2.11.10 NMAC - Rn, 19 NMAC 3. SLO 11.10, 9/30/2002; A, 6/30/2016; A, 6/11/2019]

19.2.11.11 TERM AND CONDITIONS:

Salt water disposal site easements shall be issued for five (5) years or less with a preference right of renewal, subject to the commissioner's decision not to continue the easement. The easement shall normally cover not more than two and one half (2 1/2) acres surrounding the proposed injection site. Applicant shall also file an appraisal of the land with regard to the value for water easement purposes made under oath by some disinterested party who is familiar with the land. Such appraisal shall take into account the extent and nature of the use that the application indicates will be made of the surface.

[12/31/1999; 19.2.11.11 NMAC - Rn, 19 NMAC 3. SLO 11.11, 9/30/2002]

19.2.11.12 CONSIDERATION:

Payment for such water disposal easement sites shall be at a negotiated rate but not less than two hundred fifty dollars (\$250.00) annual rental.

[12/31/1999; 19.2.11.12 NMAC - Rn, 19 NMAC 3. SLO 11.12, 9/30/2002]

19.2.11.13 BOND:

Before any disposal site easement is issued, the applicant shall post with the commissioner a sufficient bond or undertaking in an amount to be fixed by the commissioner, in favor of the owner of improvements lawfully located upon the land, to secure payment of damage, if any, done to such improvements by reason of the operations of the applicant. Upon written notice to the holder of a salt water disposal site easement, the commissioner may require such holder to fence the site for the protection of the surface user's livestock.

[12/31/1999; 19.2.11.13 NMAC - Rn, 19 NMAC 3. SLO 11.13, 9/30/2002]

19.2.11.14 ASSIGNMENT - RELINQUISHMENT - CANCELLATION:

A disposal site easement may, with the prior written approval of the commissioner, upon such terms and conditions as the commissioner may require, and payment of the fee as set forth in the schedule of fees, be assigned to third parties or relinquished to the state and the commissioner may cancel such easement for breach or violation of the terms and conditions thereof after thirty days registered notice is given as required by law.

[12/31/1999; 19.2.11.14 NMAC - Rn, 19 NMAC 3. SLO 11.14, 9/30/2002; A, 6/30/2016; A, 6/11/2019]

PART 12: RELATING TO THE APPROPRIATION OF WATER FROM STATE TRUST LANDS

19.2.12.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501, Phone: (505) 827-5713.

[12/31/1999; 19.2.12.1 NMAC - Rn, 19 NMAC 2. SLO 12.1, 9/30/2002]

19.2.12.2 SCOPE:

This rule pertains to all water resources on those lands held in trust by the commissioner of public lands under the terms of the Enabling Act and subsequent legislation (trust lands), except such water as is used and developed in connection with the development, under lease, of oil and gas resources on such lands. Other rules which should be consulted regarding the development and use of water resources on trust lands are: the rule pertaining to easements and rights of way, the rule pertaining to agricultural leases, and the rule pertaining to commercial leases. This rule governs all persons using state trust lands under lease, easement or right of way entered into subsequent to the date of this rule.

[12/31/1999; 19.2.12.2 NMAC - Rn, 19 NMAC 2. SLO 12.2, 9/30/2002]

19.2.12.3 STATUTORY AUTHORITY:

The commissioner's authority to manage the trust lands is found in N.M. Const., Art. XIII, and in Section 19-1-1 NMSA 1978. The authority to promulgate this rule is found in Section 19-1-2 NMSA 1978.

[12/31/1999; 19.2.12.3 NMAC - Rn, 19 NMAC 2. SLO 12.3, 9/30/2002]

19.2.12.4 DURATION:

Permanent.

[12/31/1999; 19.2.12.4 NMAC - Rn, 19 NMAC 2. SLO 12.4, 9/30/2002]

19.2.12.5 EFFECTIVE DATE:

January 20, 1984, unless a later date is cited at the end of a section.

[12/31/1999; 19.2.12.5 NMAC - Rn, 19 NMAC 2. SLO 12.5, 9/30/2002; A, 6/30/2016]

19.2.12.6 OBJECTIVE:

The objective of 19.2.12 NMAC is to provide for the interim orderly and lawful administration, and the appropriate development and use of water resources on state trust lands. A permanent rule will be proposed when the commissioner has more clearly defined the proper administration of water resources on state trust lands.

[12/31/1999; 19.2.12.6 NMAC - Rn, 19 NMAC 2. SLO 12.6, 9/30/2002]

19.2.12.7 DEFINITIONS:

"**Schedule of fees**" means list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

[12/31/1999; 19.2.12.7 NMAC - Rn, 19 NMAC 2. SLO 12.7, 9/30/2002; A, 6/30/2016]

19.2.12.8 APPLICABILITY AND PURPOSE:

This rule is intended to assure that the development and use of water and water rights connected with state trust lands occurs in the most beneficial manner to the trust. This rule is further intended to be an interim rule, to be effective while the commissioner is assessing the commissioner's duties with regard to water resources connected with state trust land. A permanent rule will be proposed when those duties have been defined. This rule shall govern in all situations where the law requires the consent of the commissioner, as administrator of the state trust lands, prior to the approval by the state engineer of the appropriation or use of water from state trust lands. 19.2.10 NMAC "Easements and Rights of Way", should be consulted when seeking permission to move water across state trust lands. Rule 8.023 [Rule 8.023 was rescinded on December 1, 1992] governs when the use of water from state lands involves improvements on grazing or agricultural leases.

[12/31/1999; 19.2.12.8 NMAC - Rn, 19 NMAC 2. SLO 12.8, 9/30/2002; A, 6/11/2019]

19.2.12.9 APPLICATION FOR CONSENT FEE:

Application for the commissioner's consent to the appropriation or use of water shall be made upon a form furnished by the commissioner and shall be accompanied by the filing fee as set forth in the schedule of fees. Thereafter, the commissioner shall enter into negotiations with each applicant on an individual basis to arrive at mutually satisfactory terms for the appropriation or use of water from state trust lands.

[12/31/1999; 19.2.12.9 NMAC - Rn, 19 NMAC 2. SLO 12.9, 9/30/2002; A, 6/30/2016]

19.2.12.10 ASSIGNMENTS OF CONSENT - APPLICATION - FEE:

The commissioner's consent to the appropriation or use of water from state trust lands may be assigned with the commissioner's prior approval subject to the terms and conditions of the consent. The application fee for approval of an assignment is as set forth in the schedule of fees.

[12/31/1999; 19.2.12.10 NMAC - Rn, 19 NMAC 2. SLO 2.10, 9/30/2002; A, 6/30/2016]

19.2.12.11 WATER EASEMENTS UNDER PRIOR RULES:

Water easements issued under prior rules of the New Mexico state land office shall be governed by the rules in effect at their issuance until the expiration of their current term, at which time renewal shall be subject to the most recent rules in effect.

[12/31/1999; 19.2.12.11 NMAC - Rn, 19 NMAC 2. SLO 2.11, 9/30/2002]

PART 13: RELATING TO THE SALE OF TIMBER ON STATE LANDS

19.2.13.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501, Phone: (505) 827-5713.

[12/31/1999; 19.2.13.1 NMAC - Rn, 19 NMAC 2. SLO 13.1, 9/30/2002]

19.2.13.2 SCOPE:

This rule pertains to all timber and timber products, except dead and down timber, on those lands held in trust by the commissioner of public lands under the terms of the Enabling Act and subsequent legislation (trust lands). This rule governs harvest and sales of timber and timber products on trust lands subsequent to the date of this rule.

[12/31/1999; 19.2.13.2 NMAC - Rn, 19 NMAC 2. SLO 13.2, 9/30/2002]

19.2.13.3 STATUTORY AUTHORITY:

The commissioner's authority to manage the trust lands is found in N.M. Const., Art. XIII, and in Section 19-1-1 NMSA 1978. The authority to promulgate this rule is found in Section 19-1-2 NMSA 1978.

[12/31/1999; 19.2.13.3 NMAC - Rn, 19 NMAC 2. SLO 13.3, 9/30/2002]

19.2.13.4 DURATION:

Permanent.

[12/31/1999; 19.2.13.4 NMAC - Rn, 19 NMAC 2. SLO 13.4, 9/30/2002]

19.2.13.5 EFFECTIVE DATE:

January 20, 1984, unless a later date is cited at the end of a section.

[12/31/1999; 19.2.13.5 NMAC - Rn, 19 NMAC 2. SLO 13.5, 9/30/2002; A, 6/30/2016]

19.2.13.6 OBJECTIVE:

The objective of 19.2.13 NMAC is to provide for the orderly and lawful administration, and the appropriate harvest and sale of timber and timber resources on trust lands.

[12/31/1999; 19.2.13.6 NMAC - Rn, 19 NMAC 2. SLO 13.6, 9/30/2002]

19.2.13.7 DEFINITIONS:

"**Schedule of fees**" means a list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

[12/31/1999; 19.2.13.7 NMAC - Rn, 19 NMAC 2. SLO 13.7, 9/30/2002; A, 6/30/2016]

19.2.13.8 POLICY:

The general policy of the New Mexico state land office is to manage the timber resources of the state on a basis of sustained yield and according to standards that will protect the timber and timber products and the watersheds of the state. Timber contracts in all cases must reflect this policy.

[12/31/1999; 19.2.13.8 NMAC - Rn, 19 NMAC 2. SLO 13.8, 9/30/2002]

19.2.13.9 TIMBER SALES - HOW MADE:

Sales of state timber and timber products may be made only at public auction at the county seat of the county wherein the same are situated, and after advertisement of sale by publication for 10 weeks in a newspaper regularly published in the city of Santa Fe, and concurrently in a newspaper regularly published in the county wherein the lands are situated. Provided, however, that the commissioner may issue permits for the sale of dead and down firewood without advertising such sale. A public auction will not be required on the sale or issuance of permits for dead and down firewood. Ordinarily, timber will be sold upon application by a prospective purchaser (and the commissioner's concurrence) except that the commissioner reserves the right to offer such timber for sale as the commissioner deems to be in the best interest of the trust.

[12/31/1999; 19.2.13.9 NMAC - Rn, 19 NMAC 2. SLO 13.9, 9/30/2002; A, 6/11/2019]

19.2.13.10 TIMBER SALES - APPRAISEMENT AND RECOMMENDATIONS OF THE REPRESENTATIVE OF THE NEW MEXICO STATE LAND OFFICE:

Merchantable timber on state trust land will ordinarily be sold only after appraisal, report and recommendation of a representative of the New Mexico state land office. The representative may be an employee of the New Mexico state land office, of the U. S. forest service or of the New Mexico state forestry division of the natural resources department, by request of the commissioner, under cooperative agreement.

[12/31/1999; 19.2.13.10 NMAC - Rn, 19 NMAC 2. SLO 13.10, 9/30/2002]

19.2.13.11 APPLICATION TO PURCHASE TIMBER:

Each application to purchase timber on state trust land must be accompanied by the application fee as set forth in the schedule of fees and a five hundred dollar (\$500.00) deposit, unless a different deposit sum is required to cover the expenses of appraisal, advertising and sale. The advertisement will specify time, date and place of public sale, together with the description of the lands containing timber to be sold.

[12/31/1999; 19.2.13.11 NMAC - Rn, 19 NMAC 2. SLO 13.11, 9/30/2002; A, 6/30/2016]

19.2.13.12 BIDDERS MUST BE QUALIFIED:

In order to be qualified as a bidder at a public sale of state-owned timber, a person must have complied with and met all conditions and requirements prescribed in the notice of sale, which shall include filing an application to purchase and payment of the application fee in accordance with 19.2.13.11 NMAC, and must have deposited with the commissioner, or the commissioner's agent conducting the sale, an amount as set forth in the notice of sale, in cash or certified check, prior to the opening of the sale. If the applicant or any other qualified bidder is not the successful bidder, the applicant's or any other qualified bidder's deposit will be refunded. If the cost of sale exceeds the deposit, the successful bidder shall pay the difference before receiving the successful bidder's timber contract. If the costs of sale are less than the initial deposit, the successful bidder will be refunded or credited the difference at the successful bidder's option.

[12/31/1999; 19.2.13.12 NMAC - Rn, 19 NMAC 2. SLO 13.12, 9/30/2002; A, 6/30/2016; A, 6/11/2019]

19.2.13.13 NO PREFERENCE RIGHTS:

State-owned timber is sold at public auction to the highest and best bidder. There is no preference right of any kind accorded to any person or persons in awarding state timber contracts.

[12/31/1999; 19.2.13.13 NMAC - Rn, 19 NMAC 2. SLO 13.13, 9/30/2002]

19.2.13.14 THE SUCCESSFUL BIDDER - CONTRACT BOND:

The highest and successful bidder shall sign the regular New Mexico state land office timber agreement form, as may be amended or changed in the best interest of the trust. Before the commissioner executes the contract, the successful bidder shall post a corporate surety bond (in such an amount as may be required by the commissioner) countersigned by an authorized New Mexico resident agent of a bonding company authorized to do business in the state of New Mexico. Such bond shall be conditioned upon faithful performance by the purchaser of the terms and provisions of the timber sale contract.

[12/31/1999; 19.2.13.14 NMAC - Rn, 19 NMAC 2. SLO 13.14, 9/30/2002]

19.2.13.15 TIMBER SALE CONTRACTS - PAYMENTS:

Timber contracts may be issued for a period of five (5) years or less unless the same be canceled for cause, unless sooner cut out or unless conditions beyond the control of the purchaser prevent completion within the specified time. Upon proper application and due proof of inability to complete the contract within its term, the commissioner may extend the same for reasonable periods in the best interests of the trust.

[12/31/1999; 19.2.13.15 NMAC - Rn, 19 NMAC 2. SLO 13.15, 9/30/2002]

19.2.13.16 PAYMENT FOR CONTRACTED TIMBER:

No timber will be marked for cutting under the provisions of the contract unless payment therefor shall have been made and credited in the New Mexico state land office, and in no case will cutting be permitted in advance of marking by the New Mexico state land office representative.

[12/31/1999; 19.2.13.16 NMAC - Rn, 19 NMAC 2. SLO 13.16, 9/30/2002]

19.2.13.17 SUPERVISION OF TIMBER CONTRACTS - FORM OF CONTRACT:

Where sales of timber are made, the cutting and logging practices will be supervised by a representative of the New Mexico state land office as indicated in 19.2.13.10 NMAC above, and the timber sale contract will in all cases be the standard form of contract adopted by the commissioner with such amendments as may be necessary in each case.

[12/31/1999; 19.2.13.17 NMAC - Rn, 19 NMAC 2. SLO 13.17, 9/30/2002]

19.2.13.18 YEARLY CUT:

Unless otherwise provided by the timber sale agreement, the yearly cut will be one-fifth (1/5th) of the total estimated merchantable timber board measure specified in the timber sale agreement.

[12/31/1999; 19.2.13.18 NMAC - Rn, 19 NMAC 2. SLO 13.18, 9/30/2002]

19.2.13.19 THE MINIMUM TO BE MARKED FOR CUTTING:

Unless otherwise provided by the timber sale agreement, the minimum merchantable timber to be marked at any one (1) time will be one-fourth (1/4th) of the annual required cut.

[12/31/1999; 19.2.13.19 NMAC - Rn, 19 NMAC 2. SLO 13.19, 9/30/2002]

19.2.13.20 SURVEY OF TIMBER LANDS:

State timber is sold based upon state trust lands described by the United States system of public land surveys by section, subdivision, township and range. Should uncertainties as to exact boundaries of state timber contracts be encountered, then an actual survey may be ordered by the commissioner, the cost of the same to be borne by the applicant or the successful bidder, whichever the case may be.

[12/31/1999; 19.2.13.20 NMAC - Rn, 19 NMAC 2. SLO 13.20, 9/30/2002]

19.2.13.21 BRUSH DISPOSAL BY CONTRACT HOLDER:

The timber sale contract shall contain sufficient, proper and adequate provisions therein requiring the contract holder to dispose of the brush resulting from the sale. The term "brush" as used herein shall mean to include all tops, slash and debris resulting from logging operations, including stems and limbs or portions thereof not exceeding four inches in diameter. The sufficiency of the brush disposal work done by the contract holder shall be subject to the approval of the commissioner, or the commissioner's duly authorized representative. In no instance shall brush disposal be allowed to fall behind cutting, except when the depth of snow or other adequate reason beyond the control of the contract holder makes proper disposal impracticable. In such an event, the disposal of brush may, with the written consent of the representative of the commissioner in charge, be postponed until conditions are more favorable.

[12/31/1999; 19.2.13.21 NMAC - Rn, 19 NMAC 2. SLO 13.21, 9/30/2002; A, 6/11/2019]

19.2.13.22 SUSPENSION OF LOGGING OPERATIONS AND TERMINATION OF THE TIMBER CONTRACT BY THE COMMISSIONER:

The timber contract shall also contain a provision that all operations on the sale area, including the removal of scaled timber, may be suspended by written notice from the commissioner, or the commissioner's duly authorized representative in charge, if the

conditions and requirements contained in the timber sale contract are disregarded by the contract holder, or the contract holder's agents or employees. Such suspension by the representative of the commissioner shall be only upon the approval of the commissioner. The commissioner may cancel any lease, contract or other instrument executed by the commissioner relating to state trust lands for nonpayment of monies due or for violation of any of the terms, covenants or conditions of such lease or instrument, after giving the party or parties in interest 30 days notice by registered mail; provided, however, if within the 30 days, the party or parties in interest shall comply with the demand in the notice, cancellation shall not be made. Provided, further, that in case where monies due are delinquent, the commissioner may, at the commissioner's option, look to the purchaser or the purchaser's sureties and the commissioner's lien upon improvements for payment, rather than cancel the contract.

[12/31/1999; 19.2.13.22 NMAC - Rn, 19 NMAC 2. SLO 13.22, 9/30/2002; A, 6/11/2019]

19.2.13.23 ASSIGNMENT OF STATE TIMBER SALE CONTRACTS:

Subject to the approval of the commissioner, state timber sales contracts may be assigned, provided that the assignee, in the opinion of the commissioner, is able and qualified to fulfill such contract, and provided further that the assignee shall provide a corporate surety bond as required by the said contract and conditioned upon the assignee's faithful performance of the provisions thereof.

[12/31/1999; 19.2.13.23 NMAC - Rn, 19 NMAC 2. SLO 13.23, 9/30/2002; A, 6/11/2019]

19.2.13.24 MODIFICATION OF TIMBER SALES AGREEMENT:

Upon application by the holder of a state timber sale contract for modification of the holder's agreement and good cause being shown, the commissioner may consent to certain changes, in the commissioner's discretion, provided that the applicant for modification shall have first obtained the consent of its surety.

[12/31/1999; 19.2.13.24 NMAC - Rn, 19 NMAC 2. SLO 13.24, 9/30/2002; A, 6/11/2019]

19.2.13.25 [RESERVED]

[12/31/1999; 19.2.13.25 NMAC - Rn, 19 NMAC 2. SLO 13.25, 9/30/2002]

19.2.13.26 CONTRACTOR RESPONSIBILITIES:

Under the general powers of the commissioner and the appropriate provisions in timber contracts, the commissioner will require holders of timber sales contracts to respect forest service fences and the fences of individuals in the timber sale area, and unless state timber operators have made proper arrangements to the contrary, all gates must be closed after passing through the same.

[12/31/1999; 19.2.13.26 NMAC - Rn, 19 NMAC 2. SLO 13.26, 9/30/2002]

19.2.13.27 CANCELLATION OF TIMBER CONTRACT FOR CAUSE:

The commissioner may cancel any lease, contract or other instrument executed by the commissioner, which shall have been obtained by fraud or executed through mistake or without authority of law. In such case, the commissioner shall serve upon the party in interest a 30 day registered notice to show cause before the commissioner upon a date to be fixed in the notice, why such instrument should not be canceled.

[12/31/1999; 19.2.13.27 NMAC - Rn, 19 NMAC 2. SLO 13.27, 9/30/2002; A, 6/11/2019]

PART 14: PERTAINING TO LAND SALES

19.2.14.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501, Phone: (505) 827-5713.

[12/31/1999; 19.2.14.1 NMAC - Rn, 19 NMAC 3. SLO 14.1, 9/30/2002]

19.2.14.2 SCOPE:

This rule pertains to the sale of lands, resources or other assets held in trust by the commissioner of public lands under the terms of the Enabling Act and subsequent legislation (trust lands). There are certain exceptions to this rule as follows: applications to purchase received between August 1st and September 30th may be rejected summarily as set out in subsection B of 19.2.14.8 NMAC below.

[12/31/1999; 19.2.14.2 NMAC - Rn, 19 NMAC 3. SLO 14.2, 9/30/2002]

19.2.14.3 STATUTORY AUTHORITY:

The commissioner's authority to manage the state trust lands is found in N.M. Const., Art. XIII, Section 2, and in Section 19-1-1 NMSA 1978. The authority to promulgate this rule is found in Section 19-1-2 NMSA 1978.

[12/31/1999; 19.2.14.3 NMAC - Rn, 19 NMAC 3. SLO 14.3, 9/30/2002]

19.2.14.4 DURATION:

Permanent.

[12/31/1999; 19.2.14.4 NMAC - Rn, 19 NMAC 3. SLO 14.4, 9/30/2002]

19.2.14.5 EFFECTIVE DATE:

September 5, 1985, unless a later date is cited at the end of a section.

[12/31/1999; 19.2.14.5 NMAC - Rn, 19 NMAC 3. SLO 14.5, 9/30/2002; A, 6/30/2016]

19.2.14.6 OBJECTIVE:

The objective of 19.2.14 NMAC is to provide for the orderly and lawful sale of state trust lands, assets and resources.

[12/31/1999; 19.2.14.6 NMAC - Rn, 19 NMAC 3. SLO 14.6, 9/30/2002]

19.2.14.7 DEFINITIONS:

"**Schedule of fees**" means a list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

[12/31/1999; 19.2.14.7 NMAC - Rn, 19 NMAC 3. SLO 14.7, 9/30/2002; A, 6/30/2016]

19.2.14.8 LAND SUBJECT TO SALE:

All lands, including lands acquired by escheat, shown upon the New Mexico state land office tract books to be open for sale, may be sold at public auction, at the discretion of the commissioner. All minerals of whatsoever kind, including but not limited to oil and gas, coal, sand and gravel, clay, shale, caliche and building stone, will be reserved to the state of New Mexico, together with the right to use so much of the surface as may be reasonably necessary to explore for and remove same. Such rights are subject to the right of the purchaser to be compensated for the purchaser's improvements lawfully placed upon the land. Geothermal resources are reserved under the same terms and conditions as minerals.

A. The beneficiary institution shall be advised of the receipt of any application to purchase.

B. All applications filed between August 1 and September 30 each year will be summarily rejected unless it is determined that they will not interfere with the annual surface lease renewal program.

[12/31/1999; 19.2.14.8 NMAC - Rn, 19 NMAC 3. SLO 14.8, 9/30/2002; A, 6/11/2019]

19.2.14.9 APPLICATION FEES - COST - REQUIREMENTS:

Applications to purchase state trust lands shall be:

A. Made under oath, in ink, or typewritten upon forms prescribed and furnished by the commissioner.

B. Accompanied by the application fee as set forth in the schedule of fees and a deposit against the expense of advertising and sale as set forth in the schedule of fees. The successful bidder shall pay the total cost of advertising, appraising, and sale, and will be billed for any cost in excess of the deposit. The deposit of unsuccessful bidders will be refunded.

C. Accompanied by an appraisal of the land by a disinterested and creditable person familiar with the land, and said appraisal shall be based upon personal knowledge and not information and belief. Such appraisal shall not be binding upon the commissioner.

D. Signed by the original applicant or by the applicant's agent or attorney duly authorized by written power of attorney. Applications not made in conformity with these rules are subject to rejection and in the event any application is withdrawn or rejected, the applicant shall pay the cost incurred up to that time. When special circumstances warrant, the commissioner, upon notice to the applicant, may add additional requirements. Nothing in these rules contained shall be construed as preventing the commissioner on the commissioner's own initiative at any time from offering for sale all or part of any lands of the state when the commissioner determines that such sale is in the best interest of the trust.

[12/31/1999; 19.2.14.9 NMAC - Rn, 19 NMAC 3. SLO 14.9, 9/30/2002; A, 6/30/2016; A, 6/11/2019]

19.2.14.10 APPRAISAL OF LAND AND IMPROVEMENTS:

A. Upon receipt of a proper application to purchase, and upon a preliminary determination that the sale might be advantageous to the trust, the commissioner will cause an appraisal of the land and the authorized improvements to be made. Thereafter, if the commissioner determines to offer the land for sale, a copy of the appraisal will be furnished to the applicant and to the owner of the improvements as well as to any other interested parties requesting same. Any party in interest aggrieved by the decision of the commissioner in setting the value of the improvements may appeal to the district court within 60 days as provided by law.

B. Upon receipt of the appraisal, the applicant shall notify the commissioner in writing as to whether the applicant is agreeable to starting the bidding upon the land at the appraised price. If not, the unused portion of the deposit shall be refunded to the applicant and the application rejected. If the applicant is agreeable with the appraisal of the land and the improvements, the applicant shall file with the commissioner a sum equal to the appraised value of the improvements or a waiver of payment signed by the owner thereof. If the applicant disagrees with the appraisal of the improvements the applicant may post bond with the commissioner to assure payment and appeal the

appraisal as provided by law. Upon payment or posting of the bond the commissioner may proceed to advertise the sale.

C. Authorized improvements shall include water rights and all permanent improvements placed upon the land in compliance with the provisions of Section 19-7-51 NMSA 1978; all improvements placed upon the land prior to March 1, 1955, whether or not prior written permission of the commissioner was obtained; and all improvements approved by the commissioner under the provisions of Section 19-7-51 NMSA 1978.

D. Upon completion of the sale, the commissioner shall pay to the owner of the authorized improvements the value thereof as hereinabove determined; provided, however, in the event the lease provides for removal of improvements, either permanent or removable, the terms of the lease shall take precedence over this Rule.

[12/31/1999; 19.2.14.10 NMAC - Rn, 19 NMAC 3. SLO 14.10, 9/30/2002; A, 6/11/2019]

19.2.14.11 ADVERTISEMENT:

Notice of sale shall be published once each week for ten (10) consecutive weeks in a newspaper of general circulation published locally at the state capital, and a newspaper of like circulation which shall be locally published nearest the lands so offered for sale. Said notice shall set forth the nature, time and specific place of the sale, which place shall be at the county seat wherein the lands or the major portion thereof are located.

[12/31/1999; 19.2.14.11 NMAC - Rn, 19 NMAC 3. SLO 14.11, 9/30/2002]

19.2.14.12 QUALIFICATION OF BIDDERS:

In order to qualify as a bidder, the prospective bidder shall deposit with the commissioner:

A. A deposit to cover the cost of sale, as set forth in the notice of sale.

B. Ten percent of the appraised value of the lands.

C. The appraised value of the improvements, a waiver of payment of such amount signed by the owner of the improvements, or a bond sufficient to cover the appraised value if an appeal is to be taken, unless the prospective bidder is the owner of the improvements.

[12/31/1999; 19.2.14.12 NMAC - Rn, 19 NMAC 3. SLO 14.12, 9/30/2002; A, 6/30/2016]

19.2.14.13 AUCTION SALE TO HIGHEST BIDDER:

No preference right to purchase shall be given to any bidder upon the advertised land. If sold at all, the land shall be sold to the highest and best bidder at public auction. Said

auction may be conducted by oral auction or by the acceptance of sealed bids, which shall be opened at the time of the auction. Should there be identical sealed bids, those submitting them shall be allowed to orally bid until there is a highest and best bidder. Bids must be for all of the land offered in a given tract.

[12/31/1999; 19.2.14.13 NMAC - Rn, 19 NMAC 3. SLO 14.13, 9/30/2002]

19.2.14.14 CONTRACTS AND PATENTS:

A. On the date of sale the successful bidder, if any, shall be required to pay the full amount bid, unless the commissioner has given notice that the commissioner will accept payment by purchase contract. If a purchase contract is permitted, the successful bidder shall be required to pay at least ten percent of the purchase price. Upon making such payment, together with the cost of sale, if any, such purchaser shall be entitled to a 30 year contract whereunder the balance of the principal shall be payable in 30 equal annual installments with interest in advance on the deferred principal balance at a rate set by the commissioner in the notice of auction sale published as required by law. The first principal and interest payment shall be due on or before the date possession of the premises is established. This date shall serve as the anniversary date of the contract on which all successive payments shall be due. Purchaser at purchaser's option may, however, pay cash in full and receive a patent. No extension of the 30 year term of the contract will be granted. In case of death of a contract purchaser, the commissioner may upon written application by an heir, devisee or personal representative of the deceased, defer the due date of the next payment for one year. Deposit of unsuccessful bidders will be refunded. Sample copies of a standard purchase contract agreement and patent will be furnished prospective bidders upon request.

B. Holders of purchase contracts may pay off the contract balance at any time. Interest payments made in advance cannot be refunded. In case of the final discharge of the obligation before maturity date, interest must be paid to the date when the contract is paid in full. No patent covering any portion of state trust land under contract will be issued until the total purchase price of the contract is paid in full regardless of the number of assignments outstanding, except the commissioner will issue patents to separate assignments in instances where the assignments were approved by the commissioner prior to September 4, 1956.

[12/31/1999; 19.2.14.14 NMAC - Rn, 19 NMAC 3. SLO 14.14, 9/30/2002; A, 6/11/2019]

19.2.14.15 ASSIGNMENT OF PURCHASE CONTRACTS:

A. Any purchaser of state trust lands under purchase contract, which contract is in good standing, may assign a part or all of the purchaser's right, title and interest under any such contract, provided that a certified copy of such assignment shall be filed with the commissioner before the same shall become effective. The approval or disapproval by the commissioner of an assignment or a partial assignment of a state contract is not required. The filing of a certified copy of the assignment or partial assignment with the

commissioner completes the assignment, provided, however, if the contract is under collateral assignment the approval of the commissioner is required and such permission shall not be given unless the assignee agrees in writing to assume or take the contract subject to the rights of any collateral assignee. No relinquishment of a purchase contract shall be approved unless the collateral assignee shall join in said relinquishment.

B. No patent shall be issued to any contract holder or assignee thereto until the entire bid price for the entire tract bid upon is paid in full, except for contracts assigned with the approval of the commissioner prior to September 4, 1956.

C. Each assignment shall be accompanied by a fee of sixty dollars (\$60.00).

D. The mailing address of the assignee shall be clearly shown upon the assignment and a copy of the assignor's purchase contract shall accompany the assignment.

E. The assignment must show the marital status of the assignor and, if married, both husband and wife must join in the execution of the assignment which signatures must be acknowledged as in the case of conveyances of other real estate.

[12/31/1999; 19.2.14.15 NMAC - Rn, 19 NMAC 3. SLO 14.15, 9/30/2002; A, 6/11/2019]

19.2.14.16 COLLATERAL ASSIGNMENT (MORTGAGE) OF CONTRACTS:

A. With the consent of the commissioner the owner of a purchase contract may mortgage the owner's interest in the contract together with the improvements upon the land by means of assigning the owner's interest as collateral security to insure the payment of an indebtedness specified in said assignment. Upon approval of such collateral assignment by the commissioner, the assignee shall have a lien upon the said interests of the assignor and thereafter no contract so assigned shall be transferred free and clear except after release of said collateral assignment.

B. Collateral assignments shall be made only upon forms prescribed by the commissioner, which forms shall meet the other specified requirements of law.

C. Collateral assignments may be foreclosed by the assignee in the manner provided by law for the foreclosure of mortgages on real estate and the purchaser at such foreclosure sale shall, if otherwise qualified to purchase state trust land, be entitled to the purchase contract and the improvements located upon the land subject to prior collateral assignments, if any there be.

[12/31/1999; 19.2.14.16 NMAC - Rn, 19 NMAC 3. SLO 14.16, 9/30/2002; A, 6/11/2019]

19.2.14.17 CANCELLATION FOR DEFAULT - RELINQUISHMENT:

A. In the event the purchaser shall fail to comply with the terms and conditions of contract of purchase the commissioner may, at the commissioner's option, declare a forfeiture of such contract after 30 days' notice given as provided under Section 19-7-50 NMSA 1978, unless the purchaser shall comply with the demands made in such notice in which case cancellation shall not be made. A purchaser may consent to the cancellation by waiver of notice of intention to cancel.

B. Late interest payments shall bear interest at the rate of one percent per month until paid.

C. In case of forfeiture all monies theretofore paid under any such contract, together with improvements upon the land, shall remain and become the property of the state of New Mexico.

D. Any contract executed by the commissioner which has been obtained by fraud or executed through mistake, or without authority at law, may be canceled after 30 days' notice by registered mail upon order to show cause as provided by Section 19-7-8 NMSA 1978.

[12/31/1999; 19.2.14.17 NMAC - Rn, 19 NMAC 3. SLO 14.17, 9/30/2002; A, 6/11/2019]

19.2.14.18 COUNTY BOND LANDS:

The rules applicable to the sale of other lands are generally applicable to the sale of county bond lands.

[12/31/1999; 19.2.14.18 NMAC - Rn, 19 NMAC 3. SLO 14.18, 9/30/2002]

19.2.14.19 WATER RIGHTS:

A. Water Pertinent to Irrigated Land. Water used on state trust land and the right to use same upon said land shall never be severed or transferred from the land without the written consent of the commissioner. Because title to lands under purchase contract remains in the state of New Mexico until the land is paid for and a patent is issued, the written permission of the commissioner must be secured in order to transfer or sever water rights from the lands under purchase contract.

B. Permission to Transfer. Any purchase contract holder desiring to apply for permission to change the use of water from state trust lands to other lands, including other state trust lands but not excluding privately owned lands; or to change the method of use of such water; or to change the location of a well; or to change the point of diversion of surface waters from any stream or arroyo shall comply with 19.2.12 NMAC.

[12/31/1999; 19.2.14.19 NMAC - Rn, 19 NMAC 3. SLO 14.19, 9/30/2002]

PART 15: ADMINISTRATIVE PROCEEDINGS BEFORE THE COMMISSIONER OF PUBLIC LANDS

19.2.15.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office.

[19.2.15.1 NMAC - Rp, 19.2.15.1 NMAC, 6/30/2004]

19.2.15.2 SCOPE:

This part pertains to the conduct of all adjudicatory administrative proceedings before the commissioner of public lands arising from agency determinations and show cause orders, as defined herein. Contested matters arising under Section 19-10-24 NMSA 1978, and Sections 19-7-60 and 61 NMSA 1978, and certain other non-adjudicatory hearings shall not be subject to or governed by this part. This part does not enlarge, diminish or in any way alter the constitutional and statutory jurisdiction of the commissioner of public lands or the substantive rights of any person.

[19.2.15.2 NMAC - N, 6/30/2004]

19.2.15.3 STATUTORY AUTHORITY:

The commissioner's authority to manage the trust lands or resources is found in N.M. Const., Art. XIII, 2, and in Section 19-1-1 NMSA 1978. The commissioner's authority relative to contest proceedings is found in Sections 19-7-64 through 68 NMSA 1978 and Section 9-3-1.1 NMSA 1978. The commissioner's authority to promulgate this part is found in Sections 19-1-2 and 19-7-64 NMSA 1978.

[19.2.15.3 NMAC - N, 6/30/2004]

19.2.15.4 DURATION:

Permanent.

[19.2.15.4 NMAC - N, 6/30/2004]

19.2.15.5 EFFECTIVE DATE:

June 30, 2004, unless a later date is cited at the end of a section.

[19.2.15.5 NMAC - Rp, 19.2.15.5 NMAC, 6/30/2004]

19.2.15.6 OBJECTIVE:

The objective of this Part 15 is to provide a clear, mandatory, administrative remedy for persons aggrieved by an agency determination or show cause order, as defined herein, and to provide rules to govern the conduct of the adjudicatory administrative proceedings, all within the scope of this Part 15.

[19.2.15.6 NMAC - N, 6/30/2004]

19.2.15.7 DEFINITIONS:

A. "Agency determination" means a written determination, by the commissioner or the commissioner's designee, regarding a final action or decision taken by the commissioner through a state land office department or division, which action adversely and materially affects a person's right, title, interest or priority of claim in or to trust lands or resources, and which arises from, or in connection with, a lease, contract, easement, right of way, grant, conveyance, or any other instrument executed by the commissioner or the commissioner's designee.

B. "Commissioner" means the commissioner of public lands, or a person fully authorized to act in the commissioner's stead. References to the commissioner as a participant in the contest proceedings shall mean the state land office department or division responsible for the agency determination at issue, or on behalf of which, a show cause order is issued.

C. "Contest" means the administrative hearing at which a decision of the commissioner, as defined herein, is made regarding a show cause notice of the commissioner or a petition contesting an agency determination.

D. "Contest notice" means notification of the occurrence or denial of a contest issued by the commissioner.

E. "Decision of the commissioner" means the final decision rendered by order of the commissioner at the conclusion of a contest pursuant to this Part 15. A decision of the commissioner as such is any "decision" "ruling" or "order" under Chapter 19, NMSA 1978 appealable to a district or higher court, including any such decision of the commissioner so referred to in Sections 19-7-8, 19-7-17, 19-7-67, 19-10-22, and 19-10-23 NMSA 1978. A decision of the commissioner is the "final decision or order of an agency" as used in Rules of Civil Procedure for the District Court, Rule 1-074C NMRA 2004. A decision of the commissioner is a "final decision" as that term is used in Paragraph (2) of Subsection H of 39-3-1.1, NMSA 1978.

F. "Hearing officer" means the person appointed by the commissioner to conduct the contest.

G. "Petitioner" means the person initiating a contest by petition; in the case of a show cause proceeding there will be no petitioner.

H. "Respondent" means any party to a contest initiated by petition, other than the petitioner or the commissioner; in the case of a show cause proceeding the person(s) to whom the show cause order is directed shall be the respondent(s).

I. "Schedule of fees" means a list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

J. "Scheduling order" means an order issued by the hearing officer that sets the date, time and place of the contest; establishes the order and timing of all pre-hearing matters, such as discovery and briefing; may establish whether procedures in addition to those provided for in this Part 15 shall be provided; and may provide for such other related matters as the hearing officer deems necessary. Under appropriate circumstances, the scheduling order may be amended by the hearing officer within a reasonable time after issuance.

K. "Show cause order" means an order issued by the commissioner, pursuant to Section 19-7-8 NMSA 1978 or otherwise as may be permitted, directing a party or parties to show cause, if any, why a particular agency action should not be taken or made final. The show cause order will state the place and time of the contest hearing. A show cause order is an agency determination.

L. "Trust lands or resources" means those lands, their natural products or water rights, and other assets derived from them, which are under the care, custody, and control of the commissioner.

[19.2.15.7 NMAC - N, 6/30/2004; A, 6/30/2016; A, 6/11/2019]

19.2.15.8 AGENCY DETERMINATION:

A. A contest will not be initiated by petition without the petitioner first having received an agency determination. In the case of a contest initiated by the commissioner's show cause order, the order itself is the agency determination, and no petition is necessary.

B. An agency determination may be rendered at any time deemed appropriate by the commissioner or the commissioner's designee, or may be rendered, if deemed appropriate by the commissioner, upon request of an interested party.

C. An agency determination will be rendered in writing, shall be dated, and will be provided to the affected party or parties, or to their agent, representative, or successor, in written or electronic format by such means as can reasonably provide verification of receipt. It shall be sufficient if an agency determination is provided to the physical or electronic address most recently shown in the public records of the commissioner.

D. An agency determination will state that it will become non-appealable unless the party to whom it is directed initiates a contest proceeding or responds to the show cause order pursuant to this Part 15 within 30 days of the date of the agency determination, or within such other longer time as fairness and circumstances may, in the commissioner's discretion, require.

E. A demand, offer, or any other agency decision or act, which is still open to negotiation or change by the commissioner, is not an agency determination.

[19.2.15.8 NMAC - N, 6/30/2004; A, 6/11/2019]

19.2.15.9 CONTEST:

A. Right to contest. Subject to Subsection B of 19.2.15.9 NMAC below, any persons or entities aggrieved by an agency determination shall have the right to a contest pursuant to this Part 15. Such proceedings are a mandatory administrative remedy and must be completed before recourse to any court is available.

B. Limitation of right. Unless the commissioner in the commissioner's discretion determines otherwise, a contest shall not involve matters which would not require the presence of the commissioner as a necessary party in a district court proceeding. The right of a party to initiate a contest proceeding is not a waiver of any defense or claim by the commissioner or any other party regarding threshold matters such as jurisdiction, sovereign immunity, standing, ripeness, mootness, failure to state a claim, and the like.

C. Contest participants. In the case of a contest initiated by a show cause order, the participants shall be the commissioner and the respondent. In the case of a contest initiated by petition, the contest participants shall be the commissioner, the petitioner, and any respondents. The hearing officer may, in the hearing officer's discretion, permit third parties to intervene or to participate as *amicus curiae*. All pleadings shall contain a certificate indicating that all other participants have been served with a copy of the pleading by first-class mail or by such other means as the hearing officer may allow.

D. Representation. Contest participants may represent themselves, or may be represented by counsel to the same extent allowed in the district courts of New Mexico. Parties who represent themselves will be held to the same standards of conduct and pleading as if they were represented by counsel.

E. Location. All contests shall, at the sole discretion of the commissioner, be held either at the offices of the New Mexico state land office in Santa Fe, New Mexico, or at any other location deemed most expedient by the commissioner.

[19.2.15.9 NMAC - Rp, 19.2.15.9 NMAC, 6/30/2004; A, 6/11/2019]

19.2.15.10 INITIATING A CONTEST:

A. By written petition. Subject to the hearing officer's ability to allow amendment of the petition for failure to comply with the requirements of form set out below when it appears to the hearing officer that the petition sets out a good faith claim, a contest shall be initiated by written petition, sent by certified or registered mail to the commissioner, which shall contain the following:

(1) As set out in the example (2) below, the caption shall designate the subject matter in reference to the lease, contract, easement, right of way, grant, conveyance, or other instrument which forms the basis of the petitioner's claims.

(2) The caption will also designate the petitioner by full name as such, then the respondent, if any, shall be designated by full name as such. A place should be provided for the proceeding to be numbered. The title shall be bolded and underlined. In the case of a contest over a grazing lease, for example, the caption should appear as follows:

Before the Commissioner of Public Lands

In Re State Land Office Grazing Lease No. GX-0000

Mr. And Mrs. A.B., petitioner

v

Contest No.

X. Corp., respondent

Petition for Contest

(3) the name, mailing and e-mail addresses, telephone and fax numbers of the petitioner and of each respondent in the contest proceeding;

(4) a legible copy of the instrument or instruments which form the basis of the claim in issue;

(5) the aliquot description, by subdivision, section, township and range, of the land or lands in issue;

(6) a concise, complete statement of the claim or claims of the petitioner;

(7) a concise, complete statement of the facts giving rise to the claim or claims in issue;

(8) a statement of the relief being requested as to each claim; and

(9) a sworn statement that a copy of the "foregoing petition" has been sent to the commissioner

and to all respondents by registered or certified mail, and the date when sent.

B. By show cause order. A contest may be initiated by the commissioner's show cause order sent by certified or registered mail. The show cause order shall contain the following:

(1) As set out in the example (2) below, the caption shall designate the subject matter in reference to the lease, contract, easement, right of way, grant, conveyance, or other instrument which forms the basis of the commissioner's claims.

(2) The caption will also designate the respondent by full name as such. The title shall be bolded and underlined. A place should be provided for the proceeding to be numbered. In the case of a show cause order issued in connection with a business lease for example, the caption should appear as follows:

Before the Commissioner of Public Lands

In Re State Land Office Business lease No. BL-0000

Contest No.

X Corp., respondent

Show Cause Order

To Mr. A.B., for X Corporation, respondent;

(3) the name, mailing and e-mail addresses, telephone and fax numbers of the respondent;

(4) a legible copy of the instrument or instruments which form the basis of the show cause order;

(5) the aliquot description, by section, township and range, of the land or lands in issue;

(6) a concise, complete statement of the basis of the show cause order;

(7) a concise, complete statement of the facts giving rise to the show cause order;

(8) a statement of the final decision proposed by the commissioner; and

(9) a statement that a copy of the show cause order has been sent to the respondent by registered or certified mail, and the date when sent.

C. In the case of a contest initiated by a petition, within 10 days of the receipt of a contest petition, the commissioner will give, to the petitioner and any identified respondents, a contest notice stating whether the petition sets out sufficient cause for contest within the scope of this Part 15. The commissioner may reject a contest petition because the requisite agency determination has not been obtained, because the petition states a clearly spurious claim, because the petition is filed as an abuse of process, or because the matters alleged are too complex for an administrative determination or involve too many or unrelated parties. An adverse contest notice, one denying the petition, is an appealable decision of the commissioner. In the case of a contest initiated by show cause order, the show cause order itself shall be the contest notice.

D. Within 30 days of the date of the written notice in Subsection C of 19.2.15.10 NMAC above, each respondent shall submit to the commissioner, also by certified mail, a response, in the form provided for in Paragraph (2) of Subsection A or Paragraph (2) of Subsection B of 19.2.15.10 NMAC above, which shall set forth:

(1) the name, mailing and e-mail addresses, and telephone and fax numbers of each person or entity whom it is believed should be included in the contest, if not already named, and a statement of the basis for such belief;

(2) legible copies of any other instruments that are thought to be relevant to the contest;

(3) a concise, complete statement of the defenses to the claim, of what it is believed should be the disposition of the petitioner's claim, and of any additional cross-claim or counter-claim to be made in connection with the same issues and the relief being requested;

(4) a concise, complete statement of any relevant, additional facts not offered by the petitioner(s) in their petition or not offered by the commissioner in the show cause order; and

(5) a summary of the arguments and authorities supporting the defenses or claims.

E. Subject to the hearing officer's ability to allow amendment of the response for failure to comply with the requirements of form set out above when it appears to the hearing officer that the response is made in good faith, failure to respond, within the time and in the form required in Subsection D of 19.2.15.10 NMAC above, without having first obtained an extension of time to do so by written request directed to and granted by the commissioner, will be deemed a default, and will result in the issuance of a decision of the commissioner.

F. Upon concurrence of the parties, or upon the commissioner's own determination that circumstances require it, the commissioner may shorten or lengthen the times allowed.

[19.2.15.10 NMAC - N, 6/30/2004; A, 6/11/2019]

19.2.15.11 HEARING OFFICER:

A. Following receipt of the acceptable contest petition, the commissioner shall, by order, appoint a hearing officer to preside over the administrative hearing. As soon as practicable, the hearing officer shall issue a scheduling order. In the commissioner's discretion, the commissioner may appoint a designated person from within the state land office who has not participated in the agency determination.

B. The commissioner's appointment of a hearing officer shall constitute a delegation of the commissioner's statutory powers under Section 19-7-65 NMSA 1978 and of the commissioner's constitutional and inherent power to control the conduct of administrative proceedings under the commissioner's jurisdiction.

C. *Ex parte* communication with the hearing officer is strictly prohibited.

[19.2.15.11 NMAC - N, 6/30/2004; A, 6/11/2019]

19.2.15.12 PRE-HEARING DISCOVERY, CONFERENCES, AND MOTION PRACTICE:

A. Pursuant to the scheduling order, the parties to the contest and the commissioner shall provide one another and the hearing officer with a written summary of their arguments and authorities, as well as complete lists of all witnesses (including a summary of their testimony) and all exhibits (including a brief summary of what each exhibit will be offered to prove, and a summary of its contents). Such lists shall be promptly updated as evidence and witnesses are added or deleted. Each party and the commissioner shall within 45 days after the receipt of the petition by the commissioner, or upon such longer period as the hearing officer may allow, produce to all parties and the commissioner all documents related to the matters in controversy, or that are reasonably calculated to lead to the discovery of relevant and material evidence, or that the party intends to offer at the hearing. All parties and the commissioner shall supplement their production within 10 days of discovering documents that meet the foregoing criteria. The scheduling order or other order of the hearing officer may provide such additional discovery as the hearing officer deems fair and appropriate. It is expected that all such discovery shall proceed without the necessity of any request being made to the hearing officer. The hearing officer shall have the right to preclude any testimony or other evidence which, in the hearing officer's opinion, has not been fairly and reasonably disclosed before the hearing.

(1) Any party or the commissioner, if dissatisfied with discovery, may request, in writing, that the hearing officer order another party to provide better or additional discovery. The opposing party shall respond within such time as the hearing officer establishes. The hearing officer may, in the hearing officer's discretion, allow oral argument on discovery disputes.

(2) Discovery orders of the hearing officer are not appealable, but may form the basis of an appeal of the decision of the commissioner in the matter.

B. Upon the hearing officer's own initiative, or at the request of the commissioner, or a petitioner or respondent, the hearing officer may, in the hearing officer's discretion, require scheduling, settlement, or such other conferences at the principal offices of the state land office, or at any other location deemed best by the hearing officer.

C. Pursuant to the scheduling order, the hearing officer may permit or limit such motions, responses, and replies as are normally permitted in the state district courts of New Mexico. Except as set out herein, any procedures regarding such motion practice shall be established by the hearing officer on the hearing officer's own or at the request of the commissioner or the parties. As to motions which dispose of all or part of the merits of any claim at issue, the hearing officer shall make a recommendation by written report to the commissioner who shall make a final determination. Except in rare cases and for good cause shown, the disposition of any motion is not subject to interlocutory appeal; the disposition of any motion is appealable only when the contest is concluded by a decision of the commissioner.

[19.2.15.12 NMAC - N, 6/30/2004; A, 6/11/2019]

19.2.15.13 WITNESSES:

A. Within such time as the hearing officer establishes in the scheduling order, each party may obtain from the hearing officer a subpoena for the attendance of all material witnesses at depositions or hearings. Consistent with applicable law or court rules, the hearing officer may charge a fee for the issuance of each such subpoena, and may establish fees for the attendance of witnesses.

B. The hearing officer may, on the hearing officer's own or at the request of any party or the commissioner, exclude witnesses for the hearing during the testimony of other witnesses or at any other time deemed proper or expedient.

C. All witnesses shall testify under oath.

D. The hearing shall proceed as scheduled without the attendance of a witness or a party if no prior notification of absence and request for an extension of time was received.

E. The testimony of a witness or party unable to attend may be preserved by deposition. The hearing officer may, if the hearing officer deems it helpful, accept affidavits of witnesses unable to attend, but will weigh their probative value as such.

[19.2.15.13 NMAC - Rp, 19.2.15.14 NMAC, 6/30/2004; A, 6/11/2019]

19.2.15.14 HEARING PROCEDURE:

A. In conducting the hearing, the hearing officer shall refer to, but shall not be bound by, the then current district court rules regarding procedure and evidence. Evidence not admissible under those rules may be admitted by the hearing officer if the hearing officer reasonably believes such admission will help in providing or clarifying relevant facts without substantially prejudicing the rights of any party. In particular, hearsay evidence may be admitted by the hearing officer, but shall not form the sole basis for the hearing officer's recommendations. The hearing officer may require any evidence to be submitted in writing. Decisions of the hearing officer regarding matters of evidence or procedure are not, in themselves, final or appealable decisions, but may form the basis for appealing a decision of the commissioner.

B. There shall be a formal written record of a contest. The commissioner shall, at the time of appointment of a hearing officer, appoint a state land office employee to act as the hearing officer's clerk, who shall receive and file all elements of the record. The hearing officer shall designate a court reporter to record the hearing.

C. Unless otherwise indicated by the hearing officer, the order of proceedings shall be as follows:

(1) In a case initiated by a show cause order, the commissioner shall present the commissioner's case first: opening statements by the commissioner, the respondent(s), and any intervenors, in that order; presentation of evidence by the commissioner in support of the validity of the proposed action or actions forming the basis of the show cause order; presentation of evidence by the respondent(s) in support of the status quo; and presentation of evidence by any intervenors in support of their position, in that order; and closing arguments by the commissioner, the respondent, and any intervenors, in that order.

(2) In a contest initiated by petition, the petitioner shall present the petitioner's case first: opening statements by the petitioner, the respondent, any intervenors, and the commissioner, in that order; presentation of evidence in support of any defense, claim, or counterclaim and any rebuttal evidence by the petitioner, the respondent, any intervenors, and the commissioner, in that order; and closing arguments by the petitioner, respondent, any intervenors, and the commissioner, in that order.

D. At any point in the contest hearing, the hearing officer may initiate questions, may request that the commissioner, petitioner(s) or respondent(s) provide briefing on an

issue or take any other action deemed necessary to expedite the proceeding and to obtain a full understanding of the facts and the issues.

E. In a contest initiated by a show cause order, there shall be no initial burden of proof, and the recommendation of the hearing officer shall be based on a preponderance of the evidence supporting either the action or actions proposed to be taken by the commissioner, or supporting the status quo prior to the issues raised in the show cause order. In a contest initiated by petition, the burden of proof shall be upon any party asserting a claim, cross claim, or counterclaim, and the recommendation of the hearing officer shall be based upon a preponderance of the evidence offered in support or rebuttal of any such claim, cross claim, or counterclaim.

[19.2.15.14 NMAC - N, 6/30/2004; A, 6/11/2019]

19.2.15.15 COSTS AND FEES:

A. Each participant in a contest proceeding, excluding the commissioner, shall be required, upon their first filing, to pay a non-refundable filing and processing fee as set forth in the schedule of fees.

B. At the earliest practicable date, the hearing officer shall obtain from each participant in the contest an estimate of time needed to present their part of the proceeding. Based on such estimates, the hearing officer will determine the cost of producing a record of the proceedings, and, if applicable, the fee or salary for the hearing officer's time to conduct the proceeding. At any time prior to or following the hearing, the hearing officer may determine that additional costs are necessary if it becomes evident that more time has been, or will be required to conclude the proceeding. Each party except the state land office will be required to pay, as a deposit, the amount of all costs assessed by the hearing officer in order to attend the proceeding and to have their arguments and evidence considered.

(1) A party who prevails upon all issues shall be entitled to the return of their full deposit. If they prevail in part, their deposit shall be returned in proportion to the number of claims, counterclaims, and cross claims upon which they prevailed.

(2) The deposit amount remaining after a return of funds to the prevailing party, or parties, shall be first applied to all applicable costs, with the balance of each deposit returned to each losing party in proportion to the number of claims, counterclaims or cross claims upon which they did not prevail.

(3) The determination of the proportions set out in paragraphs one (1) and two (2) above shall be discretionary with the hearing officer.

C. The hearing officer may, upon a satisfactory showing of inability to pay on the record, permit that party to proceed with reduced or no costs, and absorb those unpaid costs, to the extent not covered by a retained deposit, as an administrative expense.

D. Each party shall bear their own costs and fees in bringing or defending a contest.

[19.2.15.15 NMAC - N, 6/30/2004; A, 6/30/2016]

19.2.15.16 ALTERNATIVE DISPUTE RESOLUTION:

At any time during the pendency of a contest proceeding, the parties or the commissioner may, by agreement, and upon providing written notice of the agreement to the hearing officer, elect to use any form of alternative dispute resolution. Upon receipt of such notice, the hearing officer will, as required by the agreement of the parties, terminate or stay any further actions or proceedings. Any final result achieved through alternative dispute resolution shall, if agreed to by the parties and the commissioner, be made binding on all by a decision of the commissioner and shall be non-appealable except as otherwise provided by law.

[19.2.15.16 NMAC - N, 6/30/2004]

19.2.15.17 DECISION OF THE COMMISSIONER:

A. At the conclusion of the hearing, all parties and the commissioner shall leave with the hearing officer such items of evidence as the hearing officer requires.

B. At the conclusion of the hearing, the hearing officer may require such post-hearing pleadings and submissions as the hearing officer deems appropriate.

C. At the conclusion of the hearing, the hearing officer shall indicate the time within which a final report shall be made.

D. The hearing officer's final report shall be provided to all parties and to the commissioner.

E. Upon receipt of the hearing officer's final report, the commissioner shall, within a reasonable time, issue an order adopting, modifying, or rejecting that report. This order shall be the decision of the commissioner, and as such, it shall contain a grant or denial of the relief requested and a statement of the legal and factual basis for the order.

F. The decision of the commissioner will be filed in the lease file or other pertinent official record of the New Mexico state land office.

G. Each party, and each other person who has requested a copy, shall, after the decision of the commissioner is filed, be provided with a copy of the decision of the commissioner along with a statement of the requirements for appealing the order.

[19.2.15.17 NMAC - Rp, 19.2.15.15 NMAC, 6/30/2004; A, 6/11/2019]

19.2.15.18 APPEAL:

A. Appeal of the commissioner's decision in a contest shall be as provided in Section 39-3-1.1 NMSA 1978. In such an appeal, the appealing party shall be named as appellant, and the commissioner and other parties shall be named as appellees. The style of such appeal shall be, for example in the case of a contest over a grazing lease, *In Re State Land Office Grazing Lease GX-0000*.

B. Failure to perfect an appeal of a decision of the commissioner within the time allowed by and pursuant to Section 39-3-1.1 NMSA 1978 results in that decision becoming final, binding and non-appealable.

[19.2.15.18 NMAC - Rp, 19.2.15.16 NMAC, 6/30/2004]

PART 16: RULEMAKING PROCEDURES

19.2.16.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501.

[19.2.16.1 NMAC - Rp 19 NMAC 2. SLO 16.1, 7/31/2002]

19.2.16.2 SCOPE:

This rule governs the promulgation, amendment, and repeal of rules for the administration of the lands, resources, and assets held in trust by the commissioner of public lands under the terms of the Enabling Act and subsequent legislation. If any provision of this rule is inconsistent with any specific statutory procedures that govern rulemakings conducted by the commissioner, the specific statutory procedures shall apply.

[19.2.16.2 NMAC - Rp 19 NMAC 2. SLO 16.2, 7/31/2002]

19.2.16.3 STATUTORY AUTHORITY:

N.M. Const., art. XIII, section 2, and in Section 19-1-1 *et seq.* NMSA 1978.

[19.2.16.3 NMAC - Rp 19 NMAC 2. SLO 16.3, 7/31/2002]

19.2.16.4 DURATION:

Permanent.

[19.2.16.4 NMAC - Rp 19 NMAC 2. SLO 16.4, 7/31/2002]

19.2.16.5 EFFECTIVE DATE:

July 31, 2002.

[19.2.16.5 NMAC - Rp 19 NMAC 2. SLO 16.5, 7/31/2002]

19.2.16.6 OBJECTIVE:

The objective of this rule is to provide for the orderly and lawful promulgation, amendment, and repeal of rules for the administration of state trust lands.

[19.2.16.6 NMAC - Rp 19 NMAC 2. SLO 16.6, 7/31/2002]

19.2.16.7 DEFINITIONS:

As used in this rule:

A. "commissioner" means the commissioner of public lands; the commissioner is the executive officer of the state land office and may delegate to state land office staff the performance of duties required of the commissioner under this rule;

B. "rule" means any written rule, regulation or standard, and any written amendment or repeal of a rule, regulation or standard, issued or promulgated by the commissioner and binding persons other than the commissioner or the employees of the state land office, but does not include:

(1) statements, policies, procedures, or directives concerning only internal management of the state land office and not binding lessees, applicants, or the public generally;

(2) rulings or decisions of the commissioner in proceedings authorized by law regarding individual leases;

(3) actions of the commissioner in regard to individual leases, contracts, grants, or other instruments executed by the commissioner; and

(4) any applications, forms, schedules of fees or any guidance documents issued by the commissioner to implement the rules of the commissioner unless such documents are required by law to be included in a rule;

C. "rulemaking record" means all materials received or generated by the commissioner during a rulemaking proceeding, including but not limited to:

(1) the public notice and any documents related to the publication or posting of the public notice;

(2) the proposed rule or rule change;

- (3) any written comments submitted during the comment period;
- (4) any record (audio tape, video tape or stenographic) of the public hearing, if any, on the proposed rule;
- (5) any reports or other documents prepared or submitted by state land office staff regarding the proposed rule; and
- (6) the commissioner's order promulgating the rule;

D. "state land office" means the New Mexico state land office; and

E. "State Rules Act" means the State Rules Act codified at Chapter 14, Article 4 NMSA 1978, and any amendments thereof, and any rules adopted pursuant to that act.

[19.2.16.7 NMAC - Rp 19 NMAC 2. SLO 16.7, 7/31/2002]

19.2.16.8 PUBLIC REQUESTS FOR RULEMAKING:

Any interested person may request in writing that the commissioner promulgate, amend, or repeal a rule. Within 120 days of receipt of the written request, the commissioner shall either initiate formal proceedings to consider the proposed rule or issue to the individual making the request, a written statement of the commissioner's reasons for denial of the request.

[19.2.16.8 NMAC - Rp 19 NMAC 2. SLO 16.14, 7/31/2002; A, 6/11/2019]

19.2.16.9 COMMENT PERIOD:

No rule shall be adopted by the commissioner until after the commissioner provides public notice and a period for public comment of not less than thirty days, except as provided in this rule for emergency rules.

[19.2.16.9 NMAC - Rp 19 NMAC 2. SLO 16.9, 7/31/2002]

19.2.16.10 NOTICE OF RULEMAKING:

Notice that the commissioner intends to promulgate, amend, or repeal a rule shall be given by publication in the New Mexico register, by publication in at least one newspaper of general circulation in the state, and by posting on a website controlled or authorized by the commissioner. The notice shall state generally the subject of the proposed rulemaking, the manner in which interested persons may submit written comments and, if appropriate, the time and place of any public hearing. The notice may allow comments to be submitted by electronic mail. The notice shall also state where copies of the proposed rule may be obtained by interested persons. Individual notice of

rulemaking to all state lessees, contract holders, or grantees shall not be necessary, unless as may be otherwise required by law.

[19.2.16.10 NMAC - Rp 19 NMAC 2. SLO 16.10, 7/31/2002]

19.2.16.11 RULEMAKING HEARINGS:

In the commissioner's discretion or as may be required by law, the commissioner may set a public hearing to allow comments on a proposed rule. Notice of such hearing shall be made as provided in 19.2.16.10 NMAC and shall be published and posted no less than 30 days prior to the date of the hearing. At such hearing the commissioner shall allow all interested persons, or groups of persons, reasonable opportunity to present written materials, present oral comments on the proposed rule, present questions, and to examine witnesses. State land office staff may appear at the hearing and present testimony and answer questions from the public. If the commissioner determines that oral presentation or the examination of witnesses is unnecessary or impractical, the commissioner may require that the presentation be submitted in writing and establish limitations on the examination of witnesses. At the hearing, all interested persons shall have the opportunity to review all documents or other pertinent information prepared in advance of the hearing. The commissioner may designate a hearing officer to conduct the public hearing. In the commissioner's discretion, the commissioner may keep the rulemaking record open for a reasonable period of time after the hearing to receive further written materials.

[19.2.16.11 NMAC - Rp 19 NMAC 2. SLO 16.11, 7/31/2002; A, 6/11/2019]

19.2.16.12 CONSIDERATION OF THE RECORD; ORDER PROMULGATING RULE:

After the close of the comment period, the commissioner shall consider the contents of the rulemaking record. If the commissioner adopts a rule, the commissioner shall, prior to the effective date of the rule, enter an order. The order shall include a concise statement of the commissioner's principal reasons for promulgating the rule and a statement of the major comments adopted or rejected in promulgating the rule and the reasons for their adoption or rejection. A copy of the commissioner's order shall be sent to all persons who submitted written comments and provided an address, and if a public hearing was held, all persons who were present at the hearing, as reflected on the attendance list. Individual notice of the order to state lessees, contract holders, or grantees shall not be necessary unless otherwise provided by law.

[19.2.16.12 NMAC - Rp 19 NMAC 2. SLO 16.15, 7/31/2002]

19.2.16.13 EFFECTIVE DATE OF RULES:

Upon promulgation of a rule by the commissioner, the rule shall be posted in the state land office for the period required by law, if any, and filed as required by the State Rules

Act. A rule shall be effective upon publication in the New Mexico register, unless a later date is specified by the commissioner.

[19.2.16.13 NMAC - Rp 19 NMAC 2. SLO 16.12, 7/31/2002]

19.2.16.14 EMERGENCY RULES:

If the commissioner determines that an emergency exists which requires immediate action, the commissioner may promulgate, amend, or repeal a rule and post the rule in the state land office for any minimum statutory period and thereafter file the rule as required by the State Rules Act. The rule shall be effective immediately upon filing. An emergency rule shall be designated as such in the text of the rule and shall include a statement of the necessity for the emergency need for the rule. No emergency rule shall continue in effect longer than 30 days unless within that time period the rule is published in the New Mexico register and the commissioner commences proceedings to adopt the rule under the general provisions of this rule. If the commissioner commences such proceedings the emergency rule shall remain in effect until a permanent rule takes effect or until the proceedings are otherwise complete. In no event shall an emergency rule remain in effect for more than 120 days.

[19.2.16.14 NMAC - Rp 19 NMAC 2. SLO 16.13, 7/31/2002; A, 6/11/2019]

PART 17: GEOPHYSICAL EXPLORATION ON UNLEASED STATE TRUST LANDS

19.2.17.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501.

[19.2.17.1 NMAC - N, 9/14/2000]

19.2.17.2 SCOPE:

Future geophysical exploration permits of state trust lands, excluding exploration for minerals which may be leased under 19.2.17 NMAC. This part does not apply to geophysical exploration related to oil and gas operations on trust lands that are currently under an oil and gas lease in good standing; any geophysical exploration on those lands shall be conducted under the terms of the existing oil and gas lease.

[19.2.17.2 NMAC - N, 9/14/2000]

19.2.17.3 STATUTORY AUTHORITY:

N.M. Const. Art. XIII; NMSA 1978 Section 19-10-1.

[19.2.17.3 NMAC - N, 9/14/2000]

19.2.17.4 DURATION:

Permanent.

[19.2.17.4 NMAC - N, 9/14/2000]

19.2.17.5 EFFECTIVE DATE:

September 14, 2000, unless a later date is cited at the end of a section.

[19.2.17.5 NMAC - N, 9/14/2000; A, 6/30/2016]

19.2.17.6 OBJECTIVE:

The objective of this part is to provide the general terms and conditions for the geophysical exploration of state trust lands.

[19.2.17.6 NMAC - N, 9/14/2000]

19.2.17.7 DEFINITIONS:

A. "Commissioner" means the New Mexico commissioner of public lands, and the commissioner's appointees under Section 19-1-7 NMSA 1978 acting within the scope of their authority. Except for the decision to cancel or otherwise terminate a lease, the commissioner may delegate to state land office staff the performance of functions required of the commissioner under this part.

B. "Geophysical exploration" means the quantitative physical study of the earth by reflection and refraction seismic (including dynamite sources), gravity, magnetic, electrical, electromagnetic or radiation methods.

C. "Geophysical exploration permit" or "permit" means a permit approved by the commissioner for geophysical exploration of trust lands.

D. "Schedule of fees" means a list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

E. "State land office" means the New Mexico state land office.

F. "Trust" means the trust created by congress under the New Mexico Enabling Act of June 20, 1910, and accepted by the state of New Mexico under Articles XIII and XIV of the New Mexico constitution.

G. "Trust lands" means those lands, their natural products and all assets derived from them, which are under the care, custody and control of the commissioner.

[19.2.17.7 NMAC - N, 9/14/2000; A, 6/30/2016; A, 6/11/2019]

19.2.17.8 PROHIBITION:

Notwithstanding the issuance of a geophysical exploration permit, no person shall conduct any geophysical activity or associated surveys on trust lands unless the activity is conducted in conformity with all applicable local, state, and federal laws and regulations, and all necessary permits have been obtained.

[19.2.17.8 NMAC - N, 9/14/2000]

19.2.17.9 LANDS SUBJECT TO A GEOPHYSICAL EXPLORATION PERMIT:

Geophysical exploration permits are required on all trust lands on which there is no valid existing oil and gas lease, specifically:

A. On all trust lands in which both the surface and mineral estate are held in trust, even if other surface leases are in existence.

B. On all trust lands in which only the mineral estate is held in trust. Such permit will allow the permittee to conduct geophysical investigations throughout the mineral estate; however, any access to the surface estate will be coordinated between the permittee and the surface owner.

C. On all trust lands in which only the surface estate is held in trust, even if other surface leases are in existence. Such permit will allow the permittee physical access to the surface for the purpose of conducting geophysical investigations; however, any access to the mineral estate shall be coordinated between the permittee and the mineral estate owner.

[19.2.17.9 NMAC - N, 9/14/2000]

19.2.17.10 APPLICATION FOR A PERMIT:

A. Applicants for a geophysical exploration permit must contact the oil, gas and minerals division of the state land office in Santa Fe to verify that the trust lands of interest are available to permit. Interested applicants shall then submit a complete application for permit on forms prescribed and furnished by the commissioner, and shall include, without limitation, the following:

(1) A check made payable to the commissioner for the appropriate fees in accordance with the schedule of fees adopted by the commissioner. Fees will be assessed for each individual or portion of a geophysical exploration line considered as a single entry, and will reflect rates according to trust surface and mineral ownership and locations within restricted districts or unrestricted areas as determined by the commissioner;

(2) A topographic map of suitable scale, identified by county, township, range and section, showing the approximate location of all survey lines which are proposed to cross the applicable trust lands. The map shall be verified as to correctness by the applicant or the applicant's duly authorized representative; and,

(3) A proposed survey operations plan which shall include, without limitation, a description of the methods to be used in conducting the survey, a description of equipment to be used, a description of ingress and egress locations and a spill prevention and control plan.

B. When the proposed survey method will include the use of explosives, the application for a geophysical exploration permit shall also include the following:

(1) A topographic map showing shot hole patterns, depth of shot hole, size of charge and location in relation to buildings, wells, roads, pipelines, power lines, drainages and any other cultural feature; and

(2) Contingency plans for control and mitigation of blowouts and unexploded shot holes.

[19.2.17.10 NMAC - N, 9/14/2000; A, 6/11/2019]

19.2.17.11 PERMIT ISSUANCE:

A. If the commissioner approves an application and determines that a permit will be in the best interest of the trust, a geophysical exploration permit will be issued. The application documents will be incorporated into the permit by reference and the provisions of the approved application documents will be enforceable in the same manner as any other condition of the permit. Any changes to operations approved under a permit must be approved in advance in writing by the commissioner.

B. Following approval of an application, the commissioner shall prepare a geophysical exploration permit in accordance with this part, in duplicate, and mail the two originals to the applicant. If the applicant agrees to all terms and conditions of the proposed permit, the applicant shall sign the originals before a notary public and return both originals to the commissioner. The commissioner shall thereafter approve and execute the geophysical exploration permit and return one fully executed original to the permittee.

[19.2.17.11 NMAC - N, 9/14/2000]

19.2.17.12 PERMIT TERMS AND CONDITIONS:

A. The permit shall be valid for 90 days from the date of its approval by the commissioner; provided, that an extension may be approved by the commissioner upon a showing by the permittee that reasonable work delays occurred because of conditions beyond the permittee's control.

B. No later than 150 calendar days after the expiration date of a permit, the permittee shall furnish to the commissioner, a map of suitable scale, identified by county, township, range and section, showing the location and depth of shot holes or station points on the permitted land. This map shall include the locations of source (vibrator) lines and receiver lines. The map shall be of a quality sufficient to enable visual inspection of the permitted lands after the project is completed. The map shall be verified as to correctness by the permittee or the permittee's duly authorized representative.

C. Source lines and receiver lines shall be no greater than 100 feet in width.

D. Motorized vehicles are not allowed off established ranch roads or off the permitted and surveyed source and receiver lines. The commissioner will allow limited and reasonable drive-arounds when justified and located on submitted updated maps. Areas between the permitted survey lines are not permitted and entry thereon will be considered trespass, which may result in cancellation of a permit.

E. The permittee shall at all times keep the permit area free and clear of trash and debris resulting from the permittee's occupation of the lands. Hazardous or toxic wastes or petroleum products may not be disposed of on the permit premises, and all such materials used in the operations must be removed from the permitted land prior to expiration of the permit. Due care shall be used to prevent leaks and spills of such materials; the clean-up of any spills and reclamation of the area shall be performed in consultation with the commissioner.

F. Unless authorized by the commissioner in writing, a permit does not authorize the use of trust lands for operation staging areas or for vehicle maintenance yards.

G. No access is granted to trust lands for any purpose without valid permits or agreements. Copies of permits and agreements must be in the possession of any representatives or subcontractors of geophysical permittees at all times when on trust lands. State land office representatives may order an immediate shut-down of operations until proof of a valid permit or agreement is on site.

H. Permits may contain specific requirements for reclamation, such as bank stabilization for watercourses and road repair.

I. The permittee shall comply with all applicable laws, regulations, rules, ordinances and requirements of city, county, state and federal authorities and agencies, in all matters and things affecting the permit area and operations, including but not limited to conservation, sanitation, aesthetics, pollution, cultural properties, fire and ecology.

[19.2.17.12 NMAC - N, 9/14/2000; A, 6/11/2019]

19.2.17.13 RECLAMATION AND RESTORATION:

Any person who enters upon trust lands for purposes of geophysical exploration shall take all steps necessary to preserve and protect the natural environmental conditions of such lands. The permittee shall remove all stakes, markers, cables, ropes, wires or debris from disturbed areas, and shall restore and reclaim all areas disturbed by the permittee's operations at the conclusion of the operations, in accordance with the approved permit and standards established by the commissioner.

[9.2.17.13 NMAC - N, 9/14/2000; A, 6/11/2019]

19.2.17.14 FINANCIAL ASSURANCE:

A. Improvements; Waivers. Before commencement of geophysical exploration activity, the permittee shall execute and provide financial assurance to secure payment for potential injuries to tangible improvements upon the permitted area that may result from a permittee's activity. The commissioner shall fix the amount of such financial assurance in an amount not less than five thousand dollars (\$5,000.00) for each section or portion of a section of trust lands covered by the permit. The financial assurance instrument shall be in favor of the state, but held for the benefit of the state's contract purchasers, patentees, and surface lessees with pre-existing rights within the permitted area. Provided that, in lieu of said financial assurance, the commissioner may accept a waiver of financial assurance, duly executed or acknowledged by the owners of all improvements in the permitted land.

B. Blanket Bonds. The permittee may, with the approval of the commissioner, provide one instrument ("megabond") to cover financial assurance requirements under multiple permits or other instruments that authorize the permittee to enter trust lands. The commissioner shall fix the amount of the megabond, which shall be no less than twenty-five thousand dollars (\$25,000.00).

C. Reclamation Bonds. Notwithstanding the provision of financial assurance under this part, the commissioner may require a permittee to provide for additional financial assurance to guarantee performance of reclamation requirements promulgated under state land office rules.

D. Form of Financial Assurance Instruments. Forms for all financial assurance instruments shall either be prescribed and furnished by the commissioner, or be in a form approved by the commissioner. Self-insurance, in any form, shall not be allowed.

[19.2.17.14 NMAC - N, 9/14/2000]

19.2.17.15 SURFACE LESSEES:

A. Fees paid to the commissioner pursuant to this part for permits to conduct geophysical exploration on lands in which the surface is held in trust are consideration for access to use the surface for reasonable geophysical activity. State land office surface lessees are not entitled to compensation from permittees for access across trust land.

B. Permittees must settle with and compensate state land office surface lessees for actual damage to or loss of livestock, authorized improvements, range, crops, and other valid existing rights recognized by law.

[19.2.17.15 NMAC - N, 9/14/2000]

PART 18: RELATING TO STATE LAND TRUSTS ADVISORY BOARD

19.2.18.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501, Phone: (505) 827-5713.

[19.2.18.1 NMAC - Rp, 19.2.18.1 NMAC, 06/30/16]

19.2.18.2 SCOPE:

This rule pertains to the working relationship between the commissioner of public lands and the state land trusts advisory board.

[19.2.18.2 NMAC - Rp, 19.2.18.2 NMAC, 06/30/16]

19.2.18.3 STATUTORY AUTHORITY:

The commissioner's authority to manage the state trust lands is found in Article 13, Section 2 of the constitution of New Mexico, and in 19-1-1 NMSA 1978. The authority to promulgate this rule is found in 19-1-2 NMSA 1978. Provisions authorizing the state land trust advisory board are found in 19-1-1.1 through 19-1-1.4 NMSA 1978.

[19.2.18.3 NMAC - Rp, 19.2.18.3 NMAC, 06/30/16]

19.2.18.4 DURATION:

Permanent.

[19.2.18.4 NMAC - Rp, 19.2.18.4 NMAC, 06/30/16]

19.2.18.5 EFFECTIVE DATE:

June 30, 2016, unless a later date is cited at the end of a section.

[19.2.18.5 NMAC - Rp, 19.2.18.5 NMAC, 06/30/16]

19.2.18.6 OBJECTIVE:

The objective of 19.2.18 NMAC is to provide for the orderly and productive working relationship between the commissioner of public lands and the state land trusts advisory board.

[19.2.18.6 NMAC - Rp, 19.2.18.6 NMAC, 06/30/16]

19.2.18.7 DEFINITIONS:

[RESERVED]

[19.2.18.7 NMAC - Rp, 19.2.18.7 NMAC, 06/30/16]

19.2.18.8 POLICY AND MEETINGS:

It is the policy of the commissioner of public lands to provide the state land trusts advisory board with all information requested by the board regarding the policies and procedures, rules, and financial information of the New Mexico state land office. The commissioner shall cooperate with the board, which shall provide advice and assistance to the commissioner in protecting and maintaining the assets and resources of the state trust lands, and in maximizing the income from trust assets, as mandated by the constitution of New Mexico, the Enabling Act, and by state statute.

A. The commissioner and staff shall hold at least one meeting per year jointly with the state land trusts advisory board and the administrative head or designee of the beneficiary institutions. At this annual meeting, the commissioner shall inform and discuss the plans, goals, objectives, budget, revenue projections, asset management issues, and all other pertinent information regarding the state land trusts.

B. At least two times per year (in addition to the annual joint meeting with the state land trusts advisory board and beneficiaries), the commissioner shall meet with the board. The non-beneficiary board meetings shall be held when called by the chairman of the board, a majority of board members, or at the request of the commissioner. Board members may choose to participate in properly noticed meetings by telephone or other similar communications equipment, but only when attendance in person is difficult or impossible. Each board member participating by telephone or other similar equipment must be identified when speaking, all board members must be able to hear each other at the same time and hear any speaker, and members of the public attending the meeting must be able to hear any board member.

C. No action of the board is binding on the commissioner, who alone has the constitutional and fiduciary responsibility as trustee for the trusts.

[19.2.18.8 NMAC - Rp, 19.2.18.8 NMAC, 06/30/16]

19.2.18.9 REPORTS:

Upon the call of a meeting with the board, the commissioner shall appear before the board to review and report on the policies and practices of the commissioner, which may include proposed land exchanges, fee setting matters, proposed land sales, litigation, rules, or other matters, at the commissioner's discretion.

[19.2.18.9 NMAC - Rp, 19.2.18.9 NMAC, 06/30/16]

19.2.18.10 ADMINISTRATIVE SUPPORT:

A. The commissioner shall assist the board with a secretary. The secretary shall keep minutes of all board meetings, retain custody of board records, and carry out such further duties customary of the office of secretary.

B. The commissioner shall provide written notice of regular meetings to board members at least three weeks prior to the meeting. A final written agenda prepared by the commissioner shall be available on the commissioner's webpage and posted in the commissioner's office at least 72 hours prior to the meeting.

[19.2.18.10 NMAC - Rp, 19.2.18.10 NMAC, 06/30/16]

PART 19: RELATING TO RECREATIONAL AND EDUCATIONAL ACCESS TO STATE TRUST LANDS

19.2.19.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, Santa Fe, New Mexico 87501; or, P.O. Box 1148, Santa Fe, New Mexico 87504-1148, Phone: (505) 827-5713.

[19.2.19.1 NMAC – Rp, 19.2.19.1 NMAC, 12/13/13]

19.2.19.2 SCOPE:

This rule governs recreational and educational access to state trust lands open to such access and assures that recreational and educational access are conducted in a manner consistent with the purposes of the trust.

[19.2.19.2 NMAC – Rp, 19.2.19.2 NMAC, 12/13/13]

19.2.19.3 STATUTORY AUTHORITY:

The commissioner's authority to manage the state trust lands is found in N.M. Const., Art. XIII, Section 2, and in Section 19-1-1 NMSA 1978. The authority to promulgate this rule is found in Section 19-1-2 NMSA 1978.

[19.2.19.3 NMAC – Rp, 19.2.19.3 NMAC, 12/13/13]

19.2.19.4 DURATION:

Permanent.

[19.2.19.4 NMAC – Rp, 19.2.19.4 NMAC, 12/13/13]

19.2.19.5 EFFECTIVE DATE:

December 13, 2013 unless a later date is cited at the end of a section.

[19.2.19.5 NMAC – Rp, 19.2.19.5 NMAC, 12/13/13]

19.2.19.6 OBJECTIVE:

The objective of 19.2.19 NMAC is to provide for the orderly and lawful use of state trust lands open to recreational and educational access.

[19.2.19.6 NMAC – Rp, 19.2.19.6 NMAC, 12/13/13]

19.2.19.7 DEFINITIONS:

As used in this rule, the following terms shall have the meaning here indicated:

A. "Commissioner" - the commissioner of public lands or any agent or employee of the commissioner who is authorized to act in the commissioner's stead.

B. "Recreational access" - access to state trust lands open to recreational and educational access described in Subsection D of 19.2.19.7 NMAC for the purpose of conducting non-commercial permitted activities thereon.

C. "Permitted activities" - those activities on lands open to recreational access that are authorized by the issuance of a recreational access permit and are not prohibited under 19.2.19.18 NMAC. Permitted activities include, but are not limited to, such activities as hiking, sightseeing, picnicking, observing wildlife, non-commercial pinon nut gathering, photographing, and cross country skiing.

D. "Lands open to recreational access" - those lands, other than lands leased under a New Mexico state land office business lease, that are identified by the surface tract

books of the New Mexico state land office as in the care, custody, and control of the commissioner, that have not been withdrawn from recreational access by the commissioner, and on which no oil and gas operations or mining operations are being conducted.

E. "Recreational access permit" - an instrument issued by the commissioner that authorizes recreational access by the recreational access permittee and a certain number of persons accompanying the permittee. A recreational access permit shall be valid only in the possession of the recreational access permittee and shall be rendered invalid by its transfer to another. Recreational access permits shall be of two types:

(1) "Individual/family permit" - a recreational access permit issued to a recreational access permittee that authorizes recreational access by the permittee and all family members (not to exceed 10 other persons) in the company of the permittee. The permit shall be valid for one year from the date of issuance, such term to apply retroactively to any individual/family permit issued during the 12-month period prior to the effective date of this rule.

(2) "School/educational permit" - a recreational access permit issued to a recreational access permittee who is the teacher, leader, or sponsor of a school class or educational group, that authorizes recreational access by the permittee and no more than 50 members of the permittee's school class or educational group for up to three days. The permit shall be valid from sunrise to sunset for one to three consecutive calendar days.

F. "Recreational access permittee" - any person 18 years old or older to whom or in whose name a recreational access permit is issued.

G. "Established road" - A road built or maintained by equipment, and which shows no evidence of being closed to vehicular traffic by such means as berms, ripping, scarification, reseeding, fencing, gates, barricades, or posted closures. In addition, this includes observable two-track roads. A two-track road is one which shows use for purposes such as recreation, mining, logging, or ranching, and which shows no evidence of being closed to vehicular traffic by such means as berms, ripping, scarification, reseeding, fencing, gates, barricades, or posted closures.

[19.2.19.7 NMAC – Rp, 19.2.19.7 NMAC, 12/13/13]

19.2.19.8 WITHDRAWAL OF LANDS FROM RECREATIONAL ACCESS:

The commissioner, in the commissioner's sole discretion, may at any time withdraw any state trust lands from recreational access if the commissioner determines that such withdrawal is in the best interests of the trust. Any lands so withdrawn shall remain unavailable for recreational access until the commissioner, in the commissioner's sole discretion, determines that the availability of the lands for recreational access is in the best interests of the trust.

[19.2.19.8 NMAC - Rp, 19.2.19.8 NMAC, 12/13/13; A, 6/11/19]

19.2.19.9 RECREATIONAL ACCESS PROHIBITED WITHOUT A PERMIT:

Recreational access to state trust lands is prohibited in the absence of a recreational access permit issued pursuant to this rule or other express, written authorization from the commissioner. Access in accordance with an easement issued to the New Mexico state game commission does not require an additional recreational access permit or other express, written authorization. A person engaged in recreational access in accordance with this rule shall, upon request by a state land office employee or lessee, present the person's written authorization for inspection.

[19.2.19.9 NMAC – N, 12/13/2013; A, 6/11/2019]

19.2.19.10 INTERFERENCE WITH LAWFUL RECREATIONAL ACCESS:

No lessee or other person shall interfere with lawful recreational access permitted in accordance with this rule. The lessee of the subject state trust lands may, without such interference, make inquiry concerning the status of those using state lands.

[19.2.19.10 NMAC – N, 12/13/13]

19.2.19.11 PERMIT APPLICATION AND FEES:

Applications for recreational access permits shall be written in ink upon forms prescribed by the commissioner and shall contain information the commissioner deems appropriate, or applications shall be submitted electronically if allowed by the commissioner's web site. Each application shall be accompanied by the appropriate fees as posted on the web site from time to time, which shall be non-refundable, and which are subject to change without notice. The commissioner reserves the right to reject any and all applications if the commissioner determines such rejection is in the best interests of the trust.

[19.2.19.11 NMAC – Rp, 19.2.19.9 NMAC, 12/13/13]

19.2.19.12 PERMIT APPLICATION AVAILABILITY:

Applications for recreational access permits may be obtained: 1) by mailing a written request to the commissioner of public lands, New Mexico state land office, P. O. Box 1148, Santa Fe, New Mexico 87504-1148; 2) by telephone, 505-827-5724; 3) on the web site, nmstatelands.org; or, 4) in person at the New Mexico state land office, 310 Old Santa Fe Trail, Santa Fe, New Mexico 87501.

[19.2.19.12 NMAC – Rp, 19.2.19.10 NMAC, 12/13/13]

19.2.19.13 IDENTIFICATION AND LOCATION OF RECREATIONAL ACCESS LANDS:

Recreational access permittees are solely responsible for correctly identifying and locating the lands they seek to visit pursuant to a recreational access permit. Maps are available at the New Mexico state land office at a nominal fee, or they may be obtained from the web site, nmstatelands.org.

[19.2.19.13 NMAC – Rp, 19.2.19.11 NMAC, 12/13/13]

19.2.19.14 TRAVEL:

A recreational access permit does not grant a right to enter upon or cross lands not under the control of the commissioner. Also, a recreational access permit does not grant a right to access lands by motorized vehicle. The use of motorized vehicles or any mechanical form of transportation for recreational access is restricted to public highways and roads, as defined by Section 67-2-1 NMSA 1978, and to established roads that cross the lands to which access is granted under the recreational access permit. When lands open to recreational access are fenced, vehicle access is allowed only where there is an unlocked gate that can be accessed from an immediately adjacent public highway or road, or from an immediately adjacent established road that crosses the lands to which access is granted. When a recreational access permittee opens an unlocked gate to gain access to lands by motorized vehicle, the permittee must close the gate after passing through. Where there is no such access through an unlocked gate in the fence, recreational access beyond the fence shall be limited to travel by foot.

[19.2.19.14 NMAC – Rp, 19.2.19.12 NMAC, 12/13/13]

19.2.19.15 TRESPASS AND WASTE:

Prohibited activities as described in 19.2.19.18 NMAC, on lands open to recreational access are deemed to be in trespass, waste, or both.

[19.2.19.15 NMAC – Rp, 19.2.19.13 NMAC, 12/13/13]

19.2.19.16 LIABILITY:

Each recreational access permittee shall agree, as a condition of permit issuance, to assume all liability for claims, losses or damages arising out of, alleged to arise out of, or indirectly connected with activities conducted during recreational access by the permittee and any and all individuals accompanying the permittee. Each recreational access permittee shall further agree to save, hold harmless, indemnify, and defend from all such liability, claims, losses, or damages lessees of state trust land, the commissioner, and the commissioner's agents and employees in their official and individual capacities.

[19.2.19.16 NMAC – Rp, 19.2.19.14 NMAC, 12/13/13]

19.2.19.17 CANCELLATION:

The commissioner may cancel any recreational access permit by providing oral notice of cancellation to the permittee or by mailing written notice of cancellation to the permittee.

[19.2.19.17 NMAC – Rp, 19.2.19.15 NMAC, 12/13/13]

19.2.19.18 PROHIBITED ACTIVITIES:

A. Those activities that are not allowed on lands open to recreational access include, but are not limited to:

(1) disturbing, harassing, injuring, destroying or removing wildlife, livestock, or any other animal life;

(2) disturbing, dislodging, damaging, destroying or removing native plants, standing timber, wood products, flowers, growing crops, or any other plant life other than pinon nuts gathered non-commercially;

(3) disturbing, dislodging, damaging, defacing, destroying or removing historical, archaeological, paleontological or cultural sites, or artifacts;

(4) disturbing, dislodging, defacing, damaging or destroying any improvement, fixture, item, object, or thing placed or located in, under, or upon the land;

(5) crossing lands not open to recreational access under this rule, without permission, to gain access to state trust lands that are open to recreational access;

(6) conducting off-road vehicle activities;

(7) bringing unrestrained (unleashed) animals to state trust lands;

(8) discarding refuse, waste, or litter of any kind;

(9) building open fires, igniting fireworks, or conducting any other activity that increases the risk of range, brush, or forest fires;

(10) conducting any type of commercial operation;

(11) discharging firearms, camping overnight, opening (without closing) gates;

(12) bringing onto state trust lands or consuming thereon any type of alcoholic beverage;

(13) violating any applicable law, statute, regulation, ordinance, or rule enacted by a governmental entity;

(14) fishing, trapping, or hunting without a valid New Mexico license;

(15) mineral exploration, development, or mining, or collecting valuable rocks or minerals;

(16) interfering with the authorized activities of other land users; or,

(17) entering, climbing, or accessing in any way structures, buildings, fixtures, or improvements other than fences located on state trust lands.

B. Recreational access shall not be exercised in a manner that materially interferes with other authorized uses of state trust lands or valid existing rights, such as agricultural leases or rights-of-way, or in a manner that prevents or limits the commissioner's exercise of the commissioner's constitutional, statutory, or regulatory responsibilities.

C. The commission of a prohibited activity by one who gained access to state trust lands pursuant to a recreational access permit shall render the permit invalid, and shall constitute grounds for the commissioner to deny recreational access to, and to reject permit applications by, any person who gained recreational access pursuant to the invalid permit.

[19.2.19.18 NMAC - Rp, 19.2.19.16 NMAC, 12/13/13; A, 6/11/19]

PART 20: RELATING TO CONSTRUCTION, MAINTENANCE AND RECLAMATION OF ROADS

19.2.20.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501, Phone: (505) 827-5713.

[12/31/99; 19.2.20.1 NMAC – Rn, 19 NMAC 2. SLO 20.1, 09/30/02]

19.2.20.2 SCOPE:

This Rule pertains to the construction, maintenance and reclamation of roads on those lands held in trust by the commissioner of public lands under the terms of the Enabling Act and subsequent legislation. There are certain exceptions to this Rule as follows: certain new temporary roads are exempted as set out below in Subsection A of 19.2.20.9 NMAC.

[12/31/99; 19.2.20.2 NMAC – Rn, 19 NMAC 2. SLO 20.2, 09/30/02]

19.2.20.3 STATUTORY AUTHORITY:

The commissioner's authority to manage the state trust lands is found in N.M. Const., art. XIII, Section 2, and in Section 19-1-1 NMSA 1978. The authority to promulgate this Rule is found in Section 19-1-2 NMSA 1978.

[12/31/99; 19.2.20.3 NMAC – Rn, 19 NMAC 2. SLO 20.3, 09/30/02]

19.2.20.4 DURATION:

Permanent.

[12/31/99; 19.2.20.4 NMAC – Rn, 19 NMAC 2. SLO 20.4, 09/30/02]

19.2.20.5 EFFECTIVE DATE:

November 19, 1990, unless a later date is cited at the end of a section or paragraph. Reformatted in NMAC format effective December 31, 1999.

[12/31/99; 19.2.20.5 NMAC – Rn, 19 NMAC 2. SLO 20.5, 09/30/02]

19.2.20.6 OBJECTIVE:

The objective of 19.2.20 NMAC is to provide for the orderly and lawful construction, maintenance and reclamation of roads on state trust lands.

[12/31/99; 19.2.20.6 NMAC – Rn, 19 NMAC 2. SLO 20.6, 09/30/02]

19.2.20.7 DEFINITIONS:

[RESERVED]

[12/31/99; 19.2.20.7 NMAC – Rn, 19 NMAC 2. SLO 20.7, 09/30/02]

19.2.20.8 PURPOSE AND APPLICATION OF RULE:

This Rule shall apply to all roads constructed on state trust lands administered by the commissioner of public lands (commissioner), and will be effective on the date of its filing with the state records center. This Rule is issued to implement minimum standards for road construction, maintenance, and rehabilitation so as to minimize the impact of roads on the various vegetational ecosystems involved.

[12/31/99; 19.2.20.8 NMAC – Rn, 19 NMAC 2. SLO 20.8, 09/30/02]

19.2.20.9 RULE REQUIREMENTS:

A. All roads constructed on state trust lands administered by the New Mexico state land office shall be constructed and maintained in accordance with this Rule. Roads built on state trust land that will cross adjacent land administered by the bureau of land management (BLM) will be constructed and maintained in concert with the BLM new road policy effective January 1, 1988. Roads built on state trust land only shall be constructed in accordance with the minimum standards described in 19.2.20.10 NMAC and maintained in accordance with the standards described in 19.2.20.11 NMAC, unless local conditions warrant exceptions. Such exceptions shall be approved by the state land office district land use specialist (SLO LUS).

B. Certain new temporary roads are exempted from the construction requirements of this Rule. The roads exempted are those that will provide access for a seasonal or temporary activity and/or for a temporary business use. However, these types of roads are subject to maintenance and/or rehabilitation requirements required by the SLO LUS.

C. Roads built on state trust lands shall be constructed and maintained by a right-of-way grantee in accordance with the requirements set forth in the right-of-way grant if those requirements are different than the requirements of this Rule. Construction and maintenance of these roads will be done in a manner that insures that authorized traffic remains within the right-of-way and erosion damage is mitigated.

D. When roads built on state trust lands are no longer needed, as determined by the lessee or right of way grantee and by the commissioner, they will be abandoned and rehabilitated according to 19.2.20.12 NMAC. However, the New Mexico state land office may determine that such a road is still needed for other purposes, and if so, it shall notify the lessee or grantee in writing of this determination, at which time the lessee or grantee shall be released from all responsibility for maintenance and rehabilitation.

[12/31/99; 19.2.20.9 NMAC – Rn, 19 NMAC 2. SLO 20.9, 09/30/02]

19.2.20.10 ROAD CONSTRUCTION STANDARDS:

A. Width. The preferred minimum standard for roads built on state trust lands is a fourteen (14) -foot width for single-lane roads and a twenty (20) -foot width for double-lane roads, provided that the local situation doesn't dictate that it be wider. The maximum allowable grade without an engineering design is ten percent (10%).

B. Drainage. Drainage control shall be ensured through the use of drainage dips, outsloping, insloping, natural rolling topography, ditch turnouts, or culverts. Spacing of dips, broad-based drainage dips, culverts and turnout ditches will depend on cross slope, road grade and soil type. Drainages will be constructed in such frequency necessary to prevent headcuts or other forms of accelerated erosion or damage on adjacent areas.

C. Culverts. Culvert pipes shall be used for cross drains on grades in excess of ten percent (10%) gradient and on all major drainages. Roadbed culverts shall be used to

drain road ditches when drainage dips are not feasible. All culvert sizing must be in accordance with accepted engineering practices (i.e., Talbot chart, etc.). The minimum size culverts in any installation is eighteen (18) inches.

D. Road Surfacing:

(1) Surfacing (i.e. caliche, gravel, soil stabilizer, sand, cinders, etc.) shall be required on all roads built on state trust lands where all weather access is needed, if the natural soil does not have the bearing capacity for heavy vehicles in both wet and dry weather and if these materials are economically available.

(2) The roadbed should be reasonably smooth, free of ruts, chuckholes, rocks, slides, washboards, dust pockets, soft spots or other driving hazards or nuisances.

E. Cattleguards and Fencing. Cattleguards are required for all fence lines crossing roads built on state trust lands, unless a wire or metal gate is approved by the SLO LUS and surface lessee.

(1) All cattleguard grid designs and foundation designs shall meet AASTHO load rating H-20, although AASTHO U-80 is required where heavy loads exceeding H-20 loading are anticipated.

(2) All cattleguard grids shall meet or exceed the road width, but shall not be less than fourteen (14) feet wide.

(3) Approach ramps (if needed) shall not be less than fifty (50) feet on each side of cattle guards and shall provide smooth transitions.

(4) Gates shall be installed on one (1) side of cattleguards. Gate construction will conform to the specifics set out in 19.2.20.11 NMAC.

(5) Fencing, if required, is to be a four (4) strand barbwire fence with twelve (12) inch spacing between strands.

F. Vegetation. All vegetation removed from roadbeds as a result of construction shall be disposed of by the grantee or lessee, by a method approved by the SLO LUS. Road standards may be modified to meet local conditions. Suggested reference material for road construction and maintenance practices is "Reducing Erosion from Unpaved Rural Roads in New Mexico," published by the New Mexico energy, minerals and natural resources department soil and water conservation bureau.

[12/31/99; 19.2.20.10 NMAC – Rn, 19 NMAC 2. SLO 20.10, 09/30/02]

19.2.20.11 ROAD MAINTENANCE STANDARDS:

"Maintenance" is the upkeep necessary for the safe and efficient utilization of roads on state trust lands. Right-of-way grantees and lessees shall be responsible for preventative and/or corrective road maintenance of the relevant road until assignment or abandonment and rehabilitation of the road. This maintenance may include, but not be limited to, the items listed below:

A. Roadbed.

(1) Roadbeds shall be reasonably smooth and reasonably free of ruts, dust pockets, soft spots, chuckholes, rocks, slides and washboards.

(2) No berms shall be permitted along shoulders.

(3) The integrity of the surfacing material shall be maintained.

(4) Roadbed width shall be kept to the approximate original dimensions.

B. Shoulders. Road shoulders shall be straight and present a uniform line with the surface free from large rocks, limbs or stumps.

C. Ditches, Culverts and Drainage Dips.

(1) Original cross section of roads shall be maintained. Drainage area shall be kept clear of rocks, slides and sediments.

(2) Vegetation or sedimentation shall not restrict ditch or culvert flow or reduce the waterway area.

(3) Ditch bottoms shall be stable and not excessively eroded.

(4) Back-sloped areas above ditches shall be stable terrain.

(5) Drainage dips shall be maintained to constructed design.

D. Other Related Road Features. Right of ways shall be free of excessive or objectional litter, signs, etc. as determined by the SLO LUS in concert with the grantee.

E. Fences, Gates and Cattleguards.

(1) Posts are to be sound, plumb and secure.

(2) Wire shall be tight and securely fastened to the posts.

(3) Stays shall be uniformly spaced and vertical between posts and affixed to keep the strands properly spaced.

(4) Rock deadmen shall be properly secured to the fence.

(5) Gates shall be adequate to turn the class of livestock in the pasture at the time the road was first constructed and easily opened and closed.

(6) Cattleguard pits shall be clean and functional. End wings shall be securely fastened and serviceable. Guards and bases must be maintained in serviceable condition.

(7) Cattleguard approaches shall be maintained to provide a smooth transition.

F. Ford and Low Crossings.

(1) There shall be a smooth transition between roads and fords.

(2) No excessive erosion adjacent to fords shall be allowed.

(3) The surface of fords shall be clear of debris, brush, rocks and sediment.

(4) Bottoms of ford crossings shall be level with the stream bottoms.

G. Safety and Hazard Control.

(1) Travel way and ditches shall be kept free of shrubs, trees and other obstacles and shall be free of overhanging trees and limbs. No down trees or branches shall be in the ditch area.

(2) Unstable material above roadways shall be removed or stabilized.

[12/31/99; 19.2.20.11 NMAC – Rn, 19 NMAC 2. SLO 20.11, 09/30/02]

19.2.20.12 ROAD ABANDONMENT AND RECLAMATION:

All roads no longer needed, as determined by the grantee or lessee and the commissioner, shall be reclaimed to approximate natural contours, unless, as provided herein, the New Mexico state land office elects to allow a road to remain based on recommendations from the SLO LUS. Upon reclamation all road improvements and debris shall be removed, unless approved otherwise by the SLO LUS. Reclaimed roads will have the roadbeds ripped, scarified and otherwise roughened as directed by the SLO LUS to ensure increased water infiltration and a properly prepared seedbed; and then reseeded. Parallel-road berms are to be removed and recontoured. Berms or gates will be used to block access to the reclaimed road. Water bars will be used on sloping surfaces and spaced so as to minimize erosion and control surface runoff. For reseeded, the New Mexico state land office will approve seeding rates and seed mixtures or approve site-specific recommendations. When possible, the New Mexico

state land office will recommend such approved rates and mixtures, but will not require seed varieties in its mixtures which are not in common use in the area. Reseeding shall be planned and completed with a goal of revegetation consistent with local natural vegetation density. After a failed attempt to revegetate an area, a second reseeded may be required by the New Mexico state land office, but in no event shall such second reseeded be required more than two (2) years after the initial one. Reclamation responsibility of a grantee or lessee terminates upon acceptance of the reclamation of a site by the SLO LUS.

[12/31/99; 19.2.20.12 NMAC – Rn, 19 NMAC 2. SLO 20.12, 09/30/02]

PART 21: LAND EXCHANGES

19.2.21.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office.

[19.2.21.1 NMAC - Rp, 19.2.21.1 NMAC, 6/29/2012]

19.2.21.2 SCOPE:

This part pertains to all exchanges of lands held in trust by the commissioner of public lands under the terms of the Enabling Act and subsequent legislation. This rule does not apply to exchanges with the United States department of the interior or to governmental entities except to the extent that the commissioner decides to apply any portion of this rule to a specific exchange to ensure substantial conformity with the requirements of the Enabling Act.

[19.2.21.2 NMAC - Rp, 19.2.21.2 NMAC, 6/29/2012]

19.2.21.3 STATUTORY AUTHORITY:

The commissioner's authority to manage and dispose of trust lands is found in N.M. Const. Art. XIII, Section 2, and in Section 19-1-1 NMSA 1978. The authority to promulgate this part is found in Section 19-1-2 NMSA 1978.

[19.2.21.3 NMAC - Rp, 19.2.21.3 NMAC, 6/29/2012]

19.2.21.4 DURATION:

Permanent.

[19.2.21.4 NMAC - Rp, 19.2.21.4 NMAC, 6/29/2012]

19.2.21.5 EFFECTIVE DATE:

June 29, 2012, unless a later date is cited at the end of a section.

[19.2.21.5 NMAC - Rp, 19.2.21.5 NMAC, 6/29/2012]

19.2.21.6 OBJECTIVE:

The objective of this part is to provide for the orderly and lawful exchange of trust lands when such exchanges will result in a financial benefit to the trust, and when the exchange of such trust lands would benefit the trust more than their retention.

[19.2.21.6 NMAC - Rp, 19.2.21.6 NMAC, 6/29/2012]

19.2.21.7 DEFINITIONS:

The following terms are used in this part as defined below:

A. "beneficiary institutions" means those institutions or other entities specified in Section 19-1-17 NMSA 1978, as amended, or other provisions of statute for whose benefit trust lands are held;

B. "commissioner" means the New Mexico commissioner of public lands or the commissioner's agents or employees who are authorized to act in the commissioner's stead in a particular transaction;

C. "cultural property" means a structure, place, site or object having historic, archaeological, scientific, architectural or other cultural significance and included on or eligible for inclusion on either the New Mexico register of cultural properties pursuant to the New Mexico Cultural Properties Act, NMSA 1978, Sections 18-6-1 through 18-6-17, or listed on or eligible for listing on the national register of historic places pursuant to the National Historic Preservation Act, 16 U.S.C. Section 470;

D. "description" when used in connection with describing lands, means a description given in meets and bounds when appropriate, or in aliquot parts in such a way as to delineate each full or partial quarter quarter section and each full or partial lot and the acreage of each, or a description in some other form approved by the commissioner; a description shall include a description of all encumbrances and of all easements or other servitudes burdening or benefiting the property except to the extent that this requirement is waived by the commissioner;

E. "exchange" means a sale of trust lands wherein payment will be accepted by in-kind payment in the form of a conveyance of certain non-trust lands in exchange for a conveyance of certain trust lands, by monetary payment or by any combination thereof;

F. "exchange agreement" means a formal, written agreement entered into between the commissioner and an exchange party for an exchange of trust lands for non-trust lands plus any monetary payment;

G. "exchange applicant" means a governmental entity, or a private entity, that has filed an exchange application or who has qualified to bid on an exchange, under this rule;

H. "exchange party" means an exchange applicant whose exchange proposal has been accepted by the commissioner and who has entered into an exchange agreement with the commissioner;

I. "exchange proposal" means a proposal for an exchange submitted to the commissioner by an exchange applicant in conformance with the requirements of this rule and the provisions of any published request for exchange proposals;

J. "governmental entity" means the state of New Mexico, its agencies or political subdivisions, Indian tribes and pueblos, or federal government agencies other than the department of interior;

K. "hazardous materials" means any substance or material that is governed or regulated by any statute, regulation, rule, order, finding or directive promulgated, issued or enacted by a federal, state or local governmental entity and that relates to industrial hygiene or environmental protection, including but not limited to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), 42 U.S.C. Sections 9601-9675 and any successor provisions, and the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. Sections 6901-6992 and any successor provisions;

L. "improvements" means any of the following:

(1) any item of tangible property developed, placed, created or constructed on the lands involved including, but not limited to, buildings, equipment and fixtures;

(2) water rights appurtenant to the lands involved, including without limitation any water rights developed or used on the land involved for the benefit of that land; and

(3) any tangible or intangible property, rights, approvals or privileges obtained or developed for the benefit of, or made appurtenant to, the lands involved that are designated as improvements by the commissioner;

M. "improvement value" means the value of improvements placed on trust lands, which value is finally determined or accepted by the commissioner;

N. "non-trust lands" means lands other than trust lands, located in New Mexico;

O. "qualified appraiser" means a state licensed or certified real estate appraiser as set forth in Section 61-30-3, 61-30-11 and 61-30-12 NMSA 1978 or any successor provisions of law;

P. "raw land value" means the value of land that may be accepted by the commissioner for purposes of in-kind payment after the value of depreciable improvements (if any) have been excluded or reduced from the full appraised value;

Q. "schedule of fees" means a list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable;

R. "state" means the state of New Mexico;

S. "state land office" means the New Mexico state land office;

T. "true value" means fair market value as determined by any objective, reliable and commercially acceptable method including but not necessarily limited to appraisal by an appraiser;

U. "trust" means the trust established by the Enabling Act (Act of June 20, 1910, 36 Statutes at Large 557, Chapter 310), and that trust's assets, which are administered through the state land office by the commissioner;

V. "trust lands" means all lands with all appurtenant rights and privileges, owned by the trust as shown in the state land office master title tract books or other records of the state land office; and

W. "working day" means any day other than a Saturday, a Sunday or a day on which the state land office is required to be closed.

[19.2.21.7 NMAC - Rp, 19.2.21.7 NMAC, 6/29/2012; A, 6/30/2016]

19.2.21.8 EXCHANGE STANDARDS:

A. The commissioner may enter into an exchange when the commissioner determines that the exchange will result in a financial benefit to the trust.

B. When lands are placed for public auction under this rule, the commissioner will accept payment for such lands in the form of in-kind payment through an exchange of non-trust lands for trust lands, monetary payment, or any combination thereof that results in the greatest financial benefit to the trust.

C. Trust lands may be exchanged for non-trust lands owned in fee simple absolute by a governmental entity or by a private entity or entities. The commissioner cannot accept in an exchange any lands subject to a mortgage, lien or other encumbrance.

D. In any exchange, the trust must receive at least true value for the trust lands that are conveyed to an exchange party. To meet this requirement, the commissioner shall require appraisals of the trust lands and the non-trust lands proposed to be exchanged at their true value and can only proceed with an exchange after first determining that the value of the non-trust lands to be received by the state, plus any monetary payment offered, are of equal or greater financial value to the trust. Each appraisal must: (1) be conducted, by a qualified appraiser (the commissioner may require that the appraisals be performed by the land office staff appraiser, or that the appraiser be selected and approved in advance); (2) conform to the uniform standards of professional appraisal practice and any other reasonable standards set by the commissioner; (3) be reviewed by a state land office staff qualified appraiser or a different qualified appraiser and approved by the commissioner, and (4) whenever possible, utilize an appraisal approach that allows the commissioner to identify raw land value as separate from the value of any improvements. This provision shall not be construed as prohibiting the use of a running exchange account as provided in Subsection G of this section. Appraisals conducted or received by the commissioner in connection with an exchange or proposed exchange under this rule, as well as the commissioner's review of any such appraisal, shall be considered confidential information and not public information until the commissioner has selected an exchange proposal as provided in 19.2.21.12 NMAC. The commissioner may waive confidentiality in the case of any appraisal or any review of an appraisal if the commissioner determines that it is in the best interest of the trust to do so.

E. The non-trust lands, monetary payment or any combination thereof received by the commissioner in an exchange, and any proceeds therefrom, shall be applied to and become a part of the trust for which the trust lands exchanged by the commissioner were originally granted.

F. A single exchange transaction may involve more than one exchange party and may involve trust lands held in trust for the benefit of more than one beneficiary institution. When the exchange involves the commissioner conveying lands held in trust for more than one beneficiary institution, the non-trust lands and any monetary payment received by the commissioner in the exchange shall be apportioned to the different beneficiary institutions in such a way that the value of each beneficiary institution's interest in the newly acquired land and any monetary payment is proportional to its interest in the trust lands conveyed.

G. When the commissioner determines that the best interests of the trust will be promoted thereby, the commissioner may, in the commissioner's discretion, enter into an agreement with a governmental entity, to engage in a series of exchanges over a period of time. Such an agreement will provide for a running exchange account in which both agencies will, among other things:

- (1) account for the value of all properties exchanged;

- (2) make provision for differences in the property values of one exchange to be offset against property values in subsequent exchanges;
- (3) provide for methods of discharge and reduction of account balances;
- (4) may, subject to agreement by the parties, provide for interest on account exchange balances which remain un-discharged for over one year;
- (5) provide for interagency annual reconciliation of account balance figures;
and
- (6) provide for termination of the agreement and a method for final resolution of outstanding account balances.

H. The commissioner shall convey the trust lands being exchanged using such instruments of conveyance that are in the best interest of trust, which instruments shall contain such reservations to the trust as are required by law and as are deemed appropriate by the commissioner. Conveyances of trust lands shall be subject to all valid existing rights at the date of conveyance.

(1) A conveyance document by which the commissioner conveys trust lands shall be similar in content to a state land office patent and may be entitled "exchange patent."

(2) A conveyance document by which the commissioner conveys trust land shall reflect any existing oil, gas, mineral or geothermal leases on the property being conveyed by the commissioner.

I. In any exchange, the commissioner shall receive conveyances of non-trust lands by instruments containing acceptable guarantees of title such as patent, government deed or warranty deed, accompanied by such other documents evidencing marketable and unencumbered title as are deemed appropriate by the commissioner, including, if not waived by the commissioner, policies of title insurance.

(1) Such instruments shall contain language stating that the conveyance is made for and in consideration of the exchange of trust lands.

(2) An instrument of conveyance executed by individual exchange parties shall disclose the marital status of the exchange party and shall also be executed by the spouse of a married exchange party.

(3) Instruments of conveyance received by the commissioner in exchanges shall be executed, acknowledged and filed of record with the state land office and, if appropriate, with the counties in which the non-trust lands conveyed by such instruments are located, and the exchange party shall pay all costs and fees associated with such filing.

J. Exchange parties shall deposit with the commissioner, for the benefit of the owner of improvements located on the trust lands proposed for exchange, the improvement value as determined by an appraisal made or approved by the commissioner. This requirement does not apply where the exchange party is the owner of the improvements. The provisions of this subsection also shall not apply to improvements placed on trust lands for the exploration, development or production of oil and gas, geothermal resources, sand, gravel, coal, shale, clay, building stone or materials, potassium, sodium, phosphorus, salt or any other minerals or natural deposits of whatsoever kind located in, under or upon the trust lands proposed for exchange where only the surface of the trust lands is proposed for exchange.

(1) In lieu of payment of improvement value, an exchange party may file with the commissioner a bill of sale from, or a waiver of payment signed by, the owner of the improvements.

(2) The commissioner may require the costs of improvement appraisal to be paid by the exchange applicant or exchange party.

(3) For purposes of compensation, improvements shall include:

(a) those placed, created, developed or moved upon the trust lands that were approved by the commissioner or otherwise in compliance with Section 19-7-51 NMSA 1978;

(b) those placed, created, developed or moved upon the trust lands prior to March 1, 1955, whether or not their values exceed the amounts prescribed by Section 19-7-51 NMSA 1978; and

(c) those placed, created, developed or moved upon the trust lands on or after March 1, 1955, but prior to March 1, 1975, and subsequently approved in writing by the commissioner.

(4) Property placed, created, developed or moved upon leased trust lands on or after March 1, 1955, by a lessee in violation of Section 19-7-51 NMSA 1978 and not subsequently approved by the commissioner, may be approved as an improvement by the commissioner if the commissioner determines it benefits the trust lands on which it is located for purposes of a proposed exchange. For purposes of compensation paid to the owner of such improvements, however, an undivided twenty-five percent of the value of all such permanent improvements that are valued in excess of the amounts specified in Section 19-7-51 NMSA 1978 shall be and remain a part of the trust lands offered for exchange.

(5) Property placed, created, developed or moved on trust lands by mistake on or after March 1, 1975, by one not acting in the capacity of a lessee shall not be recognized as an improvement by the commissioner for purposes of compensation paid to the owner of the property unless:

(a) the commissioner determines the property was placed on the trust land in the good faith, non-negligent belief it was being located on adjacent non-trust land; and

(b) the property enhances the value of the trust land for purposes of the proposed exchange.

K. Exchange applicants or exchange parties shall pay all costs of exchanges, including but not necessarily limited to costs of publication, land appraisal, appraisal of improvements, surveying and recording, unless such requirement is waived by the commissioner. The commissioner may require an exchange applicant or exchange party either to pay such costs to the commissioner for payment to service providers or to pay such costs directly to the providers.

[19.2.21.8 NMAC - Rp, 19.2.21.8 NMAC, 6/29/2012; A, 6/11/2019]

19.2.21.9 EXCHANGE PROPOSALS AND PROCEDURES:

A. A proposed exchange may be initiated either by an applicant or by the commissioner.

B. Exchange procedure initiated by applicant:

(1) A party interested in exchanging non-trust land may initiate an exchange procedure by filing with the commissioner an initial application to exchange land on a form prescribed by the commissioner, accompanied by a non-refundable application fee as set forth in the schedule of fees. The initial application shall include the identity and address of the applicant; a legal description of the non-trust lands proposed to be exchanged; the estimated market value of the non-trust lands; the current uses of the non-trust lands; ownership of the non-trust lands; a description of any known environmental or cultural properties issues related to the non-trust lands; a legal description of the trust lands that the applicant seeks to acquire; an estimate of the value of such trust lands; a deposit in an amount determined by the commissioner as sufficient to pay the costs of appraisal of the trust lands and non-trust lands (unless the commissioner has agreed to accept an appraisal or appraisals previously performed or to be performed at the applicant's expense); and such other information as the commissioner may request in writing. The commissioner shall advise the relevant beneficiary institution(s) through written correspondence that an exchange application was received.

(2) Following submission of an initial application, the commissioner will make a determination as to whether further investigation of the suggested exchange is warranted and shall so inform the exchange applicant. If the commissioner determines that the suggested exchange does not offer sufficient potential benefit to the trust, the application will be rejected and the exchange process will terminate.

C. Exchange procedure initiated by the commissioner. The commissioner may make the commissioner's own preliminary determination that an exchange of certain trust lands would result in a financial benefit to the trust. In that case, the commissioner may initiate an exchange process by publishing a request for exchange proposals in accordance with 19.2.21.10 NMAC below.

[19.2.21.9 NMAC - Rp, 19.2.21.9 NMAC, 6/29/2012; A, 6/30/2016; A, 6/11/2019]

19.2.21.10 PUBLIC NOTICE OF A PROPOSED EXCHANGE:

A. Notice of a proposed exchange shall be published once each week for not less than ten (10) consecutive weeks in a newspaper of general circulation published locally at the state capital, and a newspaper of like circulation which shall be locally published nearest the lands so offered for exchange. Said notice will also be posted on the state land office website. Said notice shall set forth the nature, time and specific place of the auction, which place shall be at the county seat wherein the lands or the major portion thereof are located. Said notice shall also state that the commissioner will accept bids offering in-kind payment in the form of non-trust lands to be exchanged for trust lands, monetary payment or any combination thereof.

B. The notice shall include a description or a statement of the location of the trust lands offered for exchange and their total acreage; a description of leases, rights of way, easements or other uses, if any, to which the trust lands are subject as indicated by the records of the state land office; a general description of reservations to be included in the conveying instrument; the types of improvements located on the trust lands to be exchanged and their estimated values; the estimated publication and other costs to be deposited by each prospective bidder and paid by the successful bidder; the address and telephone number from which any interested person may obtain additional information, the form of conveyance instrument required to be used for in-kind payment, the deadline, form, and substantive requirements that must be satisfied in order to qualify to bid, the location where exchange proposals must be submitted; and any other information the commissioner deems pertinent.

C. In each case of a proposed exchange with another governmental entity, the commissioner shall determine what notice, if any, is required.

D. The form of instrument to be used in an exchange to convey the trust lands involved shall be available for inspection by prospective exchange applicants.

E. Non-trust lands proposed for exchange shall be open to the commissioner for inspection and appraisal. Trust lands for which the commissioner has published a request for exchange proposals shall be open to prospective exchange applicants for inspection and appraisal by obtaining permission from the state land office.

[19.2.21.10 NMAC - Rp, 19.2.21.9 NMAC, 6/29/2012]

19.2.21.11 QUALIFICATION OF BIDDERS:

In order to qualify to bid, each prospective bidder in an exchange must submit a bid qualification packet satisfying the following criteria the qualification deadline set forth in the public notice:

A. Each prospective bidder must deposit with the commissioner a non-refundable application fee, the publication costs described in the public notice, and cost of appraisal(s) as described in the public notice. Publication and appraisal cost deposits may be refunded to all prospective bidders except for the successful bidder.

B. Each prospective bidder must deposit with the commissioner the appraised value of the improvements on the trust land as determined by the commissioner, a waiver of payment of such amount signed by the owner of the improvements, or a bond sufficient to cover the appraised value if an appeal is to be taken, unless the prospective bidder is the owner of the improvements. Improvement value deposits will be refunded to all prospective bidders except for the successful bidder.

C. Prospective bidders proposing to offer in-kind payment for all or part of the bid must submit the following for the land or lands so offered subject to approval by the commissioner:

(1) a survey plat and legal description of the non-trust lands performed by a licensed professional surveyor in the state of New Mexico;

(2) an appraisal performed by a qualified appraiser conforming to the uniform standards of professional appraisal practice; the commissioner may require specific appraisal instructions and require that the appraiser be approved in advance; whenever possible, the appraiser must utilize an appraisal approach that allows the commissioner to identify raw land value as separate from the value of any improvements; the commissioner may exclude the value of improvements in order to determine the value of the land that may be used as in-kind payment; to the extent the commissioner considers the value of improvements for purposes of in-kind payment, their value will be separately evaluated by land office staff; the commissioner reserves the right to reject any appraisal;

(3) a title commitment for the non-trust with common details and any additional specific details as required by the commissioner in the public notice;

(4) a description of any water rights on the non-trust lands including documentation of the declaration or adjudication of such rights;

(5) a complete listing of cultural properties located on the non-trust lands and documentation thereof;

(6) a complete listing of hazardous materials or threatened or endangered species located on or in close proximity to the non-trust lands and documentation thereof; and

(7) a list of existing leases or other encumbrances on the land, if any, not shown in the title commitment.

D. Prospective bidders proposing to offer monetary payment for all or part of the bid must deposit with the commissioner a cash deposit or letter of credit, subject to review and approval by the commissioner, in an amount at least equivalent to either: 1) if no land is offered as partial in-kind payment, the full appraised value of the trust lands offered for exchange, or 2) if land is offered as partial in-kind payment, the difference between full appraised value of the trust lands and full appraised raw land value of the non-trust lands proposed as partial in-kind payment.

E. Prospective bidders may deposit in-kind or monetary payment, or any combination thereof, in excess of the full appraised value of the trust lands and any such amount deposited will set the minimum opening bid at the live public auction. Prospective bidders making deposits in excess of the full appraised value of the trust lands must clearly identify the full amount of their bid as distinguishable from all other required costs and fees.

[19.2.21.11 NMAC - Rp, 19.2.21.9 NMAC, 6/29/2012]

19.2.21.12 PUBLIC AUCTION:

A. Except as provided in Subsection C of 19.2.21.10 NMAC above, if the commissioner determines that an exchange of the trust lands may be in the best interest of the trust, the commissioner will offer the trust lands for exchange by public auction.

B. After the commissioner has reviewed the bid qualifications of all prospective bidders as described in 19.2.21.11 NMAC above and the public notice, the commissioner will send written notice to each indicating at a minimum: 1) whether or not they have qualified to bid at the public auction, 2) the time, date and location of the auction, and 3) the minimum opening bid at the auction. Only qualified bidders may bid at the public auction.

C. No trust lands will be exchanged except to the highest bidder at a live public auction held at the county seat of the county wherein the lands to be exchanged, or a major portion thereof, lie, and only after public notice has been given by advertisement in accordance with this rule and applicable law.

D. The minimum opening bid at auction will be the greater of either: 1) the true value of the subject trust land as determined by appraisal and as described in the public notice; or 2) the highest deposit (excluding required costs and fees) submitted by a

prospective bidder during bidder qualification; bids at the auction in excess of the minimum must be in the form of cash bids only and the winning bidder must deposit such with the commissioner in a form acceptable to the commissioner within five (5) days of the auction.

[19.2.21.12 NMAC - N, 6/29/2012]

19.2.21.13 SELECTION; REJECTION:

A. Within a reasonable time after the published closing date for submission of exchange proposals including any period of time required for requesting, receiving and analyzing any supplemental information or documentation requested by the commissioner, the commissioner may reject all exchange proposals submitted or select the proposal or proposals the commissioner determines to provide the greatest financial benefit to the trust. The commissioner shall notify each exchange applicant whose exchange proposal is rejected. If the commissioner selects more than one proposal, the commissioner shall conduct further review of the proposals so selected, may request supplemental information from the respective applicants, and may conduct a supplemental competitive process among those applicants before making a final selection.

B. The commissioner reserves the right to reject any and all bids, or to cancel an auction, sale, or exchange at any time before closing, and to reinstate the process of offering the trust lands for long-term lease, sale or exchange on the same or different terms.

[19.2.21.13 NMAC - Rp, 19.2.21.10 NMAC, 6/29/2012; A, 6/11/2019]

19.2.21.14 CLOSING AN EXCHANGE:

A. Closing of the exchange must occur within ninety (90) days of the auction, except that this period may be extended as necessary in the commissioner's sole discretion.

B. On the date of closing, the successful bidder, if any, shall be required to convey the non-trust lands to be used as in-kind payment to commissioner and to otherwise pay the full amount bid through such conveyance, monetary payment or any combination thereof. The exchange of trust lands for non-trust lands shall be consummated in accordance with the exchange agreement by a simultaneous exchange of conveyancing documents and monetary payment, if any, between the commissioner and the exchange party or parties unless the exchange is part of a series of exchanges covered by a running exchange account agreement as provided in Subsection G of 19.2.21.8 NMAC.

C. If the commissioner accepts in-kind payment for all or part of the payment the commissioner and the applicant shall enter into a written exchange agreement. The exchange agreement may include, but shall not necessarily be limited to, legal

descriptions of the trust land and non-trust land to be exchanged; an ALTA survey of the non-trust land unless waived by the commissioner; a statement of the comparative value of the tracts to be exchanged; a closing date; a description of the conveyance documents to be exchanged (which may be accomplished by attaching forms of such documents as exhibits); a listing of all documents to be exchanged at the closing, including conveyance documents and any title insurance policy documents; a statement that the exchange party has complied with applicable legal obligations and requirements with respect to the non-trust lands such as the payment of property taxes, and compliance with environmental, zoning, cultural properties or other applicable laws, as may be appropriate; any applicable escrow provisions; a statement as to when the parties shall be entitled to take possession of the lands being exchanged; a statement regarding notification of the exchange to the beneficiary institutions; a statement regarding the payment of exchange costs and improvement value; a provision for termination of the exchange agreement; standard contractual provisions (such as amendments, entire agreement, governing law); and any other terms or conditions the parties find appropriate.

[19.2.21.14 NMAC - Rp, 19.2.21.12 NMAC, 6/29/2012]

19.2.21.15 NOTICE TO BENEFICIARY INSTITUTIONS:

A. Upon causing a request for exchange proposals to be published as required by 19.2.21.10 NMAC above, the commissioner in the commissioner's discretion may submit to the beneficiary institutions for whose benefit the trust lands proposed to be exchanged are held in trust a copy of the request for exchange proposals and any statement of the commissioner's reasons for believing that such an exchange will be beneficial to the trust and to the beneficiary institutions. Upon entering into an exchange agreement as required by 19.2.21.14 NMAC above, the commissioner in the commissioner's discretion may submit to the beneficiary institutions a copy of the exchange agreement and any explanatory materials the commissioner finds appropriate.

B. Upon consummation of an exchange, the commissioner shall submit a written report to all beneficiary institutions involved setting forth a description of the trust lands and the non-trust lands involved, their appraised values, the commissioner's reason for believing that the exchange will benefit the trust, and any other information the commissioner deems desirable.

[19.2.21.15 NMAC - Rp, 19.2.21.13 NMAC, 6/29/2012; A, 6/11/2019]

19.2.21.16 RECORDING:

The commissioner will cause the conveyancing documents to be recorded and filed with the records division of the state land office. The exchange party will cause the conveyancing documents to be recorded with the appropriate county clerks and will thereafter deliver to the commissioner copies thereof showing such recordation.

[19.2.21.16 NMAC - Rp, 19.2.21.15 NMAC, 6/29/2012]

PART 22: PLANNING AND DEVELOPMENT LEASES

19.2.22.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501.

[19.2.22.1 NMAC - Rp, 19.2.22.1 NMAC, 11/30/2012]

19.2.22.2 SCOPE:

Pursuant to Article XIII, Section 2, of the New Mexico Constitution, the commissioner has jurisdiction over all lands and related resources that the United States granted and confirmed to New Mexico under the New Mexico Enabling Act. This rule, 19.2.22 NMAC, governs the granting of planning and development leases, on those lands within the commissioner's constitutional jurisdiction.

[19.2.22.2 NMAC - Rp, 19.2.22.2 NMAC, 11/30/2012]

19.2.22.3 STATUTORY AUTHORITY:

N.M. Const. Art. XIII; Section 19-1-1 et seq. NMSA 1978; Section 19-7-1 et seq. NMSA 1978.

[19.2.22.3 NMAC - Rp, 19.2.22.3 NMAC, 11/30/2012]

19.2.22.4 DURATION:

Permanent.

[19.2.22.4 NMAC - Rp, 19.2.22.4 NMAC, 11/30/2012]

19.2.22.5 EFFECTIVE DATE:

November 30, 2012, unless a later date is cited at the end of a section.

[19.2.22.5 NMAC - Rp, 19.2.22.5 NMAC, 11/30/2012]

19.2.22.6 OBJECTIVE:

The objectives of 19.2.22 NMAC are to generate value to the trust by planning and development of trust land for future sale, lease, or exchange through the process of obtaining government approvals and the placement of infrastructure pertinent to the planning and development of the land; to assure protection and maintenance of trust

assets and lands; to provide planning and development lease terms and conditions; and to provide an efficient process for such leasing.

[19.2.22.6 NMAC - Rp, 19.2.22.6 NMAC, 11/30/2012]

19.2.22.7 DEFINITIONS:

As used in 19.2.22 NMAC, the following terms have the meaning set forth in this section. A planning and development lease may add detail to a definition to accommodate lease specific issues.

A. "Applicant" means the person or entity first applying to nominate trust land for a planning and development lease.

B. "Approval / approved" means written approval and includes only that which has been expressly approved and nothing further which might be implied.

C. "Assignment" means any direct or indirect transfer or partial transfer of all of a lessee's interest in all or a part of a planning and development lease, including, but not limited to, any conditional transfer or transfer by operation of law, excluding subleases.

D. "Base infrastructure" means tangible improvements consisting of main distribution or arterial-level service lines, or the municipal or local equivalent, including at a minimum, all of the following: water, sanitary sewer, gas, electricity, telecommunications, and roadways or other transportation facilities.

E. "Base value" means the value that results from the base appraisal, as more specifically defined in Paragraph (1) of Subsection A of 19.2.22.17 NMAC below.

F. "Collateral assignment" or "leasehold mortgage" means the conditional assignment to a creditor as security for a debt of a lessee's personal property interest in a planning and development lease, infrastructure, governmental approvals, or improvement value credit.

G. "Commissioner" means the New Mexico commissioner of public lands. The commissioner is the executive officer of the state land office and may delegate to state land office staff the performance of duties required of the commissioner under this rule.

H. "Disposition" means a take-out sale, a take-out lease, or a take-out exchange of all or any portion of trust land subject to a planning and development lease.

I. "Disposition parcel" means the portion of the trust land under lease that is subject to disposition.

J. "Government approvals" means legal rights granted by governments or agencies that run with the leased land including but not limited to planning, zoning,

water and sewer service agreements, development agreements, platting, archaeological clearances or mitigation, and such other rights as may be required for the further development, improvement or use of the trust land; any property, rights, approvals, or privileges obtained or developed for the benefit of, or made appurtenant to, trust land and any other rights, permits or privileges obtained or developed in connection with a lessee's use of the leased trust land including, but not limited to, development rights and approvals.

K. "Governmental entity" means the state of New Mexico, its agencies or political subdivisions, Indian tribes and pueblos, or federal government agencies other than the department of interior.

L. "Infrastructure" means any improvements approved through a governmental approval process and necessary to support or enhance future planned development of all or the relevant parts of the leased premises, including but not limited to utilities, erosion control structures and flood control structures, roadways, sanitary sewers, water wells, water reservoirs, and sanitary sewage treatment facilities.

M. "Improvements" means any item of tangible property secured, developed, placed, created or constructed on the leased premises including but not limited to buildings, structures, infrastructure, permanent equipment and fixtures, and water rights developed as appurtenant to the trust land and approved by the commissioner, including any associated and required land use approvals.

N. "Improvement value (IV)" means the increased value of the leased premises attributable to improvements as established by appraisal, as more specifically defined in Subsection C of 19.2.22.17 NMAC below.

O. "Improvement value credit (IVC)" means the lessee percentage multiplied by the improvement value.

P. "Joint planning agreement" means a written agreement or understanding entered between the commissioner and a local government designed to facilitate planned growth of trust lands for the greatest benefit to the trust and the local community.

Q. "Leased premises" means that portion of trust land which is subject to a planning and development lease.

R. "Lessee" means the party of record at the state land office, who leases trust land from the commissioner under a planning and development lease.

S. "Lessee percentage (LP)" means the percentage to be determined through negotiation or bidding, and incorporated into the lease, which sets the lessee's proportional share of IV.

T. "Lessor" means the commissioner acting by and through the state land office.

U. "Natural appreciation (NA)" means any increase in the value of the leased premises not attributable to improvements, as determined by appraisal or by a pre-negotiated annual adjustment factor, as more specifically defined in Paragraph (3) of Subsection A of 19.2.22.17 NMAC below.

V. "Planning and development lease" means a written lease of trust land issued under this part, 19.2.22 NMAC, designed to improve the value of trust land for future sale, lease, or exchange. The commissioner, in the commissioner's discretion, shall determine the development potential of trust land.

W. "Qualified bidder" means a prospective bidder that has satisfied both the qualification deposit and all other bidder qualifications as more specifically described in Subsections A and B of 19.2.22.11 NMAC.

X. "Rent" means the total of estimated rent payments, including all periodic rents with applicable rent adjustments, percentage rents, initial or periodic fees, or any other incentive payment due during the lease term, and any other payments identified as rent in a planning and development lease.

Y. "Rent adjustment" means a periodic increase of any rent amount.

Z. "Schedule of fees" means a list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

AA. "State land office" means the New Mexico state land office.

BB. "Sublease" means a transaction or arrangement whereby a planning and development lessee transfers to another anything less than the full interest in the planning and development lease, including but not limited to the rights to use, possess, manage or control all or part of the leased premises.

CC. "Subsequent value (SV)" means the value that results from any subsequent appraisal, as more specifically defined in Paragraph (2) of Subsection A of 19.2.22.17 NMAC below.

DD. "Take-out exchange" means a relinquishment or a conditional relinquishment of all or a portion of the leased premises from the planning and development lease together with, and for the purpose of, an exchange of the same pursuant to 19.2.21 NMAC.

EE. "Take-out lease" means a relinquishment or a conditional relinquishment of all or a portion of the leased premises from a planning and development lease together with, and for the purpose of, a business lease of the same pursuant to 19.2.9 NMAC.

FF. "Take-out sale" means a relinquishment or a conditional relinquishment of all or a portion of the leased premises from a planning and development lease together with, and for the purpose of, a sale of the same pursuant to 19.2.14 NMAC.

GG. "Termination" means the end of a planning and development lease whether by cancellation, relinquishment or the expiration of the lease term.

HH. "Trust" means the land trust established by the Enabling Act (Act of June 20, 1910, 36 Statutes at Large 557, Chapter 310), and that trust's assets, which are administered through the state land office by the commissioner.

II. "Trust land" means all land owned by the trust.

JJ. "Unapproved infrastructure and government approvals" means infrastructure and governmental approvals that have not received the commissioner's approval.

[19.2.22.7 NMAC - Rp, 19.2.22.7 NMAC, 11/30/2012; A, 6/30/2016; A, 6/11/2019]

19.2.22.8 LEASING STANDARDS:

A. The surface estate of any parcel or combination of parcels of trust land may be leased under a planning and development lease at the discretion of the commissioner.

B. A planning and development lease may be initiated only through public notice and a public auction in accordance with this rule and other applicable law, including but not limited to Section 19-7-9(c) NMSA 1978 (2009).

C. In making a determination as to whether to enter a planning and development lease, the commissioner will make a determination as to whether the lease is in the best interest of the trust based on specific considerations including but not limited to:

(1) the present value and estimated future value that will be created for the trust;

(2) the anticipated impact on trust lands adjacent to or near the proposed planning and development lease;

(3) the proposed planning and development lease's conformance with any joint planning agreements or existing land use plans;

- (4) the interests of the local community;
- (5) the feasibility of the proposed development project; and
- (6) the ability of a lessee to execute the proposed development project.

D. Notwithstanding any other provision of 19.2.22 NMAC, and at any time before the execution of a planning and development lease, the commissioner may, at the commissioner's discretion, reject any application or bid submitted under 19.2.22 NMAC.

[19.2.22.8 NMAC - Rp, 19.2.22.8 NMAC, 11/30/2012]

19.2.22.9 INITIATING A LEASE:

A. A planning and development lease may be initiated either by an applicant or by the commissioner.

B. Any person, corporation or other legal entity registered with the New Mexico public regulations commission, or any other legal entity authorized to do business in New Mexico, may apply to lease any trust lands under a planning and development lease by submitting an application on forms prescribed by the commissioner.

C. The application for a planning and development lease must, at a minimum, be made under oath and include the applicant's full name and contact information, a general description of the trust land proposed for leasing including its present use and general location, a general description of the proposed planning and development activities and a statement describing the anticipated benefits to the trust.

D. The application must include a nonrefundable application fee and advertising deposit in the amount established by the commissioner.

E. If, after an initial evaluation of an application, the commissioner determines that proceeding with the proposed planning and development lease may be in the best interest of the trust:

(1) the commissioner shall require that a base appraisal be performed consistent with Paragraph (1) of Subsection A of 19.2.22.17 NMAC below;

(2) the commissioner may also require a survey plat and legal description of the trust lands performed by a licensed professional surveyor in the state of New Mexico; and

(3) the commissioner may require any other supplemental information from the applicant deemed appropriate under the circumstances.

F. An applicant may withdraw an application for a planning and development lease at any time.

G. If the applicant is not the successful bidder and the lease is awarded to another party, the successful bidder shall reimburse the applicant for the cost of the appraisal, survey and additional costs incurred by the applicant related to the auction required by the commissioner and born by the applicant.

[19.2.22.9 NMAC - Rp, 19.2.22.9 NMAC, 11/30/2012]

19.2.22.10 PUBLIC NOTICE OF A PROPOSED PLANNING AND DEVELOPMENT LEASE:

A. Advertisement. A notice of public auction must be published once each week for not less than 10 consecutive weeks in a newspaper of general circulation published in Santa Fe, and in a newspaper of general circulation published nearest the offered land. The notice of lease sale must contain:

- (1) the date, time and place of the auction;
- (2) a description of the trust land offered for lease and any limitations on the uses of the land including any local land use restrictions, covenants, master plans, joint planning agreements or any restrictions established by the commissioner;
- (3) a statement as to whether the lease may be reasonably amended after its execution; and
- (4) the name of the person to contact at the state land office for additional information on the auction and the trust land being offered for lease.

B. Notice at the property. The applicant for the lease shall post notices of the proposed lease on the boundaries of the proposed leased premises adjacent or nearest to public rights of ways, in a similar manner as required by the local government through its land use approval process. Such notice shall be posted and maintained by the applicant for the 10 week public notice period so as to be visible from the public right of way. Notices shall be in the form of a sign identifying that a lease is being requested from the New Mexico state land office, the size of the proposed lease in terms of acreage, the name and contact information of the applicant, and purpose of the lease.

C. Bid information packet. Anyone requesting information on the auction will be provided with a bid information packet which, at a minimum, will include:

- (1) a form planning and development lease;
- (2) a bid proposal form;

- (3) the amount of the qualification deposit;
- (4) a description of the public auction process;
- (5) the base value of the land together with a statement as to whether the commissioner's portion of the IV, if any, will be rolled over into the subsequent lease; and
- (6) a list of qualifications and statement of the criteria established by the commissioner for determining the highest and best bid.

[19.2.22.10 NMAC - N, 11/30/2012]

19.2.22.11 PUBLIC AUCTION:

The commissioner may, under the following procedures, offer a planning and development lease to the highest and best bidder after public notice and a public auction. In order to qualify to bid at a public auction, each prospective bidder must satisfy both a qualification deposit and the bidder qualifications prescribed by the commissioner in accordance with the following.

A. Qualification deposit. Each prospective bidder must deposit with the commissioner the following amounts which are to be specifically described in the public notice:

(1) the costs of the auction, whether incurred by the state land office or the applicant; such costs and expenses may include, but are not limited to, the costs of appraisals, surveys, advertising, land use planning, and brokerage or other real estate fees;

(2) the first rental payment under the planning and development lease; and

(3) if the trust land offered for lease has IV or improvements from a previous lease, all prospective bidders must deposit:

(a) a sum equal to the value of the IV, the improvements, or both, or a bond or letter of credit sufficient to cover the value of these (the holder of IVC or the owner of improvements need not make this deposit); or

(b) if the commissioner has agreed that its portion of the IV will be rolled over into the subsequent lease all bidders except for the holder of IVC must deposit:

(i) a sum equal to the IVC or a bond or letter of credit sufficient to cover the IVC;

(ii) a bill of sale for the IVC executed by the holder of the IVC; or

- (iii) a waiver of payment signed by the holder of the IVC.

B. Bidder qualifications. In order to ensure the greatest return for the trust, the commissioner will establish the minimum objective criteria that must be satisfied by each prospective bidder in order to qualify to bid based on the nature of the lease and the proposed uses of the trust land. Such requirements may include but are not limited to:

- (1) a preliminary, non-binding pro-forma or similar documentation that identifies a minimum anticipated return rate to the trust and demonstrates that a bid proposal is realistic and achievable;
- (2) a financial statement that demonstrates solvency and resources sufficient to accomplish the proposed development project; and
- (3) some minimum level of experience in land use planning and development.

C. Refunds. Upon completion of the lease auction, the commissioner shall return any deposits to the unsuccessful bidders.

D. Due diligence. All bidders must undertake their own due diligence, including but not limited to, inspecting the offered trust land and reviewing pertinent records and files of the state land office and other public agencies. A prospective bidder must obtain the approval of the commissioner before entering upon trust land.

E. Auction. The auction may be conducted by the acceptance of oral or sealed bids. If awarded at all, the planning and development lease will be awarded to the qualified bidder offering the highest bid as determined by the following: For each auction, the commissioner shall set a specific non-negotiable base rent. The commissioner may accept bids based on the lessee percentage, or set a specific non-negotiable lessee percentage and allow bidding in the form of a cash bonus pursuant to the following:

- (1) if the commissioner sets only a specific non-negotiable base rent, the highest bid will be the bid offering the lowest lessee percentage; or
- (2) if the commissioner sets both a specific non-negotiable base rent and lessee percentage, the highest bid will be the bid offering the highest cash bonus.

F. Bidding IVC. A lessee may bid its accrued IVC attributable to the portion of the leased premises subject to disposition at any public bid for the same disposition parcel.

[19.2.22.11 NMAC - Rp, 19.2.22.11 NMAC, 11/30/2012]

19.2.22.12 PLANNING AND DEVELOPMENT LEASE:

A. Execution of lease. The successful bidder must deposit with the commissioner all amounts due for the lease sale, including any bonus bid, no later than five business days after the auction, and shall, within 30 days after the auction, enter into the lease. The commissioner may extend the period for entering into a lease to no greater than 180 days after the auction. If the successful bidder does not deposit with the commissioner any amounts due, or enter into the lease offered by the commissioner, within the prescribed time periods, the commissioner may reject the bid and either declare another bidder to be the winner, or terminate the lease.

B. Lease terms. All planning and development leases will contain, at a minimum, such provisions as may be prescribed by the commissioner and must comply with all applicable laws in effect at the time of lease execution.

C. Conditions. The commissioner shall establish conditions in a planning and development lease necessary for providing a secure return to the trust, managing the trust land in an economically reasonable manner and protecting the trust land and any natural and cultural resources on the trust land from waste. Each lessee under a planning and development lease shall have an affirmative duty to diligently prevent and protect against trespass and waste on trust land.

D. Uses. A planning and development lease must designate the allowable uses of the leased trust land. The commissioner may establish restrictions on the uses of the trust land, including but not limited to restrictions contained in local land use rules, covenants, or land use plans.

E. Rent. Unless otherwise provided in a lease, rent will be paid in advance in annual installments.

F. Mineral reservation. Each planning and development lease will reserve the mineral estate, geothermal resources, water, and pore spaces for exploration, development, conservation and production and all related rights of access over, through or across trust land. The commissioner may, in a planning and development lease, agree, upon payment of a negotiated fee sufficient to compensate the trust based on the commissioner's evaluation of the potential value of the reserved rights, not to exercise these reserved rights during the term of the lease.

G. Easements and rights of way reservations. Each planning and development lease will reserve to the commissioner the right to grant easements and rights-of-way across trust land for any legal purpose. A planning and development lease may provide that any easements or rights-of-way so granted across leased trust land must be located to avoid, to the extent practicable, unreasonable interference with the uses allowed under the lease and to be consistent with land use and development plans approved by the commissioner.

H. Fish and game easement; recreational access permit. Unless specifically stated otherwise, a planning and development lease will be withdrawn by the

commissioner from public use under a fish and game easement or under recreational access permit.

I. Water rights. Water rights developed on trust land under a planning and development lease must be developed pursuant to a separate agreement with the commissioner.

J. Other terms, rents, fees. The commissioner may require such other terms, rents, or fees not otherwise disallowed by this rule or other applicable law.

[19.2.22.12 NMAC - Rp, 19.2.22.12 NMAC, 11/30/2012]

19.2.22.13 SUBLEASE; ASSIGNMENT OR PARTIAL ASSIGNMENT:

A. Any sublease, assignment or partial assignment for use of trust land is void without the approval of the commissioner. The commissioner's approval may be conditioned upon such terms or requirements as are deemed to be in the best interests of the trust including but not limited to:

- (1) additional consideration to the commissioner;
- (2) disclosure of the value paid to the lessee in consideration of the assignment or sublease; and
- (3) that the sublessee, assignee or partial assignee meets the same or substantially similar minimum qualifications that were required of the lessee at the time of bidder qualification.

B. The commissioner may, in a lease, pre-approve certain assignments or subleases that the commissioner deems to be in the best interests of the trust.

(1) No assignment or sublease of trust land under a planning and development lease will be approved unless the lessee is in compliance with the terms of the lease.

(2) The commissioner's approval of a sublease or assignment does not relieve the lessee from any liability that may have arisen before the sublease or assignment. The commissioner's approval of a sublease does not release the lessee from its continuing and primary liability for performance of all terms and obligations under the lease.

(3) The commissioner's approval of a sublease or assignment will not constitute approval of any subsequent sublease or assignment.

C. Applications to sublease or assign must be made by the current lessee under oath, on forms prescribed by the commissioner, and must be accompanied by the fees shown on the schedule of fees.

D. No assignment or sublease will extend the term of a planning and development lease and the lessee shall inform its sublessee or assignee of the terms and conditions of the lessee's planning and development lease.

E. The termination of a planning and development lease will automatically, and without notice, terminate any sublease, unless otherwise agreed to in writing by the commissioner through an attornment or a similar agreement.

F. A lessee or sublessee may not transfer, change the purpose or use, or move the point of diversion of any water rights that are appurtenant to trust land without the prior approval of the commissioner.

[19.2.22.13 NMAC - Rp, 19.2.22.13 NMAC, 11/30/2012; A, 6/11/2019]

19.2.22.14 COLLATERAL ASSIGNMENTS; LEASEHOLD MORTGAGES:

A. Unless otherwise provided in a planning and development lease, and subject to the prior approval of the commissioner, a lessee's interest in a planning and development lease or infrastructure, inclusive of accrued IVC, may be collaterally assigned or mortgaged by the lessee. An approved collateral assignee or mortgagee shall not have a lien on the commissioner's interest in the trust land, the lease, any infrastructure, or the commissioner's reversionary interest in the real and personal property subject to the lease. Any attempt to collaterally assign or mortgage a lessee's interest in a planning and development lease, or in any infrastructure, without the approval of the commissioner, will be void and will not vest the purported collateral assignee or mortgagee with any right, title, interest, claim or privilege with respect to such lease or infrastructure.

(1) Prior to making any collateral assignment a lessee shall apply to the commissioner, under oath, and on such form as may be prescribed by the commissioner. The lessee shall include a copy of the proposed collateral assignment or leasehold mortgage and pay any applicable fees set out in the schedule of fees.

(2) The commissioner may approve the collateral assignment or leasehold mortgage subject to such terms and conditions that the commissioner deems to be in the best interests of the trust, and may agree to such reasonable amendments to the planning and development lease as may be necessary for the collateral assignment or leasehold mortgage.

B. If the commissioner gives written notice to a planning and development lessee of a breach of the lease by the lessee, the commissioner shall also give written notice of the breach to an approved collateral assignee or mortgagee of the development

planning lessee. Such notice will be sent by certified mail to the most current name and address of the collateral assignee or mortgagee in the official lease file of the commissioner and no proof of receipt of such notice by the collateral assignee or mortgagee will be required.

C. An approved collateral assignee or mortgagee may cure a lessee's breach within the time periods provided to the lessee under the lease. A planning and development lease may provide that a collateral assignee or mortgagee may succeed to the rights and duties of the lessee of the planning and development lease under such conditions as are provided in the lease. The commissioner's approval of a collateral assignment of infrastructure does not change the status of any infrastructure as approved, unapproved, removable or permanent infrastructure.

D. A collateral assignee or mortgagee shall take its interest subject to the following terms and conditions, and the lessee is required to give notice of such terms and conditions to its collateral assignee or mortgagee upon making a collateral assignment or leasehold mortgage.

(1) The commissioner is entitled to notice of all proceedings, judicial or non-judicial, to enforce or foreclose the collateral assignment or leasehold mortgage.

(2) Any successor in interest to a lessee's interest in a planning and development lease, or in any infrastructure, that acquires an interest in such property as the result of the enforcement or foreclosure of a collateral assignment or leasehold mortgage, or an assignment or conveyance in lieu of such enforcement or foreclosure, will be deemed to be an assignee under 19.2.22.13 NMAC, and will be subject to the approval of the commissioner. Such approval will not be unreasonably withheld; but no successor in interest will be approved by the commissioner unless all sums due under the terms of the lease have been paid in full, and all other pending duties discharged, or unless arrangements satisfactory to the commissioner are made to fully pay such sums or discharge such duties.

[19.2.22.14 NMAC - Rp, 19.2.22.14 NMAC, 11/30/2012; A, 6/11/2019]

19.2.22.15 APPROVAL OF GOVERNMENT APPROVALS AND INFRASTRUCTURE:

No government approvals may be secured, or infrastructure placed, developed, created or constructed on trust land, or obtained or developed for the benefit of trust land, or made appurtenant to trust land without prior approval by the commissioner. Such approval will not be unreasonably withheld and may be conditioned upon certain requirements imposed by the commissioner which may include, without limitation, consistency with previous government approvals, and the provision of a bond or other adequate security to assure proper removal of infrastructure (when appropriate) from trust land and the restoration of trust land. Unless otherwise required by the terms of a

lease, all government approvals and infrastructure will remain on the trust land even after cancellation or termination of a lease.

A. A request for the commissioner's approval of improvements, governmental approvals or infrastructure must be made in writing on such forms and in such manner as may be required by the commissioner, and must be accompanied by the fee set forth in the schedule of fees, if any. Once received, the commissioner shall act to approve or reject the proposed improvements or infrastructure within 30 days from the date of receipt. However, the commissioner is not obligated to approve any infrastructure, improvements or government approvals, and failure by the commissioner to act upon such requests within 30 days deems the request denied.

B. The commissioner may preapprove existing and proposed infrastructure or government approvals with the lease when the commissioner determines it is in the best interests of the trust.

C. If the lessee fails to obtain the commissioner's prior approval for infrastructure or government approvals, the commissioner may, for an additional fee, approve such items after they have been placed, developed, created or constructed on, obtained or developed for the benefit of, or made appurtenant to trust land if the commissioner determines that it is in the best interest of the trust to do so.

[19.2.22.15 NMAC - Rp, 19.2.22.15 NMAC, 11/30/2012]

19.2.22.16 REMOVAL OF PROPERTY:

A. Upon the termination of a planning and development lease, all unapproved infrastructure must be removed from the trust land unless otherwise provided in the lease or in writing by the commissioner.

(1) No item of infrastructure may be removed without the commissioner's approval if a lessee owes rent or any other sums to the commissioner or if any material duties required under the lease remain unperformed.

(2) The commissioner may require, in writing, that designated unapproved infrastructure be left in place. Such infrastructure will become the property of the commissioner and no person will be entitled to any IVC for such infrastructure, and the lessee will be deemed to have waived any claim of government taking or other damages.

(3) Any unapproved infrastructure left on trust land without the commissioner's approval will remain the liability of the lessee. The commissioner may elect to take any necessary action to remove such infrastructure and all costs and fees incurred will constitute additional rent due from the lessee under the lease. Alternatively, the commissioner may declare the property abandoned and ownership transferred to

the commissioner and the lessee will be deemed to have waived any claim of government taking or other damages.

B. In all cases where infrastructure is removed from trust land, the lessee is solely liable for the restoration of the trust land to its condition prior to the placement of such infrastructure. The lessee's obligation to remove infrastructure and to restore the trust land survives the termination of the lease.

C. All costs, fines and fees incurred by the commissioner as a result of infrastructure left on trust land without the commissioner's approval, and all costs, fines and fees incurred as a result of damage or waste to trust land during the term of the lease, or arising from or in connection with the lessee's use and occupancy of the trust land, remains the sole liability of the lessee and will be deemed additional rent due at the time incurred.

[19.2.22.16 NMAC - Rp, 19.2.22.16 NMAC, 11/30/2012]

19.2.22.17 IMPROVEMENT VALUE; IMPROVEMENT VALUE CREDIT:

A. IV, when calculated. Improvement value (IV) must be calculated when a planning and development lease terminates, upon a disposition or partial disposition, or at lessor's discretion including but not limited to at the time of a sublease or assignment. IV is generally determined through appraisal by comparing the subsequent value of the leased premises to the base value of the leased premises with an adjustment for natural appreciation pursuant to the following and as described in Paragraph (1) of Subsection C of 19.2.22.17 NMAC below:

(1) Base appraisal. Prior to the effective date of the planning and development lease, the applicant, at the applicant's expense, shall cause an appraisal of the trust land to be performed by a qualified appraiser conforming to the uniform standards of professional appraisal practice (USPAP) to establish the base value (BV). The commissioner may require specific appraisal instructions and require that the appraiser be approved in advance. The state land office staff appraiser shall review the base appraisal pursuant to the USPAP Standard 3, and make a recommendation to the commissioner that the base appraisal be accepted, rejected, or accepted with adjustments. The commissioner may approve a BV consistent with the staff appraiser's recommendation or make deviations therefrom if appropriate based on the commissioner's exercise of reasonable judgment, documented in writing. The commissioner reserves the right to reject any base appraisal.

(2) Subsequent appraisal. A subsequent appraisal is required in order to update the current value of the leased premises for purposes of identifying IV, if any. At least 60 but not more than 90 days prior to the expiration of a lease, disposition or partial disposition, or at lessor's discretion including but not limited to at the time of a sublease or assignment, lessee at lessee's expense shall cause an appraisal of the trust land to be performed by a qualified appraiser and conforming to USPAP to

establish the subsequent value of the leased premises (SV). The commissioner may require specific appraisal instructions, including but not limited to those described in Subparagraph (a) of Paragraph (3) below, and require that the appraiser be approved in advance. The state land office staff appraiser shall review the subsequent appraisal pursuant to USPAP Standard 3, and make a recommendation to the commissioner that the subsequent appraisal be accepted, rejected, or accepted with adjustments. The commissioner may set the SV consistent with the staff appraiser's recommendation or make deviations therefrom if appropriate based on the commissioner's exercise of reasonable judgment, documented in writing. The commissioner reserves the right to reject any subsequent appraisal.

(3) Adjustment for NA. Only the beneficiaries of the land trust are entitled to increased value resulting from NA. Accordingly, every planning and development lease must provide for one of the following methodologies designed to adjust for NA when determining IV:

(a) Appraisal instructions method. In addition to any other specific appraisal instructions required by the commissioner, each subsequent appraisal must be performed pursuant to the following specific instructions requiring two iterations of the appraisal:

(i) first iteration - the appraiser shall first appraise the disposition parcel for its present value considering only those improvements, if any, that were in place at the time that the base appraisal was performed; if the value that results from this first iteration exceeds BV as established by the base appraisal, this first iteration value becomes the BV of the disposition parcel for purposes of calculating IV; and

(ii) second iteration - the appraiser shall next appraise the disposition parcel at its full present value considering all present improvements; the value that results from this second iteration becomes the SV of the disposition parcel for purposes of calculating IV.

(b) Predetermined adjustment factor or other alternative method. Any methodology determined by the commissioner to protect the trust's interest in the value created by NA as opposed to the value created by lessee's improvements may be used, including but not limited to a pre-negotiated periodic adjustment factor included in the lease to be applied to the BV to account for the anticipated NA at the time of disposition.

B. IVC accrual; when payable. IVC accrues only upon completion of base infrastructure at least up to the boundary of the leased premises, or in the case of a partial disposition, sublease or partial assignment, at least to the present boundary of the disposition parcel, sublease or partial assignment. Alternatively, pursuant to the terms of a lease, IVC may accrue when the lessee has contractually obligated itself to construct such base infrastructure and where the contractual obligation is adequately secured by a transferable bond or letter of credit or other acceptable security. The commissioner may require that base infrastructure be extended or guaranteed through

a given parcel prior to allowing a disposition, partial disposition, sublease or assignment. Upon disposition to any person or entity other than the holder of the IVC, the purchaser or new lessee shall satisfy payment for the IVC pursuant to the following:

(1) in the case of a sale or exchange, the commissioner shall convey payment of the IVC, if any, to the holder thereof from the sale or exchange proceeds; or

(2) in the case of a lease, the commissioner shall convey payment of the IVC, if any, to the holder thereof from the deposit described in Paragraph (3) of Subsection A of 19.2.22.11 NMAC above less any rent, costs, or damages owed to the commissioner; however, no payment of the IVC will be made if a bill of sale or waiver of payment signed by the holder of the IVC is filed with the commissioner.

C. IVC, how calculated. Subject to the conditions and restrictions set forth in this provision, a lessee may be entitled to IVC as determined by the following procedures and calculations and pursuant to the terms of the lease:

(1) Step 1: The base value is subtracted from the subsequent value, as adjusted for NA through one of the methodologies described in Paragraph (3) of Subsection A of 19.2.22.17 NMAC above, to determine the improvement value [SV – BV = IV].

(2) Step 2: The improvement value is multiplied by the lessee percentage to determine improvement value credit [IV x LP = IVC].

EXAMPLE WHERE: SV (adjusted for NA) = 200, BV = 100, and LP = 60%

$$200 - 100 = 100: \quad \mathbf{IV = 100}$$

$$100 \times .60 = 60: \quad \mathbf{IVC = 60}$$

(3) A lessee will not be liable for any negative IVC.

(4) Any bonus offered at a lease auction, or any value bid at a sale or exchange auction in excess of SV as set by Paragraph (2) of Subsection A of 19.2.22.17 NMAC above, will be payable solely to the commissioner and will not be considered for purposes of IVC.

D. Depreciation of IVC. A planning and development lease may provide that IVC may be lost or depreciated over a stated time if, after termination of the planning and development lease, there is no successor in interest other than the commissioner.

E. Commissioner not liable for IVC. Except for the transfer of funds for IVC deposited by a lessee or to be paid from the proceeds of a sale, the commissioner is not liable for the payment of any IVC. The commissioner may require a release or indemnity from the party receiving payment of the IVC.

F. IVC holder must be identifiable. The holder of the IVC must be identified in the records of the state land office. Unless otherwise provided in a lease, leasehold mortgage or collateral assignment of IVC or infrastructure approved by the commissioner and filed with the state land office, the commissioner shall treat the lessee, not the collateral assignee or mortgagee, as the holder of the IVC and the party entitled to payment

[19.2.22.17 NMAC - Rp, 19.2.22.17 NMAC, 11/30/2012]

**19.2.22.18 TAKE-OUT LEASES; TAKE-OUT SALES OR EXCHANGES
AUTHORIZED:**

During the term of a planning and development lease, a lessee may from time to time apply for a take-out lease or take-out sale or exchange. Take-out sales will be considered most appropriate where the final land use proposal is owner-occupied residential, otherwise take-out leases in the form of long term business leases will be considered most appropriate.

[19.2.22.18 NMAC - N, 11/30/2012]

**19.2.22.19 ACQUISITION OF RIGHTS-OF-WAY BY LESSEE FOR DEDICATION
TO A GOVERNMENTAL ENTITY:**

Trust lands within a planning and development lease may, from time to time, be purchased by a lessee for dedication to a governmental entity as rights-of-way pursuant to the following:

A. Dedications through long term lease, sale, or exchange. A lessee may acquire rights-of-way by lease, sale, or exchange only after 10 weeks public notice and a public auction as required by applicable state land office rules and other applicable law.

B. Dedications through easement with right of reversion. A lessee may acquire rights-of-way in the form of an easement where the easement is simultaneously dedicated to a governmental entity for a term of "for so long as it used for a public purpose."

C. Pricing of the easement. Rights-of-way acquired by a lessee on behalf of a governmental entity and simultaneously dedicated to the governmental entity will, at the sole discretion of the commissioner, be priced either on a per rod basis pursuant to the commissioner's standard price schedule, or at the per acre value as extrapolated from BV without adjustment for NA or SVA. In determining the proper pricing for the right-of-way, the commissioner shall consider the immediate and certain economic impacts to adjacent trust lands, if any, that may reasonably result from the right-of-way and associated infrastructure.

D. Effect on IV. The acquisition or dedication of a right-of-way pursuant to this section is not a disposition for purposes of IV, and such dedications will in no way impact a lessee's right or interest in IVC. A lessee may claim IVC relating to infrastructure on portions of the leased premises dedicated as rights-of-way at the time of a subsequent disposition.

[19.2.22.19 NMAC - N, 11/30/2012; A, 6/30/2016]

19.2.22.20 RELINQUISHMENT:

A. A lessee may, with the approval of the commissioner, relinquish to the commissioner the lessee's interest in a planning and development lease. The commissioner may establish in the terms of a lease conditions pursuant to which the lessee may, at prescribed times, relinquish all or portions of the lease.

B. A lessee may request relinquishment of the lease on forms prescribed by the commissioner and upon payment of a relinquishment fee, provided that:

(1) the lessee is in compliance with the terms of the lease; and

(2) all improvements made pursuant to the lease on, for, or appurtenant to the lands leased have been approved by the commissioner and arrangements satisfactory to the commissioner have been made for either the removal or the retention of the improvements.

C. A lessee shall not, by relinquishment, avoid or be released from any liability for known or unknown waste or damage to trust lands, including but not limited to environmental damage, arising from or connected with lessee's use or occupancy of trust lands.

D. A relinquishment shall not be valid or effective until approved by the commissioner. Any attempted relinquishment of the lease, without the commissioner's approval, shall be a breach of the lease.

E. Upon relinquishment, a lessee shall not be entitled to the refund of any rent previously paid; however, a lessee seeking relinquishment in response to a request by the commissioner shall not be charged a fee, and shall be entitled to a pro-rata refund of prepaid rent to be paid only by the successor lessee, purchaser or other successor in interest, if any.

[19.2.22.20 NMAC - N, 11/30/2012]

19.2.22.21 DEFAULT; REMEDIES:

Unless otherwise provided in a planning and development lease, a lessee shall be in default under a planning and development lease if a breach of the lease is not cured

within 30 days after the commissioner gives written notice of the breach to the lessee. A breach of the lease may include, without limitation, a failure to pay any rent or other monetary obligation due under the lease, or a violation of any term, condition, or covenant of the lease, or the failure to perform or observe any other obligation of the lessee under the lease.

A. Notice. Written notice of a breach shall be sent to the lessee, and to the holder of any collateral assignment or leasehold mortgage, at their addresses of record at the state land office, by certified mail. The commissioner need only provide proof of mailing to establish satisfactory compliance with this notice requirement.

B. Remedies. On the default of a lessee, the commissioner shall have all the remedies available to the commissioner at law or in equity in New Mexico, and as provided in the planning and development lease, including, without limitation, terminating the lease, retaking possession of the leased trust land with or without termination of the lease, and proceeding to recover any damages, including damages for any unpaid or unperformed obligations of the lessee.

[19.2.22.21 NMAC - N, 11/30/2012]

19.2.22.22 EXISTING LEASES:

Except as provided in this section, the commissioner may not lease under a planning and development lease any trust land currently leased under an existing surface lease unless the existing lessee relinquishes the lessee's interest in the trust land or the commissioner exercises any right of withdrawal of land which the commissioner may have. Notwithstanding the foregoing, the commissioner may determine that a proposed planning and development lease will not unreasonably interfere with the authorized uses under an existing lease, and may allow a new planning and development lease in compliance with the following requirements.

A. The new planning and development lease shall identify the existing lease, shall state that the new planning and development lessee's rights and privileges are subject to the existing lessee's rights and privileges under the existing lease, unless waived or amended, and shall provide that the new planning and development lessee will not interfere with the uses permitted under the existing lease.

B. The existing lessee must consent in writing to the new planning and development lease unless the commissioner previously reserved the right to execute such a lease under the terms of the existing lease.

[19.2.22.22 NMAC - Rp, 19.2.22.18, 11/30/2012; A, 6/11/2019]

PART 23: STATE TRUST LANDS RESTORATION AND REMEDIATION FUND

19.2.23.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, 310 Old Santa Fe Trail, P.O. Box 1148, Santa Fe, New Mexico 87501.

[19.2.23.1 NMAC - N, 10/31/2017]

19.2.23.2 SCOPE:

This part pertains to the expenditure of funds from the state trust lands restoration and remediation fund created under Section 19-1-11 NMSA 1978.

[19.2.23.2 NMAC - N, 10/31/2017]

19.2.23.3 STATUTORY AUTHORITY:

The state land office's authority to administer the state trust lands restoration and remediation fund is found in Section 19-1-11 NMSA 1978. Under Section 19-1-1 NMSA 1978, the commissioner is the executive officer of the state land office. The commissioner's authority to manage the state trust lands is found in N.M. Const., art. XIII, Section 2, and in Section 19-1-1 NMSA 1978. The authority to promulgate this rule is found in Section 19-1-2 NMSA 1978.

[19.2.23.3 NMAC - N, 10/31/2017]

19.2.23.4 DURATION:

Permanent.

[19.2.23.4 NMAC - N, 10/31/2017]

19.2.23.5 EFFECTIVE DATE:

October 31, 2017, unless a later date is cited at the end of a section.

[19.2.23.5 NMAC - N, 10/31/2017]

19.2.23.6 OBJECTIVE:

The objective of this part is to provide for the orderly, lawful, and appropriate expenditure of funds from the state trust lands restoration and remediation fund to administer contractual surface damage and watershed restoration and remediation projects on state trust lands, which are under the care, custody and control of the commissioner.

[19.2.23.6 NMAC - N, 10/31/2017]

19.2.23.7 DEFINITIONS:

As used in 19.2.23 NMAC, the following terms have the meaning set forth in this section unless otherwise indicated in the text of this rule:

A. "clearance and compliance requirements" means biological and archeological surveys, or site delineation surveys, or any other state or federal regulatory requirement that may be needed to proceed with a restoration or remediation project.

B. "commissioner" means the New Mexico commissioner of public lands, and the commissioner's appointees under Section 19-1-7 NMSA 1978 acting within the scope of their authority. The commissioner may delegate to state land office staff the performance of functions required of the commissioner under this part.

C. "contaminant" means solid waste, hazardous materials, or any other state- or federally-regulated substance that threatens, or could threaten, public health or the environment.

D. "contractual surface damage and watershed restoration and remediation projects" means projects performed by vendors or service providers through contracts with the state land office to repair surface damage on, restore or remediate state trust lands.

E. "in-kind contribution" means a contribution of labor, materials, or other non-monetary resources by an individual or entity other than the state land office.

F. "matching contribution" means a monetary contribution by an individual or entity other than the state land office.

G. "reclamation" means returning land that has been rendered unusable by human activities or natural processes to a usable state.

H. "remediation" means actions necessary to investigate, prevent, minimize, remove, or mitigate threats to the public health or to the environment that may otherwise result from a release or threat of release of contaminants.

I. "restoration" means repairing or treating a site to return it to a desired previously existing condition or to achieve native plant cover and diversity levels equal to or exceeding the natural potential levels in undisturbed soils adjacent to the project area.

J. "restoration and remediation fund" means the state trust lands restoration and remediation fund.

K. "state land office" means the New Mexico state land office established under Section 19-1-1 NMSA 1978, the executive officer of which is the commissioner.

L. "surface damage" means the removal of, mechanical disturbance to, or introduction of hazardous materials to, the ground surface, vegetation, or soils in a given location.

M. "trust lands" means those lands, their natural products and all assets derived from them, which are under the care, custody and control of the commissioner.

[19.2.23.7 NMAC - N, 10/31/2017; A, 6/11/2019]

19.2.23.8 PERMISSIBLE FUND EXPENDITURES:

A. Expenditures made from the state trust lands restoration and remediation fund shall be used to implement the following categories of projects:

- (1) surface damage remediation and restoration;
- (2) watershed, forest, or grassland restoration;
- (3) illegal dump site remediation and restoration; and
- (4) contaminated site remediation.

B. The restoration and remediation fund shall not be expended for:

- (1) any project or portion thereof that is not located on state trust lands;
- (2) any internal state land office operation cost, administration expense, overhead, or salary; or
- (3) any other land office expense that is not related to trust land restoration or remediation or is not part of a commissioner-approved project proposal.

C. The restoration and remediation fund shall not be used to make improvements to trust lands, unless such improvements are necessary to protect the land or ensure the success of the restoration or remediation project.

D. The restoration and remediation fund shall not be used for project clearance and compliance requirements, as defined in this rule. Other funding sources, including in-kind contributions, matching contributions, or other state land office funds, may be used to pay for clearance and compliance requirements.

E. The commissioner's prior written approval of a project proposal is required for all expenditures from the restoration and remediation fund.

[19.2.23.8 NMAC - N, 10/31/2017]

19.2.23.9 PROJECT PROPOSALS:

A. Land restoration or remediation project proposals may be initiated by the commissioner or by outside individuals or entities, as follows:

(1) the commissioner may direct state land office staff to prepare proposals for state trust land restoration or remediation projects; or

(2) individuals or entities that wish to partner with the state land office on a restoration or remediation project involving state trust lands may submit a written request to the commissioner using guidelines provided by the land office. If, in the commissioner's judgment, the requested project should be considered for funding from the land restoration and remediation fund, the commissioner shall direct land office staff to prepare a project proposal in consultation with the requestor.

B. Project proposals shall provide information necessary for the selection and prioritization of projects and shall include:

(1) a statement of need, including how the project addresses land office priorities in 19.2.23.10 NMAC;

(2) the project category (see Subsection A of 19.2.23.8 NMAC);

(3) a detailed estimated total project cost, including a description of project clearance and compliance requirements, an estimate of the cost and time needed for clearance and compliance, an explanation of how clearance and compliance requirements will be funded, and, if applicable, a list of partners or collaborators and their anticipated contributions to the total project cost;

(4) a location description by section, township and range;

(5) a map outlining the treatment area;

(6) an estimate of the acres to be treated or restored;

(7) a description of the current site conditions, including terrain, existing plant communities, and native plant communities adapted to the project location;

(8) a description of the treatment type and specifications, to include project objectives and desired outcomes, a detailed description of the materials to be used, the machinery and labor requirements, and project timing;

(9) a list of current land office lessees within the treatment area, with contact information;

(10) a description of potential impacts to biological and cultural resources; and

(11) a description of the procurement requirements for the project, such as contracting or bidding requirements.

[19.2.23.9 NMAC - N, 10/31/2017]

19.2.23.10 SELECTION OF PROJECTS:

In considering which projects to fund, the commissioner will give consideration to the following priorities:

A. emergency treatments requiring a timely response to any situation that presents an imminent and substantial danger to life, public health, property, or the environment;

B. projects that:

(1) protect communities by reducing the risk of wildfire or the risk of harm to water quality and quantity;

(2) restore or remediate threats to forests, grasslands, or watersheds that have been identified by the commissioner as priority resources;

(3) involve in-kind or matching contributions for twenty percent or more of the total project cost;

(4) provide an equitable, statewide geographic distribution of funds;

(5) build on previous expenditures or leverage resources;

C. projects that have a high probability of successful implementation, including the following considerations:

(1) ability to meet procurement requirements;

(2) time required for and availability of other sources of funding to complete clearance and compliance requirements; and

(3) total project cost, including matching and in-kind contributions.

[19.2.23.10 NMAC - N, 10/31/2017]

19.2.23.11 COST RECOVERY:

A. For any expenditure made from the restoration and remediation fund, the commissioner shall attempt to recover the project costs from any person or entity that may bear liability for that project under any lease, easement, or other agreement with the state land office, or by statute, including the Voluntary Remediation Act (Chapter 74,

Article 4G NMSA 1978), the New Mexico Mining Act (Chapter 69 Article 36 NMSA 1978), the Surface Mining Act (Chapter 69, Article 25A NMSA 1978), the Oil and Gas Act, (Chapter 70, Article 2 NMSA 1978), the Water Quality Act (Chapter 74, Article 6 NMSA 1978), the Solid Waste Act (Chapter 74, Article 9, Sections 1-42, 72-73 NMSA 1978), or the Hazardous Waste Act (Chapter 74, Article 4 NMSA 1978).

B. Prior to making an expenditure from the restoration and remediation fund for which the commissioner will seek to recover project costs, the commissioner shall send written notice notifying the person or entity, if known, that the commissioner may initiate an action to recover project costs. Notwithstanding the foregoing, lack of written notice does not waive the commissioner's right to recover project costs from any person or entity that may bear liability for the project.

[19.2.23.11 NMAC - N, 10/31/2017]

PART 24: CULTURAL PROPERTIES PROTECTION

19.2.24.1 ISSUING AGENCY:

Commissioner of Public Lands - New Mexico State Land Office - 310 Old Santa Fe Trail - P.O. Box 1148 - Santa Fe, New Mexico 87501.

[19.2.24.1 NMAC - N, 12/01/2022]

19.2.24.2 SCOPE:

This part pertains to the identification and protection of cultural properties on state trust lands.

[19.2.24.2 NMAC - N, 12/01/2022]

19.2.24.3 STATUTORY AUTHORITY:

The commissioner is the executive officer of the state land office, pursuant to Section 19-1-1 NMSA 1978. The commissioner's authority to manage, control, and care for state trust lands is found in N.M. Const., art. XIII, Section 2 and in Section 19-1-1 NMSA 1978. The New Mexico Cultural Properties Protection Act, Sections 18-6A-1 to 18-6A-6 NMSA 1978, requires the state land office, as an agency with jurisdiction over state land, to exercise due caution to ensure that cultural properties on state trust lands are not inadvertently damaged or destroyed. The New Mexico Cultural Properties Act, Sections 18-6-1 to 18-6-17 NMSA 1978, authorizes the commissioner to initiate action against any person who violates the Cultural Properties Act by causing damage to or destroying cultural properties located on state trust lands. The authority to promulgate this part is found in Section 19-1-2 NMSA 1978.

[19.2.24.3 NMAC - N, 12/01/2022]

19.2.24.4 DURATION:

Permanent.

[19.2.24.4 NMAC - N, 12/01/2022]

19.2.24.5 EFFECTIVE DATE:

December 1, 2022 unless a later date is cited at the end of a section.

[19.2.24.5 NMAC - N, 12/01/2022]

19.2.24.6 OBJECTIVE:

The objective of this part is to establish and maintain processes to proactively identify cultural properties on state trust lands to ensure that such properties are not damaged or destroyed, by generally requiring informational reviews and archaeological surveys before surface disturbing activity on state trust lands takes place, requiring avoidance and mitigation of damage to cultural properties, and providing mechanisms to enforce protections for cultural properties. This part applies to all state trust lands, the surface of which is held in trust by the commissioner.

[19.2.24.6 NMAC - N, 12/01/2022]

19.2.24.7 DEFINITIONS:

As used in 19.2.24 NMAC, the following terms have the meaning set forth in this section unless otherwise indicated in the text of this rule:

A. "Archaeological survey" or "Survey" means a visual inspection of land to examine, identify, record, evaluate, and interpret cultural properties, which may include communications with potentially impacted tribes and may include limited tests but shall not include excavation or test excavation, as provided in 4.10.15 NMAC. An archaeological survey is conducted by an archaeologist who meets the professional qualification standards in accordance with 4.10.8 NMAC.

B. "Area of potential effect" or "APE" means the geographic area or areas within which a project may directly or indirectly cause changes in the character or use of a cultural property, if any such properties exist, as provided in 4.10.15 NMAC. The APE is influenced by the scale and nature of the project, variation in topography and vegetation, and the results of consultations, and may be different for different kinds of effects caused by the undertaking and may include a buffer.

C. "ARMS inspection" means a search of the New Mexico cultural resources information system (NMCRIS) and the other cultural resource records maintained by the archaeological records management section (ARMS) of the historic preservation

division of the New Mexico department of cultural affairs, in accordance with 4.10.15.9 NMAC.

D. "Commissioner" means the commissioner of public lands. The commissioner is the executive officer of the state land office and may delegate to state land office staff the performance of duties required of the commissioner under this rule.

E. "Cultural property" means a structure, place, site, object, or resource having historic, archaeological, scientific, architectural, or other cultural significance. A cultural property includes a property listed on or eligible for inclusion on either the New Mexico register of cultural properties pursuant to the Cultural Properties Act, or listed on or eligible for listing on the national register of historic places pursuant to the National Historic Preservation Act, 54 U.S.C. 300101 et seq.

F. "Cultural Properties Act" means the New Mexico Cultural Properties Act, Sections 18-6-1 through 18-6-17 NMSA 1978.

G. "Cultural Properties Protection Act" means the New Mexico Cultural Properties Protection Act, Sections 18-6A-1 through 18-6A-6 NMSA 1978.

H. "Party" means any person applying to the commissioner for a lease, sublease, easement, permit, license, grant, amendment, certificate or other instrument issued by the commissioner of public lands; any person to whom the commissioner has issued a lease, sublease, easement, permit, license, grant, amendment; certificate or other instrument; and any person who is otherwise lawfully present and conducting activities on state trust lands, including well operators and unit operators.

I. "Person" is a natural person or group of persons, or a partnership, corporate entity, association or organization, governmental entity, or any other legal entity.

J. "Project" means any surface disturbing activity or proposed surface disturbing activity on state trust lands that requires a lease, sublease, easement, permit, license, grant, amendment, certificate, or other entitlement from the commissioner, as well as any surface disturbing activity that is directly undertaken by the state land office. Project activity includes temporary work spaces and installation surface disturbing activities.

K. "State historic preservation officer" or "SHPO" means the individual appointed pursuant to Section 18-6-8 NMSA 1978 of the Cultural Properties Act who serves as the director of the historic preservation division of the New Mexico department of cultural affairs.

L. "State land office" means the New Mexico state land office.

M. "State trust lands" or "trust lands" means those lands, their natural products, and all assets derived from them, which are under the care, custody, and control of the commissioner.

N. "Surface disturbance" or "Surface disturbing" means any ground disturbing or ground breaking activity, including but not limited to blading, scraping, contouring, excavating, trenching, drilling, digging, burying, paving, covering, or compacting soil surfaces, whether or not previously disturbed, and whether or not the person engaged in those activities is authorized to occupy or use state trust lands.

O. "Tribe" means any tribe, nation, or pueblo that may or may not be federally recognized but has indicated cultural affinity to New Mexico areas as documented in the tribal consultation list maintained by the historic preservation division of the New Mexico department of cultural affairs.

P. "Trust" means the trust established by the Enabling Act (Act of June 20, 1910, 36 Statutes at Large 557, Chapter 310) and that trust's assets, which are administered through the state land office by the commissioner.

[19.2.24.7 NMAC - N, 12/01/2022]

19.2.24.8 GENERAL REQUIREMENTS:

A. Avoidance of damage. Any persons engaged in activities on state trust lands are subject to the requirements of the Cultural Properties Act, the Cultural Properties Protection Act, and 19.2.24.13 NMAC. Persons shall not disturb, dislodge, damage, destroy, or remove any cultural properties on state trust lands. Any project on state trust lands that has the potential to directly or indirectly damage cultural properties is additionally subject to the requirements of Subsections B, C, D, and E of 19.2.24.8 NMAC.

B. Signed acknowledgment. Parties shall acknowledge, on a form prescribed by the commissioner, that they understand and agree to comply with applicable laws and rules pertaining to the protection of cultural properties on state trust lands.

C. ARMS inspection and survey. Prior to conducting surface disturbing activities, parties shall cause a permitted archaeologist to submit to the state land office an ARMS inspection of the entire area of potential effect. More detailed guidance regarding the submission process for ARMS inspection and surveys under this subpart will be provided in an instructional document to be published on the state land office's website and also will be provided to any party or other interested person upon request. The time when that submission is required is provided in Subsection E of this section. In the best interest of the trust, the commissioner, in the commissioner's discretion, may elect to provide the ARMS inspection for any particular portion of state trust land. The following subparagraphs describe the necessary steps to be taken after an ARMS inspection is conducted.

(1) If the ARMS inspection demonstrates that the entire area of potential effect has been surveyed, and that no cultural properties are located within the area of potential effect, then the party shall cause a permitted archaeologist to submit the ARMS inspection to the state land office, in which case the required archaeological review is complete.

(2) If the ARMS inspection or survey demonstrates that the entire area of potential effect has been surveyed, and cultural properties are identified within the area of potential effect, the party shall cause a permitted archaeologist to submit the most recent applicable survey(s) to the state land office. If a prior survey is submitted that is more than ten years old, the state land office will determine if the survey conforms to the requirements of 4.10.15 NMAC and if it does not, may require an updated survey. The party shall be subject to the requirements of Subsection D of this section.

(3) If the ARMS inspection demonstrates that the entire area of potential effect has not been surveyed, a complete archaeological survey must be conducted by a permitted archaeologist in accordance with the requirements of 4.10.15 NMAC and submitted to the state land office. The new survey need not include areas already subjected to acceptable surveys. The party shall be subject to the requirements of Subsection D of this section, if cultural properties are identified in the survey.

D. Compliance measures. For any application or project where any survey has identified cultural properties within the area of potential effect, the party shall cause a permitted archaeologist to develop and submit to the state land office compliance measures related to project siting, and avoidance and mitigation of damage to cultural properties; those compliance measures may be included within the survey that is submitted to the state land office on behalf of any party, or may be submitted separately. The state land office will review any applicable compliance measures, and determine if those measures are sufficient to protect or mitigate damages to the affected cultural properties, a review that may include consultation with the SHPO and shall include consultation with any impacted tribe. In the best interests of the trust, the state land office may require additional or different compliance measures as a condition to approval of the application or project. This review process will be completed within 60 calendar days of submission of an administratively complete submission (ARMS inspection or survey, and any applicable compliance measures), but that time period may be extended in the commissioner's discretion for up to an additional 60 calendar days as may be necessary to ensure appropriate review. Upon commissioner approval, the relevant leasing division shall include appropriate compliance measures in the relevant lease, easement, or other instrument, if applicable, consistent with applicable statutes and rules.

E. Timing of requirements. The undertakings required in Subsections A, B, and C of 19.2.24.8 NMAC are required at different points in time depending on the nature of the application or project, as follows:

(1) Leases, easements, or other instruments not requiring subsequent approval. For applications or projects where no review or approval is required after issuance of the applicable lease, easement, or other instrument: the acknowledgment specified in Subsection B of 19.2.24.8 NMAC, an ARMS inspection and survey specified in Subsection C of 19.2.24.8 NMAC, and any applicable compliance measures specified in Subsection D of 19.2.24.8 NMAC, are required at the time of submission of the application for the lease, easement, or other instrument, and in any event prior to commencement of surface-disturbing activities.

(2) Leases, easements, or other instruments requiring subsequent approval. For applications or projects where subsequent review by the commissioner is required after a lease, easement, or other instrument may be issued, and before project activities may take place: the acknowledgment specified in Subsection B of 19.2.24.8 NMAC is required at the time of submission of application or bid. The ARMS inspection or survey specified in Subsection C of 19.2.24.8 NMAC, and any applicable compliance measures specified in Subsection D of 19.2.24.8 NMAC, are required at the time of submission of the project plans or, if no project plans are required to be submitted, at least 60 calendar days prior to commencement of surface disturbing activities.

(3) Oil and gas leases. This subpart applies to oil and gas leases. The acknowledgment specified in Subsection B of 19.2.24.8 NMAC is required prior to issuance of a lease or any lease assignment. For all surface disturbing activities (whether under a new or existing lease or lease assignment), the description and location of the project, the ARMS inspection or survey specified in Subsection C of 19.2.24.8 NMAC, and any applicable compliance measures specified in Subsection D of 19.2.24.8 NMAC, must be received, reviewed, and approved by the state land office prior to any surface disturbing activity, along with the acknowledgment specified in Subsection B of 19.2.24.8 NMAC if one has not already been submitted by the party undertaking the surface disturbing activity for that particular lease. Upon authorization from the state land office, the party may commence the surface disturbing activity.

(4) Mining leases. This subpart applies to leases for mining as specified in Chapter 19, Articles 8-9 NMSA 1978, and 19.2.2, 19.2.3, 19.2.4, 19.2.5, 19.2.6, and 19.2.7 NMAC. The acknowledgment specified in Subsection B of 19.2.24.8 NMAC is required at the time of submission of an application or bid to lease. The ARMS inspection or survey specified in Subsection C of 19.2.24.8 NMAC and any applicable compliance measures specified in Subsection D of 19.2.24.8 NMAC, are required at the time of submission of an application for a mining permit with the mining and minerals division of the New Mexico energy, minerals, and natural resources department, or equivalent permitting agency, for leases that are subject to 19.2.2 and 19.2.6 NMAC; and prior to commencement of any surface disturbing activity for all other types of mineral leases.

F. Archaeological survey permits and notifications to survey. Individuals with valid archaeological survey permits issued by the New Mexico cultural properties review

committee, as provided in 4.10.8 NMAC, are preapproved to access state trust lands for the sole purpose of conducting archaeological surveys pursuant to this rule, without the need for a separate authorization from the commissioner. For other project purposes (that is, other than archaeological surveys), parties who are already authorized to access and occupy particular state trust lands by virtue of a lease or easement are not required to obtain separate authorization from the commissioner. All other persons needing access to state trust lands for other project purposes (that is, other than archaeological surveys) shall apply for a right of entry permit on a form prescribed by the commissioner, and the state land office will process such application on a timely basis. The state land office should be notified at least 15 calendar days before an archaeological survey is conducted, except for exigent situations, including but not limited to responses to spills or hazardous conditions, in which case the state land office should be notified as soon as possible and in any event prior to the survey.

[19.2.24.8 NMAC - N, 12/01/2022]

19.2.24.9 ACKNOWLEDGMENT-ONLY REQUIREMENTS:

The acknowledgement specified in Subsection B of 19.2.24.8 NMAC shall be included with applications for the following, with no ARMS inspection or survey as specified in Subsection C of 19.2.24.8 NMAC or compliance measures as specified in Subsection D of 19.2.24.8 NMAC, unless those additional measures are specifically required by the commissioner for a particular application:

A. renewals or reissues, assignments, conversions, and subleases of existing grants, leases or permits, and agricultural improvement replacements, where no new surface disturbance will occur, or when the area of potential effect of a new project activity is entirely within a previously disturbed area of the same nature and extent of disturbance;

B. applications for new agricultural leases in open acreage or through competitive bid; and

C. applications for non-surface disturbing rights of entry, with the final decision vested with the commissioner about whether or not the relevant activity is surface disturbing.

[19.2.24.9 NMAC - N, 12/01/2022]

19.2.24.10 EXEMPTIONS:

A. The following activities are exempt from the acknowledgment, ARMS inspection and survey, and compliance measures requirements of this rule. These exemptions do not provide authorization to enter or occupy state trust lands, which must be granted by the commissioner under a valid lease, easement, permit, or other instrument:

(1) law enforcement, emergency response, or natural disaster response ("emergency response") activities, whether or not undertaken by or in coordination with the state land office, that are necessary to protect immediate threats to public health, safety, or the environment, including but not limited to firefighting, flood management, or for controlling, containing, or capturing releases of hazardous or harmful materials. If the state land office is not already involved in undertaking or coordinating the emergency response, it shall be notified of the response as soon as practicable. Any known cultural property within the area of emergency response should be monitored to the extent practicable so that any adverse effects to the cultural property can be avoided, mitigated, or minimized;

(2) administrative actions performed by the state land office, such as executive orders or rule making activities, and any internal agency processes or decisions that do not create new surface disturbance;

(3) memoranda of understanding or agreements to cooperate executed by the commissioner;

(4) easements, leases, or other instruments granted by the commissioner to any person that do not directly expand current surface uses or create new surface disturbance;

(5) recreational access permits and educational access permits, applications for such permits, non-surface disturbing natural resource authorizations, or activities that already require the presence of an archaeological monitor such as special use agreements;

(6) projects analyzed under the National Environmental Policy Act of 1969, 42 U.S.C. Section 4321 et seq. and the National Historic Preservation Act of 1966, 16 U.S.C. Section 470 et seq., and their implementing regulations, so long as such analysis includes impacted state trust lands. For such projects, the party shall submit a copy to the state land office of the survey or portions thereof pertaining to impacted state trust lands;

(7) acquisition or disposition of lands through exchange or sale; and

(8) plugging, restoration, remediation, or reclamation activities that do not involve new surface disturbing activity outside the authorized boundaries of any existing roads, rights of way, well pads, associated oil and gas facilities or other structures.

B. Parties or other persons engaged in the activities exempted in Subsection A of 19.2.24.10 NMAC remain subject to the requirements of the Cultural Properties Act, the Cultural Properties Protection Act, and 19.2.24.13 NMAC.

C. Notwithstanding any other provision of this part, the commissioner may require an ARMS inspection or survey for any project when determined to be in the best interest of the trust.

[19.2.24.10 NMAC - N, 12/01/2022]

19.2.24.11 CONFIDENTIALITY:

Consistent with the Cultural Properties Act, Section 18-6-11.1 NMSA 1978 and Section 19-1-2.1 NMSA 1978, any information in the custody of the state land office concerning the location of cultural properties, the preservation of which is in the interest of the state of New Mexico, shall remain confidential and not subject to inspection under the New Mexico Inspection of Public Records Act, Section 14-2-1 to Section 14-2-12 NMSA 1978 unless the commissioner determines that the dissemination of such information will further the purposes of the Cultural Properties Act and will not create a risk of loss of cultural properties.

[19.2.24.11 NMAC - N, 12/01/2022]

19.2.24.12 ENFORCEMENT AND IMPLEMENTATION:

A. In the event any party becomes aware of actual or threatened damage to cultural properties on state trust lands where that party is conducting project activities or has filed an application to conduct project activities, the party shall immediately notify the state land office, which will then notify the SHPO, and the party shall immediately suspend all project activities in the immediate area of the damage or the threatened cultural property, in consultation with the state land office. Project activities shall remain suspended until the state land office, in consultation with the SHPO and any impacted tribe, approves resumption of those activities, and such approval may be conditioned on the party's adoption of compliance measures relating to project siting, avoidance, or mitigation of impacts to the cultural properties at issue. If human remains are uncovered, project activities within 50 feet shall stop immediately and the party shall notify the local law enforcement agency with jurisdiction, the state land office and the SHPO pursuant to the Cultural Properties Act, Subsection C of Section 18-6-11.2 NMSA 1978. Subsequent response by local law enforcement is governed by 4.10.11 NMAC.

B. In the event a party conducts project activities without first performing a survey or does not comply with any applicable avoidance and mitigation measures established by the survey or contained within the relevant lease, permit, or other instrument, and cultural property is damaged in the process, the party will be required to conduct an archaeological damage assessment at the party's own expense and will be liable for damages as determined by the archaeological damage assessment in the amount equal to the cost of restoration, stabilization, and interpretation of the damaged cultural property. If the party failed to conduct an archaeological survey as required by this rule prior to conducting surface disturbing activity, that party shall undertake such survey after the fact. In addition, the commissioner may recover an amount equal to twice the

cost of restoration, stabilization, and interpretation of the damaged cultural property, in accordance with the Cultural Properties Act, Section 18-6-9.2 NMSA 1978.

C. All parties that are subject to any provision of 19.2.24.8 and 19.2.24.9 NMAC shall promptly provide to the state land office all records relating to compliance with this part upon request.

D. As provided by the Cultural Properties Act, Section 18-6-9.2 NMSA 1978 the commissioner may initiate a civil action against any person violating the Cultural Properties Act on or with respect to state trust lands. This remedy is not exclusive and does not limit the rights or remedies that are otherwise available to the commissioner and the state land office under applicable law, including action against a lease, easement, or other instrument issued by the commissioner.

E. The commissioner may refer a criminal violation of the Cultural Properties Act, Sections 18-6-9, 18-6-9.1, and 18-6-9.3 NMSA 1978 to the New Mexico attorney general or to the district attorney in whose district the violation took place.

F. The state land office may undertake monitoring and staff training to protect against damage to cultural properties.

G. The commissioner will develop instructional materials and forms necessary for the implementation of this rule.

[19.2.24.12 NMAC - N, 12/01/2022]

PART 25-99: [RESERVED]

PART 100: RELATING TO OIL AND GAS LEASES

19.2.100.1 ISSUING AGENCY:

Commissioner of Public Lands, New Mexico State Land Office, P.O. Box 1148, Santa Fe, New Mexico 87504-1148.

[19.2.100.1 NMAC - Rp, 19.2.100.1 NMAC, 6/30/2016]

19.2.100.2 SCOPE:

This rule pertains to all oil and gas leases on those lands held in trust by the commissioner of public lands under the terms of the Enabling Act and subsequent legislation (trust lands).

[19.2.100.2 NMAC - Rp, 19.2.100.2 NMAC, 6/30/2016]

19.2.100.3 STATUTORY AUTHORITY:

The commissioner's authority to manage trust lands is found in Article 13 of the constitution of New Mexico, and in Section 19-1-1 NMSA 1978. The commissioner's authority to promulgate this rule is found in Section 19-1-2 NMSA 1978. The commissioner's authority over lessees and leases for the exploration, development and production of oil and natural gas on trust lands is found in Sections 19-10-1 *et seq* NMSA 1978.

[19.2.100.3 NMAC - Rp, 19.2.100.3 NMAC, 6/30/2016]

19.2.100.4 DURATION:

Permanent.

[19.2.100.4 NMAC - Rp, 19.2.100.4 NMAC, 6/30/2016]

19.2.100.5 EFFECTIVE DATE:

June 30, 2016, unless a later date is cited at the end of a section.

[19.2.100.5 NMAC - Rp, 19.2.100.5 NMAC, 6/30/2016]

19.2.100.6 OBJECTIVE:

The objective of 19.2.100 NMAC is to provide for the orderly and lawful administration, and the appropriate exploration, development and production, of oil and natural gas on trust lands.

[19.2.100.6 NMAC - Rp, 19.2.100.6 NMAC, 6/30/2016]

19.2.100.7 DEFINITIONS:

"**Schedule of fees**" means a list of fees that must be paid for performance of certain administrative functions. The schedule of fees shall be published on the state land office website and is subject to change at the discretion of the commissioner. Unless otherwise noted in the schedule of fees or in this rule, the fee shall be non-refundable.

[19.2.100.7 NMAC - Rp, 19.2.100.7 NMAC, 6/30/2016]

19.2.100.8 PRODUCTS INCLUDED:

The commissioner is authorized to execute and issue oil and gas leases covering state common school and institutional trust lands as lessor in the name of the state of New Mexico. The form of basic lease is statutory and includes carbon dioxide. All leases issued after June 9, 1963, include helium. Leases issued on or before June 9, 1963, do not include helium gas unless stipulated as provided in 19.2.100.55 NMAC. All forms are provided by the land office.

[19.2.100.8 NMAC - Rp, 19.2.100.8 NMAC, 6/30/2016]

19.2.100.9 CLASSIFICATION INTO DISTRICTS:

There are two types of districts, known respectively as restricted districts and non or unrestricted districts. A restricted district comprises an area usually in a proven oil and gas area and is created by statute or by authority of the commissioner. A non- or unrestricted district includes all lands outside the exterior boundaries of restricted districts.

[19.2.100.9 NMAC - Rp, 19.2.100.9 NMAC, 6/30/2016]

19.2.100.10 LANDS SUBJECT TO LEASE:

All state lands presently open for oil and gas lease purposes, or lands which may become open in the future due to the cancellation or expiration of leases, or for any other reason, may be leased only by competitive bid after public notice in accordance with 19.2.100.25 NMAC hereof, except as provided in 19.2.100.12 NMAC.

[19.2.100.10 NMAC - Rp, 19.2.100.10 NMAC, 6/30/2016]

19.2.100.11 RESTRICTED DISTRICTS - LEASING:

A. All lands within a restricted district are classified as restricted lands and no tract of such lands shall be leased without being further categorized by the commissioner as either regular or premium based upon five factors: oil and gas trends; oil and gas traps; reservoir volume and recovery rating; lease bonus rating; and exploration and activity. A percentage of zero percent to twenty percent shall be allocated to each factor. In allocating percentages, the following procedures and criteria shall be used:

(1) Oil and gas trends, i.e., where depositional and structural conditions are favorable for accumulation of oil and gas, shall be determined as accurately as possible by the commissioner upon the advice of a qualified geologist using drilling patterns, geological society data, well records and logs, available seismic surface and subsurface geological information and structural maps;

(2) The likelihood of locating structural or stratigraphic oil and gas traps necessary for the accumulation of oil or gas in commercial quantities shall be determined by the commissioner upon the advice of a qualified geologist and a petroleum engineer based upon available seismic and geological data;

(3) Reservoir volume and recovery rating shall be determined considering the nearest known reservoir conditions which may be reasonably assumed to be applicable. Known porosity, permeability, water saturation, pressures and recovery factors shall be included when available and shall be utilized by a qualified petroleum engineer in recommending a reservoir volume and recovery rating;

(4) Lease bonus rating shall be based upon all available recent leasing data which may be reasonably assumed to be applicable. In the absence of sufficient recent leasing data, drilling patterns, geological trends, available seismic data and known or reasonably assumed structural features may be considered in determining the lease bonus rating; and

(5) Exploration and drilling activity shall be determined considering all available information which may include drilling patterns, approved drilling permits, progress reports of drilling wells, workover notices and other information which may be reasonably assumed to be applicable.

B. If the total percentage of all factors for a tract of land is less than seventy-five percent, the tract shall be categorized as regular. If the total percentage of all factors for a tract of land is seventy-five percent or more, the tract shall be categorized as premium.

[19.2.100.11 NMAC - Rp, 19.2.100.11 NMAC, 6/30/2016]

19.2.100.12 UNRESTRICTED DISTRICTS:

Lands in an unrestricted district are ordinarily leased by offering them for sale at public auction to the highest and best bidder, as hereinafter explained and in accordance with 19.2.100.25 NMAC *et seq.* However, such lands may be leased on application without bidding if, in the opinion of the commissioner, the best interests of the trust will be served by so doing.

[19.2.100.12 NMAC - Rp, 19.2.100.12 NMAC, 6/30/2016]

19.2.100.13 TERM AND FORM OF LEASES:

The commissioner shall issue oil and gas leases upon one of three statutory forms as follows, the form and royalty rate to be specified in the regular notice of public lease sale:

A. For lands classified as non-restricted lands under Section 19-10-3 NMSA 1978 and 19.2.100.9 NMAC, the commissioner shall use the exploratory lease form as set forth in Section 19-10-4.1 NMSA 1978.

B. For lands classified as restricted lands and categorized as regular under Section 19-10-3 NMSA 1978 and 19.2.100.11 NMAC, the commissioner, in the commissioner's discretion, may use the exploratory lease form as set forth in Section 19-10-4.1 NMSA 1978 or the discovery lease form as set forth in Section 19-10-4.2 NMSA 1978.

C. For lands classified as restricted lands and categorized as premium under Section 19-10-3 NMSA 1978 and 19.2.100.11 NMAC, the commissioner, in the commissioner's discretion, may use the exploratory lease form as set forth in Section

19-10-4.1 NMSA 1978, the discovery lease form as set forth in Section 19-10-4.2 NMSA 1978 or the development lease form as set forth in Section 19-10-4.3 NMSA 1978; provided, that in using the development lease form for a tract receiving less than 90 total percentage points under Section 19-10-3 NMSA 1978 and 19.2.100.11 NMAC, the royalty rate shall not exceed three-sixteenths.

[19.2.100.13 NMAC - Rp, 19.2.100.13 NMAC, 6/30/2016; A, 6/11/2019]

19.2.100.14 ANNUAL RENTAL - PRIMARY AND SECONDARY TERM:

All leases issued by the commissioner shall provide for an annual rental to be paid by the lessee, whether or not a lease is producing oil or gas. The initial rental shall be fixed by the commissioner, but in no case shall the initial amount be less than twenty-five cents (\$0.25) nor more than one dollar (\$1.00) per acre. For ten-year leases, if production in paying quantities is obtained during the primary term of the first five years, then the initial rental rate shall be applicable as long as the lease is held by such production. If no production in paying quantities is obtained during the primary term and the lease enters the secondary term of five years, the rental for the remaining life of the lease shall be either double that of the primary term or the highest rate of rental prevailing in the area at the commencement of the secondary term, whichever is higher.

[19.2.100.14 NMAC - Rp, 19.2.100.14 NMAC, 6/30/2016]

19.2.100.15 MINIMUM CHARGE:

The minimum initial charge for any lease shall be one hundred dollars (\$100.00) or the minimum rental rate, whichever is greater, plus the application fee as set forth in the schedule of fees. Minimum rental rate is computed by multiplying the rental rate by the acreage in each advertised tract.

[19.2.100.15 NMAC - Rp, 19.2.100.15 NMAC, 6/30/2016]

19.2.100.16 LIMITATION OF ACREAGE:

Unless otherwise approved and granted by the commissioner, no oil and gas lease shall be issued to cover more than the total number of acres of two sections of land to be wholly or partially included in the lease, regardless of the number of acres within those sections, provided that the lease may incorporate lands within more than two different sections of land.

[19.2.100.16 NMAC - Rp, 19.2.100.16 NMAC, 6/30/2016]

19.2.100.17 DIFFERENT RENTAL DISTRICTS - HIGHEST RENTAL PREVAILING:

Where part of the lands in any lease are situated in one rental district and part thereof in another, or other districts, the lessee shall pay the rental prevailing in the district wherein part of the lands affected are situated having the highest rental.

[19.2.100.17 NMAC - Rp, 19.2.100.17 NMAC, 6/30/2016]

19.2.100.18 [RESERVED]

[19.2.100.18 NMAC - Rp, 19.2.100.18, 6/30/2016]

19.2.100.19 CLEAR-LIST OF LANDS FROM UNITED STATES ESSENTIAL BEFORE ISSUANCE OF LEASE:

Ordinarily, leases will not be issued for selected lands which have not been clear-listed or for any lands where the records of the state land office show the title of the state to be in question, controversy or dispute.

[19.2.100.19 NMAC - Rp, 19.2.100.19 NMAC, 6/30/2016]

19.2.100.20 LIMITATION TO NOT MORE THAN TWO PERSONS OR LEGAL ENTITIES - TRUST LIMITATIONS - WAIVERS:

As a matter of administration and without affecting property rights in oil and gas leases, whenever more than two persons or legal entities apply for the issuance of an oil and gas lease, the commissioner shall grant the lease in the names of no more than two persons acting as attorneys-in-fact for all potential interest owners. In the case of a trust, the trust must be express and a copy of the creating document filed with the commissioner. If more than two trustees are named, a lease shall be granted in the names of no more than two trustees acting as attorneys-in-fact for all trustees. The limitations in this rule may be waived by the commissioner for good cause.

[19.2.100.20 NMAC - Rp, 19.2.100.20 NMAC, 6/30/2016]

19.2.100.21 LEASE WITHIN 25 MILES SQUARE - RIGHT OF COMMISSIONER:

No one lease may be issued for lands which will not fall within the area of a square twenty-five miles long by twenty-five miles wide; however, this requirement may be waived by the commissioner in any proper case.

[19.2.100.21 NMAC - Rp, 19.2.100.21 NMAC, 6/30/2016]

19.2.100.22 LIMITATION TO NOT MORE THAN ONE BENEFICIARY INSTITUTION:

Leases will not be issued covering lands belonging to more than one beneficiary institution.

[19.2.100.22 NMAC - Rp, 19.2.100.22 NMAC, 6/30/2016]

19.2.100.23 SURETY TO PROTECT SURFACE PURCHASER AND LESSEE - WAIVERS:

A. Before any lessee shall commence development or operations, including any and all prospecting activities upon the lands, such lessee or operator shall execute and file with the commissioner a good and sufficient bond or other surety, in an amount to be fixed by the commissioner but not less than ten thousand dollars (\$10,000) in favor of the state of New Mexico for the benefit of the appropriate trust beneficiary and the state's contract purchasers, patentees and surface lessees, to secure payment to the extent allowed by law for such damage to their interests and tangible improvements upon such lands as may be suffered by reason of development, use and occupation of the lands by the oil and gas lessee.

B. A bond or other surety in the minimum amount of ten thousand dollars (\$10,000) for each lease shall be deemed sufficient unless and until the commissioner determines, or one or more surface lessees or purchasers show the commissioner, that such an amount is not adequate in a given case. Provided, however, that if a lessee holds more than one oil and gas lease, a blanket bond or other surety in the amount of twenty thousand dollars (\$20,000) will be acceptable unless and until the commissioner determines, or one or more surface lessees or purchasers show the commissioner, that such an amount is not adequate in a given case. Provided further, that if any purchaser, patentees or surface lessees shall file with the commissioner a waiver duly executed and acknowledged by the purchaser, patentee or surface lessee of the purchaser's, patentee's or surface lessee's right to require such bond or other surety pursuant to Section 19-10-26 NMSA 1978 the development, occupation and use of the lands by the oil and gas lessee may in the discretion of the commissioner be permitted without said surety.

C. With the approval of the commissioner, in lieu of the single and blanket bonds for oil and gas lessees, a twenty-five thousand dollar (\$25,000) bond or other surety may be used at the option of lessee for the use and benefit of the commissioner, to secure surface improvement damage and the performance of the lessee under one or more state leases or permits for minerals, oil and gas, coal or geothermal resources or as holder under one or more state rights of way or easements which the lessee has executed with the commissioner. The lessee will be obligated to perform and keep all terms, covenants, conditions and requirements of all state leases for minerals, oil and gas, coal or geothermal resources and of all state rights of way and easements executed with the commissioner, including the payment of royalties when due and compliance with all established mining plans and reclamation requirements.

[19.2.100.23 NMAC - Rp, 19.2.100.23 NMAC, 6/30/2016; A, 6/11/2019]

19.2.100.24 [RESERVED]

[19.2.100.24 NMAC - Rp, 19.2.100.24, 6/30/2016]

19.2.100.25 COMPETITIVE BIDDING ON ALL LANDS WITHIN RESTRICTED DISTRICTS:

No oil and gas leases upon any state lands within any restricted district will be issued except to the highest and best bidder after competitive offers by sealed bids or a public auction. Regularly advertised sales covering lands within restricted areas are held on the third Tuesday of each month, or on the next business day following where the third Tuesday falls on a legal holiday. Lands outside the restricted districts may also be offered on said third Tuesday when it is deemed advisable. The commissioner may, in the commissioner's discretion, hold oil and gas lease sales, as aforesaid, by a combination of the methods set out above, and may also hold any sale at the county seat of the county where the lands or the greater part thereof are situated.

[19.2.100.25 NMAC - Rp, 19.2.100.25 NMAC, 6/30/2016; A, 6/11/2019]

19.2.100.26 NOTICE OF SALE:

On or before ten days prior to the date of any such sale, notice of the same shall be posted in a conspicuous place in the state land office specifying the place, date and hour of the sale, and containing a description of the lands to be offered for lease, with a statement of the minimum bid which will be accepted.

[19.2.100.26 NMAC - Rp, 19.2.100.26 NMAC, 6/30/2016]

19.2.100.27 ACCEPTANCE OF BIDS:

Up to the hour set for such sale, the commissioner will receive sealed bids for an oil and gas lease upon any tract of land described in the posted notice. All sealed bids submitted will be opened at the hour mentioned in the notice, and the lease will be awarded to the highest and best bidder, subject to the discretionary right of the commissioner to reject any bid.

[19.2.100.27 NMAC - Rp, 19.2.100.27 NMAC, 6/30/2016]

19.2.100.28 WHERE NO SEALED BIDS RECEIVED:

Each of said tracts described in the notice on which no sealed bids are received may be offered for lease at public auction to the highest and best bidder, for cash, and lease will be awarded to such highest and best bidder if the offer shall be deemed acceptable. If no sealed bids or other bids are received for any tract described in the notice, such tract will be withdrawn until further notice at the discretion of the commissioner.

[19.2.100.28 NMAC - Rp, 19.2.100.28 NMAC, 6/30/2016]

19.2.100.29 APPLICATION UNDER OATH - FEES:

Application for lease accompanying sealed bids shall be executed under oath by the applicant, or by the applicant's agent or attorney, duly authorized in writing, or by an officer or attorney-in-fact of a corporation, if application is by a corporation, and must be accompanied by a bid fee as set forth in the schedule of fees (applied toward application fee for successful bidder) and the amount of the first year's rental and bonus offered. Unless approval of the commissioner for use of non-certified exchange is obtained, payment shall be made in cash, money order or certified check on a solvent bank. The land office furnishes application blanks upon request.

[19.2.100.29 NMAC - Rp, 19.2.100.29 NMAC, 6/30/2016; A, 6/11/2019]

19.2.100.30 TIE BIDS:

When two or more sealed highest and best bids received for the same tract of land are equal, the commissioner (if such highest and best bidders are present and cannot agree, by stipulation in writing, on how such tract shall be disposed of) shall call such equal highest and best bidders before the commissioner in the state land office (or if such sale is held in the county in which such lands are located, the person conducting such sale shall call such equal highest and best bidders before the person) on the same day such bids are opened, and again offer such tracts at auction to such bidders only, and grant such lease to the then highest and best bidder. If such bidders are not present when such bids are opened, then the commissioner will notify such bidders to submit sealed proposals within 10 days next following the date of the sale at which such bids were determined to be equal.

[19.2.100.30 NMAC - Rp, 19.2.100.30 NMAC, 6/30/2016; A, 6/11/2019]

19.2.100.31 RIGHT TO REJECT ANY AND ALL BIDS - WITHHOLDING FROM LEASING:

The commissioner reserves the right to reject any and all bids not in conformity with law and the posted notice of sale, and to require higher rentals, impose additional restrictions and requirements and to withhold lands from leasing whenever, in the commissioner's discretion, the commissioner shall deem it to be for the best interests of the trust to do so.

[19.2.100.31 NMAC - Rp, 19.2.100.31 NMAC, 6/30/2016; A, 6/11/2019]

19.2.100.32 TRANSFER AND ASSIGNMENT OF OIL AND GAS LEASES:

Any transfer of an oil and gas lease or assignment is considered to convey an interest in real property and is therefore required to be formally executed by the proper parties and upon prescribed forms furnished by the state land office before such transfer or assignment shall be approved by the commissioner. Ordinarily, leases shall be

transferred or assigned in the names of no more than two persons or legal entities as provided in 19.2.100.20 NMAC.

[19.2.100.32 NMAC - Rp, 19.2.100.32 NMAC, 6/30/2016]

19.2.100.33 JOINT TENANTS:

Where an oil and gas lease is held in joint tenancy with the right of survivorship and a tenant dies, the lease shall be considered as belonging to the survivor or survivors and shall be so transferred upon presentation of a certified copy of the death certificate of the deceased tenant and payment of the proper rentals and fees.

[19.2.100.33 NMAC - Rp, 19.2.100.33 NMAC, 6/30/2016]

19.2.100.34 RESIDENT DECEDENT:

To effect transfer of regular interest in state oil and gas leases of a deceased person resident in New Mexico, proper probate proceedings should be had in the county of residence of the deceased and certified copies of such proceedings, showing proper legal authority to transfer, should be filed with the commissioner.

[19.2.100.34 NMAC - Rp, 19.2.100.34 NMAC, 6/30/2016]

19.2.100.35 FOREIGN DECEDENT:

In the event a decedent owner of a lease was resident of a state other than New Mexico, the estate must be probated in the state of such residence and ancillary proceedings conducted in the proper New Mexico court, and certified copies of such proceedings showing proper legal authority to transfer must be filed with the commissioner. Provided, however, where the decedent died on or after July 1, 1976, the lease may be transferred upon the foreign personal representative's compliance with the provisions of the New Mexico Probate Code.

[19.2.100.35 NMAC - Rp, 19.2.100.35 NMAC, 6/30/2016]

19.2.100.36 CO-OPERATIVE AGREEMENTS:

Assignments of acreage committed to unit or co-operative agreements shall meet the requirements of Subsection G of 19.2.100.51 NMAC.

[19.2.100.36 NMAC - Rp, 19.2.100.36 NMAC, 6/30/2016]

19.2.100.37 [RESERVED]

[19.2.100.37 NMAC - Rp, 19.2.100.37, 6/30/2016]

19.2.100.38 LEASE CONTINUED BY PRODUCTION IN PAYING QUANTITIES:

Except as otherwise provided in a co-operative agreement, production in paying quantities upon any part of the acreage included in any state oil and gas lease continues the lease upon every subdivision thereof (whether the same remains in the original lease or is assigned before or after production is had) subject, however, to the continued payment of rentals at the rate in effect at the time of production, and further subject to the implied covenants of development contained in any such lease.

[19.2.100.38 NMAC - Rp, 19.2.100.38 NMAC, 6/30/2016]

19.2.100.39 ASSIGNMENTS TO BE IN TRIPLICATE - ACKNOWLEDGMENT REQUIRED:

Assignments of oil and gas leases shall be filed in triplicate in the office of the commissioner and must be executed and acknowledged in the manner provided for transfer of real estate in New Mexico. The original copy of each assignment will be recorded and filed as a public record in the state land office and one copy returned to the person entitled to same.

[19.2.100.39 NMAC - Rp, 19.2.100.39 NMAC, 6/30/2016]

19.2.100.40 ASSIGNMENTS TO BE RECORDED IN THE LAND OFFICE:

Assignments must be filed with the commissioner for approval within one hundred days after having been signed by the assignor as shown upon the face of the instrument, accompanied by a filing fee as set forth in the schedule of fees. Those presented after expiration of that time shall not be approved unless it can be shown to the satisfaction of the commissioner that extreme hardship will result to one or more of the parties and that no prejudice to the rights of the state will occur. An additional fee as set forth in the schedule of fees will be charged for each such assignment (or each group of assignments if the same basic facts are involved) to cover expense of investigation and records search.

[19.2.100.40 NMAC - Rp, 19.2.100.40 NMAC, 6/30/2016]

19.2.100.41 RESTRICTIONS:

Assignments shall not be accepted nor approved by the commissioner:

A. for less than assignor's entire interest in any legal subdivision (except where transfer is by operation of law);

B. for less than a legal subdivision;

C. in the names of more than two persons or legal entities. (See 19.2.100.20 NMAC);

D. in the name of a trusteeship unless the trust is expressly set forth and not more than two persons are named as trustee;

E. after *lis pendens* is filed;

F. for any assignment containing any language other than the approved form;

G. where the assignment covers acreage included in more than one lease;

H. if the lease is not in good standing; or

I. unless the assignor covenants to the assignee and the commissioner that the assigned leasehold estate is valid and subsisting and that all rental and royalties due thereunder have been properly paid.

[19.2.100.41 NMAC - Rp, 19.2.100.41 NMAC, 6/30/2016]

19.2.100.42 APPROVAL AND FILING WITHHELD:

A. When assignments are accompanied by personal checks, the commissioner reserves the right to withhold approval of any and all assignments until checks are cleared and rentals on the lease from which assignments are made must be fully paid before assignments are subject to filing in the state land office.

B. When an assignment is presented to the commissioner for approval and the address of record of the assignee thereon is the same as that of the assignor, or when such address had not been established on the records of the state land office, or when the approved assignment is to be returned to the assignor, the commissioner reserves the right to withhold approval and filing of the assignment until the assignee has verified, under oath, the address and the assignee's acceptance of the assignment of the lease.

[19.2.100.42 NMAC - Rp, 19.2.100.42 NMAC, 6/30/2016; A, 6/11/2019]

19.2.100.43 EFFECT OF COMMISSIONER'S APPROVAL - MISCELLANEOUS INSTRUMENTS:

Upon approval by the commissioner, the assignor shall be relieved from all obligations owing to the state with respect to the lands embraced in the assignment, and the state shall be likewise relieved from all obligations to the assignor as to the said lands, and the assignee shall succeed to all of the rights and privileges of the assignor and assumes all of the duties and obligations of the assignor as to the said lands. Provided, however, any record owner of any lease may enter into any contract for development of the leasehold premises or any portion thereof, or may create overriding royalties or

obligations payable out of production, or enter into any other agreements with respect to the development of the leasehold premises or disposition of the production therefrom, and it shall not be necessary for any such contracts, agreements or other instruments to be approved by the commissioner, but nothing contained in these items shall relieve the record title owner of such lease from complying with any of the terms or provisions thereof, and the commissioner shall look solely and only to such record owner for compliance therewith, and in any controversy respecting any such contracts, agreements or other instruments entered into by the lessee with other persons, neither the state of New Mexico nor the commissioner shall be a necessary party. All such contracts and other instruments may be filed either in the office of the commissioner or recorded in the office of the county clerk wherein the lands are situated, and the filing or recording thereof shall constitute notice to all the world of the existence and contents of the instrument so filed. The fee for filing such miscellaneous instruments in the office of the commissioner shall be as set forth in the schedule of fees.

[19.2.100.43 NMAC - Rp, 19.2.100.43 NMAC, 6/30/2016]

19.2.100.44 [RESERVED]

[19.2.100.44 NMAC - Rp, 19.2.100.44 NMAC, 6/30/2016]

19.2.100.45 TRANSFER OF RIGHTS BY CORPORATE ENTITIES - BY PURCHASE:

Transfer of oil and gas interests by corporations shall be formally executed, as in the case of transfer of real estate in New Mexico, in conformity with statute and by payment of proper fees as provided in this rule.

[19.2.100.45 NMAC - Rp, 19.2.100.45 NMAC, 6/30/2016]

19.2.100.46 TRANSFER OF RIGHTS BY CORPORATE ENTITIES - BY CONSOLIDATION:

In cases where corporations consolidate, transfer of oil and gas interests to the newly created corporation shall be accomplished pursuant to 19.2.100.39 through 19.2.100.45 NMAC.

[19.2.100.46 NMAC - Rp, 19.2.100.46 NMAC, 6/30/2016]

19.2.100.47 TRANSFER OF RIGHTS BY CORPORATE ENTITIES - BY MERGER:

In cases where two or more corporations merge, transfer of oil and gas interests to the surviving corporation shall be accomplished by filing with the commissioner a copy of the merger agreement or certificate of merger. Thereafter, the oil and gas lease shall be transferred on the books of the land office in the name of the surviving corporation.

[19.2.100.47 NMAC - Rp, 19.2.100.47 NMAC, 6/30/2016]

19.2.100.48 TRANSFER OF RIGHTS BY CORPORATE ENTITIES - BY REORGANIZATION:

Where the assets of any corporation are taken over under court order by a corporation, the procedure will follow the provisions of the court order, which should direct separate assignments to be executed and filed for approval in the state land office.

[19.2.100.48 NMAC - Rp, 19.2.100.48 NMAC, 6/30/2016]

19.2.100.49 NOTICE OF PENDENCY OF SUIT FEES - EFFECT ON THE ABILITY TO ASSIGN LEASE:

At the time of filing of any suit affecting an oil and gas lease or the interest of any person therein, or at any time thereafter before judgment, the plaintiff may file with the commissioner a notice of pendency of suit containing the names of the parties thereto, the object of the action and a description of the lands affected, and upon filing of such notice and payment of the required fees as set forth in the schedule of fees, the land affected by such suit will not be subject to assignment or other disposition until such suit shall be finally determined and disposed of.

[19.2.100.49 NMAC - Rp, 19.2.100.49 NMAC, 6/30/2016]

19.2.100.50 CANCELLATION FOR DEFAULT:

The commissioner may cancel any lease or assignment thereof for default upon giving the lessee or assignee notice by registered mail (certified mail if the lease so provides) of the commissioner's intention to cancel, specifying the default and, unless the lessee or assignee remedies the default within thirty days of the mailing date, the commissioner may cancel the lease or assignment. Proof of receipt of notice is not necessary or required before a valid cancellation may be entered.

[19.2.100.50 NMAC - Rp, 19.2.100.50 NMAC, 6/30/2016; A, 6/11/2019]

19.2.100.51 CO-OPERATIVE AND UNIT AGREEMENTS:

A. Purpose - consent: The commissioner may consent to and approve agreements made by lessees of state lands for any of the purposes enumerated in Section 19-10-45 NMSA 1978.

B. Application - requisites of agreements: Formal application shall be filed with the commissioner for approval of a co-operative or unit agreement at least 20 days in advance of the New Mexico oil conservation division's hearing date. A filing fee as set forth in the schedule of fees shall be paid for each section or fractional part thereof, whether the acreage is federal, state or privately owned. A unit agreement presented must have a unique unit name that will identify the agreement for so long as the agreement remains in effect and only under extraordinary circumstances will a unit

name change be allowed after initial approval is granted. Applications for approval shall contain a statement of facts showing:

(1) that such agreement will tend to promote the conservation of oil and gas and the better utilization of reservoir energy;

(2) that under the proposed unit operation, the state of New Mexico will receive its fair share of the recoverable oil and gas in place under its lands in the proposed unit area;

(3) that each beneficiary institution of the state of New Mexico will receive its fair and equitable share of the recoverable oil and gas under its lands within the unit area; and

(4) that such unit agreement is in other respects for the best interest of the trust.

C. Information to be furnished:

(1) Complete geological and engineering data shall be presented with the application and the information offered for the commissioner's action must be in clear and understandable form. Such data shall be kept confidential by the commissioner pursuant to Section 19-1-2.1 NMSA 1978 for a period of six months or until the unit agreement is approved, whichever first occurs. Then such data will be made a permanent part of the records and open for public inspection. If for any reason such proposed agreement is not approved, then at the request of the applicant, the data shall be returned to the applicant.

(2) Use of fresh water: The use of fresh water in waterflood units is discouraged in the cases where salt water is practical. If an operator plans to use fresh water in a proposed unit, the following specific information should also be provided:

(a) laboratory analyses of water compatibility tests (fresh vs. salt water);

(b) reservoir analyses for swelling clays and soluble salts;

(c) estimate of monthly make-up water required for operations; and

(d) location and depth of area salt water wells or quantities of produced water available for injection.

D. Decision postponed: In any matter respecting co-operative and unit agreements, the commissioner may postpone the commissioner's decision pending action by the oil conservation division and may use any information obtained by the commissioner's own investigators, or obtained by the oil conservation division to enable the commissioner to act properly on the matter. The applicant shall deposit with the commissioner a sum of

money estimated to be sufficient to meet the actual and necessary expenses of any investigation or inspection by representatives of the state land office.

E. Leases conformed: When any co-operative or unit agreement has been approved by the commissioner and executed by the lessee, the terms and provisions of the lease, so far as they apply to lands within the unit area, are automatically amended to conform to the terms and provisions of the co-operative agreement; otherwise, said terms and provisions shall remain in full force and effect.

F. Posting to tract books: In every case where a co-operative unit agreement is finally approved by the commissioner such agreement and the application therefor shall be entered upon the tract books of the state land office, filed and recorded, together with any order respecting the same issued by the New Mexico oil conservation division; any modification or dissolution of such co-operative or unit agreement shall be likewise entered and filed. The fees therefor shall be as set forth in the schedule of fees.

G. Assignments: No assignment of acreage under lease within any unitized or co-operative area will be approved by the commissioner unless the assignment is subject to the provisions of the co-operative or unit agreement covering the area within which the acreage sought to be assigned lies, or unless the commissioner and all parties to the co-operative agreement agree, in writing, that such acreage is not needed for proper co-operative operations.

H. Form of agreement: No specific forms for the various types of co-operative or unit operating agreements are required; however, sample forms of agreements now in operation will be furnished for guidance upon request, if available. Agreements submitted for approval must be submitted in duplicate. At least one copy must contain original signatures, which copy, after approval of the agreement, will be retained by the commissioner as the approved copy.

[19.2.100.51 NMAC - Rp, 19.2.100.51 NMAC, 6/30/2016; A, 6/11/2019]

19.2.100.52 FORCED POOLING - OIL CONSERVATION DIVISION ORDER:

A. The record owner or operator of all oil and gas leases covering the state owned lands forced pooled by order of the New Mexico oil conservation division, either under Section 70-2-17 NMSA 1978 (gas proration unit) or under Section 70-7-1 NMSA 1978 (statutory unitization act for secondary recovery), shall file with the commissioner the following information:

(1) one copy of application for hearing for forced pooling at least ten days prior to date set for hearing;

(2) state lease number, record owner and legal description of all state lands forced pooled;

- (3) oil conservation division order number and date;
- (4) legal description and type (federal, fee, or Indian) of all lands included in forced pooling order;
- (5) location, formation, and depth of well;
- (6) oil conservation division approved copies of forms numbered C-101, C-102, C-103, C-104 and C-105. These are to be filed at same time as filed with oil conservation division;
- (7) date production commenced; and
- (8) a copy of the agreement for unit operations involving state lands approved in writing by the oil conservation division, and signed by parties required by the agreement to initially pay at least seventy-five percent of unit operating costs, and by owners of at least seventy-five percent of the non-cost bearing interests such as royalties, overriding royalties and production payments.

B. This rule has no application to a situation wherein all parties have voluntarily executed a communitization agreement covering all lands in a proration unit or a secondary recovery unit and such agreement has been approved by the commissioner.

[19.2.100.52 NMAC - Rp, 19.2.100.52 NMAC, 6/30/2016]

19.2.100.53 COMMINGLING AND OFF-LEASE STORAGE OF OIL AND GAS ON STATE TRUST LANDS:

A. Commingling prohibited: Unless approved pursuant to Subsection B of 19.2.100.53 NMAC, the commingling, confusion or the intercommunication of oil or gas production from any state well with any production from any other well, whether state or non-state, by the use of common tankage facilities or central delivery points, is strictly prohibited.

B. Commingling allowed - off-lease storage:

(1) Commingling of oil and gas production, including downhole commingling, if properly metered or allocated and accounted for, may be permitted within the discretion of the commissioner only after the commissioner's receipt of a written application containing the information specified in Subsection C of 19.2.100.53 NMAC and an application fee as set forth in the schedule of fees.

(2) Off-lease storage of production may be permitted if properly metered or allocated and accounted for, within the discretion of the commissioner only after the commissioner's receipt of a written application containing the information specified in

Subsection C of 19.2.100.53 NMAC and an application fee as set forth in the schedule of fees.

C. Application for permission to commingle or off-lease store production.

Applications for permission to commingle or off-lease store production shall be directed to the commissioner and shall include:

- (1) formal application stating the type of permission desired and the reasons therefor, accompanied by an application fee as set forth in the schedule of fees;
- (2) plat showing the location of leases, wells, flow lines, metering facilities and common tankage. All plats and diagrams should differentiate between surface and underground pipe;
- (3) a list of the involved leases arranged by their state land office lease number, their legal description and including state beneficiaries;
- (4) a designation of the pool from which each well produces;
- (5) an economic analysis of proposed operation showing profit or loss to the state of New Mexico;
- (6) schematic diagram of entire system from production manifold to pipeline connection showing position of all components of flow stream;
- (7) description of the operating sequence explaining the complete operation;
- (8) the applicant's proposal for allocating or metering production so that all production is properly accounted for at the well; and
- (9) any other pertinent data that will assist the commissioner in deciding upon the application.

[19.2.100.53 NMAC - Rp, 19.2.100.53 NMAC, 6/30/2016; A, 6/11/2019]

19.2.100.54 ACREAGE TAKEN FOR MILITARY PURPOSES - WAIVER OF DEVELOPMENT REQUIREMENTS:

A. Where the use of lands embraced in any state oil and gas lease is taken by the United States government for military purposes, under such circumstances as will prevent drilling and development by the lessee, the commissioner may, on application by the lessee, waive compliance with the drilling and development requirements of any such lease during the period of such use and for six months thereafter, but in no event for more than five years from the beginning of such use by the United States. Where the use of only part of the lands embraced in such oil and gas lease is taken, any waiver shall extend only to the lands the use of which is so taken.

B. In all cases, the lessee shall continue to pay rentals at the rate which is in effect at the time of taking, and failure to so pay rentals subjects the lease to the regular cancellation procedure.

C. Waivers, when executed and approved, relate back to the date of the notice of taking by the United States.

[19.2.100.54 NMAC - Rp, 19.2.100.54 NMAC, 6/30/2016]

19.2.100.55 STIPULATION TO CURRENT LEASE PROVISIONS:

A. The owner of any oil and gas lease issued by the commissioner which does not contain all of the provisions of the current applicable five- or ten-year lease form or which does not include helium gas within its terms may file an application to include all the provisions of such applicable lease form and to include helium gas, provided the lease has been maintained in good standing according to the terms and conditions thereof and all applicable statutes and regulations.

B. The application for stipulation shall be made in duplicate and on a form prescribed and furnished by the commissioner and shall be filed in duplicate, accompanied by the fee as set forth in the schedule of fees.

C. Upon filing of such an application and determination by the commissioner that the application conforms to the governing statutes and this rule, the commissioner shall execute a stipulation and thereupon the provisions of the current applicable five- or ten-year lease form and inclusion of helium gas will be part of said existing lease with the like effect as if originally incorporated therein; provided, however, that no such stipulation shall be effective or binding on any of the parties until each and every working interest owner and record owner of the original lease or approved assignment thereof has signed the stipulation.

D. One executed copy of the stipulation will be attached to the original lease in the files of the commissioner. The remaining copy will be forwarded to the applicant with the receipt of the state land office evidencing payment of the filing fee.

[19.2.100.55 NMAC - Rp, 19.2.100.55 NMAC, 6/30/2016]

19.2.100.56 CONTINUATION OF LEASE AFTER EXPIRATION OF TERM:

A. The payment in advance of rentals for the lease year commencing at the expiration of the secondary term in a 10-year lease or at the expiration of the five-year term in a five-year lease shall be a prerequisite for relying upon current bona fide drilling or reworking operations to extend the lease beyond such term. There will be no refund by the state land office of any sum received by it as rental under the terms of any oil and gas lease issued by the commissioner, whether in the primary or secondary term or subsequent to the expiration thereof.

B. The owner of any oil and gas lease proposing to conduct drilling or reworking operations and proposing to rely upon such operations to extend the lease beyond the fixed term in accordance with the provisions thereof shall file in the oil and gas division of the state land office, prior to the expiration of the secondary term of a 10-year lease or the primary term of a five-year lease, a statement in writing of the location of the proposed well, the drilling or reworking of which will be relied upon to continue said lease in effect, the depth to which it is proposed to drill said well, the reworking operations which, if any, are contemplated and the name and address of the drilling contractor or other persons who will conduct such operations. The approval by the commissioner of the operations so proposed will normally be evidenced by the signature of the commissioner on a copy of such statement, but any such proposed operation, about which a statement has been filed in accordance with this item, shall be conclusively presumed to have been approved by the commissioner prior to the expiration of the lease to which it relates, unless the commissioner shall, prior to the expiration of said lease, advise the applicant, in writing, of the commissioner's disapproval and the reasons therefor.

C. The owner of an oil and gas lease who, subsequent to the expiration of the secondary term in a 10-year lease or the primary term in a five-year lease, is engaged in drilling or reworking operations on lands embraced therein, and who proposes to rely upon such operations as extending said lease in accordance with the provisions thereof shall file a report of the status of such operations for each 30 day period during which they are continued. It shall contain a statement of the depth of said well, the status of any reworking operations at the end of said 30 day period, a general statement of the drilling or reworking operations that have been accomplished during the preceding 30 days, and the fact, if it is a fact, that such operations are bona fide in progress and will be continued. Status reports filed in the office of the commissioner within 15 days after the close of such a 30 day period shall meet the requirements of the lease. If operations have ceased during any period covered by a status report, such report shall state the date of cessation and the reason therefore, and the date of resumption of operations, if any.

D. Each application and stipulation filed under Subsection B of 19.2.100.56 NMAC shall be signed by the lease owner, if an individual; and if a partnership or corporation, by a responsible official thereof. The application shall be verified under oath and the stipulation shall be acknowledged. Each statement of operations and status report filed under this rule shall be signed by the lease owner, if an individual, or by a responsible official, if a partnership or corporation, and shall be verified by affidavit of the signer.

E. Operations conducted by any person under the terms of an oil and gas lease issued by the commissioner, including all operations conducted pursuant to this rule shall be subject to inspection at all reasonable times by representatives of the state land office.

[19.2.100.56 NMAC - Rp, 19.2.100.56 NMAC, 6/30/2016; A, 6/11/2019]

19.2.100.57 CALCULATING AND REMITTING OIL AND GAS ROYALTIES:

A. Payment of royalties - appeal to commissioner: Payment shall be made in the time and in the manner described below:

(1) Each lessee whose average monthly state royalty payment for the twelve months ending with the latest March 31, was twenty-five thousand dollars (\$25,000) or less shall pay royalties on or before the twenty-fifth day of the second month following the month for which royalties are due. Unless the remitter elects to pay royalties by means of electronic funds transfer, payment shall be made by check payable to the commissioner of public lands. Payment shall be mailed or delivered to the taxation and revenue department along with any paper report. If the remitter elects to pay royalties by means of electronic funds transfer, payment shall be made in accordance with Option 1 or Option 2 in Paragraph (4) of Subsection A of 19.2.100.57 NMAC and shall conform with the special instructions on electronic transmission of state royalty payments for separate oil and gas royalty reporting in the ONGARD system.

(2) Unless an election is timely made to pay royalties pursuant to Paragraph (3) of this Subsection, each lessee whose average monthly state royalty payment for the twelve months ending with the latest March 31, was greater than twenty-five thousand dollars (\$25,000) shall pay royalties on or before the twentieth day of the month following the month for which the royalties are due. Payment shall be made in accordance with Paragraph (4) of this Subsection.

(3) In lieu of paying royalties within the time specified by Paragraph (2) of this Subsection, a lessee may submit to the lessor, in writing, an election to pay royalties within the time frames specified for state severance taxes. Royalties paid by any lessee making the election under this Paragraph shall be due on the twenty-fifth day of the second month following the month for which the royalties are due. However, on or before the twenty-fifth day of the month in which the election is made and on or before the twenty-fifth day of each month thereafter, the lessee shall also make an advance royalty payment. Beginning with royalties initially paid under this Paragraph and each month thereafter, the previous month's advance royalty payment shall be taken as a credit. The amount of the advance royalty payment shall be adjusted by July 25 of each year and shall equal the average monthly royalty paid during the twelve months ending with the latest March 31. Payment shall be made in accordance with Paragraph (4) of this Subsection.

(4) Lessees remitting royalties under the provisions of Paragraphs (2) and (3) of this Subsection shall make payments in accordance with one of the four options listed below. For payment to be considered timely, the state land office must have access to funds on the due date for royalty remittances. Payment shall be made in accordance with the instructions on special payment procedures. Such payment can only be utilized with the separate oil and gas royalty reporting in the new ONGARD system.

(a) Option 1: automated clearinghouse (ACH) deposit.

(b) Option 2: fedwire transfer.

(c) Option 3: check drawn on any New Mexico financial institution. Payment shall be made in the manner prescribed by the provisions of this rule.

(d) Option 4: check drawn on any domestic non-New Mexico financial institution. Payment shall be made in the manner prescribed by the provisions of this rule.

(e) "Financial institution" means any state- or nationally-chartered federally-insured financial institution.

(5) Irrespective of whether a lessee pays royalties pursuant to Paragraph (1), (2) or (3) of this Subsection, all royalty information shall be reported on forms prescribed by the lessor and shall be submitted on or before the twenty-fifth day of the second month following the month for which royalties are due. The lessee shall indicate in the space provided if payment accompanies the report or if payment is made by separate check, fedwire or ACH transfer.

B. Effective date: The provisions of 19.2.100.57 NMAC shall be used to calculate, report and remit royalties for oil and gas produced on or after January 1, 1990.

[19.2.100.57 NMAC - Rp, 19.2.100.57 NMAC, 6/30/2016]

19.2.100.58 OCD REPORTS:

The producer or lessee of producing state lands shall file in the New Mexico state land office, Santa Fe, New Mexico, at the time of filing with the New Mexico oil conservation division (OCD), reports labeled C-101 through C-105.

[19.2.100.58 NMAC - Rp, 19.2.100.58 NMAC, 6/30/2016]

19.2.100.59 WAIVER OF DEVELOPMENT IN POTASH OR OTHER MINERAL AREAS:

Application for waiver of compliance with exploratory drilling development or production requirements of a lease, or to extend the term thereof, where exploration and development operations of the oil and gas lease are inconsistent with the exploration and development operations of a state mineral lease, and where waste will occur, must be made in writing and accompanied by a filing and approval fee as set forth in the schedule of fees. Such applications must be filed in the state land office at least thirty days before expiration date of the oil and gas lease. No waivers or extension shall be granted by the commissioner for more than five years. Ordinarily, waivers will be granted by the commissioner only as to the legal subdivisions upon which the conflict exists.

[19.2.100.59 NMAC - Rp, 19.2.100.59 NMAC, 6/30/2016]

19.2.100.60 WATER WELLS:

A. Water wells drilled on all state oil and gas leases for temporary use on the lease and for purposes directly connected with operations shall be in compliance with the provisions of Sections 72-12-1 through 72-12-21 NMSA 1978, as amended, with the regulations of the state engineer, and with 19.2.12 NMAC.

B. Within thirty days after completion of said well, the lessee shall furnish in writing to the commissioner a report containing the following information:

- (1) location of well; and
- (2) depth, log and casing record production data.

[19.2.100.60 NMAC - Rp, 19.2.100.60 NMAC, 6/30/2016]

19.2.100.61 SALT WATER DISPOSAL:

Lessees are expected to comply with all lawful rules of the New Mexico oil conservation division pertaining to prevention of waste, which includes disposal of produced salt water or brine. If state lands are needed for a salt water disposal operation, then application for a salt water disposal easement site shall be made to the "oil and gas division" or application for a business lease shall be made to the "land surface division" of the state land office, depending upon whether underground or surface disposal, respectively, is desired. Ordinarily, water produced on lease may be disposed of on lease without the commissioner's permission if the disposal operation otherwise meets the approval of the oil conservation division and is otherwise reasonable and accepted practice in the industry.

[19.2.100.61 NMAC - Rp, 19.2.100.61 NMAC, 6/30/2016]

[Applications for a salt water disposal easement or a business lease shall be made to the commercial division of the state land office.]

19.2.100.62 ROYALTY PURCHASE - PREFERENCE RIGHT:

Requests made by petroleum refineries within the state to the commissioner to purchase state royalty oil as a preference right under the provisions of Sections 19-10-64 through 19-10-70 NMSA 1978 shall be accompanied by an order or ruling of the New Mexico oil conservation division determining that the applicant is qualified and otherwise entitled to such preference. Requests to purchase state royalty oil on a bid basis may be made directly to the commissioner in letter form. In either case, the applicant must identify the wells from which the applicant desires to purchase the royalty oil.

[19.2.100.62 NMAC - Rp, 19.2.100.62 NMAC, 6/30/2016; A, 6/11/2019]

19.2.100.63 RESERVATION OF RIGHT TO PURCHASE PRODUCTION:

The state reserves a continuing option to purchase at any time and from time to time, at the market price prevailing in the area on the date of purchase, all or part of the oil and gas that may be produced from the lands embraced in all leases issued on or after June 11, 1973.

[19.2.100.63 NMAC - Rp, 19.2.100.63 NMAC, 6/30/2016]

19.2.100.64 APPEALS FROM DECISION OF THE COMMISSIONER:

Any party aggrieved by any ruling or decision of the commissioner affecting such party's interest in any oil and gas lease may appeal to the appropriate district court within sixty days after such ruling or decision is rendered pursuant to Section 19-10-23 NMSA 1978.

[19.2.100.64 NMAC - Rp, 19.2.100.64 NMAC, 6/30/2016]

19.2.100.65 [RESERVED]

[19.2.100.65 NMAC - Rn, SLO Rule 1, Section 1.067, 12/13/2002; Repealed, 6/30/2016]

19.2.100.66 SURFACE OPERATIONS ON STATE OIL AND GAS LEASES:

A. Purpose and application of 19.2.100.66 NMAC: The purpose of 19.2.100.66 NMAC is to establish minimum procedures for protecting the surface affected by operation and development activities on state oil and gas leases. 19.2.100.66 NMAC applies to all operations conducted after its effective date on state oil and gas leases, the surface of which is held in trust by the commissioner of public lands.

B. Operation Requirements:

(1) Surface trash and debris: All operators shall remove all surface trash and debris caused by their operations from the lease and shall keep such premises free and clear of such trash and debris. As used in 19.2.100.66 NMAC, "surface trash and debris" means all nonoperational and nonessential equipment resulting from the drilling and producing operation of oil and gas leases and includes, but is not limited to, garbage, rubbish, junk or scrap.

(2) Pits:

(a) Pits shall not be located in, or hazardously near, water drainages. Pits shall be constructed to prevent contamination of the surface and the subsurface by

seepage or flowage; including, if necessary, lining with impermeable materials as provided by rules and regulations of the oil conservation division. Under no circumstances shall pits be used for disposal, dumping or storage of off-lease fluids. Subject to all applicable state and federal laws, and if the operator agrees to accept all liability therefore; garbage, junk, waste or other inorganic debris may be disposed of in the caliche or burn pit located on the side of the reserve pit when the reserve pit is reclaimed.

(b) All pits shall be fenced. The type of fence used must be specific to the class of livestock in the area. Fencing shall remain in place for the life of the pit and be maintained to keep livestock out. All fences shall be braced or constructed in such a manner as to keep wires tight with no sagging between posts. State land office personnel will inspect and, if necessary, notify operators or lessees of necessary repairs or requirements for maintaining the required condition of all fences associated with leases. Fencing shall comply with all other state and federal requirements.

(c) If a pit is lined, the liner shall be installed and maintained to prevent ingestion by livestock and wildlife.

(d) Drilling fluids and drill cuttings shall be disposed of in a manner to prevent contamination to the surface. Rules of the oil conservation division which relate to the disposal of drilling fluids and drill cuttings shall be complied with.

(3) Site Development:

(a) All access roads shall be built, maintained and reclaimed in accordance with 19.2.20 NMAC.

(b) All trees and wood over three inches in diameter removed for site preparation shall be disposed of on site as determined by the state land office.

(c) Where required by the federal Clean Water Act, other applicable federal or state law, or regulations promulgated pursuant thereto, production and storage tanks shall be surrounded with an earthen berm in compliance with such applicable law and regulations. In addition, such a berm may be required by the state land office if a particular tank has a history of repeated leaks.

(4) Spills:

(a) All new spills shall be treated and cleaned up immediately. All surface affected by such spills and leaks shall be reclaimed. Reclamation of the area involved shall be implemented in consultation with the state land office.

(b) All spills shall be reported in accordance with the regulations of the oil conservation division.

(5) Pipelines: If practicable, lines placed on top of the surface shall be placed to take advantage of existing roads or alongside other lines already on top of the ground. If regular maintenance and inspection by vehicle is necessary, and a permanent road required, the road shall be constructed and maintained in accordance with 19.2.20 NMAC. All other traffic shall be kept to a minimum.

C. Closeout and operation plan:

(1) A reclamation or operation plan may be submitted to the state land office for review. If approved, the plan shall substitute for the reclamation and operation requirements of 19.2.100.66 NMAC and 19.2.100.67 NMAC.

(2) The plan shall consist of reclamation and operation specifics for compliance with the regulations concerning reclamation and operations, with an additional section that sets out the schedule of implementation on a continuing basis during the life of the lease relative to operation, maintenance, spills, leaks, cleanup and revegetation.

D. Review and inspection:

(1) State land office personnel or oil conservation division personnel may, from time to time, recommend actions necessary to comply with reasonable use of the surface and prudent operator standards.

(2) These recommendations shall be made either to state land office administrators or the commissioner's office, or to the lessee directly.

E. Exemptions and appeal procedure:

(1) The commissioner, or the commissioner's qualified designated representative, may grant an exemption to any or all of the requirements of this rule when a lessee provides a state land office approved reclamation or operation plan, or demonstrates that compliance would be impracticable or has occurred naturally. Any such exemption granted shall be in writing addressed to the lessee or operator requesting the exemption.

(2) Any lessee or operator aggrieved or adversely affected by a determination or interpretation of the state land office under 19.2.100.66 NMAC may, within 60 days of the receipt of such determination or interpretation, request a hearing before the commissioner of public lands. Within 30 days after receiving such a request, the commissioner shall convene a hearing at which the lessee or operator and the commissioner's staff may present evidence. Within 15 days of the hearing, the commissioner shall enter the commissioner's decision on the matter. Any decision of the commissioner may be appealed pursuant to Section 19-10-23 NMSA 1978.

[19.2.100.66 NMAC - Rp, 19.2.100.66 NMAC, 6/30/2016; A, 6/11/2019]

19.2.100.67 SURFACE RECLAMATION ON STATE OIL AND GAS LEASES:

A. Purpose and application of 19.2.100.67 NMAC:

(1) The purpose of 19.2.100.67 NMAC is to establish minimum procedures to follow in reclaiming surface disturbances resulting from development and production on state oil and gas leases, the surface of which is held in trust by the commissioner of public lands.

(2) 19.2.100.67 NMAC applies to areas disturbed by operations conducted under all existing and future leases. However, current lessees will not be held responsible for reclaiming areas disturbed under a lease which has previously expired or been terminated and for which the current lessee is not a successor-in-interest. Also, a prudent operator standard will be applied to the reclamation of other conditions existing on the effective date of this rule. In this regard, lessees are expected to comply with all requirements concerning removal of debris and improvements; however, specific requirements relating to ripping and reseeding will be developed by consultation and planning between the lessee and the state land office, using accepted industry standards such as those established by the bureau of land management.

B. Definitions, as used in 19.2.100.67 NMAC:

(1) "temporary abandonment" occurs if a well is no longer usable for beneficial purposes; has been continuously inactive for more than one year; and has been approved for temporary abandonment by the oil conservation division.

(2) "permanent abandonment" occurs if a well is no longer usable for beneficial purposes; has been continuously inactive for more than one year; and has not been approved for temporary abandonment by the oil conservation division.

C. Reclamation requirements:

(1) Surface sites and off-lease storage areas:

(a) Surface sites and off-lease storage areas, upon temporary or permanent abandonment, shall be cleared of junk and debris and, if necessary, be bermed or water-barred in order to stabilize the site and prevent erosion. Within one year of permanent abandonment, the sites and areas shall be ripped through to the underlying material and reseeded.

(b) Where available, topsoil removed from surface sites shall be stored for use in future reclamation of the site. Pads, within one year of permanent abandonment, shall have all caliche ripped through to the underlying material, any remaining stored topsoil replaced and the site reseeded.

(2) Roads: Roads shall be left in place only if authorized by the state land office. If any road is not needed, then, within one year of permanent abandonment, it shall be ripped, reseeded, bermed (closed) at the entrance, and water bars shall be constructed as directed or approved by the state land office. 19.2.20 NMAC shall be followed for specifics relating to road construction, maintenance and reclamation.

(3) Spills and leaks: Within one year of permanent abandonment, all surface affected by spills and leaks shall be reclaimed. Reclamation of the area involved shall be implemented in consultation with the state land office.

(4) Pits (operating/drilling and other):

(a) All pits, within one year of permanent abandonment or within a reasonable time of nonuse, shall be dried and leveled to restore as much of the original contour as is practical to minimize erosion. The pits shall be reseeded as required by this Section.

(b) All lining materials (plastics or otherwise) shall be removed from the surrounding area, cut off and permanently buried below the surface or removed from the area.

(5) Pipelines:

(a) Buried pipelines may be left in place and the surface ripped, water-barred and reseeded according to the specifics of the site.

(b) Within one year of permanent abandonment, surface lines shall be removed and the surface reclaimed as specified in Subparagraph (a) of Paragraph (5) of Subsection C of 19.2.100.67 NMAC.

(6) Debris: All oil and gas lease related surface trash and debris shall be removed upon temporary or permanent abandonment or disposed of in the manner permitted in 19.2.100.66 NMAC. As used in 19.2.100.67 NMAC, "surface trash and debris" means all nonoperational and nonessential equipment resulting from the drilling and producing operation of oil and gas leases and includes, but is not limited to, garbage, rubbish, junk or scrap.

(7) Revegetation:

(a) For all reseeded required by this Section, the state land office will approve seeding rates and seed mixtures, or approve site-specific recommendations. When possible, the state land office will recommend such approved rates and mixtures, but will not require seed varieties in its mixtures which are not in common use in the area.

(b) All required reseeded shall be planned and completed with a goal of revegetation consistent with local natural vegetation density. After a failed attempt to revegetate an area, a second reseeded may be required by the state land office, but in

no event shall such second reseeding be required more than two years after the initial one.

(8) Lessee's Improvements: The lessee or operator shall remove all improvements placed or erected on the premises within 60 days after the expiration or termination of an oil and gas lease. Any improvements remaining at the end of such 60-day period shall be deemed abandoned for the purposes of Sections 19-7-14 and 19-10-28 NMSA 1978 and no payments shall be due for such remaining improvements pursuant to those Sections.

D. Release upon permanent abandonment and grant of access: Upon state land office approval and release, a lessee's reclamation responsibilities are terminated. The state land office shall issue a reclamation permit for access to complete reclamation after expiration or termination of an oil and gas lease. The reclamation permit shall be a standard form developed after consultation with interested industry groups.

E. Closeout and operation plan:

(1) A reclamation or operation plan may be submitted to the state land office for review. If approved, the plan shall substitute for the reclamation and operation requirements of this Section and 19.2.100.66 NMAC.

(2) The plan shall consist of reclamation and operation specifics for compliance with the regulations concerning reclamation and operations, with an additional section that sets out the schedule of implementation on a continuing basis during the life of the lease relative to operation, maintenance, spills, leaks, cleanup and reseeding.

F. Exemptions and appeal procedure:

(1) The commissioner, or the commissioner's qualified designated representative, may grant an exemption to any or all of the requirements of 19.2.100.67 NMAC when a lessee provides a state land office approved reclamation or operation plan, or demonstrates that compliance would be impracticable or has occurred naturally. Any such exemption granted shall be in writing addressed to the lessee or operator requesting the exemption.

(2) Any lessee or operator aggrieved or adversely affected by a determination or interpretation of the state land office under 19.2.100.67 NMAC may, within 60 days of the receipt of such determination or interpretation, request a hearing before the commissioner of public lands. Within 30 days after receiving such a request, the commissioner shall convene a hearing at which the lessee or operator and the commissioner's staff may present evidence. Within 15 days of the hearing, the commissioner shall enter the commissioner's decision on the matter. Any decision of the commissioner may be appealed pursuant to Section 19-10-23 NMSA 1978.

G. Temporary provision - phase-in: Lessees or operators of leases which contain conditions existing on the effective date of 19.2.100.67 NMAC, otherwise requiring immediate reclamation under 19.2.100.67 NMAC, shall have five years to complete reclamation of such conditions if they demonstrate steady progress toward such completion pursuant to an approved reclamation plan or the requirements of 19.2.100.67 NMAC.

[19.2.100.67 NMAC - Rp, 19.2.100.67 NMAC, 6/30/2016; A, 6/11/2019]

19.2.100.68 AMENDMENT OF LEASE TO LOWER ROYALTY RATE FOR OIL WELLS UNDER CERTAIN CONDITIONS:

A. Purpose - eligibility: The records owner of an oil and gas lease issued by the commissioner of public lands whose lease is maintained in good standing according to the terms and conditions of the lease and all applicable statutes and regulations, may apply to the commissioner for an amendment to the lease for the purpose of changing the royalty rate on oil produced from a specified oil well. Any well that produces on a lease basis or as a communitized or unitized property is eligible for the lower rate. Multiple wells from the same lease, communitization or unit may be submitted for approval under one application. Communitized or unit wells must qualify individually for the lower royalty rate.

B. Application, requirements, and information to be furnished. An application for a change in royalty rate shall be on a form prescribed by the commissioner and shall be accompanied by the application fee as set forth in the schedule of fees. For each oil well, the application shall:

(1) show that the oil well has produced oil attributable to a communitization, unit or lease premises, and:

(a) if the production is from formations shallower than 5,000 feet, has produced less than an average of three barrels of oil per day during the preceding 12 months and has not averaged over five barrels per day for any month during the preceding 12 months; or

(b) if the production is from formations 5,000 feet deep or deeper, has produced less than an average of six barrels of oil per day during the preceding 12 months and has not averaged over 10 barrels of oil per day for any month during the preceding 12 months; and

(2) include a statement that to the best of the applicant's knowledge and experience the well is not capable of sustained production limits specified in Paragraph (1) of this Subsection.

(3) provide data and describe efforts to:

(a) negotiate lower rates paid to other royalty owners and overriding royalty owners in the oil well; and

(b) minimize the costs of operating the well; and

(4) include any other fact which may justify a lower royalty rate.

C. Commissioners approval. Upon receipt of an application, the commissioner shall review the information submitted as well as other, independent information obtained by the commissioner and shall agree to amend the lease to a lower royalty rate for oil produced from the oil well if, in the commissioner's sole discretion, the commissioner finds that:

(1) the operator has taken reasonable steps to minimize the operator's costs of operating the oil well;

(2) the oil well will likely be plugged and abandoned in the near future, with a resulting loss of reserves, if operating costs are not reduced further;

(3) the oil well will produce for a longer period, and the amount of oil produced will ultimately be larger, if the royalty rate is lowered; and

(4) a lower royalty rate will actually maximize revenue to the trust beneficiaries.

D. Applicable royalty rate, effective date. The lower royalty rate agreed to under this Section shall be equal to five percent and, except as provided in Subsection G of this Section, shall be valid for a period of three years, after which time the record owner of the oil and gas lease may submit a written request for an extension which, if approved pursuant to Subsection C of this Section, shall be valid for an additional three year term.

E. Accounting and reporting of oil royalties. Production, royalties and taxes for oil produced from any well for which a lower royalty rate has been granted under this Section shall be reported separately from other oil wells, under the PUN-lease business rules of the oil and gas royalty filer's kit utilized by the oil and natural gas administration and revenue database (ONGARD) system.

F. Form of application. Applications for a lower royalty rate under this Section shall be submitted on a form provided by the commissioner.

G. Termination of lower rate. The effective period for a lower royalty rate, approved pursuant to this Section, shall terminate and the royalty rate specified in the lease shall be applicable if the commissioner determines, in the commissioner's sole discretion, that the oil production has significantly increased through well workover, recompletion or other means, so that the well would no longer qualify on an annual basis for a lower royalty rate.

[19.2.100.68 NMAC - Rp, 19.2.100.68 NMAC, 6/30/2016; A, 6/11/2019]

19.2.100.69 PAYMENT OF STATE ROYALTIES:

A. Objective and application:

(1) This Section shall apply to oil and condensate ("oil kind") and natural gas and natural gas products ("gas kind") produced and saved from state oil and gas leases and marketed or utilized in any manner.

(2) In order to ensure that all royalties have been paid, to properly account for all revenues, to promote uniformity of accounting and reporting, to provide for the most efficient management of state oil and gas leases and to comply with the intent and letter of New Mexico law, it is the policy of the state land office that royalties owed under state oil and gas leases be paid monthly on all production deemed to be produced from each state lease during that month.

(a) Gas kind:

(i) Payment on entitlement basis. For leases included in mixed agreements or in units or communitized tracts which do not contain uniform royalty rates or uniform beneficiaries, gas kind royalties shall be paid monthly on the production allocated to each lease under the unit or communitization agreement on the entitlement basis.

(ii) Payment on takes basis. For individual producing leases or state leases within one hundred percent state agreements which contain leases with uniform royalty rates and uniform beneficiaries, gas kind royalties shall be paid monthly on all production deemed to be produced from the lease on a takes basis.

(b) Oil kind: royalties on oil production are based on each working interest owner's proportionate share of production from the lease, unit or communitization agreement. As a result, no problem exists with regard to the current process for paying such royalties.

(3) As stated above, the purpose of this Section is to ensure that all royalties due under state oil and gas leases are paid and accounted for in a timely manner. Nothing herein relieves any lessee of record, operator, working interest owner or other person of any legal obligation to pay royalties. The commissioner of public lands reserves the right to seek payment of any deficient royalties from any such person.

(4) Effective Date. This policy will become effective six months after the effective date of this Section (the "effective date").

B. Gas deemed to be produced from state leases within mixed agreements or units or communitized tracts which do not contain uniform royalty rates or uniform beneficiaries:

(1) For gas deemed to be produced from state leases in mixed agreements or in units or communitized tracts which do not contain uniform royalty rates or uniform beneficiaries, gas kind royalties must be paid on each working interest owner's entitled share of the produced volume from the agreement. If the working interest owner did not take any gas from the agreement, the value of the entitled share of production for royalty purposes shall be the benchmark entitlement value.

(2) Lessees in a unit or communitized tracts may contractually agree to assign reporting and payment responsibility among themselves in any manner which insures that entitled royalty volumes allocable to state leases are reported and paid each month.

C. Gas deemed to be produced from individual leases and one hundred percent state agreements which contain leases with uniform royalty rates and uniform beneficiaries:

(1) For leases producing on an individual basis or on one hundred percent state agreements which contain leases with uniform royalty rates and uniform beneficiaries, royalties are due on all of the natural gas and natural gas products deemed to be produced. Unless notice has been given to the state land office under the following paragraph, royalties will be paid by each working interest owner on the amount of natural gas and natural gas products actually taken and sold by such owner. Any notices of volume variances shall be sent to the property operator of the lease.

(2) Upon written notification to the state land office by the property operator that all interest owners in the property have elected to pay gas kind royalties on an entitlements basis, notice of volume variances will be sent to those working interest owners who are entitled to the production, as shown by state land office records. If a working interest owner does not sell all of the production to which the working interest owner is entitled, then royalty payments on such untaken but entitled share are to be paid on the benchmark entitlement value. Failure to remit royalties based on benchmark entitlement value will result in assessments being issued and interest charges being assessed for the underpaid amount.

D. Adjustments of prior periods:

(1) Adjustments of prior period reports for under-reported or over-reported volumes made necessary by the promulgation of this Section shall be completed within 18 months from the effective date. Adjustments must be reported by specific time period for each affected property. The state land office may grant specific remitters an extension of this deadline for good cause.

(2) In making adjustments under this subsection, a remitter shall report the difference between the take and the entitlement basis volumes or vice-versa on a production month basis for each affected property.

(a) For convenience, a remitter may group volume differences on a calendar year basis, at the mid-point of the year, and apply a product valuation to the volume difference which is representative of the weighted average product values for that year. Such volume differences for the past will be reported as detail line entries into the ONGARD system in the PUN-lease format, etc., on the appropriate forms adopted and made available by the commissioner in accordance with Section 19.2.100.70 NMAC.

(b) In the alternative, a remitter may make a one-time cumulative adjustment for all past periods for each affected property by providing to the state land office a valuation proposal which estimates a fair average value of gas under-reported or over-reported for the period during which the imbalance occurred for the affected properties. Upon approval of such valuation proposal, or upon agreement of the remitter and the state land office to utilize different values, the remitter may make adjustments on the basis of such valuations.

(3) Irrespective of any applicable statute of limitations, credits for previously over-reported natural gas volumes may be taken if:

(a) the adjustment is caused by the promulgation of this section by the state land office;

(b) the adjustment is made within the time period specified in Paragraph 1 of this Subsection; and,

(c) the credit is taken for subsequent royalties owed on the same production unit number (property) for which the volumes were over reported or any other property with the same trust beneficiary as the affected property.

E. Definitions:

(1) "average value received" means the value required by law to be used for the calculation of royalties.

(2) "benchmark entitlement value" means:

(a) An amount equal to the average value received by the working interest owner for production from: the unit or communitized area; or state leases within one hundred percent state units or communitized areas where entitlements are elected under Paragraph (2) of Subsection C of 19.2.100.69 NMAC; or, individual state leases where entitlements are elected under Paragraph (2) of Subsection C of 19.2.100.69 NMAC, in which the working interest owner's production is located during the production month, so long as the working interest owner took at least fifty percent of its entitled

share of production for their unprocessed or processed gas. In the event that this Subparagraph (a) is not applicable, then the benchmark entitlement value shall be:

(b) In the event that the working interest owner sold less than fifty percent of its entitled share, or sold no gas from: the unit or communitized area; or, state leases within one hundred percent state units or communitized areas where entitlements are elected under Paragraph (2) of Subsection C of 19.2.100.69 NMAC; or, individual state leases where entitlements are elected under Paragraph (2) of Subsection C of 19.2.100.69 NMAC, the value of the untaken but entitled share shall equal the average value received by the working interest owner for like quality gas produced in the same producing basin in that production month for their unprocessed or processed gas. In the event that Subparagraphs (a) or (b) do not apply, then the benchmark entitlement value shall be:

(c) In the event that the working interest owner does not take any like quality gas in the same producing basin during a production month, the benchmark entitlement value shall be a valid index price, less a location differential, multiplied by the total mmbtu's produced at the field for unprocessed gas or similar index prices, less a location differential, multiplied by the mmbtu's produced applicable to the residue gas portion, plus a valid index price for natural gas liquids, less an estimated processing deduction for the portion of the processed gas converted to equivalent mmbtu value, and less a location differential, multiplied by the mmbtu's produced applicable to such natural gas liquids portion.

(3) "Like quality gas" means gas produced from the same pool, as defined by the New Mexico oil conservation division from time to time.

(4) "Location differential" shall be equal to the costs incurred by the working interest owner to move gas from the field to the index point in the most recent month of production.

(5) "Valid index price" means:

(a) in the case of natural gas, an average of two or more price indices for interstate pipelines transporting natural gas from producing regions that are located entirely or partially within New Mexico, based on acceptable survey techniques, appearing in a publication recognized in the oil and gas industry as a reputable source of such price information (e.g., *Inside FERC, Gas Daily, Natural Gas Weekly*).

(b) in the case of natural gas liquids, the price for individual products produced from natural gas (e.g. ethane, propane, butanes (iso- and normal), natural gasoline, etc.) based on acceptable survey techniques, appearing in a publication recognized in the oil and gas industry as a reputable source of such price information (e.g., *Oil Price Information Service*).

[The effective date of 19.2.100.69 NMAC is December 30, 1995.]

19.2.100.70 REPORTING AND ROYALTY RENDITION FORMS:

When oil and gas royalties are or should be remitted, as described in 19.2.100.57 NMAC, the remitting person or company shall submit to the state land office a remittance document and royalty reporting form adopted and made available by the commissioner in accordance with the instructions for completing the remittance document and royalty reporting form.

[19.2.100.70 NMAC - Rp, 19.2.100.70 NMAC, 6/30/2016]

19.2.100.71 TEMPORARY SHUT-IN OF OIL WELLS DUE TO SEVERE REDUCTION IN THE PRICE OF OIL:

A. Basis for allowing shut in of oil wells: Pursuant to Section 19-10-6 NMSA 1978, the commissioner has determined that, because of a severe reduction in the price of oil, the beneficiaries of state trust lands will be better served if oil wells are allowed to be temporarily shut in rather than produced at a low price.

B. Effective period:

(1) Unless extended by the commissioner after a subsequent notice and public hearing or terminated sooner by a subsequent regulation of the commissioner after finding that the price of oil is no longer severely reduced, 19.2.100.71 NMAC shall remain in effect for a period of one year from the effective date of this rule.

(2) Any termination of 19.2.100.71 NMAC before one year from the effective date of this rule shall not be effective until 30 days after the commissioner has by certified mail sent notice of such prospective termination to each lessee whose lease is being extended by the operation of this section.

C. Any oil and gas lease issued by the commissioner of public lands and maintained in good standing according to the terms and conditions thereof and all applicable statutes and regulations shall not expire if:

(1) There is at least one well capable of producing oil located upon some part of the lands included in the lease and all such wells are shut in because of the severe reduction in the price of oil;

(2) The lessee timely notifies the commissioner in writing, within 30 days of the date all oil wells capable of producing have been shut in, with the following information: the API (american petroleum institute well number), the well name and number, the lease number, the date the well was shut in, and the date the last well on the lease was shut in. Notice may be filed via electronic mail to oilSIRnotice@slo.state.nm.us or may be mailed to the state land office. Said notice shall

be accompanied by a form C-103 filed with the oil conservation division or other written oil conservation division approval of the shut-in for each well shut in; and

(3) The lessee timely pays an annual shut-in royalty within 90 days from the date all wells capable of producing oil have been shut in and thereafter before each anniversary of such date. Each payment remitted under this section shall accompany a form made available by the commissioner which shall specify the shut-in well, along with other applicable information. The amount of the shut-in royalty shall be twice the annual rental due by the lessee under the terms of the lease but not less than three hundred twenty dollars (\$320) per well per year, the fee established by the state legislature in Section 19-10-6 NMSA 1978. If the other requirements of this subsection are satisfied, the timely payment of the shut-in royalty shall be considered for all purposes the same as if oil were being produced in paying quantities until the next anniversary of the date the well was first shut in; provided, that this rule continues to be in effect.

(a) A state land office lease may be maintained in effect by virtue of one or more wells located within an area covered by a unit agreement where all such wells have been temporarily shut in pursuant to this rule. For such shut-in wells located on a state land office lease, the lessee of each state lease maintained in effect by virtue of such wells shall pay royalty per well calculated by multiplying the base shut-in royalty that would be due for that lease by the percentage of acreage of that lease within the area; but in no event shall the lessee pay less than three hundred twenty dollars (\$320) per well per year.

(b) A state land office lease may be maintained in effect by virtue of one or more wells located within an area covered by a communitization agreement, or constituting a pooled unit or cooperative area, where all such wells have been temporarily shut in pursuant to this rule. The lessee of the largest state lease within the communitized area shall pay the base shut-in royalty due for that lease; but in no event shall the lessee pay less than three hundred twenty dollars (\$320) per well per year.

(c) If the date when a shut-in royalty payment is due falls on a Saturday, Sunday or legal state or federal holiday, the shut-in royalty may be timely paid if received on the next calendar day which is not a Saturday, Sunday or holiday

(d) Under the standard business practice of the state land office, the date that the state land office stamps or otherwise marks the shut-in royalty payment or check establishes the date of actual receipt by the state land office.

D. If the lessee fails to timely comply with the requirements of Subsection C of 19.2.100.71 NMAC, no action by the commissioner or the state land office may ratify, re-grant or revive the expired lease or estop the commissioner from treating the lease as expired, unless such relief is granted expressly in writing signed by the commissioner.

E. Lessees utilizing the temporary shut-in provisions of this rule, and assignees of any lease that is maintained in effect by virtue of this rule, remain fully responsible for compliance with all laws, regulations of the state land office and other state agencies, and lease terms regarding operations on the leased premises, including with respect to environmental protection. Lessees shutting in under this rule, and assignees of any lease that is maintained in effect by virtue of this rule, shall remain subject to all present state land office bonding requirements, and shall be subject to any future bonding requirements upon adoption. No lessee whose actions or omissions have caused expenditures to be made from the state trust lands restoration and remediation fund may shut in under the provisions of this rule until that lessee has reimbursed the state trust lands restoration and remediation fund in the amount of the expenditure.

F. Under no circumstances will the commissioner refund any portion of the shut-in royalty paid for a shut-in well up to the amount required by Subsection C of 19.2.100.71 NMAC.

G. Upon the termination of 19.2.100.71 NMAC, automatically or by action of the commissioner, a lease maintained in effect by payment of shut-in royalty shall expire unless there is actual production in paying quantities within 90 days thereafter, unless the time is further extended, in writing, on an individual lease basis, upon request at the discretion of the commissioner; provided that if the commissioner shortens the effective period of this rule to less than one year pursuant to Subsection B of 19.2.100.71 NMAC, a lease maintained in effect by payment of shut-in royalty shall expire unless there is actual production in paying quantities within 120 days thereafter.

CHAPTER 4: GRAZING [RESERVED]

CHAPTER 5: STATE PARKS AND RECREATION

PART 1: GENERAL PROVISIONS

19.5.1.1 ISSUING AGENCY:

Energy, Minerals and Natural Resources Department, State Parks Division.

[12-31-96; 19.5.1.1 NMAC - Rn, 19 NMAC 5.1.1, 12/31/2002; A, 1/1/2008]

19.5.1.2 SCOPE:

19.5.1 NMAC applies to persons using the New Mexico state parks system.

[12-31-96, A, 12-31-98; 19.5.1.2 NMAC - Rn, 19 NMAC 5.1.2, 12/31/2002; A, 1/1/2008]

19.5.1.3 STATUTORY AUTHORITY:

19.5.1 NMAC is authorized pursuant to Subsection E of Section 9-1-5 and Sections 16-2-2 *et seq*, NMSA 1978.

[12-31-96; 19.5.1.3 NMAC - Rn, 19 NMAC 5.1.3, 12/31/2002; A, 1/1/2008; A, 5/15/2018]

19.5.1.4 DURATION:

Permanent.

[12-31-96; 19.5.1.4 NMAC - Rn, 19 NMAC 5.1.4, 12/31/2002]

19.5.1.5 EFFECTIVE DATE:

December 31, 1996, unless a later date is cited at the end of a section.

[12-31-96; 19.5.1.5 NMAC - Rn & A, 19 NMAC 5.1.5, 12/31/2002]

19.5.1.6 OBJECTIVE:

19.5.1 NMAC's objective is to identify general provisions and definitions, which apply to parts in Title 19, Chapter 5.

[12-31-96; 19.5.1.6 NMAC - Rn, 19 NMAC 5.1.6, 12/31/2002; A, 1/1/2008]

19.5.1.7 DEFINITIONS:

A. "Authorized areas" means locations, places, sites, regions, zones or spaces identified by the director or, for purposes of hunting or fishing, the state game commission. These areas may be defined with signs or other appropriate proclamation or means. For purposes of bowfishing, authorized areas include all parks where fishing is allowed.

B. "Boating and rafting excursions" means a guiding service for boating or rafting trips offered to the general public.

C. "Capital improvement" means a construction project by a concessionaire to the concession premises that is not maintenance or repair and that costs at least \$1,000.

D. "Commercial activity" means for-profit sales or services but does not include the operation of vending machines unless the vending machine is operated as part of a larger concession operation.

E. "Commercial charter bus" means a bus transporting a group of persons who pursuant to a common purpose, and under a single contract at a fixed price, have acquired the exclusive use of a bus to travel together under an itinerary.

F. "Commercial filming" means the use of motion picture, videotaping, sound recording or other moving image or audio recording equipment that involves the advertisement of an event, product or service; or the creation of a product for sale including film, videotape, television broadcast or documentary of participants in commercial sporting or recreation events for the purpose of generating income.

G. "Commercial photography" means still images taken with a camera that the photographer intends to sell.

H. "Concession" means commercial activity conducted within a park the department has authorized in writing.

I. "Concessionaire" means the owner or operator of a concession who operates pursuant to a department-issued concession contract.

J. "Concessions administrator" means a division employee who maintains records and documentation concerning concession contracts and concession permits.

K. "Concession contract" means an agreement between the department and a person, or business entity, which allows the concessionaire to provide services, merchandise, accommodations or facilities within a park. The concessionaire may or may not occupy a permanent structure or location within the park. The concession contract's term shall not exceed 30 years pursuant to Section 16-2-9 NMSA 1978.

L. "Concession permit" means a permit the department issues to a person or business entity to provide commercial activities, including services or goods in a park for a period of up to one year. The fee for a concession permit is established in 19.5.6 NMAC. Services the division may authorize under a concession permit include guiding and outfitting services for fishing, boating and rafting excursions; educational and park resource protection services; and other services or goods, including commercial services, that enhance visitors' experience and enjoyment, such as sales of firewood, propane, ice, food or refreshments.

M. "Concession permittee" means the holder of a department-issued concession permit.

N. "Cultural property" means a structure, place, site or object having historic, archaeological, scientific, architectural or other cultural significance.

O. "Department" means the energy, minerals and natural resources department.

P. "Developed site" means a park camping site with at least one shelter, table or grill or a combination of two or more such facilities at the site. Sites with recreational vehicle utility hookups are considered developed regardless of the presence of shelters, tables or grills.

Q. "Director" means the director of the energy, minerals and natural resources department, state parks division.

R. "Director designee" means persons the director appoints including deputy directors, bureau chiefs, regional managers and park superintendents.

S. "Division" means the energy, minerals and natural resources department, state parks division.

T. "Flotation assist device" means a wet suit or wearable flotation device in good condition capable of providing flotation to the wearer on the water's surface.

U. "Geocaching" means an outdoor treasure-hunting activity in which the participants use a global positioning system receiver or other navigational means to hide or find containers called "geocaches" or "caches".

V. "Gross receipts from sales and services" means the total amount of receipts from sales and services.

W. "Guide" means an individual or an employee of an outfitter who is hired to escort or accompany clients in fishing, rafting or boating.

X. "Letter boxing" means an outdoor hobby that combines elements of orienteering, art and puzzle solving. Letter boxers hide small, weatherproof boxes in publicly-accessible places and distribute clues to finding the boxes in printed catalogs, on websites or by word of mouth. The activity is characterized by the boxes containing a logbook and a rubber stamp. Letter boxers stamp the box's logbook with personal rubber stamps and use the box's stamp to imprint their personal logbooks as proof they found the box.

Y. "Net receipts from sales and services" means the total amount of receipts from sales and services, less the amount of gross receipts taxes.

Z. "Off highway motor vehicle" means a motor vehicle designed by the manufacturer for operation exclusively off the highway or road and includes:

(1) **"all-terrain vehicle,"** which means a motor vehicle 50 inches or less in width, having an unladen dry weight of 1,000 pounds or less, traveling on three or more low-pressure tires and having a seat designed to be straddled by the operator and handlebar-type steering control;

(2) **"off-highway motorcycle,"** which means a motor vehicle traveling on not more than two tires and having a seat designed to be straddled by the operator and has handlebar-type steering control;

(3) **"snowmobile,"** which means a motor vehicle designed for travel on snow or ice and steered and supported in whole or part by skis, belts, cleats, runners or low-pressure tires;

(4) **"recreational off-highway vehicle,"** which means a motor vehicle designed for travel on four or more non-highway tires, for recreational use by one or more persons, and having:

(a) a steering wheel for steering control;

- (b) non-straddle seating;
- (c) maximum speed capability greater than 35 miles per hour;
- (d) gross vehicle weight rating no greater than 1,750 pounds;
- (e) less than 80 inches in overall width, exclusive of accessories;
- (f) engine displacement of less than 1,000 cubic centimeters; and
- (g) identification by means of a 17-character vehicle identification number; or

(5) by rule of the department of game and fish, any other vehicles that may enter the market that fit the general profile of vehicles operated off the highway for recreational purposes.

AA. "Other power-driven mobility device" means any mobility device powered by batteries, fuel or other engines – whether or not designed primarily for use by individuals with mobility disabilities – that is used by individuals with mobility disabilities for the purpose of locomotion including golf cars, electronic personal assistance mobility devices, such as the Segway® PT, or any mobility device designed to operate in areas without defined pedestrian routes, but that is not a wheelchair.

BB. "Outfitter" means a person or company who employs guides.

CC. "Park" means an area designated as a state park within the state parks system and that the division manages or owns.

DD. "Park" or "parking" means the leaving of a vehicle, camping unit or trailer, whether occupied or not, in a location, other than when engaged in loading or unloading.

EE. "Park management and development plan" means a plan used as a guide for expansion, services, programs and development for the park.

FF. "Park support group" means an organization as defined in Section 6-5A-1 NMSA 1978, or an organized group of individuals that volunteers time, services or funds to promote and support the division or an individual park and whose principal purpose as authorized by the division is to complement, contribute to and support, aid the function of or forward the division's or park's purposes.

GG. "Person" means an individual, partnership, firm, corporation, association, joint venture or other entity.

HH. "Personal flotation device" means a United States coast guard approved life preserver, buoyant vest, hybrid device, ring buoy or buoyant cushion.

II. "Primitive site" means a camping site that offers no facilities except a cleared area for camping. Primitive sites may have trash receptacles, chemical toilets or parking.

JJ. "Rally" means a parking area or facility designated for group functions.

KK. "Receipts" means consideration in money and in trade received from sales and charges for services.

LL. "Regional manager" means a division employee responsible for several parks within a region.

MM. "Resource program" means a division employee or employees responsible for the natural and cultural resource protection program.

NN. "Sales and services" means transactions by a concessionaire, or a concessionaire's agents or employees, for which the concessionaire receives consideration in money or money's worth in connection with the concession business operated pursuant to the concession contract.

OO. "Secretary" means the secretary of the department.

PP. "Special event facility" means an entire building or structure such as a visitor center, lodge, pavilion or group shelter, or an area designated by the superintendent.

QQ. "Special use permit" means a permit the division has issued to a person for a non-commercial activity or event in a park.

RR. "State parks system" means land and water in a park.

SS. "Superintendent" means a division employee who is in charge of a specific park; which includes a park superintendent or park manager.

TT. "Vehicle" means an automobile, car, van, sport-utility truck, pickup truck, motorcycle, wagon, buggy or similar device that is used or may be used to transport persons or property on a highway, except devices moved exclusively by human power.

UU. "Vending machine" means a coin-operated beverage, snack or service machine subject to division approval.

WW. "Visitor" means a person who reserves park facilities or enters a park. This definition does not include department employees who are on duty, concessionaires or their employees operating their concession or on duty employees of an entity that owns the property where the park is located.

XX. "Wheelchair" means a manually-operated or power-driven device designed primarily for use by an individual with a mobility disability for the main purpose of indoor or both indoor and outdoor locomotion.

YY. "Working days" means Monday through Friday, excluding state holidays.

[7/17/1967, 7/25/1972, 7/31/1979, 12/21/1989, 12/31/1989, 5/20/1992, 12/31/1996, 12/31/1998, 7/1/1999; 19.5.1.7 NMAC - Rn & A, 19 NMAC 5.1.7, 12/31/2002; A, 5/1/2004; A, 1/1/2008; A, 12/30/2010; A, 1/1/2013; A, 5/15/2018]

PART 2: PARK VISITOR PROVISIONS

19.5.2.1 ISSUING AGENCY:

Energy, Minerals and Natural Resources Department, State Parks Division.

[19.5.2.1 NMAC - Rp, 19.5.2.1 NMAC, 1/1/2008]

19.5.2.2 SCOPE:

19.5.2 NMAC applies to persons using the New Mexico state parks system.

[19.5.2.2 NMAC - Rp, 19.5.2.2 NMAC, 1/1/2008]

19.5.2.3 STATUTORY AUTHORITY:

19.5.2 NMAC is authorized pursuant to Subsection E of Sections 9-1-5 and 16-2-2 *et seq.* NMSA 1978.

[19.5.2.3 NMAC - Rp, 19.5.2.3 NMAC, 1/1/2008; A, 5/15/2018]

19.5.2.4 DURATION:

Permanent.

[19.5.2.4 NMAC - Rp, 19.5.2.4 NMAC, 1/1/2008]

19.5.2.5 EFFECTIVE DATE:

January 1, 2008, unless a later date is cited at the end of a section.

[19.5.2.5 NMAC - Rp, 19.5.2.5 NMAC, 1/1/2008]

19.5.2.6 OBJECTIVE:

19.5.2 NMAC's objective is to provide standards for visitor use of the New Mexico state parks system in a manner that promotes public health, safety and welfare and preserves park facilities and the environment.

[19.5.2.6 NMAC - Rp, 19.5.2.6 NMAC, 1/1/2008]

19.5.2.7 DEFINITIONS:

[RESERVED]

[See 19.5.1.7 NMAC for definitions.]

[19.5.2.7 NMAC - Rp, 19.5.2.7 NMAC, 1/1/2008]

19.5.2.8 DELEGATION:

The secretary delegates concurrent authority to the director as contained in Subsections B, E and F of Section 16-2-32 NMSA 1978.

[19.5.2.8 NMAC - Rp, 19.5.2.8 NMAC, 1/1/2008]

19.5.2.9 RESTRICTED AREAS:

A. Access to parks, both land and water, shall be open to the public, except that each superintendent may close an area or facility by posting or otherwise designating the area as closed to entry. A superintendent may close an area for no more than five consecutive days without the director's approval. The superintendent shall ensure areas designated for seasonal closure are posted indicating the closure period.

B. The superintendent may set a visitor capacity limit for a park or areas within a park. State park officials shall enforce each park's visitor capacity to protect visitors and to prevent damage to the park's natural or cultural resources. Once capacity is reached, state park officials shall not admit additional visitors until some of the visitors already there have left.

C. The superintendent may restrict or prohibit activities in certain areas of a park by posting or otherwise designating the prohibition or restriction.

[19.5.2.9 NMAC - Rp, 19.5.2.9 NMAC, 1/1/2008]

19.5.2.10 HOURS:

The director or the director designee establishes opening and closing times for every area and facility of the state parks system. Hours are posted at the established park entrances, offices or pay stations.

[19.5.2.10 NMAC - Rp, 19.5.2.10 NMAC, 1/1/2008]

19.5.2.11 DAY USE:

A. Day use of a park area is from 6:00 a.m. to 9:00 p.m. unless the superintendent posts different hours or extends hours for special programs or events. Visitors shall pay day-use fees upon entering the park. See 19.5.6 NMAC.

B. The division may designate areas solely for day use to exclude camping.

C. Visitors shall maintain sites in parks in a clean and sanitary condition at all times.

D. Visitors shall clean the site and dispose of trash and litter in appropriate waste receptacles.

[19.5.2.11 NMAC - Rp, 19.5.2.11 NMAC, 1/1/2008; A, 1/1/2013]

19.5.2.12 CAMPING:

A. Visitors may camp in parks in designated areas, provided that they obtain a valid camping permit. Visitors shall obtain permits upon entry by paying appropriate fees. See 19.5.6 NMAC. Use of park properties and facilities between the hours of 9:00 p.m. and 6:00 a.m., or as posted by the superintendent, is camping. Check out time, the time the campsite is to be vacated, is 2:00 p.m.; however, the camping permit allows day use of the park until 9:00 p.m. or as posted by the superintendent, on the day the camping permit expires. Camping is not available at Living Desert Zoo and Gardens state park, Rio Grande Nature Center state park, Mesilla Valley state park or Smokey Bear historical park.

B. Campers shall not leave unoccupied any type of vehicle, motorized camper, trailer, tent or other sleeping unit or facility or otherwise leave a campsite unoccupied for more than 24 hours without the superintendent's prior approval. Unoccupied means the camper is not present at the campsite for more than 24 hours.

C. Campers shall maintain campsites in a clean and sanitary condition at all times. Campers shall clean campsites and place litter only in appropriate disposal containers.

D. Campers in areas or parks designated and posted by the superintendent as pack-in, pack-out, shall carry out supplies and solid waste or other refuse, including human bioproducts, and properly dispose of these items in appropriate waste receptacles outside of the designated area or park.

E. Campers may reside in a park for a maximum of 14 calendar days during any 20-calendar day period unless the director extends, decreases or waives this limit. Campers shall completely remove camping equipment and gear from the park for six calendar days during the 20-calendar day period.

F. The division shall charge fees according to the facilities provided at each campsite, as provided in 19.5.6 NMAC, regardless of whether the camper uses the facilities at the campsite. For example, camping at a site with electricity requires payment of the fee for a developed site with electrical hookup even if the camper uses no electricity.

G. Vehicles in a park between the hours of 9:00 p.m. and 6:00 a.m., or as posted by the superintendent, are individually subject to the appropriate camping fees. The division considers motor homes towing a vehicle or vehicles towing a camper a single vehicle for 19.5.2.12 NMAC's purposes.

H. The division may require visitors to pay fees for their entire stay in advance (rather than daily) for weekends, holidays or special events.

I. Anchoring a boat or vessel overnight within a park constitutes camping and requires a valid camping permit for the anchored boat or vessel unless the visitor has paid camping fees for the towing vehicle.

(1) Visitors may not leave anchored boats or vessels vacant for more than 24 hours without the superintendent's permission. Anchored boats or vessels may remain within a park for a maximum of 14 calendar days during any 20-calendar day period unless the director extends, decreases or waives this limit. Visitors shall completely remove boats or vessels from the park for six calendar days during the 20 calendar-day period.

(2) Subsection I of 19.5.2.12 NMAC does not apply to boats or vessels only while they are moored overnight at concession operated facilities such as marinas or buoy lines. Boats or vessels are subject to division camping permits and camping fees when moored overnight at any other location in the park. Time limits do not apply while boats or vessels are moored at the concession facilities.

J. Reserved campsites shall become available to other visitors if the visitor holding the reservation does not occupy the reserved site or contact the reservations contractor or the park by 4 p.m. the day after the scheduled arrival date. At that time the site will be available to other visitors and reservations. The visitor holding the reservation who failed to file a cancellation is not eligible for a refund.

[19.5.2.12 NMAC - Rp, 19.5.2.12 NMAC, 1/1/2008; A, 1/1/2013; A, 5/15/2018]

19.5.2.13 USE OF FACILITIES:

A. Facilities are available on a first come, first served basis except at parks where the division has established a reservation program and a visitor has reserved the facility. Campers shall not save or reserve camping spaces for other individuals even by purchasing additional permits.

B. Visitors using a park facility shall keep it in a clean and sanitary manner and shall leave it in a clean and sanitary condition.

C. Glass containers are prohibited outside vehicles, motor homes, campers, trailers and tents within the state parks system except on established commercial premises.

D. The division has developed and designated special accessible facilities for the use of individuals with disabilities. Individuals with disabilities shall have preferential use of these facilities over other persons.

E. Visitors shall not remove water from the park for use outside the park or deposit trash generated outside the park within a park.

F. Advance reservations are required for the use of meeting rooms. Meeting rooms are not available at all parks. A person who reserves a meeting room is responsible for setting up the room, cleaning the room after use and leaving the room in the same condition it was in before use. See 19.5.6 NMAC for meeting room fees.

G. The director may designate areas within the state parks system including campsites, group shelters, group areas, cabins, yurts and lodges for use by reservation.

H. Advance reservations are required for the use of group shelters, group areas or reservation campsites. Visitors shall pay the appropriate day use or camping fees in addition to the fees for use of the facility or area. If visitors make reservations through the division's reservation system contractor, visitors shall pay the reservation processing and cancellation fees the contractor charges. The division may accept annual permits at reservation campsites if posted. See 19.5.6 NMAC for group shelter fees.

I. The superintendent may restrict the number or size of tents, shade or screen shelters occupying a campsite or day use site by posting the restriction or restrictions in the affected area or areas.

[19.5.2.13 NMAC - Rp, 19.5.2.13 NMAC, 1/1/2008; A, 12/30/2010; A, 1/1/2013; A, 5/15/2018]

19.5.2.14 PARKING:

A. Visitors shall park vehicles, camping units or trailers only in established parking areas or parking turnouts where provided. Visitors shall not park any vehicle, camping unit or trailer in a manner that blocks access, restricts traffic or inhibits the free movement of other vehicles, persons or wheelchairs. Visitors shall not leave a trailer, boat or vessel that is not attached to a vehicle in parking areas or parking turnouts for a period of more than 72 hours without prior approval of the superintendent. At the superintendent's discretion, the division may remove vehicles so parked at the owner's expense.

B. Visitors shall not park a vehicle, camping unit or trailer in a designated disabled parking space unless the visitor's vehicle has registration plates or a state-issued placard indicating disability.

C. The superintendent may restrict the number or size of vehicles, camping units or trailers occupying a campsite, day use site or parking area by posting the restriction or restrictions in the affected area or areas.

[19.5.2.14 NMAC - Rp, 19.5.2.14 NMAC, 1/1/2008; A, 1/1/2013]

19.5.2.15 VEHICLE TRAFFIC:

A. Visitors shall drive vehicles within the state parks system only on established roads or areas authorized for vehicle traffic. Visitors shall operate vehicles at speeds at or below the posted limit and in a manner that is reasonable and prudent, with due regard for traffic, pedestrians and road surface conditions and width.

(1) Visitors shall not operate vehicles in a manner that endangers the safety of persons, property or wildlife.

(2) Visitors shall not operate vehicles at speeds greater than the posted limit and shall not exceed 30 miles per hour where no limit is posted.

B. Vehicles operating within a park shall be registered and operated according to New Mexico motor vehicle laws.

C. It is unlawful to ride or to allow anyone to ride in a boat or vessel loaded on a trailer, except when launching or loading a boat or vessel at an established boat ramp.

[19.5.2.15 NMAC - Rp, 19.5.2.15 NMAC, 1/1/2008; A, 1/1/2013]

19.5.2.16 OFF-HIGHWAY MOTOR VEHICLES AND GOLF CARS:

A. Visitors shall not operate off-highway motor vehicles or golf cars in the state parks system, with the exception of persons with mobility disabilities as provided in Subsection D of 19.5.2.16 NMAC or as provided in Subsection F of 19.5.2.16 NMAC for ice fishing.

B. State park officials may use off-highway motor vehicles or golf cars for park operations and maintenance.

C. The park superintendent may approve the use of golf cars by concessionaires within certain areas of a park for concession operations and maintenance.

D. Other power-driven mobility devices may only be used by visitors with mobility disabilities on established roads, pathways, trails and other areas open to pedestrian

use. The use of other power-driven mobility devices is subject to more stringent laws or rules or regulations of a landowner (e.g. United States department of the interior, bureau of reclamation; New Mexico department of game and fish; United States army corps of engineers, New Mexico state land office, etc.) from which the division leases the land or reservoir. Visitors and state park officials shall comply with laws or regulations or rules of the landowner (e.g. United States department of the interior, bureau of reclamation) where applicable. Visitors shall consult park information provided at the park office and on the division's official website to determine limitations on park pathways, trails and other areas open to pedestrian use. To ensure protection of park resources, visitor safety and enjoyment:

(1) only other power-driven mobility devices not exceeding 36 inches in width and 62 inches in length are permitted on park pathways, trails and other areas open to pedestrian use;

(2) certain park pathways, trails and other areas open to pedestrian use may have other size limitations, or use of other power-driven mobility devices on certain park pathways, trails and other areas open to pedestrian use may be prohibited, as designated at the park office and on the division's official website;

(3) internal combustion engine devices are prohibited on park pathways, trails and other areas open to pedestrian use;

(4) maximum speed on park pathways, trails and other areas open to pedestrian use shall not exceed 10 miles per hour;

(5) the use of other power-driven mobility devices on park pathways, trails and other areas open to pedestrian use that produces noise that exceeds 96 decibels when measured using test procedures established by the society of automotive engineers pursuant to standard J1287 is prohibited.

E. Persons using an other power-driven mobility device may be required to provide verification that the mobility device is required because of the person's disability. Acceptable forms of verification are:

(1) a valid, state-issued, disability parking placard or card;

(2) other state-issued proof of disability; or

(3) in lieu of Paragraphs (1) and (2) of Subsection E of 19.5.2.16 NMAC, a person may provide a verbal representation, not contradicted by observable fact, that the other power-driven mobility device is being used for a mobility disability.

F. Persons may use off-highway motor vehicles for ice fishing on the surface of the ice and in designated boat launch areas when the lake is open to ice fishing and designated for off-highway motor vehicle use.

[19.5.2.16 NMAC - Rp, 19.5.2.16 NMAC, 1/1/2008; A, 1/1/2013; A, 5/15/2018]

19.5.2.17 SPARK ARRESTORS:

Internal or external combustion engines shall be equipped with a properly installed, maintained and functioning spark arrestor meeting either the:

A. United States department of agriculture, forest service standard 5100 (as amended); or

B. appropriate society of automotive engineers recommended practice J335(b) or J350(a).

[19.5.2.17 NMAC - Rp, 19.5.2.17 NMAC, 1/1/2008; 19.5.2.17 NMAC - N, 1/1/2013]

19.5.2.18 SWIMMING:

Swimming shall be at the swimmer's own risk. Swimming is prohibited within 150 feet of marinas, fishing piers, docks, ramps, dams or as otherwise posted. Visitors using air mattresses, inner tubes, surfboards, sail or wind, styrofoam flotation devices, paddleboards or other similar articles shall wear a United States coast guard approved personal flotation device or a flotation assist device. Swimming may be subject to more stringent laws or rules or regulations of a landowner (e.g. United States department of the interior, bureau of reclamation) from which the division leases the land or reservoir.

[19.5.2.18 NMAC - Rp, 19.5.2.18 NMAC, 1/1/2008; 19.5.2.18 NMAC - Rn & A, 19.5.2.17 NMAC, 1/1/2013]

19.5.2.19 SKIN OR SCUBA DIVING:

A. Skin or scuba diving is at the diver's own risk and is prohibited within 150 feet of marinas, fishing piers, docks, ramps or dams except for official activities and in other areas the superintendent designates. Skin or scuba diving may be subject to more stringent laws or rules or regulations of a landowner (e.g. United States department of the interior, bureau of reclamation) from which the division leases the land or reservoir.

B. The division permits scuba diving only in groups of two or more divers. An additional scuba diver or competent diver-tender shall remain above water at all times.

C. Equipment such as tanks, weight belts, etc. shall be equipped with quick-release fasteners.

D. Scuba divers shall be equipped with a buoyancy compensator. Scuba divers shall only use self-inflated, air supplied canister, or tank inflated, direct connection to the tank supplied air.

E. Divers shall use a diver's flag to mark the point of submergence. Divers shall fly the diver's flag from a boat or flotation device while diving. The flag shall be red with a white diagonal stripe running from the upper left corner to the lower right corner.

F. Boats or vessels shall stay at least 150 feet away from a diver's flag and shall exercise special care in the diver's flags' vicinity.

[19.5.2.19 NMAC - Rp, 19.5.2.19 NMAC, 1/1/2008; A, 12/30/2010; 19.5.2.19 NMAC - Rn & A, 19.5.2.18 NMAC, 1/1/2013]

19.5.2.20 HORSEBACK RIDING:

A. Visitors shall not ride, stable or maintain horses except in designated areas within the state parks system or without prior approval of the superintendent.

B. Visitors shall not use or possess hay or feed in parks located on state game commission property, including Clayton Lake state park, Fenton Lake state park, Cimarron Canyon state park, Mesilla Valley state park and Eagle Nest Lake state park, or United States department of the interior, bureau of reclamation property, including Navajo Lake state park, Heron Lake state park, El Vado Lake state park, Elephant Butte Lake state park, Caballo Lake state park, Percha Dam state park, Leasburg Dam state park, Sumner Lake state park and Brantley Lake state park, that is not certified as weed free by the New Mexico state university's certified weed free forage program or another governmental entity's certified weed free forage program.

[19.5.2.20 NMAC - Rp, 19.5.2.20 NMAC, 1/1/2008; A, 12/30/2010; 19.5.2.20 NMAC - Rn & A, 19.5.2.19 NMAC, 1/1/2013]

19.5.2.21 FIREARMS AND BOWS:

A. Visitors shall not possess firearms with a cartridge in any portion of the mechanism except:

(1) a legally licensed hunter during a designated hunting season and within park areas designated as open to hunting for the species the hunter is licensed to hunt;

(2) on duty law enforcement officials;

(3) persons with a valid concealed handgun license issued to them pursuant to the Concealed Handgun Carry Act, Section 29-19-1 *et seq.* NMSA 1978.

(4) persons with a concealed handgun license issued to them by a state that has a valid concealed handgun reciprocity agreement with the state on New Mexico; or

(5) persons carrying a firearm in a private vehicle or other private means of conveyance, for lawful protection of the person's or another's person or property.

B. Visitors shall not discharge a firearm within a state park except:

- (1) a legally licensed hunter during designated hunting season who is hunting within park areas designated as open to hunting for the species the hunter is licensed to hunt and who is more than 300 yards from a developed park area or occupied campsite;
- (2) on duty law enforcement officials pursuant to their official duties; or
- (3) persons with a valid concealed handgun license issued to them pursuant to the Concealed Handgun Carry Act, Section 29-19-1 *et seq.* NMSA 1978, or another state that has a valid concealed handgun reciprocity agreement with the state of New Mexico when discharged in self defense, defense of another person or defense of a dwelling or habitation.

C. Visitors shall not use or discharge arrows, bolts or air or gas fired projectiles, weapons and other devices capable of causing injury to persons or animals or damage or destruction of property in the state parks system, except:

- (1) a legally licensed hunter or fisherman during a designated hunting or fishing season who is hunting or fishing within park areas designated as open to hunting or fishing for the species the hunter or fisherman is licensed to hunt or fish, or in authorized areas, and who is more than 100 yards from a developed park area or occupied campsite; or
- (2) for park authorized events and activities.

D. Subsection C of 19.5.2.21 NMAC does not apply to on duty law enforcement officials acting pursuant to their official duties.

[19.5.2.21 NMAC - Rp, 19.5.2.21 NMAC, 1/1/2008; 19.5.2.21 NMAC - Rn & A, 19.5.2.20 NMAC, 1/1/2013]

19.5.2.22 ICE-SKATING AND ICE-FISHING:

Visitors may ice-skate or ice-fish within parks at their own risk. Superintendents may prohibit or limit these activities as conditions require. Ice-fishing is permitted as regulated by the state game commission. Visitors shall not cut holes in the ice for ice-fishing larger than 12 inches in diameter.

[19.5.2.22 NMAC - N, 1/1/2008; 19.5.2.22 NMAC - Rn, 19.5.2.21 NMAC, 1/1/2013]

19.5.2.23 LETTER BOXING AND GEOCACHING:

Visitors shall not conduct letter boxing or geocaching activities in parks without the superintendent's written permission.

[19.5.2.23 NMAC - Rp, 19.5.2.30 NMAC, 1/1/2008; 19.5.2.23 NMAC - Rn, 19.5.2.22 NMAC, 1/1/2013]

19.5.2.24 METAL DETECTING:

Metal detecting within a state park is prohibited unless a visitor obtains the superintendent's permission to use metal detectors for scientific activities such as projects permitted through the New Mexico cultural properties review committee or to retrieve lost items.

[19.5.2.24 NMAC - Rp, 19.5.2.22 NMAC, 1/1/2008; 19.5.2.24 NMAC - Rn, 19.5.2.23 NMAC, 1/1/2013]

19.5.2.25 ROCK COLLECTING:

A. Rock collecting is permissible in areas designated by the secretary and posted at the rockhound unit of Rockhound state park.

B. Rocks removed from Rockhound state park shall be as souvenirs only, not for resale, trade or commercial use.

C. Rock collecting is limited to small hand tools only. The following are prohibited: mechanical or motorized tools and equipment, tools with a handle longer than 12 inches, wheeled devices such as wheelbarrows, carts or wagons.

[19.5.2.25 NMAC - Rp, 19.5.2.23 NMAC, 1/1/2008; 19.5.2.25 NMAC - N, 1/1/2013]

19.5.2.26 NOISE LIMITATIONS:

A. Park "quiet hours" begin at 10:00 p.m. and end at 7:00 a.m. Visitors shall not operate generators, radios or unmuffled vehicles or engage in other loud activity during this time period.

B. Except in case of an emergency, creation of loud noise through the use of a loudspeaker requires the superintendent's advance written approval. Visitors shall operate radios, tape players or other sound producing devices at a reasonable level during non-quiet hours so as not to disturb other visitors.

C. Visitors shall not use fireworks within parks without the superintendent's advance written approval. Use or possession of fireworks may be prohibited by the landowner (e.g. United States department of the interior, bureau of reclamation) from which the division leases the land or reservoir.

[19.5.2.26 NMAC - Rp, 19.5.2.24 NMAC, 1/1/2008; 19.5.2.26 NMAC - Rn & A, 19.5.2.24 NMAC, 1/1/2013]

19.5.2.27 CONDUCT:

A. Visitors are encouraged to enjoy park experiences without infringing upon other visitors' ability to enjoy the same experiences. Visitors shall not engage in threatening, abusive, boisterous, insulting or indecent language or behavior.

B. Visitors shall not solicit, gamble or illegally discriminate.

C. Visitors shall not evade, disobey or resist a state park official's lawful order.

D. Parents, guardians or other adults in charge shall exercise constant direct supervision of minor children or adults who do not possess the intelligence or awareness to recognize possible danger.

E. Law enforcement officers may forcibly eject a person who violates a state law or a department rule or a person who evades, disobeys or resists a state park official's lawful order from a park. Based on the severity of conduct or reported incident, *i.e.*, threatening or intimidating conduct toward visitors or park staff, the ejection may be permanent.

(1) Permanent ejection requires the regional manager to issue written notification to the person being permanently ejected.

(2) To request review of a permanent ejection a regional manager issues, an individual ejected from a park or parks shall submit a written request including the reasons for requesting review to the director within 15 calendar days of issuance and provide written notice to the regional manager.

(3) The regional manager and the ejected individual shall submit written statements to the director within 10 working days of the submission of the request for review.

(4) The director shall base his or her decision on the written statements unless the ejected individual or the regional manager requests the opportunity to call witnesses or make oral arguments within 10 working days of the request for review.

(5) A request for hearing shall explain the need for any witness testimony or oral argument. If the ejected individual or regional manager asks to make oral arguments or call witnesses, the director may set a hearing to be held within 10 working days after receiving that request and provide notice of the hearing date, time and location to the regional manager and the ejected individual. Oral testimony shall be made under oath. A tape or stenographic record shall be made of any oral argument or witness testimony.

(6) The director shall issue a written final decision, including findings of fact within 10 working days after the date for submission of written statements, or a hearing if any, and send copies to the ejected individual and the regional manager.

[19.5.2.27 NMAC - Rp, 19.5.2.25 NMAC, 1/1/2008; 19.5.2.27 NMAC - Rn & A, 19.5.2.25 NMAC, 1/1/2013]

19.5.2.28 ANIMALS:

A. Visitors with dogs, cats or other domestic animals in areas of the state parks system shall control their animals, so as not to cause a nuisance to others. Visitors shall ensure their animals are vaccinated in accordance with applicable municipal or county ordinances and state laws.

B. Visitors shall pick up after their animals and shall maintain the area in a clean and sanitary condition.

C. Visitors shall restrain dogs on leashes that are not more than 10 feet in length, except in areas the superintendent designates. Subsection C of 19.5.2.28 NMAC does not apply to dogs being used in authorized activities such as field trials, retriever training or hunting. Visitors shall otherwise restrain their animals other than dogs to keep them from roaming freely within the parks.

D. Visitors shall prevent their animals from excessive barking, howling and making loud noises. Visitors shall prevent their animals from biting or attacking any person or destroying property. Visitors shall not leave their animals unattended in vehicles or campsites.

E. Animals are prohibited, except service animals, within visitor centers and at the following parks:

- (1)** Rio Grande Nature Center state park;
- (2)** Living Desert Zoo and Gardens state park; and
- (3)** Smokey Bear historical park.

F. The director may designate and post areas within a park where visitors' animals do not have to be restrained.

[19.5.2.28 NMAC - Rp, 19.5.2.26 NMAC, 1/1/2008; 19.5.2.28 NMAC - Rn & A, 19.5.2.26 NMAC, 1/1/2013; A, 5/15/2018]

19.5.2.29 LITTERING:

A. Visitors shall not dispose of commercial or construction waste, appliances or furnishings within a park.

B. Visitors shall not dispose of solid or liquid waste in the state parks system, except in receptacles provided for that purpose.

C. The superintendent may designate and post an area or an entire park as pack-in, pack-out, where visitors are responsible for properly disposing their solid waste outside of the designated area or park.

[19.5.2.29 NMAC - Rp, 19.5.2.29 NMAC, 1/1/2008; 19.5.2.29 NMAC - Rn & A, 19.5.2.27 NMAC, 1/1/2013; A, 5/15/2018]

19.5.2.30 ABANDONED PROPERTY:

Unless the visitor has obtained the superintendent's prior written permission, personal property left in any park for longer than 14 calendar days shall be deemed abandoned. State park officials shall remove property deemed abandoned at the owner's expense and dispose of it as provided by law.

[19.5.2.30 NMAC - Rp, 19.5.2.27 NMAC, 1/1/2008; A, 12/30/2010; 19.5.2.30 NMAC - Rn, 19.5.2.28 NMAC, 1/1/2013]

19.5.2.31 PROHIBITION OF ALCOHOLIC BEVERAGES:

The director may prohibit alcohol consumption or possession within a park or a designated area within a park and the superintendent shall post notice of the prohibition.

[19.5.2.31 NMAC- Rp, 19.5.2.28 NMAC, 1/1/2008; 19.5.2.31 NMAC - Rn, 19.5.2.29 NMAC, 1/1/2013]

19.5.2.32 FEES AND CHARGES:

A. Upon entering a park, visitors shall pay fees and charges in accordance with 19.5.6 NMAC. The visitor shall display applicable permits in accordance with instructions provided with the permit. If a visitor fails to obtain a permit, state park officials may field collect fees.

B. Fees, charges and permit display requirements do not apply to:

(1) government agencies or government officials or employees, including law enforcement and emergency service personnel, who are performing official duties (official duties do not include activities that do not have to occur in a park such as conferences, retreats or training);

- (2) non-governmental emergency service personnel, such as private ambulance companies, who are performing their official duties;
- (3) persons traveling nonstop through a park on a state or federal highway, county road, federal road or municipal road or street;
- (4) on duty news media personnel who are reporting on events or activities within a park and are only in the park to report on those events or activities; or
- (5) individuals or groups who are entering the park to provide volunteer services and have signed a volunteer agreement with the division or have made arrangements with the division to provide volunteer services.

C. Fees and charges do not apply to:

- (1) division contractors, suppliers or agents or other persons providing services to a park who are not using the park or its facilities for purposes other than providing services to the park;
- (2) concessionaires, concession permittees or their employees or commercial contractors, suppliers and agents who are only traveling to and from the concession and are not using the park or its facilities for personal use;
- (3) persons needing to pass through a park to access private property who are only passing through the park and are not using the park or its facilities;
- (4) park support group members or volunteers who have a park pass issued pursuant to Subsection D of 19.5.2.36 NMAC; or
- (5) persons who are only entering the Conchas Lake state park to access the concessionaire store, restaurant or bar at the north area of Conchas Lake state park and are not using the park or its facilities, provided they park in the designated concessionaire parking area at the north area.

D. Visitors not subject to Subsection B of 19.5.2.32 NMAC shall display permits at all times inside a park.

E. The superintendent or director may waive or reduce park fees for primary or secondary school groups or college or university groups that are involved with a division educational program or have made arrangements with the division to conduct research within a park or for governmental entities holding such activities as trainings or other educational activities or projects, retreats or conferences at a park.

F. State park officials may issue rain checks for unused, prepaid daily camping activities or the cancellation of a group shelter reservation.

G. The division or its contractors may charge fees in addition to the appropriate use fee for reservation processing and cancellation. The contractor or state park officials shall collect the reservation fee for those park sites where the division has established a reservation program. See 19.5.6 NMAC. Visitors shall pay the reservation fee in advance with applicable fees for facilities, sites, day use, camping, electricity or other service for the total reservation period.

H. In addition to the appropriate use fees, the division may charge additional fees for special events such as concerts, festivals, etc. The additional fees shall not exceed the value of admission to the special events.

[19.5.2.32 NMAC - N, 1/1/2008; 19.5.2.32 NMAC - Rn & A, 19.5.2.30 NMAC, 1/1/2013; A, 5/15/2018]

19.5.2.33 PERMITS AND CONCESSIONS:

Concession-operated camp grounds do not accept division-issued permits.

[19.5.2.33 NMAC - Rp, 19.5.2.28 NMAC, 1/1/2008; A, 12/30/2010; 19.5.2.33 NMAC - Rn, 19.5.2.31 NMAC, 1/1/2013]

19.5.2.34 DAY USE AND CAMPING PERMITS:

A. Day use permits.

(1) Day use permits authorize visitors to use park facilities that do not require other fees, such as meeting rooms or group shelters, from 6:00 a.m. to 9:00 p.m.; unless the superintendent has posted different hours.

(2) When purchasing the day use permit visitors shall comply with the instructions on the permit and provide, as requested, their name, address and vehicle license number as well as the date of purchase and the amount enclosed and, if applicable, their site number. Visitors shall indicate that they are only paying for day use.

B. Camping permits.

(1) Subject to the availability of a campsite, camping permits authorize visitors to camp in a park.

(2) When purchasing the camping permit visitors shall comply with the instructions on the permit and provide, as requested, their name, address and vehicle license number as well as their site number, the date of purchase, the amount enclosed and length of stay and, if applicable, their annual permit number. Visitors shall also indicate that they are camping.

[19.5.2.34 NMAC - N, 1/1/2008; 19.5.2.34 NMAC - Rn, 19.5.2.32 NMAC, 1/1/2013]

19.5.2.35 ANNUAL PERMITS AND PASSES:

A. Annual day use passes.

(1) Annual day use passes authorize the vehicle owner or individual to access and use the park at no additional charge during the times indicated in 19.5.2.11 NMAC. Visitors may use annual day use passes at all parks, except at the Living Desert Zoo and Gardens state park and Smokey Bear historical park.

(2) When purchasing an annual day use pass visitors shall comply with the instructions on the pass and provide their name and address.

(3) The division does not issue extra vehicle passes for annual day use passes.

B. Annual camping permits.

(1) Annual camping permits authorize the vehicle owner or individual to access and use the park at no additional charge except for utility hookups during the times indicated in 19.5.2.12 NMAC. The annual camping permit allows the visitor one sleeping unit. A motor home towing a vehicle or a vehicle towing a camping trailer is considered a sleeping unit. The visitor shall pay the per night camping fee for additional vehicles.

(2) Annual camping permits are available for:

(a) New Mexico residents as documented with a current New Mexico driver's license or other state of New Mexico issued photo identification;

(b) New Mexico residents 62 years of age or older as documented with a current New Mexico driver's license or other state of New Mexico issued photo identification;

(c) New Mexico residents with disabilities who present a New Mexico handicap motor vehicle license plate issued to them; a parking placard for mobility impaired individuals with a placard holder identification card issued to them by the taxation and revenue department, motor vehicle division if the placard was issued before June 4, 2008; a parking placard for mobility impaired individuals with the photograph of the placard holder issued to them by the taxation and revenue department, motor vehicle division if the placard was issued on June 4, 2008 or after; a New Mexico department of game and fish lifetime hunting and fishing card containing their name; a written determination from the United States social security administration finding that they are currently eligible for social security disability benefits or supplemental security income disability benefits; or a photocopy of the award letter the

United States department of veterans affairs issues indicating they have a one hundred percent service-connected disability; and

(d) all-out-of-state-residents including senior citizens and persons with disabilities.

(3) When purchasing an annual camping permit, visitors shall comply with the instructions on the permit and provide their name; address; if applicable, proof of age or residency; and the license plate number of the vehicle for which the visitor is purchasing the permit.

(4) Visitors may use annual camping permits at all parks, except at the Living Desert Zoo and Gardens state park and Smokey Bear historical park.

(5) Annual camping permits are authorized for use by the person the permit is issued to as indicated on the permit receipt and are non-transferrable.

C. Annual day use passes and annual camping permits expire 12 months after the date the division issues them. The division shall not make refunds or prorations for permits or passes that remain in effect for less than 12 months.

D. Visitors may obtain replacement annual camping permits and stickers by submitting a signed affidavit describing the facts of the purchase and the permit's loss or destruction and, if available, the original permit or proof of purchase. The division does not issue replacements for annual day use passes.

E. The division may sell gift certificates for annual day use passes and annual camping permits.

[19.5.2.35 NMAC - N, 1/1/2008; 19.5.2.35 NMAC - Rn & A, 19.5.2.33 NMAC, 1/1/2013]

19.5.2.36 DISABLED VETERANS PASSES:

A. Disabled veterans camping passes.

(1) A disabled veterans camping pass authorizes New Mexico resident veterans with a fifty percent or greater service-connected disability to camp at a park at no charge for three nights, consecutive or non-consecutive, within a 12-month period.

(2) To obtain the three one-night passes, an eligible veteran shall apply with the New Mexico department of veterans services for certification that verifies the veteran's disability and residency (current address) and that the New Mexico department of veterans services forwards to the division.

(3) Disabled veterans may obtain replacement camping passes and stickers by submitting a signed affidavit describing the facts of the issuance and loss or destruction of the pass and, if available, the original pass or proof of issuance.

B. Disabled veterans annual day use passes.

(1) Disabled veterans annual day uses passes authorize New Mexico resident veterans with a permanent fifty percent or greater service-connected disability to obtain one annual day use pass at no charge for personal use only. An eligible veteran desiring more than one annual day use pass shall purchase additional annual day use passes at full price.

(2) To obtain an annual day use pass, an eligible veteran shall apply with the New Mexico department of veterans services for certification that verifies the veteran's disability and residency (current address) and that the New Mexico department of veterans services forwards to the division.

(3) The division does not issue replacements for disabled veterans annual day use passes.

[19.5.2.36 NMAC - Rp, 19.5.2.28 NMAC, 1/1/2008; A, 12/30/2010; 19.5.2.36 NMAC - Rn, 19.5.2.34 NMAC, 1/1/2013]

19.5.2.37 VETERANS' DAY:

On the federally designated legal holiday known as Veterans' day any New Mexico resident who provides satisfactory proof that the resident is currently serving or has served in the United States armed forces, and the resident's spouse and dependent children are entitled to free use of any park including the waiving of all day use, camping or other fees.

[19.5.2.37 NMAC - Rp, 19.5.2.28 NMAC, 1/1/2008; A, 12/30/2010; 19.5.2.37 NMAC - Rn, 19.5.2.35 NMAC, 1/1/2013]

19.5.2.38 FOSTER FAMILIES:

Foster parents and children in their custody who are New Mexico residents are entitled to free day use of parks. To obtain a free annual day use pass for entry to parks the foster parent shall present a current New Mexico driver's license or other state of New Mexico issued photo identification and a current New Mexico children, youth and families department foster parent certification card.

[19.5.2.38 NMAC – N, 6/25/2019]

19.5.2.39 PARK PASSES:

A. Concessionaires. The director or director designee (see Subsection Q of 19.5.7 NMAC) may issue park passes to concessionaires, concession permittees or their employees or commercial contractors, suppliers and agents for access to and from the concession. Concessionaires, concession permittees or their employees or commercial contractors, suppliers and agents using the park, lake or facilities away from the concession premise shall pay the appropriate fees.

B. Contractors. The director or director designee (see Subsection Q of 19.5.1.7 NMAC) may issue park passes to division contractors, suppliers or agents or other persons providing services to a park for access to the park. Division contractors, suppliers or agents or other persons providing services to a park using the park or its facilities for purposes other than providing services to a park shall pay the appropriate fees.

C. Access to private property. The director or director designee may issue park passes to persons needing to pass through a park to access private property. Persons with such park passes shall only use the park passes to travel through the park. If they use the park or its facilities they shall pay the appropriate fees.

D. Park support groups and volunteers. The director or director designee may issue park passes to individuals who are members of a park support group that has entered into an agreement with the department or, as provided in division policy, to volunteers who significantly contribute to the division.

E. Complimentary park passes. The director or director designee (see Subsection Q of 19.5.1.7 NMAC) may issue complimentary passes as rainchecks to visitors for unused services or to resolve visitor complaints about park operation or maintenance.

F. Official use passes. The director may issue "official use only" passes to state government executive branch officials with direct oversight of the division, park advisory board members and state legislators for the performance of their official duties.

G. Advertising and promotions. To promote the parks or in exchange for advertising or promotion of parks, the director may issue free or discounted park passes or not charge fees if the director obtains the secretary's approval after the division provides the secretary with written justification showing that the issuance of park passes for promotion or advertising or not charging fees for promotional purposes provides a benefit to the division. Reduced rates for advertising must be equal to or exceed the value of the park passes that the division provides in exchange for receiving the reduced rates.

[19.5.2.39 NMAC - Rn, 19.5.2.38 NMAC, 6/25/2019]

19.5.2.40 SPECIAL USE PERMITS:

A. The division shall authorize public assemblies involving groups of more than 10 people; public assemblies involving groups of 10 people or less that are using stages, platforms or structures; or special events within the state parks system only by special use permit and only after payment of associated fees. Persons shall submit applications for special use permits to the superintendent of the park where the special event or public assembly is proposed at least 15 calendar days prior to the special event or public assembly, or at least 30 calendar days prior to the special event if the special event is a regatta, motorboat or boat race, marine parade, tournament or exhibition. The director may waive the time limits for submittal of special use permit applications where arrangements can be made in a shorter time without placing an undue administrative burden on staff or when no special arrangements are necessary.

B. Persons shall complete the division-provided special use permit, which may include the park where the special event or public assembly is proposed; the location of the proposed special event or public assembly within the park; the date of the proposed special event or public assembly; start and end times for the proposed special event or public assembly; the number of people expected to attend; a detailed description of the proposed special event or public assembly; the applicant's name, address and phone number; a hold harmless requirement if the applicant is a non-governmental entity; insurance coverage; and designation of the type of proposed special event or public assembly (*i.e.* special use, marine event, park event, etc.).

C. The superintendent shall approve the special use permit, approve the special use permit with conditions or deny the special use permit as provided in 19.5.2.40 through 19.5.2.42 NMAC. The superintendent shall not issue a special use permit for a period of more than 14 consecutive calendar days without the director's approval. The director may approve a special use permit for more than 14 consecutive calendar days if the event will exceed 14 consecutive calendar days. The park may charge fees in addition to the special use permit fee to cover costs of additional staff, facilities, etc. needed for the special event or public assembly. The division may enter into an agreement with the special use permittee to have the special use permittee pay a fee equal to the estimated fees, such as day use fees, that individuals attending the special event would have paid in fees in lieu of such fees.

D. No person shall violate a condition or restriction attached to or indicated on the special use permit. The division may revoke a permit if the permit holder violates 19.5.2 NMAC. The superintendent may also revoke a special use permit for any of the conditions that constitute grounds for denial of a special use permit as provided in Subsection B of 19.5.2.41 NMAC for special events and Subsection B of 19.5.2.42 NMAC for public assemblies, or for violation of the terms and conditions of the special use permit. Such a revocation shall be made in writing, with the reasons for revocation clearly set forth, except under emergency circumstances, when an immediate verbal revocation may be made to be followed by written confirmation within 72 hours.

[19.5.2.40 NMAC - Rn & A, 19.5.2.39 NMAC, 6/25/2019]

19.5.2.41 SPECIAL EVENTS:

A. Special events are allowed in a park if the applicant has obtained a special use permit from the superintendent.

B. The superintendent shall deny a special use permit if such activities would:

- (1)** cause injury or damage to park resources;
- (2)** be contrary to the purposes for which the park is established or operated; or unreasonably impair the purposes for which the park is established or operated;
- (3)** unreasonably interfere with interpretive, visitor service or other program activities, or with the division's administrative activities;
- (4)** substantially impair the operation of the division's public use facilities or services of concessionaires or contractors;
- (5)** present a danger to the public health and safety;
- (6)** result in significant conflict with other existing uses; or
- (7)** not comply with the laws or policies of the landowner (e.g. United States department of the interior, bureau of reclamation; New Mexico department of game and fish; United States army corps of engineers, New Mexico state land office, etc.).

C. As a condition of the special use permit's issuance, the superintendent may require:

- (1)** for non-New Mexico government or non-federal government applicants, the filing of a bond payable to the director, in an amount adequate to cover costs such as restoration, rehabilitation and cleanup of the area used, and other costs resulting from the event; or
- (2)** the acquisition of liability insurance in which the state, department and division, and if applicable the landowner (e.g. United States department of the interior, bureau of reclamation) from which the division leases the land or reservoir, are named as co-insured in an amount sufficient to protect the state, the department and the division, and if applicable the landowner.

D. The special use permit may contain such conditions as are reasonably consistent with protection and use of the park for the purposes for which it is established or operated. It may also contain reasonable limitations on the equipment used and the time and area within which the special event is allowed.

19.5.2.42 PUBLIC ASSEMBLIES, MEETINGS:

A. Public assemblies, meetings, gatherings, demonstrations, parades and other public expressions of views are allowed within parks. A special use permit issued by the park superintendent is required for public assemblies, meetings, gatherings, demonstrations, parades and other public expressions of views that involve groups of:

- (1) more than 10 people; or
- (2) 10 people or less who are using stages, platforms or structures.

B. The superintendent shall, without unreasonable delay, issue a special use permit on proper application unless:

- (1) a prior application for a special use permit for the same time and place has been made that has been or will be granted and the activities authorized by that special use permit do not reasonably allow multiple occupancy of that particular area;
- (2) it reasonably appears that the event will present a danger to the public health or safety; or
- (3) the event is of such nature or duration that it cannot reasonably be accommodated in the particular location applied for, considering such things as damage to park resources or facilities, interference with program activities or impairment of public use facilities.

C. If the superintendent denies a special use permit, the superintendent shall inform the applicant in writing with the reasons for the denial set forth.

D. The superintendent shall designate on a map, which shall be available in the office of the superintendent, the locations available for public assemblies. Locations may be designated as not available if such activities would:

- (1) cause injury or damage to park resources;
- (2) unreasonably interfere with interpretive, visitor service or other program activities, or with the division's administrative activities;
- (3) substantially impair the operation of public use facilities or services of division concessionaires or contractors; or
- (4) present a danger to the public health and safety.

E. The special use permit may contain such conditions as are reasonably consistent with protection and use of the park area for the purposes for which it is established. It

may also contain reasonable limitations on the equipment used and the time and area within which the event is allowed.

F. It is prohibited for persons engaged in activities permitted or authorized pursuant to 19.5.2.42 NMAC to obstruct or impede pedestrians or vehicles, harass park visitors, interfere with park programs or create security or accessibility hazards.

[19.5.2.42 NMAC - Rn & A, 19.5.2.41 NMAC, 6/25/2019]

19.5.2.43 RESEARCH AND COLLECTIONS:

A. Academic research activities, including plant and animal collecting, are allowed in a park if the person or entity has obtained a research permit through the division's resource program.

B. The division shall deny a research permit if such activities would:

- (1) cause undue injury or damage to park resources;
- (2) be contrary to the purposes for which the park is established or operated; or unreasonably impair the purposes for which the park is established or operated;
- (3) unreasonably interfere with interpretive, visitor service or other program activities, or with the division's administrative activities;
- (4) substantially impair the operation of the division's public use facilities or services of concessionaires or contractors;
- (5) present a danger to the public health and safety;
- (6) result in significant conflict with other existing uses;
- (7) not comply with the laws or policies of the landowner (e.g. United States department of the interior, bureau of reclamation; New Mexico department of game and fish; United States army corps of engineers; New Mexico state land office, etc.); or
- (8) not comply with federal or state laws concerning threatened and endangered species or cultural resources.

C. As a condition of the research permit's issuance, the division may require:

- (1) the acquisition of liability insurance in which the state, department and division, and if applicable the landowner (e.g. United States department of the interior, bureau of reclamation) from which the division leases the land or reservoir, are named as co-insured in an amount sufficient to protect the state, the department and the division, and if applicable the landowner; or

(2) the permittee to submit to the resource program a written report summarizing the data collected within six months of completion of the permitted activity.

D. The research permit may contain such conditions as are reasonably consistent with protection and use of the park for the purposes for which it is established or operated. It may also contain reasonable limitations on the equipment used and the time and area within which the research activity is allowed.

E. The park may charge fees to cover costs of additional staff, facilities, etc. needed for the research activities.

PART 3: PARK MANAGEMENT AND DEVELOPMENT PLAN

19.5.3.1 ISSUING AGENCY:

Energy, Minerals and Natural Resources Department, State Parks Division.

[12-31-96; 19.5.3.1 NMAC - Rn, 19 NMAC 5.3.1, 12/31/2002; A, 1/1/2008]

19.5.3.2 SCOPE:

19.5.3 NMAC applies to the division and the general public.

[12-31-96; 19.5.3.2 NMAC - Rn, 19 NMAC 5.3.2, 12/31/2002; A, 1/1/2008]

19.5.3.3 STATUTORY AUTHORITY:

19.5.3 NMAC is authorized pursuant to NMSA 1978, Section 9-1-5(E) and Sections 16-2-2 *et seq.*

[12-31-96; 19.5.3.3 NMAC - Rn, 19 NMAC 5.3.3, 12/31/2002; A, 1/1/2008]

19.5.3.4 DURATION:

Permanent.

[12-31-96; 19.5.3.4 NMAC - Rn, 19 NMAC 5.3.4, 12/31/2002]

19.5.3.5 EFFECTIVE DATE:

December 31, 1996, unless a later date is cited at the end of a section.

[12-31-96; 19.5.3.5 NMAC - Rn & A, 19 NMAC 5.3.5, 12/31/2002]

19.5.3.6 OBJECTIVE:

19.5.3 NMAC's objective is to provide direction for the management and development of the parks in the New Mexico state parks system in a manner that enhances recreational opportunities, protects park resources, provides for public input and protects the environment.

[12-31-96; A, 12-31-98; 19.5.3.6 NMAC - Rn, 19 NMAC 5.3.6, 12/31/2002; A, 1/1/2008]

19.5.3.7 DEFINITIONS:

[RESERVED]

[12-31-96; 19.5.3.7 NMAC - Rn, 19 NMAC 5.3.7, 12/31/2002; A, 1/1/2008]

[See 19.5.1.7 NMAC for definitions.]

19.5.3.8 REQUIREMENT:

Each park shall establish a park management and development plan and conform to the plan at all times except in cases of emergency in order to protect life or property. This requirement shall not prevent the director or secretary from making and implementing policy decisions concerning a park's management and operation if a plan is not in place and shall not require an existing plan to be amended before such policy decision is made and implemented.

[12-31-96; 19.5.3.8 NMAC - Rn & A, 19 NMAC 5.3.8, 12/31/2002; A, 1/1/2008]

19.5.3.9 CONTENT OF PARK MANAGEMENT AND DEVELOPMENT PLANS:

A. Park management and development plans shall address at a minimum:

- (1)** the park's mission and goals;
- (2)** park operational and management programs that:
 - (a)** identify how public use facilities, support facilities and infrastructure are maintained;
 - (b)** identify how the division manages the park to provide recreation opportunities and to protect park resources and visitors; and
 - (c)** provide for the park's administration;
- (3)** current and future concessions at the park; and

(4) expansion and development concepts that identify future capital improvement needs to facilities, structures and recreational use areas.

B. Park management and development plans shall include a map that identifies current facilities and activity areas and may identify areas where future development, management and recreational activities may be planned in the park.

[12-31-96, 12-31-98; 19.5.3.9 NMAC - Rn & A, 19 NMAC 5.3.9, 12/31/2002; A, 1/1/2008]

19.5.3.10 PUBLIC COMMENT:

The park management and development plan shall be available for public comment for 30 calendar days before the division implements or modifies it. The division shall publish a public notice in a newspaper of general circulation in the park's locality and mail it to persons who have made a written request for advance notice at least 30 calendar days before the division implements or modifies a park management and development plan.

[12-31-96; 19.5.310 NMAC - Rn & A, 19 NMAC 5.3.10, 12/31/2002; A, 1/1/2008]

19.5.3.11 APPROVAL:

Park management and development plans require the director and secretary's written approval.

[12-31-96; 19.5.311 NMAC - Rn & A, 19 NMAC 5.3.11, 12/31/2002; A, 1/1/2008]

19.5.3.12 MODIFICATION OF PARK MANAGEMENT AND DEVELOPMENT PLAN:

The division shall not modify or change a park management and development plan without a public comment period as provided in 19.5.3.10 NMAC. The division may review and update park management and development plans at any time if the director determines review is necessary.

[12-31-96; 19.5.312 NMAC - Rn & A, 19 NMAC 5.3.12, 12/31/2002; A, 1/1/2008; A, 1/1/2013]

PART 4: LEASE LOT PROVISIONS [REPEALED]

[This part was repealed on January 1, 2008.]

PART 5: CONCESSION ACTIVITIES

19.5.5.1 ISSUING AGENCY:

Energy, Minerals and Natural Resources Department, State Parks Division.

[19.5.5.1 NMAC - Rp, 19.5.5.1 NMAC, 1/1/2008]

19.5.5.2 SCOPE:

19.5.5 NMAC applies to a person conducting commercial activity within the state parks system and to a person who proposes to conduct commercial activity within the state parks system, except for a park support group unless the division director determines that the commercial activity's scale requires 19.5.5 NMAC's application to such group. 19.5.5 NMAC does not apply to repair or assistance services the public hires for personal property assistance or repair within a park. 19.5.5 NMAC does not apply to contractors the division hires to perform construction or other services for the division within the state parks system.

[19.5.5.2 NMAC - Rp, 19.5.5.2 NMAC, 1/1/2008]

19.5.5.3 STATUTORY AUTHORITY:

19.5.5 NMAC is authorized pursuant to NMSA 1978, Section 9-1-5(E) and Sections 16-2-2 *et seq.*

[19.5.5.3 NMAC - Rp, 19.5.5.3 NMAC, 1/1/2008]

19.5.5.4 DURATION:

Permanent.

[19.5.5.4 NMAC - Rp, 19.5.5.4 NMAC, 1/1/2008]

19.5.5.5 EFFECTIVE DATE:

January 1, 2008, unless a later date is cited at the end of a section.

[19.5.5.5 NMAC - Rp, 19.5.5.5 NMAC, 1/1/2008]

19.5.5.6 OBJECTIVE:

19.5.5 NMAC's objective is to establish standards and procedures for allowing commercial activities within the state parks system, which will provide essential, quality service to the public while preserving natural and cultural resources; provide economic development opportunities for the public; and provide revenue for the state of New Mexico.

[19.5.5.6 NMAC - Rp, 19.5.5.6 NMAC, 1/1/2008]

19.5.5.7 DEFINITIONS:

[RESERVED]

[19.5.5.7 NMAC - Rp, 19.5.5.7 NMAC, 1/1/2008]

[See 19.5.1.7 NMAC for definitions.]

19.5.5.8 SUBMITTAL OF PROPOSALS FOR CONCESSION CONTRACTS:

A. An interested person seeking to operate a concession within a park or a concessionaire within a park who wishes to expand services beyond the location the concession contract authorizes may send a proposal summary including a brief description of the concession operation with the services to be offered, the concession's proposed location within the park and a description of how the concession meets the criteria in Subsection A of 19.5.5.9 NMAC to the superintendent at the park where the concession is proposed.

B. The director shall evaluate the proposal summary, with the understanding that new or replacement contracts shall be awarded on a competitive basis and notify the interested person and any existing concessionaire that:

(1) the proposal summary indicates the concession does not fit the criteria as listed in Subsection A of 19.5.5.9 NMAC; or

(2) the division will issue a request for concession proposals and the interested person may submit a proposal.

C. The division may request concession proposals when the division determines that there is a concession opportunity within a park, when a concession contract with an existing concessionaire has been terminated or expires or when an existing concessionaire no longer wishes to provide the services. The division shall consider at least the following in deciding whether to issue a request for proposals for the concession:

(1) the park's location, remoteness and, if applicable, facility accommodations;

(2) the population of the area surrounding the park and similar services being offered within the area;

(3) whether other persons have expressed an interest in providing the concession;

(4) the proposed concession operation's size; and

(5) whether an existing concession can provide the new and expanded service, as provided by the existing contract.

D. An interested person responding to a request for concession proposals shall submit the original of a concession proposal consisting of a cover letter and proposal summary, bound with tab dividers indicating the separately numbered paragraphs corresponding to the following numbers and information requested to the concessions administrator at the division office in Santa Fe through the superintendent at the prospective park where the concession is to be located.

(1) Business plan for the proposed concession that identifies:

- (a)** the type of business;
- (b)** the park name and the business' specific location within the park;
- (c)** services to be offered;
- (d)** proposed concession fee;
- (e)** the percentage mark up of goods and services to be offered;
- (f)** a description of how the business will be operated;
- (g)** an assurance statement that the concessionaire will follow all federal, state and local statutes or ordinances and regulations or rules;
- (h)** a proposed maintenance schedule;
- (i)** a building and improvements schedule outlining any proposed capital improvements, including a plan for the financing of the capital improvements, if applicable;
- (j)** identification of all investors or potential investors; and
- (k)** a current financial statement.

(2) A market analysis that:

- (a)** defines the market area;
- (b)** identifies existing concessions and other similar ventures within the market area and an indication of their success;
- (c)** provides the results of any existing public demand survey; and

(d) estimates the economic impact to the park and neighboring community.

(3) Plan for advertising and promoting the proposed concession and the park.

(4) Environmental evaluation of the effects of operating the proposed business that addresses solid and liquid waste generation/removal; air quality; water quality; and compliance with federal, state and local environmental laws.

(5) A cultural property evaluation that includes the identification and significance of cultural properties in the project area and outlines the project impact on cultural properties and proposed impact mitigation, which follows appropriate state or federal cultural property legislation, guidelines and standards, and is coordinated with appropriate federal and state agencies, including the state historic preservation office.

(6) Statement of the proposed terms and conditions relating to revenue generated to the state and term of agreement.

(7) Identification of required permits from other agencies and authorization or pre-approval, as required.

(8) Description of past business or other experience that demonstrates the interested person's ability to operate the concession.

(9) Projected revenue statement.

E. The division shall not evaluate incomplete proposals. The division may request additional information from the interested person as necessary for the proposal's review and evaluation.

F. The division may allow persons submitting proposals the opportunity to discuss the proposals with the division and revise the proposals, but may accept proposals without these discussions. The division may permit interested persons to revise their proposals after submittal of proposals and prior to the division's acceptance for the purpose of obtaining best and final offers. The division may conduct negotiations with interested persons who submit proposals the division finds to be reasonably likely to be selected.

G. The division should notify the interested person of its decision to accept or reject the proposal. During the review process, the division reserves the right to seek comment on a proposal from the public, federal and state agencies and other appropriate entities. If the division requests comments, it may take additional time to review and evaluate a proposal and reach a decision to accept or reject the proposal.

H. When an existing concession contract expires, the division shall not give the existing concessionaire preference for selection. The division may consider performance and the amount of capital investment in the selection process.

[19.5.5.8 NMAC - Rp, 19.5.5.8 NMAC, 1/1/2008; A, 1/1/2013]

19.5.5.9 CRITERIA FOR GRANTING CONCESSION CONTRACTS:

The secretary shall consider at least the following in determining whether or not to grant a concession contract.

A. Concessions shall:

- (1)** provide a needed service or a service in which visitors have shown a substantial interest and the service is not adequately provided within the park or within the area;
- (2)** provide services to the general public rather than a particular individual or group;
- (3)** enhance, improve, protect and conserve park natural, historical and cultural resources;
- (4)** provide reasonable revenue to the state in exchange for the concession agreement;
- (5)** include facilities, if required, that are of sufficient size to support the proposed activity and that are harmonious in form, line, color and texture with the surrounding landscape; and
- (6)** be consistent with the park management and development plan in effect for the park in which the concession is to be located.

B. The division shall not grant new concession contracts unless the director and secretary have approved a park management and development plan that identifies the concession development.

C. Concessionaires shall:

- (1)** provide evidence to the division that the concessionaire possesses a sufficient level of experience and adequate financial resources to operate the concession in an efficient and professional manner; and
- (2)** not have past concession performance problems, such as repeated noncompliance with previous or current concession contracts or concession permits or 19.5.5 NMAC.

[19.5.5.9 NMAC - Rp, 19.5.5.9 NMAC, 1/1/2008; A, 1/1/2013]

19.5.5.10 CONCESSION CONTRACT PROVISIONS:

Following a proposal's acceptance, the division shall enter into negotiations with the successful offeror for a concession contract to operate the concession or with a concessionaire to amend an existing concession contract. To the extent 19.5.5.10 NMAC contradicts an existing concession contract in effect on May 15, 1997, 19.5.5.10 NMAC shall not apply to those contracts unless they are renegotiated or amended. The concession contract's provisions shall be consistent with the following requirements.

A. The concession contract's term shall be limited to the shortest period possible and the term shall not exceed five years unless justified by at least the following: the amount of a concessionaire's investment, the capital improvements made or to be made on the premises and the types of services offered. Under no circumstances shall the concession contract's term exceed 30 years. The division may terminate the concession contract for the concessionaire's noncompliance with the concession contract or 19.5.5 NMAC, or if the division's lease or other agreement with the landowner (e.g. United States department of the interior, bureau of reclamation) from which the division leases the land or reservoir terminates.

B. Each concession contract shall include a legal description or a detailed map that defines the area in which the concession will operate.

C. A concession contract is subject to limitations applicable federal and state agencies place on the division. The division reserves the right to install park facilities and utilities and to use the park for authorized purposes. The division reserves the right to close the park or the concessionaire's operations for reasonable law enforcement or safety purposes.

D. A concession contract shall require the concessionaire to pay the division a monthly concession fee, based on a flat fee or a percentage of the concessionaire's net receipts from sales and services. The concessionaire shall submit the concession fee and a monthly report detailing net receipts from sales and services on a division provided form to the concessions administrator at the division office in Santa Fe. The concession fee and monthly report shall be postmarked no later than 5:00 p.m. on the 25th day of the month after the reporting month, unless the 25th falls on a Saturday, Sunday or state-recognized holiday in which case the concession fee and monthly report shall be postmarked no later than 5:00 p.m. of the next business day. The concessionaire's failure to submit the concession fee and monthly report shall result in a penalty fee of 10 percent of the concession fee for the month that is late or \$50.00, whichever is greater.

E. The concession contract shall include a schedule for construction. If the schedule for construction includes improvements to publicly owned property, the division may authorize the concessionaire in writing to expend a percentage of amounts due the division in lieu of remitting them to the division for construction and alterations to publicly owned property to benefit the park. Improvements shall be consistent with the park management and development plan and the concessionaire shall obtain the division's, and if applicable the landowner's, prior approval for the improvements.

F. The concession contract shall require the concessionaire to have liability insurance naming the state of New Mexico, the department and the division, and if applicable the landowner from which the division leases the land or reservoir, as co-insured, and indemnifying the state of New Mexico, the department and the division, and if applicable the landowner from which the division leases the land or reservoir, for public liability, personal injury and property damage in amount equal to or greater than the liability limits set forth in NMSA 1978, Section 41-4-19, as it may be amended from time to time along with worker's compensation insurance, if applicable, prior to taking control of the concession premises.

G. The concession contract shall require the concessionaire, prior to taking control of the concession premises, to have the greater of:

(1) financial assurance satisfactory to the division conditioned upon the faithful performance of the concession contract in a minimum amount of 10 percent of the gross receipts from sales and services for the prior year; or

(2) financial assurance satisfactory to the division conditioned upon the faithful performance of the concession contract in a minimum amount of \$5,000 annually, by performance bond or irrevocable letter of credit; if the receipts are anticipated to be less than \$50,000, the division shall consider the concession operation's size and nature and may reduce the financial assurance amount.

H. The concessionaire shall properly maintain concession facilities and real property the concessionaire intends to use in operating the concession and capital improvements the concessionaire makes to the premises. The concessionaire shall complete maintenance with due diligence, in a commercially reasonable manner, so as to ensure visitors' health, safety and welfare. The concessionaire shall prepare an annual operation and maintenance plan, which requires the superintendent's approval. The superintendent shall submit a copy of the approved operation and maintenance plan to the concessions administrator. The approved operations and maintenance plan shall become part of the file the concessions administrator maintains.

I. The concessionaire shall comply with appropriate local, state and federal laws and shall comply with current applicable environmental regulations or rules and building code requirements, including those for accessibility, historical preservation and cultural properties protection. The concessionaire shall obtain applicable permits prior to beginning construction and provide copies to the superintendent.

J. Concessions offering food services shall comply with federal statutes and regulations, state statutes and rules and county or municipal ordinances regarding food sanitation.

K. A concession's advertising and signs within the park shall be subject to the director's prior written approval, and the appropriate federal agency or other state agency if applicable. Approvals shall become a part of the file the concessions

administrator maintains. Advertising through any media, including the internet, shall acknowledge that the concession premises are within the park in which the concession is located. Printed information using the logo of the division or a federal agency or other state agency requires prior written approval from the division or the federal agency or other state agency.

L. No concession contract shall be amended except by written instrument executed by the parties and approved by the New Mexico board of finance and applicable state or federal agencies.

M. Either the division or a concessionaire may request to amend the concession contract provisions or to renegotiate the contract at any time during the contract term. A concessionaire shall make such a request in writing to the superintendent. Within 30 calendar days of receipt of such a request, the division should either notify the concessionaire of its decision or schedule a meeting with the concessionaire to negotiate the contract. If the concessionaire seeks to amend the contract provisions or to renegotiate the contract in order to expand services beyond those authorized by the concession contract, the concessionaire shall comply with 19.5.5.8 NMAC. The concessionaire shall also submit a copy of a request for amendment to the concessions administrator.

N. Upon expiration or termination of the concession contract the following shall apply to disposal or removal of improvements.

(1) Upon expiration or termination of the concession contract, the incoming concessionaire shall purchase the permanent improvements that have been placed on the concession premises with the secretary's prior written approval. Sale of improvements and personal property shall be at appraised value and conducted as follows. The current concessionaire shall at concessionaire's own expense provide an appraisal conducted by a licensed independent appraiser six months prior to expiration of the contract. Any person submitting a concession proposal pursuant to 19.5.5.8 NMAC, for an existing concession where such appraised improvements exist, shall provide, with his or her proposal, proof of financing based on the appraisal. Upon award the incoming concessionaire may accept the appraisal or at the incoming concessionaire's expense conduct a second appraisal. If neither appraisal is acceptable to both the prior concessionaire and the incoming concessionaire a third appraiser acceptable to both may be sought. The third appraisal shall be binding on both the prior concessionaire and incoming concessionaire.

(2) If upon the expiration or termination of the concession contract there is not an incoming concessionaire, within 120 calendar days after expiration or termination the concessionaire shall remove the personal property and any permanent improvements the division has directed the concessionaire to remove from the concession premises at the concessionaire's own costs and the concessionaire shall restore the concession premises to a safe and natural condition after removing permanent improvements that the division has not authorized the concessionaire to leave in place.

O. A concessionaire shall establish and maintain a system for record keeping that uses generally accepted accounting principles. A concessionaire shall submit a year-end financial statement a New Mexico independent certified public accountant prepared that includes an income statement, balance sheet and statement of cash flows no later than 90 calendar days after the end of the concession fiscal year to the concessions administrator at the division office in Santa Fe. The level of certified public accountant assurance certification may be an audit, review or compilation of the financial statements. The division shall consider the amount of the concessionaire's gross receipts from sales and services and length of term of the concession contract when determining the level of certification required.

P. The department and, if applicable, the federal agency or other state agency shall have access to and may examine and audit a concessionaire's pertinent books, documents, papers and other records related to the concession business operated pursuant to the concession contract during the concession contract's term and for three years after the concession contract has expired. A concession shall make such records available at the concession operation or at the division's office in Santa Fe upon demand during usual business hours. Such records include financial, employer and equipment records.

Q. If the division operates the park in which the concession is located pursuant to a lease with a local, state or federal agency, the concession contract is subject to the lease agreement between the division and the agency and may require the appropriate agency's approval.

[19.5.5.10 NMAC - Rp, 19.5.5.10 NMAC, 1/1/2008; A, 1/1/2013]

19.5.5.11 CONCESSION CONTRACT APPROVAL BY NEW MEXICO BOARD OF FINANCE:

Concession contracts require the New Mexico board of finance's approval. After the parties have agreed on contract terms and signed the concession contract, the division shall submit the concession contract to the board of finance for approval.

[19.5.5.11 NMAC - Rp, 19.5.5.11 NMAC, 1/1/2008]

19.5.5.12 ASSIGNMENT AND SUBCONTRACTS OF CONCESSION CONTRACTS:

A. A concessionaire shall not transfer, sell, subcontract, encumber, assign, extend, renew, assign management responsibilities, exchange concession business or property or assign rights a concession contract grants, without the secretary's prior written approval. In addition, the above transactions may also require the approval of the New Mexico board of finance and the appropriate federal or state agency. Subcontracts are subject to the concession contract's terms and provisions.

B. The secretary may choose not to approve a transfer, sale, subcontract, encumbrance, assignment, extension, renewal, assignment of management responsibilities, exchange of concession business or property or an assignment of rights that a concession contract grants at the secretary's discretion or may place appropriate conditions on approval, including modification of the concession contract's terms and conditions as a condition of approval. The secretary shall not unreasonably withhold a sale or transfer or place unreasonable conditions or modifications on a concession contract as a condition of approval.

C. A concessionaire who seeks to subcontract services the concession contract authorizes shall submit a proposed subcontract to the superintendent who shall attach a forwarding letter with recommendations concerning the proposed subcontracting to the concessions administrator. The division may request additional information from the concessionaire as necessary for the subcontract's review and evaluation. The division shall notify the concessionaire after the proposed subcontract's receipt of its decision to approve or reject the subcontract. The concessionaire shall submit the subcontract for approval at least 90 calendar days prior to the subcontract's intended effective date to allow for approval by the board of finance and the appropriate federal or state agency, if required.

[19.5.5.12 NMAC - Rp, 19.5.5.12 NMAC, 1/1/2008]

19.5.5.13 REVIEW OF DECISIONS BY THE DEPARTMENT:

A. Requests for review or written responses.

(1) If the division proposes to terminate a concession contract for noncompliance with the contract terms, the division shall send a notice of proposed termination to the concessionaire identifying the areas of noncompliance. The notice shall provide that the concessionaire may request review by the secretary of the division's proposal to terminate by responding in writing to the proposal to terminate within 15 calendar days after the notice of the proposed termination's receipt. The notice shall provide that proposed termination shall be effective 30 calendar days after the concessionaire's receipt of the notice if the concessionaire does not request review. The division may include in a concession contract provisions that provide other reasons for termination and a review process for terminations based upon those reasons.

(2) If the division decides to terminate a concession contract immediately without notice due to a life endangering situation, the concessionaire may request review by the secretary or respond in writing within 15 calendar days after termination.

(3) If the division does not approve a concessionaire's request for transfer, sale, subcontract or any other transaction requiring approval as set forth in Subsection A of 19.5.5.12 NMAC, the concessionaire may request review by the secretary or respond in writing within 15 calendar days after receipt of notice that the division did not approve the transfer, sale, subcontract or other transaction.

B. Review by the secretary shall consist of an informal oral response by the concessionaire in which the concessionaire may present justification, facts, etc. that support continuing the concession's operation. If the concessionaire requests review of a decision, the department shall meet with the concessionaire within 15 calendar days following the request. The secretary may designate an employee of the department, but not of the division, to hear the concessionaire's response.

C. The secretary shall consider the concessionaire's written or oral response. The secretary shall send a final notice to the concessionaire either affirming or withdrawing the decision within 15 calendar days after the written response's receipt or within 15 calendar days after the oral response. The secretary's decision shall be final and is not subject to further review or appeal within the department.

[19.5.5.13 NMAC - Rp, 19.5.5.13 NMAC, 1/1/2008]

19.5.5.14 CONCESSION PERMITS:

A. A concession permit is valid for one year or less. For outfitters and guides, the concession permit's full one-year period is from April 1st until March 31st annually. All other concession permits are valid for 12 months from the date of issue, unless otherwise indicated on the concession permit. The concession permit activity is allowed only on the date or dates of activity approved in the permit.

B. A person applying for a concession permit shall obtain a concession permit application from the superintendent at the park where the applicant intends to operate. The application shall require the following information: a detailed description and location of the proposed activity, when the proposed activity will take place and the number of people involved; the applicant's information including name, address and telephone number; the applicant's New Mexico tax identification number and proof of insurance naming the state of New Mexico, the department and the division, and if applicable the landowner from which the division leases the land or reservoir, as additional insured; and a hold harmless agreement signed by the applicant. The person shall complete the application and return it to the superintendent along with the concession permit fee (see 19.5.6 NMAC). An outfitter or guide shall submit a concession permit application to the superintendent by March 1st if the applicant intends to hold a concession permit for the full permit term beginning April 1st.

C. The superintendent shall review the application and determine whether the service or activity meets the following criteria:

(1) does not significantly adversely impact an existing concessionaire's operation;

(2) provides a needed service to park visitors or a service in which the public has shown a substantial interest;

- (3)** enhances, improves or protects park resources or enjoyment thereof; and
- (4)** meets the concession permit definition in 19.5.1.7 NMAC.

D. The superintendent should contact the applicant within 15 calendar days if the application is incomplete. The superintendent may request additional information from the applicant as necessary for the application's review and evaluation. The regional manager shall submit applications the superintendent and regional manager approve to the concessions administrator for the division's processing and review and the secretary's final approval.

E. The concession permittee shall not maintain fixed assets within the park.

F. The concession permittee's business address shall be outside of the park.

G. Concession permittees, their employees and their clients shall pay applicable fees associated with a park's use. See 19.5.6 NMAC.

H. A concession permit is valid only within the park for which it is issued. However, a concession permittee may use a single concession permit for Heron Lake state park and El Vado Lake state park or Elephant Butte Lake state park and Caballo Lake state park and Percha Dam state park.

I. The division shall not issue a concession permit until the applicant has provided proof of insurance for public liability for personal injury and property damage, which shall at a minimum provide a \$1,000,000 limit for each occurrence and a \$2,000,000 general aggregate limit in which the state of New Mexico, department and division, and if applicable the landowner from which the division leases the land or reservoir, are named as co-insured.

J. Concession permittees, their employees and their clients are subject to appropriate state rules and federal regulations.

K. Concession permits are not transferable. A concession permittee shall not sell or transfer a concession permit for any reason. The department shall not refund a portion of the permit fee if the permittee ceases business during the permit year.

L. The director may limit the number and type of concession permits issued for a park in order to protect park resources. In determining whether to limit the number or type of concession permits, the director shall consider factors such as impact to the park infrastructure or impact to natural resources such as vegetation, erodible soils, etc. The director may prescribe special requirements and conditions for concession permits when it is in the division or state's best interests, including limitations on use of park resources, grounds and facilities; designation of a specific area within a park in which a concession permittee is allowed to operate; designation of specific days or hours during which a concession permittee is allowed to operate; limitations on prices the concession

permittee charges; requirements for submission of use and price data including number of customers and charges for services provided; and training requirements.

M. A permittee shall not violate a condition or restriction of the concession permit or 19.5.5 NMAC. The division may immediately cancel a concession permit if the permittee violates the concession permit or 19.5.5 NMAC.

[19.5.5.14 NMAC - Rp, 19.5.5.14 NMAC, 1/1/2008; A, 1/1/2013]

19.5.5.15 OUTFITTERS AND GUIDES:

A. An outfitter may apply for one concession permit and purchase guide cards for guides the outfitter employs who will be conducting guided fishing, boating or rafting trips. The outfitter shall provide the superintendent with a list of guides authorized to conduct guided trips for the outfitter and request the number of guide cards the outfitter wishes to purchase at the time the outfitter submits a concession permit application and fee. The fee for a guide card shall be the same as the fee for a concession permit. See 19.5.6 NMAC. During the concession permit's term, the outfitter shall have public liability insurance naming the state of New Mexico, the department and the division, and if applicable the landowner from which the division leases the land or reservoir, as principal beneficiaries and shall have, if applicable, workers' compensation insurance in force and effect with a carrier licensed to do business in New Mexico. The public liability insurance shall cover personal injury and property damage in amounts equal to or greater than the liability limits set forth in NMSA 1978, Section 41-4-19, as it may be amended from time to time.

B. The number of guides on the outfitter's guide list may exceed the number of guide cards the outfitter purchased. However, at no time shall the number of guides conducting commercial activity in a park exceed the number of guide cards the division issued to the outfitter. Only guides whose names appear on the guide list may conduct guided trips.

C. Each guide shall be able to present a guide card to a state park official at all times when the guide is conducting commercial activity in a park. A person shall not conduct commercial guiding activities without having a guide card in his or her possession. An outfitter or guide shall present the guide card to a state park official when requested to do so.

D. The outfitter is responsible for all guide cards the division issues to the permittee and for updating the guide list as necessary and providing the updated guide list to the superintendent.

E. Each outfitter shall submit an annual report that provides information concerning the outfitter's activities for the preceding year to the superintendent by April 15th. Annual reports shall include dates of guided trips, number of trips on each date and total number of clients on each date or a statement that no trips were made during the year.

F. An outfitter or guide shall not take more than three clients on a wade trip or more than three clients on a float boat at one time.

G. Outfitters and guides are subject to boat safety inspections at all times while boating.

H. Commercial boat use on the San Juan river, Navajo Lake state park is allowed only from the Texas hole and downstream.

I. Outfitters shall identify their boats with the outfitter's company name prominently and clearly printed on the vessel on both the port and starboard sides. Lettering shall be at least three inches in height.

J. Outfitters or guides shall display a concession permittee vehicle pass while conducting commercial activities within the boundaries of a state park. The concession permittee vehicle pass does not exempt the holder from paying park fees if the outfitter or guide is using the park or its facilities for personal use.

K. Outfitters shall submit trip ticket information using the internet-based trip ticket reporting system for commercial trips. The outfitter, or the outfitter's guide or agent, shall complete this form prior to the trip commencing. The guide conducting the trip shall carry a copy of the trip ticket for the duration of the commercial trip. A person shall not conduct commercial fishing or hunting activities within a state park without having a valid trip ticket in his or her possession.

[19.5.5.15 NMAC - Rp, 19.5.5.14 NMAC, 1/1/2008; A, 1/1/2013]

19.5.5.16 PROHIBITED COMMERCIAL ACTIVITIES:

The following commercial activities are prohibited within the state parks system:

A. commercial activity without written authorization pursuant to a concession contract, concession permit, film permit or special use permit;

B. services or activities not benefiting the visitor's experience;

C. services or activities that may threaten the public's health or safety;

D. services or activities that may threaten or damage park resources;

E. sale of goods or services outside of a specifically-defined location designated for a concession, unless authorized in a concession permit, special use permit or cooperative agreement; and

F. solicitation of unwanted business.

[19.5.5.16 NMAC - Rp, 19.5.5.14 NMAC, 1/1/2008; Repealed, 1/1/2013; 19.5.5.16 NMAC - Rn, 19.5.5.17 NMAC, 1/1/2013]

19.5.5.17 CONCESSION MANAGEMENT PROCEDURES:

The superintendent is the division's designated representative with concessionaires and concession permittees in day-to-day operations. Concessionaires shall direct questions concerning a concession contract or permit, including responsibilities pursuant to the contract or permit and interpretation of a contract's or permit's terms to the superintendent. Concessionaires or concession permittees shall direct questions, problems or complaints to the superintendent. The concessions administrator shall maintain historical, fiscal and administrative records at the division office in Santa Fe to ensure compliance with the concession contract. The concessions administrator shall notify the director of a concession contract's expiration at least nine months prior to the expiration date.

[19.5.5.17 NMAC - Rp, 19.5.5.15 NMAC, 1/1/2008; 19.5.5.17 NMAC - Rn, 19.5.5.18 NMAC, 1/1/2013]

19.5.5.18 INSPECTIONS:

A. Concessionaires are subject, with prior notice, to a state park official's inspection of the concession premises for public safety and health reasons and to monitor compliance with the concession contract and operation and maintenance plan. Concessionaires shall always maintain a safe and healthy environment for the public and the concessionaire's employees. If applicable, the landowner from which the division leases the land or reservoir may inspect the concession premises.

B. The department shall have the right to close down a concession operation at any time without prior notice in order to protect the safety and health of parks, visitors and staff.

C. Concession operations shall comply with applicable codes and rules or regulations of applicable authorities.

[19.5.5.18 NMAC - Rp, 19.5.5.16 NMAC, 1/1/2008; 19.5.5.18 NMAC - Rn & A, 19.5.5.19 NMAC, 1/1/2013]

19.5.5.19 PREFERENCES FOR BLIND PERSONS:

The department shall comply with NMSA 1978, Section 22-14-27 in assuring that it gives blind persons the commission for the blind licenses preference in the establishment and operation of vending machines with the state parks system when blind persons may properly and satisfactorily operate vending machines.

[19.5.5.19 NMAC - Rp, 19.5.17 NMAC, 1/1/2008; 19.5.5.19 NMAC - Rn, 19.5.5.20 NMAC, 1/1/2013]

PART 6: PARK FEES

19.5.6.1 ISSUING AGENCY:

19.5.7.8 ACTIVITIES REQUIRING A FILM PERMIT:

An individual or entity shall obtain a division-issued film permit for a film or photography project when the film or photography project:

- A.** involves commercial filming;
- B.** will or may impact a park's natural, cultural or recreational resources or disrupt or interfere with visitors' use and enjoyment;
- C.** uses actors, models, special effects, vehicles, sets or props;
- D.** requires entry into areas closed to visitors;
- E.** involves articles of commerce for the purpose of commercial advertising; or
- F.** requires closure of all or part of a park.

[19.5.7.8 NMAC - N, 1/1/2008]

19.5.7.9 ACTIVITIES NOT REQUIRING A FILM PERMIT:

- A.** An individual or entity does not need to obtain a film permit:
 - (1)** when using a camera or other audio or video recording device for the individual's or entity's own personal use in areas open to visitors;
 - (2)** for commercial photography, so long as the project does not require a film permit for any of the reasons stated in 19.5.7.8 NMAC; or
 - (3)** when filming, photographing or audio recording a news event that occurs in a park.
- B.** When a film permit is not required pursuant to Subsection A of 19.5.7.9 NMAC, a special use permit may be required pursuant to 19.5.2.40 NMAC, depending on the scope of the activity.

[19.5.7.9 NMAC - N, 1/1/2008; A, 1/1/2013; A, 6/25/2019]

19.5.7.10 APPLICATION FOR A FILM PERMIT:

- A.** An individual or entity shall apply for a film permit with the division's office in Santa Fe at least 30 calendar days before the film or photography project is to start by submitting a division-developed film permit application and the non-refundable film

permit application fee. The individual or entity may not begin the film or photography project until the division issues the film permit.

B. The film permit application shall include the following, as applicable:

(1) name, address, phone number, fax number and e-mail of the individual or entity applying for the film permit and the local contact;

(2) a brief description of the proposed film or photography project including:

(a) whether it is a feature film; still photography; television series, movie or pilot; documentary; video; television commercial; or other;

(b) title or product;

(c) the project's content;

(d) producer;

(e) director;

(f) production manager; and

(g) number in cast;

(3) the name of the park where the proposed film or photography project would occur;

(4) the dates and times the proposed film or photography project would occur in the park;

(5) description of how the individual or entity would use the park, the approximate number of people and vehicles involved, special accommodations needed and special effects planned, including any activity that involves fire;

(6) whether partial or full closures of the park will be needed;

(7) whether equipment or vehicles will be used off of established trails or outside of developed areas; and

(8) additional information the division requests to determine the proposed project's nature and potential impacts upon the park's resources and visitors.

[19.5.7.10 NMAC - N, 1/1/2008]

19.5.7.11 FILM PERMIT ISSUANCE OR DENIAL:

A. After receipt of the film permit application and the application fee, the division shall either:

(1) issue the film permit with such conditions as the division deems necessary, including those needed to protect park resources or to ensure visitors' safety and enjoyment, upon the applicant's submission of the following:

(a) payment of film permit fees pursuant to 19.5.7.12 NMAC, park fees pursuant to 19.5.7.13 NMAC, as well as costs for division staff or equipment needed for the project to occur (e.g. providing a snowplow and operator to remove snow from roads normally closed for the winter) and for park fees the division loses as a result of a park's full or partial closure;

(b) a damage deposit sufficient to cover the division's costs for restoration that public liability insurance does not cover and clean up; the division will calculate the damage deposit based on the size, number of hours and days, number of individuals involved and the project's overall complexity;

(c) certificate of worker's compensation; and

(d) certificate of insurance for public liability for personal injury and property damage in amounts greater than or equal to the liability limits set forth in Section 41-4-19 NMSA 1978, as it may be amended, which shows the department as an additional insured; or

(2) deny the film permit application in writing for any of the following reasons:

(a) the film permit application does not contain the information required by 19.5.7.10 NMAC.

(b) the proposed film or photography project is incompatible with park resources and visitor use and demand;

(c) the proposed film or photography project depicts activities that are incompatible with or damage the division's image;

(d) the proposed film or photography project will or may risk division employee and visitor safety or damage division property or the park's natural and cultural resources; or

(e) the park lacks sufficient staff to monitor the proposed film or photography project's activity.

B. If the division denies the film permit application because it is incomplete or for any reason listed in Paragraph (2) of Subsection A of 19.5.7.11 NMAC, the applicant

may provide additional information to complete the film permit application or revise the film permit application for the division's reconsideration.

[19.5.7.11 NMAC - N, 1/1/2008]

19.5.7.12 FILM PERMIT FEES:

- A. Non-refundable application fee: \$100.
- B. Rental fees.

Motion pictures/videos/television documentaries:	
1-30 people	\$250/location/day
31-60 people	\$500/location/day
over 60 people	\$1,000/location/day
Commercial still photography:	
1-10 people	\$100/location/day
11-30 people	\$150/location/day
over 30 people	\$250/location/day

- C. Monitoring fees: \$25 per ranger/per hour.
- D. Damage deposits.

Less than five people, no stock (animals), props or sets	\$500
Five to 10 people, no stock (animals)	\$1,000
Six to 24 people or up to five consecutive calendar days scheduled filming; complex sets; construction of sets at location	\$2,000 plus \$100 per animal/per day
25 or more people or more than five consecutive calendar days scheduled filming; complex sets; construction of sets at location	\$5,000 plus \$100 per animal/per day

E. The superintendent or director may waive or reduce the fees for individual student projects that are non-commercial.

[19.5.7.12 NMAC - N, 1/1/2008; A, 1/1/2013]

19.5.7.13 PAYMENT OF PARK FEES:

A. Persons associated with the filming project shall pay the generally applicable visitor fees including camping and electrical and sewage hook-up. Day use fees are not charged.

B. The permittee or those involved in the film or photography project shall not use annual permits to cover day use or camping fees for film or photography projects that require closure of all or part of a park.

[19.5.7.13 NMAC - N, 1/1/2008]

19.5.7.14 PARK MONITORS:

A. The division may assign staff to monitor all aspects of filming. The number of monitors the division assigns shall depend upon the number of individuals involved in the project. Generally, the division will assign the following number of monitors.

Less than 50 people	one monitor
51-89 people	two monitors
More than 90 people	three monitors

B. The division may assign fewer or no monitors, such as for a commercial still photography shoot that is using only one location and using no props or sets, or assign additional monitors due to the complexity of the shoot, locations used, special effects or fire danger or other hazards.

[19.5.7.14 NMAC - N, 1/1/2008]

19.5.7.15 ADDITIONAL REQUIREMENTS:

A. The permittee shall remove equipment and materials brought into a park for the film or photography project immediately upon the project's completion unless otherwise agreed upon in the film agreement.

B. The permittee shall, on a daily basis, remove and properly dispose of garbage, trash, food, supplies, temporary props and other debris associated with the film or photography project's activities from all filming location, staging, catering, parking and storage areas located within the park. The permittee shall arrange for private trash service and shall not use the park's trash disposal facilities or sewage dump stations.

C. If a film project uses animals, the film project shall comply with the American humane association guidelines for the safe use of animals in filmed media, have an American humane animal safety representative present on the set and qualify for the end credit disclaimer "*No Animals Were Harmed*"TM. For the most current edition of the American humane association guidelines for the safe use of animals in filmed media please go to www.americanhumane.org/film.

D. Helicopter or aircraft operations within park boundaries require specific approval in the film permit and helicopters and aircraft shall maintain at least a 500-foot altitude above known bird nesting sites, occupied campgrounds and other sensitive park locations that the division identifies.

E. If the film or photography project involves more than 10 people, the permittee shall provide or hire its own security services. The permittee shall provide one security officer for every 20 people involved.

F. The permittee shall include the division and the individual park where the actual filming occurred in the "credits" listing at the end of each motion picture, video, sound recording or television documentary.

[19.5.7.15 NMAC - N, 1/1/2008]

19.5.7.16 DAMAGE TO PARK RESOURCES OR STRUCTURES:

A. Unless modified in the film permit, the permittee shall not:

- (1)** use materials, adhesives or paints on geological, paleontological or archaeological or other scientific resources within a park;
- (2)** disturb trees, shrubs, forbs, grasses or other vegetative resources; or
- (3)** temporarily or permanently modify the interior or exterior of any park structure.

B. The permittee shall ensure that no material is discharged into waters of the state or storm drainage system.

C. The permittee shall repair, replace or compensate the division for damage to park resources or structures caused or allowed by the permittee's activities within seven days after the division has notified the permittee of the damage.

[19.5.7.16 NMAC - N, 1/1/2008]

CHAPTER 6: MINE SAFETY

PART 1: GENERAL PROVISIONS [RESERVED]

PART 2: EMERGENCY NOTIFICATION

19.6.2.1 ISSUING AGENCY:

New Mexico Mining Safety Board.

[19.6.2.1 NMAC - Rp, 5/3/2022]

19.6.2.2 SCOPE:

All persons subject to Section 69-5-1 et seq and Sections 69-8-1 et seq. NMSA 1978 and all mines as defined in Subsection D of 69-8-2 NMSA 1978.

[19.6.2.2 NMAC - Rp, 5/3/2022]

19.6.2.3 STATUTORY AUTHORITY:

Section 69-5-1 et seq and Sections 69-8-1 et seq., NMSA 1978.

[19.6.2.3 NMAC - Rp, 5/3/2022]

19.6.2.4 DURATION:

Permanent.

[19.6.2.4 NMAC - Rp, 5/3/2022]

19.6.2.5 EFFECTIVE DATE:

May 3 2022, unless a later date is cited at the end of a section.

[19.6.2.5 NMAC - Rp, 5/3/2022]

19.6.2.6 OBJECTIVE:

The objective of 19.6.2 NMAC is to establish regulations to implement the requirements for emergency notification plans, mine accident emergency operations center and accident notifications as directed in Chapter 69, Article 5 NMSA 1978.

[19.6.2.6 NMAC - Rp, 5/3/2022]

19.6.2.7 DEFINITIONS:

A. "Accident" means accident as defined in Subsection A of Section 69-8-2 NMSA 1978.

B. "Annual tonnage of coal" means the clean coal tons reported on the form 7000-2 for the previous calendar year.

C. "Board" means the state mining safety board.

D. "CFR" means Code of Federal Regulations.

E. "Days" means calendar days.

F. "Deputy state mine inspector" means a senior employee of the New Mexico bureau of mine safety who has knowledge and understanding of the 19.6 NMAC mine safety rules.

G. "Extended absence" means the state mine inspector cannot perform his/her duties due to illness, medical condition, is on family medical leave (FMLA) or other circumstances for a period of 30 days or longer.

H. "Hours worked" means hours reported to mine safety and health administration (MSHA) on the 7000-2 form or for an occupational safety and health administration (OSHA) regulated site on the OSHA form 300-A, for the previous calendar year.

I. "Inspector" means the state mine inspector

J. "Mine" means the mine as defined in Subsection E of Section 69-8-2 NMSA 1978.

K. "Operator" means operator as defined in Subsection G of Section 69-8-2 NMSA 1978.

L. "Service" means providing any document, paper or pleading to a person either personally or by certified mail, return receipt requested.

M. "Vacant" means there is not a state mine inspector because the incumbent state mine inspector has resigned, retired, been terminated or is deceased and a new state mine inspector has not been appointed or assumed the office.

[19.6.2.7 NMAC - Rp, 5/3/2022]

19.6.2.8 REQUIREMENT TO FILE EMERGENCY NOTIFICATION PLAN:

A. All operators of existing mines must prepare an emergency notification plan and submit the plan to the state mine inspector for approval. All operators of new or reopened mines shall submit an emergency notification plan to the state mine inspector prior to opening or reopening the mine.

B. Each emergency notification plan must contain procedures for notifying the state mine inspector within 30 minutes of an accident.

C. Any changes made by a mine operator to an approved emergency notification plan shall be submitted by the operator, within no less than seven working days from date of the change, to the state mine inspector for review and approval. The inspector shall no less than annually, from the date of approval of an operator's emergency notification plan, notify the operator to ensure that the plan on file with the state mine inspector is current.

D. The inspector shall retain a copy of each mine operator's approved emergency notification plan at the mine accident emergency operations center.

[19.6.2.8 NMAC - Rp, 5/3/2022]

19.6.2.9 ESTABLISHMENT OF MINE ACCIDENT EMERGENCY OPERATIONS CENTER:

A. The state mine inspector shall establish and maintain the mine accident emergency operations center as the primary state government communications for dealing with mine accidents that:

(1) provides emergency assistance requested by the mine operator or the mine safety and health administration for mine accidents or emergencies; and

(2) is accessible 24 hours a day, seven days a week, at a statewide telephone number established and designated by the inspector.

B. Upon receipt of an emergency call regarding an accident, the mine accident emergency operations center shall immediately notify the state mine inspector or their designee, who will ensure that the emergency notification plan for the appropriate mine is complied with.

C. In the event of an accident or recovery operation in or about a mine, the state mine inspector may, upon request of the mine operator or the mine safety and health administration, coordinate the assignment of mine rescue teams to assist with needed rescues.

[19.6.2.9 NMAC - Rp, 5/3/2022]

19.6.2.10 REQUIREMENTS TO NOTIFY THE MINE ACCIDENT EMERGENCY OPERATIONS CENTER:

A. Whenever an accident occurs in or about a mine or the machinery connected to a mine, the operator of the mine shall give notice 30 minutes of ascertaining the occurrence of the accident to the mine accident emergency operations center at the statewide telephone number established by the state mine inspector stating the facts and circumstances of the accident and providing the names and telephone numbers of at least two persons the operator designates who are knowledgeable about the accident or about the emergency operations at the mine.

B. Nothing in this section shall be construed to relieve the operator of the mine from any reporting or notification requirement under federal law. Notification of any other federal, state or local agency does not relieve the operator of its obligation to provide notification under Subsection A of 19.6.2.10 NMAC.

[19.6.2.10 NMAC - Rp, 5/3/2022]

19.6.2.11 FAILURE TO PROVIDE TIMELY NOTICE:

A. The state mine inspector shall impose a civil penalty of up to one hundred thousand dollars (\$100,000) on the operator of a mine if it is determined that the operator failed to give immediate notice as required in 19.6.2.10 NMAC. The inspector may waive imposition of the civil penalty at any time if the inspector finds that the failure to give immediate notice was caused by circumstances outside the control of the operator.

B. In determining the amount of the penalty, the inspector shall consider all relevant factors including whether notice was provided at all to the inspector or, if notice was provided, the lateness of such notice and the seriousness of the accident. The inspector shall utilize the penalty structure approved by the mining safety board.

- (1) Penalty points for coal mining operators based on coal production.

Annual tonnage of coal mine failing to provide timely notice	Penalty points
0 to 15,000	0
Over 15,000 to 30,000	1
Over 30,000 to 50,000	2
Over 50,000 to 100,000	3
Over 100,000 to 200,000	4
Over 200,000 to 300,000	5
Over 300,000 to 500,000	6
Over 500,000 to 800,000	7
Over 800,000 to 1.1 million	8
Over 1.1 million to 2 million	9
Over 2 million	10

- (2) Penalty points for coal mining operators based on the coal production in New Mexico of the controlling entity.

Annual tonnage of coal produced in New Mexico of controlling entity	Penalty points
0 to 100,000	0
Over 100,000 to 700,000	1
Over 700,000 to 1.5 million	2
Over 1.5 million to 5 million	3
Over 5 million to 10 million	4
Over 10 million	5

- (3) Penalty points for metal/non-metal operators based on hours worked.

Annual hours worked at a M/NM mine failing to provide timely notice	Penalty points
0 to 10,000	0
Over 10,000 to 20,000	1
Over 20,000 to 30,000	2
Over 30,000 to 60,000	3
Over 60,000 to 100,000	4
Over 100,000 to 200,000	5
Over 200,000 to 300,000	6
Over 300,000 to 500,000	7
Over 500,000 to 700,000	8
Over 700,000 to 1 million	9
Over 1 million	10

(4) Penalty points for metal/non-metal operators based on annual hours worked in New Mexico by controlling entity of a M/NM mine.

Annual hours worked in New Mexico by controlling entity of a M/NM mine	Penalty points
0 to 60,000	0
Over 60,000 to 400,000	1
Over 400,000 to 900,000	2
Over 900,000 to 3 million	3
Over 3 million to 6 million	4
Over 6 million	5

(5) Penalty points based on operator negligence.

Negligence		
Categories	Penalty points	
	Persons endangered	No endangerment
Low negligence - The operator failed to report the accident within the required 30 minutes but did report within one hour.	10	5
Moderate negligence - The operator failed to report the accident for more than one hour and less than four hours.	15	7
High negligence - The operator failed to report the accident for more four hours and less than 12 hours.	20	10

Reckless disregard - The operator failed to report the accident for greater than 12 hours, or the operator was previously fined for failure to report an accident within one year of the occurrence.	25	12
--	----	----

(6) Points based on type of accident.

Type of accident (as prescribed in Subsection A of 69-8-2 NMSA 1978. <i>There could be more than one category where the penalty points are accrued i.e., a fire at a mine that burns for more than 30 minutes and results in a fatality, would equal 40 penalty points.</i>	Penalty points	
	Persons endangered	No endangerment
Fatality	25	N/A
An injury at a mine that has a reasonable potential to cause death	20	N/A
An entrapment of an individual that has a reasonable potential to cause death	10	N/A
An unplanned inundation of a mine by a liquid or gas	10	5
An unplanned ignition or explosion of gas or dust	15	5
An unplanned mine fire not extinguished within 10 minutes of discovery in an underground mine or 30 minutes at a surface facility of an underground mine	15	7
An unplanned ignition or explosion of blasting agent or explosive	20	10
An unplanned roof fall at or above the anchorage zone in active workings where roof bolts are in use; or, an unplanned roof or rib fall in active workings that impairs ventilation or impedes passage.	10	N/A
A coal or rock outburst that causes withdrawal of miners or which disrupts regular mining activity for more than one hour.	15	N/A
An unstable condition at an impoundment, refuse pile, or culm bank which requires emergency action in order to prevent failure, or which causes individuals to evacuate an area; or,	10	N/A

failure of an impoundment, refuse pile, or culm bank.		
Damage to hoisting equipment in a shaft or slope which endangers an individual.	10	N/A
An event at a mine that causes death or bodily injury to an individual not at the mine at the time the event occurs	20	N/A

(7) Penalty amounts based on total points.

Penalty conversion table	
Penalty points	Penalty
0 to 15 points	\$5,000
16 to 25 points	\$10,000
26 to 35 points	\$20,000
36 to 45 points	\$50,000
46 to 55 points	\$65,000
56 to 65 points	\$85,000
66 to 70 points	\$95,000
71 or more points	\$100,000

C. If the state mine inspector determines that notice was not timely provided, the inspector shall within 90 days after notification of an accident or, if notice was not provided to the inspector, after ascertaining that an accident did occur at a mine, mail a notice of violation with a proposed penalty to the operator.

(1) The operator shall pay the penalty within 30 days after receipt of the notice.

(2) If the operator wishes to challenge the violation or request that the penalty be adjusted or waived, the operator must submit a written petition to the inspector within 20 days after receipt of the notice. Filing of a petition stays the requirement to pay the penalty. The operator may also submit written documentation in support of his petition and may request a meeting with the inspector to discuss the circumstances of the violation.

(3) Within 60 days after receipt of a petition, the inspector shall issue a final order upholding, amending or rescinding the notice of violation and penalty. The inspector may consider actions of the operator in response to the violation when considering amending the penalty. The inspector's final order shall include a statement that the operator may file an appeal of the final order with the board. Unless the inspector's final order is appealed to the board in accordance with Subsection E of 19.6.2 NMAC, if the final order contains a penalty, the operator shall pay the penalty within 30 days after receipt of the final order.

D. In determining whether to adjust or waive imposition of the penalty, the inspector may consider factors such as, but not limited to:

- (1) whether the mine was idled for any reason at the time of the accident;
- (2) whether the mine operator encountered communications problems that made it impossible to provide timely notice;
- (3) whether medical personnel determined that an injury was not considered life threatening immediately after an accident; if injury becomes life threatening, then notice requirements would be triggered when operator learns of a change in status from a medical authority;
- (4) whether a fatality of mine personnel that occurs after an accident is associated with a specific accident;
- (5) whether the need to provide emergency medical treatment or emergency rescue and recovery efforts reasonably precluded the mine operator from timely providing notice; and
- (6) whether the penalty creates an undue financial hardship on the mine.

E. The operator may appeal the inspector's final order to the board pursuant to these rules.

(1) The operator shall file a written notice of appeal of the inspector's final order within twenty (20) days after service of the final order. Unless a timely written appeal is made, the inspector's final order shall be final and not subject to judicial review. The filing of a timely notice of appeal shall stay enforcement of the inspector's final order until the board issues its written decision on the appeal.

(2) The operator shall file the written notice of appeal with the chair of the board or the chair's designee, and include the order number and the name of the operator.

(3) If a timely written notice of appeal is made, the board shall consider the appeal at a hearing held no sooner than 30 days and no more than 90 days after receipt of the written notice of appeal. The board shall notify the operator and the inspector of the date, time and place of the hearing at which the appeal will be considered.

(4) No board member with any financial interest affected or potentially affected by the outcome of an adjudicatory hearing may serve as a hearing officer in that hearing or otherwise participate in the hearing. All board members shall adhere with the Governmental Conduct Act.

(5) The board shall review the record compiled before the inspector and shall allow any party to submit arguments at the hearing.

(6) Within 20 days following the hearing the board shall render a written decision affirming, modifying or reversing the inspector's final order, and stating the reasons for that action. This decision shall be signed by the board chair or the chair's designee, and shall be served on both parties within 30 days after the decision is rendered and signed. A person who is adversely affected by a decision of the board pursuant to this section may appeal to the district court pursuant to the provisions of Section 39-3-1.1 NMSA 1978.

[19.6.2.11 NMAC - Rp, 5/3/2022]

19.6.2.12 INVESTIGATION TO PROVIDE TIMELY NOTICE OF AN ACCIDENT:

A. The state mine inspector shall lead the investigation if a timely notice of an accident was or was not provided and determine if a civil penalty should be imposed as required in 19.6.2.11 NMAC.

B. In the event the position of the state mine inspector is vacant, or during an extended absence of the state mine inspector, in order to provide a timely determination of compliance of emergency notification, a deputy state mine inspector shall lead the investigation and determine if a civil penalty should be imposed as outlined in

[19.6.4.4 NMAC - Rp, 5/3/2022]

19.6.4.5 EFFECTIVE DATE:

May 3, 2022, unless a later date is cited at the end of a section.

[19.6.4.5 NMAC - Rp, 5/3/2022]

19.6.4.6 OBJECTIVE:

The objective of 19.6.4 NMAC is to establish rules pertaining to the certification of coal mine officials. Officials include, but are not limited to, mine examiners, underground mine foreman and surface mine foreman. Officials must obtain certification from the state mine inspector as required in Section 69-14-1 NMSA 1978. NMSA Chapter 69, Article 14 also requires certain qualifications, that testing must be conducted, requires recertification and lists discipline procedures.

[19.6.4.6 NMAC - Rp, 5/3/2022]

19.6.4.7 DEFINITIONS:

A. "Board" means the state mining safety board.

B. "Certificate" means a document issued by the state mine inspector, or certifying agency from another state, allowing the holder to be employed as a coal mine official in the state of origin.

C. "CFR" means Code of Federal Regulations.

D. "Days" means calendar days.

E. "Deputy state mine inspector" means a senior employee of the New Mexico bureau of mine safety who has knowledge and understanding of the 19.6 NMAC mine safety rules.

F. "Extended absence" means the state mine inspector cannot perform their duties due to illness, medical condition, is on family medical leave (FMLA) or other circumstances for a period of 30 days or longer.

G. "Inspector" means the state mine inspector.

H. "Mining engineering graduate" means a person having a B.S. degree in mining or mineral engineering from an accredited college or university.

I. "Official" means coal mine official, including underground coal mine foreman, underground coal mine examiner, general underground coal mine foreman, or surface coal mine foreman Table in Subsection G of 19.6.4.9 NMAC.

J. "Revoke" means to permanently invalidate a certification.

K. "Service" means providing any document, paper or pleading to a person either personally or by certified mail, return receipt requested.

L. "Suspend" means to invalidate a certification for a specified period of time.

M. "Vacant" means there is not a state mine inspector because the incumbent state mine inspector has resigned, retired, been terminated or is deceased and a new state mine inspector has not been appointed or assumed the office.

[19.6.4.7 NMAC - Rp, 5/3/2022]

19.6.4.8 REQUIREMENT FOR CERTIFICATION BY STATE MINE INSPECTOR:

The state mine inspector shall certify, recertify or discipline persons to act as mine foremen and mine examiners. No mine operator shall employ any person as underground mine foreman, mine examiner or surface mine foreman unless that person has been certified by the state mine inspector for such position.

[19.6.4.8 NMAC - Rp, 5/3/2022]

19.6.4.9 METHODS AND REQUIREMENTS OF CERTIFICATION:

A. The state mine inspector may recognize the foreman's or mine examiner's certificate issued by another state and issue certificates accordingly when:

(1) the state mine inspector reviews the certification requirements of another state and determines that the requirements are equivalent or more stringent than New Mexico's, and are pertinent to the mining conditions found in New Mexico's coal mines; or

(2) an agreement of reciprocity is signed between the state mine inspector and the director of the certification agency from another state.

B. Persons with four or more years of experience in or about underground coal mines, and providing underground foreman certification from another state program or persons with four or more years of experience in or about surface coal mines, and providing surface foreman certification from another state program, meet the requirements for testing.

C. The state mine inspector shall hold written examinations, at times, dates and places to be given out at least sixty days in advance, to all persons desiring to secure mine foreman certificates or mine examiner certificates. Alternatively, at the discretion of the state mine inspector, such examinations may be administered by appointment.

D. The state mine inspector shall require that any applicant for examination to the position of mine foreman or mine examiner submit a completed application at least 30 days prior to the examination date and shall meet the experience requirements of this section as summarized in Table in Subsection G of 19.6.4.9 NMAC. The state mine inspector may require documentation from an applicant supporting their qualification and competency. Every person desiring to secure an underground coal mine foreman's certificate and not already in such position or not holding such certificate from another state shall first have regularly performed the duties of an underground coal mine examiner for six months and shall have at least four years of underground coal mine experience to participate in the underground coal mine foreman's examination. Every person desiring to secure a surface coal mine foreman's certificate, and not already holding such certificate from another state, shall have at least four years of surface coal mine experience to participate in the surface coal mine foreman's examination. A person who holds a certificate for surface coal mine foreman who wishes to take the underground coal mine foreman test must have a minimum of four years of experience in underground coal mine workings. A person who holds an underground coal mine foreman certificate and who wishes to participate in the surface coal mine foreman examination must have at least two years of surface coal mine experience. A person who holds an underground coal mine foreman certificate and who wishes to participate in the general underground coal mine foreman examination must have at least two years of surface mine experience or two years of surface experience at an underground mine. Every person desiring to secure an underground coal mine examiner's certificate

and not already in such position or not holding such certificate from another state recognized by the state mine inspector, shall have at least two years of underground coal mine experience to participate in the underground coal mine examiner's examination.

E. The state mine inspector may allow a mining engineering graduate or a person with other credentials that attest to advanced competency including applicable experience at non-coal mines to participate in the foreman's or examiner's examination if the candidate meets at least one-half of the experience requirements and all other prerequisites listed in Subsections B and D of this section prior to taking the examination.

F. All candidates for certification or recertification must achieve a cumulative score of eighty percent or higher on the corresponding written exam.

G. Table in Subsection G of 19.6.4.9 NMAC is incorporated into this section as a guide to the prerequisites and areas of responsibility for coal mine officials.

Certification Title	Qualification	Authorization
Underground Coal Mine Examiner	Two-years underground mining experience, or One-year underground mining experience and advanced competency, or Equivalent experience and certification from another state	Underground areas at underground coal mines.
Underground Coal Mine Foreman	Four-years underground mining experience with six months examiner experience, or Two-years underground mining experience with six months examiner experience and advanced competency, or Equivalent experience and certification from another state.	Underground areas at underground coal mines.
General Underground Coal Mine Foreman	Current NM certification as underground coal mine foreman and two-years of experience at surface areas of underground coal mines.	Underground areas at underground coal mines. Surface areas at underground coal mines.
Surface Coal Mine Foreman	Four-years surface mining experience, or Two-years surface mining experience and advanced competency, or	Surface coal mines Surface areas at underground coal mines

	Equivalent experience and certification from another state, or Current NM certification as underground coal mine foreman and two-years of experience at surface coal mines or surface areas of underground coal mines	
--	---	--

[19.6.4.9 NMAC - Rp, 5/3/2022]

19.6.4.10 FEES FOR CERTIFICATION AND EXAMINATION:

The state mine inspector, after consultation with the mining safety board, may impose fees for examination and certification of officials. Current fees will be posted with examination notice given out as required in Subsection C of 19.6.4.9 NMAC.

[19.6.4.10 NMAC - Rp, 5/3/2022]

19.6.4.11 CERTIFICATION PERIOD AND RECERTIFICATION PROCESS:

A. Certification of officials shall be issued for a period of five years. All officials certified by the state mine inspector prior to June 15, 2007 shall have their certification period extended five years. Each official is required to have retraining as a qualified/certified person on an annual basis from the mine in which they are employed as required in 30 CFR 75.160, 30 CFR 75.161 and 30 CFR 77.107 and 30 CFR 77.107-1. Failure to have re-training as a qualified/certified person on an annual basis may result in suspension of certification. Should a certified official fail to meet the annual training requirement for any reason; or should a certified official be absent from mine employment in New Mexico for a period of one year or more and upon resumption of mine employment in New Mexico; the certified official may appeal to the state mine inspector for reinstatement of active certification. The state mine inspector may require testing, remedial training, interviews, evidence of applicable training, or other criteria to assure competency before re-activating said certification.

B. Each official has the responsibility to notify the state mine inspector of any change in address or change in mine employment within 30 days of such change. Failure to provide current contact information may result in suspension of certification.

C. Certified persons may apply for recertification within 12 months prior to the end of the certification period. Every certification shall automatically expire on the last day of the certification period if the official has not recertified prior to that date. The state mine inspector may extend the certification period for an official for no more than six months to facilitate the recertification process. Recertification will require the applicant to submit an application and appropriate documentation as required by the state mine inspector.

D. Recertification may be done by taking an exam every five years, prior to certification expiration, or an organization may submit an alternative plan for the inspector's approval as follows:

(1) officials taking an exam every five years will follow the same process required for original certification; or

(2) an organization may submit an alternative plan, for the state mine inspector's approval; the alternative plan may be carried out over the five year period; the alternative plan shall include the subjects to be covered, the minimum amount of time per subject, the methods of instruction, and the methods of participant evaluation during process completion; following completion, the applicant shall provide the state mine inspector with verification that all training for the recertification period is current; and

(3) applicants shall submit an application, pay the applicable fee, and provide all appropriate documentation as required by the state mine inspector, before receiving recertification.

E. Underground coalmine examiners may fulfill the recertification by successfully completing the examination for underground coal mine foreman certification or recertification.

[19.6.4.11 NMAC - Rp, 5/3/2022]

19.6.4.12 REFUSAL TO CERTIFY OR RECERTIFY AND SUSPENSION OR REVOCATION OF CERTIFICATION:

A. The inspector may refuse to certify or recertify or may suspend or revoke any certification held or applied for under 19.6.4 NMAC upon grounds that the applicant or certified person:

(1) gave false or forged evidence to the inspector to obtain certification;

(2) is grossly negligent or incompetent in duties as a certified person;

(3) has failed to maintain certification;

(4) has violated or aided or abetted any person in a violation of the Federal Mine Safety and Health Act of 1977 or the New Mexico mine safety laws; or

(5) has been disciplined by a state mine regulatory authority in another state that certifies mine personnel.

B. If the inspector contemplates taking any of the actions described in Subsection A of 19.6.4.12 NMAC for any of the reasons provided in that subsection, the inspector

shall provide written notice to the applicant or certified person. The notice shall include a statement that the inspector has sufficient evidence that, if not rebutted or explained, will justify the inspector in taking the contemplated action, that indicates the general nature of the evidence and that provides the applicant or certified person at least 20 days to submit written evidence to rebut or explain the allegations.

C. If, after the response period ends, the state mine inspector takes any action of a type specified in Subsection B of 19.6.4.12 NMAC, the inspector shall serve upon the applicant or certified person a written notice of the action containing a statement that the applicant or certified person may file a petition for review with the mining safety board pursuant to the Mining Safety Act 69-8-1 NMSA 1978.

[19.6.4.12 NMAC - Rp, 5/3/2022]

19.6.4.13 APPEAL TO MINING SAFETY BOARD OF CERTIFICATION ACTIONS BY INSPECTOR TO MINING SAFETY BOARD:

An appeal of an inspector's action may be made to the board by the person affected by the action.

A. A person affected by the inspector's action shall file a written petition for review of the action within twenty days after service of the action. Unless a timely written appeal for review is made, the action of the inspector shall be final and not subject to judicial review.

B. The petition shall be filed in writing with the chair of the board or the chair's designee, and include the action number and the name of the appellant.

C. If a timely petition is made, the board shall consider the petition at a hearing held no sooner than thirty days and no more than ninety days after receipt of the written petition. The board shall notify the petitioner and the inspector of the date, time and place of the hearing at which the petition will be considered.

D. No board member with any financial interest affected or potentially affected by the outcome of an adjudicatory proceeding may serve as a hearing officer in that proceeding or otherwise participate in the hearing. All board members shall adhere with the Governmental Conduct Act.

E. The board shall review the record compiled before the inspector and shall allow any party to submit arguments at the hearing.

F. Within 20 days following the hearing the board shall render a written decision affirming, modifying or reversing the action of the inspector, and stating reasons for that action. The decision shall be signed by the board chair or the chair's designee, and shall be served on both parties within 30 days after the decision is rendered and signed. A person who is adversely affected by a decision of the board pursuant to this section

may appeal to the district court pursuant to the provisions of Section 39-3-1.1 NMSA 1978.

[19.6.4.13 NMAC - Rp, 5/3/2022]

19.6.4.14 CERTIFICATION OF COAL MINE OFFICIALS IN THE EVENT THE POSITION OF STATE MINE INSPECTOR IS VACANT:

In the event the position of the state mine inspector is vacant, or during an extended absence of the state mine inspector, in order to provide timely certification and prevent a lapse between recertification of coal mine officials, the certification and recertification, or refusal to certify or recertify and suspension or revocation of certification, as required in 19.6.4.9 NMAC and 19.6.4.12 NMAC shall be completed by a deputy state mine inspector.

[19.6.4.14 NMAC - N, 5/3/2022]

PART 5: NEW MEXICO MINE SAFETY CODE FOR ALL MINES INCLUDING OPEN-CUT AND OPEN-PIT

19.6.5.1 ISSUING AGENCY:

Mining Safety Board.

[06/01/08; 19.6.5.1 NMAC - Rn, 19.7.20.1 NMAC, 9/30/08]

19.6.5.2 SCOPE:

All owners, employees and visitors of mining operations in New Mexico, utilizing hoist to access underground mining operations.

[06/01/08; 19.6.5.2 NMAC - Rn, 19.7.20.2 NMAC, 9/30/08]

19.6.5.3 STATUTORY AUTHORITY:

Section 69-8-4 NMSA 1978.

[06/01/08; 19.6.5.3 NMAC - Rn, 19.7.20.3 NMAC, 9/30/08]

19.6.5.4 DURATION:

Permanent.

[06/01/08; 19.6.5.4 NMAC - Rn, 19.7.20.4 NMAC, 9/30/08]

19.6.5.5 EFFECTIVE DATE:

06/01/08, unless a later date is cited at the end of a section.

[06/01/08; 19.6.5.5 NMAC - Rn, 19.7.20.5 NMAC, 9/30/08]

19.6.5.6 OBJECTIVE:

Maintain a system of uniform hoist signals for all underground mines.

[06/01/08; 19.6.5.6 NMAC - Rn, 19.7.20.6 NMAC, 9/30/08]

19.6.5.7 DEFINITIONS:

[RESERVED]

19.6.5.8 SIGNALS FOR ALL MINES:

The following signal code shall be used in all mines:

A. 1 bell, stop immediately if in motion; 1-2-1 bells, hoist muck; 2-1-2 bells, release cage, skip or bucket; 2 bells, lower; 3-1 bells, hoist persons; 3-2 bells, lower persons, if bells rung slowly move slowly; 7 bells, danger signal, followed by station signal calls cage to that station. This signal takes precedence over all other except an accepted blasted signal.

B. Additional mine specific signals may be used if approved by the state mine inspector.

C. Automated hoists shall be exempt from compliance with the bell signal requirements.

[06/01/08; 19.6.5.8 NMAC - Rn, 19.7.20.8 NMAC, 9/30/08]

CHAPTER 7: MINING - GENERAL PROVISIONS

PART 1: NEW MEXICO MINE REGISTRATION AND REPORTING

19.7.1.1 ISSUING AGENCY:

Energy, Minerals and Natural Resources Department.

[10-14-95; 19.7.1.1 NMAC - Rn, 19 NMAC 7.1.1, 5/30/2003]

19.7.1.2 SCOPE:

These rules and regulations shall apply to all mining operations.

[10-14-95; 19.7.1.2 NMAC - Rn, 19 NMAC 7.1.2, 5/30/2003]

19.7.1.3 STATUTORY AUTHORITY:

The secretary of the department is generally authorized to make and adopt rules and regulations necessary to carry out the duties of the department at Section 9-1-5E NMSA 1978. The general duties and purposes of the mining and minerals division are set out at Section 9-5A-4D NMSA 1978 as amended 1987. The secretary is specially authorized to promulgate and enforce rules and regulations concerning operator compliance, Section 69-5-16; penalties for violations by operator, Section 69-6-1; registration of coal mines, Section 69-11-1; annual coal mine information to be furnished, Section 69-11-2; furnishing of requested coal mine data, Section 69-11-3; non-coal mine registration, notice of suspension and reactivation, Section 69-26-1; non-coal mine production information and confidentiality, Section 69-26-2; and non-coal mine request for information, Section 69-26-3 NMSA 1978, as amended 1989.

[8-21-89, 10-14-95; 19.7.1.3 NMAC - Rn, 19 NMAC 7.1.3, 5/30/2003]

19.7.1.4 DURATION:

Permanent.

[10-14-95; 19.7.1.4 NMAC - Rn, 19 NMAC 7.1.4, 5/30/2003]

19.7.1.5 EFFECTIVE DATE:

October 14, 1995. [unless a later date is cited at the end of a section.]

[8-21-89, 10-14-95; 19.7.1.5 NMAC - Rn, 19 NMAC 7.1.5, 5/30/2003]

19.7.1.6 OBJECTIVE:

The following rules have been adopted by the secretary of the New Mexico energy, minerals and natural resources department to provide for the registration, annual reporting and change in registration of mines, mills and smelters.

[8-21-29, 10-14-95; 19.7.1.6 NMAC - Rn, 19 NMAC 7.1.6, 5/30/2003]

19.7.1.7 DEFINITIONS:

A. "Construction" means any on-site activity directly related to the development of a new mine site not yet registered, including shaft sinking, tunneling, excavation, building of surface facilities and road building.

B. "Department" means the energy, minerals and natural resources department.

C. "Director" means the director of the mining and minerals division.

D. "Division" means the mining and minerals division of the New Mexico energy, minerals and natural resources department.

E. "Mine" means and includes all surface and underground operations to win coal, metals and other mineral substances from their deposits (exclusive of natural gas or petroleum), all tunnel operations, all caisson operations, all mills, ore houses and treatment plants, all quarries, pits, open-cut workings, strippings, placer mines, sand, gravel and similar banks.

F. "Mineral" means coal, metallic or non-metallic ores or any naturally occurring rock substances that are mined or recovered on or under the surface of the earth.

G. "Operations" means any construction or excavation activities, including smelting and leaching activities, for the purpose of winning minerals from their deposits, as well as for mine reclamation and dismantling of surface facilities.

H. "Operator" means and includes owner, operator, lessee, manager, superintendent or agent, receiver or trustee and political subdivisions and instrumentalities of the state of New Mexico operating any mine.

I. "Permanent suspension" means the cessation for an indefinite period of mining operations which are not expected to resume at a future time. Mines where suspension is permanent do not have to report annually once the closed mine is effectively safeguarded.

J. "Secretary" means the secretary of the energy, minerals and natural resources department.

K. "Suspension" means the cessation of mine operations and may be either permanent or temporary in nature.

L. "Temporary suspension" means the cessation for a limited time of mining operations which are expected to resume at a future time. Mines under temporary suspension are considered active for registration and reporting purposes.

[8-21-89, 10-14-95; 19.7.1.7 NMAC - Rn, 19 NMAC 7.1.7, 5/30/2003]

19.7.1.8 REGISTRATION OF MINES REQUIRED:

Before the start of any operations an operator shall register such mine with the division on a mine registration form (form 1). The registration shall be accompanied by an accurate plat or standard USGS topographic map sheet showing the location of the proposed mine with reference to the nearest lines of a governmental section if the mine has been surveyed. The registration must include a precise written description of the

mine location with specific directions describing how to reach the mine site, including road names and numbers, obvious landmarks and mileage distances. Location of mines on surveyed lands shall be indicated by county, township, range and quarter-quarter section. Information to be included with such registration shall be the name of the mine, post office address, name of the operator or person in charge, the character of operation such as the mineral produced or sought and the method of access including shaft, adit, leach field, surface mine or other method, the name of the appropriate USGS topographic sheet and the name of the mineral and surface estate owners.

[8-21-89, 10-14-95; 19.7.1.8 NMAC - Rn, 19 NMAC 7.1.8, 5/30/2003]

19.7.1.9 REPORTING REQUIREMENTS:

Before April 30 of every year, each mining, milling or smelting operation shall furnish to the division a report, on the appropriate form designated for that type of operation and commodity (forms 3-11) provided by the division, information including the following: name, address and phone number of operator, parent company, contractor, subcontractor and owner of property; name, location, and type of operation; type of commodity mined; method of extraction; production and sales quantities and values; unit value; production by mineral estate ownership classification; MSHA I.D. number; stockpiles; physical plant improvements and value; employment and payroll statistics; explosives information; quality and analysis statistics; ownership changes during year; mineral recovery statistics; net mine water production; mill capacity rates; and mill and refinery shipments. Submittal of the annual operator report on forms 3-11 satisfies the annual registration requirements under Section 69-26-1 NMSA 1978.

[8-21-89, 10-14-95; 19.7.1.9 NMAC - Rn, 19 NMAC 7.1.9, 5/30/2003]

19.7.1.10 CHANGE OF REGISTRATION:

The operator shall fill out a change of registration form (form 2) at least 10 days prior to any change in ownership, operator name, mine name, address or operational status, or at least 10 days prior to a reactivation of operations that have been in suspension. change of registration forms are available from the director.

[8-21-89, 10-14-95; 19.7.1.10 NMAC - Rn, 19 NMAC 7.1. 10, 5/30/2003]

19.7.1.11 SUSPENSION OF OPERATIONS:

The operator shall fill out a notice of intention to suspend operations form (form 12) prior to any temporary or permanent suspension of operations. Notice of intention to suspend operations forms are available from the director.

[10-14-95; 19.7.1. 11 NMAC - Rn, 19 NMAC 7.1.11, 5/30/2003]

19.7.1.12 ENFORCEMENT:

Written notice of non-compliance may be issued by the director and sent by certified mail to the operator. The operator shall submit a written response to the director within ten (10) days of certified mail receipt of the notice of non-compliance. Failure to respond in writing to the director within the ten (10) day limit may result in referral by the director to the appropriate district attorney for prosecution. Each individual failure to comply with a rule or regulation, or failure to respond to a written notice will constitute a separate and unlawful act that may be prosecuted. Each unlawful act is subject to a fine of not more than two hundred dollars (\$200.00) or imprisonment or both.

[8-21-89; 19.7.1.12 NMAC - Rn, 19 NMAC 7.1.12, 5/30/2003]

PART 2: NEW MEXICO MINE SAFEGUARDING

19.7.2.1 ISSUING AGENCY:

Energy, Minerals and Natural Resources Department.

[10-14-95; 19.7.2.1 NMAC - Rn, 19 NMAC 7.2.1, 5/30/2003]

19.7.2.2 SCOPE:

These rules and regulations shall apply to all mining operations with surface mine openings including shafts, adits, highwalls and auger boreholes where operations are suspended permanently (abandoned), or for a temporary period of time when an office with a responsible person is not maintained at the site, exclusive of coal mining operations regulated under Section 69-25A-1 to Section 69-25A-35 NMSA 1978 and all mines subject to the New Mexico Mining Act, Section 69-36-1 to Section 69-36-20 NMSA 1978 (1993 Repl. Pamp.).

[8-21-89, 10-14-95; 19.7.2.2 NMAC - Rn, 19 NMAC 7.2.2, 5/30/2003]

19.7.2.3 STATUTORY AUTHORITY:

The secretary of the department is generally authorized to make and adopt rules and regulations necessary to carry out the duties of the department at Section 9-1-5E NMSA 1978. The general duties and purposes of the mining and minerals division are set out at Section 9-5A-4D NMSA 1978 as amended 1987. The secretary is specially authorized to promulgate and enforce rules and regulations concerning the safeguarding of abandoned mines, Sections 69-12-4 and 69-27-3 NMSA 1978.

[8-21-89; 19.7.2.3 NMAC - Rn, 19 NMAC 7.2.3, 5/30/2003]

19.7.2.4 DURATION:

Permanent.

[10-14-95; 19.7.2.4 NMAC - Rn, 19 NMAC 7.2.4, 5/30/2003]

19.7.2.5 EFFECTIVE DATE:

October 14, 1995 [unless a later date is cited at the end of a section]

[8-21-89, 10-14-95; 19.7.2.5 NMAC - Rn, 19 NMAC 7.2.5, 5/30/2003]

19.7.2.6 OBJECTIVE:

The following rules and regulations have been adopted by the secretary of the New Mexico energy, minerals and natural resources department to provide for the protection of public health and safety through the effective safeguarding of mine surface openings when mining operations have been suspended permanently, or have been suspended for a temporary period of time and an office with a responsible person is not maintained at the site.

[8-21-89; 19.7.2.6 NMAC - Rn, 19 NMAC 7.2.6, 5/30/2003]

19.7.2.7 DEFINITIONS:

A. "Abandoned" means the permanent cessation of mining operations or the temporary cessation when no office with a responsible person is maintained at the site at all times and access to the mine is controlled.

B. "Director" means the director of the mining and minerals division.

C. "Division" means the mining and minerals division of the New Mexico energy, minerals and natural resources department.

D. "Effectively close or fence off" means to prevent entrance or access to any mine surface openings associated with any permanently suspended mining operation or any mine surface openings associated with any temporarily suspended mining operations when an office with a responsible person is not maintained at the site to all unauthorized persons, by sealing such opening with earthen or other suitable materials in a manner approved by the director, or by the construction of a fence around such openings of materials and in a manner approved by the director, and includes the monitoring and maintenance of such closures or fences as necessary to ensure that entrance and access is prevented.

E. "Immediate danger" means a condition that could reasonably be expected to have a high probability of resulting in physical harm to public health and safety.

F. "Mine" means and includes all surface and underground operations to win coal, metals and other mineral substances from their deposits (exclusive of natural gas or petroleum), all tunnel operations, all caisson operations, all mills, ore houses and

treatment plants, all quarries, pits, open cut workings, strippings, placer mines, sand, gravel and similar banks.

G. "Mineral" means coal, metallic or non-metallic ores or any naturally occurring rock substances that are mined or recovered on or under the surface of the earth.

H. "Operations" means any construction or excavation activities for the purpose of winning minerals from their deposits or any activities undertaken in the proper safeguarding of mine surface openings.

I. "Operator" means and includes owner, operator, lessee, manager, superintendent or agent, receiver or trustee and political subdivisions and instrumentalities of the state of New Mexico operating any mine.

J. "Permanent suspension" means the cessation for an indefinite period of mining operations which are not expected to resume at a future time. Mines where suspension is permanent are considered abandoned mines for purposes of safeguarding.

K. "Secretary" means the secretary of the energy, minerals and natural resources department.

L. "Suspension" means the cessation of mine operations and may be either permanent or temporary in nature.

M. "Temporary suspension" means the cessation for a limited time of mining operations which are expected to resume at a future time. Mines under temporary suspension which have no office with a responsible person at the site at all times and where access to the mine is not controlled are considered abandoned for purposes of safeguarding.

N. "Unauthorized persons" means anyone other than the mine owner or operator, the state mine inspector or the director and their agents or any other state or federal regulatory agency authorized to inspect the mine site.

[8-21-89, 10-14-95; 19.7.2.7 NMAC - Rn, 19 NMAC 7.2.7, 5/30/2003]

19.7.2.8 SAFEGUARDING OF MINE OPENINGS:

A. Prior to either the permanent suspension of mining operations or the temporary suspension of mining operations when an office with a responsible person present at all times is not maintained at the site, on which are located mine surface openings including shafts, adits, highwalls or auger boreholes, the operator shall notify the division on a notice of intention to suspend operations form (form 12). The operator shall include on the form a plan to effectively close or fence off all surface mine openings on the property. The plan shall include a description of the materials and procedures which are proposed to be used, and the construction and location of

trespass warnings and appropriate danger notices. The plan shall include a timetable for completion of the proposed safeguarding procedures. Commencing of safeguarding operations shall take place immediately when the operator suspends mining operations. If the safeguarding plan is not approved by the director, the operator will receive notice of disapproval and may resubmit an amended plan for approval.

B. Acceptable methods to effectively close or fence off surface mining openings include the sealing of such openings with earthen materials, concrete, masonry or other materials approved by the director. Fences must be constructed of durable materials and in a manner approved by the director and must be reasonably capable of preventing entrance or access to the mine surface openings by unauthorized persons. Closures and fences shall be monitored and maintained throughout the period or permanent (abandonment) or temporary suspension. Trespass warnings and danger notices must be constructed of durable materials and be visible by persons who may approach the safeguarded openings. Notices and warning shall be printed in both the English and Spanish languages and be legible from a distance of fifty feet. Signs shall contain the mine name, name of operator and the assigned U.S. mine safety and health administration (MSHA) registration number in addition to the trespass warning and danger notice.

[8-21-89, 10-14-95; 19.7.2.8 NMAC - Rn, 19 NMAC 7.2.8, 5/30/2003]

19.7.2.9 DECISION OF DIRECTOR:

If the director disapproved the proposed plan because it does not effectively safeguard surface mine openings, the director shall indicate in writing the reason therefor. The operator shall then submit an amended safeguarding plan.

[8-21-89, 10-14-95; 19.7.2.9 NMAC - Rn, 19 NMAC 7.2.9, 5/30/2003]

19.7.2.10 RIGHT OF ENTRY:

The director and his agents shall have right of entry to mines for the purpose of determining compliance with the rules and regulations for the effective safeguarding of surface mine openings.

[8-21-89; 19.7.2.10 NMAC - Rn, 19 NMAC 7.2.10, 5/30/2003]

19.7.2.11 INSPECTION AND ENFORCEMENT:

If upon inspection or the investigation of a complaint by any affected party the director determines that there is a violation of statutes, rules and regulations applicable to safeguarding mine surface openings and a party responsible for such safeguarding can be identified, the director shall issue a written notice of non-compliance by certified mail to the responsible party. The responsible party shall submit a written response to the director within ten days of certified mail receipt of the notice of non-compliance. Failure

to respond in writing to the director within the ten day limit shall be deemed a failure to properly safeguard and may result in referral by the director to the appropriate district attorney for prosecution. Each individual failure to comply with a statute, rule or regulation, or failure to respond to a written notice will constitute a separate and unlawful act that may be prosecuted. Each unlawful act is subject to a fine of not more than two hundred dollars (\$200) or by imprisonment for three months in the county jail or by such fine and imprisonment. Additionally, the director may bring a direct action in district court seeking to compel compliance with the statute requiring safeguarding of mine surface openings.

[8-21-89; 19.7.2.11 NMAC - Rn, 19 NMAC 7.2.11, 5/30/2003]

19.7.2.12 EMERGENCY ACTION:

If the director determines that an immediate danger to public health and safety exists due to the lack of or ineffective safeguarding of mine surface openings, the director may take appropriate actions necessary to effectively safeguard the mine and recover reasonable costs for such work from the owner of the mine through negotiation or, if necessary, by the filing of a civil suit in district court in the county where the emergency action occurred. The director's actions are discretionary and are subject to financial limitations.

[8-21-89; 19.7.2.12 NMAC - Rn, 19 NMAC 7.2.12, 5/30/2003]

19.7.2.13 INTERPRETATIVE MEMORANDA:

The director from time to time may issue interpretative memoranda which discuss the type of safeguarding techniques that may be used. Varying types of mine openings, the likelihood of reopening the mine, the proximity to populated areas and other relevant factors will be considered. These memoranda are intended to be guidelines and are not to be considered applicable to any specific mine closure.

[8-21-89; 19.7.2.13 NMAC - Rn, 19 NMAC 7.2.13, 5/30/2003]

PART 3: CONSOLIDATION OF MINING PROPERTIES

19.7.3.1 ISSUING AGENCY:

New Mexico Energy, Minerals and Natural Resources Department.

[10-31-96; Recompiled 12/31/01]

19.7.3.2 SCOPE:

Section 8 applies to all persons seeking to consolidate mining properties pursuant to Section 69-9-1 through 69-9-10 NMSA 1978. Section 9 applies to Kerr-McGee

Corporaion and the owners of all tracts of land in Section 19, Township 14 North, Range 9 West, N.M.P.M., McKinley County, New Mexico.

[10-31-96; Recompiled 12/31/01]

19.7.3.3 STATUTORY AUTHORITY:

Section 69-9-4 NMSA 1978.

[10-31-96; Recompiled 12/31/01]

19.7.3.4 DURATION:

Permanent.

[10-31-96; Recompiled 12/31/01]

19.7.3.5 EFFECTIVE DATE:

October 31, 1996, unless a different date is cited at the end of a section or paragraph.

[10-31-96; Recompiled 12/31/01]

[Compiler's note: The words *or paragraph*, above, are no longer applicable. Later dates are now cited only at the end of sections, in the history notes appearing in brackets.]

19.7.3.6 OBJECTIVE:

The objective of Section 8 of Chapter 7 Part 3 is to establish regulations addressing the application for consolidation of mining properties. The objective of Section 9 of Chapter 7 Part 3 is to outline the conditions and requirements of a consolidation of mining properties in Section 19, Township 14 North, Range 9 West, N.M.P.M., McKinley county, New Mexico, and to order said consolidation.

[10-31-96; Recompiled 12/31/01]

19.7.3.7 DEFINITIONS:

[RESERVED]

[10-31-96; Recompiled 12/31/01]

19.7.3.8 APPLICATION FOR CONSOLIDATION:

Order adopting rules and regulations for administration of Chapter 33, New Mexico Laws of 1967 concerning consolidation of mining properties. Pursuant to Section 4 of

Chapter 33, New Mexico Laws of 1967, the state geologist of New Mexico hereby adopts the following rules and regulations:

A. Filing of application; form. Any person, firm or corporation desiring to make application to the state geologist for consolidation of mining properties under Chapter 33, New Mexico Laws of 1967, shall file three copies of the application, and three copies of all exhibits thereto, with the state geologist, state land office building, Santa Fe, New Mexico. The application shall contain all of the information required by law and may contain any additional information that the applicant deems pertinent.

B. Notice of hearing. Upon receiving an application for consolidation, the state geologist shall set a time and place for hearing and immediately shall notify the applicant thereof. The applicant shall give notice of hearing in accordance with law and shall file with the state geologist an affidavit of publication, and an affidavit of mailing showing in detail the date and manner of giving notice and to whom notice was given. All return receipts from certified mailing of notice of hearing shall be filed with the state geologist.

C. Record: The state geologist shall cause an official record to be made of all proceedings in connection with the application, including a transcript of all testimony and exhibits offered with respect thereto.

D. Order: notice of order: At the conclusion of the hearing on an application, the applicant shall submit a proposed order to the state geologist. Any order of the state geologist shall be made part of the official record, and notice of the order shall be given to the applicant or to the applicant's attorney of record.

E. Procedure upon petition for approval by district court. Upon the filing of a petition in district court for approval of an order of consolidation pursuant to Section 9, Chapter 33, New Mexico Laws of 1967, the state geologist shall certify the record made before him and transmit it to the clerk of the district court.

F. Payment of costs. The expenses of any proceeding on an application for consolidation, including the cost of giving notice of hearing and the fees and expenses in connection with preparation of the record, shall be borne and paid directly by the applicant.

G. DONE at Santa Fe, New Mexico, this 6th day of July, 1967.

[07-06-67, 10-31-96; Recompiled 12/31/01]

19.7.3.9 KERR-MCGEE ORDER OF CONSOLIDATION:

In the matter of the application of Kerr-McGee Corporation for consolidation of all small tracts or interests in Section 19, Township 14 North, Range 9 West, New Mexico

Principal Meridian, McKinley County, New Mexico, pursuant to Chapter 33, New Mexico Laws of 1967.

A. This cause came on for hearing at 9:30 a.m. on March 19, 1968, at Santa Fe, New Mexico, upon the Application of Kerr-McGee Corporation (hereinafter called "Kerr-McGee") praying for an order of consolidation of all small tracts or interests in Section 19, Township 14 North, Range 9 West, N.M.P.M., McKinley County, New Mexico (hereinafter called "Section 19"), pursuant to Chapter 33 of the New Mexico Laws of 1967.

B. After an examination of the files in said cause, the undersigned finds said Application was filed with the undersigned on the 19th day of December, 1967, and that on said date the undersigned set the Application for hearing at 9:30 a.m. on March 19, 1968, at Santa Fe, New Mexico; that due notice of this hearing has been given by publication in the Gallup Independent on February 7, 14, 21, and 28, 1968, as shown by affidavit of publication filed herein, and by mailing, as shown by affidavit of mailing filed herein.

C. The undersigned, having heard and considered the evidence concerning the said application, and being fully advised in the premises, Finds:

(1) The state geologist of the state of New Mexico (appointed pursuant to Section 65-3-1 New Mexico Statutes Annotated, 1953 Compilation) has jurisdiction of this cause and the subject matter thereof.

(2) Kerr-McGee is a corporation organized under the laws of the state of Delaware, qualified to do business in the state of New Mexico, and is presently engaged in the exploration, development, mining and processing of ore, and the production and marketing of uranium in concentrate, in the Ambrosia lake area of McKinley county, New Mexico.

(3) Section 19, containing 645.50 acres, is comprised wholly of contiguous small tracts, each containing two acres or less. Such small tracts were created by the subdivision of Section 19 by a plat of subdivision filed with the county clerk of McKinley county, New Mexico, on November 30, 1933, as Reception No. 2162, and recorded in Book 6 of Miscellaneous Records, page 586.

(4) Kerr-McGee has made extensive, diligent and good faith effort to identify and locate every person owning an interest in each small tract in Section 19, and, as to each owner who has been identified and located, has made extensive, diligent and good faith effort to purchase, lease or otherwise acquire mining rights covering such interest for the purpose of exploring, developing, mining, producing, marketing and/or processing uranium and uranium ore. As a result of these efforts, Kerr-McGee presently holds mining rights covering in excess of 85 percent of the entire mineral estate in Section 19. Despite the efforts that have been made by Kerr-McGee to identify, locate and acquire mining rights from all owners of interest in Section 19, there remain owners

of small tracts or interests therein whose addresses are unknown, or from whom Kerr-McGee has not acquired mining rights.

(5) The lack of exploration and development on Section 19 up to the present time makes it impossible to ascertain that all or any portion of Section 19, or any small tract therein, definitely contains uranium ore on all sides of Section 19, and other geologic evidence, indicates that each small tract in Section 19 probably will be productive of uranium ore. The entirety of Section 19 therefore composes an appropriate unit for consolidation.

(6) Kerr-McGee proposes to conduct exploratory operations on, and to develop, mine, produce, save, remove, market or process uranium ore and other associated minerals mined therewith from Section 19. The proposed operations are feasible and in accord with good industry practices.

(7) The exploration and mineral development of the small tracts in Section 19 on a separate and individual basis would be uneconomic and impractical, and the consolidation of Section 19 is needed to induce mineral exploration and potential mineral development in order to avoid waste of natural resources and to protect the correlative rights of all owners in Section 19.

(8) Due to the diversity of ownership of the small tracts in Section 19, and due to the inability of Kerr-McGee to obtain mining rights from some of the owners, and in order to insure the development of Section 19, all small tracts or interests in said Section 19 should be ordered consolidated in the manner provided by Chapter 33, New Mexico Laws of 1967.

D. It is therefore ordered: that all small tracts or interests therein in Section 19, Township 14 North, Range 9 West, N.M.P.M., McKinley county, New Mexico, be, and the same hereby are consolidated pursuant to Chapter 33 of the New Mexico Laws of 1967. As to each small tract or interest therein in Section 19 on which Kerr-McGee does not otherwise hold the mining rights, a mining lease thereon is hereby effectuated to Kerr-McGee under which it shall have the exclusive right and privilege, by such means and methods as it shall determine, to explore for, develop, mine (by underground, strip, solution or any other mining methods), extract, store, remove, own, market or process, for its benefit and use, any uranium ore and other associated minerals mined therewith, in, upon or under the said tracts or interests therein, and to use so much of the surface of each of said small tracts and of the water and appurtenant water rights as it shall deem necessary or desirable for such operations, including, but not by way of limitation, the right to construct and maintain buildings, roads, openings, ditches, stockpiles, dumps and other improvements and facilities thereon, being hereby given all such rights and privileges as may be necessary or convenient in connection with the foregoing, as well as the right to mine and remove ore from any of said tracts in Section 19 through or by means of shafts, haulage ways or by other facilities located in or on other tracts in said Section 19 or other lands, upon the following terms and conditions:;

(1) The mining leases effectuated by this order shall be effective as of February 7, 1968, and shall remain in force for a term of ten years from this date, and as long thereafter as such ores are being produced, saved and removed from, or any mining operations are being conducted on, said Section 19. Mine development or other operations preparatory to mining, as well as actual mining and operations for or in connection therewith, shall be considered to be mining operations. Mining operations shall be deemed continuous so long as such operations are not suspended for any period of longer than ninety consecutive days and despite interruptions in such operations of whatever duration (whether or not in excess of ninety days) caused by force majeure or by reason of lack of a satisfactory market for ores from Section 19.

(2) If mining operations are being conducted anywhere on Section 19, it shall be considered such operations are being conducted on each small tract within Section 19.

(3) Uranium ore and other associated minerals mined therewith, produced, saved and removed from any part of Section 19, (hereinafter called "area production"), shall be considered as though production of ore is had from each small tract within Section 19, and there shall be allocated to each such tract as its share of the area production that part of the area production which bears the same ratio to the whole amount of such area production, as the area that the number of surface acres in said small tract bears to the total number of surface acres of 645.50 acres in Section 19.

(4) Kerr-McGee shall pay a bonus of \$10.00 to each owner with respect to the mining leases effectuated by this order upon small tracts or interests therein as to which Kerr-McGee does not otherwise hold the mining rights. This bonus shall be due and payable when this order becomes final and effective.

(5) Royalty:

(a) Kerr-McGee shall pay a royalty of ten per cent of the "mine value" of the ore produced, saved and removed from Section 19. The "mine value" shall be the value of such ore at the mouth of the mine in the crude state in which produced, saved and removed, and shall be determined as follows:

(i) The mine value of any such ore taken by Kerr-McGee for processing in its uranium processing mill shall be an amount determined and computed by: (a) multiplying the number of pounds of U_3O_8 contained in said ore by the "unadjusted value per pound" thereof as determined, on the basis of the "grade" (i.e., percentage of contained U_3O_8) of said ore, in accordance with the following schedule:

Grade of Ore	Unadjusted Value per
Uranium (U_3O_8) Content	Pound of Contained U_3O_8
0.10%	\$1.50

0.11%	\$1.70
0.12%	\$1.90
0.13%	\$2.10
0.14%	\$2.30
0.15%	\$2.50
0.16%	\$2.70
0.17%	\$2.90
0.18%	\$3.10
0.19%	\$3.30
0.20% or more	\$3.50

and (b) then adjusting the result so obtained by multiplying such result by a fraction having a denominator of \$8.00 (which is the price being received for U₃O₈ in concentrate produced at Kerr-McGee's mill and sold to the AEC during calendar year 1966) and a numerator equal to the weighted average price per pound received for all sales of U₃O₈ in concentrate made by Kerr-McGee during the twelve month period ending with the month in which said ore was processed and (c) finally then deducting from the adjusted result so obtained the cost of transporting said ore from the mine to Kerr-McGee's mill and also any sales, severance or similar taxes levied or assessed on or in connection with said ore.

(ii) The mine value of any such ore sold by Kerr-McGee before processing shall be the actual net proceeds received by Kerr-McGee from the sale of said ore, less the cost of transporting said ore from mine to point of its sale and less any sales, severance or similar taxes levied or assessed on or in connection with said ore or the sale thereof.

(b) The above specified royalty on ore produced, saved and removed by Kerr-McGee from Section 19 shall be due and payable on or before the 25th day of the month following the calendar quarter-year in which such ore is processed or sold by Kerr-McGee, and said royalty, computed and determined as above provided, shall constitute the sole and total royalty for such ore, and all components and constituents thereof.

(c) Bonus and royalty payments to the owners of each small tract or interest therein may be made by mailing or delivering Kerr-McGee's check to such owners at their respective addresses as shown on the records of Kerr-McGee, or if address is

unknown, such payments shall be made to the state treasurer of the state of New Mexico, at Santa Fe, New Mexico, for the use and benefit of such owner, as provided by Section 10, Chapter 33 of the New Mexico Laws of 1967.

(d) Royalty payments shall be conclusively deemed to have been truly and correctly determined, computed and made if no exception and claim for adjustment is made, with respect to the particular payment involved, by written notice given within twenty-four months from the end of the calendar quarter-year for which such payment was made.

(6) Kerr-McGee's operations shall be carried on in a miner-like fashion and in compliance with applicable laws and governmental regulations. Kerr-McGee shall have the right to deposit waste material and overburden on Section 19, and to mine and remove such pillars as it may elect from any underground working area it may wish to abandon; however, Kerr-McGee shall not be liable for subsidence or other damages done to the surface of the lands comprising Section 19, or the improvements thereon.

(7) Uranium ore and other associated minerals mined therewith, produced from Section 19, will not be commingled with ores mined and produced from other lands, unless procedures, consistent with good practice in the industry, are adopted and employed to determine the quantity and grade of the ore produced from Section 19.

(8) Kerr-McGee shall have the right at any time during the continuance hereof, or within one year after the termination hereof as herein provided, to remove any machinery, fixtures, buildings or other structures or property placed on Section 19.

(9) Kerr-McGee may, if it so elects, pay any mortgage, taxes or other liens or encumbrances on Section 19, and in the event of such payment, Kerr-McGee shall be entitled to reimburse itself therefor out of any royalties becoming due to any tract owner, and shall also be fully subrogated to the rights of the holders of the liens and encumbrances so paid; provided, however, Kerr-McGee shall not be entitled to seek reimbursement for taxes paid by it for the year 1968 or any prior years.

(10) In case of any dispute or question regarding ownership of Section 19, or any royalties payable hereunder, Kerr-McGee shall be entitled to withhold, without interest, payment of royalties until such dispute or question has been properly settled and appropriate proof (such as original or certified copy of the settlement instrument) has been submitted to Kerr-McGee.

(11) If the estate of any tract owner is assigned (and the privilege of assigning in whole or in part is expressly allowed), the covenants hereof shall extend to their heirs, devisees, executors, administrators, successors and assigns, but no change or division of ownership or in the royalties payable hereunder shall be binding upon Kerr-McGee for any purpose until fifteen days after Kerr-McGee shall have been furnished with the original recorded instrument or instruments, or duly certified copies thereof, properly

evidencing the same and neither shall any such change or division or ownership ever operate to enlarge the obligations or diminish the rights of Kerr-McGee.

(12) Failure of Kerr-McGee to perform any of its obligations hereunder, or to comply with any requirements hereof, shall not automatically terminate the leases effectuated by this order, it being agreed that such leases shall never be terminated, forfeited or canceled for any failure of performance on the part of Kerr-McGee unless and until it shall have first been finally determined by a court of record of competent jurisdiction that Kerr-McGee is in default hereunder, and it shall have failed to commence action within sixty days after the said judicial determination thereof to cure such default and thereafter to prosecute such action to completion. Provided, that nothing herein shall ever serve to create any commitment or obligation on the part of Kerr-McGee, express or implied, to explore, develop, mine or conduct any other operations on Section 19.

(13) Kerr-McGee shall not be liable or deemed in default for failure to perform any of its obligations during periods in which performance is prevented by any cause reasonably beyond Kerr-McGee's control (any such cause being for purposes hereof "force majeure").

(14) While the leases effectuated by this order remain in force, Kerr-McGee will pay the property taxes on any improvements placed on Section 19 by it, but otherwise each tract owner shall pay all property taxes on their separate tracts, except as provided in paragraph 9.4.9 [now paragraph (9) of subsection D of 19.7.3.9 NMAC] of this order.

(15) The provisions hereof shall inure to the benefit of, and be binding upon, the successors, assigns, personal representative and heirs of the various tract owners and of Kerr-McGee.

E. Entered at Santa Fe, New Mexico, this 15th day of April, 1968.

CHAPTER 8: COAL MINING

PART 1: GENERAL PROVISIONS

19.8.1.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[11-29-97; 19.8.1.1 NMAC - Rn, 19 NMAC 8.2.1.100, 9-29-2000]

19.8.1.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[11-29-97; 19.8.1.2 NMAC - Rn, 19 NMAC 8.2.1.101, 9-29-2000]

19.8.1.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[11-29-97; 19.8.1.3 NMAC - Rn, 19 NMAC 8.2.1.102, 9-29-2000]

19.8.1.4 DURATION:

Permanent.

[11-29-97; 19.8.1.4 NMAC - Rn, 19 NMAC 8.2.1.104, 9-29-2000]

19.8.1.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[11-29-97; 19.8.1.5 NMAC - Rn & A, 19 NMAC 8.2.1.105, 9-29-2000]

19.8.1.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[11-29-97; 19.8.1.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.1.7 DEFINITIONS:

A. Definitions beginning with the letter "A"

(1) ACCELERATED EROSION - means washing away or blowing away of overburden, spoil, soil or topdressing material in excess of normal erosion resulting from changes in the vegetative cover or ground conditions.

(2) ACID DRAINAGE - means water with a pH of less than 6.0 and in which total acidity exceeds total alkalinity, discharged from an active, inactive or abandoned surface coal mining and reclamation operations or from an area affected by surface coal mining and reclamation operations.

(3) ACID FORMING MATERIALS - means earth materials that contain sulfide minerals or other materials which, if exposed to air, water, or weathering processes, form acids that may create acid drainage.

(4) ACID-TEST RATIO - means the relation of quick assets to current liabilities.

(5) ACT - is the state of New Mexico Surface Mining Act (Sections 69-25A-1 et. seq. NMSA 1978)

(6) ADJACENT AREA - means land located outside the affected area, permit area, or mine plan area, depending on the context in which adjacent area is used where air, surface or ground water, fish, wildlife, vegetation or other resources protected by the act may be adversely impacted by surface coal mining and reclamation operations.

(7) AFFECTED AREA - means, with respect to surface coal mining activities, any land or water upon or in which those activities are conducted or located. With respect to underground coal mining activities, affected area means:

(a) any water or surface land upon or in which those activities are conducted or located; and

(b) land or water which is located above underground mine workings.

(8) AGRICULTURAL ACTIVITIES - means with respect to alluvial valley floors, the use of any tract of land for the production of animal or vegetable life, where the use is enhanced or facilitated by subirrigation or flood irrigation associated with alluvial valley floors. These uses include, but are not limited to, the pasturing, grazing, or watering of livestock, and the cropping, cultivation, or harvesting of plants whose production is aided by the availability of water from subirrigation or flood irrigation. These uses do not include agricultural practices which do not benefit from the availability of water from subirrigation or flood irrigation.

(9) AGRICULTURAL USE - means the use of any tract of land for the production of animal or vegetable life. The uses include, but are not limited to, the pasturing, grazing, and watering of livestock, and the cropping, cultivation and harvesting of plants.

(10) ALLUVIAL VALLEY FLOORS - means the unconsolidated stream-laid deposits holding streams with water availability sufficient for subirrigation or flood irrigation agricultural activities but does not include upland areas which are generally overlain by a thin veneer of colluvial deposits composed chiefly of debris from sheet erosion, deposits formed by unconcentrated runoff or slope wash, together with talus, or other mass movement accumulations, and windblown deposits. Ephemeral or dry streams incapable of supporting agricultural activities by natural means, and without artificial means, are not alluvial valley floors.

(11) ANTHRACITE - means coal classified as anthracite in ASTM standard D 388-77. Coal classifications are published by the American society of testing and materials under the title, "standard specification for classification of coals by rank", ASTM D 388-77, on pages 220 through 224. Table 1 which classifies the coals by rank is presented on page 223. This publication is hereby incorporated by reference as it exists on the date of adoption of 19.8 NMAC Parts 1-35.

(12) APPLICANT - means any person seeking a permit from the director to conduct surface coal mining and reclamation operations or coal exploration pursuant to the act and 19.8 NMAC Parts 1-35.

(13) APPLICATION - means the documents and other information filed with the director under the act and 19.8 NMAC Parts 1-35 for the issuance of exploration approval or a permit as the context requires.

(14) APPLICANT/VIOLATOR SYSTEM or AVS - means the computer system maintained by OSM to identify ownership or control links involving permit applicants, permittees, and persons cited in violation notices.

(15) APPROXIMATE ORIGINAL CONTOUR - means the surface configuration achieved by backfilling and grading of the mined areas so that the reclaimed area, including any terracing or access roads, closely resembles the general surface configuration of the land prior to mining and blends into and complements the drainage pattern of the surrounding terrain with all spoil piles and refuse piles eliminated. Highwalls will also be eliminated except as provided for in Paragraph (2) of Subsection A of 19.8.20.2055 NMAC. Permanent water impoundments may be permitted where the director has determined that they comply with 19.8.20.2017, 2024, and 2075 NMAC.

(16) AQUIFER - means a zone, stratum or group of strata that can store and transmit water in sufficient quantities for a specific use.

(17) ARID AND SEMIARID AREA - includes, in the context of alluvial valley floors, all coal fields in the state.

(18) ASPECTION - means the variability of blooming, fruiting, foliation and defoliation of vegetation during the various seasons of the year.

(19) AUGER MINING - means a method of mining coal at a cliff or highwall by drilling holes into an exposed coal seam from the highwall and transporting the coal along an auger bit to the surface.

(20) AUGMENTED SEEDING - means seeding in excess of the normal husbandry practices approved in the director's *coal mine reclamation program vegetation standards*, or reseeding with fertilization or irrigation, or reseeding in response to unsuccessful revegetation in terms of adequate germination or establishment or permanence.

B. Definitions beginning with the letter "B"

(1) **BASAL AREA** - means that portion of the sampling unit covered by the cross-sectional area of the individual plants taken at or near the ground surface for the herb and shrub strata and at "breast height" (1.3 m; 4.5 ft.) for tree species.

(2) **BEST TECHNOLOGY CURRENTLY AVAILABLE** - means equipment, devices, systems, methods or techniques which will:

(a) prevent to the extent possible, additional contributions of suspended solids to stream flow or runoff outside the permit area, but in no event result in contributions of suspended solids in excess of requirements set by applicable state or federal laws; and

(b) minimize, to the extent possible, disturbances and adverse impacts on fish, wildlife and related environmental values, and achieve enhancement of these resources where practicable; the term includes equipment, devices, systems, methods or techniques which are currently available anywhere as determined by the director, even if they are not in routine use; the term includes, but is not limited to, construction practices, siting requirements, vegetative selection and planting requirements, animal stocking requirements, scheduling of activities and design of sedimentation ponds in accordance with 19.8.20 NMAC; within the constraints of the permanent program, the director shall have the discretion to determine the best technology currently available on a case-by-case basis as authorized by the act and 19.8 NMAC Parts 1-35.

(3) **BLASTER** - means a person directly responsible for the use of explosives in surface coal mining operations who is certified pursuant to these regulations.

C. Definitions beginning with the letter "C"

(1) **CEMETERY** - means a place dedicated to, used and maintained for the interment of the human dead.

(2) **COAL** - means combustible carbonaceous rock, classified as anthracite, bituminous, subbituminous, or lignite by ASTM standard D 388-77, referred to and incorporated by reference in the definition of anthracite.

(3) **COAL EXPLORATION** - means the field gathering of:

(a) surface or subsurface geologic, physical, or chemical data by mapping, trenching, drilling, geophysical or other techniques necessary to determine the quality and quantity of overburden and coal of an area; or

(b) environmental data to establish the conditions of an area before beginning surface coal mining and reclamation operations under the requirements of the act and 19.8 NMAC Parts 1-35.

(4) COAL MINING OPERATION - means the business of developing, producing, preparing or loading bituminous coal, subbituminous coal, anthracite, or lignite, or of reclaiming the areas upon which such activities occur.

(5) COAL PREPARATION PLANT - means a facility where coal is subjected to chemical or physical processing or cleaning, concentrating, or other processing or preparation. It includes facilities associated with coal preparation activities, including, but not limited to the following: loading facilities; storage and stockpile facilities; sheds; shops, and other buildings; water-treatment and water-storage facilities; settling basins and impoundments; and coal processing and other waste disposal areas.

(6) COAL PROCESSING PLANT - means (a) a collection of facilities where run-of-the-mine coal is subjected to chemical or physical processing and separated from its impurities. The processing plant may consist of, but need not be limited to, the following facilities: loading facilities; storage and stockpile facilities; sheds, shops and other buildings; water treatment and water storage facilities; settling basins and impoundments; coal processing and other waste disposal areas; roads, railroads and other transport facilities; or (b) underground development waste.

(7) COAL PROCESSING WASTE - means (a) earth materials which are combustible, physically unstable, or acid-forming or toxic-forming, which are wasted or otherwise separated from product coal, and slurried or otherwise transported from coal preparation plants, after physical or chemical processing, cleaning, or concentrating of coal, (b) underground development waste.

(8) COAL PROCESSING WASTE BANK - means a surface deposit of coal processing waste that does not impound water, slurry or other liquid or semi-liquid material.

(9) COLLATERAL BOND - means an indemnity agreement in a sum certain executed by the permittee as principal which is supported by the deposit with the state of New Mexico of one or more of the following:

(a) a cash account, which shall be the deposit of cash in one or more federally-insured or equivalently protected accounts, payable only to the state of New Mexico upon demand, or the deposit of cash directly with the director;

(b) negotiable bonds of the United States, a state, or a municipality, endorsed to the order of the state of New Mexico, and placed in the possession of, the director;

(c) negotiable certificates of deposit, made payable or assigned to the state of New Mexico and placed in its possession or held by a federally-insured bank;

(d) an irrevocable letter of credit of any bank organized or authorized to transact business in the United States, payable only to the state of New Mexico upon presentation;

(e) a perfected, first-lien security interest in real property in favor of the state of New Mexico only; or

(f) other investment-grade rated securities having a rating of AAA, AA, or A or an equivalent rating issued by a nationally recognized securities rating service, endorsed to the order of the state of New Mexico, and placed in the possession of, the director.

(10) COMBUSTIBLE MATERIAL - means organic material that is capable of burning, either by fire or through oxidation, accompanied by the evolution of heat and a significant temperature rise.

(11) COMMUNITY OR INSTITUTIONAL BUILDING - means any structure, other than a public building or an occupied dwelling, which is used primarily for meetings, gatherings or functions of local civic organizations or other community groups; functions as an educational, cultural, historic, religious, scientific, correctional, mental-health or physical health care facility; or is used for public services, including, but not limited to, water supply, power generation or sewage treatment.

(12) COMPACTION - means increasing the density of a material by reducing the voids between the particles and is generally accomplished by controlled placement and mechanical effect such as from repeated application of wheel, track, or roller loads from heavy equipment.

(13) COMPLETE APPLICATION - means an application for exploration approval or a surface coal mining and reclamation permit, which contains all information required under the act and 19.8 NMAC Parts 1-35.

(14) CONSTANCY - means the percentage of sampling areas of the same vegetative type in which an individual species occurs.

(15) CROPLAND - means land used for the production of adapted crops for harvest, alone or in a rotation with grasses and legumes, and includes row crops, small grain crops, hay crops, nursery crops, orchard crops, and other similar specialty crops. Land used for facilities in support of cropland farming operations which is adjacent to or an integral part of these operations is also included for purposes of these land use categories.

(16) CUMULATIVE IMPACT AREA - means the area, including the permit area, within which impacts resulting from the proposed operation may interact with the impacts of all anticipated mining on surface and ground-water systems. Anticipated mining shall include, at a minimum, the entire projected lives through bond release of:

(a) the proposed operation;

(b) all existing operations;

(c) any operation for which a permit application has been submitted to the director; and

(d) all operations required to meet diligent development requirements for leased federal coal for which there is actual mine development information available.

(17) CURRENT ASSETS - means cash or other assets or resources which are reasonably expected to be converted to cash or sold or consumed within one year or within the normal operating cycle of the business.

(18) CURRENT LIABILITIES - means obligations which are reasonably expected to be paid or liquidated within one year or within the normal operating cycle of the business.

D. Definitions beginning with the letter "D"

(1) DENSITY - means the number of individuals of a species per unit area.

(2) DEVELOPED WATER RESOURCES - is meant to include land used for storing water for beneficial uses such as stockponds, irrigation, fire protection, flood control, and water supply.

(3) DIRECT FINANCIAL INTEREST - means ownership or part ownership by an employee of lands, stocks, bonds, debentures, warrants, partnership shares, or other holdings and also any other arrangements where the employee may benefit from his or her holding in or salary from coal mining operations. Direct financial interests include employment, pensions, creditor, real property and other financial relationships.

(4) DIRECTOR - means the director of mining and minerals division, or his authorized representative.

(5) DISTURBED AREA - means any area where vegetation, topsoil, or overburden is removed or upon which topdressing, spoil, coal processing waste, underground development waste, or noncoal waste is placed by surface coal mining operations. Those areas are classified as disturbed until reclamation is complete and the performance bond or other assurance of performance required by NMAC 19.8.14 is released.

(6) DIVERSION - means a channel, embankment, or other manmade structure constructed to divert water from one area to another.

(7) DOWNSLOPE - means the land surface between the projected outcrop of the lowest coal bed being mined along each highwall and a valley floor.

(8) DRAINAGE GRADE CROSSING - means the point at which a road crosses a drainage channel at the elevation of the base of that channel.

(9) DRINKING, DOMESTIC OR RESIDENTIAL WATER SUPPLY - means water received from a well or spring and any appurtenant delivery system that provides water for direct human consumption or household use. Wells and springs that serve only agricultural, commercial or industrial enterprises are not included except to the extent the water supply is for direct human consumption or human sanitation, or domestic use.

E. Definitions beginning with the letter "E"

(1) EMBANKMENT - means an artificial deposit of material that is raised above the natural surface of the land and used to contain, divert, or store water, support roads or railways, or for other similar purposes.

(2) EMPLOYEE - means:

(a) any person employed by the director who performs any function or duty under the act; and

(b) advisory board or commission members and consultants who perform any function or duty under the act, if they perform decision-making functions under the authority of state law or regulations; however, members of advisory boards or commissions established in accordance with state law or regulations to represent multiple interests are not considered to be employees.

(3) EPHEMERAL STREAM - means a stream which flows only in direct response to precipitation in the immediate watershed or in response to the melting of a cover of snow and ice, and which has a channel bottom that is always above the local water table.

(4) ESSENTIAL HYDROLOGIC FUNCTIONS - means the role of an alluvial valley floor in collecting, storing, regulating, and making the natural flow of surface or ground water, or both, usefully available for agricultural activities by reason of the valley floor's topographic position, the landscape and the physical properties of its underlying materials. A combination of these functions provides a water supply during extended periods of low precipitation. The role of the alluvial valley floor in making water usefully available for agricultural activities results from:

(a) the existence of flood plains and terraces where surface and ground water can be provided in sufficient quantities to support the growth of agriculturally useful plants;

(b) the presence of earth materials suitable for the growth of agriculturally useful plants;

(c) the temporal and physical distribution of water making it accessible to plants throughout the critical phases of the growth cycle either by flood irrigation or by subirrigation;

(d) the natural control of alluvial valley floors in limiting destructive extremes of stream discharge; and

(e) the erosional stability of earth materials suitable for the growth of agriculturally useful plants.

(5) **EXCESS SPOIL** - means spoil material disposed of in a location other than the mined-out area; provided that spoil material used to achieve the approximate original contour or to blend the mined-out area with the surrounding terrain in accordance with Paragraph (5) of Subsection A of 19.8.20.2055 NMAC in non-steep slope areas shall not be considered excess spoil.

(6) **EXISTING STRUCTURE** - means a structure or facility used in connection with or to facilitate surface coal mining and reclamation operations for which construction begins prior to the approval of a state program.

(7) **EXPERIMENTAL PRACTICE** - means the use of alternative surface coal mining and reclamation operation practices for experimental or research purposes. Experimental practices need not comply with specific environmental protection performance standards of 19.8.20 NMAC, the act, and 19.8 NMAC Parts 1-35.

(8) **EXTRACTION OF COAL AS INCIDENTAL PART** - means the extraction of coal which is necessary to enable the construction to be accomplished. For purposes of 19.8 NMAC Parts 1-35, only that coal extracted from within the right-of-way, in the case of a road, railroad, utility line or other such construction, or within the boundaries of the area directly affected by other types of government-financed construction, may be considered incidental to that construction. Extraction of coal outside the right-of-way or boundary of the area directly affected by the construction shall be subject to the requirements of the act and 19.8 NMAC Parts 1-35.

F. Definitions beginning with the letter "F"

(1) **FEDERAL LANDS** - means any land, including mineral interests, owned by the United States, without regard to how the United States acquired ownership of the lands or which agency manages the lands. It does not include Indian lands.

(2) **FEDERAL LANDS PROGRAM** - means a program established by the secretary of the U.S. department of interior, pursuant to Section 523 of the Surface Mining Control and Reclamation Act of 1977 to regulate surface coal mining and reclamation operations on federal lands.

(3) FEDERAL VIOLATION NOTICE - means a violation notice issued by OSM or by another agency or instrumentality of the United States.

(4) FISH AND WILDLIFE HABITAT - means land dedicated wholly or partially to the production, protection or management of species of fish or wildlife.

(5) FIXED ASSETS - means plants, facilities and equipment, not used for the production, transportation or processing of coal, and does not include land or coal in place.

(6) FLOOD IRRIGATION - means, with respect to alluvial valley floors, supplying water to plants by natural overflow or the diversion of flows, so that the irrigated surface is largely covered by a sheet of water.

(7) FOLIAGE COVER - means that portion of the sampling unit covered by the vertical projection of an individual plant's aerial parts.

(8) FORESTRY - means land used or managed for the long-term production of wood, wood fiber, or wood derived products. Land used for facilities in support of forest, harvest and management operations which is adjacent to or an integral part of these operations is also included. For purposes of 19.8 NMAC Parts 1-35, pinon-juniper type trees shall not be deemed forest trees managed for such long term production.

(9) FRAGILE LANDS - means unique or valuable habitats for fish or wildlife, critical habitats for endangered or threatened species of animals or plants and uncommon geologic formations. National natural landmark sites, areas where mining may cause flooding, areas containing a concentration of unique ecological and aesthetic features, areas of recreational value due to high environmental quality, and buffer zones adjacent to the boundaries of areas where surface coal mining operations are prohibited under Section 69-25A-26 NMSA 1978 of the act and 19.8.2, 3 and 4 NMAC, that could be damaged or destroyed by surface coal mining operations.

(10) FREQUENCY - means the percentage of plots or subplots occupied by each individual species in one sampling unit or area.

(11) FUGITIVE DUST - means that particulate matter not emitted from a duct or stack which becomes airborne due to the forces of wind or surface coal mining and reclamation operations or both. During surface coal mining and reclamation operations it may include emissions from haul roads, wind erosion of exposed surfaces, storage piles, and spoil piles, reclamation operations and other activities in which material is either removed, stored, transported, or redistributed.

G. Definitions beginning with the letter "G"

(1) GOVERNMENT FINANCED CONSTRUCTION - means construction funded 50 percent or more by funds appropriated from a government financing agency's

budget or obtained from general revenue bonds, but shall not mean government financing agency guarantees, insurance, loans, funds obtained through industrial revenue bonds or their equivalent, or in-kind payments. Funding at less than 50 percent may qualify if the construction is undertaken as an approved reclamation project under Title IV of SMCRA.

(2) GRAZING LAND - includes both grasslands and forest lands where the indigenous vegetation is actively managed for grazing, browsing or occasional hay production. Land used for facilities in support of ranching operations which are adjacent to or an integral part of these operations is also included.

(3) GROUND COVER - means either foliage or basal area cover of living plant material.

(4) GROUND WATER - means subsurface water that fills available openings in rock or soil materials to the extent that they are considered water saturated.

H. Definitions beginning with the letter "H"

(1) HALF-SHRUB - means a perennial plant with a woody base whose annually produced stems die back each year.

(2) HEAD-OF-HOLLOW FILL - means a fill structure consisting of any material, other than coal processing waste and organic material, placed in the uppermost reaches of a hollow where side slopes of the existing hollow measured at the steepest point are greater than 20 degrees or the average slope of the profile of the hollow from the toe of the fill to the top of the fill is greater than 10 degrees. In fills with less than 250,000 cubic yards of material, associated with contour mining, the top surface of the fill will be at the elevation of the coal seam. In all other head-of-hollow fills, the top surface of the fill, when completed, is at approximately the same elevation as the adjacent ridge line, and no significant area of natural drainage occurs above the fill draining into the fill area.

(3) HIGHWALL - means the face of exposed overburden and coal in an open cut of a surface coal mining activity or for entry to underground mining activities.

(4) HISTORIC LANDS - means historic or cultural districts, places, structures or objects, including archaeological and natural historic landmark sites, sites listed on or eligible for listing on a state or national register of historic places, or sites for which historic designation is pending.

(5) HISTORICALLY USED FOR CROPLAND - means:

(a) lands that have been used for cropland for any 5 years or more out of the 10 years immediately preceding the acquisition, including purchase, lease, or option, of

the land for the purpose of conducting or allowing through resale, lease or option the conduct of surface coal mining and reclamation operations;

(b) lands that the director determines, on the basis of additional cropland history of the surrounding lands and the lands under consideration, that the permit area is clearly cropland but falls outside the specific 5-years-in-10 criterion, in which case the regulations for prime farmland may be applied to include more years of cropland history only to increase the prime farmland acreage to be preserved; or

(c) lands that would likely have been used as cropland for any 5 out of the last 10 years, immediately preceding such acquisition but for the same fact of ownership or control of the land unrelated to the productivity of the land.

(6) **HYDROLOGIC BALANCE** - means the relationship between the quality and quantity of water inflow to, water outflow from, and water storage in a hydrologic unit such as a drainage basin, aquifer, soil zone, lake, or reservoir. It encompasses the dynamic relationships among precipitation, runoff, evaporation, and changes in ground and surface water storage.

(7) **HYDROLOGIC REGIME** - means the entire state of water movement in a given area. It is a function of the climate and includes the phenomena by which water first occurs as atmospheric water vapor, passes into a liquid or solid form, falls as precipitation, moves along or into the ground surface, and returns to the atmosphere as vapor by means of evaporation and transpiration.

I. Definitions beginning with the letter "I"

(1) **IMMINENT DANGER TO THE HEALTH AND SAFETY OF THE PUBLIC** - means the existence of any condition or practice, or any violation of a permit, 19.8 NMAC Parts 1-35 or other requirements of the act in a surface coal mining and reclamation operation, which could reasonably be expected to cause substantial physical harm to persons outside the permit area before the condition, practice, or violation can be abated. A reasonable expectation of death or serious injury before abatement exists if a rational person, subjected to the same condition or practice giving rise to the peril, would avoid exposure to the danger during the time necessary for abatement.

(2) **IMPOUNDMENT** - means a closed basin, naturally formed or artificially built, which is dammed or excavated for the retention of water or sediment.

(3) **INDIGENOUS** - means an organism that is native, not introduced, or immigrates under its own power into an area.

(4) **INDIRECT FINANCIAL INTEREST** - means the same financial relationships as for direct ownership, but where the employee reaps the benefits of such interests including interests held by his or her spouse, minor child and other relatives,

including in-laws residing in the employee's home. The employee will not be deemed to have an indirect financial interest if there is no relationship between the employee's functions or duties and the coal mining operation in which the spouse, minor children or other resident relatives hold a financial interest.

(5) INDUSTRIAL/COMMERCIAL - means land used for:

(a) extraction or transformation of materials for fabrication or products, wholesaling of products or for long-term storage of products; this includes all heavy and light manufacturing facilities such as lumber and wood processing, chemical manufacturing, petroleum refining and fabricated metal products manufacture; land used for facilities in support of these operations which is adjacent to or an integral part of that operation is also included; support facilities include, but are not limited to, all rail, road, and other transportation facilities.

(b) retail or trade of goods or services, including hotels, motels, stores, restaurants and other commercial establishments; land used for facilities in support of commercial operations which is adjacent to or an integral part of these operations is also included; support facilities include, but are not limited to, parking, storage or shipping facilities.

(6) IN SITU PROCESSES - means activities conducted on the surface or underground in connection with in-place distillation, retorting, leaching, or other chemical or physical processing of coal. The term includes, but is not limited to, in situ gasification, in situ leaching, slurry mining, solution mining, borehole mining and fluid recovery mining.

(7) INTERMITTENT STREAM - means a stream or reach of a stream that is below the local water table for at least some part of the year, and obtains its flow from both surface runoff and ground water discharge.

(8) INTERSEEDING - means a secondary seeding practice into established vegetation cover in order to take advantage of climatic conditions that favor species requiring special conditions for germination and establishment, or to improve or alter the composition between forage species and shrubs, or between warm and cool season grasses.

(9) IRREPARABLE DAMAGE TO THE ENVIRONMENT - means any damage to the environment that cannot be corrected by actions of the applicant.

K. Definitions beginning with the letter "K". **KNOWING OR KNOWINGLY** - means that a person who authorized, ordered, or carried out an act or omission knew or had reason to know that the act or omission would result in either a violation or a failure to abate or correct a violation.

L. Definitions beginning with the letter "L"

(1) **LAND USE** - means specific uses or management related activities, rather than the vegetation or cover of the land. Land uses may be identified in combination when joint or seasonal uses occur. Changes of land use or uses from one of the following categories to another shall be considered as a change to an alternative land use which is subject to approval by the director. Land use categories identified in 19.8 NMAC Parts 1-35 are:

- (a) cropland
- (b) pasture land or land occasionally cut for hay
- (c) grazing land
- (d) forestry
- (e) residential
- (f) industrial/commercial
- (g) recreation
- (h) fish and wildlife habitat
- (i) developed water resources
- (j) undeveloped land or no current use or land management

(2) **LIABILITIES** - means obligations to transfer assets or provide services to other entities in the future as a result of past transactions.

(3) **LITTER COVER** - means that portion of the sampling unit covered by dead s of plants.

M. Definitions beginning with the letter "M"

(1) **MATERIAL DAMAGE**, in the context of 19.8.9.918 and 19.8.20.2067, 2069 through 2072 NMAC, means:

- (a) any functional impairment of surface lands, features, structures or facilities;
- (b) any physical change that has a significant adverse impact on the affected land's capability to support any current or reasonably foreseeable uses or causes significant loss in production or income; or

(c) any significant change in the condition, appearance or utility of any structure or facility from its pre-subsidence condition.

(2) MATERIALLY DAMAGE THE QUANTITY OR QUALITY OF WATER - means, with respect to alluvial valley floors, changes in the quality or quantity of the water supply to any portion of an alluvial valley floor where such changes are caused by surface coal mining and reclamation operations and result in changes that significantly and adversely affect the composition, diversity, or productivity of vegetation dependent on subirrigation, or which result in changes that would limit the adequacy of the water for flood irrigation of the irrigable land acreage existing prior to mining.

(3) MINE PLAN AREA - means the area of land and water within the boundaries of all permit areas during the entire life of the surface coal mining and reclamation operations as anticipated by the applicant at the time of submission of a permit application. Other terms defined in 19.8 NMAC Parts 1-35 which relate closely to mine plan area are:

(a) permit area, which will always be within or the same as the mine plan area;

(b) affected area, which will always be within or the same as the permit area; and

(c) adjacent area, which may surround or extend beyond the affected area, permit area, or mine plan area.

(4) MINING PLAN - means a complete mining and reclamation operations plan that complies with the requirements of the act, 19.8 NMAC Parts 1-35 and all other applicable laws and regulations.

(5) MOIST BULK DENSITY - means the weight of soil (oven dry) per unit volume. Volume is measured when the soil is at field moisture capacity (1/3 bar moisture tension). Weight is determined after drying the soil at 105 degrees C.

(6) MULCH - means vegetation residues or other suitable materials that aid in soil stabilization and soil moisture conservation, thus providing microclimatic conditions suitable for germination and growth.

N. Definitions beginning with the letter "N"

(1) NATURAL HAZARD LANDS - means geographic areas in which natural conditions exist which pose or, as a result of surface coal mining operations, may pose a threat to the health, safety or welfare of people, property or the environment.

(2) NET WORTH - means total assets minus total liabilities and is equivalent to owners' equity. For the purposes of Subparagraph (b) of Paragraph (3) of Subsection

A of 19.8.14.1410 NMAC plants, facilities and equipment used for the production, transportation or processing of coal, and land or coal in place shall not be considered assets in a calculation of net worth.

(3) NONCOMMERCIAL BUILDING - means any building, other than an occupied residential dwelling, that, at the time the subsidence occurs, is used on a regular or temporary basis as a public building or community or institutional building as those terms are also defined in 19.8.1.7 NMAC. Any building used only for commercial agricultural, industrial, retail or other commercial enterprises are excluded.

(4) NO SIGNIFICANT RECREATIONAL, TIMBER, ECONOMIC OR OTHER VALUES INCOMPATIBLE WITH SURFACE COAL MINING OPERATIONS - means those significant values which could be damaged by, and are not capable of existing together with, surface coal mining operations because of the undesirable effects mining would have on those values, either on the area included in the permit application or on off-site areas which could be affected by mining. Those values to be evaluated for their importance include:

(a) recreation, including hiking, boating, camping, skiing or other related outdoor activities;

(b) timber management and silviculture;

(c) agriculture, aquaculture or production of other natural, processed or manufactured products which enter commerce;

(d) scenic, historic, archaeological, aesthetic, fish, wildlife, plants or cultural interests.

(5) NORMAL EROSION - means the erosion that occurs on land under natural environmental conditions not disturbed by human activity.

(6) NOXIOUS PLANTS - means species that have been included on the official state lists of noxious plants.

O. Definitions beginning with the letter "O"

(1) OCCUPIED DWELLING - means any building that is currently being used on a regular or temporary basis for human habitation.

(2) OCCUPIED RESIDENTIAL DWELLING AND ASSOCIATED STRUCTURES - means, for purposes of 19.8.9.918 and 19.8.20.2067, 2069 through 2072 NMAC, any building or other structure that, at the time the subsidence occurs, is used either temporarily, occasionally, seasonally, or permanently for human habitation. This term also includes any building, structure or facility installed on, above or below, or a combination thereof, the land surface if that building, structure or facility is adjunct to

or used in connection with an occupied residential dwelling. Examples of such structures include, but are not limited to, garages; storage sheds and barns; greenhouses and related buildings; utilities and cables; fences and other enclosures; retaining walls; paved or improved patios, walks and driveways; septic sewage treatment facilities; and lot drainage and lawn and garden irrigation systems. Any structure used only for commercial agricultural, industrial, retail or other commercial purposes are excluded.

(3) OPERATOR - means any person engaged in coal mining who removes or intends to remove more than 250 tons of coal from the earth or from coal refuse piles by mining within 12 consecutive calendar months in any one location.

(4) OSM - means office of surface mining reclamation and enforcement, U.S. department of the interior.

(5) OTHER TREATMENT FACILITIES - means any chemical treatments, such as flocculation or neutralization, or mechanical structures, such as clarifiers or precipitators, that have a point-source discharge and that are utilized to prevent additional contribution of suspended solids to streamflow or runoff outside the permit area, and to comply with all applicable state and federal water-quality laws and regulations.

(6) OUTSLOPE - means the face of the spoil or embankment sloping downward from the highest elevation to the toe.

(7) OVERBURDEN - means material of any nature, consolidated or unconsolidated that overlies a coal deposit, excluding topsoil.

(8) OWNED OR CONTROLLED AND OWNS OR CONTROLS - means any one or a combination of the relationships specified in Subparagraphs (a) and (b) of Paragraph (8) of Subsection O of 19.8.1.7 NMAC:

(a) being a permittee of a surface coal mining operation, or having any other relationship which gives one person authority directly or indirectly to determine the manner in which an applicant, an operator, or other entity conducts surface coal mining operations;

(b) the following relationships are presumed to constitute ownership or control unless a person can demonstrate that the person subject to the presumption does not in fact have the authority directly or indirectly to determine the manner in which the relevant surface coal mining operation is conducted:

(i) being an officer or director of an entity;

(ii) being the operator of a surface coal mining operation;

(iii) having the ability to commit the financial or real property assets or working resources of an entity;

(iv) being the sole proprietor of the entity;

(v) being a general partner in a partnership;

(vi) being a member in a limited liability company;

(vii) based on the instruments of ownership or the voting securities of a corporate entity, owning of record 10 percent or more of the entity; or

(viii) owning or controlling coal to be mined by another person under a lease, sublease or other contract and having the right to receive such coal after mining or having authority to determine the manner in which that person or another person conducts a surface coal mining operation.

(9) OWNERSHIP or CONTROL LINK - means any relationship included in the definition of "owned or controlled" or "owns or controls" in Subsection O of 19.8.1.7 NMAC or in the violations review provisions of Subsection C of 19.8.11.1105 NMAC. It includes any relationship presumed to constitute ownership or control under the definition of "owned or controlled" or "owns or controls" in this section, unless such presumption has been successfully rebutted under the provisions of 19.8.11.1117 and 1118 NMAC or under the provisions of 19.8.12 and 19.8.11.1118 NMAC.

P. Definitions beginning with the letter "P"

(1) PARENT CORPORATION - means a corporation which owns or controls the applicant.

(2) PASTURELAND OR LAND OCCASIONALLY CUT FOR HAY - means land used primarily for the long-term production of adapted, domesticated forage plants to be grazed by livestock of occasionally cut and cured for livestock feed. Land used for facilities in support of pastureland or land occasionally cut for hay which is adjacent to or an integral part of these operations is also included.

(3) PERENNIAL STREAM - means a stream or part of a stream that flows continuously during all of the calendar year as a result of ground water discharge or surface runoff. The term does not include intermittent stream or ephemeral stream.

(4) PERFORMING ANY FUNCTION OR DUTY UNDER THIS ACT - means those decisions or actions, which if performed or not performed by an employee, affect the programs under the act.

(5) PERMANENT DIVERSION - means a diversion remaining after surface coal mining and reclamation operations are completed which has been approved for retention by the director and other appropriate state and federal agencies.

(6) PERMIT - means a permit to conduct surface coal mining and reclamation operations issued pursuant to Laws 1972, Chapter 68, as amended, or by the director pursuant to the act.

(7) PERMIT AREA - means the area of land and water within the boundaries of the permit which are designated on the permit application maps, as approved by the director. This area shall include, at a minimum, all areas which are or will be affected by the surface coal mining and reclamation operations during the term of the permit. The permit area shall not include roads, not otherwise within the permit boundary, infrequently used to monitor remote facilities or environmental resources, or for exploration or surveying purposes, if the director approves such use of such roads, after determining that such use will not result in a significant adverse affect upon the environment.

(8) PERMIT MODIFICATION - means an alteration of the terms or requirements of a permit, which alteration is not a permit revision.

(9) PERMIT REVISION - means a significant alteration of the terms or requirements of a permit, as identified in Subsection A of 19.8.13.1301 NMAC.

(10) PERMITTEE - means a person holding or required by the act and 19.8 NMAC Parts 1-35 to hold a permit to conduct surface coal mining and reclamation operations issued by the director pursuant to the act and 19.8 NMAC Parts 1-35.

(11) PERSON - means an individual, Indian tribe when conducting surface coal mining and reclamation operations on non-Indian lands, partnership, association, society, joint venture, joint stock company, firm, company, corporation, cooperative or other business organization and any agency, unit, or instrumentality of federal, state or local government including any publicly owned utility or publicly owned corporation of federal, state or local government.

(12) PERSON HAVING AN INTEREST WHICH IS OR MAY BE ADVERSELY AFFECTED OR PERSON WITH A VALID LEGAL INTEREST - shall include any person:

(a) who uses any resource of economic, recreational, aesthetic, or environmental value that may be adversely affected by coal exploration or surface coal mining and reclamation operations or any related action of the secretary of the U.S. department of interior or the director; or

(b) whose property is or may be adversely affected by coal exploration or surface coal mining and reclamation operations or any related action of the secretary of the U.S. department of interior or the director.

(13) **PRECIPITATION EVENT** - means a quantity of water resulting from drizzle, rain, snow, sleet, or hail in a limited period of time. It may be expressed in terms of recurrence interval. As used in 19.8 NMAC Parts 1-35, a precipitation event also includes that quantity of water emanating from snow cover as snowmelt in a limited period of time.

(14) **PREVIOUSLY MINED AREA** - means land affected by surface coal mining operations prior to August 3, 1977, that has not been reclaimed to the performance standards of SMCRA, the act, and the New Mexico regulatory program.

(15) **PRIME FARMLAND** - means those lands which are defined by the secretary of the U. S. department of agriculture in 7 CFR 657 (federal register vol. 4 no. 21) and which have historically been used for cropland as that phrase is defined in 19.8 NMAC Parts 1-35.

(16) **PROHIBITED FINANCIAL INTEREST** - means any direct or indirect financial interest in any coal mining operation.

(17) **PROPERTY TO BE MINED** - means both the surface and mineral estates on and underneath lands which are within the permit area.

(18) **PUBLIC BUILDING** - means any structure that is owned by a public agency or used principally for public business, meetings or other group gatherings.

(19) **PUBLIC OFFICE** - means a facility under the direction and control of a governmental entity which is open to public access on a regular basis during reasonable business hours.

(20) **PUBLIC PARK** - means an area dedicated or designated by any federal, state, or local agency for public recreational use, whether or not such use is limited to certain times or days, including any land leased, reserved or held open to the public because of that use.

(21) **PUBLIC ROAD** - means all roads and highways except private roads, established pursuant to any law of the United States or the state of New Mexico, and roads dedicated to the public use, that have not been vacated or abandoned, and such other roads as are recognized by the corporate authorities of any county in New Mexico.

Q. Definitions beginning with the letter "Q". **QUALIFIED LABORATORY** - means a designated public agency, private firm, institution, or analytical laboratory which can prepare the required determination of probable hydrologic consequences or statement of results of test borings or core sampling, or other services as specified at

19.8.32.3203 NMAC under the small operator assistance program and which meet the standards of 19.8.32.3204 NMAC.

R. Definitions beginning with the letter "R"

(1) RANGELAND - means land on which the natural potential (climax) plant cover is principally native grasses, forbs and shrubs valuable for forage. Except for brush control, management is primarily achieved by regulating the intensity of grazing and season of use.

(2) RECHARGE CAPACITY - means the ability of the soils and underlying materials to allow precipitation and runoff to infiltrate and reach the zone of saturation.

(3) RECLAMATION - means those actions taken to restore mined land as required by the act and 19.8 NMAC Parts 1-35 to a postmining land use approved by the director.

(4) RECREATION - means land used for public or private leisure time use, including developed recreation facilities such as parks, camps and amusement areas, as well as areas for less intensive uses such as hiking, canoeing, and other undeveloped recreational uses.

(5) RECURRENCE INTERVAL - means the interval of time in which a precipitation event is expected to occur once, on the average. For example, the 10 year 24 hour precipitation event would be that 24 hour precipitation event expected to occur on the average once in 10 years.

(6) REFERENCE AREA - means a land unit maintained under appropriate management for the purpose of measuring vegetation ground cover, productivity and plant species composition that are produced naturally or by crop production methods approved by the director. Reference areas must be representative of geology, soil, slope, and vegetation in the permit area.

(7) REPLACEMENT OF WATER SUPPLY - means, with respect to protected water supplies contaminated, diminished, or interrupted by coal mining operations, provision of water supply on both a temporary and permanent basis equivalent to premining quantity and quality. Replacement includes provision of an equivalent water delivery system and payment of operation and maintenance costs in excess of customary and reasonable delivery costs for premining water supplies. Upon agreement by the permittee and the water supply owner, the obligation to pay such operation and maintenance costs may be satisfied by a one-time payment in an amount which covers the present worth of the increased annual operation and maintenance costs for a period agreed to by the permittee and the water supply owner. If the affected water supply was not needed for the land use in existence at the time of loss, contamination, or diminution, and if the supply is not needed to achieve the postmining land use, replacement requirements may be satisfied by demonstrating that a suitable alternative

water source is available and could feasibly be developed. If the latter approach is selected, written concurrence must be obtained from the water supply owner.

(8) RENEWABLE RESOURCE LANDS - means aquifers and areas for the recharge of aquifers and other underground waters, areas for agricultural or silvicultural production of food and fiber, and grazing lands.

(9) RESIDENTIAL - includes single and multiple family housing, mobile home parks and other residential lodgings. Land used for facilities in support of residential operations which is adjacent to or an integral part of these operations is also included. Support facilities include, but are not limited to, vehicle parking and open space that directly relate to the residential use.

(10) ROAD - means a surface right-of-way for purposes of travel by land vehicles used in coal exploration or coal mining and reclamation operations. A road consists of the entire area within the right-of-way, including the roadbed, shoulders, parking and side areas, approaches, structures, ditches and surface. The term includes access and haul roads constructed, used, reconstructed, improved, or maintained for use in coal exploration or within the affected area or surface coal mining and reclamation operations, including use by coal hauling vehicles leading to transfer, processing, or storage areas. The term does not include ramps and routes of travel within the immediate mining area or within spoil or coal mine waste disposal areas.

S. Definitions beginning with the letter "S"

(1) SAFETY FACTOR - means the ratio of the available shear strength to the developed shear stress, or the ratio of the sum of the resisting forces to the sum of the loading or driving forces, as determined by accepted engineering practices.

(2) SEDIMENTATION POND - means a primary sediment control structure designed, constructed and maintained in accordance with 19.8.20.2014 NMAC and including but not limited to a barrier, dam, or excavated depression which slows down water runoff to allow sediment to settle out. A sedimentation pond shall not include secondary sedimentation control structures, such as straw dikes, riprap, check dams, mulches, dugouts and other measures that reduce overland flow velocity, reduce runoff volume or trap sediment, to the extent that such secondary sedimentation structures drain to a sedimentation pond.

(3) SELF-BOND - means an indemnity agreement in a sum certain executed by the applicant or by the applicant and any corporate guarantor and made payable to the state of New Mexico, with or without separate surety.

(4) SIGNIFICANT FOREST COVER - means an existing plant community consisting predominantly of trees and other woody vegetation. The secretary of the U.S. department of agriculture shall decide on a case-by-case basis whether the forest cover is significant within national forests of New Mexico.

(5) SIGNIFICANT, IMMINENT ENVIRONMENTAL HARM TO LAND, AIR OR WATER RESOURCES - means:

(a) An environmental harm is an adverse impact on land, air, or water resources which resources include, but are not limited to, plant and animal life.

(b) An environmental harm is imminent, if a condition, practice, or violation exists which:

(i) is causing harm; or,

(ii) may reasonably be expected to cause such harm at any time before the end of the reasonable abatement time that would be set under Section 69-25A-25(B) NMSA 1978 of the act.

(c) An environmental harm is significant if that harm is appreciable and not immediately reparable.

(6) SLOPE - means average inclination of a surface, measured from the horizontal, generally expressed as the ratio of a unit of vertical distance to a given number of units of horizontal distance (e.g. 1v:5h). It may also be expressed as a percent or in degrees.

(7) SMCRA - means the Surface Mining Control and Reclamation Act of 1977, as amended, its implementing regulations at 30 CFR Chapter VII, and any state or federal law, rule, regulation or program enacted or promulgated pursuant to it.

(8) SOIL HORIZONS - means contrasting layers of soil parallel or nearly parallel to the land surface. Soil horizons are differentiated on the basis of field characteristics and laboratory data. The three major soil horizons are:

(a) "A" HORIZON - the uppermost mineral layer, often called the surface soil. It is the part of the soil in which organic matter is most abundant and leaching of soluble or suspended particles are typically the greatest.

(b) "B" HORIZON - the layer that typically is immediately beneath the "A" horizon and often called the subsoil. This middle layer commonly contains more clay, iron, or aluminum than the "A" or "C" horizons.

(c) "C" HORIZON - the deepest layer of a soil profile. It consists of loose material or weathered rock that is relatively unaffected by biologic activity.

(9) SOIL SURVEY - means a field and other investigation, resulting in a map showing the geographic distribution of different kinds of soils and an accompanying report that describes, classifies, and interprets such soils for use. Soil surveys must meet the standards of the national cooperative soil survey.

(10) SPOIL - means overburden that has been removed during surface coal mining operations, or underground development waste material.

(11) STABILIZE - means to control movement of soil, spoil piles, or areas of disturbed earth by modifying the geometry of the mass, or by otherwise modifying physical or chemical properties, such as by providing a protective surface coating.

(12) STATE VIOLATION NOTICE - means any written notification from the director of a violation of the act or 19.8 NMAC Parts 1-35, whether by letter, memorandum, legal or administrative pleading or other written communication, or by another agency or instrumentality of state government.

(13) STEEP SLOPE - means any slope with an average inclination of 20 degrees or more from the horizontal or such lesser slope as may be designated by the director after consideration of soil, climate and other characteristics of a region within the state.

(14) SUBIRRIGATION - means with respect to alluvial valley floors, the supplying of water to plants from underneath or from a semi-saturated or saturated subsurface zone where water is available for use by vegetation. Subirrigation may be identified by:

(a) diurnal fluctuation of the water table, due to the differences in nighttime and daytime evapotranspiration rates;

(b) increasing soil moisture from a portion of the root zone down to the saturated zone, due to capillary action;

(c) mottling of the soils due to iron in the root zone;

(d) existence of an important part of the root zone within the capillary fringe or water table of an alluvial aquifer; or

(e) increase in stream flow or a rise in ground water levels, shortly after the first killing frost on the valley floor.

(15) SUBSTANTIAL LEGAL AND FINANCIAL COMMITMENTS IN A SURFACE COAL MINING OPERATION - means significant investments that have been made on the basis of a long-term coal contract in power plants, railroads, coal-handling, preparation, extraction or storage facilities and capital-intensive activities.

(16) SUBSTANTIALLY DISTURB - means for purposes of coal exploration, to impact significantly upon land, air or water resources by such activities as blasting, mechanical excavation, drilling or altering coal or water exploratory holes or wells, construction of roads and other access routes, and the placement of structures, excavated earth, or other debris on the surface of land.

(17) SUCCESSOR IN INTEREST - means any person who succeeds to rights granted under a permit, by transfer, assignment, or sale of those rights.

(18) SUITABLE MATERIAL - means subsoil or geologic material that can be manipulated to form a sufficient amount of soil size particles with the nutrient capability for supporting desirable vegetation in compliance with the postmining land use.

(19) SURETY BOND - means an indemnity agreement in a sum certain payable to the state of New Mexico, executed by the permittee as principal and which is supported by the performance guarantee of a corporation licensed to do business as a surety in the state.

(20) SURFACE COAL MINING OPERATIONS - means:

(a) activities conducted on the surface lands in connection with a surface coal mine or, subject to the requirements of Section 69-25A-20 NMSA 1978 of the act, surface operations and surface impacts incident to an underground coal mine, the products of which enter commerce or the operations of which directly or indirectly affect interstate commerce; such activities include excavation for the purpose of obtaining coal, including such common methods as contour, strip, auger, mountaintop removal, box cut, open pit, and area mining, the use of explosives and blasting, and in situ distillation or retorting, leaching or other chemical or physical processing, and the cleaning, concentrating, or other processing or preparation, loading of coal for interstate commerce at or near the mine site, provided, these activities do not include the extraction of coal incidental to the extraction of other minerals, where coal does not exceed 16 2/3 per centum of the tonnage of minerals removed for purposes of commercial use or sale, or coal exploration subject to Section 69-25A-16 NMSA 1978 of the act; and provided, further, that excavation for the purpose of obtaining coal includes extraction of coal from coal refuse piles; and

(b) areas upon which the activities described in Subparagraph (a) of Paragraph (20) of Subsection S of 19.8.1.7 NMAC occur or where those activities disturb the natural land surface; these areas shall also include any adjacent land the use of which is incidental to any such activities, all lands affected by the construction of new roads or the improvement or use of existing roads to gain access to the site of those activities and for haulage and excavation, workings, impoundments, dams, ventilation shafts, entryways, refuse banks, dumps, stockpiles, overburden piles, spoil banks, culm banks, tailings, holes or depressions, repair areas, storage areas, processing areas, shipping areas and other areas upon which are sited structures, facilities, or other property or material on the surface, resulting from or incident to those activities.

(21) SURFACE COAL MINING AND RECLAMATION OPERATIONS WHICH EXIST ON THE DATE OF ENACTMENT - means all surface coal mining and reclamation operations which were being conducted on August 3, 1977.

(22) SURFACE COAL MINING AND RECLAMATION OPERATIONS - means surface coal mining operations and all activities necessary or incidental to the reclamation of such operations. This term includes the term surface coal mining operations.

(23) SURFACE MINING ACTIVITIES - means those surface coal mining and reclamation operations incident to the extraction of coal from the earth by removing the materials over a coal seam, before recovering the coal, by auger coal mining, or by recovery of coal from a deposit that is not in its original geologic location.

(24) SURFACE OPERATIONS AND IMPACTS INCIDENT TO AN UNDERGROUND COAL MINE - means all activities involved in or related to underground coal mining which are either conducted on the surface of the land, produce changes in the land surface or disturb the surface, air or water resources of the area, including all activities listed in Section 69-25A-3(P) NMSA 1978 of the act and the definition of surface coal mining operations appearing in 19.8.1.7 NMAC.

(25) SUSPENDED SOLIDS OR NONFILTERABLE RESIDUE, EXPRESSED AS MILLIGRAMS PER LITER - means organic or inorganic materials carried or held in suspension in water which are retained by a standard glass fiber filter in the procedure outlined by the environmental protection agency's regulations for waste water and analysis (40 CFR 136).

T. Definitions beginning with the letter "T"

(1) TANGIBLE NET WORTH - means net worth minus intangibles such as goodwill and rights to patents or royalties.

(2) TEMPORARY CESSATION OF OPERATIONS - means cessation of mining or reclamation operations for more than thirty days and where a reasonable expectation of the continuation of mining can be demonstrated by the permittee.

(3) TEMPORARY DIVERSION - means a diversion of a stream or overland flow which is used during coal exploration or surface coal mining and reclamation operations and not approved by the director to remain after reclamation as part of the approved postmining land use.

(4) TON - means 2000 pounds avoirdupois (.90718 metric tons).

(5) TOPDRESSING - means topsoil or other suitable material that has the capability of sustaining desirable vegetation for the approved postmining land use.

(6) TOPSOIL - means the "A" soil horizon layer of the three major soil horizons or other surface soil material of suitable texture and pH, and lacking concentrations of elements toxic to plants.

(7) TOXIC-FORMING MATERIALS - means earth materials or wastes which if acted upon by air, water, weathering or microbiological processes, are likely to produce chemical or physical conditions in soils or water that are detrimental to biota or uses of water.

(8) TOXIC MINE DRAINAGE - means water that is discharged from active or abandoned mines or other areas affected by coal exploration or surface coal mining and reclamation operations, which contains a substance that through chemical action or physical effects is likely to kill, injure, or impair biota commonly present in the area that might be exposed to it.

(9) TRANSFER, ASSIGNMENT, OR SALE OF RIGHTS - means a change in ownership or other effective control over the right to conduct surface coal mining operations under a permit issued by the director.

U. Definitions beginning with the letter "U"

(1) UNCONSOLIDATED STREAMLAIN DEPOSITS HOLDING STREAMS - means, with respect to alluvial valley floors, all flood plains and terraces located in the lower portions of topographic valleys which contain perennial or other streams with channels that are greater than 3 feet in bankfull width and greater than 0.5 feet in bankfull depth.

(2) UNDERGROUND DEVELOPMENT WASTE - means waste rock mixtures of coal, shale, claystone, siltstone, sandstone, limestone, or related materials that are excavated, moved and disposed of during development and preparation of areas incident to underground mining activities.

(3) UNDERGROUND MINING ACTIVITIES - means a combination of:

(a) surface operations incident to underground extraction of coal or in situ processing, such as construction, use, maintenance and reclamation of roads, above ground repair areas, storage areas, processing areas, shipping areas, areas upon which are sited support facilities including hoist and ventilating ducts, areas utilized for the disposal and storage of waste and areas on which materials incident to underground mining operations are placed; and

(b) underground operations such as underground construction, operation and reclamation of shafts, adits, underground support facilities, in situ processing and underground mining, hauling, storage, and blasting.

(4) UNDEVELOPED LAND OR NO CURRENT USE OR LAND MANAGEMENT - means land that is undeveloped or, if previously developed, land that has been allowed to return naturally to an undeveloped state or has been allowed to return to forest through natural succession.

(5) UNDEVELOPED RANGELAND - means, for purposes of alluvial valley floors, lands where the use is not specifically controlled and managed.

(6) UPLAND AREAS - means with respect to alluvial valley floors, those geomorphic features located outside the floodplain and terrace complex, such as isolated higher terraces, alluvial fans, pediment surfaces, landslide deposits and surfaces covered with residuum, mud flows or debris flows, as well as highland areas underlain by bedrock and covered by residual weathered material or debris deposited by sheetwash, rillwash, or windblown material.

V. Definitions beginning with the letter "V"

(1) VALLEY FILL - means a fill structure consisting of any material other than coal waste and organic material that is placed in a valley where side slopes of the existing valley measured at the steepest point are greater than 20 degrees or the average slope of the profile of the valley from the toe of the fill to the top of the fill is greater than 10 degrees.

(2) VIOLATION NOTICE - means any written notification from a governmental entity, whether by letter, memorandum, judicial or administrative pleading, or other written communication, of a violation of the act, SMCRA, a state program, or any federal law, rule, or regulation pertaining to air or water environmental protection in connection with a surface coal mining operation. It includes, but is not limited to, a notice of violation; an imminent harm cessation order; a failure-to-abate cessation order; a final order, bill, or demand letter pertaining to a delinquent civil penalty; a bill or demand letter pertaining to delinquent abandoned mine reclamation fees; and a notice of bond forfeiture, where one or more violations upon which the forfeiture was based have not been corrected.

(3) VOLUME WHEN USED IN REFERENCE TO TIMBER - means the board foot volume per square foot of basal area for each height class of commercial timber trees or volume per acre in cords for firewood producing trees.

W. Definitions beginning with the letter "W"

(1) WATER TABLE - means the upper surface of a zone of saturation, where the body of ground water is not confined by an overlying impermeable zone.

(2) WILLFUL OR WILLFULLY - means that a person who authorized, ordered or carried out an act or omission that resulted in either a violation or the failure to abate or correct a violation acted:

(a) intentionally, voluntarily, or consciously; and

(b) with intentional disregard or plain indifference to legal requirements.

(3) WORKING CAPITAL - means the excess of the operator's current assets over its current liabilities.

[11-29-97; A, 12-15-99; 19.8.2.7 NMAC - Rn, 19 NMAC 8.2.1.107 & A, 9-29-2000; A, 1-15-2002; A, 7-30-2004; A, 12-31-2007; A, 08-31-2010]

19.8.1.8-19.8.1.107 [RESERVED]:

[19.8.1.8 - 19.8.1.107 NMAC - N, 9-29-2000]

19.8.1.108 SUSPENSION OF RULES OR REGULATIONS:

(None) Section 1-11 CSMC Rule 80-1, as adopted May 15, 1980, is hereby repealed, provided, however, that such repeal shall not be deemed to affect the authority of persons to engage in or carry out any surface coal mining operations if he has a permit under Laws 1972, Chapter 68, and such permit has not expired pursuant to the act or 19.8 NMAC Parts 1-35, so long as he complies with the provisions of the act, the permit and 19.8 NMAC Parts 1-35.

[11-29-97; 19.8.1.108 NMAC - Rn, 19 NMAC 8.2.1.108 & A, 9-29-2000; A, 1-15-2002]

19.8.1.109 RESTRICTIONS OF EMPLOYEE FINANCIAL INTERESTS:

A. Responsibilities.

(1) Employees performing duties or functions under the act and 19.8 NMAC Parts 1-35 shall:

(a) file a fully completed statement of employment and financial interest 120 days after 19.8 NMAC Parts 1-35 become effective or upon entrance to duty, and annually thereafter on September 1 of each year;

(b) have no direct or indirect financial interest in coal mining operations; and

(c) comply with directions issued by persons responsible for approving each statement and comply with directives issued by those persons responsible for ordering remedial action.

(2) The director shall:

(a) provide advice, assistance, and guidance to all state employees required to file statements pursuant to 19.8 NMAC Parts 1-35 and inform such employees of the name, address and telephone number of other persons whom they may contact for advice and counseling;

(b) promptly review the statement of the employee and financial interests and supplements, if any, filed by each employee, to determine if the employee has correctly identified those listed employment and financial interests which constitute a direct or indirect financial interest in surface coal mining and reclamation operations;

(c) resolve prohibited financial interest situations by ordering or initiating remedial action which will resolve the prohibited interest as required within 90 days, or by reporting the violations to the director of the office of surface mining;

(d) certify on each statement that review has been made, that prohibited financial interests, if any, has been resolved and that no other prohibited interests have been identified from the statement;

(e) submit to the director of the office of surface mining the initial listing and the subsequent annual listing or positions as required in Subsection C of 19.8.1.109 NMAC; and

(f) furnish a blank statement 45 days in advance of the filing date established in Subparagraph (a) of Paragraph (1) of Subsection A of 19.8.1.109 NMAC to each employee required to file a statement.

B. Penalties.

(1) Any person who knowingly violates the provisions of Section 69-25A-32 NMSA 1978 of the act, shall, upon conviction, be punished by a fine of not more than \$2,500, or by imprisonment of not more than one year, or both.

(2) Any employee who fails to file the required financial interest statement will be considered in violation of the act and 19.8 NMAC Parts 1-35 and will be subject to removal from his or her position, if 90 days after an employee is notified by the director to take remedial action, the employee is not in compliance with the requirements of the act and 19.8 NMAC Parts 1-35.

C. Who shall file.

(1) Any employee who performs any function or duty under the act is required to file a statement of employment and financial interests.

(2) The director shall prepare and submit to the director of the office of surface mining an initial listing of positions that do not involve performance or any functions or duties under the act within 60 days of the effective date of 19.8 NMAC Parts 1-35.

(3) The director shall annually review and update this listing. For monitoring and reporting reasons, the listing must be submitted to the director of the office of surface mining and must contain a written justification for inclusions of the positions

listed. Proposed revisions or a certification that revision is not required shall be submitted to the director of the office of surface mining by no later than January 1 of each year.

(4) The director may revise the listing by the addition or deletion of positions at any time he determines such revisions are required to carry out the purpose of the act or 19.8 NMAC Parts 1-35.

D. Where to file.

(1) The director shall file his statement with the director of the office of surface mining.

(2) All other employees shall file their statement with the director.

E. What to report.

(1) Each employee shall report all information required on the statement of employment and financial interests of the employee, his or her spouse, minor children, or other relatives who are full-time residents of the employee's home. The reports shall be on OSM form 705-1. The statement consists of three major parts:

(a) a listing of all financial interests, including employment, security, real property, creditor and other financial interests held during the course of the preceding year;

(b) a certification that none of the listed financial interests represent a direct or indirect financial interest in any surface coal mining operation except as specifically identified and described by the employee as part of the certificate; and

(c) a certification by the reviewer that the form was reviewed, that prohibited interests have been resolved, and that no other prohibited interests have been identified from the statement.

(2) An employee is expected to:

(a) have complete knowledge of his or her personal involvement in business enterprises such as a sole proprietorship and partnership, his or her outside employment and the outside employment of the spouse and other covered relatives; and

(b) be aware of the information contained in the annual financial statement or other corporate or business reports routinely circulated to investors or routinely made available to the public.

(3) The exceptions shown in the employee's certification of the form must provide enough information for the director to determine the existence of a direct or indirect financial interest. Accordingly, the exceptions should:

(a) list the financial interests;

(b) show the number of shares, estimated value or annual income of the financial interests; and

(c) include any other information which the employee believes should be considered in determining whether or not the interest represents a prohibited interest.

F. Gifts and gratuities.

(1) Employees shall not solicit or accept, directly or indirectly, any gift, gratuity, favor, entertainment, loan or other thing of monetary value, from a coal company which:

(a) conducts or is seeking to conduct operations or activities that are regulated by the act; and

(b) has interests that may be substantially affected by the performance or non-performance of the employee's official duty.

(2) The prohibitions of this rule do not apply in the context of obvious family or personal relationships, such as those between parents, children, or spouse of the employee, and the employee, when the circumstances make it clear that it is those relationships rather than the business of the persons concerned which are the motivating factors. An employee may accept:

(a) food and refreshments of nominal value on infrequent occasions in the ordinary course of a luncheon, dinner, or other meeting where an employee may properly be in attendance; and

(b) unsolicited advertising or promotional material, such as pens, pencils, note pads, calendars and other items of nominal value.

[11-29-97; 19.8.1.109 NMAC - Rn, 19 NMAC 8.2.1.109, 9-29-2000; A, 1-15-2002]

19.8.1.110 COMPUTATION OF TIME:

A. Except as otherwise provided computation of time under the act and 19.8 NMAC Parts 1-35 is based on calendar days.

B. In computing any period of prescribed time, the day on which the designated period of time begins is not included. The last day of the period is included unless it is a

Saturday, Sunday, or legal holiday on which the director is not open for business, in which event the period runs until the end of the next day which is not a Saturday, Sunday, or legal holiday.

C. Intermediate Saturdays, Sundays, and legal holidays are excluded from the computation when the period of prescribed time is 7 days or less.

D. An operator's "mining year" shall be the calendar year.

[11-29-97; 19.8.1.110 NMAC - Rn, 19 NMAC 8.2.1.110, 9-29-2000; A, 1-15-2002]

19.8.1.111 EXEMPTION FOR COAL EXTRACTION INCIDENTAL TO GOVERNMENT-FINANCED HIGHWAY OR OTHER CONSTRUCTION:

A. Coal extraction which is an incidental part of government-financed construction is exempt from the act and 19.8 NMAC Parts 1-35.

B. Any person who conducts or intends to conduct coal extraction which does not satisfy Subsection A of 19.8.1.111 NMAC shall not proceed until a permit has been obtained from the director.

C. Any person extracting coal incident to government-financed highway or other construction who extracts more than 250 tons of coal or affects more than two acres shall maintain, on the site of the extraction operation and available for inspection, documents which show:

(1) a description of the construction project;

(2) the exact location of the construction, right-of-way or the boundaries of the area which will be directly affected by the construction; and

(3) the government agency which is providing the financing and the kind and amounts of public financing, including the percentage of the entire construction costs represented by the government financing.

[11-29-97; 19.8.1.111 NMAC - Rn, 19 NMAC 8.2.1.111, 9-29-2000; A, 1-15-2002]

PART 2: AREAS DESIGNATED BY ACTS OF CONGRESS

19.8.2.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.2.1 NMAC - N, 9-29-2000]

19.8.2.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.2.2 NMAC - N, 9-29-2000]

19.8.2.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979.)

[19.8.2.3 NMAC - N, 9-29-2000]

19.8.2.4 DURATION:

Permanent.

[19.8.2.4 NMAC - N, 9-29-2000]

19.8.2.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.2.5 NMAC - N, 9-29-2000]

19.8.2.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.2.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.2.7 DEFINITIONS:

[RESERVED]

[19.8.2.7 NMAC - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.2.8-19.8.2.199 [RESERVED]:

[19.8.2.8 - 19.8.2.199 NMAC - N, 9-29-2000]

19.8.2.200 LANDS UNSUITABLE:

The director shall determine whether:

A. an application for a permit must be denied, limited or conditioned, because surface coal mining operations on those lands are prohibited or limited by Section 69-25A-26 NMSA 1978 of the act, and 19.8.2 NMAC;

B. an applicant for a permit covering such lands either had any valid existing rights on August 3, 1977, or was conducting a surface coal mining operation on those lands on August 3, 1977.

[11-29-97; 19.8.2.200 NMAC - Rn 19 NMAC 8.2.2.200, 9-29-2000]

19.8.2.201 AREAS WHERE MINING IS PROHIBITED OR LIMITED:

Subject to valid existing rights, no surface coal mining operations shall be conducted after August 3, 1977, unless those operations existed on the date of enactment:

A. on any lands which will adversely affect any publicly owned park or any places included on the national register of historic places, unless approved jointly by the director, and the federal, state or local agency with jurisdiction over the park or places;

B. within 100 feet measured horizontally of the outside right-of-way line of any public road except:

(1) where mine access roads or haulage roads join such right-of-way line; or

(2) where the director allows the public road to be relocated or the area affected to be within 100 feet of such road, after:

(a) public notice and opportunity for a public hearing in accordance with Subsection D of 19.8.2.202 NMAC; and

(b) making a written finding that the interests of the affected public and landowners will be protected;

C. within 300 feet measured horizontally from any occupied dwelling, unless the owner thereof has provided a written waiver consenting to surface coal mining operations closer than 300 feet, or unless an access or haul road connects with an existing public road on the side of the public road opposite the dwelling;

D. within 300 feet measured horizontally of any public building, school, church, community or institutional building or public park; or

E. within 100 feet measured horizontally of a cemetery; this prohibition does not apply if the cemetery is relocated in accordance with all applicable laws and regulations;

F. on any lands within the boundaries of:

- (1)** the national park system;
- (2)** the national wildlife refuge system,
- (3)** the national system of trails, the national wilderness preservation system;
- (4)** the wild and scenic rivers system, including study rivers designated under Section 5(a) of the Wild and Scenic Rivers Act 16 U.S.C. 1276(a) or study rivers or study river corridors as established in any guidelines pursuant to that act, and national recreation areas designated by act of congress;

(5) federal lands within a national forest; this prohibition does not apply if the secretary of interior finds that there are no significant recreational, timber, economic, or other values that may be incompatible with surface coal mining operations; and:

(a) any surface operations and impacts will be incident to an underground coal mine; or

(b) with respect to lands that do not have significant forest cover within national forests west of the 100th meridian, the secretary of agriculture has determined that surface mining is in compliance with the act, the Multiple-Use Sustained Yield Act of 1960, 16 U.S.C. 528-531; the Federal Coal Leasing Amendments Act of 1975, 30 U.S.C. 181 et seq.; and the National Forest Management Act of 1976, 16 U.S.C. 1600 et seq.

[11-29-97; 19.8.2.201 NMAC - Rn 19 NMAC 8.2.2.201, 9-29-2000; A, 1-15-2002; A, 12-31-2007]

19.8.2.202 PROCEDURES:

A. Upon receipt of a complete application for a surface coal mining and reclamation operations permit, the director shall review the application to determine whether surface coal mining operations are limited or prohibited under 19.8.2.201 NMAC on the lands which would be disturbed by the proposed operation.

B. The director must reject any portion of the application that would locate surface coal mining operations on land protected under 19.8.2.201 NMAC unless:

(1) the site qualifies for the exception for existing operations under 19.8.2.203 NMAC;

(2) a person has valid existing rights for the land, as determined under 19.8.35 NMAC;

(3) the applicant obtains a waiver or exception from the prohibitions of 19.8.2.201 NMAC in accordance with Subsections D, E and G of 19.8.2.202 NMAC.

C. If the director is unable to determine whether the proposed operation is located within the boundaries of any of the lands listed in Subsection F of 19.8.2.201 NMAC or closer than the limits provided in Subsections D and E of 19.8.2.201 NMAC, the director shall transmit a copy of the relevant portions of the permit application to the appropriate federal, state or local government agency for a determination or clarification of the relevant boundaries or distances, with a notice to the appropriate agency that it has 30 days from receipt of the request in which to respond. The national park service or the U.S. fish and wildlife service shall be notified of any request for a determination of valid existing rights pertaining to areas within the boundaries of areas under their jurisdiction and shall have 30 days from receipt of the notification in which to respond. The director, upon request by the appropriate agency, shall grant an extension to the 30-day period of an additional 30 days. If no response is received within 30-day period or within the extended period granted, the director may make the necessary determination based on the information he has available.

D. Where the proposed mining operation is to be conducted within 100 feet measured horizontally of the outside right-of-way line of any public road (except where mine access roads or haulage roads join such right-of-way line) or where the applicant proposes to relocate or close any public road, the director shall:

(1) require the applicant to obtain necessary approvals of the authority with jurisdiction over the public road;

(2) provide notice in a newspaper of general circulation in the affected locale of a public hearing at least 2 weeks before the hearing;

(3) hold a public hearing in the locality of the proposed mining operations where any member of the public may participate for the purpose of determining whether the interests of the public and affected landowners will be protected; and

(4) make a written finding based upon information received at the public hearing within 30 days after completion of the hearing as to whether the interests of the public and affected landowners will be protected from the proposed mining operations.

E. Where the proposed surface coal mining operations would be conducted within 300 feet measured horizontally of any occupied dwelling, the applicant shall submit with the application a written waiver from the owner of the dwelling, consenting to such operations within a closer distance of the dwelling as specified in the waiver. The waiver must clarify that the owner and signatory had the legal right to deny mining and knowingly waived that right.

(1) A new waiver is not required if an effective waiver from the owner of the occupied building exists at the time of the application.

(2) A valid waiver will remain effective against subsequent purchasers who had actual or constructive knowledge of the existing waiver at the time of purchase. A subsequent purchaser will be deemed to have constructive knowledge if the waiver has been properly filed in public property records pursuant to New Mexico law or if surface coal mining operations have entered the 300-foot zone before the date of purchase.

F. Review by other agencies.

(1) Where the proposed surface coal mining operations may adversely affect any public park or any places included on the national register of historic places, the director shall transmit to the federal, state or local agencies with jurisdiction over a statutory or regulatory responsibility for the park or historic place a copy of the completed permit application containing the following:

(a) a request for that agency's approval or disapproval of the operations, including a copy of applicable parts of the permit application;

(b) a notice to the appropriate agency that it must respond within 30 days from receipt of the request, with a notice that another 30 days is available upon request;

(c) the notice will also state that failure to interpose an objection within the time specified under Subparagraph (b) of Paragraph (1) of Subsection F of 19.8.2.202 NMAC will constitute approval of the proposed operation.

(2) A permit for the operation shall not be issued unless jointly approved by all affected agencies.

(3) Paragraphs (1) and (2) of Subsection F of 19.8.2.202 NMAC do not apply to:

(a) lands for which a person has valid existing rights, as determined under 19.8.35 NMAC;

(b) lands within the scope of the exception for existing operations in 19.8.2.203 NMAC.

G. When a new surface coal mining operation or boundary revision for an existing surface coal mining operation is proposed that will include federal lands within a national forest, the director may not issue the permit or approve the boundary revision before the secretary of the interior makes a finding based on information submitted pursuant to 30 CFR Part 761.13.

H. If the director determines that the proposed surface coal mining operation is not prohibited under Section 69-25A-26 NMSA 1978 of the act, and this part, it may nevertheless, pursuant to appropriate petitions, designate such lands as unsuitable for

all or certain types of surface coal mining operations pursuant to 19.8.3 and 19.8.4 NMAC.

[11-29-97; 19.8.2.202 NMAC - Rn 19 NMAC 8.2.2.202, 9-29-2000; A, 1-15-2002; A, 12-31-2007]

19.8.2.203 EXCEPTION FOR EXISTING OPERATIONS:

The prohibitions and limitations of 19.8.2.201 NMAC do not apply to:

A. surface coal mining operations for which a valid permit, issued by the director under 19.8 NMAC Parts 1-35, exists when the land comes under the protection of 19.8.2.201 NMAC; this exception applies only to lands within the permit area as it exists when the land comes under the protection of 19.8.2.201 NMAC;

B. with respect to operations existing prior to August 3, 1977, lands upon which validly authorized surface coal mining operations existed when the land comes under the protection of 1978 NMSA 69-25A et seq. and 19.8.2.201 NMAC.

[19.8.2.203 NMAC - N, 1-15-2002]

PART 3: CRITERIA FOR DESIGNATING AREAS AS UNSUITABLE FOR SURFACE COAL MINING OPERATIONS

19.8.3.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.3.1 NMAC - N, 9-29-2000]

19.8.3.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.3.2 NMAC - N, 9-29-2000]

19.8.3.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[19.8.3.3 NMAC - N, 9-29-2000]

19.8.3.4 DURATION:

Permanent.

19.8.3.4 NMAC - [N, 9-29-2000]

19.8.3.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.3.5 NMAC - N, 9-29-2000]

19.8.3.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.3.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.3.7 DEFINITIONS:

[RESERVED]

[19.8.3.7 NMAC - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.3.8-19.8.3.299 [RESERVED]:

[19.8.3.8 - 19.8.3.299 - N, 9-29-2000]

19.8.3.300 CRITERIA FOR DESIGNATING LANDS AS UNSUITABLE:

A. Upon petition an area shall be designated as unsuitable for all or certain types of surface coal mining operations, if the director determines that reclamation is not technologically and economically feasible under the act and 19.8.1 through 19.8.35 NMAC.

B. Upon petition an area may be (but is not required to be) designated as unsuitable for certain types of surface coal mining operations, if the operations will:

- (1) be incompatible with existing state or local land use plans or programs;
- (2) affect fragile or historic lands in which the operations could result in significant damage to important historic, cultural, scientific, or aesthetic values or natural systems;

(3) affect renewable resource lands in which the operations could result in a substantial loss or reduction of long-range productivity of water supply or of food or fiber products; or

(4) affect natural hazard lands in which the operations could substantially endanger life and property, such lands to include areas subject to frequent flooding and areas of unstable geologic formations.

C. Pursuant to appropriate petitions, lands listed in 19.8.2 NMAC are subject to designation as unsuitable for all or certain types of surface coal mining operations under 19.8.3.300 NMAC.

[11-29-97; 19.8.3.300 NMAC - Rn, 19 NMAC 8.2.3.200, 9-29-2000; A, 01-15-2002]

19.8.3.301 LAND EXEMPT FROM DESIGNATION AS UNSUITABLE FOR SURFACE COAL MINING OPERATIONS:

The requirements of 19.8.3 NMAC do not apply to:

A. lands on which surface coal mining operations were being conducted on August 3, 1977;

B. lands covered by a permit issued under the act; or

C. lands where substantial legal and financial commitments in surface coal mining operations were in existence prior to January 4, 1977.

[11-29-97; 19.8.3.301 NMAC - Rn, 19 NMAC 8.2.3.301, 9-29-2000]

19.8.3.302 EXPLORATION ON LAND DESIGNATED AS UNSUITABLE FOR SURFACE COAL MINING OPERATIONS:

Designation of any area as unsuitable for all or certain types of surface coal mining operations pursuant to Section 69-25A-26 NMSA 1978 of the act and regulations of 19.8.2 through 19.8.4 NMAC, does not prohibit coal exploration operations in the area, if conducted in accordance with the act, 19.8.1 through 19.8.35 NMAC, and other applicable requirements. Exploration operations on any lands designated unsuitable for surface coal mining operations must be approved by the director under 19.8.6 NMAC to insure that exploration does not interfere with any value for which the area has been designated unsuitable for surface coal mining.

[11-29-97; 19.8.3.302 NMAC - Rn, 19 NMAC 8.2.3.302, 9-29-2000; A, 1-15-2002]

PART 4: PROCESS FOR DESIGNATING LANDS UNSUITABLE FOR SURFACE COAL MINING OPERATIONS

19.8.4.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.4.1 NMAC - N, 9-29-2000]

19.8.4.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.4.5 NMAC - N, 9-29-2000]

19.8.4.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.4.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.4.7 DEFINITIONS:

[RESERVED]

[19.8.4.7 NMAC - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.4.8-19.8.4.399 [RESERVED]:

[19.8.4.8 - 19.8.4.399 - N, 9-29-2000]

19.8.4.400 PROCEDURES: PETITIONS:

A. Right to petition. Any person having an interest which is or may be adversely affected has the right to petition the director to have an area designated as unsuitable for surface coal mining operations, or to have an existing designation terminated.

B. Designation. The only information that a petitioner need provide is:

- (1) the location and size of the area covered by the petition;
- (2) allegations of facts and supporting evidence which would tend to establish that the area is unsuitable for all or certain types of surface coal mining operations;
- (3) a description of how mining of the area has affected or may adversely affect people, land, air, water or other resources;
- (4) the petitioner's name, address and telephone number; and
- (5) identification of the petitioner's interest which is or may be adversely affected.

C. Termination. The only information that a petitioner need provide to terminate a designation is:

- (1) the location and size of the area covered by the petition;
- (2) allegation of facts, with supporting evidence, not contained in the record of the proceeding in which the area was designated unsuitable, which would tend to establish the statements or allegations, and which statements or allegations indicate that the designation should be terminated based on:
 - (a) the nature or abundance of the protected resource or condition or other basis of the designation if the designation was based on criteria found in Subsection B of 19.8.3.300 NMAC;
 - (b) reclamation now being technologically and economically feasible, if the designation was based on the criteria found in Subsection A of 19.8.3.300 NMAC;
 - (c) the resources or condition not being affected by surface coal mining operations, or in the case of land use plans, not being incompatible with surface coal

mining operations during and after mining, if the designation was based on the criteria found in Subsection B of 19.8.3.300 NMAC.

(3) the petitioner's name, address and telephone number; and

(4) identification of the petitioner's interest which is or may be adversely affected by the continuation of the designation.

[11-29-97; 19.8.4.400 NMAC - Rn, 19 NMAC 8.2.4.400, 9-29-2000]

19.8.4.401 PROCEDURES: INITIAL PROCESSING, RECORD-KEEPING AND NOTIFICATION REQUIREMENTS:

A. Initial processing.

(1) Within 30 days of receipt of a petition, the director shall notify the petitioner by certified mail whether or not the petition is complete under Subsection B of 19.8.4.400 NMAC or Subsection C of 19.8.4.400 NMAC.

(2) The director shall determine whether any identified coal resources exist in the area covered by the petition, without requiring any showing from the petitioner. If the director finds there are not any identified coal resources in that area, he shall return the petition to the petitioner with a statement of the findings.

(3) The director may reject petitions for designations or terminations of designations which are frivolous. Once the requirements of 19.8.4.400 NMAC are met, no party shall bear any burden of proof, but each accepted petition shall be considered and acted upon by the director pursuant to the procedures of this part.

(4) When considering a petition for an area which was previously and unsuccessfully proposed for designation, the director shall determine if the new petition presents new allegations of facts. If the petition does not contain new allegations of facts, the director shall not consider the petition and shall return the petition to the petitioner, with a statement of his findings and a reference to the record of the previous designation proceedings where the facts were considered.

(5) If the director determines that the petition is incomplete or frivolous, he shall return the petition to the petitioner, with a written statement of the reasons for the determination and the categories of information needed to make the petition complete.

(6) The director shall notify the person who submits a petition of any application for a permit received which proposes to include any area covered by the petition.

(7) Any petitions received after the close of the public comment period on a permit application relating to the same mine plan area shall not prevent the director from

issuing a decision on that permit application. The director may return any petition received thereafter to the petitioner with a statement why the director cannot consider the petition. For the purposes of this section, close of the public comment period shall mean at the close of any informal conference held under 19.8.11.1103 NMAC, or, if no conference is requested, at the close of the period for filing written comments and objections under 19.8.11.1101 and 1102 NMAC.

B. Public notice.

(1) Promptly after a petition is received, the director shall notify the general public of the receipt of the petition and request submissions of relevant information by a newspaper advertisement placed once a week for two consecutive weeks in a newspaper of general circulation in the county or counties in the area covered by the petition.

(2) Within three weeks after the determination that a petition is complete, the director shall circulate copies of the petition to, and request submissions of relevant information from other interested governmental agencies, the petitioner, intervenors, persons with an ownership interest of record in the property, other persons known to the director to have an interest in the property, and shall notify the general public, through the publication of a notice in the New Mexico state register, of the receipt of a petition to designate lands unsuitable for mining.

(3) Within three weeks after the determination that a petition is complete, the director shall notify the general public of the receipt of the petition and request submissions of relevant information by a newspaper advertisement placed once a week for two consecutive weeks in a newspaper of general circulation in the county or counties in the area covered by the petition.

C. Until three days before the director holds a hearing under 19.8.4.402 NMAC, any person may intervene in the proceeding by filing allegations of facts, supporting evidence, a short statement identifying the petition to which the allegations pertain, and the intervenor's name, address and telephone number.

D. Beginning immediately after a complete petition is filed, the director shall compile and maintain a record consisting of all documents relating to the petition filed with or prepared by the director. The director shall make the record available for public inspection free of charge, and copying at reasonable cost, during all normal business hours.

[11-29-97; 19.8.4.401 NMAC - Rn, 19 NMAC 8.2.4.401, 9-29-2000; A, 12-31-2007]

19.8.4.402 PROCEDURES: HEARING REQUIREMENTS:

A. Within 10 months after receipt of a complete petition, the director shall hold a public hearing in the locality of the area covered by the petition. If all petitioners and

intervenors agree, the hearing need not be held. The director shall make a verbatim transcript of the hearing.

B. Notification requirements.

(1) The director shall give notice of the date, time, and location of the hearing to:

(a) local, state, and federal agencies which may have an interest in the decision on the petition;

(b) the petitioner and the intervenors; and

(c) any person with an ownership or other interest known to the director in the area covered by the petition.

(2) Notice of the hearing shall be sent by certified mail and postmarked not less than 30 days before the scheduled date of the hearing.

C. The director shall notify the general public of the date, time, and location of the hearing by placing a newspaper advertisement in the newspaper of general circulation in the county of the proposed surface coal mining and reclamation operations once a week for 2 consecutive weeks and once during the week prior to the scheduled date of the public hearing. The consecutive weekly advertisement must begin not more than 60 nor less than 30 days before the scheduled date of the public hearing.

D. The director may consolidate in a single hearing the hearings required for each of several petitions which relate to areas in the same locale.

E. Prior to designating any land areas as unsuitable for surface coal mining operations, the director shall prepare a detailed statement, using existing and available information on the potential coal resources of the area, the demand for coal resources, and the impact of such designation on the environment, the economy, and the supply of coal.

F. In the event that all petitioners and intervenors stipulate agreement prior to the hearing, the petition may be withdrawn from consideration.

[11-29-97; 19.8.4.402 NMAC - Rn, 19 NMAC 8.2.4.402, 9-29-2000; A, 12-31-2007]

19.8.4.403 PROCEDURES: DECISIONS:

A. In reaching his decision, the director shall use:

(1) the information contained in the data base and inventory system;

- (2) information provided by other governmental agencies;
 - (3) the detailed statement prepared under Subsection E of 19.8.4.402 NMAC;
- and
- (4) any other relevant information submitted during the comment period.

B. A final written decision shall be issued by the director, including a statement of reasons, within 60 days of completion of the public hearing, or, if no public hearing is held, then within 12 months after receipt of the complete petition. The director shall simultaneously send the decision by certified mail to the petitioner, every other party to the proceeding, and to the regional director of the office of surface mining and reclamation for this region.

C. The decision of the director with respect to a petition, or the failure of the director to act within the time limits set forth in 19.8.403 NMAC, shall be subject to administrative and judicial review in accordance with Sections 69-25A-29 and 69-25A-30 NMSA 1978.

[11-29-97; 19.8.4.403 NMAC - Rn, 19 NMAC 8.2.4.403, 9-29-2000]

19.8.4.404 DATABASE AND INVENTORY SYSTEM REQUIREMENTS:

A. The director shall develop a data base and inventory system which will permit evaluation of whether reclamation is feasible in areas covered by petitions.

B. The director shall include in the system information relevant to the criteria in 19.8.3.300 NMAC including, but not limited to, information received from the United States fish and wildlife service, the state historic preservation officer, and the agency administering Section 127 of the Clean Air Act, as amended.

C. The director shall add to the data base and inventory system information:

(1) on potential coal resources of the State, demand for those resources, the environment, the economy and the supply of coal, sufficient to enable the director to prepare the statements required by Subsection E of 19.8.4.402 NMAC; and

(2) that becomes available from petitions, publications, experiments, permit applications, mining and reclamation operations, and other sources.

[11-29-97; 19.8.4.404 NMAC - Rn, 19 NMAC 8.2.4.404, 9-29-2000]

19.8.4.405 PUBLIC INFORMATION:

The director shall:

A. make the information and data base system developed under 19.8.4.404 NMAC available to the public for inspection free of charge and for copying at reasonable cost;

B. provide information to the public on the petition procedures necessary to have an area designated as unsuitable for all or certain types of surface coal mining operations or to have designations terminated and describe how the inventory and data base system can be used.

[11-29-97; 19.8.4.405 NMAC - Rn, 19 NMAC 8.2.4.405, 9-29-2000]

19.8.4.406 DIRECTOR'S RESPONSIBILITY FOR IMPLEMENTATION:

A. The director shall not issue permits which are inconsistent with designations made pursuant to 19.8.2, 19.8.3 or 19.8.4 NMAC.

B. The director shall maintain a map of areas designated as unsuitable for all or certain types of surface coal mining operations.

C. The director shall make available to any person any information within his control regarding designations, including mineral or elemental content which is potentially toxic in the environment but excepting proprietary information relating to the coal to the extent consistent with the act.

[11-29-97; 19.8.4.406 NMAC - Rn, 19 NMAC 8.2.4.406, 9-29-2000]

PART 5: GENERAL REQUIREMENTS FOR PERMITS AND PERMIT APPLICATIONS

19.8.5.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.5.1 NMAC - N, 9-29-2000]

19.8.5.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections.

[19.8.5.2 NMAC - N, 9-29-2000]

19.8.5.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[19.8.5.3 NMAC - N, 9-29-2000]

19.8.5.4 DURATION:

Permanent.

[19.8.5.4 NMAC - N, 9-29-2000]

19.8.5.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.5.5 NMAC - N, 9-29-2000]

19.8.5.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.5.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.5.7 DEFINITIONS:

[RESERVED]

[19.8.5.7 NMAC - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.5.8-19.8.5.499 [RESERVED]:

[19.8.5.8 - 19.8.5.499 - N, 9-29-2000]

19.8.5.500 GENERAL REQUIREMENTS FOR PERMITS: OPERATORS:

Except as provided for in Subsection A of 19.8.5.501 NMAC on and after 8 months from the date on which a regulatory program for the state is approved by the secretary of the U.S. department of interior, no person shall engage in or carry out surface coal mining and reclamation operations on non-federal lands within the state, unless that person has first obtained a valid permit issued by the director under the approved program.

[11-29-97; 19.8.5.500 NMAC - Rn 19 NMAC 8.2.5.500, 9-29-2000]

19.8.5.501 CONTINUED OPERATION UNDER INTERIM PERMITS:

A person conducting surface coal mining operations under a permit issued pursuant to Laws 1972, Chapter 68, as amended, or issued by the director pursuant to the act, prior to the effective date of an approved program may conduct these operations beyond the period prescribed in 19.8.5.500 NMAC, if:

A. timely and complete application for a permit under the approved program has been made to the director in accordance with the provisions of the act, and 19.8 NMAC Parts 1-35;

B. the director has not yet rendered an initial decision with respect to such application; and

C. the operations are conducted in compliance with all terms and conditions of the interim permit, the requirements of the act, and 19.8 NMAC Parts 1-35.

[11-29-97; 19.8.5.501 NMAC - Rn 19 NMAC 8.2.5.501, 9-29-2000; A, 1-15-2002]

19.8.5.502 CONTINUED OPERATION UNDER FEDERAL PROGRAM PERMITS:

A permit issued by the office of surface mining and reclamation pursuant to a federal program for a state shall be valid under any superseding state program approved by the secretary of the U.S. department of interior.

A. The federal permittee shall have the rights to apply to the state director for a state permit to supersede the federal permit.

B. The director may review a permit issued pursuant to the superseded federal program, to determine that the requirements of the act and 19.8 NMAC Parts 1-35 are not violated by the federal permit.

C. To the extent that the approved state program contains additional requirements not contained in the federal program for the state, the director shall:

(1) promptly issue an order requiring the permittee to comply with such additional requirements within 60 days of the issuance of the order, unless the permittee demonstrates to the director that it is physically impossible to meet those additional requirements within 60 days, or unless the director agrees to a longer period under an established time schedule; and

(2) notify the permittee, in writing, of the right to a hearing with respect to the order in the manner and time provided for in the act and 19.8 NMAC Parts 1-35.

[11-29-97; 19.8.5.502 NMAC - Rn 19 NMAC 8.2.5.502, 9-29-2000; A, 1-15-2002]

19.8.5.503 COMPLIANCE WITH PERMITS:

All persons shall conduct surface coal mining and reclamation operations under permits issued pursuant to the act and 19.8 NMAC Parts 1-35, and shall comply with the terms and conditions of the permit and the requirements of the act and 19.8 NMAC Parts 1-35.

[11-29-97; 19.8.5.503 NMAC - Rn 19 NMAC 8.2.5.503, 9-29-2000; A, 1-15-2002]

19.8.5.504 PERMIT APPLICATION FILING DEADLINES:

A. Not later than two (2) months following approval of the state program by the secretary of the U.S. department of interior, each person who conducts or expects to conduct surface coal mining and reclamation operations after the expiration of eight (8) months from that approval shall file an application for a permit for these operations.

B. Permit renewals and revisions.

(1) An application for renewal of a permit shall be filed with the director at least 120 days before the expiration of the permit involved.

(2) Any application for revision of a permit shall be filed with the director before the date on which the permittee expects to revise surface coal mining or reclamation operations. After filing of such application, the director shall determine the time by which that application shall be approved or disapproved, based on the time required for review of the application and public participation in the process of review.

C. Any application for a new permit required for a person succeeding by transfer, sale, or assignment of rights granted under a permit shall be filed with the director not later than 30 days after that succession is approved by the director.

[11-29-97; 19.8.5.504 NMAC - Rn 19 NMAC 8.2.5.504, 9-29-2000; A, 12-31-2007]

19.8.5.505 PERMIT APPLICATIONS: GENERAL REQUIREMENTS FOR FORMAT AND CONTENTS:

A. Applications for permits to conduct surface coal mining and reclamation operations shall be filed in the format required by the director. The application shall be complete and include, at a minimum, for surface mining activities, all the applicable information required under 19.8.7, 19.8.8 and 19.8.9 NMAC and for special types of surface coal mining and reclamation operations, all the information required under 19.8.10 NMAC.

B. Information set forth in the application shall be current, presented clearly and concisely, and supported by appropriate references to technical and other written material available to the director.

C. All technical data submitted to the application shall be accompanied by:

- (1) names of persons or organizations which collected and analyzed such data;
- (2) dates of the collection and analyses;
- (3) descriptions of methodology used to collect and analyze the data; and
- (4) the application shall contain a bibliography of published and unpublished material used and names, addresses and telephone numbers of persons providing information through personal communication.

D. Maps and plans - general requirements.

(1) Maps submitted with applications shall be presented in a consolidated format, to the extent possible, and shall include all the types of information that are set forth on topographic maps of the U.S. geological survey of the 1:24,000 scale series. Maps of the permit area shall be at a scale of 1:6,000 or larger. Maps of the remainder of the mine plan area and the adjacent areas shall clearly show the lands and waters within those areas and be in a scale determined by the director, but in no event smaller than 1:24,000.

(2) All maps and plans submitted with the application shall distinguish among each of the phases during which surface coal mining operations were or will be conducted at any place within the mine plan area. At a minimum, distinctions shall be clearly shown among those portions of the mine plan area in which surface coal mining operations occurred:

(a) prior to August 3, 1977;

(b) after August 3, 1977 and prior to either:

(i) May 3, 1978;

(ii) in the case of an applicant or operator which obtained a small operator's exemption in accordance with 30 CFR 710.12 January 1, 1979;

(c) after May 3, 1978 (or January 1, 1979, for persons who received a small operator's exemption) and prior to the approval of the regulatory program;

(d) after the estimated date of issuance of a permit by the director.

[11-29-97; A, 12-15-99; 19.8.5.505 NMAC - Rn, 19 NMAC 8.2.5.505, 9-29-2000]

19.8.5.506 PERMIT AND EXPLORATION FEES:

Each application, pursuant to the act and 19.8 NMAC Parts 1-35 shall be accompanied by a fee determined under the following schedule:

A. Original permit filing fee shall be \$2,500 plus \$25.00 per acre for estimated area to be disturbed during the first year of mining.

B. Commencing the second year the annual permit fee shall be \$2,500. In addition, there shall be an acreage fee of \$25.00 per acre of disturbed permit area for which the bond has not been released, provided that \$15,000 per year acreage fee is the maximum charge per year for all disturbance. The maximum annual fee will therefore be:

Permit fee = \$2,500

Acreage fee = \$15,000

Max. Total = \$17,500

The annual fee is to be submitted with the annual report.

C. Pending further study, the initial annual acreage fee shall not be collected for acres classified as disturbed, when disturbance is due to subsidence associated with underground mining, unless it is determined by the director that such subsidence causes significant environmental damage to the surrounding area.

D. The fee for transferring a permit shall be \$1,000.

E. For revision applications expanding the size of the permit the fee shall be \$4,000 plus \$25.00 per acre for the estimated area to be disturbed during the first year of mining in the expansion area. For all other revision applications the fee shall be \$4,000.

F. The fee for filing a notice of intention to explore under 19.8.6.601 NMAC shall be \$100.

G. The fee for filing an application for approval under 19.8.6.602 NMAC shall be \$200.

[11-29-97; 19.8.5.506 NMAC - Rn, 19 NMAC 8.2.5.506, 9-29-2000; A, 1-15-2002; A, 7-30-2004]

19.8.5.507 ANNUAL REPORT:

A. By March 1 of each year, the operator shall submit to the director a report, setting out in detail the measures taken to effect reclamation of the affected area during the previous calendar year. The report must be typewritten and signed by the operator. The report must include the following information:

(1) a current topographic or orthophotographic map with 5' contour intervals. The map shall be the same scale as the mining and reclamation sequence maps found in the approved permit with 5' contour intervals. The map must be made on a single sheet, or series of sheets, each sheet of the map being no larger than 4' x 4'. The scale and all lines and symbols must be clearly described in the legend.

(2) The first annual report map under this rule shall show the following, and each subsequent map shall show all information from the immediately preceding year's map in addition to any changes in:

- (a)** current permit boundary.
- (b)** maintenance buildings, office buildings, and storage areas.
- (c)** petroleum and industrial chemical storage areas.
- (d)** surface and underground storage tanks.
- (e)** public roads and primary and auxiliary roads within the permit.
- (f)** perennial and major intermittent and ephemeral streams, lakes, springs, and other natural bodies of water.
- (g)** sediment ponds, other approved impoundments, and diversions (the sediment ponds should be identified by the same system used in the mine plan or modification to the mine plan).
- (h)** rail facilities.
- (i)** coal processing, storage, and loading facilities within the permit area.
- (j)** sewage treatment plants, fields, or ponds.
- (k)** coal waste disposal areas; other waste disposal areas.
- (l)** section corners, or grid coordinates.
- (m)** locations of water monitoring points (wells, stream sample point, and point source discharges) with NPDES permit number (these should correspond to identification systems used in the mine plan).
- (n)** topdressing stockpiles (these should correspond to mine plan system of identification).

(o) buffer zones. Any area that is required to be left undisturbed to protect pre-mine features of the landscape, or any area (disturbed or undisturbed) that is purposely established to separate different phases of the coal mining operation.

(p) all pits (named or numbered) as presented in the mine plan or modifications to the mine plan.

(q) all areas that have been reseeded (indicate initial year of seeding and last year of reseeding).

(r) areas on which grading was completed during the report year (with each individual area indicate the acreage).

(s) areas that were first disturbed during the report year (within each individual area indicate the acreage).

(t) areas governed by the following regulatory performance standards:

(i) pre 79-1

(ii) 79-1

(iii) 80-1

(u) areas currently under bond and bond release status of each area.

(3) Three copies of the annual report including maps shall be submitted.

B. The annual report shall include:

(1) a list of all permit special conditions and brief indication of the status of each, including those from the 79-1 and 80-1 permits. This requirement may be waived, in part or in full, by the director.

(2) a summary of any required wildlife and vegetation data collected during the report year.

(3) the total number of acres:

(a) initially disturbed during the report year.

(b) that will require backfilling and/or grading but that were not graded as of December 31, of the report year.

(c) that were backfilled and graded during the report year.

(d) that were topdressed during the report year.

(e) that will eventually require topdressing but that were not topdressed as of December 31, of the report year.

(f) that were seeded during the report year with permanent reclamation seed mix, and temporary stabilization seed mix that will eventually require revegetation but that were not revegetated as of December 31, of the report year.

(g) of topdressed and seeded areas that were redisturbed by mining and reclamation operations during the report year. Briefly state the reason for each case of redisturbance (operation change, violation abatement, etc.).

(h) currently under bond for each bond release status, as shown on the map.

(4) a summary and discussion of specific efforts initiated or completed to enhance, restore, or protect wildlife and wildlife habitat.

(5) a mass balance which indicates the amount of topdressing available and the amount of topdressing needed covering the term of the permit.

C. An annual report may include a brief description of modifications or revisions to be submitted to MMD for approval during the year previous to the next annual report.

[11-29-97; 19.8.5.507 NMAC - Rn, 19 NMAC 8.2.5.507 & A, 9-29-2000]

19.8.5.508 VERIFICATION OF APPLICATION:

Applications for permits shall be verified under oath, by a responsible official of the applicant, that the information contained in the application is true and correct to the best of the official's information and belief.

[11-29-97; 19.8.5.508 NMAC - Rn, 19 NMAC 8.2.5.508, 9-29-2000]

PART 6: GENERAL REQUIREMENTS FOR COAL EXPLORATION

19.8.6.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.6.1 - N, 9-29-2000]

19.8.6.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.6.2 - N, 9-29-2000]

19.8.6.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[19.8.6.3 - N, 9-29-2000]

19.8.6.4 DURATION:

Permanent.

[19.8.6.4 - N, 9-29-2000]

19.8.6.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.6.5 - N, 9-29-2000]

19.8.6.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.6.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.6.7 DEFINITIONS:

[RESERVED]

[19.8.6.7 - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.6.8-19.8.6.599 [RESERVED]:

[19.8.6.8 - 19.8.6.599 - N, 9-29-2000]

19.8.6.600 GENERAL REQUIREMENTS:

Any person who intends to conduct coal exploration activities outside a permit area on lands designated as unsuitable for surface mining under all of 19.8.2, 19.8.3 and 19.8.4

NMAC shall submit an application and shall obtain written approval from the director. Any person who receives approval from the director for such activities shall comply with 19.8.19 NMAC.

[11-29-97; 19.8.6.600 NMAC - Rn, 19 NMAC 8.2.6.600, 9-29-2000]

19.8.6.601 GENERAL REQUIREMENTS: EXPLORATION OF LESS THAN 250 TONS:

A. Any person who intends to conduct coal exploration during which less than 250 tons of coal will be removed in the area to be explored shall, prior to conducting the exploration, file with the director a written notice of intention to explore.

B. The notice shall include:

(1) the name, address, and telephone number of the person seeking to explore;

(2) the name, address, and telephone number of the representative who will be present at and responsible for conducting the exploration activities;

(3) a precise description and map at a scale of 1:24,000 or larger, of the exploration area;

(4) a statement of the period of intended exploration;

(5) a narrative description of the methods to be used to conduct coal exploration and reclamation, including, but not limited to, the types and uses of equipment, drilling, blasting, road or other access route construction, and excavated earth and other debris disposal activities.

(6) a description of the practices proposed to be followed to protect the environment from adverse impacts as a result of the exploration activities; and

(7) if the surface is owned by a person other than the person who intends to explore, a description of the basis upon which the person who will explore claims the right to enter such area for the purpose of conducting exploration and reclamation.

C. Any person who conducts coal exploration activities pursuant to this section which substantially disturbs the natural land surface shall comply with 19.8.19 NMAC.

D. The director shall, except as otherwise provided in 19.8.6.606 NMAC, place such notices on public file and make them available for public inspection and copying.

E. If the director does not act adversely on the notice of intent within 30 days the applicant may proceed with exploration.

F. A bond sufficient to assure that completion of reclamation of the area disturbed by the exploration activity may be required by the director in an amount determined pursuant to 19.8.14.1404 NMAC.

[11-29-97; 19.8.6.601 NMAC - Rn, 19 NMAC 8.2.6.601, 9-29-2000; A, 12-31-2007]

19.8.6.602 GENERAL REQUIREMENTS: EXPLORATION OF MORE THAN 250 TONS:

Any person who intends to conduct coal exploration in which more than 250 tons of coal are removed in the area to be explored, shall, prior to conducting the exploration, obtain the written approval of the director, accordance with the following:

A. Contents of application for approval. Each application for approval shall contain, at a minimum, the following information:

- (1)** the name, address, and telephone number of the applicant;
- (2)** the name, address, and telephone number of the representative of the applicant who will be present at and be responsible for conducting the exploration;
- (3)** an exploration and reclamation operations plan, including:
 - (a)** a narrative description of the proposed exploration area, cross-referenced to the map required under Paragraph (5) of Subsection A of 19.8.6.602 NMAC, including surface topography, geological, surface water, and other physical features, vegetative cover, the distribution and important habitats of fish, wildlife, and plants, including, but not limited to, any endangered or threatened species listed pursuant to the Endangered Species Act of 1973 (16 U.S.C. Sec. 1531 et. seq.), and the Wildlife Conservation Act, Sections 17-3-17 et. seq. NMSA 1978, the Habitat Protection Act, Sections 17-6-1 et seq. NMSA 1978, and the laws relating to the protection of native New Mexico plants including Section 76-8-1 through 76-8-4 NMSA 1978; districts, sites, buildings, structures or objects listed or eligible for listing on the national register of historic places; and known archeological resources located within the proposed exploration area;
 - (b)** a narrative description of the methods to be used to conduct coal exploration and reclamation, including, but not limited to, the types and uses of equipment, drilling, blasting, road or other access route construction, and excavated earth and other debris disposal activities;
 - (c)** an estimated timetable for conducting and completing each phase of the exploration and reclamation;
 - (d)** the estimated amounts of coal to be removed and a description of the methods to be used to determine those amounts;

(e) a description of the measures to be used to comply with the applicable requirements of 19.8.19 NMAC.

(4) the name and address of the owner of record of the surface land and of the subsurface mineral estate of the area to be explored;

(5) a map at a scale of 1:24,000 or larger, showing the areas of land to be substantially disturbed by the proposed exploration and reclamation; the map shall specifically show existing roads, occupied dwellings, and pipelines; proposed location of trenches, roads, and other access routes and structures to be constructed; the location of land excavations to be conducted; water or coal exploratory holes and wells to be drilled or altered; earth or debris disposal areas; existing bodies of surface water; documented historic, topographic, cultural and drainage features; and habitats of any endangered or threatened species listed pursuant to the Endangered Species Act of 1973 and the Wildlife Conservation Act, Sections 17-3-17 et. seq. NMSA 1978, the Habitat Protection Act, Sections 17-6-1 et. seq. NMSA 1978, and the laws relating to the protection of native New Mexico plants including Sections 76-8-1 through 76-8-4 NMSA 1978; and

(6) a bond sufficient to assure that completion of reclamation of the area disturbed by the exploration activity may be required by the director; such bond, if required by the director, shall be in a form approved by the director and shall not be subject to the requirements of 19.8.14 NMAC;

(7) a statement of why extraction of more than 250 tons of coal is necessary for exploration;

(8) such other information as the director deems necessary to take action under 19.8.6.603 NMAC;

(9) for any lands listed in 19.8.2.201 NMAC, a demonstration that, to the extent technologically and economically feasible, the proposed exploration activities have been designed to minimize interference with the values for which those lands were designated as unsuitable for surface coal mining operations; the application must include documentation of consultation with the owner of the feature causing the land to come under the protection of 19.8.2.201 NMAC, and, when applicable, with the agency with primary jurisdiction over the feature with respect to the values that caused the land to come under the protection of 19.8.2.201 NMAC.

B. Public notice and opportunity to comment. Public notice of the application and opportunity to comment shall be provided as follows:

(1) within such time as the director may designate, public notice of the filing of the application with the director shall be published in a newspaper of general circulation in the county of the proposed exploration area;

(2) the public notice shall state the name and business address of the person seeking approval, the date of filing of the application, the address of the director at which written comments on the application may be submitted, the closing date of the comment period, and a description of the general area of exploration;

(3) any person with an interest which is or may be adversely affected shall have the right to file written comments within the time limits prescribed in the notice.

[11-29-97; 19.8.6.602 NMAC - Rn, 19 NMAC 8.2.6.602, 9-29-2000; A, 01-15-2002]

19.8.6.603 APPLICATIONS: APPROVAL OR DISAPPROVAL OF EXPLORATION OF MORE THAN 250 TONS:

A. The director shall act upon a completed application for approval within 45 days.

B. The director shall approve a complete application filed in accordance with this part, if he finds, in writing, that the applicant has demonstrated that the exploration and reclamation described in the application:

(1) will be conducted in accordance with the act, 19.8.19 NMAC and these rules and regulations;

(2) will not jeopardize the continued existence of an endangered or threatened species listed pursuant to Section 4 of the Endangered Species Act of 1973 and the Wildlife Conservation Act, Sections 17-3-17 et. seq. NMSA 1978 and the laws relating to the protection of New Mexico native plants including Sections 76-8-1 through 76-8-4 NMSA 1978 or result in the destruction of adverse modification of critical habitat of those species and will also comply with the Habitat Protection Act, Sections 17-6-1 et. seq. NMSA 1978;

(3) will not adversely affect any districts, sites, buildings, structures, or objects listed on the national register of historic places unless the proposed exploration has been approved by both the director and the agency with jurisdiction over such matters;

(4) with respect to exploration activities on any lands protected under 19.8.2.201 NMAC, will minimize interference, to the extent technologically and economically feasible, with the values for which those lands were designated as unsuitable for surface coal mining operations; before making this finding, the director must provide reasonable opportunity to the owner of the feature causing the land to come under the protection of 19.8.2.201 NMAC, and, when applicable, to the agency with primary jurisdiction over the feature with respect to the values that caused the land to come under the protection of 19.8.2.201 NMAC, to comment on whether the finding is appropriate.

C. Terms of approval. Each approval issued by the director shall contain conditions necessary to ensure that the exploration and reclamation will be conducted in compliance with the act, 19.8.19 NMAC and 19.8.1 through 19.8.35 NMAC.

D. The granting of written approval to conduct exploration shall in no way be construed to ensure the issuance of a permit to conduct surface coal mining and reclamation operations under 19.8.5 NMAC.

[11-29-97; 19.8.6.603 NMAC - Rn, 19 NMAC 8.2.6.603, 9-29-2000; A, 1-15-2001; A, 12-31-2007]

19.8.6.604 APPLICATION: NOTICE AND HEARING FOR EXPLORATION OF MORE THAN 250 TONS:

A. The director shall notify the applicant and the appropriate local government officials, in writing, of his decision to approve or disapprove the application. If the application is disapproved, the notice to the applicant shall include a statement of the reason for disapproval. The director shall provide public notice of approval or disapproval of each application by publication in a newspaper of general circulation in the county of the proposed operation.

B. Any person with interests which are or may be adversely affected by decision of the director pursuant to Subsection A of 19.8.6.604 NMAC above, shall have the opportunity for administrative and judicial review as are set forth in 19.8.12 NMAC.

[11-29-97; 19.8.6.604 NMAC - Rn, 19 NMAC 8.2.6.604, 9-29-2000]

19.8.6.605 COAL EXPLORATION COMPLIANCE DUTIES:

A. All coal exploration and reclamation which substantially disturb the natural land surface or which remove more than 250 tons of coal shall be conducted in accordance with the coal exploration requirements of the act, 19.8.6 and 19.8.19 NMAC and all appropriate provisions of 19.8 NMAC, and any conditions on approval for exploration and reclamation imposed by the director.

B. Any person who conducts any coal exploration in violation of Section 69-25A-16 NMSA 1978 of the act, the provisions of 19.8.6 and 19.8.19 NMAC and any other parts of 19.8 NMAC shall be subject to the provisions of Section 69-25A-22 NMSA 1978 of the act, 19.8.29, 19.8.30 and 19.8.31 NMAC, and the applicable inspection and enforcement provisions of 19.8 NMAC.

[11-29-97; 19.8.6.605 NMAC - Rn, 19 NMAC 8.2.6.605, 9-29-2000]

19.8.6.606 PUBLIC AVAILABILITY OF INFORMATION:

A. Except as provided in Subsection B of 19.8.6.606 NMAC, all information submitted to the director under this part shall be made available for public inspection and copying at the director's office.

B. Confidential information.

(1) The director shall not make information available for public inspection, if the person submitting it requests in writing, at the time of submission, that it not be disclosed and the director determines that the information is confidential.

(2) The director shall determine that information is confidential only if it concerns trade secrets or is privileged commercial or financial information which relates to the competitive rights of the person intending to conduct coal exploration.

(3) Information requested to be held as confidential under this section shall not be made publicly available until after notice and opportunity to be heard is afforded both persons seeking and opposing disclosure of the information.

[11-29-97; 19.8.6.606 NMAC - Rn, 19 NMAC 8.2.6.606, 9-29-2000; A, 12-31-2007]

PART 7: PERMIT APPLICATIONS - MINIMUM REQUIREMENTS FOR LEGAL, FINANCIAL, COMPLIANCE AND RELATED INFORMATION

19.8.7.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.7.1 - N, 9-29-2000]

19.8.7.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.7.2 - N, 9-29-2000]

19.8.7.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[19.8.7.3 - N, 9-29-2000]

19.8.7.4 DURATION:

Permanent.

[19.8.7.4 - N, 9-29-2000]

19.8.7.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.7.5 - N, 9-29-2000]

19.8.7.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.7.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.7.7 DEFINITIONS:

[RESERVED]

[19.8.7.7 - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.7.8-19.8.7.699 [RESERVED]:

[19.8.7.8 - 19.8.7.699 - N, 9-29-2000]

19.8.7.700 RESPONSIBILITY:

This part applies to any person who applies for a permit to conduct surface coal mining operations. It is the responsibility of the permit applicant to provide to the director all of the information required by this part.

[11-29-97; 19.8.7.700 NMAC - Rn, 19 NMAC 8.2.7.700, 9-29-2000]

19.8.7.701 IDENTIFICATION OF INTERESTS:

An application shall contain the following information, except that the submission of a social security number is voluntary:

A. a statement as to whether the applicant is a corporation, partnership, single proprietorship, association, or other business entity;

B. the name, address, telephone number and, as applicable, social security number and employer identification number of the:

- (1) applicant;
- (2) applicant's resident agent; and
- (3) person who will pay the abandoned mine land reclamation fee;

C. for each person who owns or controls the applicant under the definition of "owned or controlled" and "owns or controls" in Subsection O of 19.8.1.107 NMAC of these rules, as applicable:

- (1) the person's name, address, telephone number, social security number and employer identification number;
- (2) the person's ownership or control relationship to the applicant, including percentage of ownership and location in organizational structure;
- (3) the title of the person's position, date position was assumed, and when submitted under Subsection C of 19.8.11.1120 NMAC, date of departure from the position;
- (4) each additional name and identifying number, including employer identification number, federal or state permit number, and MSHA number with date of issuance, under which the person owns or controls, or previously owned or controlled, a surface coal mining and reclamation operation in the United States within the five years preceding the date of the application; and
- (5) the application number or other identifier of, and the regulatory authority for, any other pending surface coal mining operation permit application filed by the person in any state in the United States;

D. for any surface coal mining operation owned or controlled by either the applicant or by any person who owns or controls the applicant under the definition of "owned or controlled" and "owns or controls" in Subsection O of 19.8.1.107 NMAC, the operation's:

- (1) name, address, identifying numbers, including employer identification number, federal or state permit number and MSHA number, the date of issuance of the MSHA number, and the regulatory authority; and
- (2) ownership or control relationship to the applicant, including percentage of ownership and location in organizational structure;

E. the name and address of each legal or equitable owner of record of the surface and mineral property to be mined, each holder of record of any leasehold interest in the

property to be mined, and any purchaser of record under a real estate contract for the property to be mined;

F. the name and address of each owner of record of all property (surface and subsurface) contiguous to any part of the proposed permit area and the owner of record and residents of all dwellings and structures on and within one-half mile (2640 feet) of any part of the proposed permit area;

G. the mine safety and health administration (MSHA) numbers for all mine-associated structures that require MSHA approval;

H. a statement of all lands, interest in lands, options, or pending bids on interests held or made by the applicant for lands contiguous to the area described in the permit application; if requested by the applicant, any information required by this section which is not on public file pursuant to state law shall be held in confidence by the director, as provided under Subsection B of 19.8.6.606 NMAC;

I. after an applicant is notified that his or her application is approved, but before the permit is issued, the applicant shall, as applicable, update, correct or indicate that no change has occurred in the information previously submitted under Subsections A through D of 19.8.7.701 NMAC;

J. the applicant shall submit the information required by this section and 19.8.7.702 NMAC in any format prescribed by the director, that is approved by OSM.

[11-29-97; 19.8.7.701 NMAC - Rn, 19 NMAC 8.2.7.701, 9-29-2000; A, 12-31-2007; A, 08-31-2010]

19.8.7.702 COMPLIANCE INFORMATION:

Each application shall contain:

A. a statement of whether the applicant or any subsidiary, affiliate, or person controlled by or under common control with the applicant has:

(1) had a federal or state coal mining permit suspended or revoked in the 5 years preceding the date of submission of the application; or

(2) forfeited a performance bond or similar security deposited in lieu of bond;

B. a brief explanation of the facts involved if any such suspension, revocation, or forfeiture referred to in Paragraphs (1) and (2) of Subsection A of 19.8.7.702 NMAC has occurred, including:

(1) identification number and date of issuance of the permit, and the date and amount of bond or similar security;

(2) identification of the authority that suspended or revoked the permit or forfeited the bond and the stated reasons for the action;

(3) the current status of the permit, bond, or similar security involved;

(4) the date, location, and type of any administrative or judicial proceedings initiated concerning the suspension, revocation, or forfeiture; and

(5) the current status of the proceedings;

C. a listing of each violation notice received by the applicant in connection with any surface coal mining operation during the 3-year period before the application date, and a list of all outstanding violation notices received prior to the date of the application by any surface coal mining operation that is deemed or presumed to be owned or controlled by either the applicant or any person who is deemed or presumed to own or control the applicant under the definition of "owned or controlled" and "owns or controls" in Subsection O of 19.8.1.107 NMAC; for each notice of violation issued pursuant to 30 CFR 843.12 or under a federal or state program for which the abatement period has not expired, the applicant shall certify that such notice of violation is in the process of being corrected to the satisfaction of the agency with jurisdiction over the violation; for each violation notice reported, the list shall include the following information, as applicable:

(1) any identifying numbers for the operation, including the federal or state permit number and MSHA number, the dates of issuance of the violation notice and MSHA number, the name of the person to whom the violation notice was issued, and the name of the issuing regulatory authority, department or agency;

(2) a brief description of the violation alleged in the notice;

(3) the date, location, and type of any administrative or judicial proceedings initiated concerning the violation, including, but not limited to, proceedings initiated by any person identified in Subsection C of 19.8.7.702 NMAC to obtain administrative or judicial review of the violation;

(4) the current status of the proceedings and of the violation notice; and

(5) the actions, if any, taken by any person identified in Subsection C of 19.8.7.702 NMAC to abate the violation;

D. after an applicant is notified that his or her application is approved, but before the permit is issued, the applicant shall, as applicable, update, correct or indicate that no change has occurred in the information previously submitted under this section.

[11-29-97; 19.8.7.702 NMAC - Rn, 19 NMAC 8.2.7.702, 9-29-2000]

19.8.7.703 RIGHT OF ENTRY AND OPERATION INFORMATION:

A. Each application shall contain a description of the documents upon which the applicant bases his or her legal right to enter and begin surface coal mining operations in the permit area and whether that right is the subject of pending legislation. The description shall identify those documents by type and date of execution, identify the specific lands to which the document pertains, and explain the legal rights claimed by the applicant.

B. Where the private mineral estate to be mined has been severed from the private surface estate, the application shall also provide for lands within the permit area:

(1) a copy of the written consent of the surface owner to the extraction of coal by surface mining methods; or

(2) a copy of the document of conveyance that expressly grants or reserves the right to extract the coal by surface mining methods; or

(3) if the conveyance does not expressly grant the right to extract the coal by surface mining methods, documentation that under applicable state law, the applicant has the legal authority to extract the coal by those methods.

C. Nothing in this section shall be construed to afford the director the authority to adjudicate property title disputes.

[11-29-97; 19.8.7.703 NMAC - Rn, 19 NMAC 8.2.7.703, 9-29-2000]

19.8.7.704 RELATIONSHIP TO AREAS DESIGNATED UNSUITABLE FOR MINING:

A. Each application shall contain a statement of available information on whether the proposed permit area is within an area designated unsuitable for surface coal mining operations under 19.8.4 NMAC or under study for designation in an administrative proceeding under 19.8 NMAC.

B. If an applicant claims the exemption in Paragraph (2) of Subsection D of 19.8.11.1106 NMAC, the application shall contain information supporting the applicant's assertion.

C. An application that proposes to conduct surface coal mining operations within 100 feet of a public road or within 300 feet of an occupied dwelling must meet the requirements of Subsection D or E of 19.8.2.202 NMAC, respectively.

[11-29-97; 19.8.7.704 NMAC - Rn, 19 NMAC 8.2.7.704, 9-29-2000; A, 01-15-2002]

19.8.7.705 PERMIT TERM INFORMATION:

A. Timing and extent of operations.

(1) Each application shall state the anticipated or actual starting and termination date of each phase of the surface coal mining operations and the anticipated number of acres of surface land to be affected for each phase of mining and over the total life of the permit.

(2) The horizontal and vertical extent of the proposed workings for each phase of the operation for the life of the permit shall be shown for underground mining.

B. If the applicant proposes to conduct the surface coal mining operations in excess of 5 years, the application shall contain the information needed for the showing required under Subsection A of 19.8.11.1111 NMAC.

[11-29-97; 19.8.7.705 NMAC - Rn, 19 NMAC 8.2.7.705, 9-29-2000; A, 12-31-2007]

19.8.7.706 PERSONAL INJURY AND PROPERTY DAMAGE INSURANCE INFORMATION:

Each permit application shall contain either a certificate of liability insurance or evidence that the self-insurance requirements in 19.8.14.1407 NMAC are satisfied.

[11-29-97; 19.8.7.706 NMAC - Rn, 19 NMAC 8.2.7.706, 9-29-2000]

19.8.7.707 IDENTIFICATION OF OTHER LICENSES AND PERMITS:

Each application shall contain a list of all or other licenses and permits needed by the applicant to conduct the proposed surface coal mining operations. This list shall identify each license and permit by:

A. type of permit or license;

B. name and address of issuing authority;

C. identification numbers of applications for those permits or licenses or, if issued, the identification numbers of the permits or licenses; and

D. if a decision has been made, the date of approval or disapproval by each issuing authority.

[11-29-97; 19.8.7.707 NMAC - Rn, 19 NMAC 8.2.7.707, 9-29-2000]

19.8.7.708 IDENTIFICATION OF LOCATION OF PUBLIC OFFICE FOR FILING OF APPLICATION:

Each application shall identify, by name and address, the public office where the applicant will simultaneously file a copy of the application for public inspection under Subsection E of 19.8.11.1100 NMAC.

[11-29-97; 19.8.7.708 NMAC - Rn, 19 NMAC 8.2.7.708, 9-29-2000; A, 12-31-2007]

19.8.7.709 NEWSPAPER ADVERTISEMENT AND PROOF OF PUBLICATION:

A copy of the newspaper advertisement of the application and proof of publication of the advertisement shall be filed with the director and made a part of the complete application, not later than 4 weeks after the last date of publication required under Subsection A of 19.8.11.1100 NMAC.

[11-29-97; 19.8.7.709 NMAC - Rn, 19 NMAC 8.2.7.709, 9-29-2000]

PART 8: PERMIT APPLICATIONS - MINIMUM REQUIREMENTS FOR INFORMATION ON ENVIRONMENTAL RESOURCES

19.8.8.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.8.1 NMAC- N, 9-29-2000]

19.8.8.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.8.2 NMAC - N, 9-29-2000]

19.8.8.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[19.8.8.3 NMAC - N, 9-29-2000]

19.8.8.4 DURATION:

Permanent.

[19.8.8.4 NMAC - N, 9-29-2000]

19.8.8.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[[19.8.8.5 NMAC - N, 9-29-2000]

19.8.8.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.8.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.8.7 DEFINITIONS:

[RESERVED]

[19.8.8.7 - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.8.8-19.8.8.799 [RESERVED]:

[19.8.8.8 - 19.8.8.799 - N, 9-29-2000]

19.8.8.800 GENERAL REQUIREMENTS:

Each permit application shall include a description of the existing, premining environmental resources as set forth in this part. All data information shall comply with 19.8.5.505 NMAC. All information required under this part shall be used for the permit application evaluation.

[11-29-97; 19.8.8.800 NMAC - Rn, 19 NMAC 8.2.8.800, 9-29-2000]

19.8.8.801 GENERAL ENVIRONMENTAL RESOURCES INFORMATION:

Each application shall describe and identify:

A. the size, sequence, and timing of the subareas of the lands subject to surface coal mining operations over the estimated life of those operations for which it is anticipated that individual permits for mining will be sought.

B. Cultural and historical resources.

(1) the nature of cultural and historic resources listed or eligible for listing on the national register of historic places and known archeological features within the proposed permit and adjacent areas. The description shall be based on all available information, including, but not limited to, data of state and local archeological, historical, and cultural preservation agencies.

(2) The director may require the applicant to identify and evaluate important historic and archeological resources that may be listed or eligible for listing on the national register of historic places, through:

- (a) collection of additional information;
- (b) conduct of field investigations; or
- (c) other appropriate analyses.

[11-29-97; 19.8.8.801 NMAC - Rn, 19 NMAC 8.2.8.801, 9-29-2000; A, 1-15-2002; A, 12-31-2007]

19.8.8.802 DESCRIPTION OF HYDROLOGY AND GEOLOGY: GENERAL REQUIREMENTS:

A. Each application shall contain a description of the geology, and water quality and quantity of all lands within the proposed permit area and the adjacent area. The description shall include information on the characteristics of all surface and ground waters within the permit and adjacent area, and any water, which will flow into or receive discharges of water from the permit area. The description shall be prepared according to 19.8.8.802 through 806 NMAC and conform to the following:

(1) information on hydrology, water quality and quantity, and geology related to hydrology of areas outside the proposed permit area shall be provided to the director, to the extent that this data is available from an appropriate federal or state agency.

(2) If this information is not available from those agencies, the applicant shall gather and submit this information to the director as part of the permit application.

(3) The permit shall not be approved by the director until this information is made available in the application.

B. The use of modeling techniques may be included as part of the permit application, but the same surface and ground water information may be required for each site as when models are not used.

[11-29-97; 19.8.8.802 NMAC - Rn, 19 NMAC 8.2.8.802, 9-29-2000; A, 1-15-2002]

19.8.8.803 GEOLOGY DESCRIPTION:

A. The description shall include a general statement of the geology within the proposed permit area accompanied by appropriate maps and cross-sections down to and including the first aquifer to be affected below the lowest coal seam to be mined.

B. Sampling requirements.

(1) Test borings or core samples from the proposed permit area shall be collected and analyzed down to and including the stratum immediately below the lowest coal seam to be mined to provide the following data in the description:

(a) location of subsurface water, if encountered;

(b) logs of drill holes showing the lithologic characteristics and thickness of each stratum and each coal seam;

(c) physical properties of each stratum within the overburden including compaction, erodibility, and if this material is to be used as topdressing, potential soil texture;

(d) for surface mining activities, chemical analyses of a composite sample of each stratum within the overburden and the stratum immediately below the lowest coal seam to be mined and for underground mining activities, chemical analyses of the stratum immediately above and below the coal seams to be mined to identify at a minimum, those horizons which contain potential acid-forming, toxic-forming, or alkalinity producing materials and a composite sample from each stratum shall be analyzed for the following parameters:

Aluminum (Al)
Arsenic (As)
Barium (Ba)
Boron (B)
Cadmium (Cd)
Chromium (Cr)
Cobalt (Co)
Copper (Cu)

Cyanide (CN)
Fluoride
Iron (Fe)
Lead (Pb)
Manganese (Mn)
Mercury (Hg)
Molybdenum (Mo)
Nickel (Ni)

Silver (Ag)
Sulfate (SO₄)
Uranium (U)
Vanadium (V)
Zinc (Zn)
Radioactivity
Radium
Ra226
Selenium (Se)
Radium
Ra228

(e) If this material is to be considered for use as topdressing, analyses for the parameters necessary for plant growth shall be performed, in addition to those listed above, and shall include at a minimum the following:

Calcium (Ca)
Chloride
Magnesium (Mg)
Phosphorous (P)
Potassium (K)

Sodium (Na)
Carbonate (CO₃)
Bicarbonate (HCO₃)
Nitrate (NO₃)
Sodium Adsorption Ratio (Adjusted)
(SAR)

pH

(f) A demonstration of the suitability of topsoil substitutes or supplements in Subsection E of 19.8.20.2005 NMAC shall be based upon analysis of the thickness of soil horizons and/or geologic strata, total depth, texture, percent coarse fragments, pH, and areal extent of the different kinds of soils. Analyses of additional parameters or additional data may be required by the director.

(g) If the applicant can demonstrate that the analyses of any particular parameter is of little or no significance in the proposed permit area, then such parameter(s) may be waived upon approval of the director;

(h) analysis of the coal seam, including, but not limited to an analysis of the sulfur, pyrite, and marcasite content.

(i) The applicant shall submit a proposed sampling plan to the director for approval.

(2) If required by the director, test borings or core samplings shall be collected and analyzed to greater depths within the proposed permit area, or for areas outside the proposed permit area to provide for evaluation of the impact of the proposed operations on the hydrologic balance.

(3) An applicant may request that the requirements for a statement of the results of the test borings or core samplings be waived by the director. The waiver may be granted only if the director makes a written determination that the statement is unnecessary because other equivalent information is accessible to him in a satisfactory form.

[11-29-97; 19.8.8.803 NMAC - Rn, 19 NMAC 8.2.8.803, 9-29-2000; A, 12-31-2007]

19.8.8.804 GROUND WATER INFORMATION:

A. The application shall contain a description, including appropriate maps, cross sections, and written statements, of the ground water hydrology for the proposed permit and adjacent areas including:

(1) the depth below the surface and the horizontal extent of the water table and aquifers;

(2) the lithology and thickness of the aquifers;

(3) known uses of the water in the aquifers and water table; and

(4) the quality of subsurface water, if encountered.

B. The application shall contain additional information which describes the recharge, storage, and discharge characteristics of aquifers and the quality and quantity of ground water, according to the parameters and in the detail required by the director.

C. All water-quality analyses performed to meet the requirements of this section shall be conducted according to the methodology in the 15th edition of "standard methods for the examination of water and wastewater", which is incorporated by reference, or the methodology in 40 CFR Parts 136 and 434. Water quality sampling performed to meet the requirements of this section shall be conducted according to either methodology listed above when feasible.

[11-29-97; 19.8.8.804 NMAC - Rn, 19 NMAC 8.2.8.804, 9-29-2000]

19.8.8.805 SURFACE WATER INFORMATION:

A. Surface water information shall contain appropriate maps, cross-sections, charts and written-statements, including the name of the watershed which will receive water discharges, the water discharge into any surface body of water, and descriptions of surface drainage systems sufficient to identify, in detail, the seasonal variations in water quantity and quality within the proposed permit and adjacent areas.

B. Surface water information shall include:

(1) minimum, maximum, and average discharge conditions which identify critical low flow and peak discharge rates of streams sufficient to identify seasonal variations; and

(2) water quality data to identify the characteristics of surface waters in, discharging into, or which will receive flows from surface or ground water from affected areas within the proposed permit area, sufficient to identify seasonal variations, showing:

(a) total dissolved solids in milligrams per liter;

(b) total suspended solids in milligrams per liter;

(c) acidity;

(d) pH in standard units;

(e) total and dissolved iron in milligrams per liter;

(f) total manganese in milligrams per liter; and

(g) such other information as the director determines is relevant.

(3) All water-quality analyses performed to meet the requirements of this section shall be conducted according to the methodology in the 15th edition of "standard methods for the examination of water and wastewater," which is incorporated by reference, or the methodology in 40 CFR Parts 136 and 434. Water quality sampling performed to meet the requirement of this section shall be conducted according to either methodology listed above when feasible.

[11-29-97; 19.8.8.805 NMAC - Rn, 19 NMAC 8.2.8.805, 9-29-2000]

19.8.8.806 ALTERNATIVE WATER SUPPLY INFORMATION:

The application shall identify the extent to which the proposed surface coal mining operations may proximately result in contamination, diminution, or interruption of an underground or surface source of water within the proposed permit or adjacent areas for domestic, agricultural, industrial, or other legitimate use. If contamination, diminution, or interruption may result, then the description shall identify the alternative sources of water supply that could be developed to replace the existing sources.

[11-29-97; 19.8.8.806 NMAC - Rn, 19 NMAC 8.2.8.806, 9-29-2000]

19.8.8.807 CLIMATOLOGICAL INFORMATION:

A. The application shall contain a statement of the climatological factors that are representative of the proposed permit area, including:

- (1) the average monthly and seasonal precipitation;
- (2) the average direction and velocity of prevailing winds;
- (3) seasonal temperature ranges; and

(4) a plan for collection of climatological data throughout the operator's period of responsibility.

B. The director may request such additional data as deemed necessary to ensure compliance with the requirements of 19.8.5 through 19.8.13 NMAC.

[11-29-97; 19.8.8.807 NMAC - Rn, 19 NMAC 8.2.8.807, 9-29-2000]

19.8.8.808 VEGETATION INFORMATION:

A. The permit application shall contain a map that delineates existing vegetative types and a description of the plant communities within the proposed permit area for surface mining activities, or for underground mining activities the areas to be affected within the permit area by surface operations or facilities, and within any proposed reference area. This description shall include information adequate to predict the

potential for re-establishing vegetation and quantitative data for each strata (herb, shrub, tree) which includes but not limited to:

- (1) a comprehensive listing of species by plant community;
- (2) ground cover, frequency, and constancy values for each species in the herbaceous stratum for each plant community;
- (3) ground cover, density, and frequency values for each species in the shrub stratum for each plant community;
- (4) foliage cover, basal area, and density of non-timber and timber tree species and volume data for commercial timber producing species;
- (5) acreage which shall be determined for each plant community type and presented on the vegetative map, the quantitative data collected for each plant community shall be correlated with slope, aspect, and soil type within that plant community;
- (6) animal unit months (AUMs) the area is supporting or the AUMs the area could support; and
- (7) a report describing location, soils, and habitat and mitigation measures to be taken for any rare, threatened, or endangered species found within the permit area.
- (8) The director may request such additional data as deemed necessary to ensure compliance with the requirements of 19.8.20.2060 through 2066 NMAC.

B. If the applicant intends to develop a historic record of pre-mining conditions as a basis for comparison to the postmining revegetation, the applicant shall submit a plan indicating:

- (1) a timetable for collecting data and developing the historic record;
- (2) the sampling techniques to be used;
- (3) the number of samples to be collected; and
- (4) location of each permanent sampling point within each vegetative type identified on the map required for this section.

C. Sampling intensity shall be such that the data presents a valid statistical value for the area or population from which the samples were collected.

D. The map or aerial photograph required shall include sufficient adjacent areas to allow evaluation of vegetation as important habitat for fish and wildlife for those species

of fish and wildlife identified under 19.8.8.809 NMAC. The map may be prepared by the local soil and water conservation district of the area or other qualified government or private organization.

E. The director may request such additional data as deemed necessary to ensure compliance with the requirements of 19.8.20.2060 through 2066 NMAC.

[11-29-97; 19.8.8.808 NMAC - Rn, 19 NMAC 8.2.8.808, 9-29-2000]

19.8.8.809 FISH AND WILDLIFE RESOURCES INFORMATION:

A. Each application shall include a study of fish and wildlife and their habitats within the proposed permit area and the portions of the adjacent areas where effects on such resources may reasonably be expected to occur.

B. The applicant in consultation with the appropriate state and federal fish and wildlife management, conservation, or land management agencies having responsibilities for fish and wildlife or their habitats, shall propose the level of detail and the areas of such studies, after consideration of:

- (1) published data and other information;
- (2) site-specific information obtained by the applicant; and
- (3) guidance obtained from agencies consulted.

C. The director in consultation with the appropriate agencies will approve or disapprove the level of detail in the study.

[11-29-97; 19.8.8.809 NMAC - Rn, 19 NMAC 8.2.8.809, 9-29-2000]

19.8.8.810 SOIL RESOURCES INFORMATION:

A. The applicant shall provide adequate soil survey information of the permit area for surface mining activities or for underground mining activities the areas to be affected within the permit area by surface operations or facilities consisting of the following:

- (1) a map delineating different soils;
- (2) soil identification;
- (3) soil descriptions; and
- (4) present and potential productivity of existing soils.

B. The local soil and water conservation district office may be contacted for available information.

C. Where the applicant proposes to use selected overburden materials as a supplement or as topdressing, the application shall provide results of the analyses, trials, and tests required under Subparagraph (e) of Paragraph (1) of Subsection B of 19.8.8.803 NMAC and 19.8.20.2005 NMAC.

D. The director may request such additional data as deemed necessary to ensure compliance with the requirements of 19.8.20.2004 through 2008 NMAC.

[11-29-97; 19.8.8.810 NMAC - Rn, 19 NMAC 8.2.8.810, 9-29-2000]

19.8.8.811 LAND-USE INFORMATION:

A. The application shall contain a statement of the condition, capability, and productivity of the land within the proposed permit area for surface mining activities or for underground mining activities the area which will be affected within the permit area by surface operations and facilities, including:

(1) a map and supporting narrative of the uses of the land existing at the time of the filing of the application. If the premining use of the land was changed within 5 years before the anticipated date of beginning the proposed operations, the historic use of the land shall also be described.

(2) a narrative of land capability and productivity, which analyzes the land-use description under Subsection A of 19.8.8.811 NMAC in conjunction with other environmental resources information required under this part. The narrative shall provide analyses of:

(a) the capability of the land before any mining to support a variety of uses, giving consideration to soil and foundation characteristics, topography, vegetative cover and the hydrology; and

(b) the productivity of the proposed permit area for surface mining activities or for underground mining activities, the area proposed to be affected within the permit area by surface operations and facilities before mining, expressed as average yield of food, fiber, forage, or wood products from such lands obtained under proper levels of management. The productivity shall be determined by yield data or estimates for similar sites based on current data from the U.S. department of agriculture, state agricultural universities or appropriate state natural resource or agricultural agencies.

B. The application shall state whether the proposed mine plan area has been previously mined, if so, the following, if available:

(1) the type of mining method used;

- (2) the coal seams or other mineral strata mined;
- (3) the extent of coal or other minerals removed;
- (4) the approximate dates of past mining; and
- (5) the uses of the land preceding mining.

C. The application shall contain a description of the existing land uses and land use classification under local law, if any, of the proposed permit and adjacent areas.

[11-29-97; 19.8.8.811 NMAC - Rn, 19 NMAC 8.2.8.811, 9-29-2000]

19.8.8.812 MAPS: GENERAL REQUIREMENTS:

The permit application shall include maps showing:

A. all boundaries of land and names of present owners of record of those lands, both surface and subsurface, included in the permit area and where available the present owners of record of lands contiguous to the permit area;

B. the boundaries of land within the proposed permit area upon which the applicant has the legal right to enter and begin surface coal mining operations;

C. the boundaries of all areas proposed to be affected over the estimated total life of the proposed surface coal mining operations, with a description of size, sequence, and timing of the mining of sub-areas for which it is anticipated that additional permits will be sought;

D. the location of all dwellings and structures, and names of present owners of record and residents of those dwellings and structures, on and within one-half mile (2640 feet) of the proposed permit area, with identification of the current use of the buildings;

E. the location of surface and subsurface man-made features within, passing through, or passing over the proposed permit area, including, but not limited to major electric transmission lines, pipelines, and agricultural drainage tile fields;

F. the location, vegetative type, and size of any proposed reference areas for determining the success of revegetation;

G. the locations of water supply intakes for current users of surface water flowing into, out of, and within the permit area and those surface waters which will receive discharges from affected areas in the proposed permit area;

H. each public road located in or within 100 feet of the proposed permit area;

I. the boundaries of any public park and locations of any cultural or historical resources listed or eligible for listing in the national register of historic places and known archaeological sites within the permit or adjacent areas.

J. each cemetery, known grave site, or unmarked burial ground located in or within 100 feet of the proposed permit area;

K. any land within the proposed permit area and adjacent area which is within the boundaries of any units of the national system of trails of the wild scenic rivers system, including study rivers designated under Section 5(a) of the Wild and Scenic Rivers Act; and

L. other relevant information required by the director.

[11-29-97; 19.8.8.812 NMAC - Rn, 19 NMAC 8.2.8.812, 9-29-2000; A, 12-31-2007]

19.8.8.813 CROSS SECTIONS, MAPS AND PLANS:

The application shall include cross sections, maps and plans showing:

A. elevations and locations of test borings and core samplings;

B. elevations and locations of monitoring stations used to gather data for water quality and quantity, fish and wildlife, and air quality if required, in preparation of the application;

C. nature, depth, and thickness of the coal seams to be mined, any coal or rider seams above the seam to be mined, each stratum of the overburden and the stratum immediately below the lowest coal seam to be mined;

D. all coal crop lines and the strike and dip of the coal to be mined within the proposed permit area;

E. location and extent of known workings of active, inactive, or abandoned underground mines, including mine openings to the surface within the proposed permit and adjacent areas;

F. location and extent of sub-surface water, if encountered, within the proposed permit or adjacent area;

G. location of surface water bodies such as streams, lakes, ponds, springs, constructed or natural drains and irrigation ditches within the proposed permit and adjacent areas;

H. location and extent of existing or previously surface mined areas within the proposed permit area;

I. location and dimensions of existing areas of spoil, waste, and non-coal waste disposal, dams, embankments, other impoundments and water treatment and air pollution control facilities within the proposed permit area;

J. location and depth if available, of gas and oil wells within the proposed permit area and water wells in the permit and adjacent areas;

K. the existing land surface configuration of the proposed permit area on contour maps of a maximum of 5 foot contour intervals;

L. Maps, plans, and cross sections included in a permit application which are required by this section shall be prepared by or under the direction of and certified by a qualified professional geologist or a registered professional engineer, with assistance from experts in related fields such as land surveying reclamation or mined land rehabilitation and shall be updated as required by the director.

[11-29-97; 19.8.8.813 NMAC - Rn, 19 NMAC 8.2.8.813, 9-29-2000]

19.8.8.814 PRIME FARMLAND INVESTIGATION:

A. The applicant shall conduct a pre-application investigation of the proposed permit area to determine whether lands within the area may be prime farmland. The director in consultation with U.S. natural resources conservation service shall determine the nature and extent of the required reconnaissance investigation.

B. Land shall not be considered prime farmland where the applicant can demonstrate one of the following:

(1) the land has not been historically used as cropland;

(2) the slope of the land is 10 percent or greater;

(3) the land is not irrigated or naturally subirrigated, has no developed water supply that is dependable or of adequate quality, and the average annual precipitation is 14 inches or less;

(4) other factors exist, such as a very rocky surface, or the land is frequently flooded during the growing season, more often than once in 2 years, and the flooding has reduced crop yields; or

(5) on the basis of a soil survey of lands within the permit area, there are no soil map units that have been designated prime farmland by the U.S. natural resources conservation service.

C. If the investigation establishes that the lands are not prime farmlands, the applicant shall submit with the permit application a request for a negative determination

which shows that the land for which the negative determination is sought meets one of the criteria of Subsection B of 19.8.8.814 NMAC.

D. If the investigation indicates that lands within the proposed permit area may be prime farmlands, the applicant shall contact the U.S. natural resources conservation service to determine if a soil survey exists for those lands and whether the applicable soil map units have been designated as prime farmlands. If no soil survey has been made for the lands within the proposed permit area, the applicant shall cause such a survey to be made.

(1) When a soil survey of lands within the proposed permit area contains soil map units which have been designated as prime farmlands, the applicant shall submit an application, in accordance with 19.8.10.1004 NMAC for such designated land.

(2) When a soil survey for lands within the proposed permit area contains soil map units which have not been designated as prime farmland after review by the U.S. natural resources conservation service; the applicant shall submit a request for negative determination for non-designated land with the permit application establishing compliance with Subsection B of 19.8.8.814 NMAC.

[11-29-97; 19.8.8.814 NMAC - Rn, 19 NMAC 8.2.8.814, 9-29-2000; A, 12-31-2007]

PART 9: PERMIT APPLICATIONS - MINIMUM REQUIREMENTS FOR RECLAMATION AND OPERATIONS PLANS

19.8.9.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.9.1 NMAC- N, 9-29-2000]

19.8.9.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.9.2 NMAC- N, 9-29-2000]

19.8.9.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[19.8.9.3 NMAC- N, 9-29-2000]

19.8.9.4 DURATION:

Permanent.

[19.8.9.4 NMAC- N, 9-29-2000]

19.8.9.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.9.5 NMAC- N, 9-29-2000]

19.8.9.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.9.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.9.7 DEFINITIONS:

[RESERVED]

[19.8.9.7 NMAC- N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.9.8-19.8.9.899 [RESERVED]:

[19.8.9.8 - 19.8.9.899 NMAC - N, 9-29-2000]

19.8.9.900 OPERATION PLAN: GENERAL REQUIREMENTS:

Each application shall contain a description of the mining operations proposed to be conducted within the proposed permit area including, at a minimum, the following:

A. a narrative description of the type and method of coal mining procedures and proposed engineering techniques, anticipated annual and total production of coal, by tonnage, and the major equipment to be used for all aspects of those operations; and

B. a narrative explaining the construction, modification, use, maintenance, and removal of the following facilities (unless retention of such facilities is necessary for postmining land use as specified in 19.8.20.2075 NMAC:

- (1) dams, embankments, and other impoundments;

- (2) overburden and topdressing handling and storage areas and structures;
- (3) coal removal, handling, storage, cleaning, and transportation areas and structures;
- (4) spoil, coal processing waste, and non-coal waste removal, handling, storage, transportation, and disposal areas and structures;
- (5) mine facilities; and
- (6) water and air pollution control facilities.

[11-29-97; A, 12-15-99; 19.8.9.900 NMAC - Rn, 19 NMAC 8.2.9.900, 9-29-2000]

19.8.9.901 OPERATION PLAN: EXISTING STRUCTURES:

A. Each application shall contain a description of each existing structure proposed to be used in connection with or to facilitate the surface coal mining and reclamation operation. The description shall include:

- (1) location;
- (2) plans of the structure which describe its current condition;
- (3) approximate dates on which construction of the existing structure was begun and completed; and
- (4) a showing, including relevant monitoring data or other evidence, whether the structure meets the performance standards of 19.8.19 through 19.8.28 NMAC.

B. Each application shall contain a compliance plan for each existing structure which does not meet the performance standards of 19.8.19 through 19.8.28 NMAC and which is proposed to be modified or reconstructed for use in connection with or to facilitate the surface coal mining and reclamation operation. The compliance plan shall include:

- (1) design specifications for the modification or reconstruction of the structure to meet the design and performance standards of 19.8.19 through 19.8.28 NMAC;
- (2) a construction schedule which shows dates for beginning and completing interim steps and final reconstruction;
- (3) provisions for monitoring the structure during and after modification or reconstruction to ensure that the performance standards of 19.8.19 through 19.8.28 NMAC are met; and

(4) a showing that the risk of harm to the environment or to public health or safety is not significant during the period of reconstruction or modification.

[11-29-97; 19.8.9.901 NMAC - Rn, 19 NMAC 8.2.9.901, 9-29-2000]

19.8.9.902 OPERATION PLAN: BLASTING:

Each application shall contain a blasting plan for the proposed permit area, explaining how the applicant intends to comply with the requirements of 19.8.20.2028 through 2033 NMAC and including the following:

A. types and approximate amounts of explosive to be used for each type of blasting operation to be conducted;

B. description of procedures and plans for recording and retention of information on the following during blasting:

(1) drilling patterns, including size, number, depths, and spacing of holes;

(2) charge and packing of holes;

(3) types of fuses and detonation controls; and

(4) sequence and timing of firing holes;

C. description of blasting warning and site access control equipment and procedures;

D. description of types, capabilities, sensitivities, and locations of use of any blast monitoring equipment and procedures proposed to be used;

E. description of plans for recording and reporting to the director the results of preblasting surveys, if required; and

F. description of unavoidable hazardous conditions for which deviations from the blasting schedule will be needed under Paragraph (3) of Subsection A of 19.8.20.2030 NMAC.

[11-29-97; 19.8.9.902 NMAC - Rn, 19 NMAC 8.2.9.902, 9-29-2000]

19.8.9.903 OPERATION PLAN: MAPS AND PLANS:

Each application shall contain maps and plans of the proposed permit area and adjacent areas as follows:

A. the maps and plans shall show the underground mining activities to be conducted, if any, the lands proposed to be affected throughout the surface coal mining operations and any change in a facility or feature to be caused by the proposed operations, if the facility or feature was shown under 19.8.8.812 and 813 NMAC;

B. the following shall be shown for the proposed permit area unless specifically required for the adjacent area by the director:

- (1)** buildings, utility corridors and facilities to be used;
- (2)** the area of land to be affected within the proposed permit area, according to the sequence of mining and reclamation;
- (3)** each area of land for which a performance bond or other equivalent guarantee will be posted under 19.8.14 NMAC;
- (4)** each coal storage, cleaning and loading area;
- (5)** each topdressing, spoil, coal waste, and non-coal waste storage area;
- (6)** each water diversion, collection, conveyance, treatment, storage, and discharge facility to be used;
- (7)** each air pollution collection and control facility, if any;
- (8)** each source of waste and each waste disposal facility relating to coal processing or pollution control;
- (9)** each facility to be used to protect and enhance fish and wildlife and related environmental values;
- (10)** each explosive storage and handling facility;
- (11)** location of each sedimentation pond, permanent water impoundment, coal processing waste bank, and coal processing waste dam and embankment, in accordance with 19.8.9.909 NMAC, and fill area for the disposal of excess spoil in accordance with 19.8.9.914 NMAC;
- (12)** each profile, at cross-sections specified by the director of the anticipated final surface configuration to be achieved for the affected areas;
- (13)** location of each water monitoring point;
- (14)** location of each facility that will remain on the proposed permit area as a permanent feature after the completion of surface coal mining operations; and

(15) in addition to the above, underground mines shall indicate the location of each subsidence monitoring point.

C. Maps, plans, and cross-sections required under Paragraphs (4), (5), (6), (10) and (11) of Subsection B of 19.8.9.903 NMAC shall be prepared by, or under the direction of and certified by a qualified professional geologist or registered professional engineer, with assistance from experts in related fields such as land surveying, reclamation or mined land rehabilitation, except that:

(1) maps, plans and cross-sections for sedimentation ponds may only be prepared by a qualified registered professional engineer; and

(2) spoil disposal facilities, maps, plans, and cross-sections may only be prepared by a qualified registered professional engineer.

[11-29-97; 19.8.9.903 NMAC - Rn, 19 NMAC 8.2.9.903, 9-29-2000]

19.8.9.904 AIR POLLUTION CONTROL PLAN:

A. For all surface coal mining operations with projected production rates exceeding 1,000,000 tons of coal per year, the application shall contain an air pollution control plan which includes the following:

(1) an air quality monitoring program to provide sufficient data to evaluate the effectiveness of the fugitive dust control practices proposed under Paragraph (2) of Subsection A of 19.8.9.904 NMAC to comply with federal and state air quality standards; and

(2) a plan for fugitive dust control practices as required under 19.8.20.2050 NMAC.

B. For all other surface coal mining operations the application shall contain an air pollution control plan which includes the following:

(1) an air quality monitoring program, if required by the director, to provide sufficient data to evaluate the effectiveness of the fugitive dust control practices under Paragraph (2) of Subsection B of 19.8.9.904 NMAC to comply with applicable federal and state air quality standards; and

(2) a plan for fugitive dust control practices, as required under 19.8.20.2050 NMAC.

[11-29-97; 19.8.9.904 NMAC - Rn, 19 NMAC 8.2.9.904, 9-29-2000]

19.8.9.905 FISH AND WILDLIFE PLAN:

A. Each application shall contain a fish and wildlife plan, consistent with 19.8.20.2051 NMAC which provides:

(1) a statement of how the plan will minimize disturbances and adverse impacts on fish and wildlife and related environmental values during surface coal mining and reclamation operations, and how enhancement of these resources will be achieved, where practicable; the plan shall cover the permit and adjacent areas as determined by the director pursuant to Subsection C of 19.8.8.809 NMAC;

(2) if the applicant states that it will not be practicable, in accordance with Paragraph (1) of Subsection A of 19.8.9.905 NMAC, to achieve a condition which clearly shows a trend toward enhancement of fish and wildlife resources at the time revegetation has been successfully completed under 19.8.20.2060 through 2066 NMAC, a statement explaining why it is not practicable to achieve such a condition shall be submitted to the director;

B. a statement, describing the methods, if any, the applicant will utilize to protect or enhance the following, if they are to be affected by surface coal mining operations:

(1) threatened or endangered species of plants or animals which are indigenous to the state listed under the Endangered Species Act of 1973 as amended, and the Wildlife Conservation Act, Sections 17-3-37 et. seq. NMSA 1978, the Habitat Protection Act, Sections 17-6-1 et. seq. NMSA 1978, and the laws relating to the protection of native New Mexico plants including Sections 76-8-1 through 76-8-4 NMSA 1978; and their critical habitats;

(2) species such as eagles, migratory birds or other animals protected by state or federal law and their habitats; or other species identified through the consultation process pursuant to 19.8.8.809 NMAC; or

(3) habitats of unusually high value for fish and wildlife, such as wetlands, riparian areas, cliffs supporting raptors, areas offering special shelter or protection, reproduction and nursery areas, and wintering areas.

[11-29-97; 19.8.9.905 NMAC - Rn, 19 NMAC 8.2.9.905, 9-29-2000]

19.8.9.906 RECLAMATION PLAN: GENERAL REQUIREMENTS:

A. Each application shall contain a plan for reclamation of the lands within the proposed permit area, showing how the applicant will comply with Sections 69-25A-19 and 69-25A-20 NMSA 1978 of the act and 19.8.1 through 19.8.35 NMAC. The plan shall include, at a minimum, all information required under 19.8.9.906 through 918 NMAC.

B. Each plan shall contain the following information for the proposed permit area:

- (1)** a detailed timetable for the completion of each major step in the reclamation plan;
- (2)** a detailed estimate of the cost of reclamation of the proposed operations required to be covered by a performance bond under 19.8.14 NMAC;
- (3)** a plan for backfilling, soil stabilization, compacting, and grading, with contour maps or cross sections that show the anticipated final surface configuration of the proposed permit area, in accordance with 19.8.20.2054 through 2059 NMAC;
- (4)** a plan for removal, storage, protection and redistribution of topsoil, subsoil, and other material suitable for topsoil to meet the requirements of 19.8.20.2004 through 2008 NMAC;
- (5)** a plan for revegetation as required in 19.8.20.2060 through 2066 NMAC, including, but not limited to, descriptions of the:

 - (a)** schedule of revegetation;
 - (b)** species and amounts per acre of seeds and seedlings to be used;
 - (c)** methods to be used in planting and seeding;
 - (d)** mulching techniques;
 - (e)** irrigation, if appropriate, and pest and disease control measures, if any;
 - (f)** measures proposed to be used to determine the success of revegetation, as required in 19.8.20.2065 NMAC, and
 - (g)** a soil testing plan for evaluation of the results of topdressing handling and reclamation procedures related to revegetation.
- (6)** a description of measures to be used to maximize the use and conservation of the coal resource as required in 19.8.20.2027 NMAC;
- (7)** a description of measures to be employed to ensure that all debris, acid-forming and toxic-forming materials, and materials constituting a fire hazard are disposed of in accordance with 19.8.20.2046 and 2056 NMAC, and a description of the contingency plans which have been developed to preclude sustained combustion of such materials;
- (8)** a description, including appropriate cross sections and maps, of the measures to be used to seal or manage mine openings, and to plug, case, or manage exploration holes, other bore holes, wells, and other openings within the proposed permit area, in accordance with 19.8.20.2001 through 2003 NMAC; and

(9) a description of steps to be taken to comply with the requirements of the Clean Air Act (42 U.S.C. Sec. 7401 et seq.), the Clean Water Act (33 U.S.C. Sec. 1251 et seq.), and all applicable air and water quality laws and regulations and health and safety standards.

[11-29-97; 19.8.9.906 NMAC - Rn, 19 NMAC 8.2.9.906, 9-29-2000; A, 1-15-2002]

19.8.9.907 RECLAMATION PLAN: PROTECTION OF HYDROLOGIC BALANCE:

A. Each plan shall contain a detailed description, with appropriate maps and cross section drawings, of the measures to be taken during and after the proposed surface coal mining operations, in accordance with 19.8.20 NMAC, to ensure the protection of:

(1) the quality of surface and ground water systems, both within the proposed permit and adjacent areas, from the adverse effects of the proposed surface coal mining operations;

(2) the rights of present users of surface and ground water;

(3) the quantity of surface and ground water both within the proposed permit area and adjacent area from adverse effects of the proposed surface coal mining operations, or to provide alternative sources of water in accordance with 19.8.8.806 and 19.8.20.2022 NMAC, where the protection of quantity cannot be ensured; and

(4) water quality by locating openings for underground mines in accordance with 19.8.20.2026 NMAC.

B. The description shall include:

(1) a plan for the control, in accordance with 19.8.20 NMAC, of surface and ground water drainage into, through and out of the proposed permit area;

(2) a plan for the treatment, where required under 19.8.19 through 19.8.28 NMAC and 19.8 NMAC, of surface and ground water drainage from the area to be disturbed by the proposed operations, and proposed quantitative limits on pollutants in discharges subject to 19.8.20.2010 NMAC according to the more stringent of the following:

(a) 19.8.19 through 19.8.28 NMAC and 19.8 NMAC;

(b) other applicable state and federal laws;

(3) for surface mining activities, a plan for the restoration of the approximate recharge capacity of the permit and adjacent areas in accordance with 19.8.20.2019 NMAC; and

(4) a plan for the collection, recording, and reporting of ground and surface water quality and quantity data, according to 19.8.20.2020 NMAC and based on the determination required under Subsection C of 19.8.9.907 NMAC and the analysis of all baseline hydrologic, geologic and other information in the permit application; the plan shall provide for the monitoring of parameters that relate to the suitability of surface and ground water for current and approved postmining land uses and to the objectives for protection of the hydrologic balance set forth in Subsection A of 19.8.9.907 NMAC; it shall identify the quantity and quality parameters to be monitored, sampling frequency, and site locations; it shall describe how the data may be used to determine the impacts of the operation upon the hydrologic balance;

(a) ground-water monitoring plan; at a minimum, total dissolved solids or specific conductance corrected to 25 degrees C, pH, total iron, total manganese, and water levels shall be monitored and data submitted to the director every 3 months for each monitoring location; the director may require additional monitoring when necessary;

(b) surface water monitoring plan; at all monitoring locations in the surface-water bodies such as streams, lakes, and impoundments, that are potentially impacted or into which water will be discharged and at upstream monitoring locations the total dissolved solids or specific conductance corrected to 25 degrees C, total suspended solids, pH, total iron, total manganese, and flow shall be monitored; the monitoring reports shall be submitted to the director every 3 months; the director may require additional monitoring when necessary.

C. The description shall include a determination of the probable hydrologic consequences of the proposed surface coal mining operations on the cumulative impact area and shall address all proposed mining activities associated with the permit area for which a permit is sought, not just those expected to occur during the term of the permit. This determination shall include findings on:

(1) whether adverse impacts may occur to the hydrologic balance;

(2) whether acid-forming or toxic-forming materials are present that could result in the contamination of surface or ground-water supplies;

(3) whether the proposed operation may proximately result in contamination, diminution or interruption of an underground or surface source of water within the proposed permit or adjacent areas which is used for domestic, agricultural, industrial, or other legitimate purpose, and;

(4) what impact the proposed operation will have on:

(a) sediment yield from the disturbed area;

(b) acidity, total suspended and dissolved solids, and other important water quality parameters of local impact;

(c) flooding or streamflow alteration;

(d) ground-water and surface-water availability; and

(e) other characteristics as required by the director;

(5) a plan that specifically addresses any potential adverse hydrologic consequences identified under Subsection C of 19.8.9.907 NMAC and shall include preventive and remedial measures to be taken during mining and reclamation operations through bond release to minimize disturbance to the hydrologic balance within the cumulative impact area.

D. All water-quality analyses performed to meet the requirements of this section shall be conducted according to the methodology in the 15th edition of "standard methods for the examination of water and wastewater," which is incorporated by reference, or the methodology in 40 CFR Parts 136 and 434. Water quality sampling performed to meet the requirements of this section shall be conducted according to either methodology listed above when feasible.

E. Each plan for underground mining shall contain a detailed description, with appropriate drawings, of permanent entry seals and down-slope barriers designed to ensure stability under anticipated hydraulic heads developed while promoting mine inundation after mine closure for the proposed permit areas.

[11-29-97; 19.8.9.907 NMAC - Rn, 19 NMAC 8.2.9.907, 9-29-2000]

19.8.9.908 RECLAMATION PLAN: POSTMINING LAND USES:

A. Each plan shall contain a detailed description of the proposed use, following reclamation of the land within the proposed permit area for surface mining activities or for underground mining activities, the areas to be affected within the proposed permit area by surface operations or facilities, including a discussion of the utility and capacity of the reclaimed land to support a variety of alternative uses, and the relationship of the proposed use to existing land use policies and plans. This description shall explain:

(1) how the proposed postmining, land use is to be achieved and the necessary support activities which may be needed to achieve the proposed land use;

(2) for surface mining activities, where range or grazing is the proposed postmining use, the detailed management plans to be implemented;

(3) where a land use different from the pre-mining land use is proposed, all materials needed for approval of the alternative use under 19.8.20.2075 NMAC; and

(4) the consideration which has been given to making all of the proposed surface coal mining operations consistent with surface owner plans and applicable state and local land use plans and programs.

B. The description shall be accompanied by a copy of the comments concerning the proposed use by the legal or equitable owner of record of the surface of the proposed permit area for surface mining activities or for underground mining activities, the areas to be affected within the proposed permit area by surface operations or facilities, and the state and local government agencies which would have to initiate, implement, approve, or authorize the proposed use of the land following reclamation, unless such owners and agencies fail to make such comments within 30 days.

[11-29-97; A, 12-15-99; 19.8.9.908 NMAC- Rn, 19 NMAC 8.2.9.908, 9-29-2000]

19.8.9.909 RECLAMATION PLAN: PONDS, IMPOUNDMENTS, BANKS, DAMS AND EMBANKMENTS:

A. General. Each application shall include a general plan for each proposed sedimentation pond, water impoundment, and coal processing waste bank, dam, or embankment within the proposed permit area.

(1) Each general plan shall:

(a) be prepared by, or under the direction of, and certified by a registered professional engineer, with assistance from experts in related fields such as land surveying, reclamation or mined land rehabilitation;

(b) contain a description, map, and cross section of the structure and its location;

(c) contain preliminary hydrologic and geologic information required to assess the hydrologic impact of the structure;

(d) contain a survey describing the potential effect on the structure from subsidence of the subsurface strata resulting from past underground mining operations if underground mining has occurred; and

(e) contain a certification statement which includes a schedule setting forth the dates that any detailed design plans for structures that are not submitted with the general plan will be submitted to the director; the director shall have approved, in writing, the detailed design plan for a structure before construction of the structure begins.

(2) Each detailed design plan for a structure that meets the U.S. natural resources conservation service class B or C criteria for dams in NRCS technical release No. 60 (210-VI-TR60, Oct. 1985), "earth dams and reservoirs", or meets or exceeds the

size or other criteria of the mine safety and health administration, 30 CFR 77.216(a) shall:

(a) be prepared by, or under the direction of, and certified by a qualified registered professional engineer with assistance from experts in related fields such as geology, land surveying, reclamation or mined land rehabilitation;

(b) include any geotechnical investigation, design, and construction requirements for the structure;

(c) describe the operation and maintenance requirements for each structure;
and

(d) describe the timetable and plans to remove each structure, if appropriate.

(3) Each detailed design plan for a structure that does not equal or exceed the size or other criteria in Paragraph (2) of Subsection A of 19.8.9.909 NMAC shall:

(a) be prepared by, or under the direction of, and certified by a qualified registered professional engineer or registered land surveyor except that all coal processing waste dams and embankments covered by 19.8.20.2047 through 2049 NMAC shall be certified by qualified registered professional engineer;

(b) include any design and construction requirements for the structure, including any required geotechnical information;

(c) describe the operation and maintenance requirements for each structure;
and

(d) describe the timetable and plans to remove each structure, if appropriate.

B. Sedimentation ponds. Sedimentation ponds, whether temporary or permanent, shall be designed in compliance with the requirements of 19.8.20.2014 NMAC. Any sedimentation pond or earthen structure which will remain on the proposed permit area as a permanent water impoundment shall also be designed to comply with the requirements of 19.8.20.2017 NMAC. Each plan shall, at a minimum, comply with the requirements of the mine safety and health administration, 30 CFR 77.216-1 and 77.216-2, and the state engineer and shall be submitted to the director as part of the permit application.

C. For impoundments not included in Paragraph (2) of Subsection A of 19.8.9.909 NMAC, the director may establish through the state program approval process, engineering design standards that ensure stability comparable to a 1.3 minimum static safety factor in lieu of engineering tests to establish compliance with the minimum static safety factor of 1.3 specified in Paragraph (3) of Subsection E of 19.8.20.2017 NMAC.

D. Coal processing waste banks. Coal processing waste banks shall be designed to comply with the requirements of 19.8.20.2039 through 2042 NMAC.

E. Coal processing waste dams and embankments. Coal processing waste dams and embankments shall be designed to comply with the requirements of 19.8.20.2047 through 2049 NMAC. Each plan shall be submitted to the director as a part of the permit application, and shall comply with the requirements of the mine safety and health administration, 30 CFR 77.216-1 and 77.216-2 and the state engineer and shall contain the results of a geotechnical investigation of the proposed dam or embankment foundation area, to determine the structural competence of the foundation which will support the proposed dam or embankment structure and the impounded material. The geotechnical investigation shall be planned and supervised by an engineer or engineering geologist, according to the following:

(1) the number, location, and depth of borings and test pits shall be determined using current prudent engineering practice for the size of the dam or embankment, quantity of material to be impounded, and subsurface conditions;

(2) the character of the overburden and bedrock, the proposed abutment sites, and any adverse geotechnical conditions which may affect the particular dam, embankment, or reservoir site shall be considered;

(3) all springs, seepage, and ground water flow observed or anticipated during wet periods in the area of the proposed dam or embankment shall be identified on each plan;

(4) consideration shall be given to the possibility of mudflows, rock debris falls, or other landslides into the dam, embankment, or impounded material;

(5) if the structure meets the class B or C criteria for dams in TR-60 or meets the size or other criteria of 30 CFR Sec. 77.216(a), each plan under Subsections B, C and E of 19.8.9.909 NMAC shall include a stability analysis of the structure; the stability analysis shall be performed by a registered professional engineer and shall include, but not be limited to, strength parameters, pore pressures, and long-term seepage conditions; the plan shall also contain a description of each engineering design assumption and calculation with a discussion of each alternative considered in selecting the specific design parameters and construction methods.

[11-29-97; A, 12-15-99; 19.8.9.909 NMAC - Rn, 19 NMAC 8.2.9.909, 9-29-2000]

19.8.9.910 RECLAMATION PLAN: SURFACE MINING NEAR UNDERGROUND MINING:

For surface mining activities within the proposed permit area to be conducted within 500 feet of an underground mine, the application shall describe the measures to be used to comply with 19.8.20.2038.

[11-29-97; 19.8.9.910 NMAC - Rn, 19 NMAC 8.2.9.910, 9-29-2000]

19.8.9.911 DIVERSIONS:

Each application shall contain descriptions, including maps and cross sections, of stream channel diversions and other diversions to be constructed within the proposed permit area to achieve compliance with 19.8.20.2011 and 2012 NMAC.

[11-29-97; 19.8.9.911 NMAC - Rn, 19 NMAC 8.2.9.911, 9-29-2000]

19.8.9.912 PROTECTION OF PUBLIC PARKS AND HISTORIC PLACES:

A. Proposed operations that may have an adverse effect on any publicly owned parks or any places listed on the national register of historic places shall include a plan:

(1) describing the measures to be used to prevent or alleviate adverse impacts, or

(2) designed to minimize adverse impacts when valid existing rights exist or joint agency approval is to be obtained under Subsection E of 19.8.2.202 NMAC.

B. The director may require the applicant to prevent or alleviate impacts to any historic or archeological properties listed on or eligible for listing on the national register of historic places through appropriate mitigation and treatment measures. Appropriate mitigation and treatment measures may be required to be taken after permit issuance provided that the required measures are completed before the properties are affected by any mining operation.

[11-29-97; 19.8.9.912 NMAC - Rn, 19 NMAC 8.2.9.912, 9-29-2000; A, 1-15-2001]

19.8.9.913 RELOCATION OR USE OF PUBLIC ROADS:

Each application shall describe, with appropriate maps and cross sections, the measures to be used to ensure that the interests of the public and landowners affected are protected if, under Subsection D of 19.8.2.202 NMAC, the applicant seeks to have the director approve:

A. conducting the proposed surface coal mining operations within 100 feet of the right-of-way line of any public road, except where mine access or haul roads join that right-of-way; or

B. relocating a public road.

[11-29-97; 19.8.9.913 NMAC - Rn, 19 NMAC 8.2.9.913, 9-29-2000]

19.8.9.914 DISPOSAL OF EXCESS SPOIL FROM SURFACE MINING ACTIVITIES:

A. For surface mining activities, each application shall contain descriptions, including appropriate maps and cross section drawings, of the proposed disposal site and design of the spoil disposal structures according to 19.8.20.2034 through 2037 NMAC. These plans shall describe the geotechnical investigation, design, construction, operation, maintenance, and removal, if appropriate, of the site and structures.

B. Each such application shall contain the results of a geotechnical investigation of the proposed disposal site, including the following:

(1) the character of bedrock and any adverse geologic conditions in the disposal area;

(2) a survey identifying all springs, seepage and ground water flow observed or anticipated during wet periods in the area of the disposal site;

(3) a survey of the potential effects of subsidence of the subsurface strata due to past and future mining operations;

(4) a technical description of the rock materials to be utilized in the construction of those disposal structures containing rock chimney cores or underlain by a rock drainage blanket; and

(5) a stability analysis including, but not limited to, strength parameters, pore pressures and long-term seepage conditions. These data shall be accompanied by a description of all engineering design assumptions and calculations and the alternatives considered in selecting the specific design specifications and methods.

C. If, under Subsection I of 19.8.20.2034 NMAC, rock-toe buttresses or key-way cuts are required, the application shall include the following:

(1) the number, location, and depth of borings or test pits which shall be determined with respect to the size of the spoil disposal structure and subsurface conditions; and

(2) engineering specifications utilized to design the rock-toe buttress or key-way cuts which shall be determined in accordance with Paragraph (5) of Subsection B of 19.8.9.914 NMAC.

[11-29-97; 19.8.9.914 NMAC - Rn, 19 NMAC 8.2.9.914, 9-29-2000]

19.8.9.915 DISPOSAL OF UNDERGROUND DEVELOPMENT WASTE:

Each plan shall contain descriptions, including appropriate maps and cross section drawings of the proposed disposal methods and sites for placing underground development waste and excess spoil generated at surface areas affected by surface operations and facilities, according to 19.8.20.2034 through 2037 NMAC. Each plan

shall describe the geotechnical investigation, design, construction, operation, maintenance and removal, if appropriate, of the structures and be prepared according to 19.8.9.914 NMAC.

[11-29-97; 19.8.9.915 NMAC - Rn, 19 NMAC 8.2.9.915, 9-29-2000]

19.8.9.916 TRANSPORTATION FACILITIES:

Each application for a permit to conduct surface coal mining and reclamation operations shall contain plans and drawings for each road, conveyor, or rail system to be constructed, used or maintained within the proposed permit area. Plans and drawings shall include a map, appropriate cross sections, and the following:

A. specifications for road widths, road gradients, road surfaces, road cuts, fill embankments, culverts, bridges, drainage ditches, drainage structures and low-water crossings;

B. a description of measures to be taken to obtain approval of the director for alteration or relocation of a natural drainage way under Paragraph (1) of Subsection E of 19.8.20.2076 or Paragraph (5) of Subsection C of 19.8.20.2077 NMAC;

C. drawings and specifications for roads proposed to be located in channels of intermittent or perennial streams; this includes each ford or low water crossing of intermittent and perennial streams;

D. plans and schedules for the removal and reclamation of each road not proposed for retention as part of the post-mining land use;

E. plans and drawings for each primary road shall be prepared by, or under the direction of, and certified by a registered professional engineer or a qualified registered professional land surveyor, experienced in the design and construction of roads, as meeting all program requirements and current, prudent engineering practices.

[11-29-97; A, 12-15-99; 19.8.9.916 NMAC - Rn, 19 NMAC 8.2.9.916, 8/31/2000; A, 12-31-2007]

19.8.9.917 RETURN OF COAL PROCESSING WASTE TO ABANDONED UNDERGROUND WORKINGS:

A. Each plan shall describe the design, operation and maintenance of any proposed coal processing waste disposal facility, including flow diagrams and any other necessary drawings and maps, for the approval of the director and the mine safety and health administration under 19.8.20.2045 NMAC.

B. Each plan shall describe the source and quality of waste to be stored, area to be backfilled, percent of the mine void to be filled, method of constructing underground

retaining walls, influence of the backfilling operation on active underground mine operations, surface area to be supported by the backfill, and the anticipated occurrence of surface effects following backfilling.

C. The applicant shall describe the source of the hydraulic transport mediums, method of dewatering the placed backfill, retention of water underground, treatment of water if released to surface streams, and the effect on the hydrologic regime.

D. The plan shall describe each permanent monitoring well to be located in the backfilled area, the stratum underlying the mined coal, and gradient from the backfilled area.

E. The requirements of Subsections A, B, C and D of 19.8.9.917 NMAC shall also apply to pneumatic backfilling operations, except where the operations are exempted by the director from requirements specifying hydrologic monitoring.

[11-29-97; 19.8.9.917 NMAC - Rn, 19 NMAC 8.2.9.917, 9-29-2000; A, 12-31-2007]

19.8.9.918 SUBSIDENCE INFORMATION AND CONTROL PLAN:

A. An application for an underground coal mine shall include the following information:

(1) a topographic map of the permit and adjacent areas at a scale of 1:12,000 or larger, as required by the director, showing the location and type of structures and renewable resource lands that subsidence may materially damage or for which the value or reasonably foreseeable use may be diminished by subsidence, and showing the location and type of drinking, domestic, and residential water supplies that could be contaminated, diminished, or interrupted by subsidence;

(2) a narrative indicating whether subsidence, if it occurred, could cause material damage to or diminish the value or reasonably foreseeable use of such structures or renewable resource lands or could contaminate, diminish, or interrupt drinking, domestic, or residential water supplies;

(3) a survey of the condition of all non-commercial buildings or occupied residential dwellings and associated structures, including a photograph of the exterior of each prior to mining and the name and address of the owner or owners, that may be materially damaged or for which the reasonably foreseeable use may be diminished by subsidence, within the area encompassed by the applicable angle of draw;

(4) a survey of the quantity and quality of all drinking, domestic, and residential water supplies within the permit area and adjacent area that could be contaminated, diminished, or interrupted by subsidence;

(5) if the applicant cannot complete the surveys required in Paragraphs (3) and (4) of Subsection A of 19.8.9.918 NMAC because the owner or owners will not allow access, the applicant will notify the owner, in writing, of the effect that denial of access will have as described in Subsection C of 19.8.20.2069 NMAC; and

(6) the applicant must pay for any technical assessment or engineering evaluation used to determine the pre-mining condition or value of such non-commercial buildings or occupied residential dwellings and structures related thereto and the quantity and quality of drinking, domestic, or residential water supplies; the applicant must provide copies of the survey and any technical assessment or engineering evaluation to the property owner or owners and regulatory authority.

B. If the survey conducted under Subsection A of 19.8.9.918 NMAC shows that no structures, or drinking, domestic, or residential water supplies, or renewable resource lands exist, or that no material damage or diminution in value or reasonably foreseeable use of such structures or lands, and no contamination, diminution, or interruption of such water supplies would occur as a result of mine subsidence, and if the regulatory authority agrees with this conclusion, no further information need be provided under this section.

C. If the survey shows that structures, renewable resource lands, or water supplies exist and that subsidence could cause material damage or diminution in value or reasonably foreseeable use, or contamination, diminution, or interruption of protected water supplies, or if the regulatory authority determines that damage, diminution in value or foreseeable use, or contamination, diminution, or interruption could occur, the application must include a subsidence control plan that contains the following information:

(1) a description of the method of coal removal, such as longwall mining, room-and-pillar removal or hydraulic mining, including the size, sequence and timing of the development of underground workings;

(2) a map of the underground workings that describes the location and extent of the areas in which planned-subsidence mining methods will be used and that identifies all areas where the measures described in Paragraphs (4), (5) and (7) of Subsection C of 19.8.9.918 NMAC will be taken to prevent or minimize subsidence and subsidence-related damage; and, when applicable, to correct subsidence-related material damage;

(3) a description of the physical conditions, such as depth of cover, seam thickness and lithology of overlying strata, that affect the likelihood or extent of subsidence and subsidence-related damage;

(4) a description of the monitoring, if any, needed to determine the commencement and degree of subsidence so that, when appropriate, other measures

can be taken to prevent, reduce or correct material damage in accordance with 19.8.20.2069 NMAC;

(5) except for those areas where planned subsidence is projected to be used, a detailed description of the subsidence control measures that will be taken to prevent or minimize subsidence and subsidence-related damage, such as, but not limited to:

(a) backstowing or backfilling of voids;

(b) leaving support pillars of coal;

(c) leaving areas in which no coal is removed, including a description of the overlying area to be protected by leaving coal in place; and

(d) taking measures on the surface to prevent or minimize material damage or diminution in value of the surface;

(6) a description of the anticipated effects of planned subsidence, if any;

(7) for those areas where planned subsidence is projected to be used, a description of methods to be employed to minimize damage from planned subsidence to non-commercial buildings and occupied residential dwellings and structures related thereto; or the written consent of the owner or owners of the structure or facility that minimization measures not be taken; or, unless the anticipated damage would constitute a threat to health or safety, a demonstration that the costs of minimizing damage exceed the anticipated costs of repair;

(8) a description of the measures to be taken in accordance with 19.8.20.2069 NMAC to replace adversely affected protected water supplies or to mitigate or remedy any subsidence-related material damage to the land and protected structures; and

(9) other information specified by the director as necessary to demonstrate that the operation will be conducted in accordance with 19.8.20.2067, 2068, 2069 and 2070 NMAC.

D. The operator shall submit a detailed plan of the underground workings. The detailed plan shall include maps and descriptions, as appropriate, of significant features of the underground mine, including the size, configuration, and approximate location of pillars and entries, extraction ratios, measures taken to prevent or minimize subsidence and related damage, areas of full extraction, and other information required by the regulatory authority. The detailed plan shall be provided and updated consistent with a schedule approved by the director. Upon request of the operator, information submitted with the detailed plan may be held as confidential, in accordance with the requirements of 19.8.11.1104 NMAC.

[11-29-97; 19.8.9.918 NMAC - Rn, 19 NMAC 8.2.9.918 & A, 9-29-2000]

19.8.9.919 SUPPORT FACILITIES:

Each applicant for a surface coal mining and reclamation permit shall submit a description, plans, and drawings for each support facility to be constructed, used, or maintained within the proposed permit area. The plans and drawings shall include a map, appropriate cross sections, design drawings, and specifications sufficient to demonstrate compliance with 19.8.20.2078 and 2079 NMAC for each facility.

[11-29-97; A, 12-15-99; 19.8.9.919 NMAC - Rn, 19 NMAC 8.2.9.919, 9-29-2000]

PART 10: REQUIREMENTS FOR PERMITS FOR SPECIAL CATEGORIES OF MINING

19.8.10.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.10.1 NMAC - N, 9-29-2000]

19.8.10.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979)

[19.8.10.2 NMAC - N, 9-29-2000]

19.8.10.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979)

[19.8.10.3 NMAC - N, 9-29-2000]

19.8.10.4 DURATION:

Permanent

[19.8.10.4 NMAC - N, 9-29-2000]

19.8.10.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.10.5 NMAC - N, 9-29-2000]

19.8.10.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

19.8.10.1000 EXPERIMENTAL PRACTICES MINING:

A. Each person who desires to conduct an experimental practice shall submit a permit application for the approval of the director and the director of the office of surface mining. The permit application shall contain appropriate descriptions, maps, plans and data which show:

(1) the nature of the experimental practice;

(2) how use of the experimental practice:

(a) encourages advances in mining and reclamation technology, or

(b) allows a postmining land use for industrial, commercial, residential, or public use (including recreational facilities), on an experimental basis, when the results are not otherwise attainable under the act and 19.8 NMAC;

(3) that the mining and reclamation operations proposed for using an experimental practice are not larger or more numerous than necessary to determine the effectiveness and economic feasibility of the experimental practice;

(4) that the experimental practice:

(a) is potentially more or at least as environmentally protective, during and after the proposed mining and reclamation operations, as those required under 19.8.19 through 19.8.28 NMAC and 19.8 NMAC; and

(b) will not reduce the protection afforded public health and safety below that provided by the requirements of 19.8.19 through 19.8.28 NMAC and 19.8 NMAC;

(5) that the applicant will conduct special monitoring with respect to the experimental practice during and after the operations involved; the monitoring program shall:

(a) insure the collection and analysis of sufficient and reliable data to enable the director and the regional director of the office of surface mining to make adequate comparisons with other surface coal mining and reclamation operations employing similar experimental practices; and

(b) include requirements designed to identify, as soon as possible, potential risks to the environment and public health and safety from the use of the experimental practice.

B. Each application shall set forth the environmental protection performance standards of 19.8.19 through 19.8.28 NMAC which will be implemented in the event the objective of the experimental practice is a failure.

C. All experimental practices for which variances are sought shall comply with the public notice requirements of 19.8.11.1100 NMAC.

D. No permit authorizing an experimental practice shall be issued, unless the director first finds, in writing, upon the basis of both a complete application filed in accordance with the requirements of this section and the comments of the director of the office of surface mining that:

(1) the experimental practice meets all of the requirements of Paragraphs (1) through (5) of Subsection A of 19.8.10.1000 NMAC;

(2) the experimental practice is based on a clearly defined set of objectives which can reasonably be expected to be achieved; and

(3) the experimental practice has been specifically approved, in writing by the director of the office of surface mining;

(4) the permit contains conditions which specifically:

(a) limit the experimental practice authorized to that granted by the director and the director of the office of surface mining;

(b) impose enforceable alternative environmental protection requirements;
and

(c) require the person to conduct the periodic monitoring, recording and reporting program set forth in the application, with such additional requirements as the director or the director of the office of surface mining may require.

E. Experimental practices granting variances from the special environmental protection performance standards of Section 69-25A-19 and 69-25A-20 NMSA 1978 of the act applicable to prime farmlands shall be approved only after consultation with U.S. department of agriculture natural resources conservation service.

F. Each permit which authorizes the use of an experimental practice shall be reviewed in its entirety by the director at a frequency set forth in the approved permit, but no less frequently than every 2 1/2 years. After review, the director shall, with consent of the director of the office of surface mining, require by order, supported by written findings, any reasonable revision or modification of the permit provisions necessary to ensure that the operations involved are conducted to protect fully the environment and public health and safety. Copies of the decision of the director shall be sent to the permittee and shall be subject to the provisions for administrative and judicial review of 19.8.12 NMAC.

G. Revisions or modifications to an experimental practice shall be processed in accordance with the requirements of 19.8.13.1301 NMAC and approved by the director. Any revisions which propose significant departures in the experimental practice shall, at a minimum, be subject to the requirements of 19.8.11 and 19.8.12 NMAC and to the concurrence by the director of the office of surface mining. Revisions that do not propose significant departures in the experimental practice shall not require concurrence by the director of the office of surface mining.

[11-29-97; 19.8.10.1000 NMAC - Rn, 19 NMAC 8.2.10.1000, 9-29-2000; A, 12-31-2007]

19.8.10.1001 MOUNTAINTOP REMOVAL MINING:

A. Mountaintop removal mining means surface mining activities, where the mining operation removes an entire coal seam or seams running through the upper fraction of a mountain, ridge, or hill except as provided for in Subsection F of 19.8.25.2500 NMAC, by removing substantially all of the overburden off the bench and creating a level plateau or a gently rolling contour, with no highwalls remaining, and capable of supporting postmining land uses in accordance with the requirements of this section.

B. The director may issue a permit for mountaintop removal mining, without regard to the requirements of 19.8.20.2054 through 2058 NMAC, to restore the lands disturbed by such mining to their approximate original contour, if he first finds, in writing, on the basis of a complete application, that the following requirements are met:

(1) the proposed postmining land use of the lands to be affected will be an industrial, commercial, agricultural, residential, or public facility (including recreational facilities) use and, if:

(a) after consultation with the appropriate land-use planning agencies, if any, the proposed land use is deemed by the director to constitute an equal or better economic or public use of the affected land compared with the pre-mining use;

(b) the applicant demonstrates compliance with the requirements for acceptable alternative postmining land uses of 19.8.20.2075 NMAC;

(c) the proposed use would be compatible with adjacent land uses and existing state and local land use plans and programs; and

(d) the director has provided, in writing, an opportunity of not more than 60 days to review and comment on such proposed use to the governing body of general purpose government in whose jurisdiction the land is located and any state or federal agency which the director, in his discretion, determines to have an interest in the proposed use;

(2) the applicant has demonstrated that, in place of restoration of the land to be affected to the approximate original contour under 19.8.20.2054 through 2058 NMAC, the operation will be conducted in compliance with the requirements of 19.8.25 NMAC;

(3) the requirements of 19.8.25 NMAC are made a specific condition of the permit;

(4) all other requirements of the act and 19.8 NMAC are met by the proposed operations.

C. Permit reviews.

(1) Any permits incorporating a variance issued under this section shall be reviewed by the director to evaluate the progress and development of mining activities to establish that the operator is proceeding in accordance with the terms of the variance:

(a) within the sixth month preceding the third year from the date of its issuance;

(b) before each permit renewal; and

(c) not later than the middle of each permit term.

(2) Any review required under Paragraph (1) of Subsection C of 19.8.10.1001 NMAC need not be held if the permittee has demonstrated and the director finds, in writing, within three months before the scheduled review, that all operations under the permit are proceeding and will continue to be conducted in accordance with the terms of the permit and requirements of the act and 19.8 NMAC.

(3) The terms and conditions of a permit for mountaintop removal mining may be modified at any time by the director, if he determines that more stringent measures are necessary to insure that the operation involved is conducted in compliance with the requirements of the act and 19.8 NMAC.

[11-29-97; 19.8.10.1001 NMAC - Rn, 19 NMAC 8.2.10.1001, 9-29-2000; A, 12-31-2007]

19.8.10.1002 STEEP SLOPE MINING:

A. This section applies to any person who conducts or intends to conduct steep slope surface coal mining and reclamation operations, except:

(1) where an operator proposes to conduct surface coal mining and reclamation operations on flat or gently rolling terrain, leaving a plain or predominantly flat area, but on which an occasional steep slope is encountered as the mining operation proceeds;

(2) where a person obtains a permit under the provisions of 19.8.10.1001 NMAC; or

(3) to the extent that a person obtains a permit incorporating a variance under 19.8.10.1003 NMAC.

B. Any application for a permit for surface coal mining and reclamation operations covered by this section shall contain sufficient information to establish that the operations will be conducted in accordance with the requirements of 19.8.26.2601 NMAC.

C. No permit shall be issued for any operations covered by this section, unless the director finds, in writing, that in addition to meeting all other requirements of 19.8.5 through 19.8.13 NMAC, the operation will be conducted in accordance with the requirements of 19.8.26.2601 NMAC.

[11-29-97; 19.8.10.1002 NMAC - Rn, 19 NMAC 8.2.10.1002, 9-29-2000; A, 12-31-2007]

19.8.10.1003 PERMIT INCORPORATING VARIANCES FROM APPROXIMATE ORIGINAL CONTOUR RESTORATION REQUIREMENTS FOR STEEP SLOPE MINING:

A. The director may issue a permit for surface mining activities incorporating a variance from the requirement for restoration of the affected lands to their approximate original contour only if he first finds, in writing, on the basis of a complete application, that all of the following requirements are met:

(1) the applicant has demonstrated that the purpose of the variance is to make the lands to be affected within the permit area suitable for an industrial, commercial, residential, or public use postmining land use;

(2) the proposed use, after consultation with the appropriate land-use planning agencies, if any, constitutes an equal or better economic or public use;

(3) the applicant has demonstrated compliance with the requirements for acceptable alternative postmining land uses of Subsection C of 19.8.20.2075 NMAC;

(4) the applicant has demonstrated that the watershed of lands within the proposed permit area and adjacent areas will be improved by the operations; the watershed will only be deemed improved if:

(a) there will be a reduction in the amount of total suspended solids or other pollutants discharged to ground or surface waters from the permit area as compared to such discharges prior to mining, so as to improve public or private uses of the ecology or such waters; or, there will be reduced flood hazards within the watershed containing the permit area by reduction of the peak flow discharges from precipitation events or thaws;

(b) the total volume of flows from the proposed permit area, during every season of the year, will not vary in a way that adversely affects the ecology of any surface water or any existing or planned use of surface or ground water; and

(c) the environment department approves the plan.

(5) the applicant has demonstrated that the owner of the surface of the lands within the permit area has knowingly requested, in writing, as part of the application, that a variance be granted; the request shall be made separately from any surface owner consent given for the operations under 19.8.7.703 NMAC and shall show an understanding that the variance could not be granted without the surface owner's request.

(6) the applicant has demonstrated that the proposed operations will be conducted in compliance with the requirements of 19.8.26.2602 NMAC;

(7) all other requirements of the act and 19.8 NMAC will be met by the proposed operations.

B. If a variance is granted under this section:

(1) the requirements of 19.8.26.2602 NMAC shall be made a specific condition of the permit;

(2) the permit shall be specifically marked as containing a variance from approximate original contour.

C. Any permits incorporating a variance issued under this section shall be reviewed by the director to evaluate the progress and development of the mining activities, to establish that the operator is proceeding in accordance with the terms of the variance:

(1) within the six month period preceding the third year from the date of its issuance;

(2) before each permit renewal; and

(3) not later than the middle of each subsequent permit term.

D. If the permittee demonstrates to the director at any of the times specified in Subsection C of 19.8.10.1003 NMAC that the operations involved have been and continue to be conducted in compliance with the terms and conditions of the permit, the requirements of the act and 19.8 NMAC, the review required at that time need not be held.

E. The terms and conditions of a permit incorporating a variance under this section may be modified at any time by the director, if he determines that more stringent measures are necessary to insure that the operations involved are conducted in compliance with the requirements of the act and 19.8 NMAC.

F. The director may only grant variances in accordance with this section if it has promulgated specific regulations to govern the granting of variances in accordance with the provisions of this section and additional and more stringent requirements as he deems to be necessary.

[11-29-97; 19.8.10.1003 NMAC - Rn, 19 NMAC 8.2.10.1003, 9-29-2000; A, 12-31-2007]

19.8.10.1004 PRIME FARMLANDS:

A. Application contents for prime farmlands. If land within the proposed permit area is identified as prime farmland under 19.8.8.814 NMAC, the applicant shall submit a plan for the mining and restoration of the land. Each plan shall contain, at a minimum:

(1) a soil survey of at least order 2 of the permit area according to the standards of the national cooperative soil survey and in accordance with the procedures set forth in U.S. department of agriculture handbooks 436 (soil taxonomy, 1975) and 18 (soil survey manual, 1951); the soil survey shall include a description of soil mapping units and a representative soil profile as determined by the U.S. natural resources

conservation service, including, but not limited to, soil-horizon depths, pH, and the range of soil densities for each prime farmland soil unit within the permit area; other representative soil profile descriptions from the locality, prepared according to the standards of the national cooperative soil survey, may be used if their use is approved by the state conservationist, U.S. natural resources conservation service; the director may request the operator to provide information on other physical and chemical soil properties as needed to make a determination that the operator has the technological capability to restore the prime farmland within the permit area to the soil-reconstruction standards of 19.8.24 NMAC;

(2) the location of areas to be used for the separate stockpiling of the soil and plans for soil stabilization before redistribution;

(3) if applicable, documentation, such as agricultural school studies or other scientific data from comparable areas, that supports the use of other suitable material, instead of the A, B, or C soil horizon, to obtain on the restored area equivalent or higher levels of yield as non-mined prime farmlands in the surrounding area under equivalent levels of management;

(4) plans for seeding or cropping the final graded disturbed land and the conservation practices to be used to adequately control erosion and sedimentation and restoration of an adequate soil moisture regime, during the period from completion of regrading until release of the performance bond or equivalent guarantee under 19.8.14 NMAC; proper adjustments for seasons must be proposed so that final graded land is not exposed to erosion during seasons when vegetation or conservation practices cannot be established due to weather conditions;

(5) available agricultural school studies or other scientific data for areas with comparable soils, climate, and management (including water management) that demonstrate that the proposed method of reclamation will achieve, within a reasonable time, equivalent or higher levels of yield after mining as existed before mining;

(6) current estimated yields under a proper level of management for each soil map unit from the USDA for each crop to be used in determining success of revegetation (19.8.24.2404 NMAC);

(7) in all cases, soil productivity for prime farmlands shall be returned to equivalent levels of yield as non-mined land of the same soil type in the surrounding area under equivalent management practices as determined from the soil survey performed pursuant to Paragraph (1) of Subsection A of 19.8.10.1004 NMAC.

B. Consultation with secretary of agriculture. Before any permit is issued for areas that include prime farmlands, the director shall consult with the U.S. secretary of agriculture. The U.S. secretary of agriculture shall provide for review and comment of the proposed method of soil reconstruction in the plan submitted under Subsection A of 19.8.10.1004 NMAC. If the U.S. secretary of agriculture considers those methods to be

inadequate, he or she shall suggest revisions resulting in more complete and adequate reconstruction. The U.S. secretary of agriculture has assigned his responsibilities under this section to the administrator of the U. S. natural resources conservation service. The natural resources conservation service shall carry out consultation and review through the state conservationist located in each state.

C. Issuance of permit. A permit for the mining and reclamation of prime farmland may be granted by the director, if he first finds, in writing, upon the basis of a complete application, that:

(1) the approved proposed postmining land use of these prime farmlands will be cropland;

(2) the permit incorporates as specific conditions the contents of the plan submitted under Subsection A of 19.8.10.1004 NMAC, after consideration of any revisions to that plan suggested by the U.S. secretary of agriculture under Subsection B of 19.8.10.1004 NMAC;

(3) the applicant has the technological capability to restore the prime farmland, within a reasonable time, to equivalent or higher levels of yield as non-mined prime farmland in the surrounding area under equivalent levels of management; and

(4) the proposed operations will be conducted in compliance with the requirements of 19.8.24 NMAC and other environmental protection performance and reclamation standards for mining and reclamation of prime farmland of the act and 19.8 NMAC.

[11-29-97; 19.8.10.1004 NMAC - Rn, 19 NMAC 8.2.10.1004, 9-29-2000; A, 12-31-2007]

19.8.10.1005 VARIANCES FOR DELAY IN CONTEMPORANEOUS RECLAMATION REQUIRED IN COMBINED SURFACE AND UNDERGROUND MINING OPERATIONS:

A. Application contents for variances. Any person who desires to obtain a variance under this section shall file with the director complete applications for both the surface mining activities and underground mining activities which are to be combined. The mining and reclamation operation plans for these permits shall contain appropriate narratives, maps and plans, which:

(1) show why the proposed underground mining activities are necessary or desirable to assure maximum practical recovery of coal;

(2) show how multiple future disturbances of surface lands or waters will be avoided;

(3) identify the specific surface areas for which a variance is sought and the particular sections of the act and 19.8 NMAC from which a variance is being sought;

(4) show how the activities will comply with 19.8.21 NMAC and other applicable requirements of the act and 19.8 NMAC;

(5) show why the variance sought is necessary for the implementation of the proposed underground mining activities;

(6) provide an assessment of the adverse environmental consequences and damages, if any, that will result if the reclamation of surface mining activities is delayed; and

(7) show how off-site storage of spoil will be conducted to comply with 19.8.20.2034 through 2037 NMAC, the requirements of the act and 19.8 NMAC.

B. Issuance of permit. A permit incorporating a variance under this section may be issued by the director, if he first finds, in writing, upon the basis of a complete application filed in accordance with this section, that:

(1) the applicant has presented, as part of the permit application, specific, feasible plans for the proposed underground mining activities;

(2) the proposed underground mining activities are necessary or desirable to assure maximum practical recovery of the mineral resource and will avoid multiple future disturbances of surface land or waters;

(3) the applicant has satisfactorily demonstrated that the applications for the surface mining activities and underground mining activities conform to the requirements of the act and 19.8 NMAC and that all other permits necessary for the underground mining activities have been issued by the appropriate authority;

(4) the surface area of surface mining activities proposed for the variance have been shown by the applicant to be necessary for implementing the proposed underground mining activities;

(5) no substantial adverse environmental damage, either on-site or off-site, will result from the delay in completion of reclamation otherwise required by Paragraph (16) of Subsection B of Section 69-25A-19 NMSA 1978 of the act, 19.8.20 NMAC and 19.8 NMAC;

(6) the operations will, insofar as a variance is authorized, be conducted in compliance with the requirements of 19.8.21 NMAC and 19.8 NMAC;

(7) provisions for off-site storage of spoil will comply with the requirements of Paragraph (22) of Subsection B of Section 69-25A-19 NMSA 1978 of the act, 19.8.20.2034 through 2037 NMAC and 19.8 NMAC;

(8) liability under the performance bond required to be filed by the applicant with the director pursuant to 19.8.14 NMAC, the act and 19.8 NMAC shall be for the duration of the underground mining activities and until all requirements of 19.8.14 NMAC and the act and 19.8 NMAC have been complied with; and

(9) the permit for the surface mining activities contains specific conditions:

(a) delineating the particular surface areas for which a variance is authorized;

(b) identifying the particular requirements of 19.8.21 NMAC, the act and 19.8 NMAC which are to be complied with, in lieu of the otherwise applicable provisions of Subsection B of Section 69-25A-19 NMSA 1978 of the act, 19.8.20 NMAC and 19.8 NMAC; and

(c) providing a detailed schedule for compliance with the particular requirements of 19.8.21 NMAC, the act and 19.8 NMAC identified under Subparagraph (b) of Paragraph (9) of Subsection B of 19.8.10.1005 NMAC.

C. Review of permits containing variances. Variances granted under permits issued under this section shall be reviewed by the director no later than 3 years from the dates of issuance of the permit and any permit renewals.

[11-29-97; 19.8.10.1005 NMAC - Rn, 19 NMAC 8.2.10.1005, 9-29-2000; A, 12-31-2007]

19.8.10.1006 SURFACE COAL MINING AND RECLAMATION OPERATIONS ON AREAS OR ADJACENT TO AREAS INCLUDING ALLUVIAL VALLEY FLOORS:

A. Alluvial valley floor determination.

(1) Before applying for a permit to conduct, or before conducting surface coal mining and reclamation operations within a valley holding a stream or in a location where the adjacent area includes any stream, the applicant shall either affirmatively demonstrate, based on available data, the presence of an alluvial valley floor, or submit to the director the results of a field investigation of the proposed permit area and adjacent area. The field investigations shall include sufficiently detailed geologic, hydrologic, land use, soils and vegetation studies on areas required to be investigated by the director, after consultation with the applicant, to enable the director to make an evaluation regarding the existence of the probable alluvial valley floor in the proposed permit area or adjacent area and to determine which areas, if any, require more detailed study in order to allow the director to make a final determination regarding the existence of an alluvial valley floor. Studies performed during the investigation by the applicant or

subsequent studies as required of the applicant by the director shall include an appropriate combination, adapted to site-specific conditions, of:

(a) mapping of unconsolidated stream-laid deposits holding streams including, but not limited to, geologic maps of unconsolidated deposits, and stream-laid deposits, maps of streams, delineation of surface watersheds and directions of shallow ground water flows through and into the unconsolidated deposits, topography showing local and regional terrace levels, and topography of terraces, flood plains and channels showing surface drainage patterns;

(b) mapping of all lands included in the area in accordance with this paragraph and subject to agricultural activities, showing the area in which different types of agricultural lands, such as flood irrigated lands, pasture lands and undeveloped rangelands exist, and accompanied by measurements of vegetation in terms of productivity and type;

(c) mapping of all lands that are currently or were historically flood irrigated, showing the location of each diversion structure, ditch, dam and related reservoir, irrigated land, and topography of those lands;

(d) documentation that areas identified in this paragraph are, or are not, subirrigated, based on ground water monitoring data, representative water quality, soil moisture measurements, and measurements of rooting depth, soil mottling, and water requirements of vegetation;

(e) documentation, based on representative sampling, that areas identified under this paragraph are, or are not, flood irrigable by a prudent person for sustained agricultural activities, based on stream-flow, water quality, water yield, soils measurements, and topographic characteristics;

(f) analysis of a series of aerial photographs, including color infrared imagery flown at a time of year to show any late summer and fall differences between upland and valley floor vegetative growth and of a scale adequate for reconnaissance identification of areas that may be alluvial valley floors.

(2) Based on the investigations conducted under Paragraph (1) of Subsection A of 19.8.10.1006 NMAC, the director shall make a determination of the extent of any alluvial valley floors within the study area and whether any stream in the study area may be excluded from further consideration as lying within an alluvial valley floor. The director shall determine that an alluvial valley floor exists if he finds that:

(a) unconsolidated stream-laid deposits holding streams are present; and

(b) there is sufficient water to support agricultural activities as evidenced by the existence of flood irrigation in the area in question or its recent historical use; the capability of an area to be flood irrigated by a prudent person for sustained agricultural

activities, based on stream-flow water yield, soils, water quality, and topography; or sub-irrigation of the lands in question, derived from the ground water system of the valley floor.

(3) The requirements of this paragraph shall not apply to applicants who affirmatively establish, to the satisfaction of the director, that the proposed operation shall not affect any area suggested to be an alluvial valley floor which is located outside the permit area or that the proposed operation will not be adjacent to any area suggested to be an alluvial valley floor. For the purposes of this paragraph, the director may rely on information submitted by the applicant which pertains only to the permit area if it establishes the existence of an effective buffer zone between the operation and the area in question so as to establish that such area will not be affected, notwithstanding its possible characterization as an alluvial valley floor.

B. Application contents for operations affecting designated alluvial valley floors.

(1) If land within the proposed permit area or adjacent area is identified as an alluvial valley floor and the proposed mining operation may affect an alluvial valley floor or waters that supply alluvial valley floors, the applicant shall submit a complete application for the proposed mining and reclamation operations, to be used by the director together with other relevant information, including the information required by Subsection A of 19.8.10.1006 NMAC, as a basis for approval or denial of the permit. The complete application shall include detailed surveys and baseline data required by the director for a determination of:

(a) the characteristics of the alluvial valley floor which are necessary to preserve the essential hydrologic functions during and after mining;

(b) the significance of the area to be affected to agricultural activities;

(c) whether the operation will cause, or presents an unacceptable risk of causing, material damage to the quantity or quality of surface or ground waters that supply the alluvial valley floor;

(d) the effectiveness of proposed reclamation with respect to requirements of the act and 19.8 NMAC; and

(e) specific environmental monitoring required to measure compliance with 19.8.23 NMAC during and after mining and reclamation operations.

(2) Information required under this paragraph shall include, but not be limited to:

(a) geologic data, including geologic structure, and surficial geologic maps, and geologic cross-sections;

(b) soils and vegetation data, including a detailed soil survey and chemical and physical analyses of soils, a vegetation map and narrative descriptions of quantitative and qualitative surveys, and land use data, including an evaluation of crop yields;

(c) surveys and data required under this paragraph for areas designated as alluvial valley floors because of their flood irrigation characteristics shall also include, at a minimum, surface hydrologic data, or extrapolation of such data, including streamflow, runoff, sediment yield, and water quality analyses describing seasonal variations field geomorphic surveys and other geomorphic studies;

(d) surveys and data required under this paragraph for areas designated as alluvial valley floors because of their subirrigation characteristics, shall also include, at a minimum, geohydrologic data, or extrapolation of such data, including observation well establishment for purposes of water level measurements, ground water contour maps, testing to determine aquifer characteristics that affect waters supplying the alluvial valley floors, well and spring inventories, and water quality analyses describing seasonal variations and physical and chemical analysis of overburden to determine the effect of the proposed mining and reclamation operations on water quality and quantity;

(e) plans showing how the operation will avoid, during mining and reclamation, interruption, discontinuance or preclusion of farming on the alluvial valley floors unless the pre-mining land use has been undeveloped rangeland which is not significant to farming and will not materially damage the quantity or quality of water in surface and ground water systems that supply alluvial valley floors;

(f) maps showing farms that could be affected by the mining and, if any farm includes an alluvial valley floor, statements of the type and quantity of agricultural activity performed on the alluvial valley floor and its relationship to the farm's total agricultural activity including an economic analysis; and

(g) such other data as the director may require.

(3) The surveys required by this paragraph should identify those geologic, hydrologic, and biologic characteristics of the alluvial valley floor necessary to support the essential hydrologic functions of an alluvial valley floor. Characteristics which support the essential hydrologic functions and which must be evaluated in a complete application include, but are not limited to:

(a) characteristics supporting the function of collecting water which include, but are not limited to:

(i) the amount and rate of runoff and a water balance analysis, with respect to rainfall, evapotranspiration, infiltration and ground water recharge;

(ii) the relief, slope, and density of the network of drainage channels;

(iii) the infiltration, permeability, porosity and transmissivity of unconsolidated deposits of the valley floor that either constitute the aquifer associated with the stream or lie between the aquifer and the stream; and

(iv) other factors that affect the interchange of water between surface streams and ground water systems, including the depth to ground water, the direction of ground water flow, the extent to which the stream and associated alluvial ground water aquifers provide recharge to, or are recharged by bedrock aquifers;

(b) characteristics supporting the function of storing water which include, but are not limited to:

(i) surface roughness, slope, and vegetation of the channel, flood plain, and low terraces that retard the flow of surface waters;

(ii) porosity, permeability, water-holding capacity, saturated thickness and volume of aquifers associated with streams, including alluvial aquifers, perched aquifers, and other water bearing zones found beneath valley floors; and

(iii) moisture held in soils or the plant growth medium within the alluvial valley floor, and the physical and chemical properties of the subsoil that provide for sustained vegetation growth or cover during extended periods of low precipitation;

(c) characteristics supporting the function of regulating the flow of water which include; but are not limited to:

(i) the geometry and physical character of the valley, expressed in terms of the longitudinal profile and slope of the valley and the channel, the sinuosity of the channel, the cross-section, slopes and proportions of the channels, flood plains and low terraces, the nature and stability of the stream banks and the vegetation established in the channels and along the stream banks and flood plains;

(ii) the nature of surface flows as shown by the frequency and duration of flows of representative magnitude including low flows and floods; and

(iii) the nature of interchange of water between streams, their associated alluvial aquifers and any bedrock aquifers as shown by the rate and amount of water supplied by the stream to associated alluvial and bedrock aquifers (i.e., recharge) and by the rates and amounts of water supplied by aquifers to the stream (i.e., baseflow);

(d) characteristics which make water available and which include, but are not limited to, the presence of land forms including flood plains and terraces suitable for agricultural activities.

C. Alluvial valley floor impact assessment and written findings.

(1) No permit or permit revision application for surface coal mining and reclamation operations shall be approved by the director, unless the application demonstrates and the director finds in writing, on the basis of information set forth in the application that:

(a) the proposed operations would not interrupt, discontinue or preclude farming on an alluvial valley floor, unless the premining land use has been undeveloped rangeland which is not significant to farming on the alluvial valley floor, or unless the area of an affected alluvial valley floor is small and provides, or may provide, negligible support for production of one or more farms; provided, however, this paragraph does not apply to those lands which were identified in a reclamation plan approved by the New Mexico coal surface mining commission prior to August 3, 1977, for any surface coal and reclamation operation that, in the year preceding August 3, 1977:

(i) produced coal in commercial quantities and was located within or adjacent to alluvial valley floors; or

(ii) obtained specific permit approval by the New Mexico coal surface mining commission to conduct surface coal mining and reclamation operations within an alluvial valley floor;

(b) the proposed operations would not materially damage the quantity and quality of water in surface and underground water systems that supply those alluvial valley floors or portions of alluvial valley floors which are:

(i) included in Subparagraph (a) of Paragraph (1) of Subsection C of 19.8.10.1006 NMAC; or

(ii) outside the permit area of an existing or proposed surface coal mining operation;

(c) the proposed operations would be conducted in accordance with 19.8.23 NMAC and all other applicable requirements of the act and 19.8 NMAC; and

(d) any change in the land use of the lands covered by the proposed permit area from its premining use in or adjacent to alluvial valley floors will not interfere with or preclude the reestablishment of the essential hydrologic functions of the alluvial valley floor.

(2) The significance of the impact of the proposed operations on farming will be based on the relative importance of the vegetation and water of the developed grazed or hayed alluvial valley floor area to the farm's production, or any more stringent criteria established by the director as suitable for site-specific protection of agricultural activities in alluvial valley floors.

(3) Criteria for determining whether a surface coal mining operation will materially damage the quantity or quality of waters, include, but are not limited to:

(a) potential increases in the concentration of total dissolved solids of waters supplied to an alluvial valley floor, as measured by using current standard methods. Such concentrations shall not exceed threshold values at which crop yields decrease according to documentation in current scientific publications, unless the applicant demonstrates compliance with Subparagraph (b) of Paragraph (3) of Subsection C of 19.8.10.1006 NMAC;

(b) potential increases in the concentration of total dissolved solids of waters supplied to an alluvial valley floor in excess of those incorporated by reference in Subparagraph (a) of Paragraph (3) of Subsection C of 19.8.10.1006 NMAC shall not be allowed unless the applicant demonstrates, through testing related to the production of crops grown in the locality, that the proposed operations will not cause increases that will result in crop yield decreases;

(c) for types of vegetation not listed in scientific publications, consideration of observed correlation between total dissolved solid concentrations in water and crop yield declines shall be taken into account along with the accuracy of the correlations;

(d) potential increases in the average depth to water saturated zones (during the growing season) located within the root zone of the alluvial valley floor that would reduce the amount of subirrigation land compared to premining conditions;

(e) potential decreases in surface flows that would reduce the amount of irrigable land compared to premining conditions; and

(f) potential changes in the surface or ground water systems that reduce the area available to agriculture as a result of flooding or increased saturation of the root zone.

(4) For the purposes of this paragraph, a farm is one or more land units on which agricultural activities are conducted. A farm is generally considered to be the combination of land units with acreage and boundaries in existence prior to August 3, 1977, or, if established after August 3, 1977, with those boundaries based on enhancement of the farm's agricultural productivity and not related to surface coal mining operations.

[11-29-97; 19.8.10.1006 NMAC - Rn, 19 NMAC 8.2.10.1006, 9-29-2000; A, 12-31-2007]

19.8.10.1007 AUGERING:

A. This section applies to any person who conducts or intends to conduct surface coal mining and reclamation operations utilizing augering operations.

B. Any application for a permit for operations covered by this section shall contain, in the mining and reclamation plan, a description of the augering methods to be used and the measures to be used to comply with 19.8.22 NMAC and demonstrate to the director that auger mining is the best method to recover the maximum coal resource.

C. No permit shall be issued for any operations covered by this section unless the director finds, in writing, that in addition to meeting all other applicable requirements of 19.8.5 through 19.8.13 NMAC, the operation will be conducted in compliance with 19.8.22 NMAC.

[11-29-97; 19.8.10.1007 NMAC - Rn, 19 NMAC 8.2.10.1007, 9-29-2000]

19.8.10.1008 COAL PROCESSING PLANTS OR SUPPORT FACILITIES NOT LOCATED WITHIN THE PERMIT AREA OF A SPECIFIED MINE:

A. This section applies to any person who conducts or intends to conduct surface coal mining and reclamation operations utilizing coal processing plants or support facilities not within a permit area of a specific mine. Any person who operates such a processing plant or support facility shall have obtained a permit from the director in accordance with the requirements of this section.

B. Any application for a permit for operations covered by this section shall contain in the mining and reclamation plan, specific plans, including descriptions, maps and cross-sections of the construction, operation, maintenance and removal of the processing plants and associated support facilities. The plan shall demonstrate that those operations will be conducted in compliance with 19.8.27 NMAC.

C. No permit shall be issued for any operation covered by this section, unless the director finds, in writing, that, in addition to meeting all other applicable requirements of 19.8.5 through 19.8.13 NMAC, the operations will be conducted in compliance with the requirements of 19.8.27 NMAC.

[11-29-97; 19.8.10.1008 NMAC - Rn, 19 NMAC 8.2.10.1008, 9-29-2000]

19.8.10.1009 IN SITU PROCESSING ACTIVITIES:

A. This section applies to any person who conducts or intends to conduct surface coal mining and reclamation operations utilizing in situ processing activities.

B. Any application for a permit for operations covered by this section shall be made according to all requirements of 19.8.5 through 19.8.13 NMAC applicable to underground mining activities. In addition, the mining and reclamation operations plan for operations involving in situ processing activities shall contain information establishing how those operations will be conducted in compliance with the requirements of 19.8.28 NMAC, including:

(1) delineation of proposed holes and wells and production zone for approval of the director;

(2) specifications of drill holes and casings proposed to be used;

(3) a plan for treatment, confinement or disposal of all acid-forming, toxic-forming or radioactive gases, solids, or liquids constituting a fire, health, safety or environmental hazard caused by the mining and recovery process; and

(4) plans for monitoring surface and ground water and air quality, as required by the director.

C. No permit shall be issued for operations covered by this section, unless the director first finds, in writing, upon the basis of a complete application made in accordance with Subsection B of 19.8.10.1009 NMAC, that the operation will be conducted in compliance with all requirements of 19.8.5 through 19.8.13 NMAC relating to underground mining activities, and 19.8.20 and 19.8.28 NMAC.

PART 11: REVIEW, PUBLIC PARTICIPATION, AND APPROVAL OR DISAPPROVAL OF PERMIT APPLICATIONS, TERMS AND CONDITIONS

19.8.11.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.11.1 NMAC- N, 9-29-2000]

19.8.11.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979)

[19.8.11.2 NMAC - N, 9-29-2000]

19.8.11.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979)

[19.8.11.3 NMAC - N, 9-29-2000]

19.8.11.4 DURATION:

Permanent

[19.8.11.4 NMAC - N, 9-29-2000]

19.8.11.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.11.5 NMAC - N, 9-29-2000]

19.8.11.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.11.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.11.7 DEFINITIONS:

[RESERVED]

[19.8.11.7 NMAC - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.11.8-19.8.11.1099 [RESERVED]:

[19.8.11.8 - 19.8.11.1099 NMAC - N, 9-29-2000]

19.8.11.1100 PUBLIC NOTICES OF FILING OF PERMIT APPLICATIONS:

A. An applicant applying for a permit shall place an advertisement in a newspaper of general circulation in the county of the proposed surface coal mining and reclamation operations, at least once a week for four consecutive weeks. The applicant shall place the advertisement in the newspaper at the same time the complete permit application is filed with the director. The advertisement shall contain, at a minimum, the following information:

- (1) the name and business address of the applicant; and
- (2) a map or description which shall:

(a) clearly show or describe towns, rivers, streams, or other bodies of water, local landmarks, and any other information, including routes, streets, or roads and

accurate distance measurements, necessary to allow local residents to readily identify the proposed permit area;

(b) clearly show or describe the exact location and boundaries of the proposed permit area;

(c) state the name of the U.S. geological survey 7.5-minute quadrangle map(s) which contains the area shown or described; and

(d) if a map is used, indicate the north point;

(3) the location where a copy of the application is available for public inspection under Subsection E of 19.8.11.1100 NMAC and a description of the information requested by the applicant to be held in confidence by the director;

(4) the name and address of the director to which written comments, objections or requests for informal conferences on the application may be submitted under 19.8.11.1101 through 1103 NMAC; and

(5) if an applicant seeks a permit to mine within 100 feet of the outside right-of-way of a public road or to relocate a public road, a concise statement describing the public road, the particular part to be relocated, where the relocation is to occur, and the duration of the relocation.

B. In addition to the requirements of Subsection A of 19.8.11.1100 NMAC, an applicant for a new permit or for a permit revision under 19.8.13.1301 NMAC shall submit , at the time of filing the application, a plan approved by the director to provide notice using at least three of the methods listed below. If the director determines that significant non-English speaking populations live within the general area of the proposed mine, the applicant shall include at least one method that seeks to reach these populations. The notice shall summarize the information listed in, and shall be given prior to the last publication of the notice in, Subsection A of 19.8.11.1100 NMAC. The methods may include:

(1) mailing a notice to the owners of record, as shown by the most recent property tax schedule, of all properties adjacent to the proposed permit area and to the owners of all properties containing a residence located within one-half mile (2640 feet) of the proposed permit area as identified in Subsection F of 19.8.7.701 NMAC;

(2) posting a notice in at least four publicly accessible and conspicuous places, including the entrance to the proposed operation if that entrance is publicly accessible and conspicuous;

(3) publishing a notice in a display ad at least three inches by four inches at a place in the newspaper calculated to give the general public the most effective notice; or

(4) broadcasting public service announcements on radio stations that serve the general permit area.

C. Upon receipt of a complete application for a permit, the director shall issue written notification of:

- (1) the applicant's intention to mine a particularly described tract of land;
- (2) the application number;
- (3) where a copy of the application may be inspected; and
- (4) where comments on the application may be submitted under 19.8.11.1101 NMAC.

D. The written notifications shall be sent to:

(1) federal, state, tribal and local government agencies with jurisdiction over or an interest in the area of the proposed operations, including, but not limited to, general governmental entities and fish and wildlife and historic preservation agencies;

(2) governmental planning agencies with jurisdiction to act with regard to land use, air, or water quality planning in the area of the proposed operations;

(3) sewage and water treatment authorities and water companies, either providing sewage or water services to users in the area of the proposed operations or having water sources or collection, treatment, or distribution facilities located in these areas; and

(4) the federal or state governmental agencies with authority to issue all other permits and licenses needed by the applicant in connection with operations proposed in the application; and

(5) all persons on a list maintained by the director of individuals and organizations who have requested notice of applications under the act and who have provided a surface or electronic mail address to the director.

E. Public inspection of the application.

(1) The applicant shall make a full copy of his complete application for a permit available for the public to inspect and copy. This shall be done by filing a copy of the application submitted to the director with the county clerk of the county where the mining is proposed to occur, or if approved by the director, at another equivalent public office, if it is determined that office will be more accessible to local residents than the county courthouse.

(2) The applicant shall file the copy of the complete application under Paragraph (1) of Subsection E of 19.8.11.1100 NMAC by the first date of newspaper advertisement of the application. The applicant shall file any subsequent revision of the application with the public office at the same time the revision is submitted to the director.

(3) The written notification shall be posted on a website maintained by the director after receipt of a complete application.

F. Public meeting. Within 60 days of receipt of a complete application for a new permit or a permit revision, the director shall hold a public meeting at a location near the proposed mining operation.

(1) The public meeting will serve as an opportunity for the director and applicant to inform the public of the proposed action and to provide an opportunity for the public to identify issues and concerns associated with the application.

(2) The director shall give notice at least fifteen days prior to the meeting date in a newspaper of general circulation and on radio stations serving the mine area.

(3) The director or his representative shall keep a record summarizing issues and concerns raised at the meeting.

(4) Any person attending the meeting may submit written comments to the director up to thirty days after the meeting.

[11-29-97; 19.8.11.1100 NMAC - Rn, 19 NMAC 8.2.11.1100, 9-29-2000; A, 4-28-2006; A, 12-31-2007]

19.8.11.1101 OPPORTUNITY FOR SUBMISSION OF WRITTEN COMMENTS ON PERMIT APPLICATIONS:

A. Written comments on permit applications may be submitted to the director by the public entities to whom notification is provided under Subsections C and D of 19.8.11.1100 NMAC, with respect to the effects of the proposed mining operations on the environment within their area of responsibility.

B. These comments shall be submitted to the director within 30 days following the last publication of the above notice.

C. The director shall immediately transmit a copy of all such comments for filing and public inspection at the public office where the applicant filed a copy of the application for permit under Subsection E of 19.8.11.1100 NMAC.

D. A copy shall also be transmitted to the applicant.

[11-29-97; 19.8.11.1101 NMAC - Rn, 19 NMAC 8.2.11.1101, 9-29-2000; A, 4-28-2006; A, 12-31-2007]

19.8.11.1102 RIGHT TO FILE WRITTEN OBJECTIONS:

A. Any person whose interests are or may be adversely affected or an officer or head of any federal, state, tribal or local governmental agency or authority shall have the right to file written objections to an initial or revised application for a permit with the director within 30 days after the last publication of the newspaper notice required by Subsection A of 19.8.11.1100 NMAC.

B. The director shall immediately upon receipt of any written objections:

(1) transmit a copy of them to the applicant; and

(2) file a copy for public inspection at the public office where the applicant filed a copy of the application for permit under Subsection E of 19.8.11.1100 NMAC.

[11-29-97; 19.8.11.1102 NMAC - Rn, 19 NMAC 8.2.11.1102, 9-29-2000; A, 4-28-2006; A, 12-31-2007]

19.8.11.1103 HEARINGS AND CONFERENCES:

A. Procedure for requests. Any person, whose interests are or may be adversely affected by the issuance, revision or renewal of the permit, or the officer or head of any federal, state, tribal or local government agency or authority may, in writing, request that the director hold an informal conference on any application for a permit. The request shall:

(1) briefly summarize the issues to be raised by the requestor at the conference;

(2) state whether the requestor desires to have the conference conducted in the locality of the proposed mining operations; and

(3) be filed with the director not later than 30 days after the last publication of the newspaper advertisement placed by the applicant under Subsection A of 19.8.11.1100 NMAC.

B. Except as provided in Subsection C of 19.8.11.1103 NMAC, if an informal conference is requested in accordance with Subsection A of 19.8.11.1103 NMAC, or upon the director's own motion, the director shall hold an informal conference within a reasonable time following the receipt of the request. The informal conference shall be conducted according to the following:

(1) if requested under Paragraph (2) of Subsection A of 19.8.11.1103 NMAC, it shall be held in the locality of the proposed mining;

(2) the date, time, and location of the informal conference shall be advertised by the director in a newspaper of general circulation in the county of the proposed surface coal mining and reclamation operations at least two weeks prior to the scheduled conference;

(3) if requested, in writing, by a conference requestor in a reasonable time prior to the conference, the director may arrange with the applicant to grant parties to the conference access to the permit area for the purpose of gathering information relevant to the conference;

(4) the conference shall be conducted by a representative of the director, who may accept oral or written statements and any other relevant information from any party to the conference; an electronic or stenographic record shall be made of the conference proceedings, unless waived by all the parties; the record shall be maintained and shall be accessible to parties of the conference until final release of the applicant's performance bond or other equivalent guarantee pursuant to 19.8.14 NMAC.

C. If all parties requesting the informal conference stipulate agreement before the requested informal conference and withdraw their request, the informal conference need not be held.

D. Informal conferences held in accordance with 19.8.11.1103 NMAC may be used by the director as the public hearing required under Subsection D of 19.8.2.202 NMAC on proposed uses or relocation of public roads.

[11-29-97; 19.8.11.1103 NMAC - Rn, 19 NMAC 8.2.11.1103, 9-29-2000; A, 4-28-2006; A, 12-31-2007]

19.8.11.1104 PUBLIC AVAILABILITY OF INFORMATION IN PERMIT APPLICATIONS ON FILE WITH THE DIRECTOR:

A. Information contained in permit applications on file with the director shall be open, upon written request, for public inspection and copying at reasonable times except for:

(1) information pertaining to coal seams, test borings, core samplings, or soil samples in permit applications shall be made available for inspection and copying to any person with an interest which is or may be adversely affected;

(2) information in permit applications which pertains only to the analysis of the chemical and physical properties of the coal to be mined (excepting information regarding mineral or elemental contents of such coal, which are potentially toxic in the environment) shall be kept confidential and not made a matter of public record; and

(3) information in the reclamation plan portions of the application, which is required to be filed with the director under Section 69-25A-12 NMSA 1978, and which is not otherwise a public record, shall be held in confidence by the director upon the written request of the applicant;

(4) information on the nature and location of archaeological resources on the public land and Indian land as required under the Archaeological Resources Protection Act of 1979 (Pub. L. 96-95, 93 Stat. 721, 16 U.S.C. 470);

(5) information required to be kept confidential shall be clearly identified by the applicant and submitted separately from other portions of the application.

B. Information requested to be held as confidential under 19.8.11.1104 NMAC shall not be made publicly available until after notice and opportunity to be heard is afforded both persons seeking and opposing disclosure of the information.

[11-29-97; 19.8.11.1104 NMAC - Rn, 19 NMAC 8.2.11.1104, 9-29-2000; A, 4-28-2006]

19.8.11.1105 REVIEW OF PERMIT APPLICATIONS:

A. Review and consultation.

(1) The director shall review the complete application and written comments, written objections submitted, and records of any informal conference held under 19.8.11.1101 through 1103 NMAC.

(2) The director shall determine the adequacy of the fish and wildlife plan submitted pursuant to 19.8.9.905 NMAC, in consultation with state and federal fish and wildlife management and conservation agencies having responsibilities for the management and protection of fish and wildlife or their habitats which may be affected or impacted by the proposed surface coal mining and reclamation operations.

B. If the director decides to approve the application, he shall require that the applicant file the performance bond or provide other equivalent guarantee before the permit is issued, in accordance with the provisions of 19.8.14 NMAC.

C. The director shall not issue the permit if any surface coal mining and reclamation operation owned or controlled by either the applicant, or by any person who owns or controls the applicant, is currently in violation of any provision of the act, SMCRA or any federal or state law, rule or regulation pertaining to air or water environmental protection. The director will make this determination based on a review of reasonably available information concerning violation notices and ownership or control links involving the applicant, including information pursuant to 19.8.7.701 and 702 NMAC and 19.8.11.1102 and 1116 NMAC. In the absence of a failure-to-abate cessation order, the director may presume that a notice of violation issued pursuant to 19.8.30.3001 NMAC or under a federal or state program has been or is being corrected to the satisfaction of

the agency with jurisdiction over the violation, where the abatement period for such notice of violation has not yet expired and where as part of the violation information provided pursuant to 19.8.7.702 NMAC, the applicant has provided certification that such violation is in the process of being so corrected. Such presumption shall not apply where evidence to the contrary is set forth in the permit application, or when the notice of violation is issued for a nonpayment of abandoned mine reclamation fees or civil penalties. If a current violation exists the director shall require the applicant or person who owns or controls the applicant, before the issuance of the permit, to either:

(1) submit to the director, proof which is satisfactory to the director, department or agency which has jurisdiction over such violation that the violation:

(a) has been corrected; or

(b) is in the process of being corrected; or

(2) establish to the director that the applicant or any person owned or controlled by either this applicant or any person who owns or controls the applicant, has filed and is presently pursuing, in good faith, a direct administrative or judicial appeal to contest the validity of that violation; if the administrative or judicial hearing authority either denies a stay applied for in the appeal or affirms the violation, then the applicant shall within 30 days of the judicial action submit proof required under Subparagraph (a) of Paragraph (1) of Subsection C of 19.8.11.1105 NMAC.

D. Any permit that is issued on the basis of proof submitted under Subparagraph (b) of Paragraph (1) or Paragraph (2) of Subsection C of 19.8.1105 NMAC that a violation is in the process of being corrected, or pending the outcome of an appeal described in Paragraph (2) of Subsection C of 19.8.11.1105 NMAC, shall be conditionally issued.

E. Before any final determination by the director that the applicant, or the operator specified in the application, controls or has controlled mining operations with a demonstrated pattern of willful violation of the act of such nature, duration, and with such resulting irreparable damage to the environment that indicates an intent not to comply with the provisions of the act, the applicant or operator shall be afforded an opportunity for an adjudicatory hearing on the determination as provided for in 19.8.12.1200 NMAC.

F. Final compliance review. After an application is approved, but before the permit is issued, the director shall reconsider its decision to approve the application, based on the compliance review required by Subsection C of 19.8.11.1105 NMAC in light of any new information submitted under Subsection I of 19.8.7.701 NMAC, or Subsection D of 19.8.7.702 NMAC. Upon the applicant's completion of the reporting requirements of Subsection D of 19.8.7.702 NMAC, the director will request a compliance history report from AVS no more than five business days before permit issuance, and will make that report part of the AVS record review required by 19.8.11.1116 NMAC.

[11-29-97; 19.8.11.1105 NMAC - Rn, 19 NMAC 8.2.11.1105, 9-29-2000; A, 4-28-2006; A, 12-31-2007; A, 08-31-2010]

19.8.11.1106 CRITERIA FOR PERMIT APPROVAL OR DENIAL:

No permit or revision application shall be approved, unless the application affirmatively demonstrates and the director finds, in writing, on the basis of information set forth in the application or from information otherwise available, which is documented in the approval and made available to the applicant, that:

A. the permit application is accurate and complete and that all requirements of the act and 19.8 NMAC have been complied with;

B. the applicant has demonstrated that surface coal mining and reclamation operations, as required by the act and 19.8 NMAC, can be feasibly accomplished under the mining and reclamation operations plan contained in the application;

C. the assessment of the probable cumulative hydrological impacts (CHIA) of all anticipated coal mining in the cumulative impact area on the hydrologic balance, as described in Subsection C of 19.8.9.907 NMAC has been made by the director, and the operations proposed under the application have been designed to prevent damage to the hydrologic balance outside the proposed permit area;

D. the proposed permit area is:

(1) not included within an area designated unsuitable for surface coal mining operations under 19.8.3 and 4 NMAC; or

(2) not within an area under study for designation as unsuitable for surface coal mining operations in an administrative proceeding begun under 19.8.4 NMAC, unless the applicant demonstrates that, before January 4, 1977, he has made substantial legal and financial commitments in relation to the operation for which he is applying for a permit; or

(3) not within an area subject to the prohibitions of 19.8.2.201 NMAC.

E. the proposed operations will not adversely affect any publicly-owned parks or places included in the national register of historic places, except as provided for in Subsection A of 19.8.2.201 NMAC;

F. for operations involving the surface mining of coal where the private mineral estate to be mined has been severed from the private surface estate, the applicant has submitted to the director the documentation required under Subsection B of 19.8.7.703 NMAC;

G. the applicant has either:

(1) submitted the proof required by Paragraph (1) of Subsection C of 19.8.11.1105 NMAC; or

(2) made the demonstration required by Paragraph (2) of Subsection C of 19.8.11.1105 NMAC;

H. the applicant has submitted proof that all reclamation fees required for abandoned mine land reclamation under Section 402 of Public Law 95-87 have been paid;

I. the applicant or the operator, if other than the applicant, does not control and has not controlled mining operations with a demonstrated pattern of willful violations of the act of such nature, duration, and with such resulting irreparable damage to the environment as to indicate an intent not to comply with the provisions of the act;

J. surface coal mining and reclamation operations to be performed under the permit will not be inconsistent with other such operations anticipated to be performed in areas adjacent to the proposed permit area;

K. the applicant will submit the performance bond or other equivalent guarantee required under 19.8.14 NMAC of these rules and regulations, prior to the issuance of the permit;

L. the applicant has, with respect to both prime farmland and alluvial valley floors, obtained either a negative determination or satisfied the requirements of 19.8.10.1004 and 1006 NMAC;

M. the proposed postmining land use of the permit area has been approved by the director in accordance with the requirements of 19.8.20.2073 NMAC;

N. the director has made all specific approvals required under 19.8.19 through 19.8.28 NMAC;

O. the director has found that the activities would not affect the continued existence of endangered or threatened species, indigenous to the state, or any other species protected under the Endangered Species Act of 1973, or result in the destruction or adverse modification of their critical habitats contrary to state or federal law;

P. the director has taken into account the effect of the proposed permitting action on properties listed on and eligible for listing on the national register of historic places; this finding may be supported in part by inclusion of appropriate permit conditions or changes in the operation plan protecting historic resources or a documented decision that the director has determined that no additional protection measures are necessary.

[11-29-97; 19.8.11.1106 NMAC - Rn, 19 NMAC 8.2.11.1106, 9-29-2000; A, 1-15-2002; A, 4-28-2006; A, 12-31-2007]

19.8.11.1107 IMPROVIDENTLY ISSUED PERMITS: GENERAL PROCEDURES:

A. Permit review. When the director has reason to believe that the director improvidently issued a surface coal mining and reclamation permit the director shall immediately review the circumstances under which the director issued the permit, using the criteria in Subsection B of 19.8.11.1107 NMAC. If the director finds that the director improvidently issued the permit, then the director shall comply with Subsection C of 19.8.11.1107 NMAC.

B. Review criteria. The director shall find that the director improvidently issued a surface coal mining and reclamation permit if:

(1) under the regulatory program's violations review criteria at the time the director issued the permit:

(a) the director should not have issued the permit because of an unabated violation or a delinquent penalty or fee; or

(b) the director issued the permit on the presumption that a notice of violation was in the process of being corrected to the satisfaction of the agency with jurisdiction over the violation, but a cessation order subsequently was issued; and

(2) the violation, penalty or fee:

(a) remains unabated or delinquent; and

(b) is not subject of a good faith appeal, or of an abatement plan or payment schedule with which the permittee or other person responsible is complying to the responsible agency's satisfaction; and

(3) where the permittee was linked to the violation, penalty or fee through ownership or control under the regulatory program's violations review criteria at the time the director issued the permit, an ownership or control link between the permittee and the person responsible for the violation, penalty or fee still exists, or where the link has been severed, the permittee continues to be responsible for the violation, penalty or fee.

C. When determining what specific unabated violations, delinquent penalties and fees, and ownership and control relationships to which 19.8.11.1107 NMAC will apply, the director shall use the applicable violations review criteria contained in the preamble of the federal register 54 FR 18440-18441.

D. The provisions of 19.8.11.1118 NMAC shall be applicable when the director determines:

(1) whether a violation, penalty or fee existed at the time that it was cited, remains unabated or delinquent, has been corrected, is in the process of being corrected or is the subject of a good faith appeal, and

(2) whether any ownership or control link between the permittee and the person responsible for the violation, penalty or fee existed, still exists or has been severed.

E. Remedial measures. When the director, under Subsection B of 19.8.11.1107 NMAC, finds that because of an unabated violation or a delinquent penalty or fee the director improvidently issued a permit, the director shall use one or more of the following remedial measures:

(1) implement, with the cooperation of the permittee or other person responsible, and of the responsible agency, a plan for abatement of the violation or a schedule for payment of the penalty or fee;

(2) impose on the permit a condition requiring that in a reasonable period of time the permittee or other person responsible abate the violation or pay the penalty or fee;

(3) suspend the permit until the violation is abated or the penalty or fee is paid; or

(4) rescind the permit under 19.8.11.1110 NMAC.

F. If the director decides to suspend the permit, it shall afford at least 30 days written notice to the permittee. If the director decides to rescind the permit, it shall issue a notice in accordance with 19.8.11.1110 NMAC. In either case, the permittee shall be given the opportunity to request administrative review of the notice as provided for in 19.8.12 NMAC. The director's decision shall remain in effect during the appeal's pendency, unless the district court grants temporary relief.

[11-29-97; A, 12-15-99: 19.8.11.1107 NMAC - Rn, 19 NMAC 8.2.11.1107, 9-29-2000; A, 4-28-2006]

19.8.11.1108 CRITERIA FOR PERMIT APPROVAL OR DENIAL: EXISTING STRUCTURES:

A. No application for a permit or revision which proposes to use an existing structure in connection with or to facilitate the proposed surface coal mining and reclamation operation shall be approved, unless the applicant demonstrates and the director finds, in writing, on the basis of information set forth in the complete application that the structure meets the performance standards of the act and 19.8.19 through 28 NMAC.

B. If the director finds that the structure does not meet the requirements of Subsection A of 19.8.11.1108 NMAC, the director shall require the applicant to submit a compliance plan for modification or reconstruction of the structure and shall find prior to the issuance of the permit that:

(1) the modification or reconstruction of the structure will bring the structure into compliance with the design and performance standards of 19.8.19 through 19.8.28 NMAC as soon as possible, but not later than six months after issuance of the permit;

(2) the risk of harm to the environment or to public health or safety is not significant during the period of modification or reconstruction; and

(3) the applicant will monitor the structure to determine compliance with the performance standards of 19.8.19 through 19.8.28 NMAC.

C. Should the director find that the existing structure cannot be reconstructed without causing significant harm to the environment or public health or safety consistent with 19.8.20.2079 NMAC, the applicant will be required to abandon the existing structure. The structure shall not be used for or to facilitate surface coal mining operations after the effective date of issuance of the permanent regulatory program permit. Abandonment of the structure shall proceed on a schedule approved by the director.

[11-29-97; 19.8.11.1108 NMAC - Rn, 19 NMAC 8.2.11.1108, 9-29-2000; A, 4-28-2006; A, 12-31-2007]

19.8.11.1109 PERMIT APPROVAL OR DENIAL ACTIONS:

A. The director shall approve, require modification of, or deny all applications for permits under the act and 19.8. NMAC on the basis of:

(1) complete applications for permits and revisions or renewals thereof;

(2) public participation as provided for in 19.8.5 through 19.8.13 NMAC;

(3) compliance with any applicable provisions of 19.8.10 NMAC; and

(4) processing and review of applications as required by 19.8.11 NMAC.

B. The director shall take action as required under Subsection A of 19.8.11.1109 NMAC, within the following times.

(1) Initiation of regulatory programs. Except as provided for in Paragraph (3) of Subsection B of 19.8.11.1109 NMAC and 19.8.5.501 NMAC, a complete application submitted to the director within the time required by Subsection A of 19.8.5.504 NMAC shall be processed by the director so that an application is approved or denied:

(a) within eight months after the date of approval of the state program; and

(b) if an informal conference has been held pursuant to 19.8.11.1103 NMAC within 60 days from the close of the conference.

(2) Subsequent permanent program applications. Except as provided for in Paragraph (3) of Subsection B of 19.8.11.1109 NMAC, a complete application submitted to the director after the time required in Subsection A of 19.8.5.504 NMAC and in accordance with NMAC shall be processed by the director, so that an application is approved or denied within the following times:

(a) if an informal conference has been held under 19.8.11.1103 NMAC within 60 days of the close of the conference; or

(b) if no informal conference has been held under Subsections A through D of 19.8.11.1103 NMAC then within a reasonable time after the receipt by the director of the complete application, the director will process the application; in establishing what is reasonable time in which to approve or deny the application, the director shall take into account the time needed for proper investigation of the proposed permit and adjacent areas; the complexity of the application; and whether written objections to or comments on the complete application have been filed with the director.

(3) Notwithstanding any of the foregoing provisions of 19.8.11.1109 NMAC, no time limit under the act or 19.8.11.1109 NMAC requiring the director to act shall be considered expired from the time the director initiates a proceeding under Subsection E of 19.8.11.1105 NMAC until the final decision of the director.

C. If an informal conference is held under 19.8.11.1103 NMAC, the director shall give his written findings to the permit applicant and to each person who is party to the conference, approving, modifying or denying the application in whole, or in part, and stating the specific reasons therefore in the decision.

D. If no such informal conference, pursuant to Subsections A through D of 19.8.11.1103 NMAC, has been held, the director shall give his written findings to the permit applicant, approving, modifying or denying the application in whole, or in part, and stating the specific reasons in the decision.

E. Simultaneously, the director shall:

(1) give a copy of his decision to:

(a) each person and government official who filed a written objection or comment with respect to the application; and

(b) the regional director of the office of surface mining together with a copy of any permit issued by the director; and

(2) publish a summary of his decision in a newspaper of general circulation in the county of the proposed surface coal mining and reclamation operations.

F. Within 10 days after the granting of a permit, including the filing of the performance bond or other equivalent guarantee which complies with 19.8.9.14 NMAC, the director shall notify the county clerk of the county where the land to be mined is located that a permit has been issued. The notice shall describe the location of the permit area.

[11-29-97; 19.8.11.1109 NMAC - Rn, 19 NMAC 8.2.11.1109, 9-29-2000; A, 4-28-2006; A, 12-31-2007]

19.8.11.1110 IMPROVIDENTLY ISSUED PERMITS: RESCISSION PROCESS:

When the director, according to Paragraph (4) of Subsection E of 19.8.11.1107 NMAC, elects to rescind an improvidently issued permit, the director shall serve on the permittee a notice of suspension and rescission which includes the reasons for the finding of the director under Subsection B of 19.8.11.1107 NMAC and states that:

A. automatic suspension and rescission: after a specified period of time, not to exceed 90 days, the permit automatically will be suspended; the permit shall be rescinded within, but not to exceed, 90 days after such suspension, unless the permittee submits proof, and the director finds, within the 90 day period, consistent with the provisions of 19.8.11.1118 NMAC, that:

(1) the director's findings under Subsection B of 19.8.11.1107 NMAC were erroneous;

(2) the permittee or other person responsible has abated the violation on which the finding was based, or paid the penalty or fee, to the satisfaction of the responsible agency;

(3) the violation, penalty or fee is the subject of good faith appeal, or of an abatement plan or payment schedule with which the permittee or other person responsible is complying to the satisfaction of the responsible agency; or

(4) since the finding was made, the permittee has severed any ownership or control link with the person responsible for, and does not continue to be responsible for, the violation, penalty or fee;

B. cessation of operations: after permit suspension or rescission, the permittee shall cease all surface coal mining and reclamation operations under the permit, except for violation abatement and for reclamation and other environmental protection measures as required by the director.

[11-29-97; 19.8.11.1110 NMAC - Rn, 19 NMAC 8.2.11.1110, 9-29-2000; A, 4-28-2006]

19.8.11.1111 PERMIT TERMS:

A. Each permit shall be issued for a fixed term not to exceed 5 years. A longer fixed permit term may be granted, if:

- (1) the application is full and complete for the specified longer term; and
- (2) the applicant shows that a specified longer term is reasonably needed to allow the applicant to obtain necessary financing of equipment and the opening of the operation, and this need is confirmed, in writing, by the applicant's proposed source for the financing.

B. Due diligence.

- (1) A permit shall terminate, if the permittee has not begun the surface coal mining and reclamation operation covered by the permit within 3 years of the issuance of the permit.
- (2) The director may grant reasonable extensions of time for commencement of these operations, upon receipt of a written statement showing that such extensions of time are necessary, if:
 - (a) litigation precludes the commencement or threatens substantial economic loss to the permittee, or
 - (b) there are conditions beyond the control and without the fault or negligence of the permittee.
- (3) With respect to coal to be mined for use in a synthetic fuel facility or specified major electric generating facility, the permittee shall be deemed to have commenced surface mining operations at the time that the construction of the synthetic fuel or generating facility is initiated.
- (4) Extensions of time granted by the director under Paragraph (2) of Subsection B of 19.8.11.1111 NMAC shall be specifically set forth in the permit and notice of the extension shall be made to the public.

C. Permits may be suspended, revoked, or modified by the director in accordance with 19.8.10.1000, 1002, 1003 and 1005 NMAC, 19.8.13.1300 NMAC and 19.8.29 through 19.8.31 NMAC.

[11-29-97; 19.8.11.1111 NMAC - Rn, 19 NMAC 8.2.11.1111, 9-29-2000; A, 4-28-2006; A, 12-31-2007]

19.8.11.1112 CONDITIONS OF PERMITS: GENERAL AND RIGHT OF ENTRY:

Each permit issued by the director shall ensure that:

A. except to the extent that the director otherwise directs in the permit that specific actions be taken, the permittee shall conduct all surface coal mining and reclamation operations as described in the complete application; and

B. the permittee shall allow the authorized representatives of the secretary of the U.S. department of interior, including, but not limited to, inspectors and fee compliance officers and the director to have the rights of entry provided for in 19.8.29.2900 NMAC; and be accompanied by private persons for the purpose of conducting an inspection in accordance with 19.8.29 NMAC, when the inspection is in response to an alleged violation reported to the director by the private person;

C. the permittee shall conduct surface coal mining and reclamation operations only on those lands specifically designated on the maps submitted under 19.8.8 and 19.8.9 NMAC and approved for the term of the permit and which are subject to the performance bond or other equivalent guarantee in effect pursuant to 19.8.14 NMAC;

D. at least 10 days prior to initial surface disturbance, the permittee shall notify the director, in writing, of his intentions to begin operations;

E. the operator shall pay all reclamation fees required for abandoned mine land reclamation under Section 402 of Public Law 95-87 for coal produced under the permit for sale, transfer or use in the manner required by that section.

[11-29-97; 19.8.11.1112 NMAC - Rn, 19 NMAC 8.2.11.1112, 9-29-2000; A, 4-28-2006; A, 12-31-2007]

19.8.11.1113 CONDITIONS OF PERMITS: ENVIRONMENT, PUBLIC HEALTH AND SAFETY:

Each permit issued by the director shall ensure and contain specific conditions requiring that:

A. the permittee shall take all possible steps to minimize any adverse impact to the environment or public health and safety resulting from noncompliance with any term or condition of the permit, including, but not limited to:

(1) any accelerated or additional monitoring necessary to determine the nature and extent of noncompliance and the results of the noncompliance;

(2) immediate implementation of measures necessary to comply; and

(3) warning, as soon as possible after learning of such noncompliance, any person whose health and safety is in imminent danger due to the noncompliance;

B. the permittee shall dispose of solids, sludge, filter backwash, or pollutants removed in the course of treatment or control of waters or emissions to the air in the manner required by 19.8.19 through 19.8.28 NMAC, the act, and these rules and regulations, and which prevent violation of any other applicable state or federal law;

C. the permittee shall conduct his operations:

(1) in accordance with any measure specified in the permit as necessary to prevent significant, imminent environmental harm to the health or safety of the public; and

(2) utilizing any methods specified in the permit by the director in approving alternative methods of compliance with the performance standards of the act and these rules and regulations, in accordance with the provisions of the act, Subsection M of 19.8.11.1106 NMAC and 19.8.19 through 19.8.28 NMAC.

[11-29-97; 19.8.11.1113 NMAC - Rn, 19 NMAC 8.2.11.1113, 9-29-2000; A, 4-28-2006]

19.8.11.1114 CONFORMANCE OF PERMIT:

The director shall include in the approved permit the following provision: The permittee has expressly undertaken in this permit application to comply with various performance standards and design criteria presently contained in or derived from the New Mexico coal surface mining regulations. Such undertakings are made upon the condition and with the understanding that any amendments to 19.8.11 NMAC shall entitle the permittee to apply for and receive a review of the related permit provision for the purpose of conforming the permit to the amended state regulations or making other appropriate permit amendments. The permittee and the mining and minerals division shall meet within 30 days of request by the permittee or notice by the director for the purpose of considering such amendments to the permit as are appropriate.

[11-29-97; 19.8.11.1114 NMAC - Rn, 19 NMAC 8.2.11.1114, 9-29-2000; A, 4-28-2006; A, 08-31-2010]

19.8.11.1115 VERIFICATION OF OWNERSHIP OR CONTROL APPLICATION INFORMATION:

A. In accordance with Subsection E of 19.8.11.1105 NMAC, prior to the issuance of a permit, the director shall review the information in the application provided pursuant to 19.8.7.701 NMAC to determine that such information, including the identification of the operator and all owners and controllers of the operator, is complete and accurate. In making such determination, the director shall compare the information provided in the application with information from other reasonably available sources, including:

(1) the director's inspection and enforcement records; and

(2) state corporation commission or tax records, to the extent they contain information concerning ownership or control links; and

(3) the applicant/violator system; and

(4) other information or records that may be available to the director.

B. If it appears from the information provided in the application pursuant to Subsections C and D of 19.8.7.701 NMAC that none of the persons identified in the application has had any previous mining experience, the director shall inquire of the applicant and investigate whether any person other than those identified in the application will own or control the operation (as either an operator or other owner or controller).

C. If, as a result of the review conducted under Subsections A and B of 19.8.11.1115 NMAC, the director identifies any potential omission, inaccuracy, or inconsistency in the ownership or control information provided in the application, it shall, prior to making a final determination with regard to the application, contact the applicant and require that the matter be resolved through submission of:

(1) an amendment to the application; or

(2) a satisfactory explanation which includes credible information sufficient to demonstrate that no actual omission, inaccuracy, or inconsistency exists; the director shall also take action in accordance with the provisions of 19.8.30 NMAC, where appropriate.

D. Upon completion of the review conducted under this section, the director shall promptly enter into or update all ownership or control information on AVS.

[11-29-97; 19.8.11.1115 NMAC - Rn, 19 NMAC 8.2.11.1115, 9-29-2000; A, 4-28-2006]

19.8.11.1116 REVIEW OF OWNERSHIP OR CONTROL AND VIOLATION INFORMATION:

A. Following the verification of ownership or control information pursuant to 19.8.11.1115 NMAC, the director shall review all reasonably available information concerning violation notices and ownership or control links involving the applicant to determine whether the application can be approved under 19.8.7.702 NMAC. Such information shall include:

(1) with respect to ownership or control links involving the applicant, all information obtained under 19.8.11.1115 NMAC and 19.8.7.701 NMAC; and

(2) with respect to violation notices, all information obtained under 19.8.7.702 NMAC, information obtained from OSM, including information shown in the AVS, and information from the director's own records concerning violation notices.

B. If the review conducted under Subsection A of 19.8.11.1116 NMAC discloses any ownership or control link between the applicant and any person cited in a violation notice:

(1) the director shall so notify the applicant and shall refer the applicant to the agency with jurisdiction over such violation notice; and

(2) the director shall not approve the application unless and until it determines, in accordance with the provisions of 19.8.11.1117 and 1118 NMAC, that:

(a) all ownership or control links between the applicant and any person cited in a violation notice are erroneous or have been rebutted; or

(b) the violation has been corrected, is in the process of being corrected, or is the subject of a good faith appeal, within the meaning of Paragraph (1) of Subsection C of 19.8.11.1105 NMAC.

C. Following the director's decision on the application (including unconditional issuance, conditional issuance, or denial of the permit) or following the applicant's withdrawal of the application, the director shall promptly enter all relevant information related to such decision or withdrawal into AVS.

[11-29-97; 19.8.11.1116 NMAC - Rn, 19 NMAC 8.2.11.1116, 9-29-2000; A, 4-28-2006]

19.8.11.1117 PROCEDURES FOR CHALLENGING OWNERSHIP OR CONTROL LINKS SHOWN IN AVS:

A. Challenging AVS linkage and violation status.

(1) Any applicant or other person shown in AVS in an ownership or control link to any person may challenge such link in accordance with the provisions of Subsection B through Subsection D of 19.8.11.1117 NMAC and 19.8.11.1118 NMAC, unless such applicant or other person is bound by a prior administrative or judicial determination concerning the link.

(2) Any applicant or other person shown in AVS in an ownership or control link to any person cited in a federal violation notice may challenge the status of the violation such notice covers in accordance with the provisions of Subsection B through Subsection D of 19.8.11.1117 NMAC and 19.8.11.1118 NMAC, unless such applicant or other person is bound by a prior administrative or judicial determination concerning the violation's status.

(3) Any applicant or other person shown in AVS in an ownership or control link to any person cited in a state violation notice may challenge the status of the violation covered by such notice in accordance with the state program equivalents to Subsection B through Subsection D of 19.8.11.1117 NMAC and 19.8.11.1118 NMAC for the state that issued the violation notice, unless such applicant or other person is bound by a prior administrative or judicial determination concerning the violation's status.

B. Any applicant or other person who wishes to challenge an ownership or control link shown in AVS or a federal violation's status, and who is eligible to do so under the provisions of Paragraphs (1) or (2) of Subsection A of 19.8.11.1117 NMAC, shall submit a written explanation of the challenge's basis, along with any relevant evidentiary materials and supporting documents, to the director.

C. The director shall review any information the applicant or other person submitted under Subsection B of 19.8.11.1117 NMAC and shall make a written decision whether or not the applicant or other person has shown the ownership or control link is erroneous or rebutted or whether the violation the notice covers remains outstanding, has been corrected, is in the process of being corrected or is the subject of a good faith appeal within the meaning of Paragraph (1) of Subsection C of 19.8.11.1105 NMAC.

D. Notification of decision.

(1) If, as a result of the decision the director reached under Subsection C of 19.8.11.1117 NMAC, the director determines that the applicant or other person has shown the ownership or control link is erroneous or rebutted or that the violation the notice covers has been corrected, is in the process of being corrected or is the subject of a good faith appeal, the director shall so notify the applicant or other person and OSM, and shall correct the information in AVS.

(2) If, as a result of the decision the director reached under Subsection C of 19.8.11.1117 NMAC, the director determines that the applicant or other person has not shown the ownership or control link is erroneous or rebutted and that the violation the notice covers remains outstanding, the director shall so notify the applicant or other person and OSM, and update the information in AVS, if necessary.

(a) The director shall serve a copy of the decision on the applicant or other person by certified mail. Service shall be complete upon the notice or mail's tender and shall not be deemed incomplete because of a refusal to accept.

(b) The applicant or other person may appeal the director's decision in accordance with 19.8.12 NMAC. The director's decision shall remain in effect during the appeal's pendency, unless the district court grants temporary relief.

[11-29-97; 19.8.11.1117 NMAC - Rn, 19 NMAC 8.2.11.1117, 9-29-2000; A, 4-28-2006]

19.8.11.1118 STANDARDS FOR CHALLENGING OWNERSHIP OR CONTROL LINKS AND THE STATUS OF VIOLATIONS:

A. The provisions of this section shall apply whenever a person has and exercises a right, under the provisions of 19.8.11.1107, 1110, 1116, or 1117 NMAC or under the provisions of 19.8.12 NMAC, to challenge (1) an ownership or control link to any person and/or (2) the status of any violation covered by a notice.

B. Responsibility for decision-making.

(1) Except as provided in Paragraph (3) of Subsection B of 19.8.11.1118 NMAC:

(a) the director before which an application is pending shall have responsibility for making decisions with respect to ownership or control relationships of the application;

(b) the director that issued a permit shall have responsibility for making decisions with respect to the ownership or control relationships of the permit;

(c) the state director for the state that issued a state violation notice shall have responsibility for making decisions with respect to the ownership or control relationships of the violation;

(d) the regulatory agency that issued a violation notice, whether state or federal, shall have responsibility for making decisions concerning the status of the violation covered by such notice, i.e., whether the violation remains outstanding, has been corrected, is in the process of being corrected, or is the subject of a good faith appeal, within the meaning of Paragraph (1) of Subsection C of 19.8.11.1105 NMAC.

(2) OSM shall have responsibility for making decisions with respect to the ownership or control relationships of a federal violation notice.

(3) OSM review.

(a) With respect to information shown on AVS, the responsibilities referred to in Paragraph (1) of Subsection B of 19.8.11.1118 NMAC shall be subject to the plenary authority of OSM to review any state regulatory authority decision regarding an ownership or control link.

(b) With respect to ownership or control information which has not been entered into AVS by a state and with respect to information shown on AVS relating to the status of a violation, state regulatory authorities' determinations are subject to OSM's program authority oversight under 30 CFR Parts 733, 842, and 843.

C. Burden of proof.

(1) In any formal or informal review of an ownership or control link or of the status of a violation covered by a violation notice, the responsible agency shall make a prima facie determination or showing that such link exists, existed during the relevant period, and/or that the violation covered by such notice remains outstanding. Once such a prima facie determination or showing has been made, the person challenging such link or the status of the violation shall have the burden of proving by a preponderance of the evidence, with respect to any relevant time period:

(a) that the facts relied upon by the responsible agency to establish ownership or control under the definition of "owned or controlled" or "owns or controls" in Paragraph (8) of Subsection O of 19.8.1.7 NMAC or a presumption of ownership or control under the definition of "owned or controlled" or "owns or controls" in Paragraph (8) of Subsection O of 19.8.1.7 NMAC, do not or did not exist;

(b) that a person subject to a presumption of ownership or control under the definition of "owned or controlled" or "owns or controls" in Paragraph (8) of Subsection O of 19.8.1.7 NMAC, does not or did not in fact have the authority directly or indirectly to determine the manner in which surface coal mining operations are or were conducted, or

(c) that the violation covered by the violation notice did not exist, has been corrected, is in the process of being corrected, or is the subject of a good faith appeal within the meaning of Paragraph (1) of Subsection C of 19.8.11.1105 NMAC; provided that the existence of the violation at the time it was cited may not be challenged under the provisions of 19.8.11.1117 NMAC by a permittee, unless such challenge is made by the permittee within the context of 19.8.11.1108 and 1110 NMAC; by any person who had a prior opportunity to challenge the violation notice and who failed to do so in a timely manner; or by any person who is bound by a prior administrative or judicial determination concerning the existence of the violation.

(2) In meeting the burden of proof set forth in Paragraph (1) of Subsection C of 19.8.11.1118 NMAC, the person challenging the ownership or control link or the status of the violation shall present probative, reliable, and substantial evidence and any supporting explanatory materials, which may include before the responsible agency:

(a) affidavits setting forth specific facts concerning the scope of responsibility of the various owners or controllers of an applicant, permittee, or any person cited in a violation notice; the duties actually performed by such owners or controllers; the beginning and ending dates of such owners' or controllers' affiliation with the applicant, permittee, or person cited in a violation notice; and the nature and details of any transaction creating or severing an ownership or control link; or specific facts concerning the status of the violation;

(b) if certified, copies of corporate minutes, stock ledgers, contracts, purchase and sale agreements, leases, correspondence, or other relevant company records;

(c) if certified, copies of documents filed with or issued by any state, municipal, or federal governmental agency;

(d) an opinion of counsel, when supported by (1) evidentiary materials; (2) a statement by counsel that he or she is qualified to render the opinion; and (3) a statement that counsel has personally and diligently investigated the facts of the matter or, where counsel has not so investigated the facts, a statement that such opinion is based upon information which has been supplied to counsel and which is assumed to be true.

(3) Before any administrative or judicial tribunal reviewing the decision of the responsible agency, any evidence admissible under the rules of such tribunal.

D. Following any determination by a state director or other state agency, or any decision by an administrative or judicial tribunal reviewing such determination, the director shall review the information in AVS to determine if it is consistent with the determination or decision. If it is not, the director shall promptly inform OSM and request that the AVS information be revised to reflect the determination or decision.

[11-29-97; 19.8.11.1118 NMAC - Rn, 19 NMAC 8.2.11.1118, 9-29-2000; A, 4-28-2006]

19.8.11.1119 POST-PERMIT ISSUANCE REQUIREMENTS AND OTHER ACTIONS BASED ON OWNERSHIP, CONTROL AND VIOLATION INFORMATION:

A. For the purposes of future permit eligibility determinations and enforcement actions, the director shall enter into AVS all:

(1) permit records, within 30 days after the permit is issued or subsequent changes made;

(2) unabated or uncorrected violations, within 30 days after the abatement or correction period for a violation expires;

(3) changes to information initially required to be provided by an applicant under 19.8.7.701 NMAC, within 30 days of receiving notice of a change; and

(4) changes in violation status, within 30 days after abatement, correction, or termination of a violation, or a decision from an administrative or judicial tribunal.

B. If, at any time, the director discovers that any person owns or controls an operation with an unabated or uncorrected violation, the director will determine whether enforcement action is appropriate under 19.8.31.3109 NMAC. The director shall enter the results of each enforcement action, including administrative and judicial decisions, into AVS.

C. The director shall serve a preliminary finding of permanent permit ineligibility under Subsection C of Section 69-25A-14 NMSA 1978 on an applicant or operator, if the criteria in Paragraphs (1) and (2) of Subsection C of 19.8.11.1119 NMAC are met. In making a finding under this subsection, the director will only consider control relationships and violations which would make, or would have made, the applicant or operator ineligible for a permit under Subsection C of 19.8.11.1105 NMAC or Subsection I of 19.8.11.1106 NMAC. The director shall make a preliminary finding of permanent permit ineligibility if it finds that:

(1) the applicant or operator controls or has controlled surface coal mining and reclamation operations with a demonstrated pattern of willful violations under Subsection C of Section 69-25A-14 NMSA 1978; and

(2) the violations are of such nature and duration with such resulting irreparable damage to the environment as to indicate the applicant's or operator's intent not to comply with the act, its implementing regulations, the regulatory program, or the permit.

D. The applicant or operator may request a hearing on a preliminary finding of permanent permit ineligibility as stated in Subsection E of 19.8.11.1105 NMAC.

E. Entry into AVS.

(1) If the applicant or operator does not request a hearing, and the time for seeking a hearing has expired, the director shall enter its finding into AVS.

(2) If the applicant or operator requests a hearing, the director shall enter its finding into AVS only if that finding is upheld on administrative appeal.

F. At any time, the director may identify any person who owns or controls an entire surface coal mining operation or any relevant portion or aspect thereof. If the director identifies such a person, the director shall issue a written preliminary finding to the person and the applicant or permittee describing the nature and extent of ownership or control. The director's written preliminary finding shall be based on evidence sufficient to establish a prima facie case of ownership or control.

G. After the director issues a written preliminary finding under Subsection F of 19.8.11.1119 NMAC, the director shall allow the person subject to the preliminary finding 30 days in which to submit any information tending to demonstrate the person's lack of ownership or control. If, after reviewing any information the person submits, the director is persuaded that the person is not an owner or controller, the director shall serve the person a written notice to that effect. If, after reviewing any information the person submits, the director still finds that the person is an owner or controller, or if the person does not submit any information within the 30-day period, the director shall issue a written finding and enter its finding into AVS.

H. If the director identifies the person subject to the preliminary finding as an owner or controller under Subsection G of 19.8.11.1119 NMAC, the person may challenge the finding as provided in 19.8.11.1117 and 1118 NMAC.

[19.8.11.1119 NMAC - N, 08-31-2010]

19.8.11.1120 POST-PERMIT ISSUANCE INFORMATION REQUIREMENTS FOR PERMITTEES:

A. Within 30 days after the issuance of a cessation order in accordance with 19.8.30.3000 NMAC, or a federal cessation order issued in accordance with 30 CFR 843.11, the permittee must provide or update all the information required under Subsection C and D of 19.8.7.701 NMAC.

B. The permittee does not have to submit information under Subsection A of 19.8.11.1120 NMAC if a court of competent jurisdiction grants a stay of the cessation order and the stay remains in effect.

C. Within 60 days of any addition, departure, or change in position of any person identified in Subsections C or D of 19.8.7.701 NMAC, the permittee must provide:

- (1) the information required under Subsections C or D of 19.8.7.701 NMAC;
- and
- (2) the date of any departure.

[19.8.11.1120 NMAC - N, 08-31-2010]

19.8.11.1121 CERTIFYING AND UPDATING EXISTING PERMIT APPLICATION INFORMATION:

A. If the applicant or operator has previously applied for a permit and the required information is already in AVS, then the applicant or operator may update the information as follows:

- (1) if all or part of the information already in AVS is accurate and complete, then the applicant or operator may certify to the director by swearing or affirming, under oath and in writing, that the relevant information in AVS is accurate, complete, and up to date;

- (2) if part of the information in AVS is missing or incorrect, the applicant or operator must submit to the director the necessary information or corrections and swear or affirm, under oath and in writing, that the information the applicant or operator submitted is accurate and complete;

(3) if the applicant or operator can neither certify that the data in AVS is accurate and complete nor make needed corrections, then the applicant or operator must include in his or her permit application the information required under 19.8.7.701 and 702 NMAC.

B. The applicant or operator must swear or affirm, under oath and in writing, that all information he or she provides in an application is accurate and complete.

C. The director may establish a central file to house the applicant's or operator's identity information, rather than place duplicate information in each permit application file. The director shall make the information available to the public upon request.

D. After the director approves an application, but before the director issues a permit, the applicant or operator must update, correct, or indicate that no change has occurred in the information previously submitted under 19.8.7.701 and 702 NMAC and 19.8.11.1121 NMAC.

[19.8.11.1121 NMAC - N, 08-31-2010]

PART 12: ADMINISTRATIVE AND JUDICIAL REVIEW OF DECISION

19.8.12.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.12.1 NMAC - N, 9-29-2000]

19.8.12.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.12.2 NMAC - N, 9-29-2000]

19.8.12.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[19.8.12.3 NMAC - N, 9-29-2000]

19.8.12.4 DURATION:

Permanent.

[19.8.12.4 NMAC - N, 9-29-2000]

19.8.12.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.12.5 NMAC - N, 9-29-2000]

19.8.12.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.12.8 - 19.8.12.1199 NMAC - N, 9-29-2000]

19.8.12.1200 ADMINISTRATIVE REVIEW BY THE DIRECTOR:

A. Within 30 days after the applicant or permittee is notified of the final decision of the director concerning the application for a permit, revision or renewal thereof, application for transfer, sale, or assignment of rights, or concerning an application for coal exploration, or pursuant to Paragraph (2) of Subsection E of 19.8.13.1301 NMAC a decision regarding a permit modification, the applicant, permittee or any person with an interest which is or may be adversely affected may request a hearing on the reasons for the final decision in accordance with this section. Such request shall be in writing and state with reasonable specificity the reasons for the request and objections to the director's decision.

B. The director shall commence the hearing within 30 days of such request. This hearing shall be of record, adjudicatory in nature, and no person who presided at an informal conference under 19.8.11.1103 NMAC shall either preside at the hearing or participate in the decision following the hearing, or in any administrative appeal therefrom.

(1) The director may, under such conditions as he may prescribe, grant such temporary relief as he deems appropriate, pending final determination of the proceeding, if:

(a) all parties to the proceeding have been notified and given an opportunity to be heard on a request for temporary relief;

(b) the person requesting that relief shows that there is substantial likelihood that he will prevail on the merits of the final determination of the proceeding;

(c) the relief is not to affect adversely the public health or safety, or cause significant, imminent environmental harm to land, air, or water resources; and

(d) the relief sought is not the issuance of a permit where a permit has been denied, in whole or in part, by the director.

(2) For the purpose of such hearing, the director may administer oaths and affirmation, subpoena witnesses, written or printed materials, compel attendance of witnesses or production of those materials, compel discovery, and take evidence, including, but not limited to, site inspections of the land to be affected and other surface coal mining and reclamation operations carried on by the applicant in the general vicinity of the proposed operations.

(a) A verbatim record of each public hearing required by this section shall be made, and a transcript made available on the motion of any party or by order of the director.

(b) Ex parte contacts between representatives of the parties before the director and the director shall be prohibited.

(3) Within the time period specified by section 69-25A-29 NMSA 1978 of the act after the close of the record, the director shall issue and furnish the applicant, and each person who participated in the hearing, with the written findings of fact, conclusions of law, and order of the director with respect to the appeal.

(4) The burden of proof at such hearings shall be on the party seeking to reverse the decision of the director.

[11-29-97; 19.8.12.1200 NMAC - Rn, 19 NMAC 8.2.12.1200, 9-29-2000; A, 7-30-2004]

19.8.12.1201 [RESERVED]

[11-29-97; 19.8.12.1201 NMAC - Rn, 19 NMAC 8.2.12.1201, 9-29-2000; Repealed, 4-28-2006]

19.8.12.1202 JUDICIAL REVIEW:

A. A party to a proceeding before the director who is aggrieved by a director's decision issued after a hearing may obtain a review of that decision by an appeal to the district court pursuant to Section 39-3-1.1 NMSA 1978.

B. A person who is or may be aggrieved by a rule or an amendment or repeal of a rule the commission adopts may appeal to the court of appeals for review pursuant to Subsection B of 69-25A-30 NMSA 1978.

[11-29-97; 19.8.12.1202 NMAC - Rn, 19 NMAC 8.2.12.1202, 9-29-2000; A, 4-28-2006]

19.8.12.1203 FORMAL REVIEW OF NOTICES OF VIOLATION, CESSATION ORDERS AND SHOW CAUSE ORDERS BY THE DIRECTOR:

A. Upon receipt of a notice of violation, civil penalty assessment or cessation order pursuant to 19.8.30.3000, 19.8.30.3001 or 19.8.31 NMAC, or any such notice or order's modification, vacation or termination, a permittee or any person having an interest that such order or notice does or may adversely affect may apply to the director for review of the notice or order within 30 days of the notice or order's receipt or within 30 days of its modification, vacation or termination.

B. The application for review shall be in writing, setting forth the applicant's name, address and telephone number; the applicant's interest and, if the applicant is not the operator, how the order or notice to be reviewed adversely affects it; and generally, the grounds alleged and the relief requested.

C. If the permittee or other interested party does not apply for review in writing, they waive the right to review.

D. The filing of an application for review shall not stay the order or notice, or any order or notice's modification, vacation or termination. Pending the review's completion, the applicant may file with the director a written request that the director grant temporary relief in accordance with Subsection D of Section 69-25A-29 NMSA 1978.

E. The review pursuant to Subsection A of 19.8.12.1203 NMAC shall include such investigation as the director deems appropriate and an opportunity for a hearing at the capitol (or such other place as the applicant may agree), at the applicant's request and within 30 days after receiving the request, to enable the applicant to present information relating to the order or notice's issuance, continuance, modification, vacation or termination.

F. The director or his authorized representative shall hold a hearing at the capitol (or such other place as the permittee may agree) within 30 days after actual notice to the permittee of an order to show cause's issuance pursuant to 19.8.30.3002 NMAC.

G. The director or his authorized representative shall give the operator, permittee or other interested persons written notice of the time, place and date of any hearing this

rule requires at least five days prior to the hearing, except that the director or his authorized representative shall give at least 15 days notice for hearings that Subsection F of 19.8.12.1203 NMAC requires. Any times for holding a hearing may be extended by the parties' agreement.

H. All hearings this section requires shall be of record, stenographically recorded, adjudicatory in nature and conducted in accordance with 19.8.12.1200 NMAC. The inspector issuing or causing to be issued the cessation order, notice of violation or order to show cause shall not participate, directly or indirectly, in the decision making process. A party may not introduce as evidence or use to impeach a witness statements another party makes or evidence another party produces at an informal hearing or conference held pursuant to 19.8.30.3004 NMAC, or at an assessment conference held pursuant to 19.8.31.3106 NMAC.

I. The director, or his authorized representative serving as hearing officer, may hold pre-hearing conferences to facilitate stipulation of facts, delineation of the issues, order of presentation or other appropriate procedural rules and settlement.

J. The director shall issue, and serve upon the parties, a written decision and order, including his reasons and findings of fact, as follows:

(1) within 30 days (unless the director has granted temporary relief pursuant to Subsection D of Section 69-25A-29) of a hearing, and after receiving the report of such investigation conducted pursuant to Subsection B of 19.8.12.1203 NMAC, vacating, affirming, modifying or terminating the issuance, continuance, modification, vacation or termination of the order or notice; and

(2) within 60 days of the hearing held pursuant to Subsection F of 19.8.12.1203 NMAC, quashing, in whole or in relevant part, the order to show cause or suspending or revoking, in whole or relevant part, the permit.

K. The district court may review the director's decision pursuant to Subsection A of Section 69-25A-30 NMSA 1978 and 19.8.12.1202 NMAC.

L. The director may consolidate any hearing this rule requires, to the extent practicable without prejudicing the rights of the person to whom a notice, cessation order or order to show cause is directed, with any other hearing provided for by these rules.

[11-29-97; 19.8.12.1203 NMAC - Rn, 19 NMAC 8.2.12.1203, 9-29-2000; A, 4-28-2006]

19.8.12.1204 PETITIONS FOR AWARD OF LEGAL COSTS AND EXPENSES:

A. Who may file. A person may file a petition for award of costs and expenses including attorneys' fees that person has reasonably incurred as a result of his

participation in an administrative review under the act that results in the director issuing a final order pursuant to 19.8.12.1200 or 19.8.12.1203 NMAC.

B. Where to file; time for filing. The person seeking an award for costs and expenses shall file a petition for an award of costs and expenses including attorneys' fees with the director within 45 days after such order's receipt. A person who fails to timely file the petition may waive the right to such an award.

C. Contents of petition. A petition filed under this section shall include the person's name from whom costs and expenses are sought with the following submitted in support of the petition:

(1) an affidavit setting forth in detail all costs and expenses including attorneys' fees the person reasonably incurred for, or in connection with, the person's participation in the proceeding;

(2) receipts or other evidence of such costs and expenses; and

(3) where attorneys' fees are claimed, evidence concerning the hours expended on the case, the customary commercial rate of payment for such services in the area and the individual's performing the services experience, reputation and ability.

D. Answer. Any person served with a copy of the petition shall have 30 days from the petition's service within which to file an answer to the petition.

E. Who may receive an award. The director may award appropriate costs and expenses including attorneys' fees as follows:

(1) from the permittee to any person if the person initiates or participates in any administrative proceeding reviewing enforcement actions upon a finding that a violation of the act, rules or permit has occurred, or that an imminent hazard existed, and the district court or director determines that the person made a substantial contribution to the issues' full and fair determination, except that a person's contribution who did not initiate a proceeding must be separate and distinct from the contribution a person initiating the proceeding made;

(2) from the mining and minerals division to a person, other than the permittee or his representative, who initiates or participates in a proceeding under the act, prevails in whole or in significant part and achieves at least some degree of success on the merits, upon a finding that such person substantially contributed to the issues' full and fair determination, except that a person's contribution who did not initiate a proceeding must be separate and distinct from the contribution a person initiating the proceeding made;

(3) from the mining and minerals division to a permittee where the permittee demonstrates that the director issued an order of cessation, a notice of violation or an

order to show cause why the director should not suspend or revoke the permit in bad faith and for the purpose of harassing or embarrassing the permittee;

(4) from a person to a permittee where the permittee demonstrates that the person initiated a proceeding or participated in such a proceeding in bad faith for the purpose of harassing or embarrassing the permittee; or

(5) from a person to the mining and minerals division where it demonstrates that a person applied for review or any party participated in such a proceeding in bad faith and for the purpose of harassing or embarrassing the mining and minerals division.

F. Awards. An award under these sections may include all costs and expenses, including attorneys' fees and expert witness fees, a party reasonably incurred as a result of initiation or participation in a proceeding under the act; and all costs and expenses, including attorneys' fees and expert witness fees, a party reasonably incurred in seeking the award.

G. Appeals. Any person aggrieved by a director's decision concerning the award of costs and expenses in an administrative proceeding under this act may appeal such award to the district court as set forth in 19.8.12.1202 NMAC.

19.8.13.1300 DIRECTOR'S REVIEW OF OUTSTANDING PERMITS:

A. The director shall review each permit issued and outstanding during the term of the permit. This review shall occur not later than the middle of the permit term and as required by 19.8.10.1000, 1001, 1003 and 1005 NMAC.

B. For permits of longer than five year terms, a review of the permit shall be no less frequent than the permit midterm or every five years, whichever is more frequent.

C. Each permit which authorizes the use of an experimental practice shall be reviewed in its entirety by the director at a frequency set forth in the approved permit, but no less frequently than every 2 1/2 years. Copies of the decision of the director shall

be sent to the permittee and shall be subject to the provisions for administrative and judicial review of 19.8.12 NMAC.

D. The director may, by order, require reasonable revisions or modification of the permit provisions to ensure compliance with the act and 19.8 NMAC.

E. Copies of the decision of the director shall be sent to the permittee.

F. Any order of the director requiring revision or modification of permits shall be based upon written findings and shall be subject to the provisions for administrative and judicial review of decisions in 19.8.12 NMAC.

[11-29-97; 19.8.13.1300 NMAC - Rn, 19 NMAC 8.2.13.1300, 9-29-2000; A, 7-30-2004]

19.8.13.1301 PERMIT REVISIONS:

A. A revision to a permit shall be obtained:

(1) for changes in the surface coal mining or reclamation operations described in the original application and approved under the original permit, when such changes constitute a significant departure from the method of conducting mining or reclamation operations contemplated by the original permit; significant departures as used herein include, but are not limited to:

(a) significant changes in the permit area boundary;

(b) changes in the method of extracting coal from the earth (e.g. change from surface to underground mine);

(c) experimental practices as that term is used in 19.8.10 NMAC and Section 69-25A-33 NMSA 1978 of the act;

(d) changes which would require a variance under 19.8.10.1003 NMAC;

(e) changes which may have an adverse effect on the environment of a nature not originally covered by the approved permit; or

(f) changes which may have an effect on performance bond requirements.

(2) when required by an order issued under 19.8.13.1300 NMAC;

(3) in order to continue operation after the cancellation or material reduction of the liability insurance policy, capability or self-insurance performance bond, or other equivalent guarantee upon which the original permit was issued; or

(4) as otherwise required by the act and 19.8 NMAC.

B. A permit modification shall be obtained for all other changes to a permit that are not classified as a permit revision.

C. The operator may not implement any permit revision or permit modification before obtaining the director's written approval.

D. The application for revision shall be filed in accordance with the following:

(1) the permittee shall submit the application to the director within the time provided for in Paragraph (2) of Subsection B of 19.8.5.504 NMAC;

(2) applications for all types of revisions of a permit shall contain:

(a) an identification of the permit by permit number or other appropriate reference which is the subject of the revision;

(b) a specific description of the requested change in the terms of the permit;

(c) a specific description of any changes in the mining and reclamation operation which may have an effect on performance bond requirements; and

(d) such other information as may be deemed necessary to the director to determine if the proposed revision will comply with the act and 19.8 NMAC.

E. Hearing and notice requirements.

(1) Permit revision. Any application for a revision shall, at a minimum, be subject to the requirements of 19.8.11 NMAC and 19.8.12 NMAC.

(2) Permit modification.

(a) Within 10 days after the filing of a complete application for a permit modification, the director shall issue a decision approving or denying the application in whole or in part. A written copy of the decision shall be promptly provided to the permittee and to all persons on a list maintained by the director who have requested notice of applications under the act for the specific permit being modified.

(b) Within 30 days after the decision notification required by Subparagraph (a) of Paragraph (2) of Subsection E of 19.8.1301 NMAC, the permittee or any person with an interest which is or may be adversely affected may request a formal hearing in regard to the director's decision, in accordance with 19.8.12.1200 NMAC.

F. An application for a permit revision shall be reviewed by the director to determine whether a new or updated determination of the probable hydrologic consequences as described in Subsection C of 19.8.9.907 NMAC or a new or updated assessment of the

probable cumulative impacts as described in Subsection C of 19.8.11.1106 NMAC shall be required.

G. Any revisions which propose significant departures in the experimental practice shall require concurrence by the director of the office of surface mining. Revisions that do not propose significant departures in the experimental practice shall not require concurrence by the director of the office of surface mining.

H. The director shall approve or disapprove the complete application for revision, in accordance with the requirements of 19.8.11 NMAC and Subsection B of 19.8.5.504 NMAC.

I. Any extensions to the area covered by a permit, except for incidental boundary revisions, shall be made by application for a new permit and shall not be approved under this part.

[11-29-97; 19.8.13.1301 NMAC - Rn, 19 NMAC 8.2.13.1301, 9-29-2000; A, 7-30-2004; A, 12-31-2007]

19.8.13.1302 PERMIT RENEWALS: GENERAL REQUIREMENTS:

A. Any valid, existing permit issued pursuant to the act and 19.8 NMAC shall carry with it the right of successive renewal upon expiration of the term of the permit, in accordance with 19.8.13.1303 through 1305 NMAC. Successive renewal shall be available only for those areas which were specifically approved by the director on the application for the existing permit as within the boundaries of the permit.

B. Permit renewal shall not be available for conducting surface coal mining and reclamation operations on lands beyond the boundaries of the permit area approved under the existing permit. Approval of permits to conduct operations on these lands, including, but not limited to, any remainder of the mine plan area described in the application for the existing permit, shall be obtained in accordance with Paragraph (2) of Subsection B of 19.8.13.1303 NMAC.

[11-29-97; 19.8.13.1302 NMAC - Rn, 19 NMAC 8.2.13.1302, 9-29-2000]

19.8.13.1303 PERMIT RENEWALS: COMPLETE APPLICATIONS:

A. Contents. Complete applications for renewals of a permit shall be made at least 120 days before the expiration of the permit involved. Renewal applications shall include at a minimum:

(1) a statement of the name and address of the permittee, the term of the renewal requested, the permit number, and a description of any changes to the matters set forth in the original application for a permit or prior permit renewal;

(2) a copy of the newspaper notice and proof of publication of same under Subsection A of 19.8.11.1100 NMAC; and

(3) evidence that liability insurance policy or adequate self-insurance under 19.8.14.1414 NMAC will be provided by the applicant for the proposed period of renewal.

B. Processing and review.

(1) Complete applications for renewal shall be subject to the requirements of public notification and participation contained in 19.8.11.1100 through 1103 NMAC.

(2) If a complete application for renewal of a permit includes a proposal to extend the mining and reclamation operation beyond the boundaries authorized in the existing permit, the portion of the complete application for renewal of a valid permit which addresses any new land areas shall be subject to the full standards applicable to new permit applications under the act, 19.8.5 NMAC, 19.8.7 NMAC, 19.8.8 NMAC, 19.8.9 NMAC, 19.8.10 NMAC, 19.8.11 NMAC, 19.8.12 NMAC, 19.8.13 NMAC, 19.8.14 NMAC.

(3) If the surface coal mining reclamation operations authorized under the original permit were not subject to the standards contained in Subparagraphs (a) and (b) of Paragraph (5) of Subsection B of Section 69-25A-14 NMSA 1978 of the act and 19.8.10.1006 NMAC, because the permittee complied with the exceptions to Paragraph (5) of Subsection B of Section 69-25A-14 NMSA 1978 of the act, the portion of the application for renewal of the permit which addresses any new land areas previously identified in the reclamation plan submitted pursuant to 19.8.9 NMAC for the original permit shall not be subject to the standards contained in Subparagraphs (a) and (b) of Paragraph (5) of Subsection B of Section 69-25A-14 NMSA 1978 of the act and 19.8.10.1006 NMAC.

(4) Before finally acting to grant the permit renewal, the director shall require any additional performance bond needed by the permittee to comply with the requirements of Paragraph (4) of Subsection A of 19.8.13.1305 NMAC to be filed with the director.

[11-29-97; 19.8.13.1303 NMAC - Rn, 19 NMAC 8.2.13.1303, 9-29-2000; A, 12-31-2007]

19.8.13.1304 PERMIT RENEWALS: TERMS:

Any permit renewal shall be for a term not to exceed the period of the original permit established under 19.8.11.1111 NMAC.

[11-29-97; 19.8.13.1304 NMAC - Rn, 19 NMAC 8.2.13.1304, 9-29-2000]

19.8.13.1305 PERMIT RENEWALS: APPROVAL OR DENIAL:

A. The director shall, upon the basis of a complete application for renewal and completion of all procedures required under 19.8.13.1303 and 1304 NMAC, issue a renewal of a permit, unless it is established and written findings by the director are made that:

(1) the terms and conditions of the existing permit are not being satisfactorily met;

(2) the present surface coal mining and reclamation operations are not in compliance with the environmental protection standards under the act and 19.8.19 NMAC through 19.8.28 NMAC;

(3) the requested renewal substantially jeopardizes the operator's continuing responsibility to comply with the act and 19.8 NMAC on existing permit areas;

(4) the operator has not provided evidence that any performance bond required to be in effect for the operations will continue in full force and effect for the proposed period of renewal, as well as any additional bond the director might require pursuant to 19.8.14 NMAC; or

(5) any additional revised or updated information required by the director has not been provided by the applicant.

B. In determining whether to approve or deny a renewal, the burden shall be on the opponents of renewal.

C. The director shall send copies of his decision to the applicant, any persons who filed objections or comments to the renewal, and to any persons who were parties to any informal conference held on the permit renewal.

D. Any person having an interest which is or may be adversely affected by the decision of the director shall have the right to administrative and judicial review set forth in 19.8.12 NMAC.

[11-29-97; 19.8.13.1305 NMAC - Rn, 19 NMAC 8.2.13.1305, 9-29-2000; A, 12-31-2007]

19.8.13.1306 TRANSFER, ASSIGNMENT OR SALE OF PERMIT RIGHTS: GENERAL REQUIREMENTS:

No transfer, assignment, or sale of the rights granted under any permit issued pursuant to the act and 19.8 NMAC shall be made without the prior written approval of the director, in accordance with 19.8.13.1306 through 1308 NMAC.

[11-29-97; 19.8.13.1306 NMAC - Rn, 19 NMAC 8.2.13.1306, 9-29-2000]

**19.8.13.1307 TRANSFER, ASSIGNMENT OR SALE OF PERMIT RIGHTS:
OBTAINING APPROVAL:**

A. Any person seeking to succeed by transfer, assignment, or sale to the rights granted by a permit issued shall, pursuant to the act and 19.8 NMAC, prior to the date of such transfer, assignment or sale:

(1) obtain the performance bond coverage of the original permittee by:

(a) obtaining transfer of the original bond;

(b) obtaining a written agreement with the original permittee and all subsequent successors in interest (if any) that the bond posted by the original permittee and all successors shall continue in force on all areas affected by the original permittee and all successors, and supplementing such previous bonding with such additional bond as may be required by the director. If such an agreement is reached, the director may authorize for each previous successor and the original permittee the release of any remaining amount of bond in excess of that required by the agreement;

(c) providing sufficient bond to cover the original permit in its entirety from inception to completion of reclamation operations; or

(d) such other methods as would provide that reclamation of all areas affected by the original permittee is assured in an amount required by 19.8.14 NMAC.

(2) provide the director with an application for approval of such proposed transfer, assignment, or sale, including:

(a) the name and address of the existing permittee;

(b) the name and address of the person proposing to succeed by such transfer, assignment, or sale and the name and address of that person's resident agent;

(c) for surface mining activities, the same information as is required by 19.8.7.701, 702, 703, 704.C, 706 and 707 NMAC for applications for new permits for those activities; or

(d) for underground mining activities, the same information as is required by Subparagraph (c) of Paragraph (2) of Subsection A of 19.8.13.1307 NMAC for applications for new permits for those activities.

(3) obtain the written approval of the director for transfer, assignment or sale of rights according to Subsection C of 19.8.13.1307 NMAC.

B. Public notice and comment period.

(1) The person applying for approval of such transfer, assignment or sale of rights granted by a permit shall advertise the filing of the application in a newspaper of general circulation in the county of the proposed surface coal mining and reclamation operations, indicating the name and address of the applicant, the original permittee, the number and particular geographic location of the permit, and the address to which written comments may be sent under this paragraph.

(2) Any person whose interests are or may be adversely affected, including, but not limited to, the head of any local, state, tribal or federal government agency may submit written comments on the application for approval to the director within 30 days.

C. The director may, upon the basis of the applicant's compliance with the requirements of Subsections A and B of 19.8.13.1307 NMAC, grant written approval for the transfer, sale, or assignment of rights under a permit, if he first finds, in writing, that:

(1) the person seeking approval will conduct the operations covered by the permit in accordance with the criteria specified in the act, 19.8.10 NMAC and 19.8.11.1106 through 1108 NMAC.

(2) the applicant has, in accordance with Paragraph (1) of Subsection A of 19.8.13.1307 NMAC, submitted a performance bond or other guarantee as required by 19.8.14 NMAC and at least equivalent to the bond or other guarantee of the original permittee; and

(3) the applicant will continue to conduct the operations involved in full compliance with the terms and conditions of the original permit, unless and until he has obtained a new permit or a revised permit in accordance with the act and 19.8 NMAC.

(4) the applicant is eligible to receive a permit in accordance with Subsection C of 19.8.11.1105 NMAC.

D. The director shall notify the permittee, the successor in interest, commenters and the director of the office of surface mining of his findings.

E. The successor in interest shall immediately provide notice to the director of the consummation of the transfer, assignment or sale of permit rights.

[11-29-97; 19.8.13.1307 NMAC - Rn, 19 NMAC 8.2.13.1307, 9-29-2000; A, 1-15-2002; A, 12-31-2007]

19.8.13.1308 REQUIREMENTS FOR NEW PERMITS FOR PERSONS SUCCEEDING TO RIGHTS GRANTED UNDER A PERMIT:

A. A successor in interest to a permittee who is able to obtain the bond coverage of the original permittee may continue surface coal mining and reclamation operations

according to the approved mining and reclamation plan and permit of the original permittee.

B. Pursuant to Paragraph (3) of Subsection C of 19.8.13.1307 NMAC, any successor in interest seeking to change the conditions of mining or reclamation operations, or any of the terms or conditions of the original permit shall:

(1) make application for a new permit under 19.8.5 NMAC through 19.8.12 NMAC, if the change involves conducting operations outside the original permit area; or

(2) make application for a revised permit under 19.8.13.1301 NMAC.

[11-29-97; 19.8.13.1308 NMAC - Rn, 19 NMAC 8.2.13.1308, 9-29-2000]

PART 14: GENERAL REQUIREMENTS FOR BONDING OF SURFACE COAL MINING AND RECLAMATION OPERATIONS

19.8.14.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.14.1 NMAC - N, 9-29-2000]

19.8.14.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.14.2 NMAC - N, 9-29-2000]

19.8.14.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[19.8.14.3 NMAC - N, 9-29-2000]

19.8.14.4 DURATION:

Permanent.

[19.8.14.4 NMAC - N, 9-29-2000]

19.8.14.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.14.5 NMAC- N, 9-29-2000]

19.8.14.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.14.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.14.7 DEFINITIONS:

[RESERVED]

[19.8.14.7 NMAC- N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.14.8-19.8.14.1399 [RESERVED]:

[19.8.14.8 - 19.8.14.1399 NMAC - N, 9-29-2000]

19.8.14.1400 PROPOSAL FOR BOND:

A. The applicant shall provide a bonding proposal to the director for review and comment following approval of the permit application but prior to permit issuance. The proposal shall include all information required by this part relating to the nature of bond proposed, including a recommendation as to the margin required in Paragraph (1) of Subsection E of 19.8.14.1409 NMAC.

B. The director shall review and accept or reject such proposal within 60 days of receipt of the proposal. Such determination shall be in writing and shall contain the reasons for the director's determination.

[11-29-97; 19.8.14.1400 NMAC - Rn, 19 NMAC 8.2.14.1400, 9-29-2000]

19.8.14.1401 REQUIREMENT TO FILE A BOND:

A. After a permit application under 19.8.5 NMAC through 19.8.13 NMAC has been approved, but before a permit is issued, the applicant shall file with the director, on a form prescribed and furnished by the director, a bond or bonds for performance made payable to the state of New Mexico and conditioned upon the faithful performance of all the requirements of the act, the regulatory program, the permit, and the reclamation plan.

B. Bond coverage requirements.

(1) The bond or bonds shall cover the entire permit area, or an identified increment of land within the permit area upon which the operator will initiate and conduct surface coal mining and reclamation operations during the initial term of the permit.

(2) Before surface coal mining and reclamation operations on succeeding increments are initiated and conducted within the permit area, the permittee shall file with the director an additional bond or bonds to cover such increments in accordance with this section.

(3) The operator shall identify the initial and successive areas or increments for bonding on the permit application map submitted for approval as provided in the application (under 19.8.5 NMAC through 19.8.13 NMAC), and shall specify the bond amount to be provided for each area or increment.

(4) Independent increments shall be of sufficient size and configuration to provide for efficient reclamation operations should reclamation by the director become necessary pursuant to 19.8.14.1414 NMAC.

C. An operator shall not disturb any surface areas, succeeding increments, or extend any underground shafts, tunnels or operations prior to acceptance by the director of the required performance bond.

D. The applicant shall file, with the approval of the director, a bond or bonds under one of the following schemes to cover the bond amounts for the permit area as determined in accordance with 19.8.14.1404 NMAC:

(1) a performance bond or bonds for the entire permit area;

(2) a cumulative bond schedule and the performance bond required for full reclamation of the initial area to be disturbed; or

(3) an incremental bond schedule and the performance bond required for the first increment in the schedule.

[11-29-97; 19.8.14.1401 NMAC - Rn, 19 NMAC 8.2.14.1401, 9-29-2000; A, 12-31-2007]

19.8.14.1402 FORM OF THE PERFORMANCE BOND:

The director shall prescribe the form of the performance bond. The director may allow for:

A. a surety bond;

- B.** a collateral bond;
- C.** a self-bond; or
- D.** a combination of any of these bonding methods.

[11-29-97; 19.8.14.1402 NMAC - Rn, 19 NMAC 8.2.14.1402, 9-29-2000]

19.8.14.1403 PERIOD OF LIABILITY:

A. Duration and phased bonding option.

(1) Performance bond liability shall be for the duration of the surface coal mining and reclamation operation and for a period which is coincident with the operator's period of extended responsibility for successful revegetation provided in 19.8.20.2065 NMAC or until achievement of the reclamation requirements of the act, regulatory programs, and permit, whichever is later.

(2) With the approval of the director, a bond may be posted and approved to guarantee specific phases of reclamation within the permit area provided the sum of phase bonds posted equals or exceeds the total amount required under 19.8.14.1405 and 1406 NMAC. The scope of work to be guaranteed and the liability assumed under each phase bond shall be specified in detail.

B. Isolated and clearly defined portions of the permit area requiring extended liability may be separated from the original area and bonded separately with the approval of the director. Such areas shall be limited in extent and not constitute a scattered, intermittent, or checkerboard pattern of failure. Access to the separated areas for remedial work may be included in the area under extended liability if deemed necessary by the director.

C. If the director approves a long-term, intensive agricultural post-mining land use, in accordance with Subparagraph (c) of Paragraph (5) of Subsection B of 19.8.20.2065 NMAC, the applicable 5 or 10 year period of liability shall commence at the date of initial planting for such long-term agricultural use.

D. Bond liability limitations.

(1) The bond liability of the permittee shall include only those actions which the permittee is obligated to take under the permit, including completion of the reclamation plan, so that the land will be capable of supporting the postmining land use approved under 19.8.20.2075 NMAC.

(2) Implementation of an alternative postmining land use approved under 19.8.20.2075 NMAC which is beyond the control of the permittee, need not be covered

by the bond. Bond liability for prime farmland shall be as specified in Paragraph (2) of Subsection C of 19.8.14.1412 NMAC.

[11-29-97; 19.8.14.1403 NMAC - Rn, 19 NMAC 8.2.14.1403, 9-29-2000; A, 12-31-2007]

19.8.14.1404 DETERMINATION OF BOND AMOUNT:

A. The amount of the bond required for each bonded area shall:

- (1) be determined by the director;
- (2) depend upon the requirements of the approved permit and reclamation plan;
- (3) reflect the probable difficulty of reclamation, giving consideration to such factors as topography, geology, hydrology, and revegetation potential; and
- (4) be based on, but not limited to, the estimated cost submitted by the permit applicant.

B. The amount of the bond shall be sufficient to assure the completion of the reclamation plan if the work has to be performed by the state of New Mexico in the event of forfeiture, and in no case shall the total bond initially posted for the entire area under one permit be less than \$10,000.

C. An operator's financial responsibility under 19.8.20.2069 and 2070 NMAC for repairing material damage resulting from subsidence may be satisfied by the liability insurance policy required under 19.8.14.1415 NMAC.

[11-29-97; 19.8.14.1404 NMAC - Rn, 19 NMAC 8.2.14.1404, 9-29-2000]

19.8.14.1405 ADJUSTMENT OF AMOUNT:

A. The amount of the bond or deposit required and the terms of the acceptance of the permittee's bond shall be adjusted by the director from time to time as the area requiring bond coverage is increased or decreased or where the cost of future reclamation changes. The director may specify periodic times or set a schedule for reevaluating and adjusting the bond amount to fulfill this requirement.

B. The director shall:

- (1) notify the permittee, the surety, and any person with a property interest in collateral who has requested notification under Subsection F of 19.8.14.1410 NMAC of any proposed adjustment to the bond amount; and

(2) provide the permittee an opportunity for an informal conference on the adjustment.

C. A permittee may request reduction of the amount of the performance bond upon submission of evidence to the director proving that the permittee's method of operation or other circumstances reduces the estimated cost for the state of New Mexico to reclaim the bonded area. Bond adjustments which involve undisturbed land or revision of the cost estimate of reclamation are not considered bond release subject to procedures of 19.8.14.1413 NMAC.

D. In the event that an approved permit is revised in accordance with 19.8.5 NMAC through 19.8.13 NMAC, the director shall review the bond for adequacy and, if necessary, shall require adjustment of the bond to conform to the permit as revised.

[11-29-97; 19.8.14.1405 NMAC - Rn, 19 NMAC 8.2.14.1405, 9-29-2000]

19.8.14.1406 GENERAL TERMS AND CONDITIONS OF BOND:

A. The performance bond shall be in an amount determined by the director as provided in 19.8.14.1405 NMAC.

B. The performance bond shall be payable to the state of New Mexico.

C. The performance bond shall be conditioned upon faithful performance of all the requirements of the act, 19.8.14 NMAC, the regulatory program, and the approved permit, including completion of the reclamation plan.

D. The duration of the bond shall be for the time period provided in 19.8.14.1403 NMAC.

E. Insolvency or bankruptcy.

(1) The bond shall provide a mechanism for a bank or surety company to give prompt notice to the director and the permittee of any action filed alleging the insolvency or bankruptcy of the surety company, the bank, or the permittee, or alleging any violations which would result in suspension or revocation of the surety or bank charter or license to do business.

(2) Upon the incapacity of a bank or surety company by reason of bankruptcy, insolvency, or suspension or revocation of a charter or license, the permittee shall be deemed to be without bond coverage and shall promptly notify the director. The director, upon notification received through procedures of Paragraph (1) of Subsection E of 19.8.14.1406 NMAC or from the permittee, shall, in writing, notify the operator who is without bond coverage and specify a reasonable period, not to exceed 90 days, to replace bond coverage. If an adequate bond is not posted by the end of the period allowed, the operator shall cease coal extraction and shall comply with the provisions of

19.8.20.2074 NMAC and shall immediately begin to conduct reclamation operations in accordance with the reclamation plan. Mining operations shall not resume until the director has determined that an acceptable bond has been posted.

[11-29-97; 19.8.14.1406 NMAC - Rn, 19 NMAC 8.2.14.1406, 9-29-2000; A, 12-31-2007]

19.8.14.1407 BONDING REQUIREMENTS FOR UNDERGROUND COAL MINES AND LONG-TERM COAL-RELATED SURFACE FACILITIES AND STRUCTURES:

A. Responsibilities. The director shall require bond coverage, in an amount determined under 19.8.14.1404 NMAC, for long-term surface facilities and structures, and for areas disturbed by surface impacts incident to under-ground mines, for which a permit is required. Specific reclamation techniques required for underground mines and long-term facilities shall be considered in determining the amount of bond to complete the reclamation.

B. Long-term period of liability.

(1) The period of liability for every bond covering long-term surface disturbances shall commence with the issuance of a permit, except that to the extent that such disturbances will occur on a succeeding increment to be bonded, such liability will commence upon the posting of the bond for that increment before the initial surface disturbance of that increment. The liability period shall extend until all reclamation, restoration, and abatement work under the permit has been completed and the bond is released under the provisions of 19.8.14.1412 NMAC, or until the bond has been replaced or extended in accordance with Paragraph (3) of Subsection B of 19.8.14.1407 NMAC.

(2) Long-term surface disturbances shall include long-term coal-related surface facilities and structures, and surface impacts incident to underground coal mining, which disturb an area for a period that exceeds 5 years. Long-term surface disturbances include, but are not limited to: surface features of shafts and slope facilities, coal refuse areas, powerlines, bore-holes, ventilation shafts, preparation plants, machine shops, roads, and loading and treatment facilities.

(3) To achieve continuous bond coverage for long-term surface disturbances, the bond shall be conditioned upon extension, replacement, or payment in full, 30 days prior to the expiration of the bond term.

(4) Continuous bond coverage shall apply throughout the period of extended responsibility for successful revegetation and until the provisions of 19.8.14.1412 NMAC have been met.

C. Bond forfeiture. The director shall take action to forfeit a bond pursuant to this section, if 30 days prior to bond expiration, the operator has not filed:

(1) a performance bond for a new term as required for continuous coverage,
or

(2) a performance bond providing coverage for the period of liability, including the period of extended responsibility for successful revegetation.

[11-29-97; 19.8.14.1407 NMAC - Rn, 19 NMAC 8.2.14.1407, 9-29-2000; A, 12-31-2007]

19.8.14.1408 SURETY BONDS:

A. A surety bond shall be executed by the operator and a corporate surety licensed to do business in the state.

B. Surety bonds shall be noncancellable during their terms, except that surety bond coverage for lands not disturbed may be canceled with the prior consent of the director. The director shall advise the surety, within 30 days after receipt of a notice to cancel bond, whether the bond may be canceled on an undisturbed area.

[11-29-97; 19.8.14.1408 NMAC - Rn, 19 NMAC 8.2.14.1408, 9-29-2000]

19.8.14.1409 COLLATERAL BONDS:

A. Collateral bonds, except for letters of credit, cash accounts, and real property, shall be subject to the following conditions:

(1) the director shall keep custody of collateral deposited by the applicant until authorized for release or replacement as provided in 19.8.14 NMAC;

(2) the director shall value collateral at its current market value, not at face value;

(3) the director shall require that certificates of deposit be made payable to or assigned to the state of New Mexico, both in writing and upon the records of the bank issuing the certificates; if assigned, the director shall require the banks issuing these certificates to waive all rights of setoff or liens against those certificates;

(4) the director shall not accept an individual certificate of deposit in an amount in excess of \$100,000 or the maximum insurable amount as determined by the federal deposit insurance corporation or the federal savings and loan insurance corporation.

B. Letters of credit shall be subject to the following conditions:

(1) the letter may be issued only by a bank organized or authorized to do business in the United States;

(2) letters of credit shall be irrevocable during their terms; a letter of credit used as security in areas requiring continuous bond coverage shall be forfeited and shall be collected by the state of New Mexico if not replaced by other suitable bond or letter of credit at least 30 days before its expiration date;

(3) the letter of credit shall be payable to the state of New Mexico upon demand, in part or in full, upon receipt from the director of a notice of forfeiture issued in accordance with 19.8.14.1413 NMAC.

C. Real property posted as a collateral bond shall meet the following conditions:

(1) The applicant shall grant the state of New Mexico a first mortgage, first deed of trust, or perfected first-lien security interest in real property with a right to sell in accordance with state law or otherwise dispose of the property in the event of forfeiture under 19.8.14.1414 NMAC.

(2) In order for the director to evaluate the adequacy of the real property offered to satisfy collateral requirements, the applicant shall submit a schedule of the real property which shall be mortgaged or pledged to secure the obligations under the indemnity agreement. The list shall include:

- (a)** a description of the property;
- (b)** the fair market value as determined by an independent appraisal conducted by a qualified appraiser, previously approved by the director; and
- (c)** proof of possession and title to the real property.

(3) The property may include land which is part of the permit area; however, land pledged as collateral for a bond under this section shall not be disturbed under any permit while it is serving as security under this section.

D. Cash accounts shall be subject to the following conditions:

(1) the director may authorize the operator to supplement the bond through the establishment of a cash account in one or more federally-insured or equivalently protected accounts made payable upon demand to, or deposited directly with, the state of New Mexico; the total bond including the cash account shall not be less than the amount required under terms of performance bonds including any adjustments, less amounts released in accordance with 19.8.14.1412 NMAC;

(2) any interest paid on a cash account shall be retained in the account and applied to the bond value of the account unless the director has approved the payment of interest to the operator;

(3) certificates of deposit may be substituted for a cash account with the approval of the director;

(4) the director shall not accept an individual cash account in an amount in excess of \$100,000 or the maximum insurable amount as determined by the federal deposit insurance corporation or the federal savings and loan insurance corporation.

E. Fluctuating collateral value.

(1) If the nature of the collateral proposed to be given as security for a bond is subject to fluctuations in value over time, the director shall require that such collateral have a fair market value at the time of permit approval in excess of the bond amount by a reasonable margin. The amount of such margin shall reflect changes in value anticipated as probable of occurrence over a period of five years, including depreciation, appreciation, marketability and market fluctuation. In any event, the director shall require a margin for legal fees and costs of disposition of the collateral.

(2) The annual report shall report percentage changes in the fair market value of any collateral accepted by the director pursuant to this subsection since the time of the last report.

(3) The bond value of collateral may be evaluated at any time but it shall be evaluated as part of permit renewal and, if necessary, the performance bond amount increased or decreased. In no case shall the bond value of collateral exceed the market value.

F. Persons with an interest in collateral posted as a bond, and who desire notification of actions pursuant to the bond, shall request the notification in writing to the director at the time collateral is offered.

[11-29-97; 19.8.14.1409 NMAC - Rn, 19 NMAC 8.2.14.1409, 9-29-2000; A, 12-31-2007]

19.8.14.1410 SELF-BONDING:

A. The director may accept a self-bond from an applicant for a permit if all of the following conditions are met by the applicant, or its parent corporation guarantor:

(1) the applicant designates a suitable agent to receive service of process in the state.

(2) the applicant has been in continuous operation as a business entity for a period of not less than 5 years. Continuous operation shall mean that business was conducted over a period of 5 years immediately preceding the time of application.

(a) The director may allow a joint venture or syndicate with less than 5 years of continuous operation to qualify under this requirement, if each member of the joint

venture or syndicate has been in continuous operation for at least 5 years immediately preceding the time of application.

(b) When calculating the period of continuous operation, the director may exclude past periods of interruption to the operation of the business entity that were beyond the applicant's control and that do not affect the applicant's likelihood of remaining in business during the proposed surface coal mining and reclamation operations.

(3) The applicant submits financial information in sufficient detail to show that the applicant meets one of the following criteria:

(a) the applicant has a current rating for its most recent bond issuance of "A" or higher as issued by either Moody's investor service or Standard and Poor's corporation;

(b) the applicant has a tangible net worth of at least \$10 million, a ratio of total liabilities to net worth of 2.5 times or less, and a ratio of current assets to current liabilities of 1.2 times or greater; or

(c) the applicant's fixed assets in the United States total at least \$20 million, and the applicant has a ratio of total liabilities to net worth of 2.5 times or less, and a ratio of current assets to current liabilities of 1.2 times or greater.

(4) The applicant submits:

(a) financial statements for the most recently completed fiscal year accompanied by a report prepared by an independent certified public accountant in conformity with generally accepted accounting principles and containing the accountant's audit opinion or review opinion of the financial statements with no adverse opinion;

(b) unaudited financial statements for completed quarters in the current fiscal year; and

(c) additional unaudited information as requested by the director.

B. The director may accept a written guarantee for an applicant's self-bond from a parent corporation guarantor, if the guarantor meets the conditions of Paragraphs (1) through (4) of Subsection A of 19.8.14.1410 NMAC as if it were the applicant. Such a written guarantee shall be referred to as a "corporate guarantee." The terms of the corporate guarantee shall provide for the following:

(1) if the applicant fails to complete the reclamation plan, the guarantor shall do so or the guarantor shall be liable under the indemnity agreement to provide funds to

the state of New Mexico sufficient to complete the reclamation plan, but not to exceed the bond amount;

(2) the corporate guarantee shall remain in force unless the guarantor sends notice of cancellation by certified mail to the applicant and to the director at least 90 days in advance of the cancellation date, and the director accepts the cancellation;

(3) the cancellation may be accepted by the director if the applicant obtains suitable replacement bond before the cancellation date or if the lands for which the self-bond, or portion thereof, was accepted have not been disturbed.

C. For the director to accept an applicant's self-bond, the total amount of the outstanding and proposed self-bonds of the applicant for surface coal mining and reclamation operations shall not exceed 25 percent of the applicant's tangible net worth in the United States. For the director to accept a corporate guarantee, the total amount of the corporate guarantor's present and proposed self-bonds and guaranteed self-bonds for surface coal mining and reclamation operations shall not exceed 25 percent of the guarantor's tangible net worth in the United States.

D. If the director accepts an applicant's self-bond, an indemnity agreement shall be submitted subject to the following requirements:

(1) the indemnity agreement shall be executed by all persons and parties who are to be bound by it, including the corporate guarantor, and shall bind each jointly and severally;

(2) corporations applying for a self-bond, and parent and non-parent corporations guaranteeing an applicant's self-bond shall submit an indemnity agreement signed by two corporate officers who are authorized to bind their corporations; a copy of such authorization shall be provided to the director along with an affidavit certifying that such an agreement is valid under all applicable federal and state laws; in addition, the guarantor shall provide a copy of the corporate authorization demonstrating that the corporation may guarantee the self-bond and execute the indemnity agreement;

(3) if the applicant is a partnership, joint venture or syndicate, the agreement shall bind each partner or party who has a beneficial interest, directly or indirectly, in the applicant;

(4) pursuant to 19.8.14.1413 NMAC, the applicant or corporate guarantor shall be required to complete the approved reclamation plan for the lands in default or to pay to the state of New Mexico an amount necessary to complete the approved reclamation plan, not to exceed the bond amount.

E. The director may require self-bonded applicants and corporate guarantors to submit an update of the information required under Paragraphs (3) and (4) of

Subsection A of 19.8.14.1410 NMAC within 90 days after the close of each fiscal year following the issuance of the self-bond or corporate guarantee.

F. If at any time during the period when a self-bond is posted, the financial conditions of the applicant or the corporate guarantor change so that the criteria of Paragraph (3) of Subsection A of 19.8.14.1410 NMAC and Subsection C of 19.8.14.1410 NMAC are not satisfied, the permittee shall notify the director immediately and shall within 90 days post an alternate form of bond in the same amount as the self-bond. Should the permittee fail to post an adequate substitute bond, the provisions of Subsection E of 19.8.14.1406 NMAC shall apply.

[11-29-97; 19.8.14.1410 NMAC - Rn, 19 NMAC 8.2.14.1410, 9-29-2000; A, 1-15-2002; A, 12-31-2007]

19.8.14.1411 REPLACEMENT OF BONDS:

A. The director may allow a permittee to replace existing bonds with other bonds that provide equivalent coverage.

B. The director shall not release existing performance bonds until the permittee has submitted, and the director has approved, acceptable replacement performance bonds. Replacement of a performance bond pursuant to this section shall not constitute a release of bond under 19.8.14.1412 NMAC.

[11-29-97; 19.8.14.1411 NMAC - Rn, 19 NMAC 8.2.14.1411, 9-29-2000; A, 12-31-2007]

19.8.14.1412 REQUIREMENT TO RELEASE PERFORMANCE BONDS:

A. Bond release application.

(1) The permittee may file an application with the director for the release of all or part of a performance bond. Applications may be filed only at times or during seasons authorized by the director in order to properly evaluate the completed reclamation operations. The times or seasons appropriate for the evaluation of certain types of reclamation shall be established in the mining and reclamation plan approved by the director.

(2) An application for a bond release shall at a minimum contain the following information:

- (a)** the permittee's name, address and the appropriate permit number;
- (b)** an accurate legal description of the land sought for bond release (either metes and bounds or precise section, township and range designations);

(c) the location of the area proposed for bond release shown on a USGS 7.5' map, which should also show the permit boundaries;

(d) a brief narrative summarizing the past history of the mine, the type, amount and date of the current bonding instrument, the number of acres included in the bond release application and the portion it represents of the total permit area, a description of the type and dates of the reclamation performed with a summary of the results achieved as they relate to the approved reclamation plan, and any other pertinent information that the applicant or the director may consider appropriate;

(e) a table listing the names, addresses and number of acres held by each of the surface and mineral owners of record in the area proposed for bond release;

(f) copies of letters sent to adjoining landowners, local governmental bodies, tribal governments, planning agencies, sewage and water treatment authorities, and water companies in the locality of the reclamation operation, notifying them of the permittee's intention to seek bond release; and

(g) other maps or other information as may be appropriate or required by the director to locate or characterize the areas proposed for bond release, revegetation, hydrological or other reclamation issues;

(h) the permittee shall include in the application for bond release a notarized statement which certifies that all applicable reclamation activities have been accomplished in accordance with the requirements of SMCRA, the act, the regulatory program, and the approved reclamation plan; a certification shall be submitted for each application or phase of bond release.

(3) Within 30 days after an application for bond release has been filed with the director, the operator shall submit a copy of an advertisement placed at least once a week for four successive weeks in a newspaper of general circulation in the locality of the surface coal mining operation. The advertisement shall be considered part of any bond release application and shall contain the permittee's name, permit number and approval date, notification of the precise location of the land affected, the number of acres, the type and amount of the bond filed and the portion sought to be released, the type and appropriate dates of reclamation work performed, a description of the results achieved as they relate to the operator's approved reclamation plan, and the name and address of the director, to whom written comments, objections, or requests for public hearings and informal conferences on the specific bond release may be submitted pursuant to Subsections F and H of 19.8.14.1412 NMAC.

B. Inspection by director.

(1) Upon receipt of the bond release application, the director shall, within 30 days, or as soon thereafter as weather conditions permit, conduct an inspection and evaluation of the reclamation work involved. The evaluation shall consider, among other

factors, the degree of difficulty to complete any remaining reclamation, whether pollution of surface and subsurface water is occurring, the probability of future occurrence of such pollution, and the estimated cost of abating such pollution. The surface owner, agent, or lessee shall be given notice of such inspection and may participate with the director in making the bond release inspection. The director may arrange with the permittee to allow access to the permit area, upon request by any person with an interest in bond release, for the purpose of gathering information relevant to the proceeding.

(2) Within 60 days from the filing of the bond release application, if no public hearing is held pursuant to Subsection F of 19.8.14.1412 NMAC, or, within 30 days after a public hearing has been held pursuant to Subsection F of 19.8.14.1412 NMAC, the director shall notify in writing the permittee, the surety or other persons with an interest in bond collateral who have requested notification under Subsection F of 19.8.14.1409 NMAC, and the persons who either filed objections in writing or objectors who were a party to the hearing proceedings, if any, of its decision to release or not to release all or part of the performance bond.

C. The director may release all or part of the bond for the entire permit area or incremental area if the director is satisfied that all the reclamation or a phase of the reclamation covered by the bond or portion thereof has been accomplished in accordance with the following schedules for reclamation of phases I, II, and III.

(1) At the completion of phase I, after the operator completes the backfilling, regrading (which may include the replacement of topsoil) and drainage control of a bonded area in accordance with the approved reclamation plan, 60 percent of the bond or collateral for the applicable area.

(2) At the completion of phase II, after revegetation has been established on the regraded mined lands in accordance with the approved reclamation plan, an additional amount of bond. When determining the amount of bond to be released after successful revegetation has been established, the director shall retain that amount of bond for the revegetated area which would be sufficient to cover the cost of reestablishing revegetation if completed by a third party and for the period specified for operator responsibility in Section 69-25A-19 NMSA 1978 of the act for reestablishing revegetation. No part of the bond or deposit shall be released under this paragraph so long as the lands to which the release would be applicable are contributing suspended solids to streamflow or runoff outside the permit area in excess of the requirements set by Paragraph (10) of Subsection B of Section 69-25A-19 NMSA 1978 of the act and by 19.8.19 NMAC through 19.8.28 NMAC or until soil productivity for prime farmlands has returned to the equivalent levels of yield as non-mined land of the same soil type in the surrounding area under equivalent management practices as determined from the soil survey performed pursuant to Paragraph (16) of Subsection B of Section 69-25A-10 NMSA 1978 of the act and 19.8.24 NMAC. Where a silt dam is to be retained as a permanent impoundment pursuant to 19.8.19 NMAC through 19.8.28 NMAC, the phase II portion of the bond may be released under this paragraph so long as provisions for

sound future maintenance by the operator or the landowner have been made with the director.

(3) At the completion of phase III, after the operator has completed successfully all surface coal mining and reclamation activities, the release of the remaining portion of the bond, but not before the expiration of the period specified for operator responsibility in 19.8.20.2065 NMAC. However, no bond shall be fully released under provisions of this section until reclamation requirements of the act and the permit are fully met.

D. If the director disapproves the application for release of the bond or portion thereof, the director shall notify the permittee, the surety, and any person with an interest in collateral as provided for in Subsection F of 19.8.14.1409 NMAC, in writing, stating the reasons for disapproval and recommending corrective actions necessary to secure the release and allowing an opportunity for a public hearing.

E. When any application for total or partial bond release is filed with the director, the director shall notify the municipality in which the surface coal mining operation is located by certified mail at least 30 days prior to the release of all or a portion of the bond.

F. Any person with a valid legal interest which might be adversely affected by release of the bond, or the responsible officer or head of any federal, state, tribal or local governmental agency which has jurisdiction by law or special expertise with respect to any environmental, social, or economic impact involved in the operation or which is authorized to develop and enforce environmental standards with respect to such operations, shall have the right to file written objections to the proposed release from bond with the director within 30 days after the last publication of the notice required by Paragraph (3) of Subsection A of 19.8.14.1412 NMAC. If written objections are filed and a hearing is requested, the director shall inform all the interested parties of the time and place of the hearing, and shall hold a public hearing within 30 days after receipt of the request for the hearing. The date, time, and location of the public hearing shall be advertised by the director in a newspaper of general circulation in the locality for two consecutive weeks. The public hearing shall be held in the locality of the surface coal mining operation from which bond release is sought, or at the location of the director's office, at the option of the objector.

G. For the purpose of the hearing under Subsection F of 19.8.14.1412 NMAC, the director shall have the authority to administer oaths, subpoena witnesses or written or printed material, compel the attendance of witnesses or the production of materials, and take evidence including, but not limited to, inspection of the land affected and other surface coal mining operations carried on by the applicant in the general vicinity. A verbatim record of each public hearing shall be made, and a transcript shall be made available on the motion for any party or by order of the director.

H. Without prejudice to the right of an objector or the applicant, the director may hold an informal conference as provided in Subsection B of Section 69-25A-17 NMSA

1978 of the act to resolve such written objections. The director shall make a record of the informal conference unless waived by all parties, which shall be accessible to all parties. The director shall also furnish all parties of the informal conference with a written finding of the director based on the informal conference, and the reasons for said finding.

[11-29-97; 19.8.14.1412 NMAC - Rn, 19 NMAC 8.2.14.1412, 9-29-2000; A, 1-15-2002; A, 12-31-2007]

19.8.14.1413 FORFEITURE OF BONDS:

A. If an operator refuses or is unable to conduct reclamation of an unabated violation, if the terms of the permit are not met, or if the operator defaults on the conditions under which the bond was accepted, the director shall take the following action to forfeit all or part of a bond or bonds for any permit area or an increment of a permit area:

(1) send written notification by certified mail, return receipt requested, to the permittee and the surety on the bond, if any, informing them of the determination to forfeit all or part of the bond, including the reasons for the forfeiture and the amount to be forfeited; the amount shall be based on the estimated total cost of achieving the reclamation plan requirements;

(2) advise the permittee and surety, if applicable, of the conditions under which forfeiture may be avoided; such conditions may include, but are not limited to:

(a) agreement by the permittee or another party to perform reclamation operations in accordance with a compliance schedule which meets the conditions of the permit, the reclamation plan, and the regulatory program and a demonstration that such party has the ability to satisfy the conditions; or

(b) the director may allow a surety to complete the reclamation plan, or the portion of the reclamation plan applicable to the bonded phase or increment, if the surety can demonstrate an ability to complete the reclamation in accordance with the approved reclamation plan; except where the director may approve partial release authorized under 19.8.14.1412 NMAC, no surety liability shall be released until successful completion of all reclamation under the terms of the permit, including applicable liability periods of 19.8.14.1403 NMAC.

B. In the event forfeiture of the bond is required by this section, the director shall:

(1) proceed to collect the forfeited amount as provided by applicable laws for the collection of defaulted bonds or other debts if actions to avoid forfeiture have not been taken, or if rights of appeal, if any, have not been exercised within a time established by the director, or if such appeal, if taken, is unsuccessful;

(2) use funds collected from bond forfeiture to complete the reclamation plan, or portion thereof, on the permit area or increment, to which bond coverage applies.

C. Upon default on the conditions under which the bond was accepted, the director may cause the forfeiture of any and all bonds deposited to complete reclamation for which the bonds were posted. Unless specifically limited, as provided in Subsection B of 19.8.14.1401 NMAC, bond liability shall extend to the entire permit area under conditions of forfeiture.

D. Discrepancies between bond amounts and actual costs of reclamation.

(1) In the event the estimated amount forfeited is insufficient to pay for the full cost of reclamation, the operator shall be liable for remaining costs. The director may complete, or authorize completion of, reclamation of the bonded area in accordance with the permit terms and may recover from the operator all reasonably incurred costs of reclamation in excess of the amount forfeited.

(2) In the event the amount of performance bond forfeited was more than the amount necessary to complete reclamation, the unused funds shall be returned by the director to the party from whom they were collected.

[11-29-97; 19.8.14.1413 NMAC - Rn, 19 NMAC 8.2.14.1413, 9-29-2000; A, 12-31-2007]

19.8.14.1414 TERMS AND CONDITIONS FOR LIABILITY INSURANCE:

A. The director shall require the applicant to submit as part of its permit application a certificate issued by an insurance company authorized to do business in the United States certifying that the applicant has a public liability insurance policy in force for the surface coal mining and reclamation operations for which the permit is sought. Such policy shall provide for personal injury and property damage protection in an amount adequate to compensate any persons injured or property damaged as a result of the surface coal mining and reclamation operations, including the use of explosives, and who are entitled to compensation under the applicable provisions of state law. Minimum insurance coverage for bodily injury and property damage shall be \$300,000 for each occurrence and \$500,000 aggregate.

B. The policy shall be maintained in full force during the life of the permit or any renewal thereof, including the liability period necessary to complete all reclamation operations under 19.8.14 NMAC.

C. The policy shall include a rider requiring that the insurer notify the director whenever substantive changes are made in the policy including any termination or failure to renew.

D. The director may accept from the applicant, in lieu of a certificate for a public liability insurance policy, a commitment to self-insure for bodily injury and property

damage, if the director has approved a self-bond for the applicant in accordance with 19.8.14.1410 NMAC.

[11-29-97; 19.8.14.1414 NMAC - Rn, 19 NMAC 8.2.14.1414, 9-29-2000; A, 12-31-2007]

19.8.14.1415 TERMINATION OF REGULATORY JURISDICTION:

A. The director may terminate regulatory jurisdiction over a reclaimed surface coal mining and reclamation operation, or increment thereof, upon a written finding pursuant to Paragraph (3) of Subsection C of 19.8.14.1412 NMAC that all reclamation requirements imposed on the permittee have been successfully completed or the performance bond has been released.

B. The director shall reassert jurisdiction over a site if it is demonstrated that either the bond release or the written finding for termination of jurisdiction are based upon fraud, collusion, or misrepresentation of a material fact.

[19.8.19.5. NMAC - N, 9-29-2000]

19.8.19.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.19.7. NMAC - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.19.8-19.8.19.1899 [RESERVED]:

[19.8.19.8 - 19.8.19.1899 NMAC - N, 9-29-2000]

19.8.19.1900 GENERAL RESPONSIBILITY OF PERSONS CONDUCTING COAL EXPLORATION:

A. Each person who conducts coal exploration which substantially disturbs the natural land surface in which 250 tons or less of coal are removed shall file the notice of intention to explore required under 19.8.6.601 NMAC and shall comply with 19.8.19.1902 NMAC.

B. Each person who conducts coal exploration which substantially disturbs the natural land surface and in which more than 250 tons of coal are removed in the area described by the written approval from the director, shall comply with the procedures described in the exploration and reclamation operations plan approved under 19.8.6.603 NMAC and shall comply with 19.8.19.1902 NMAC.

[11-29-97; 19.8.19.1900 NMAC - Rn, 19 NMAC 8.2.19.1900, 9-29-2000; A, 1-15-2002]

19.8.19.1901 REQUIRED DOCUMENTS:

Each person who conducts coal exploration which substantially disturbs the natural land surface and which removes more than 250 tons of coal shall, while in the exploration area, possess written approval from the director for the activities granted under 19.8.6.603 NMAC. The written approval shall be available at the exploration site for review by the director or the office of surface mining upon request.

[11-29-97; 19.8.19.1901 NMAC - Rn, 19 NMAC 8.2.19.1901, 9-29-2000]

19.8.19.1902 PERFORMANCE STANDARDS FOR COAL EXPLORATION:

The performance standards in this section are applicable to coal exploration, which substantially disturbs land surface.

A. Habitats of unique value for fish, wildlife, and other related environmental values and areas identified in Subsection B of 19.8.9.905 NMAC shall not be disturbed during coal exploration.

B. The person who conducts coal exploration shall, to the extent practicable, measure important environmental characteristics of the exploration area during the operations, to minimize environmental damage to the area and to provide supportive information for any permit application that person may submit under 19.8.5 NMAC through 19.8.13 NMAC.

C. Roads and off-road travel.

(1) Vehicular travel on other than established graded and surfaced roads shall be limited by the person who conducts coal exploration to that absolutely necessary to conduct the exploration. Travel shall be confined to graded and surfaced roads during periods when excessive damage to vegetation or rutting of the land surface could result.

(2) Any new road or other transportation facility shall comply with the provisions of Subsections B through F of 19.8.20.2076 and 19.8.20.2077 and 19.8.20.2078 NMAC.

(3) Existing roads or other transportation facilities may be used for exploration in accordance with the following:

(a) all applicable federal, state, and local requirements shall be met;

(b) if the road is significantly altered for exploration, including, but not limited to, change of grade, widening, or change of route, or if use of the road for exploration contributes additional suspended solids to streamflow or runoff, then Subsection G of 19.8.19.1902 NMAC shall apply to all areas of the road which are altered or which result in such additional contributions;

(c) if the road or other transportation facility is significantly altered for exploration activities, the person conducting exploration shall ensure that the requirements of Subsections B through F of 19.8.20.2076 NMAC and 19.8.20.2077 and 19.8.20.2078 NMAC are met for the design, construction, alteration, and maintenance of the road.

(4) Any road or transportation facility that will be retained after exploration activities are complete shall comply with the applicable provisions of 19.8.20.2076, 2077, 2078 or 2079 NMAC, as applicable. Any road that will not be retained will be promptly reclaimed.

D. If excavations, artificial flat areas, or embankments are created during exploration, those areas shall be returned to the approximate original contour promptly after such features are no longer needed for coal exploration.

E. Topsoil shall be removed, stored, and redistributed on disturbed areas as necessary to assure successful revegetation or as required by the director.

F. Revegetation of areas disturbed by coal exploration shall be performed by the person who conducts the exploration, or his agent. If more than 250 tons of coal are removed from the exploration area, all revegetation shall be in compliance with the plan approved by the director and carried out in a manner that encourages prompt vegetative cover and recovery of productivity levels compatible with approved post-exploration land use and in accordance with the following:

(1) all disturbed lands shall be seeded or planted with species of the same aspect native to the disturbed area. If both the pre-exploration and post-exploration land uses are intensive agriculture, planting of the crops normally grown will meet the requirements of this paragraph;

(2) the vegetative cover shall be capable of stabilizing the soil surface in regards to erosion.

G. With the exception of small and temporary diversions of overland flow of water around new roads, drill pads, and support facilities, no ephemeral, intermittent or perennial stream shall be diverted during coal exploration activities. Overland flow of water shall be diverted in a manner that:

(1) prevents erosion;

(2) to the extent possible using the best technology currently available, prevents additional contributions of suspended solids to streamflow or runoff outside the exploration area in accordance with 19.8.20. 2009 through 2026 NMAC and the pertinent state water quality control commission regulations standards; and

(3) complies with all other applicable state or federal requirements.

H. Each exploration hole, borehole, well, or other exposed underground opening created during exploration must meet the requirements of 19.8.20.2001 through 2003 NMAC.

I. All facilities and equipment shall be removed from the exploration area promptly when they are no longer needed for exploration, except for those facilities and equipment that the director determines may remain to:

- (1)** provide additional environmental quality data;
- (2)** reduce or control the on and off-site effects of the exploration activities; or
- (3)** facilitate future surface mining and reclamation operations by the person conducting the exploration under an approved permit.

J. Coal exploration shall be conducted in a manner which minimizes disturbance of the prevailing hydrologic balance, and shall include sediment control measures such as provided in 19.8.20.2013 NMAC of these rules and regulations and the pertinent state water quality control commission standards or sedimentation ponds which comply with 19.8.20.2014 NMAC. The director may specify additional measures which shall be adopted by the person engaged in coal exploration.

K. Toxic or acid-forming materials shall be handled and disposed of in accordance with 19.8.20.2016 and 2056 NMAC. If specified by the director, additional measures shall be adopted by the person engaged in coal exploration.

[11-29-97; 19.8.19.1902 NMAC - Rn, 19 NMAC 8.2.19.1902, 9-29-2000; A, 1-15-2002; A, 12-31-2007]

19.8.19.1903 REQUIREMENT FOR A PERMIT:

A. Any person who extracts coal for commercial sale or use during coal exploration operations must obtain a permit for those operations from the director under 19.8.5 NMAC through 19.8.13 NMAC.

B. With the prior written approval of the director, no permit to conduct surface coal mining operations is required for the sale or commercial use of coal extracted during exploration operations if such sale or commercial use is for coal testing purposes only. The person conducting the exploration shall file an application for such approval with the director. The application shall demonstrate that the coal testing is necessary for the development of a surface coal mining and reclamation operation for which a surface coal mining operations permit application is to be submitted in the near future, and that the proposed commercial use or sale of coal extracted during exploration operations is solely for the purpose of testing the coal. The application shall contain the following:

(1) the name of the testing firm and the locations at which the coal will be tested.

(2) If the coal will be sold directly to, or commercially used directly by, the intended end user, a statement from the intended end user; or if the coal is sold indirectly to the intended end user through an agent or broker, a statement from the agent or broker. The statement shall include:

(a) the specific reason for the test, including why the coal may be so different from the intended user's other coal supplies as to require testing;

(b) the amount of coal necessary for the test and why a lesser amount is not sufficient; and

(c) a description of the specific tests that will be conducted.

(3) Evidence that sufficient reserves of coal are available to the person conducting exploration or its principals for future commercial use or sale to the intended end user, or agent or broker of such user identified above, to demonstrate that the amount of coal to be removed is not the total reserve, but is a sampling of a larger reserve.

(4) An explanation as to why other means of exploration, such as core drilling, are not adequate to determine the quality of the coal and/or the feasibility of developing a surface coal mining operation.

19.8.20.2000 SIGNS AND MARKERS:

A. Specification signs and markers required under 19.8.20 NMAC shall:

(1) be posted and maintained by the person who conducts the surface coal mining operations;

(2) be of a uniform design throughout the operation that can be easily seen and read;

(3) be made of durable material; and

(4) conform to local ordinances and codes.

B. Duration of maintenance. Signs and markers shall be maintained during the conduct of all activities to which they pertain.

C. Mine and permit identification signs.

(1) Identification signs shall be displayed at each point of access to the permit area from public roads.

(2) Signs shall show the name, business address, and the telephone number of the person who conducts the surface coal mining operations and the identification number of the current permit authorizing surface coal mining operations.

(3) Signs shall be retained and maintained until after the release of all bonds for the permit area.

D. Perimeter markers. The perimeter of a permit area for surface mining activities or for underground mining activities, the areas to be affected within the permit area by surface operations or facilities shall be clearly marked before the beginning of surface coal mining operations. Access and haul roads leading from public roads that have been constructed, used, reconstructed, improved or maintained for use in coal explorations or surface coal mining and reclamation operations, including use by coal hauling vehicles traveling to transfer, processing, or storage areas shall be marked by a perimeter marker at one mile intervals from the identification required by Paragraph (1) of Subsection C of 19.8.20.2000 NMAC to within one half (1/2) mile of the active working area of a surface or underground coal mining operation.

E. Stream buffer zone markers. Stream buffer zones shall be marked along their boundaries as required under 19.8.20.2025 NMAC.

F. Topdressing markers. Where topdressing is segregated and stockpiled as required under 19.8.20.2006 NMAC the stockpiled material shall be clearly marked.

[11-29-97; 19.8.20.2000 NMAC - Rn, 19 NMAC 8.2.20.2000, 9-29-2000]

19.8.20.2001 CASING AND SEALING OF DRILLED HOLES: GENERAL REQUIREMENTS:

Each exploration hole, other drill or borehole, shaft, well, or other exposed underground opening shall be cased, sealed, or otherwise managed, as approved by the director, to

prevent acid or other toxic drainage from entering ground or surface waters, to minimize disturbance to the prevailing hydrologic balance, and to ensure the safety of people, livestock, fish and wildlife, and machinery in the permit and adjacent area. Each exploration hole, drill hole, shaft or borehole or well that is uncovered or exposed by mining activities within the permit area shall be permanently closed, unless approved for water monitoring, or otherwise managed in a manner approved by the director. Use of a drilled hole or borehole or monitoring well as a water well must meet the provisions of 19.8.20.2021 NMAC. 19.8.20.2021 NMAC does not apply to holes solely used for blasting.

[11-29-97; 19.8.20.2001 NMAC - Rn, 19 NMAC 8.2.20.2001, 9-29-2000]

19.8.20.2002 CASING AND SEALING OF DRILLED HOLES AND UNDERGROUND OPENINGS: TEMPORARY:

A. Each exploration hole, other than drill or boreholes, wells and other exposed underground openings which have been identified in the approved permit application for use to return, underground development waste, coal processing waste or water to underground workings or to be used to monitor ground water conditions, shall be temporarily sealed before actual use and protected during use by barricades, or fences, or other protective devices approved by the director. These devices shall be periodically inspected and maintained in good operating condition by the person who conducts the surface coal mining operations.

B. Each underground mine entry which is temporarily inactive, but has a further projected useful service under the approved permit application, shall be protected by barricades or other covering devices, fenced, and posted with signs, to prevent access into entry and to identify the hazardous nature of the opening. These devices shall be periodically inspected and maintained in good operating conditions by the person who conducts the underground mining activities.

[11-29-97; 19.8.20.2002 NMAC - Rn, 19 NMAC 8.2.20.2002, 9-29-2000]

19.8.20.2003 CASING AND SEALING OF DRILLED HOLES AND UNDERGROUND OPENINGS: PERMANENT:

When no longer needed for monitoring or other use approved by the director upon a finding of no adverse environmental or health and safety effects, or unless approved for transfer as a water well under 19.8.20.2021 NMAC, each exploration hole, other drilled hole or borehole, well, and other exposed underground openings such as shafts, drifts, adits, tunnels or entryways shall be capped, sealed, backfilled, or otherwise properly managed, as required by the director, under 19.8.20.2001 NMAC and consistent with 30 CFR 75.1711. Permanent closure measures shall be designed to prevent access to the mine workings by people, livestock, fish and wildlife, and machinery, and to keep acid or other toxic drainage from entering ground or surface waters.

[11-29-97; 19.8.20.2003 NMAC - Rn, 19 NMAC 8.2.20.2003, 9-29-2000]

19.8.20.2004 TOPDRESSING: GENERAL REQUIREMENTS:

A. Before disturbance of an area, topsoil, subsoils or other approved material suitable as a topdressing to be saved under 19.8.20.2005 NMAC shall be separately removed and segregated from other material.

B. After removal, topdressing shall be immediately redistributed in accordance with 19.8.20.2007 NMAC, stockpiled pending redistribution under 19.8.20.2006 NMAC, or if the permittee can demonstrate that an alternative procedure will provide equal or more protection for the topdressing, the director may, on a case by case basis, approve an alternative.

[11-29-97; 19.8.20.2004 NMAC- Rn, 19 NMAC 8.2.20.2004, 9-29-2000]

19.8.20.2005 TOPSOIL: REMOVAL:

A. Materials to be removed. Topsoil to be used as topdressing shall be removed in a separate layer from the areas to be disturbed, unless use of substitute or supplemental materials is approved by the director in accordance with Subsection E of 19.8.20.2005 NMAC. If use of substitute or supplemental materials is approved, all materials to be redistributed shall be removed.

B. Material to be removed in thin topsoil situations. If the topsoil to be used as topdressing is less than 6 inches, a 6-inch layer that includes the A horizon and the suitable unconsolidated materials immediately below the A horizon or the A horizon and all suitable unconsolidated material if the total available is less than 6 inches, shall be removed and the mixture segregated and redistributed as the surface soil layer, unless topsoil substitutes are approved by the director pursuant to Subsection E of 19.8.20.2005 NMAC.

C. Timing. If topsoil is to be removed, then it shall be removed from areas to be affected by surface operations or major structures, after vegetative cover that would interfere with the use of the topsoil is cleared from portions of those areas that will be disturbed, but before any drilling for blasting, mining, or other surface disturbance of surface lands.

D. Subsoil segregation. The B horizon and portions of the C horizon, if these horizons are present, or other underlying layers demonstrated to have qualities for comparable root development shall be removed and replaced as subsoil, if the director determines that either of these is necessary or desirable to ensure soil productivity consistent with the approved postmining land use.

E. Topsoil substitutes and supplements.

(1) Selected overburden materials may be substituted for or used as a supplement to topsoil, if the director determines that the resulting soil medium is equal to or more suitable for sustaining vegetation than is the available topsoil and the substitute material is the best available to support vegetation. This determination shall be based on:

(a) the results of chemical and physical analyses of overburden and topsoil. These analyses shall include determinations of pH, net acidity or alkalinity, available phosphorus and potassium, texture class and other analyses as required by the director. The director may also require that results of field-site trials or greenhouse tests be used to demonstrate the feasibility of using these overburden materials.

(b) Methodologies and results of analyses, trials or tests which demonstrate that the proposed substitute material is equal to or more suitable for reclamation and revegetation than is the available topsoil shall be certified by a qualified professional and shall be submitted to the director.

(2) Substituted or supplemental material shall be removed, segregated, and replaced in compliance with the requirements for topsoil under 19.8.20 NMAC.

F. Limits on topsoil removal area. Where the removal of vegetative material, topsoil, or other materials may result in accelerated erosion which may cause air or water pollution:

(1) The size of the area from which topsoil is removed at any one time shall be limited.

(2) The topdressing shall be distributed at a time when the physical and chemical properties of the topdressing can be protected and erosion can be minimized; and

(3) Such other measures shall be taken as the director may approve or require to control erosion.

G. If it is demonstrated to the director that it is technologically infeasible to remove topsoil or topsoil substitutes from particular slopes without endangering equipment operators or without mixing unsuitable material with such topsoil or topsoil substitutes, segregation and utilization of such material shall not be required.

[11-29-97; 19.8.20.2005 NMAC - Rn, 19 NMAC 8.2.20.2005, 9-29-2000]

19.8.20.2006 TOPDRESSING: STORAGE:

A. Topdressing removed under 19.8.20.2005 NMAC shall be stockpiled only when it is impractical to promptly redistribute such materials on regraded areas.

B. Stockpiled materials shall be selectively placed on a stable area within the permit area, not disturbed, and protected from wind and water erosion, unnecessary compaction, and contaminants which lessen the capability of the materials to support vegetation when redistributed.

(1) Protection measures shall be accomplished either by:

(a) an effective cover of non-noxious, quick-growing annual and perennial plants, seeded or planted during the first normal period after removal for favorable planting conditions; or

(b) other methods demonstrated to and approved by the director to provide equal protection.

(2) Unless approved by the director, stockpiled topdressing shall not be moved until required for redistribution on a regraded area.

[11-29-97; 19.8.20.2006 - Rn, 19 NMAC 8.2.20.2006, 9-29-2000]

19.8.20.2007 TOPDRESSING: REDISTRIBUTION:

A. After final grading and before the replacement of topdressing, regraded land shall be scarified or otherwise treated as required by the director to eliminate slippage surfaces and to promote root penetration. If the person who conducts the surface coal mining operations shows, through appropriate tests, and the director approves, that no harm will be caused to the topdressing and vegetation, scarification may be conducted after the placement of topdressing.

B. Topdressing shall be redistributed in a manner that:

(1) achieves an approximate uniform, stable thickness consistent with the approved postmining land uses, contours, and surface water drainage system;

(2) prevents excess compaction of topdressing; and

(3) protects the topdressing from wind and water erosion before and after it is seeded and planted.

[11-29-97; 19.8.20.2007 NMAC - Rn, 19 NMAC 8.2.20.2007, 9-29-2000]

19.8.20.2008 TOPDRESSING: NUTRIENTS AND SOIL AMENDMENTS:

Nutrients and soil amendments in the amount determined by soil tests shall be applied to the redistributed topdressing, so that it supports the approved postmining land use and meets the revegetation requirements of 19.8.20.2060 through 2066 NMAC. All soil analyses shall be performed by a qualified state approved laboratory using standard

methods approved by the director. Methods and results from topdressing analyses shall be submitted to the director.

[11-29-97; 19.8.20.2008 NMAC - Rn, 19 NMAC 8.2.20.2008, 9-29-2000; A, 1-15-2002]

19.8.20.2009 HYDROLOGIC BALANCE: GENERAL REQUIREMENTS:

A. Surface coal mining operations shall be planned and conducted to minimize changes to the prevailing hydrologic balance in both the permit and adjacent areas and prevent material damage outside of the permit area in order to prevent adverse changes in that balance that could result from those operations.

B. Changes in water quality and quantity, in depth to ground water, and in the location of surface water drainage channels shall be minimized so that the approved postmining land use of the permit area is not adversely affected.

C. In no case shall federal and state water quality statutes, regulations, standards, or effluent limitations be violated.

D. Operations shall be conducted to minimize water pollution and, where necessary, sediment ponds or other treatment facilities shall be used to control water pollution.

(1) Each person who conducts surface coal mining operations shall emphasize mining and reclamation practices that prevent or minimize water pollution. Methods listed in Paragraphs (2) and (3) of Subsection D of 19.8.20.2009 NMAC shall be capable of containing or treating all surface flow from the disturbed areas and shall be used in preference to the use of sediment ponds or water treatment facilities.

(2) Acceptable practices to control sediment and minimize water pollution include, but are not limited to:

(a) stabilizing disturbed areas through land shaping, berming, contour furrowing or regrading to final contour;

(b) diverting runoff;

(c) achieving quickly germinating and growing stands of temporary vegetation;

(d) regulating channel velocity of water;

(e) lining drainage channels with rock or revegetation;

(f) mulching;

and **(g)** selectively placing and sealing acid-forming and toxic-forming materials;

(h) selectively placing waste materials in backfill areas.

(3) In addition, unless demonstrated to the director otherwise, all acceptable practices for controlling and minimizing water pollution at underground mines shall include, but not be limited to:

(a) designing mines to prevent gravity drainage of acid waters;

(b) sealing all underground mine openings;

(c) controlling subsidence; and

(d) preventing acid mine drainage.

(4) If the practices listed in Paragraph (2) of Subsection D of 19.8.20.2009 NMAC are not adequate to meet the requirements of Paragraph (1) of Subsection D of 19.8.20.2009 NMAC, the person who conducts surface coal mining operations shall comply with the requirements of 19.8.20.2010 NMAC, unless the director issues a waiver under Subsection E of 19.8.20.2009 NMAC.

E. The director may waive the requirements of 19.8.20.2009 NMAC for regraded areas if the operator can demonstrate to the director that the runoff from the regraded area is as good as or better quality than the waters entering the permit area and erosion from the regraded area has been controlled to the satisfaction of the director.

(1) To provide for baseline data for waters entering the permit area, the operator shall operate and maintain monitoring on all drainages leading into the permit area, in a manner approved by the director, in order to obtain and evaluate occurrences and changes in water quality and quantity during the life of mining operations.

(2) In order to ensure that runoff from the regraded area is in no way a hazard to the environment of the adjacent areas, the waters draining off of the regraded area shall not:

(a) exceed the values of total suspended solids, iron, manganese, pH and those parameters listed in Subparagraph (a) of Paragraph (3) of Subsection E of 19.8.20.2009 NMAC from the baseline analyses from the water entering the permit area;

(b) create an increase in sediment load into the receiving streams;

(c) create any environmental harm or threat to public health and safety; and

(d) degrade, pollute or otherwise diminish the characteristics of existing streams and drainages so as to cause imminent environmental harm to fish and wildlife habitats.

(3) Baseline data shall be collected from waters in drainages entering the permit area and runoff from regraded areas shall be collected during any precipitation event that produces such runoff. The operator shall demonstrate to the director that the runoff from the regraded area has as good as or better chemical quality than the baseline analyses from waters entering the permit area.

(a) In addition to Subparagraph (a) of Paragraph (2) of Subsection E of 19 8.20.2009 NMAC, chemical analysis of the runoff from the regraded area and baseline data from waters entering the permit area shall include, but not limited to, the following parameters:

	Arsenic (As)	Phosphorus (P)	Carbonate (CO ₃)
	Boron (B)	Potassium (K)	Bicarbonate (HCO ₃)
	Calcium (Ca)	Selenium (Se)	Nitrate (NO ₃)
	Chloride	Sodium (Na)	Sulfate (SO ₄)
(TDS)	Cadmium (Cd)	Uranium (U)	Total Dissolved Solids
Ratio (SAR)	Fluoride	Vanadium (V)	Sodium Adsorption
	Lead (Pb)	Radioactivity	
	Magnesium (Mg)	Radium Ra ²²⁶	
		Radium Ra ²²⁸	

(b) The director may require additional tests and analyses as he deems necessary.

(c) If the operator can demonstrate that the analysis of any particular parameter are of little or not significance in the permit or adjacent areas, then such parameter(s) may be waived upon approval by the director.

(4) All analysis shall be submitted to the director within 90 days following sample collection.

(5) Monitoring of regraded areas shall continue in accordance with Subsection E of 19.8.20.2009 NMAC until that portion of the bond is released pursuant to 19.8.14.1412 NMAC.

F. Other treatment facilities shall be designed to treat the 10-year, 24-hour precipitation event unless a lesser design is approved by the director based on terrain, climate, other site-specific conditions and a demonstration by the operator that the effluent limitations of 19.8.20.2010 NMAC will be met. Other treatment facilities shall be designed in accordance with the applicable requirements of 19.8.20.2014 NMAC.

[11-29-97; 19.8.20.2009 NMAC - Rn, 19 NMAC 8.2.20.2009, 9-29-2000; A, 1-15-2002]

19.8.20.2010 HYDROLOGIC BALANCE: WATER QUALITY STANDARDS AND EFFLUENT LIMITATIONS:

A. Treatment of disturbed area surface flow.

(1) With the exception of surface flow leaving the disturbed area with respect to which area the operator has complied with the requirements of 19.8.20.2009 NMAC, all surface flow that leaves the disturbed area shall be passed through a sedimentation pond or series of sedimentation ponds or other treatment facilities before leaving the permit area. Any discharge of water from underground workings to surface waters which does not meet the effluent limitations of 19.8.20 NMAC shall also be passed through a sedimentation pond, a series of sedimentation ponds, or a treatment facility before leaving the permit area.

(2) Sedimentation ponds and other treatment facilities shall be maintained until the disturbed area has been regraded and erosion on the regraded area has been controlled.

(3) Sedimentation ponds and treatment facilities for discharges from underground workings shall be maintained until either the discharge continuously meets the effluent limitations of 19.8.20 NMAC without treatment or until the discharge has permanently ceased.

(4) The director may grant exemptions from these requirements only when:

(a) the disturbed drainage area within the total disturbed area is small; and

(b) the person who conducts the surface coal mining operations demonstrates that sedimentation ponds and treatment facilities are not necessary for drainage from the disturbed drainage areas to meet the effluent limitations in Paragraph (8) of Subsection A of 19.8.20.2010 NMAC and the applicable state and federal water quality standards for downstream and receiving waters.

(5) For the purposes of 19.8.20 NMAC only, disturbed area shall not include those areas in which only diversion ditches, sedimentation ponds, or roads are installed in accordance with 19.8.20 NMAC and the upstream area is not otherwise disturbed by the person who conducts the surface coal mining operations.

(6) Sedimentation ponds required by 19.8.20 NMAC shall be constructed in accordance with 19.8.20.2014 NMAC in appropriate locations before beginning any surface coal mining operations in the drainage area to be affected.

(7) Where the sedimentation pond or series of sedimentation ponds is used so as to result in the mixing of drainage from the disturbed areas with drainage from other areas not disturbed by current surface coal mining and reclamation operations, the permittee shall achieve the effluent limitations set forth below for all of the mixed drainage when it leaves the pond discharge point.

(8) Discharges of water from areas disturbed by surface mining activities and underground mining activities shall be made in compliance with all applicable state and federal water-quality laws and regulations and with the effluent limitations for coal mining promulgated by the U.S. environmental protection agency set forth in 40 CFR Part 434.

B. A discharge from the disturbed areas is not subject to the effluent limitations of 19.8.20 NMAC, if:

(1) the discharge is demonstrated by the discharger to have resulted from a precipitation event equal to or larger than a 10-year 24-hour precipitation event; and

(2) the discharge is from facilities designed, constructed, and maintained in accordance with the requirements of 19.8.20 NMAC.

C. Adequate facilities shall be installed, operated, and maintained to treat any water discharged from the disturbed area so that it complies with all federal and state laws and regulations and the limitations of 19.8.20 NMAC. If the pH of water to be discharged from the disturbed area is less than 6.0, an automatic lime feeder or other automatic neutralization process approved by the director shall be installed, operated, and maintained. The director may authorize the use of a manual system, if he finds that:

(1) flow is infrequent and presents small and infrequent treatment requirements to meet applicable standards which do not require use of an automatic neutralization process; and

(2) timely and consistent treatment is ensured.

[11-29-97; 19.8.20.2010 NMAC - Rn, 19 NMAC 8.2.20.2010, 9-29-2000; A, 12-31-2007; A, 08-31-2010]

19.8.20.2011 HYDROLOGIC BALANCE: DIVERSIONS AND CONVEYANCE OF OVERLAND FLOW AND SHALLOW GROUND WATER FLOW AND EPHEMERAL STREAMS:

Overland flow, including flow through litter, and shallow ground water flow from undisturbed areas, and flow in ephemeral streams, may be diverted away from disturbed areas by means of temporary or permanent diversions, if required or approved by the director as necessary to minimize erosion, to reduce the volume of water to be treated, and to prevent or remove water from contact with acid-forming or toxic-forming materials. The following requirements shall be met for all diversions and for all collection drains that are used to transport water into water-treatment facilities and for all diversions of overland and shallow ground water flow and ephemeral streams.

A. All diversions shall be designed, constructed and maintained to minimize adverse impacts to the hydrologic balance within the permit and adjacent areas, to prevent material damage outside the permit area and to assure the safety of the public.

B. Temporary diversions shall be constructed to safely pass the peak runoff from a 2-year, 24-hour precipitation event or a larger event as specified by the director.

C. To protect fills and property and to avoid danger to public health and safety, permanent diversions shall be constructed to safely pass the peak runoff from a 10-year, 24-hour precipitation event, or larger as specified by the director. Permanent diversions shall be constructed with gently sloping banks that are stabilized by vegetation. Asphalt, concrete, or other similar linings shall be used only when approved by the director to prevent seepage or to provide stability.

D. Diversions shall be designed, constructed, and maintained in a manner which prevents additional contributions of suspended solids to streamflow and to runoff outside the permit area, to the extent possible using the best technology currently available. Appropriate sediment control measures for these diversions may include, but not be limited to, maintenance of appropriate gradients, channel lining, revegetation, roughness structures, and detention basins.

E. No diversion shall be located so as to increase the potential for land slides. No diversion shall be constructed on existing land slides, unless approved by the director.

F. When no longer needed, each temporary diversion shall be removed and the affected land regraded, topdressed, and revegetated in accordance with 19.8.20.2007, 2008, 2054 through 2059, and 2060 through 2066 NMAC.

G. Diversion design shall incorporate the following.

(1) Channel lining shall be designed using standard engineering practices to pass safely the design velocities. Rip rap shall be required where necessary to control erosion.

(2) Freeboard shall be no less than 0.3 feet. Protection shall be provided for transition of flows and for critical areas such as swales and curves. Where the area protected is a critical area as determined by the director, the design freeboard may be increased.

(3) Energy dissipators shall be installed when necessary at discharge points, where diversions intersect with natural streams and exit velocity of the diversion ditch flow is greater than that of the receiving stream.

(4) Excess excavated material not necessary for diversion channel geometry or regrading of the channel shall be disposed of in accordance with 19.8.20.2034 through 2037 NMAC.

(5) Topdressing shall be handled in compliance with 19.8.20.2004 through 2008 NMAC.

H. Diversions shall not be constructed or operated to divert water into underground mines without the approval of the director under 19.8.20.2023 NMAC.

[11-29-97; 19.8.20.2011 NMAC - Rn, 19 NMAC 8.2.20.2011, 9-29-2000]

19.8.20.2012 HYDROLOGIC BALANCE: STREAM CHANNEL DIVERSIONS:

A. Diversions from perennial and intermittent streams within the permit area shall be approved by the director, if he finds that the diversions comply with:

(1) the requirements of Subsection A of 19.8.20.2025 NMAC and Subsection A of 19.8.20.2011 NMAC;

(2) local, state and federal statutes and regulations; and

(3) The diversion will not impair water quantity and quality and will not adversely affect related environmental resources of the stream.

B. When streamflow is allowed to be diverted, the stream channel diversion shall be designed, constructed, and removed in accordance with the following:

(1) The longitudinal profile of the stream, the channel, and the flood-plain shall be designed and constructed to remain stable and to prevent, to the extent possible using the best technology currently available, additional contributions of suspended solids to streamflow or to runoff outside the permit area. These contributions shall not be excess of requirements of state or federal law. Erosion control structures

such as channel lining structures, retention basins, and artificial channel roughness structures shall be used in diversions only when approved by the director as being necessary to control erosion. These structures shall be approved for permanent diversions only where they are stable and will require infrequent maintenance.

(2) The combination of channel, bank, and flood-plain configurations shall be adequate to pass safely the peak runoff of a 10-year, 24-hour precipitation event for temporary diversions, a 100-year, 24-hour precipitation event for permanent diversions, or larger events specified by the director. However, the capacity of the channel itself should be at least equal to the capacity of the unmodified stream channel immediately upstream and downstream of the diversion.

C. The design and construction of all stream channel diversions of perennial and intermittent streams shall be certified by a qualified registered professional engineer as meeting the performance standards of 19.8.20 NMAC and any design criteria set by the director.

D. When no longer needed to achieve the purpose for which they were authorized, all temporary stream channel diversions shall be removed and the affected land regraded and revegetated, in accordance with 19.8.20.2007, 2008, 2054 through 2058, and 2060 through 2066 NMAC. At the time diversions were removed, downstream water treatment facilities previously protected by the diversion shall be modified or removed to prevent overtopping or failure of the facilities. The requirement shall not relieve the person who conducts the surface coal mining operations from maintenance of a water treatment facility otherwise required under 19.8.20 NMAC or the permit.

E. When permanent diversions are constructed or stream channels restored, after temporary diversions, the operator shall:

(1) restore, enhance where practicable, or maintain natural riparian vegetation on the banks of the stream;

(2) establish or restore the stream to a longitudinal plan and profile, gradient and cross-section, including aquatic habitats (usually a pattern, of riffles, pools, and drops rather than uniform depth) that approximate premining stream channel characteristics.

[11-29-97; 19.8.20.2012 NMAC - Rn, 19 NMAC 8.2.20.2012, 9-29-2000]

19.8.20.2013 HYDROLOGIC BALANCE: SEDIMENT CONTROL MEASURES:

A. Appropriate sediment control measures shall be designed, constructed, and maintained using the best technology currently available to:

(1) prevent, to the extent possible, additional contributions of sediment to streamflow or to runoff outside the permit area;

- (2) meet the more stringent of applicable state or federal effluent limitations;
- and
- (3) minimize erosion to the extent possible.

B. Sediment control measures include practices carried out within and adjacent to the disturbed area. The sedimentation storage capacity of practices in and downstream from the disturbed area shall reflect the degree to which successful mining and reclamation techniques are applied to reduce erosion and control sediment. Sediment control measures consist of the utilization of proper mining and reclamation methods and sediment control practices, singly or in combination. sediment control methods include but are not limited to:

- (1) disturbing the smallest practicable area at any one time during the mining operation through progressive backfilling, grading, and prompt revegetation as required in Subsection B of 19.8.20.2060 NMAC;
- (2) stabilizing the backfill material to promote a reduction in the rate and volume of runoff, in accordance with the requirements of 19.8.20.2054 NMAC;
- (3) retaining sediment within disturbed areas;
- (4) diverting runoff away from disturbed areas;
- (5) diverting runoff using protected channels or pipes through disturbed areas so as not to cause additional erosion;
- (6) using straw dikes, riprap, check dams, mulches, vegetative sediment filters, dugout ponds, and other measures that reduce overland flow velocity, reduce runoff volume, or trap sediment;
- (7) treating with chemicals; and
- (8) for underground operations treating mine drainage in underground sumps.

[11-29-97; 19.8.20.2013 NMAC - Rn, 19 NMAC 8.2.20.2013, 9-29-2000]

19.8.20.2014 HYDROLOGIC BALANCE: SEDIMENTATION PONDS:

A. When required under 19.8.20.2010 NMAC sedimentation ponds shall be used individually or in series and shall:

- (1) be constructed and certified before any disturbance of the undisturbed area to be drained into the pond and, in addition, for underground mines prior to any discharge of water to surface waters from underground mine workings.

(2) be located as near as possible to the disturbed area and out of perennial streams, unless approved by the director.

(3) meet all the criteria of 19.8.20 NMAC.

(4) be certified to the director by a qualified registered professional engineer as having been constructed as designed and approved in the permit. Sediment ponds that do not meet the size or other criteria of 30 CFR 77.216(a) shall be certified by either a qualified registered professional engineer or qualified registered professional land surveyor.

(5) be designed, constructed, maintained and inspected in accordance with 19.8.20.2017 NMAC.

(6) be maintained until removal is authorized by the director and the disturbed area has been stabilized and revegetated.

B. Sedimentation ponds shall be designed, constructed and maintained to provide adequate sediment storage volume and provide for periodic sediment removal sufficient to maintain adequate volume for the design event.

C. Sedimentation ponds shall provide the required theoretical detention time for the water inflow or runoff entering the pond from a 10-year, 24-hour precipitation event (design event) plus the average inflow from any underground mine. The operator will comply with the applicable state laws and the regulations of the state engineer pertaining to the detention of water.

D. The water storage resulting from inflow shall be removed by a non-clogging dewatering device, conduit spillway, or other methods approved by the director. Stationary dewatering devices shall not be located at a lower elevation than the maximum elevation of the sedimentation storage volume.

E. Each person who conducts surface coal mining operations shall design, construct, and maintain sedimentation ponds to prevent short circuiting to the extent possible.

F. The design, construction, and maintenance of a sedimentation pond or other sediment control measures in accordance with 19.8.20 NMAC shall not relieve the person from compliance with applicable effluent limitations as contained in 19.8.20.2010 NMAC.

G. A sedimentation pond shall include either a combination of principal and emergency spillways or a single spillway configured as specified in Paragraph (1) of Subsection G of 19.8.20.2014 NMAC, designed and constructed to safely pass the applicable design precipitation event specified in Paragraph (2) of Subsection G of

19.8.20.2014 NMAC, except as set forth in Paragraph (3) of Subsection G of 19.8.20.2014 NMAC.

(1) The director may approve a single open-channel spillway that is:

(a) of nonerodible construction and designed to carry sustained flows; or

(b) earth or grass-lined and designed to carry short-term infrequent flows at nonerosive velocities where sustained flows are not expected.

(2) Except as specified in Paragraph (3) of Subsection G of 19.8.20.2014 NMAC, the required design precipitation event for spillways for sedimentation ponds is:

(a) for a sedimentation pond meeting the size or other criteria of mine safety and health administration 30 CFR 77.216(a), a 100-year 6 hour event, or greater event as specified by the director;

(b) for a sedimentation pond not meeting the size or other criteria of 30 CFR 77.216(a), a 25-year 6-hour event, or greater event as specified by the director.

(3) In lieu of meeting the requirements in Paragraph (1) of Subsection G of 19.8.20.2014 NMAC, the director may approve a sedimentation pond that relies primarily on storage to control the runoff from the design precipitation event when it is demonstrated by the operator and certified by a qualified registered professional engineer or qualified registered professional land surveyor that the sedimentation pond will safely control the design precipitation event, the water from which shall be safely removed in accordance with current, prudent, engineering practices. Such a sedimentation pond shall be located where failure would not be expected to cause loss of life or serious property damage. The following design criteria shall apply:

(a) in the case of a sedimentation pond meeting the size or other criteria of 30 CFR 77.216(a), it is designed to control the runoff from the probable maximum precipitation of a 6-hour event, or greater event as specified by the director;

(b) in the case of a sedimentation pond not meeting the size or other criteria of 30 CFR 77.216(a), it is designed to control the runoff of a 100-year, 6-hour event, or greater event as specified by the director.

H. The embankment foundation area shall be cleared of all organic matter, all surfaces sloped to no steeper than 1v:1h and the entire foundation surface scarified.

I. The fill material shall be free of sod, large roots, other large vegetative matter, and frozen soil, and in no case shall coal-processing waste be used.

J. The embankment area shall be compacted properly to ensure against excessive settlement.

K. When a sediment pond is removed, the land on which the pond is located and the affected area shall be regraded and revegetated in accordance with the approved permit.

[11-29-97; 19.8.20.2014 NMAC - Rn, 19 NMAC 8.2.20.2014, 9-29-2000]

19.8.20.2015 HYDROLOGIC BALANCE: DISCHARGE STRUCTURES:

Discharge from sedimentation ponds, permanent and temporary impoundments, coal processing waste dams and embankments, and diversions shall be controlled, by energy dissipators, riprap channels, and other devices, where necessary, to reduce erosion, to prevent deepening or enlargement of stream channels, and to minimize disturbance of the hydrologic balance. Discharge structures shall be designed according to standard engineering design procedures.

[11-29-97; 19.8.20.2015 NMAC - Rn, 19 NMAC 8.2.20.2015, 9-29-2000]

19.8.20.2016 HYDROLOGIC BALANCE: ACID-FORMING AND TOXIC-FORMING SPOIL:

Drainage from acid-forming and toxic-forming spoil into ground and surface water shall be avoided by:

A. identifying, burying, and treating where necessary, spoil which, in the judgment of the director, may be detrimental to vegetation or may adversely affect water quality if not treated or buried;

B. preventing water from coming into contact with acid-forming and toxic-forming spoil in accordance with 19.8.20.2056 NMAC, and other measures as required by the director; and

C. burying or otherwise treating all acid-forming or toxic-forming spoil within 30 days after it is first exposed on the mine site, or within a lesser period required by the director. Temporary storage of the spoil may be approved by the director upon a finding that burial or treatment within 30 days is not feasible and will not result in any material risk of water pollution or other environmental damage. Storage shall be limited to the period until burial or treatment first becomes feasible. Acid-forming or toxic-forming spoil to be stored shall be placed on impermeable material and protected from erosion and contact with surface water.

[11-29-97; 19.8.20.2016 NMAC - Rn, 19 NMAC 8.2.20.2016, 9-29-2000]

19.8.20.2017 HYDROLOGIC BALANCE: PERMANENT AND TEMPORARY IMPOUNDMENTS:

A. Permanent impoundments are prohibited unless authorized by the director, upon the basis of the following demonstrations:

(1) the size and configuration of such impoundment will be adequate for its intended purposes;

(2) the quality of impounded water will be suitable on a permanent basis for its intended use and, after reclamation, will meet applicable state and federal water quality standards, and discharges from the impoundment will meet applicable effluent limitations and will not degrade the quality of receiving water below applicable state and federal water quality standards;

(3) the water level will be sufficiently stable and be capable of supporting the intended use;

(4) final grading will provide for adequate safety and access for proposed water users;

(5) the impoundment will not result in the diminution of the quality and quantity of water utilized by adjacent or surrounding landowners for agricultural, industrial, recreational, or domestic uses; and

(6) the impoundment will be suitable for the approved postmining land use.

B. The design of impoundments shall be certified by a qualified registered professional engineer as designed to meet the requirements of 19.8.20 NMAC using current, prudent engineering practices, and any design criteria established by the director. The qualified registered professional engineer shall be experienced in the design and construction of impoundments.

C. An impoundment meeting the size or other criteria of 30 CFR 77.216(a) shall comply with the requirements of 30 CFR 77.216 and 19.8.20 NMAC.

D. All impoundments that meet the class B or C criteria for dams in TR-60 or exceed the size or other criteria of 30 CFR 77.216(a) shall be certified to the director by a qualified registered professional engineer, as having been constructed to comply with the requirements of 19.8.20 NMAC. All dams and embankments that do not meet the class B or C criteria for dams in TR-60 or other size criteria of 30 CFR 77.216(a) shall be certified by either a qualified registered professional engineer or a qualified registered professional land surveyor, except that all coal processing waste dams and embankments covered by 19.8.20.2047 through 2049 NMAC shall be certified by a qualified registered professional engineer. All impoundments shall be certified after construction and prior to the intended use.

E. The following is a list of general requirements that apply to all temporary or permanent impoundments.

(1) Impoundments meeting the class B or C criteria for dams in the U.S. department of agriculture, natural resources conservation service technical release no. 60 (210-VI-TR60, Oct. 1985), "earth dams and reservoirs", shall comply with the, "minimum emergency spillway hydrologic criteria", table in TR-60 and the requirements of 19.8.20 NMAC.

(2) An impoundment meeting the Class B or C criteria for dams in NRCS technical release no. 60 (210-VI-TR60, Oct. 1985), "earth dams and reservoirs", or the size or other criteria of 30 CFR 77.216(a) shall have a minimum static safety factor of 1.5 for a normal pool with steady state seepage saturation conditions, and a seismic safety factor of at least 1.2.

(3) Impoundments not included in Paragraph (2) of Subsection E of 19.8.20.2017 NMAC, except for a coal mine waste impounding structure, shall have a minimum static safety factor of 1.3 for a normal pool with steady state seepage saturation conditions or meet the requirements of Subsection C of 19.8.9.909 NMAC.

(4) Impoundments meeting the class B or C criteria for dams in NRCS technical release no. 60 (210-VI-TR60, Oct. 1985), "earth dams and reservoirs", shall comply with the freeboard hydrograph criteria in the "minimum emergency spillway hydrologic criteria" table in TR-60.

(5) Impoundments not included in Paragraph (2) of Subsection E of 19.8.20.2017 NMAC shall have adequate freeboard to resist overtopping by waves and by a sudden increase in stored volume.

(6) Foundations and abutments for an impounding structure shall be stable during all phases of construction and operation, and shall be designed based on adequate and accurate information on the foundation conditions. For an impoundment meeting the class B or C criteria for dams in NRCS technical release no. 60 (210-VI-TR60, Oct. 1985), "earth dams and reservoirs", or the size or other criteria of 30 CFR 77.216(a), foundation investigation, as well as any necessary laboratory testing of foundation material, shall be performed to determine the design requirements for foundation stability.

(7) All vegetative and organic materials shall be removed and foundations excavated and prepared to resist failure. Cutoff trenches shall be installed if necessary to ensure stability.

(8) Slope protection shall be provided to protect against surface erosion where surface runoff enters the impoundment area and protect against sudden drawdown.

(9) Faces of embankments and surrounding areas shall be vegetated, or otherwise stabilized in accordance with accepted design and operational practices.

(10) The vertical portion of any remaining highwall shall be located far enough below the low-water line along the full extend of highwall to provide adequate safety and access for the proposed water users.

(11) Appropriate barriers shall be provided to control seepage along conduits that extend through the embankment.

F. An impoundment shall include either a combination of principal and emergency spillways or a single spillway configured as specified in Paragraph (1) of Subsection F of 19.8.20.2017 NMAC, designed and constructed to safely pass the applicable design precipitation runoff event specified in Paragraph (2) of Subsection F of 19.8.20.2017 NMAC, except as set forth in Paragraph (3) of Subsection F of 19.8.20.2017 NMAC.

(1) The director may approve a single open-channel spillway that is:

(a) of nonerodible construction and designed to carry sustained flows; or

(b) earth- or grass-lined and designed to carry short-term, infrequent flows at non-erosive velocities where sustained flows are not expected.

(2) Except as specified in Paragraph (3) of Subsection F of 19.8.20.2017 NMAC, the required design precipitation event for spillways for impoundments is:

(a) for an impoundment meeting the class B or C criteria for dams in TR-60 or other size criteria of 30 CFR 77.216(a), a 100-year 6-hour event, or greater event as specified by the director.

(b) for a temporary impoundment not meeting the class B or C criteria for dams in TR-60 or other size criteria of 30 CFR 77.216(a), a 25-year 6-hour event, or greater event as specified by the director.

(c) for a permanent impoundment not meeting the class B or C criteria for dams in TR-60 or other size criteria of 30 CFR 77.216(a), a 50-year, 6-hour event, or greater event as specified by the director.

(3) In lieu of meeting the requirements in Paragraph (1) of Subsection F of 19.8.20.2017 NMAC, the director may approve a temporary impoundment that relies primarily on storage to control the runoff from the design precipitation event when it is demonstrated by the operator and certified by a qualified registered professional engineer or qualified registered professional land surveyor that the impoundment will safely control the design precipitation event and associated runoff, the water from which shall be safely removed in accordance with current, prudent, engineering practices. Such an impoundment shall be located where failure would not be expected to cause loss of life or serious property damage. The following design criteria shall apply:

(a) in the case of an impoundment meeting the size or other criteria of 30 CFR 77.216(a), it is designed to control the runoff of the probable maximum precipitation of a 6-hour event, or greater event as specified by the director, or

(b) in the case of an impoundment not meeting the size or other criteria of 30 CFR 77.216(a), it is designed to control the runoff of a 100-year 6-hour event, or greater event as specified by the director.

G. Except as provided in Paragraph (4) of Subsection G of 19.8.20.2017 NMAC, a qualified registered professional engineer or other qualified professional specialist under the direction of a professional engineer, shall inspect each impoundment as provided in Paragraph (1) of Subsection G of 19.8.20.2017 NMAC. The professional engineer or specialist shall be experienced in the construction of impoundments.

(1) Inspections shall be made regularly during construction, upon completion of construction, and at least yearly until removal of the structure or release of the performance bond.

(2) The qualified registered professional engineer, or qualified registered professional land surveyor as specified in Paragraph (4) of Subsection G of 19.8.20.2017 NMAC, shall promptly after each inspection required in Paragraph (1) of Subsection G of 19.8.20.2017 provide to the director a certified report that the impoundment has been constructed and/or maintained as designed and in accordance with the approved plan and 19.8.20 NMAC. The report shall include discussion of any appearance of instability, structural weakness or other hazardous conditions, depth and elevation of any impounded waters, existing storage capacity, any existing or required monitoring procedures and instrumentation, and any other aspects of the structure affecting stability.

(3) A copy of the report shall be retained at or near the mine site.

(4) A qualified registered professional land surveyor may inspect any temporary or permanent impoundment that does not meet the class B or C criteria for dams in TR-60 or other size criteria of 30 CFR 77.216(a) and certify and submit the report required by Paragraph (2) of Subsection G of 19.8.20.2017 NMAC, except that all coal mine waste impounding structures covered by 19.8.20.2047 through 2049 NMAC shall be certified by a qualified registered professional engineer. The professional land surveyor shall be experienced in the construction of impoundments.

(5) Impoundments meeting the class B or C criteria for dams in TR-60 or subject to 30 CFR 77.216(a) must be examined in accordance with 30 CFR 77.216-3. Other impoundments shall be examined at least quarterly by a qualified person designated by the operator for appearance of structural weakness and other hazardous conditions.

(6) If an impoundment is constructed without an embankment, the director may waive the quarterly examination requirement. Therefore, excavated ponds, haulroad sumps and any impoundment that is built without embankments may be exempt from the requirements of Paragraph (5) of Subsection G of 19.8.20.2017 NMAC with the approval of the director. Any waiver granted under this paragraph shall not relieve the operator of the requirement to maintain impoundments in accordance with the approved plan and 19.8.20 NMAC.

(7) Emergency procedures. If any examination or inspection discloses that a potential hazard exists, the person who examined the impoundment shall promptly inform the director of the finding and of the emergency procedures formulated for public protection and remedial action. If adequate procedures can not be formulated or implemented, the director shall be notified immediately. The director shall then notify the appropriate agencies that other emergency procedures are required to protect the public.

[11-29-97; A, 12-15-99; 19.8.20.2017 NMAC - Rn, 19 NMAC 8.2.20.2017, 9-29-2000; A, 12-31-2007]

19.8.20.2018 HYDROLOGIC BALANCE: GROUND WATER PROTECTION:

A. Backfilled materials shall be placed so as to minimize contamination of ground water systems with acid, toxic, or otherwise harmful mine drainage, to minimize adverse effects of mining on ground water systems outside the permit area, and to support approved postmining land uses.

B. To control the effects of mine drainage, pits, cuts and other mine excavation or disturbances shall be located, designed, constructed, and utilized in such manner as to prevent or control discharge of acid, toxic, or otherwise harmful mine drainage waters into ground water systems and to prevent adverse impacts on such ground water systems or on approved postmining land uses.

[11-29-97; 19.8.20.2018 NMAC - Rn, 19 NMAC 8.2.20.2018, 9-29-2000]

19.8.20.2019 HYDROLOGIC BALANCE: PROTECTION OF GROUND WATER RECHARGE CAPACITY:

Surface mining activities shall be conducted in a manner that facilitates reclamation which will restore approximate premining recharge capacity, through restoration of the capability of the reclaimed areas as a whole, excluding coal processing waste and underground development waste disposal areas and fills, to transmit water to the ground water system. The recharge capacity shall be restored to a condition which:

A. supports the approved postmining land use;

B. minimizes disturbances to the prevailing hydrologic balance in the permit area and in adjacent areas; and

C. provides a rate of recharge that approximates the premining recharge rate.

[11-29-97; 19.8.20.2019 NMAC - Rn, 19 NMAC 8.2.20.2019, 9-29-2000; A, 12-31-2007]

19.8.20.2020 HYDROLOGIC BALANCE: SURFACE AND GROUND WATER MONITORING:

A. Ground water.

(1) Ground water levels, subsurface flow and storage characteristics and the quality of ground water shall be monitored in a manner approved by the director, to determine the effects of surface coal mining operations on the recharge capacity of reclaimed land and on the quantity and quality of water in ground water systems in the permit and adjacent areas.

(2) When surface coal mining operations may affect the ground water systems which serve as aquifers which significantly ensure the hydrologic balance of water use on or off the permit and adjacent areas, ground water levels and ground water quality shall be periodically monitored. Monitoring shall include measurements from a sufficient number of wells and mineralogical and chemical analyses of aquifer, overburden and spoil that are adequate to reflect changes in ground water quantity and quality resulting from those activities. Monitoring shall be adequate to plan for modification of surface coal mining operations, if necessary, to minimize disturbance of the prevailing hydrologic balance.

(3) The director may specify additional hydrologic tests, including drilling, infiltration tests, and aquifer tests.

(4) Each person shall satisfy any requirements of the water quality control commission regulations.

(5) Ground-water monitoring data shall be submitted every 3 months to the director or more frequently as prescribed by the director. Monitoring reports shall include analytical results from each sample taken during the reporting period. When the analysis of any ground-water sample indicates noncompliance with the permit conditions, then the operator shall promptly notify the director and immediately take the actions provided for in Subsection A of 19.8.11.1113 NMAC.

(6) Ground-water monitoring shall proceed through mining and continue during reclamation until bond release. The director may modify the monitoring requirements, including the parameters covered and the sampling frequency, if the operator demonstrates, using the monitoring data obtained under this paragraph, that:

(a) the operation has minimized disturbance to the hydrologic balance in the permit and adjacent area and prevented material damage to the hydrologic balance outside the permit area; water quantity and quality are suitable to support approved postmining land uses, and the water rights of other users have been protected or replaced; or

(b) monitoring is no longer necessary to achieve the purposes set forth in the monitoring plan approved under Paragraph (4) of Subsection B of 19.8.9.907 NMAC.

(7) If an operator can demonstrate by the use of the determination required under Subsection C of 19.8.9.907 NMAC and other available information that a particular water-bearing stratum in the proposed permit and adjacent areas is not one which serves as an aquifer which significantly ensures the hydrologic balance within the cumulative impact area; then monitoring of that stratum may be waived by the director.

B. Surface water.

(1) Surface water monitoring shall be conducted in accordance with the monitoring program submitted under Paragraph (4) of Subsection B of 19.8.9.907 NMAC and approved by the director. The director shall determine the nature of data, frequency of collection and reporting requirements. Monitoring shall:

(a) be adequate to measure accurately and record water quantity and quality of the discharges from the permit area;

(b) in all cases in which analytical results of the sample collections indicate noncompliance with the permit condition or applicable standard has occurred, result in the person who conducts the surface coal mining operations notifying the director within 5 days. Where a national pollutant discharge elimination system (NPDES) permit effluent limitation noncompliance has occurred, the person who conducts surface coal mining operations shall forward the analytic results concurrently with the written notice of noncompliance;

(c) Any sample results which indicate a permit violation will be reported immediately to the director and the operator shall immediately take the actions provided for in Subsection A of 19.8.11.1113 NMAC.

(d) A copy of the completed reporting form filed to meet NPDES permit requirements; or

(e) A letter identifying the state or federal government official with whom the reporting form was filed to meet NPDES permit requirements and the date of filing.

(2) Surface water monitoring shall proceed through mining and continue during reclamation until bond release. Consistent with Subparagraph (c) of Paragraph (3) of Subsection E of 19.8.20.2009 NMAC the director may modify the monitoring

requirements, except those required by the NPDES permitting authority, including the parameters covered and sampling frequency if the operator demonstrates, using the monitoring data obtained under this paragraph, that:

(a) the operator has minimized disturbance to the hydrologic balance in the permit and adjacent areas and prevented material damage to the hydrologic balance outside the permit area; water quantity and quality are suitable to support approved postmining land uses; and the water rights of other users have been protected or replaced; or

(b) monitoring is no longer necessary to achieve the purposes set forth in the monitoring plan approved under Paragraph (4) of Subsection B of 19.8.9.907 NMAC.

(3) Equipment, structures, and other devices necessary to measure and sample accurately the quality and quantity of surface water discharges from the disturbed area shall be properly installed, maintained, and operated and shall be removed when no longer required.

(4) For point-source discharges, monitoring shall be conducted in accordance with 40 CFR Parts 122, 123 and 434 and as required by the national pollutant discharge elimination system permitting authority.

[11-29-97; 19.8.20.2020 NMAC - Rn, 19 NMAC 8.2.20.2020, 9-29-2000]

19.8.20.2021 HYDROLOGIC BALANCE: TRANSFER OF WELLS:

A. An exploratory or monitoring well may be transferred by the person who conducts surface coal mining operations for further use as a water well with the prior approval of the director and with such approval as is otherwise required by the state engineer. That person and the surface owner of the lands where the well is located shall jointly submit a written request to the director for that approval.

B. Upon an approved transfer of a well, the transferee shall:

- (1) assume primary liability for damages to persons or property from the well;
- (2) plug the well when necessary, but in no case later than abandonment of the well; and
- (3) assume primary responsibility for compliance with 19.8.20.2001 through 2003 NMAC with respect to the well.

C. Upon an approved transfer of a well, the transferor shall be secondarily liable for the transferee's obligations under Subsection B of 19.8.20.2021 NMAC, until release of the bond or other equivalent guarantee required by 19.8.14 NMAC for the area in which the well is located.

[11-29-97; 19.8.20.2021 NMAC - Rn, 19 NMAC 8.2.20.2021, 9-29-2000]

19.8.20.2022 HYDROLOGIC BALANCE: WATER RIGHTS AND REPLACEMENT:

Any person who conducts surface coal mining operations shall comply with any water replacement plan approved by the state engineer under the Mine Dewatering Act, and shall also comply with applicable statutes and regulations administered by the state engineer.

[11-29-97; 19.8.20.2022 NMAC - Rn, 19 NMAC 8.2.20.2022, 9-29-2000]

19.8.20.2023 HYDROLOGIC BALANCE: DISCHARGE OF WATER INTO AN UNDERGROUND MINE:

Water from the surface or from an underground mine shall not be diverted or otherwise discharged into other underground mine workings, unless the person who conducts the surface coal mining operations demonstrates to the director that this will:

A. abate water pollution or otherwise eliminate public hazards resulting from surface coal mining operations; and

B. be discharged as a controlled flow, meeting the effluent limitations of 19.8.20.2010 NMAC for pH and total suspended solids, except that the pH and total suspended solid limitations may be exceeded, if approved by the director and is limited to:

- (1) coal processing waste;
- (2) fly ash from a coal-fired facility;
- (3) sludge from an acid mine drainage treatments facility;
- (4) flue gas desulfurization sludge;
- (5) inert materials used for stabilizing underground mines; or
- (6) underground mine development wastes.

C. in any event, the discharge from underground mines to surface waters will not cause, result in or contribute to a violation of applicable water quality standards or effluent limitations;

D. minimizes disturbance to the hydrologic balance; and

E. meets with the approval of the mine safety and health administration.

[11-29-97; 19.8.20.2023 NMAC - Rn, 19 NMAC 8.2.20.2023, 9-29-2000]

19.8.20.2024 HYDROLOGIC BALANCE: POSTMINING REHABILITATION OF SEDIMENTATION PONDS, DIVERSIONS, IMPOUNDMENTS AND TREATMENT FACILITIES:

Before abandoning the permit area, the person who conducts the surface coal mining operations shall renovate all permanent sedimentation ponds, diversions, impoundments, and treatment facilities to meet criteria specified in the detailed design plan for the permanent structures and impoundments.

[11-29-97; 19.8.20.2024 NMAC - Rn, 19 NMAC 8.2.20.2024, 9-29-2000]

19.8.20.2025 HYDROLOGIC BALANCE: STREAM BUFFER ZONES:

A. No surface land within 100 feet of a perennial stream or a stream with a biological community determined according to Subsection C of 19.8.20.2025 NMAC shall be disturbed by surface coal mining operations except in accordance with 19.8.20.2011 and 2012 NMAC, unless the director specifically authorizes surface coal mining operations closer to or through such a stream upon finding that:

(1) surface mining activities will not cause or contribute to the violation of applicable state or federal water quality standards, and will not adversely affect the water quantity and quality or other environmental resources of the stream; and

(2) if there will be a temporary or permanent stream-channel diversion, it will comply with 19.8.20.2011 and 2012 NMAC.

B. The area not to be disturbed shall be designated a buffer zone and marked as specified in 19.8.20.2000 NMAC.

C. A stream with a biological community shall be determined by the existence in the stream at any time of an assemblage of two or more species of arthropods or molluscan animal which are:

(1) adapted to flowing water for all or part of their life cycle;

(2) dependent upon a flowing water habitat;

(3) reproducing or can reasonably be expected to reproduce in the water body where they are found; and

(4) longer than 2 millimeters at some stage of the part of their life cycle spent in the flowing water habitat.

[11-29-97; 19.8.20.2025 NMAC - Rn, 19 NMAC 8.2.20.2025, 9-29-2000]

19.8.20.2026 HYDROLOGIC BALANCE: UNDERGROUND MINE ENTRY AND ACCESS DISCHARGES:

A. Surface entries and accesses to underground workings, including adits and slopes, shall be located, designed, constructed, and utilized to prevent or control gravity discharge of water from the mine.

B. Gravity discharge of water from an underground mine, other than a drift mine subject to Subsection C of 19.8.20.2026 NMAC, may be allowed by the director, if it is demonstrated that:

(1) in the case of an untreated discharge:

(a) the discharge, without treatment, satisfies the water effluent limitations of 19.8.20.2010 NMAC and all applicable state and federal water quality standards; and

(b) that discharge will result in changes in the prevailing hydrologic balance that are minimal and approved postmining land uses will not be adversely affected; or

(2) in the case of a treated discharge:

(a) the discharge is conveyed to a treatment facility in the permit area in accordance with Subsection A of 19.8.20.2010 NMAC;

(b) all water from the underground mine discharged from the treatment facility meets the effluent limitations of 19.8.20.2010 NMAC and all other applicable state and federal statutes and regulations; and

(c) consistent maintenance of the treatment facility will occur throughout the anticipated period of gravity discharge.

C. Notwithstanding anything to the contrary in Subsections A and B of 19.8.20.2026 NMAC, for a drift mine first used after the implementation of the permanent state program and located in acid-producing or iron-producing coal seams, surface entries and accesses shall be located in such a manner as to prevent any gravity discharge from the mine.

[11-29-97; 19.8.20.2026 NMAC - Rn, 19 NMAC 8.2.20.2026, 9-29-2000; A, 12-31-2007]

19.8.20.2027 COAL RECOVERY:

Surface coal mining operations shall be conducted so as to maximize the utilization and conservation of the coal while maintaining environmental integrity so that re-affecting the land in the future through surface mining operations is minimized.

[11-29-97; 19.8.20.2027 NMAC - Rn, 19 NMAC 8.2.20.2027, 9-29-2000]

19.8.20.2028 USE OF EXPLOSIVES: GENERAL REQUIREMENTS:

A. Each operator shall comply with all applicable state and federal laws in the use of explosives.

B. Blasts that use more than 5 lbs. of explosive or blasting agent shall be conducted according to the schedule required by 19.8.20.2030 NMAC.

C. Blasters.

(1) No later than twelve (12) months after the blaster certification program required by 19.8.33 NMAC of these regulations has been approved pursuant to 30 CFR Chapter VII, Subchapter C, all blasting operations in surface coal mining operations shall be conducted under the direction of a certified blaster. Before that time, all such blasting operations shall be conducted by competent, experienced persons who understand the hazards involved.

(2) Certificates of blaster certification shall be carried by blasters or shall be on file at the permit area during blasting operations.

(3) A blaster and at least one other person shall be present at the firing of a blast.

(4) Any blaster who is responsible for conducting blasting operations at a blasting site shall:

(a) be familiar with the blasting plan and site-specific performance standards;
and

(b) give direction and on-the-job training to persons who are not certified and who are assigned to the blasting crew or assist in the use of explosives.

D. Blast design.

(1) An anticipated blast design shall be submitted if blasting operations will be conducted within:

(a) 1,000 feet of any building used as a dwelling, public building, school, church, or community or institutional building outside the permit area; or

(b) 500 feet of an active or abandoned underground mine.

(2) The blast design may be presented as part of a permit application or at a time, before the blast, approved by the director.

(3) The blast design shall contain sketches of the drill patterns, delay periods, and decking and shall indicate the type and amount of explosives to be used, critical dimensions, and the location and general description of structures to be protected, as well as a discussion of design factors to be used, which protect the public and meet the applicable airblast, flyrock, and ground-vibration standards in 19.8.20.2032 NMAC.

(4) The blast design shall be prepared and signed by a certified blaster.

(5) The director may require changes to the design submitted.

[11-29-97; 19.8.20.2028 NMAC - Rn, 19 NMAC 8.2.20.2028, 9-29-2000]

19.8.20.2029 USE OF EXPLOSIVES: PRE-BLASTING SURVEY:

A. At least 30 days before initiation of blasting, the operator shall notify, in writing, all residents or owners of dwellings or other structures located within 1/2 mile of the permit area how to request a preblasting survey.

B. A resident or owner of a dwelling or structure within 1/2 mile of any part of the permit area may request a preblasting survey. This request shall be made, in writing, directly to the operator or to the director, who shall promptly notify the operator. The operator shall promptly conduct a preblasting survey of the dwelling or structure and promptly prepare a written report of the survey. An updated survey of any additions, modifications, or renovations shall be performed by the operator if requested by the resident or owner.

C. The operator shall determine the condition of the dwelling or structure and shall document any preblasting damage and other physical factors that could reasonably be affected by the blasting. Structures such as pipelines, cables, transmission lines, and cisterns, wells, and other water systems warrant special attention; however, the assessment of these structures may be limited to surface conditions and other readily available data.

D. The written report of the survey shall be signed by the person who conducted the survey. Copies of the report shall be promptly provided to the director and to the person requesting the survey. If the person requesting the survey disagrees with the contents and/or recommendations contained therein, he may submit to both the operator and the director a detailed description of the specific areas of disagreement.

E. Any surveys requested more than 10 days before the planned initiation of blasting shall be completed by the operator before the initiation of blasting.

[11-29-97; 19.8.20.2029 NMAC - Rn, 19 NMAC 8.2.20.2029, 9-29-2000]

19.8.20.2030 USE OF EXPLOSIVES: BLASTING SCHEDULE:

A. General requirements.

(1) The operator shall conduct blasting operations at times approved by the director and announced in the blasting schedule. The director may limit the area covered, timing, and sequence of blasting as listed in the schedule, if such limitations are necessary and reasonable in order to protect the public health and safety or welfare.

(2) All blasting shall be conducted between sunrise and sunset, unless nighttime blasting is approved by the director based upon a showing by the operator that the public will be protected from adverse noise and other impacts. The director may specify more restrictive time periods for blasting.

(3) Unscheduled blasts may be conducted only where public or operator health and safety so require and for emergency blasting actions. When an operator conducts an unscheduled blast, the operator, using audible signals, shall notify residents within 1/2 mile of the blasting site and document the reason for the unscheduled blast in accordance with 19.8.20.2033 NMAC.

B. Blasting schedule publication and distribution.

(1) The operator shall publish the blasting schedule in a newspaper of general circulation in the locality of the blasting site at least 10 days, but not more than 30 days, before beginning a blasting program.

(2) The operator shall distribute copies of the schedule to local governments and public utilities and to each local residence within 1/2 mile of the proposed blasting site described in the schedule.

(3) The operator shall republish and redistribute the schedule at least every 12 months and revise and republish the schedule at least 10 days, but not more than 30 days, before blasting whenever the area covered by the schedule changes or actual time periods for blasting significantly differ from the prior announcement.

C. Blasting schedule contents. The blasting schedule shall contain, at a minimum:

- (1)** name, address, and telephone number of operator.
- (2)** identification of the specific areas in which blasting will take place;
- (3)** dates and time periods when explosives are to be detonated;
- (4)** methods to be used to control access to the blasting area; and
- (5)** type and patterns of audible warning and all-clear signals to be used before and after blasting.

[11-29-97; 19.8.20.2030 NMAC - Rn, 19 NMAC 8.2.20.2030, 9-29-2000]

19.8.20.2031 USE OF EXPLOSIVES: BLASTING SIGNS, WARNINGS AND ACCESS CONTROL:

A. Blasting signs. Blasting signs shall meet the specifications of Subsections A and B of 19.8.20.2000 NMAC. The operator shall:

(1) conspicuously place signs reading "Blasting Area" along the edge of any blasting area that comes within 100 feet of any public road right-of-way, and at the point where any other road provides access to the blasting area; and

(2) at all entrances to the permit area from public roads or highways, place conspicuous signs which state "Warning! Explosives in Use," which clearly list and describe the meaning of the audible blast warning and all-clear signals that are in use, and which explain the marking of blasting areas and charged holes awaiting firing within the permit area.

B. Warnings. Warning and all-clear signals of different character or pattern, that are audible within a range of 1/2 mile from the point of the blast shall be given. Each person within the permit area and each person who resides or regularly works within 1/2 mile of the permit area shall be notified of the meaning of the signals in the blasting schedule.

C. Access control. Access within the blasting area shall be controlled to prevent presence of livestock or unauthorized persons during blasting and until an authorized representative of the operator has reasonably determined that:

(1) no unusual hazards, such as imminent slides or undetonated charges, exist; and

(2) access to and travel within the blasting area can be safely resumed.

[11-29-97; 19.8.20.2031 NMAC - Rn, 19 NMAC 8.2.20.2031, 9-29-2000]

19.8.20.2032 USE OF EXPLOSIVES: CONTROL OF ADVERSE EFFECTS:

A. General requirements. Blasting shall be conducted to prevent injury to persons, damage to public or private property outside the permit area, adverse impacts on any underground mine, and change in the course, channel, or availability of surface or ground water outside the permit area.

B. Airblasts.

(1) Limits.

(a) Airblast shall not exceed the maximum limits listed below at the location of any dwelling, public building, school, church, or community or institutional building outside the permit area, except as provided in Subsection E of 19.8.20.2032 NMAC.

Lower frequency limit of measuring system, in Hz (\pm 3 dB)	Maximum Level, in dB
0.1 Hz or lower--flat response ¹	134 peak.
2 Hz or lower--flat response	133 peak.
6 Hz or lower--flat response	129 peak.
C - weighted--slow response ¹	105 peak dBC.

¹Only when approved by the director.

(b) If necessary to prevent damage, the director shall specify lower maximum allowable airblast levels than those of Subparagraph (a) of Paragraph (1) of Subsection B of 19.8.20.2032 NMAC for use in the vicinity of a specific blasting operation.

(2) Monitoring.

(a) The operator shall conduct periodic monitoring to ensure compliance with the airblast standards. The director may require airblast measurement of any or all blasts and may specify the locations at which such measurements are taken.

(b) The measuring systems shall have an upper-end flat-frequency response of at least 200 Hz.

C. Flyrock. Flyrock travelling in the air or along the ground shall not be cast from the blasting site:

(1) more than one-half the distance to the nearest dwelling or other occupied structure;

(2) beyond the area of control required under Subsection C of 19.8.20.2031 NMAC; or

(3) beyond the permit boundary.

D. Ground vibration.

(1) General. In all blasting operations, except as otherwise authorized in Subsection E of 19.8.20.2032 NMAC, the maximum ground vibration shall not exceed

the values approved in the blasting plan required under 19.8.9.902 NMAC. The maximum ground vibration for protected structures listed in Subparagraph (a) of Paragraph (2) of Subsection D of 19.8.20.2032 NMAC shall be established in accordance with either the maximum peak-particle-velocity limits of Paragraph (2) of Subsection D of 19.8.20.2032 NMAC, the scaled-distance equation of Paragraph (3) of Subsection D of 19.8.20.2032 NMAC, the blasting-level chart of Paragraph (4) of Subsection D of 19.8.20.2032 NMAC, or by the director under Paragraph (5) of Subsection D of 19.8.20.2032 NMAC. All structures in the vicinity of the blasting area, not listed in Subparagraph (a) of Paragraph (2) of Subsection D of 19.8.20.2032 NMAC, such as water towers, pipelines and other utilities, tunnels, dams, impoundments, and underground mines, shall be protected from damage by establishment of a maximum allowable limit on the ground vibration, submitted by the operator in the blasting plan and approved by the director.

(2) Maximum peak particle velocity.

(a) The maximum ground vibration shall not exceed the following limits at the location of any dwelling, public building, school, church, or community or institutional building outside the permit area:

Distance (D) from the blasting site, in feet be applied	Maximum allowable peak particle velocity factor (V max) for ground vibration, in inches/second¹	Scaled-factor to without monitoring²
seismic (Ds)		
0 to 300	1.25	50
301 to 5,000	1.00	55
5,000 and beyond	0.75	65

¹Ground vibration shall be measured as the particle velocity. Particle velocity shall be recorded in three mutually perpendicular directions. The maximum allowable peak particle velocity shall apply to each of the three measurements.

²Applicable to the scaled-distance equation of Subparagraph (a) of Paragraph (3) of Subsection D of 19.8.20.2032 NMAC.

(b) A seismographic record shall be provided for each blast.

(3) Scaled-distance equation. An operator may use the scaled-distance equation, $W=(D/D_s)^2$, to determine the allowable charge weight of explosives to be detonated in any 8-millisecond period, without seismic monitoring; where W = the maximum weight of explosives, in pounds; D = the distance, in feet, from the blasting site to the nearest protected structure; and D_s = the scaled-distance factor, which may initially be approved by the director using the values for scaled-distance factor listed in Subparagraph (a) of Paragraph (2) of Subsection D of 19.8.20.2032 NMAC.

(a) The development of a modified scaled-distance factor may be authorized by the director on receipt of a written request by the operator, supported by seismographic records of blasting at the minesite. The modified scaled-distance factor shall be determined such that the particle velocity of the predicted ground vibration will not exceed the prescribed maximum allowable peak particle velocity of Subparagraph (a) of Paragraph (2) of Subsection D of 19.8.20.2032 NMAC, at a 95-percent confidence level.

(4) Blasting-level chart.

(a) An operator may use the ground-vibration limits in Figure 1 to determine the maximum allowance ground vibration.

**Figure 1. Alternative blasting level criteria.
(Source: Modified from figure B-1,
Bureau of Mines R18507)**

(b) If the Figure 1 limits are used, a seismographic record including both particle velocity and vibration-frequency levels shall be provided for each blast. The method for the analysis of the predominant frequency contained in the blasting records shall be approved by the director before application of this alternative blasting criterion.

(5) The maximum allowable ground vibration shall be reduced by the director beyond the limits otherwise provided by 19.8.20 NMAC, if determined necessary to provide damage protection.

(6) The director may require an operator to conduct seismic monitoring of any or all blasts or may specify the location at which the measurements are taken and the degree of detail necessary in the measurement.

E. The maximum airblast and ground-vibration standards of Subsections B and D of 19.8.20.2032 NMAC shall not apply at the following locations:

(1) at structures owned by the permittee and not leased to another person;

(2) at structures owned by the permittee and leased to another person, if a written waiver by the lessee is submitted to the director before blasting.

[11-29-97; 19.8.20.2032 NMAC - Rn, 19 NMAC 8.2.20.2032, 9-29-2000]

19.8.20.2033 USE OF EXPLOSIVES: RECORDS OF BLASTING OPERATIONS:

The operator shall retain a record of all blasts for at least 3 years. Upon request, copies of these records shall be made available to the director and to the public for inspection. Such records shall contain the following data:

A. name of the operator conducting the blast;

B. location, date, and time of the blast;

C. name, signature, and certification number of the blaster conducting the blast;

D. identification, direction, and distance, in feet, from the nearest blast hole to the nearest dwelling, public building, school, church, community or institutional building outside the permit area, except those described in Subsection E of 19.8.20.2032 NMAC;

E. weather conditions, including those which may cause possible adverse blasting effects;

F. type of material blasted;

G. sketches of the blast pattern, including number of holes, burden, spacing, decks, and delay patterns;

H. diameter and depth of holes;

I. types of explosives used;

J. total weight of explosives used per hole;

K. the maximum weight of explosives detonated in an 8-millisecond period;

L. initiation system;

M. type and length of stemming;

N. mats or other protection used;

O. seismographic and airblast records, if required, which shall include:

(1) type of instrument, sensitivity, and calibration signal or certification of annual calibration;

(2) exact location of instrument and the date, time, and distance from the blast;

(3) name of the person and firm taking the reading;

(4) name of the person and firm analyzing the seismographic record; and

(5) the vibration and/or airblast level recorded;

P. reasons and conditions for each unscheduled blast.

[11-29-97; 19.8.20.2033 NMAC - Rn, 19 NMAC 8.2.20.2033, 9-29-2000]

19.8.20.2034 DISPOSAL OF EXCESS SPOIL: GENERAL REQUIREMENTS:

A. Spoil not required to achieve the approximate original contour within the area where overburden has been removed shall be hauled or conveyed to and placed in designated disposal areas within a permit area, if the disposal areas are authorized for such purposes in the approved permit application in accordance with 19.8.20.2034 through 2037 NMAC. The spoil shall be placed in a controlled manner to ensure:

(1) that leachate and surface runoff from the fill will not degrade surface or ground waters or exceed the effluent limitations of 19.8.20.2010 NMAC;

(2) stability of the fill; and

(3) that the land mass designated as the disposal area is suitable for reclamation and revegetation compatible with the natural surroundings.

B. The fill shall be designed using recognized professional standards, certified by a qualified registered professional engineer, and approved by the director.

C. All vegetative and organic materials shall be removed from the disposal area and the topsoil to be used as topdressing shall be removed, segregated, and stored or replaced under 19.8.20.2004 through 2008 NMAC. If approved by the director, organic materials may be used as mulch or may be included in the topdressing to control erosion, promote growth of vegetation, or increase the moisture retention of the soil.

D. Slope protection shall be provided to minimize surface erosion at the site. Diversion design shall conform with the requirements of 19.8.20.2011 NMAC. All disturbed areas, including diversion ditches that are not riprapped, shall be vegetated upon completion of construction.

E. The disposal areas shall be located on the most moderately sloping and naturally stable areas available as approved by the director. If such placement provides additional stability and prevents mass movement, fill materials suitable for disposal shall be placed upon or above a natural terrace, bench, or berm.

F. Excess spoil shall be transported and placed in a controlled manner in horizontal lifts not exceeding 4 feet in thickness; concurrently compacted as necessary to ensure mass stability and to prevent mass movement during and after construction; graded so that surface and subsurface drainage is compatible with the natural surroundings; and covered with topsoil or substitute material in accordance with 19.8.20.2007 NMAC. The director may approve a design which incorporates placement of excess spoil in horizontal lifts other than 4 feet in thickness when it is demonstrated by the operator and certified by a qualified registered professional engineer that the design will ensure the stability of the fill, will ensure a long-term static factor of 1.5, and will meet all other applicable requirements.

G. The final configuration of the fill must be suitable for postmining land uses approved in accordance with 19.8.20.2075 NMAC except that no depressions or impoundments shall be allowed on the completed fill unless approved by the director pursuant to Subsection C of 19.8.20.2055 NMAC.

H. Terraces may be utilized to control erosion and enhance stability if approved by the director and consistent with Subsection B of 19.8.20.2055 NMAC.

I. Where the pre-existing average slope in the disposal area exceeds 1v:2.8h (36 percent) or such lesser slope as may be designated by the director based on local conditions, the fill shall be designed and constructed using the services of a

professional engineer who shall ensure stability of the fill and the foundation. Where the toe of the spoil rests on a downslope, stability analyses shall be performed in accordance with Subsection C of 19.8.9.909 NMAC to determine the size of rock toe buttresses and key-way cuts.

J. The fill shall be inspected for stability by a registered engineer or other qualified professional specialist experienced in the construction of earth and rockfill embankments at least quarterly throughout construction and during the following critical construction periods:

- (1) removal of all organic material and top-soil to be used as topdressing;
- (2) placement of underdrainage systems;
- (3) installation of surface drainage systems;
- (4) placement and compaction of fill materials; and
- (5) revegetation.

K. The qualified registered professional engineer shall provide the director a certified report within 2 weeks after each inspection that the fill has been constructed and maintained as specified in the design approved by the director. The report shall include appearances of instability, structure weakness, and other hazardous condition. A copy of the report shall be retained at the mine site.

L. The certified report on the drainage system and protective filters shall include color photographs taken during and after construction, but before underdrains are covered with excess spoil. If the underdrain system is constructed in phases, each phase shall be certified separately.

(1) Where excess durable rock spoil is placed in single or multiple lifts such that the underdrain system is constructed simultaneously with excess spoil placement by the natural segregation of dumped materials, in accordance with 19.8.20.2037 NMAC, color photographs shall be taken of the underdrain as the underdrain system is being formed.

(2) The photographs accompanying each certified report shall be taken in adequate size and number with enough terrain or other physical features of the site shown to provide a relative scale to the photographs and to specifically and clearly identify the site.

M. Coal processing wastes shall not be disposed of in head-of-hollow or valley fills, and may only be disposed of in other excess spoil fills, if such waste is:

- (1) placed in accordance with 19.8.20.2042 NMAC;

- (2) demonstrated to be nontoxic and nonacid forming; and
- (3) demonstrated to be consistent with the design stability of the fill.

N. If the disposal area contains springs, natural or manmade water-courses, or wet-weather seeps, an underdrain system consisting of durable rock shall be constructed from the wet areas in a manner that prevents infiltration of the water into the spoil material. The underdrain system shall be protected by an adequate filter and shall be designed and constructed using standard geotechnical engineering methods.

O. The foundation and abutments of the fill shall be stable under all conditions of construction and operation. Sufficient foundation investigation and laboratory testing of foundation materials shall be performed in order to determine the design requirements for stability of the foundation. Analyses of foundation conditions shall include the effect of underground mine workings, if any, upon the stability of the structure.

P. Excess spoil may be returned to underground mine workings, but only in accordance with a disposal program approved by the director and MSHA upon the basis of a plan submitted under 19.8.9.917 NMAC.

[11-29-97; 19.8.20.2034 NMAC - Rn, 19 NMAC 8.2.20.2034, 9-29-2000]

19.8.20.2035 DISPOSAL OF EXCESS SPOIL: VALLEY FILLS:

Valley fills shall meet all of the requirements of 19.8.20.2034 NMAC and the additional requirements of 19.8.20 NMAC.

A. The fill shall be designed to attain a long-term static safety factor of 1.5 based upon data obtained from subsurface exploration, geotechnical testing, foundation design, and accepted engineering analyses.

B. Unless the director finds that a subdrainage system is not required for environmental protection, a subdrainage system for the fill shall be constructed in accordance with the following:

- (1) A system of underdrains constructed of durable rock shall meet the requirements of Paragraph (4) of Subsection B of 19.8.20.2035 NMAC and:
 - (a) be installed along the natural drainage system;
 - (b) extend from the toe to the head of the fill; and
 - (c) contain lateral drains to each area of potential drainage or seepage.

(2) A filter system to insure the proper functioning of the rock underdrain system shall be designed and constructed using standard geotechnical engineering methods.

(3) In constructing the underdrains, the rock size and size of the main underdrain will be designed to meet the conditions at the site as determined by data called for in Subsection A of 19.8.20.2035 NMAC. If site specific engineering design criteria are not submitted, the following criteria will be used. In constructing the underdrains, no more than 10 percent of the rock may be less than 12 inches in size and no single rock may be larger than 25 percent of the width of the drain. Rock used in underdrains shall meet the requirements of Paragraph (4) of Subsection B of 19.8.20.2035 NMAC. The minimum size of the main underdrain shall be:

Total amount of fill material	Predominant type of fill material	Minimum size of drain, in feet	
		Width	Height
< 1,000,000 yd ³	Sandstone	10	4
< 1,000,000 yd ³	Shale	16	8
> 1,000,000 yd ³	Sandstone	16	8
> 1,000,000 yd ³	Shale	16	16

(4) Underdrains shall consist of nondegradable, non-acid or toxic forming rock such as natural sand and gravel, sandstone, limestone, or other durable rock that will not slake in water and will be free of coal, clay or shale.

C. Spoil shall be hauled or conveyed and placed in a controlled manner and concurrently compacted as specified by the director, in lifts no greater than 4 feet or less if required by the director to:

- (1) achieve the densities designed to ensure mass stability;
- (2) prevent mass movement;
- (3) avoid contamination of the rock underdrain or rock core; and
- (4) prevent formation of voids.

D. Surface water runoff from the area above the fill shall be diverted away from the fill and into stabilized diversion channels designed to pass safely the runoff from a 100-year, 6-hour precipitation event or larger event specified by the director. Surface runoff

from the fill surface shall be diverted to stabilized channels off the fill which will safely pass the runoff from a 100 year, 6-hour precipitation event. Diversion design shall comply with the requirements of 19.8.20.2011 NMAC.

E. The tops of the fill and any terrace constructed to stabilize the face shall be graded no steeper than 1v:20h (5 percent). The vertical distance between terraces shall not exceed 50 feet.

F. Drainage shall not be directed over the outslope of the fill.

G. The outslope of the fill shall not exceed 1v:2h (50 percent). The director may require a flatter slope.

[11-29-97; 19.8.20.2035 NMAC - Rn, 19 NMAC 8.2.20.2035, 9-29-2000]

19.8.20.2036 DISPOSAL OF EXCESS SPOIL: HEAD OF HOLLOW FILLS:

Disposal of spoil in the head-of-hollow fill shall meet all standards set forth in 19.8.20.2034 and 2035 NMAC and the additional requirements of 19.8.20 NMAC.

A. The fill shall be designed to completely fill the disposal site to the approximate elevation of the ridgeline. A rock-core chimney drain may be utilized instead of the subdrain and surface diversion system required for valley fills. If the crest of the fill is not approximately at the same elevation as the low point of the adjacent ridgeline, the fill must be designed as specified in 19.8.20.2035 NMAC, with diversion of runoff around the fill. A fill associated with contour mining and placed at or near the coal seam, and which does not exceed 250,000 cubic yards may use the rock-core chimney drain.

B. The alternative rock-core chimney drain system shall be designed and incorporated into the construction of head-of-hollow fills as follows:

(1) The fill shall have, along the vertical projection of the main buried stream channel or rill a vertical core of durable rock at least 16 feet thick which shall extend from the toe of the fill to the head of the fill, and from the base of the fill to the surface of the fill. A system of lateral rock underdrains shall connect this rock-core to each area of potential drainage or seepage in the disposal area. Rocks used in the rock-core and underdrains shall meet the requirements of Subsection B of 19.8.20.2035 NMAC.

(2) A filter system to ensure the proper functioning of the rock-core shall be designed and constructed using standard geotechnical engineering methods.

(3) The grading may drain surface water away from the outslope of the fill and toward the rock-core. The maximum slope of the top of the fill shall be 1v:33h (3 percent). Instead of the requirements of Subsection G of 19.8.20.2034 NMAC, a drainage pocket may be maintained at the head of the fill during and after construction, to intercept surface runoff and discharge the runoff through or over the rock drain, if

stability of the fill is not impaired. In no case shall this pocket or sump have a potential for impounding more than 10,000 cubic feet of water. Terraces on the fill shall be graded with a 3- to 5- percent grade toward the fill and a 1- percent slope toward the rock-core.

C. Other drainage control systems that have been demonstrated to provide equivalent stability to the fill as described in Subsections A and B of 19.8.20.2036 NMAC may be approved by the director.

D. The drainage control system shall be capable of passing safely the runoff from a 100-year, 24-hour precipitation event, or larger event specified by the director.

[11-29-97; 19.8.20.2036 NMAC - Rn, 19 NMAC 8.2.20.2036, 9-29-2000]

19.8.20.2037 DISPOSAL OF EXCESS SPOIL: DURABLE ROCK FILLS:

In lieu of the requirements of 19.8.20.2035 and 2036 NMAC, the director may approve alternate methods of disposal of hard rock spoil, including fill placement by dumping in a single lift, on a site specific basis, provided the services of a registered professional engineer experienced in the design and construction of earth and rockfill embankments are utilized and provided the requirements of 19.8.20 NMAC and 19.8.20.2034 NMAC are met. For 19.8.20 NMAC, hard rock spoil shall be defined as rockfill consisting of at least 80 percent by volume of sandstone, limestone, or other rocks that do not slake in water. Resistance of the hard rock spoil to slaking shall be determined by using a slake index and slake durability tests approved by the director.

A. Spoil is to be transported and placed in a specified and controlled manner, which will ensure stability of the fill.

(1) The method of spoil placement shall be designed to ensure mass stability and prevent mass movement in accordance with the additional requirements of 19.8.20 NMAC.

(2) Loads of noncemented clay shale and/or clay spoil in the fill shall be mixed with hard rock spoil in a controlled manner to limit on a unit basis concentrations of noncemented clay shale and clay in the fill. Such materials shall comprise no more than 20 percent of the fill volume as determined by tests performed by a registered professional engineer and approved by the director.

B. Stability analyses.

(1) Stability analyses shall be made by the registered professional engineer. Parameters used in the stability analyses shall be based on adequate field reconnaissance, subsurface investigations, including borings and laboratory tests.

(2) The embankment which constitutes the valley fill or head-of-hollow fill shall be designed with the following factors of safety.

Case Safety	Design Condition	Minimum Factor of
I	End of construction	1.5
II	Earthquake	1.1

C. The design of a head-of-hollow fill shall include an internal drainage system to the extent necessary to ensure continued free drainage of anticipated seepage from precipitation and from springs or wet weather seeps.

(1) Anticipated discharge from springs and seeps and due to precipitation shall be based on records and/or field investigations to determine seasonal variation. The design of the internal drainage system shall be based on the maximum anticipated discharge.

(2) All granular material used for the drainage system shall be free of clay and consist of durable particles such as natural sands and gravel, sandstone, limestone of other durable rock which will not slake in water.

(3) The internal drain shall be protected by a properly designed filter system.

D. Surface water runoff from the areas adjacent to and above the fill shall not be allowed to flow onto the fill and shall be diverted into stabilized channels which are designed to pass safely the runoff from a 100-year, 24-hour precipitation event. Diversion design shall comply with the requirements of Subsection F of 19.8.20.2011 NMAC.

E. The top surface of the completed fill shall be graded such that the final slope after settlement will be no steeper than 1v:20h (5 percent) toward properly designed drainage channels in natural ground along the periphery of the fill. Surface runoff from the top surface of the fill shall not be allowed to flow over the outslope of the fill.

F. Surface runoff from the outslope of the fill shall be diverted off the fill to properly designed channels which will pass safely a 100-year, 24-hour precipitation event. Diversion design shall comply with the requirements of Subsection F of 19.8.20.2011 NMAC.

G. Terraces or other suitable controls, such as berms, contour furrows, or micro-depressions, shall be constructed on the outslope if required for control of erosion, or terraces for construction of roads included in the approved postmining land use plan. Terraces shall meet the following requirements:

(1) the slope of the outslope between terrace benches shall not exceed 1v:2h (50 percent);

(2) to control surface runoff, each terrace bench shall be graded to a slope of 1v:20h (5 percent) toward the embankment; runoff shall be collected by a ditch along the intersection of each terrace bench and the outslope;

(3) terrace ditches shall have a 5 percent slope toward the channels specified in Subsection F of 19.8.20.2037 NMAC, unless steeper slopes are necessary in conjunction with approved roads.

[11-29-97; 19.8.20.2037 NMAC - Rn, 19 NMAC 8.2.20.2037, 9-29-2000; A, 12-31-2007]

19.8.20.2038 PROTECTION OF UNDERGROUND MINING FROM SURFACE MINING ACTIVITIES:

A. No surface coal mining activities shall be conducted closer than 500 feet to any point of either an active or abandoned underground mine, except to the extent that:

(1) the nature, timing, and sequences of the operations are jointly approved by the director, the mine safety and health administration, and the state mine inspector; and

(2) the activities result in improved resource recovery, abatement of water pollution, or elimination of hazards to the health and safety of the public.

B. Surface mining activities shall be designed to protect disturbed surface areas, including spoil disposal sites, so as not to endanger any present or future operations of either surface or underground mining activities.

[11-29-97; 19.8.20.2038 NMAC - Rn, 19 NMAC 8.2.20.2038, 9-29-2000]

19.8.20.2039 COAL PROCESSING WASTE BANKS: GENERAL REQUIREMENTS:

A. Coal processing waste banks shall be designed and constructed to meet the requirements of 30 CFR 77.214/77.215, and approved by the director.

B. All coal processing waste other than wastes to be disposed of in the mine workings or excavation, shall be hauled or conveyed and placed in new and existing disposal areas approved by the director for this purpose. These areas shall be within a permit area. The disposal area shall be designed, constructed and maintained:

(1) in accordance with 19.8.20.2034 and 2035 NMAC, 19.8.20 NMAC, and 19.8.20.2040 through 2045 NMAC; and

(2) to prevent combustion.

C. Coal processing waste materials from activities located outside a permit area, such as those activities at other mines or abandoned mine waste piles may be disposed of in the permit area only if approved by the director. Approval shall be based on a showing by the person who conducts surface coal mining operations in the permit area, using hydrologic, geotechnical, physical, and chemical analyses, that disposal of these materials does not:

- (1) adversely affect water quality, water flow or vegetation;
- (2) create public health hazards; or
- (3) cause instability in the disposal areas.

[11-29-97; 19.8.20.2039 NMAC - Rn, 19 NMAC 8.2.20.2039, 9-29-2000]

19.8.20.2040 COAL PROCESSING WASTE BANKS: SITE INSPECTION:

A. All coal processing waste banks shall be inspected, on behalf of the person conducting surface coal mining operations, by a qualified registered professional engineer or other qualified professional specialist under the direction of the professional engineer.

(1) Such inspections shall be made at least quarterly throughout construction and during critical construction periods. Critical construction periods shall include at a minimum:

(a) foundation preparation including the removal of all organic material and topsoil;

(b) placement of underdrains and protective filters systems;

(c) installation of final surface drainage systems; and

(d) the final graded and revegetated facility. Regular inspections by the engineer or specialist shall also be conducted during placement and compaction of coal processing waste materials. More frequent inspections shall be conducted if a danger of harm exists to the public health and safety or the environment. Inspections shall continue until the coal processing waste banks have been finally graded and revegetated or until a later time as required by the director.

(2) Inspections shall include such observations and tests as may be necessary to evaluate the potential hazard to human life and property, to ensure that all organic material and topsoil to be used as topdressing have been removed and that proper construction and maintenance are occurring in accordance with the plan submitted under 19.8.9 NMAC and approved by the director.

(3) The engineer or other approved inspector shall consider steepness of slopes, seepage, and other visible factor which could indicate potential failure, and the results of failure with respect to the threat to human life and property.

(4) Where the plan submitted under 19.8.9 NMAC and approved by the director provides for a subdrainage in accordance with Subsection A of 19.8.20.2041 NMAC, inspections shall be made in accordance with Subsection K of 19.8.20.2034 NMAC.

(5) The qualified registered professional engineer shall provide a certified report to the director promptly after each inspection that the coal processing waste bank has been constructed and maintained as designed and in accordance with the approved plan and 19.8.20 NMAC. The report shall include appearances of instability, structural weakness, and other hazardous conditions.

B. If any inspection discloses that a potential hazard exists, the director shall be informed promptly of the finding and of the emergency procedures formulated for public protection and remedial action. If adequate procedures cannot be formulated or implemented, the director shall be notified immediately. The director shall then notify the appropriate emergency agencies that other emergency procedures are required to protect the public from the coal processing waste area.

[11-29-97; 19.8.20.2040 NMAC - Rn, 19 NMAC 8.2.20.2040, 9-29-2000]

19.8.20.2041 COAL PROCESSING WASTE BANKS: WATER CONTROL MEASURES:

A. Unless the operator demonstrates to the director that embankments can be constructed so as not to impose safety or environmental hazards, a properly designed subdrainage shall be provided, which shall:

- (1) intercept all ground water sources;
- (2) be protected by an adequate filter; and
- (3) be covered so as to protect against the entrance of surface water or leachate from the coal processing waste.

B. All surface drainage from the area above the coal processing waste bank and from the crest and face of the waste disposal area shall be diverted, in accordance with Subsection D of 19.8.20.2035 NMAC.

C. Slope protection shall be provided to minimize surface erosion at the site. All disturbed areas, including diversion ditches that are not riprapped, shall be vegetated upon completion of construction.

D. All water discharged from a coal processing waste bank shall comply with 19.8.20.2009, 2010, 2013, 2014, 2020 and 2023 NMAC.

[11-29-97; 19.8.20.2041 NMAC - Rn, 19 NMAC 8.2.20.2041, 9-29-2000]

19.8.20.2042 COAL PROCESSING WASTE BANKS: CONSTRUCTION REQUIREMENTS:

A. Coal processing waste banks shall be constructed in compliance with 19.8.20.2034 and 2035 NMAC, depending on the location of the waste bank, except to the extent the requirements of those sections are specifically varied in 19.8.2042 NMAC.

B. Following grading of the coal processing waste bank the site shall be covered with a minimum of 4 feet of the best available non-toxic and non-combustible material in accordance with 19.8.20.2056 NMAC, topdressed in accordance with 19.8.20.2007 NMAC and in a manner that does not impede flow from subdrainage systems. The coal processing waste bank shall be revegetated in accordance with 19.8.20.2060 through 2066 NMAC. The director may allow less than 4 feet of cover material based on physical and chemical analyses which show that the requirements of 19.8.20.2060 through 2066 NMAC will be met.

[11-29-97; 19.8.20.2042 NMAC - Rn, 19 NMAC 8.2.20.2042, 9-29-2000]

19.8.20.2043 COAL PROCESSING WASTE: BURNING:

Coal processing waste fires shall be extinguished by the person who conducts the surface coal mining operations, in accordance with a plan approved by the director and the mine safety and health administration. The plan shall contain, at a minimum, provisions to ensure that only those persons authorized by the operator, and who have an understanding of the procedures to be used, shall be involved in the extinguishing operations.

[11-29-97; 19.8.20.2043 NMAC - Rn, 19 NMAC 8.2.20.2043, 9-29-2000]

19.8.20.2044 COAL PROCESSING WASTE: BURNED WASTE UTILIZATION:

Before any burned coal processing waste, other materials, or refuse is removed from a disposal area, approval shall be obtained from the director. A plan for the method of removal, with maps and appropriate drawings to illustrate the proposed sequence of the operation and method of compliance with 19.8.20 NMAC, shall be submitted to the director. Consideration shall be given in the plan to potential hazards, which may be created by removal to persons working or living in the vicinity of the structure. The plan shall be certified by a qualified engineer.

[11-29-97; 19.8.20.2044 NMAC - Rn, 19 NMAC 8.2.20.2044, 9-29-2000]

19.8.20.2045 COAL PROCESSING WASTE: RETURN TO UNDERGROUND WORKINGS:

Coal processing waste may be returned to underground mine workings only in accordance with the waste disposal program approved by the director and MSHA under 19.8.9.917 NMAC.

[11-29-97; 19.8.20.2045 NMAC - Rn, 19 NMAC 8.2.20.2045, 9-29-2000]

19.8.20.2046 DISPOSAL OF NON-COAL WASTES:

A. Non-coal wastes including, but not limited to, grease, lubricants, paints, flammable liquids, garbage, abandoned mining machinery, lumber and other combustibles shall be placed, stored or disposed of in a controlled manner in a designated portion of the permit area in accordance with 19.8.9.907, 19.8.20.2009, 2055, and 2056 NMAC. Placement, storage and disposal shall ensure that leachate and surface runoff do not degrade surface or ground water, fires are prevented, and that the area remains stable and suitable for reclamation and revegetation compatible with the natural surroundings.

B. Final disposal of non-coal wastes shall be in a designated disposal site in the permit area. Disposal sites shall be designed and constructed with appropriate water barriers on the bottom and sides of the designated site. Wastes shall be routinely compacted and covered to prevent combustion and wind-borne waste. When the disposal is completed, a minimum of 2 feet of soil cover shall be placed over the site, slopes stabilized, and revegetation accomplished in accordance with 19.8.20.2060 through 2066 NMAC. Operation of the disposal site shall be conducted in accordance with all local, state, and federal requirements.

C. At no time shall any non-coal waste material be deposited at refuse embankments or impoundment sites, nor shall any excavation for solid waste disposal be located within 8 feet of any coal outcrop or coal storage area.

D. Wastes produced by any operations other than coal mining operations which are disposed of inside the permit area shall be in compliance with Subsections A, B and C of 19.8.20.2046 NMAC and shall also be in compliance with the following:

(1) No wastes shall be imported into the permit area for the purpose of disposal without the approval of the director. The director shall specify procedures for the disposal of each type of such wastes; and

(2) The permittee shall demonstrate to the director that during the life of the mine and after mine closure the disposal of the waste material will not cause the standards of 20.6.2.3103 NMAC of the New Mexico water quality control commission regulations to be exceeded in ground water which has a pre-mining total dissolved

concentration (TDS) of 10,000 mg/1 or less except as provided for at Subsection D of 20.6.2.3109 NMAC.

E. Notwithstanding any other provision in 19.8.20 NMAC, any noncoal mine waste defined as "hazardous waste" under Section 3001 of the Resource Conservation and Recovery Act (RCRA) (Pub. L. 94-580, as amended) and 40 CFR Part 261 shall be handled in accordance with the requirements of Subtitle C and the Hazardous and Solid Waste Amendments (1984) of RCRA, with any implementing regulations, and with the New Mexico hazardous waste management regulations. If the facility becomes subject to RCRA through the treatment, storage and/or disposal of a noncoal hazardous waste, any solid waste at the facility, including exempt coal mine waste, also becomes subject to RCRA through HSWA.

[11-29-97; 19.8.20.2046 NMAC - Rn, 19 NMAC 8.2.20.2046, 9-29-2000]

19.8.20.2047 COAL PROCESSING WASTE: DAMS AND EMBANKMENTS: GENERAL REQUIREMENTS:

A. 19.8.20.2047 through 2049 NMAC apply to dams and embankments, constructed of coal processing waste, or intended to impound coal processing waste, whether they were completed before adoption of 19.8 NMAC or are intended to be completed thereafter.

B. Waste shall not be used in the construction of dams and embankments unless it has been demonstrated to the director that the stability of such a structure conforms with the requirements of Subsection A of 19.8.20.2049 NMAC. It shall also be demonstrated that the use of waste material shall not have a detrimental affect on downstream water quality or the environment due to acid seepage through the dam or embankment. All demonstrations shall be submitted to and approved by the director.

C. Dams and embankments constructed of coal processing waste or intended to impound coal processing waste shall not be retained permanently as part of approved postmining land use.

[11-29-97; 19.8.20.2047 NMAC - Rn, 19 NMAC 8.2.20.2047, 9-29-2000; A, 12-31-2007]

19.8.20.2048 COAL PROCESSING WASTE: DAMS AND EMBANKMENTS: SITE PREPARATION:

A. All trees, shrubs, grasses and other organic material shall be cleared and grubbed from the site, and all combustibles shall be removed in accordance with the requirements of 19.8.20 NMAC and

B. Surface drainage that may cause erosion to the embankment area or the embankment features, whether during construction or after completion, shall be diverted away from the embankment by diversion ditches that comply with the requirements of

Subsections C, D, E, F and G of 19.8.20.2011 NMAC. Adequate outlets for discharge from these diversions shall be in accordance with 19.8.20.2015 NMAC. Diversions that are designed to divert drainage from the upstream area away from the impoundment area or from the surface of the facility that may cause instability or erosion of the impounding structure shall be designed to carry the peak runoff from a 100-year, 6-hour precipitation event. The diversion shall be maintained to prevent blockage, and the discharge shall be in accordance with 19.8.20.2015 NMAC. Sediment control measures shall be provided at the discharge of each diversion ditch before entry into natural watercourses in accordance with 19.8.20.2009 through 2014 NMAC.

[11-29-97; 19.8.20.2048 NMAC - Rn, 19 NMAC 8.2.20.2048, 9-29-2000]

19.8.20.2049 COAL PROCESSING WASTE: DAMS AND EMBANKMENTS: DESIGN AND CONSTRUCTION:

A. The design of each dam and embankment constructed of coal processing waste or intended to impound such waste shall comply with the requirements of Subsections B through G of 19.8.20.2017 NMAC modified as follows:

(1) the maximum water elevation shall be that determined by the freeboard hydrograph criteria contained in the U.S. natural resources conservation service criteria referenced in 19.8.20.2017 NMAC;

(2) the dam and embankment shall have a minimum safety factor of 1.5 for the partial pool with steady seepage saturation conditions, and the seismic safety factor shall be at least 1.2;

(3) the dam or embankment foundation and abutments shall be designed to be stable under all conditions of construction and operation of the impoundment; sufficient foundation investigations and laboratory testing shall be performed to determine the safety factors of the dam or embankment for all loading conditions appearing in Paragraph (2) of Subsection A of 19.8.20.2049 NMAC or the publications referred to in 19.8.20.2017 NMAC and for all increments of construction.

B. Spillways and outlet works shall be designed to provide adequate protection against erosion and corrosion. Inlets shall be protected against blockage.

C. Dams or embankments constructed of, or impounding, coal processing waste shall be designed, constructed and maintained so that at least 90 percent of the water stored during the design precipitation event shall be removed within a 10 day period.

D. Each impounding structure constructed of coal processing waste or intended to impound coal processing waste that meets the criteria of 30 CFR 77.216(a) shall have sufficient spillway capacity to safely pass, adequate storage capacity to safely contain, or a combination of storage capacity and spillway capacity to safely control, the

probable maximum precipitation of a 6-hour precipitation event, or greater event as specified by the director.

E. No impounding structure constructed of coal processing waste or intended to impound coal processing waste shall be retained as a permanent impoundment as part of the approved postmining land use.

[11-29-97; 19.8.20.2049 NMAC - Rn, 19 NMAC 8.2.20.2049, 9-29-2000; A, 12-31-2007]

19.8.20.2050 AIR RESOURCES PROTECTION:

A. Fugitive dust. Each person who conducts surface coal mining operations shall plan and employ fugitive dust control measures as an integral part of site preparation, coal mining, and reclamation operations. The director shall approve the control measures appropriate for use in planning, according to applicable federal and state air quality standards, climate, existing air quality in the area affected by mining, and the available control technology.

B. Control measures. The fugitive dust control measures to be used, depending on applicable federal and state air quality standards, climate, existing air quality, size of the operation, and type of operation, shall include, as necessary, but not be limited, to:

(1) periodic watering of unpaved roads, with the minimum frequency of watering approved by the director;

(2) chemical stabilization of unpaved roads with proper application of nontoxic soil cement or dust palliatives;

(3) paving of roads;

(4) prompt removal of coal, rock, soil, and other dust-forming debris from roads and frequent scraping and compaction of unpaved roads to stabilize the road surface;

(5) restricting the speed of vehicles to reduce fugitive dust caused by travel;

(6) revegetating, mulching, or otherwise stabilizing the surface of all areas adjoining roads that are sources of fugitive dust;

(7) restricting the travel of unauthorized vehicles on other than established roads;

(8) enclosing, covering, watering, or otherwise treating loaded haul trucks and railroad cars, to reduce loss of material to wind and spillage;

- (9) substituting of conveyor systems for haul trucks and covering of conveyor systems when conveyed loads are subjected to wind erosion;
- (10) minimizing the area of disturbed land;
- (11) prompt revegetation of regraded lands;
- (12) use of alternatives for coal-hauling methods, restriction of dumping procedures, wetting of disturbed materials during handling, and compaction of disturbed areas;
- (13) planting of special windbreak vegetation at critical points in the permit area;
- (14) control of dust from drilling, using water sprays, hoods, dust collectors, or other controls;
- (15) restricting the areas to be blasted at any one time to reduce fugitive dust;
- (16) restricting activities causing fugitive dust during periods or air stagnation;
- (17) extinguishing any areas of burning or smoldering coal and periodically inspecting for burning areas whenever the potential for spontaneous combustion is high;
- (18) reducing the period of time between initially disturbing the soil and revegetating or other surface stabilization; and
- (19) restricting fugitive dust at spoil and coal transfer and loading points with water sprays, negative pressure systems and baghouse filters, chemicals, or other practices.

C. Additional measures. Where the director determines that application of fugitive dust control measures listed in Subsection B of 19.8.20.2050 NMAC is inadequate, the director may require additional measures and practices as necessary.

D. Monitoring. Air monitoring equipment shall be installed and monitoring shall be conducted in accordance with the air monitoring plan required under 19.8.9.904 NMAC and approved by the director.

[11-29-97; 19.8.20.2050 NMAC - Rn, 19 NMAC 8.2.20.2050, 9-29-2000; A, 12-31-2007]

19.8.20.2051 PROTECTION OF FISH, WILDLIFE AND RELATED ENVIRONMENTAL VALUES:

A. Any person conducting surface coal mining operations shall, to the extent possible using the best technology current available, minimize disturbances and

adverse impacts of the operations on fish, wildlife, and related environmental values, and achieve enhancement of such resources where practicable.

B. No surface coal mining operations or reclamation shall be conducted which is likely to jeopardize the continued existence of endangered or threatened species listed either by the secretary of the U.S. department of the interior, or by the New Mexico game and fish department, or which are likely to result in the destruction or adverse modification of designated critical habitats of such species in violation of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.). The operator shall promptly report to the director any state-or federally-listed endangered or threatened species within the permit area of which the operator becomes aware. Upon notification, the director shall consult with appropriate state and federal fish and wildlife agencies, and, after consultation, shall identify whether, and under what conditions, the operator may proceed.

C. No surface coal mining operations or reclamation shall be conducted in a manner which would result in the unlawful taking of a bald or golden eagle, its nests, or any of its eggs. The operator shall promptly report to the director any golden or bald eagle nest within the permit area of which the operator becomes aware. Upon notification, the director shall consult with the U.S. fish and wildlife service and also, where appropriate, the state fish and wildlife agency, and after consultation shall identify whether, and under what conditions, the operator may proceed.

D. A person who conducts surface coal mining operations shall ensure that the design and construction of electric power lines and other transmission facilities used for or incidental to the surface coal mining operations on the permit areas are in accordance with the guidelines set forth in "environmental criteria for electric transmission system" (USDI, USDA (1970)), or in alternative guidance manuals approved by the director. Distribution lines shall be designed and constructed in accordance with REA bulletin 61-10, "powerline contacts by eagles and other large birds", or in alternative guidance manuals approved by the director.

E. Each person who conducts surface coal mining operations shall, to the extent possible using the best technology currently available:

(1) locate and operate haul and access roads so as to avoid or minimize impacts to important fish and wildlife species or other species protected by state or federal law;

(2) fence roadways where specified by the director to guide locally important wildlife to roadway underpasses or overpasses; construction of other necessary passageways may be required by the director; no new barrier shall be created in known and important wildlife migration routes;

(3) fence, cover, or use other appropriate methods to exclude wildlife from ponds which contain hazardous concentrations of toxic-forming materials;

(4) restore, enhance where practicable or avoid disturbance to habitats of unusually high value for fish and wildlife;

(5) restore, enhance where practicable, or maintain natural riparian vegetation on the banks of streams, lakes, and other wetland areas;

(6) afford protection to aquatic communities by avoiding stream channels as required in 19.8.20.2025 and 2070 NMAC or restoring stream channels as required in 19.8.20.2012 NMAC;

(7) not use persistent pesticides on the area during surface coal mining and reclamation operations, unless approved by the director;

(8) to the extent possible prevent, control, and suppress range, forest, and coal fires which are not approved by the director as part of a management plan;

(9) if fish and wildlife habitat is to be a primary or secondary postmining land use, the operator shall in addition to the requirements of 19.8.20.2060 through 2066 NMAC of these regulations:

(a) select plant species to be used on reclaimed areas, based on the following criteria:

(i) their proven nutritional value for fish life; and

(ii) their uses as cover for fish and wildlife; and

(iii) their ability to support and enhance fish and wildlife habitat after release of bonds; and

(b) distribute plant groupings to maximize benefit to fish and wildlife; plants should be grouped and distributed in a manner which optimizes edge effect, cover and other benefits for fish and wildlife;

(10) where cropland is to be the alternative postmining land use and where appropriate for wildlife and crop management practices, intersperse the fields with trees, hedges or fence rows throughout the harvested area to break up large blocks of monoculture and to diversify habitat types for birds and other animals; wetlands shall be preserved or created rather than drained or otherwise permanently abolished; and

(11) where the primary land use is to be residential, public service, or industrial land use, intersperse reclaimed lands with greenbelt utilizing species of grass, shrubs and trees useful as food and cover for birds and small animals, unless such greenbelt are inconsistent with the approved postmining land use.

[11-29-97; 19.8.20.2051 NMAC - Rn, 19 NMAC 8.2.20.2051, 9-29-2000]

19.8.20.2052 SLIDES AND OTHER DAMAGE:

A. For surface mining activities, unless demonstrated to and approved by the director that equivalent stability can be obtained through other technology, an undisturbed natural barrier shall be provided beginning at the elevation of the lowest coal seam to be mined and extending from the outslope for such distance as may be determined by the director as is needed to assure stability. The barrier shall be retained in place to prevent slides and erosion.

B. At any time a slide occurs which may have a potential adverse affect on public property, health, safety, or the environment, the person who conducts the surface coal mining operations shall notify the director by the fastest available means and comply with any remedial measures required by the director.

[11-29-97; 19.8.20.2052 NMAC - Rn, 19 NMAC 8.2.20.2052, 9-29-2000]

19.8.20.2053 CONTEMPORANEOUS RECLAMATION:

Reclamation efforts, including, but not limited to, backfilling, grading, topdressing replacement and revegetation, of all land that is disturbed by surface coal mining operations shall occur as contemporaneously as practicable with mining operations.

[11-29-97; 19.8.20.2053 NMAC - Rn, 19 NMAC 8.2.20.2053, 9-29-2000]

19.8.20.2054 BACKFILLING AND GRADING: GENERAL REQUIREMENTS:

A. Timing of backfilling and grading.

(1) Contour mining. Rough backfilling and grading shall follow coal removal by not more than 60 days or 1,500 linear feet. The director may grant additional time or distance for rough backfilling and grading if the permittee can demonstrate, on the basis of the materials submitted under Paragraph (3) of Subsection B of 19.8.9.906 NMAC, that additional time or distance is necessary.

(2) Open pit mining. Rough backfilling and grading shall occur in accordance with the time schedule approved by the director, on the basis of the materials submitted under Paragraph (3) of Subsection B of 19.8.9.906 NMAC, which shall establish in specific increments the period between removal of coal and completion of backfilling and grading.

(3) Strip mining. Rough backfilling and grading shall be completed within 180 days following coal removal and shall not be more than four spoil ridges behind the pit being worked, the spoil from the active pit being considered the first ridge. The director may grant additional time or distance for rough backfilling and grading if the permittee can, on the basis of the materials submitted under Paragraph (3) of Subsection B of 19.8.9.906 NMAC, that additional time or distance is necessary; and

(4) Surface areas disturbed incident to underground mining activities shall be backfilled and graded in accordance with the time schedule approved by the director as a condition of the permit.

(5) Final pit at completion of mining. Rough backfilling and grading shall occur in accordance with a time schedule approved by the director based on materials submitted under Paragraph (3) of Subsection B of 19.8.9.906 NMAC.

B. Method for backfilling and grading.

(1) Except as specifically exempted in 19.8.20 NMAC, all disturbed areas shall be returned to their approximate original contour. All spoil shall be transported, backfilled, compacted (where advisable to insure stability or to prevent leaching) and graded to eliminate all spoil piles, depressions and highwalls except:

(a) as provided for in Paragraph (2) of Subsection A of 19.8.20.2055 NMAC;

(b) if small depressions are needed in order to retain moisture to assist revegetation as authorized by the director pursuant to Subsection C of 19.8.20.2055 NMAC.

(2) Backfilled material shall be placed to minimize adverse effects on ground water, minimize off-site effects, and to support the approved postmining land use.

(3) The postmining graded slopes needed not be of uniform slope.

(4) Cut-and-fill terraces may be used only in those situations expressly identified in 19.8.20.2055 NMAC.

[11-29-97; A, 12-15-99; 19.8.20.2054 NMAC - Rn, 19 NMAC 8.2.20.2054, 9-29-2000]

19.8.20.2055 BACKFILLING AND GRADING: GENERAL GRADING REQUIREMENTS:

A. The final graded slopes shall not exceed in grade either the approximate premining slopes, or any lesser slopes approved by the director based on consideration of soil, climate, or other characteristics of the surrounding area. Postmining final graded slopes need not be uniform but shall approximate the general nature of the premining topography. The person who conducts surface coal mining operations shall, at a minimum:

(1) retain all overburden and spoil on the solid portion of existing or new benches; and

(2) backfill and grade to the most moderate slope possible, to eliminate the highwall which does not exceed either the angle of repose or such lesser slope as is

necessary to achieve a minimum static safety factor of 1.3. In all cases the highwall shall be eliminated unless retention of portions of the highwall is approved by the director, if the operator demonstrates that:

- (a)** it will have a static safety factor of 1.3;
 - (b)** it will not pose a hazard to persons or wildlife in the area;
 - (c)** it will be backfilled to cover the uppermost minable coal seam to a minimum depth of 4 feet;
 - (d)** the retained portion left standing shall not exceed pre-existing cliff lengths. However, the director may require shorter lengths.
 - (e)** it is necessary to replace cliff type habitats that existed in the natural topography prior to mining; and
 - (f)** the ends of the highwall portions left standing will be contoured into the surrounding topography with slopes of 3:1 or less. Retention of any portion of the highwall must be approved by the director.
- (3)** spoil, except excess spoil disposed of in accordance with 19.8.20.2034 through 2037 NMAC, shall be returned to the mined-out area.
- (4)** spoil and waste materials shall be compacted where advisable to ensure stability or to prevent leaching of toxic materials.
- (5)** spoil may be placed on the area outside the mind-out area in non-steep slope areas to restore the approximate original contour by blending the spoil into the surrounding terrain if the following requirements are met:
- (a)** all vegetative and organic material shall be removed from the area.
 - (b)** the topsoil on the area shall be removed, segregated, stored and redistributed in accordance with 19.8.20.2005 through 2007 NMAC.
 - (c)** the spoil shall be backfilled and graded on the area in accordance with the requirements of 19.8.20 NMAC.

B. On approval by the director in order to conserve soil moisture, ensure stability, and control erosion on final graded slopes, cut-and-fill terraces may be allowed, if the terraces are compatible with the approved postmining land use and are appropriate substitutes for construction of lower grades on the reclaimed lands. The terraces shall meet the following requirements:

(1) The width of the individual terrace bench shall not exceed 20 feet, unless specifically approved by the director as necessary for stability, erosion control, or roads included in the approved postmining land use plan.

(2) The vertical distance between terraces shall be as specified by the director, to prevent excessive erosion and to provide long-term stability.

(3) The slope of the terrace outslope shall not exceed 1v:3h (33 1/3 percent). Outslopes which exceed 1v:3h (33 1/3 percent) may be approved if they provide adequate control over erosion and closely resemble the surface configuration of land prior to mining. In no case may highwalls be left as part of terraces.

(4) Culverts and underground rock drains shall be used on the terrace only when approved by the director.

C. Small depressions may be constructed, if they:

(1) are approved by the director to minimize erosion, conserve soil moisture, create or enhance wildlife habitat, or promote vegetation;

(2) do not restrict normal access; and

(3) are not inappropriate substitutes for lower grades on the reclaimed lands.

D. All surface coal mining operations on slopes averaging above 20 degrees, or on lesser slopes that the director defines as steep slopes shall meet the provisions of 19.8.26 NMAC.

E. All final grading preparation of overburden before replacement of topdressing and placement of topdressing, shall be done along the contour to minimize subsequent erosion and instability. If such grading, preparation, or placement along the contour is hazardous to equipment operators, then grading, preparation, or placement in a direction other than generally parallel to the contour may be used. In all cases, grading, preparation, or placement shall be conducted in a manner which minimizes erosion and provides a surface for replacement of topdressing which will minimize slippage.

F. Remining operations on previously mined areas that contain a preexisting highwall shall comply with the requirements of 19.8.20.2054 through 2058 NMAC, except as provided in 19.8.20 NMAC.

G. The requirements of Subsection A of 19.8.20.2055 NMAC requiring the elimination of highwalls shall not apply to remining operations where the volume of all reasonably available spoil is demonstrated in writing to the director to be insufficient to completely backfill the reaffected or enlarged highwall. The highwall shall be eliminated to the maximum extent technically practical in accordance with the following criteria:

(1) all spoil generated by the remining operation and any other reasonably available spoil shall be used to backfill the area; reasonably available spoil in the immediate vicinity of the remining operation shall be included within the permit area;

(2) the backfill shall be graded to a slope which is compatible with the approved postmining land use and which provides adequate drainage and long-term stability;

(3) any highwall remnant shall be stable and not pose a hazard to the public health and safety or to the environment; the operator shall demonstrate, to the satisfaction of the director, that the highwall remnant is stable;

(4) spoil placed on the outslope during previous mining operations shall not be disturbed if such disturbances will cause instability of the remaining spoil or otherwise increase the hazard to the public health and safety to the environment.

[11-29-97; 19.8.20.2055 NMAC - Rn, 19 NMAC 8.2.20.2055, 9-29-2000]

19.8.20.2056 BACKFILLING AND GRADING: COVERING COAL AND ACID- AND TOXIC-FORMING MATERIALS:

A. Exposed coal seams, acid- and toxic-forming materials, and combustible materials exposed, used, or produced during surface coal mining and reclamation operations shall be adequately covered with non-toxic and non-combustible materials, or treated, to control the impact on surface and ground water in accordance with 19.8.20.2009 NMAC to prevent sustained combustion, and to minimize adverse effects on plant growth and the approved postmining land use.

B. Where necessary to protect against adverse effects on plant growth and the approved post-mining land use from upward migration of salts, exposure by erosion, formation of acid or toxic seeps, to provide an adequate depth for plant growth, or otherwise to meet local conditions, the director shall specify thicker amounts of cover using non-toxic material, or special compaction and isolation from ground water contact.

C. Acid-forming or toxic-forming material shall not be buried or stored in proximity to a drainage course so as to cause or pose a threat of water pollution.

[11-29-97; 19.8.20.2056 NMAC - Rn, 19 NMAC 8.2.20.2056, 9-29-2000; A, 12-31-2007]

19.8.20.2057 BACKFILLING AND GRADING: THIN OVERBURDEN:

A. The provisions of 19.8.20.2057 NMAC apply only where the overburden thickness times the swell factor, plus the thickness of other available waste materials, is less than the combined thickness of the overburden and coal bed prior to removing the coal and only when surface mining activities cannot be carried out to comply with 19.8.20.2054 NMAC to achieve the approximate original contour.

B. In surface mining activities carried out continuously in the same limited pit area for more than 1 year from the day coal-removal operations begin and where the volume of all available spoil and suitable waste materials over the permit area is demonstrated to be insufficient to achieve the approximate original contour of the lands disturbed, surface mining activities shall be conducted to meet, at a minimum, the following standards:

(1) haul or convey, backfill, and grade, using all available spoil and suitable waste materials from the entire mine area, to attain the lowest practicable stable grade, to achieve a static safety factor of 1.3, and to provide adequate drainage and long-term stability of the regraded areas and cover all acid-forming and toxic-forming materials.

(2) except as provided in Paragraph (2) of Subsection A of 19.8.20.2055 NMAC, eliminate highwalls by grading or backfilling to stable slopes not exceeding 1v:2h (50 percent), or such lesser slopes as the director may specify to reduce erosion, maintain the hydrologic balance, or allow the approved postmining land use.

(3) haul or convey, backfill, grade, and revegetate in accordance with 19.8.20.2060 through 2066 NMAC, to achieve an ecologically sound land use compatible with the prevailing use in unmined areas surrounding the permit area; and

(4) haul or convey, backfill, and grade, to ensure impoundments are constructed only where:

(a) it has been demonstrated to the director's satisfaction that all requirements of 19.8.20.2009 through 2024 NMAC have been met; and

(b) the impoundments have been approved by the director as suitable for the approved postmining land use and as meeting the requirements of 19.8.20 NMAC and all other applicable federal and state laws and regulations.

[11-29-97; 19.8.20.2057 NMAC - Rn, 19 NMAC 8.2.20.2057, 9-29-2000; A, 1-15-2002]

19.8.20.2058 BACKFILLING AND GRADING: THICK OVERBURDEN:

A. The provisions of 19.8.20.2058 NMAC apply only where the overburden thickness times the swell factor exceeds the combined thickness of the overburden and coal bed prior to removing the coal and only when surface mining activities cannot be carried out to comply with 19.8.20.2054 NMAC to achieve the approximate original contour.

B. In surface mining activities where the volume of spoil over the permit area is demonstrated to be more than sufficient to achieve the approximate original contour, surface mining activities shall be conducted to meet, at a minimum, the following standards:

(1) haul or convey, backfill, and grade all spoil and wastes, not required to achieve the approximate original contour of the permit area, to the lowest practicable grade, to achieve a static factor of safety of 1.3 and cover all acid-forming and other toxic-forming materials;

(2) haul or convey, backfill, and grade excess spoil and wastes only within the permit area and dispose of such materials in accordance with 19.8.20.2034 through 2037 NMAC;

(3) haul or convey, backfill, and grade excess spoil and wastes to maintain the hydrologic balance, in accordance with 19.8.20.2009 through 2025 NMAC and to provide long-term stability by preventing slides, erosion and water pollution;

(4) haul or convey, backfill, grade and revegetate wastes and excess spoil to achieve an ecologically sound land use approved by the director as compatible with the prevailing land uses in unmined areas surrounding the permit area;

(5) except as provided for in Paragraph (2) of Subsection A of 19.8.20.2055 NMAC and Paragraph (1) of Subsection B of 19.8.20.2053 NMAC, eliminate all highwalls and depressions by backfilling with spoil and suitable waste materials; and

(6) meet the revegetation requirements of 19.8.20.2060 through 2066 NMAC for all disturbed areas.

[11-29-97; Rn, 19.8.20.2058 NMAC - 19 NMAC 8.2.20.2058, 9-29-2000; A, 1-15-2002]

19.8.20.2059 REGRADING OR STABILIZING RILLS AND GULLIES:

A. All exposed surface areas shall be protected and stabilized to effectively control erosion and air pollution attendant to erosion.

B. Rills and gullies, which form in areas that have been regraded and topsoiled and which either (1) disrupt the approved postmining land use or the re-establishment of the vegetative cover, or (2) cause or contribute to a violation of water quality standards for receiving streams shall be filled, regraded, or otherwise stabilized; topsoil shall be replaced; and the areas shall be reseeded or replanted.

C. If it can be demonstrated to the director through acceptable data, that erosion rates on the reclaimed and revegetated area are equal to or less than the erosion rates of surrounding undisturbed land under proper management of equal area, slope, soil type and depth, and that the rills and gullies will not affect compliance with all applicable parts of 19.8 NMAC, the director may waive the requirement of Subsection B of 19.8.20.2059 NMAC.

[11-29-97; 19.8.20.2059 NMAC - Rn, 19 NMAC 8.2.20.2059, 9-29-2000]

19.8.20.2060 REVEGETATION: GENERAL REQUIREMENTS:

A. Each person who conducts surface coal mining operations shall establish on all affected land a diverse, effective, and permanent vegetative cover of the same aspection native to the area of disturbed land or species that supports the approved postmining land use. For areas designated as prime farmland, the requirements of 19.8.24 NMAC shall apply.

B. All revegetation shall be in compliance with the plans submitted under 19.8.9.906 NMAC and 19.8.9.908 NMAC, as approved by the director in the permit, and carried out in a manner that encourages a prompt vegetative cover and recovery of productivity levels compatible with the approved postmining land use.

(1) All disturbed land, except water areas and surface areas of roads that are approved as a part of the postmining land use, shall be seeded or planted to achieve a permanent vegetative cover of the same aspection native to the area of disturbed land.

(2) The vegetative cover shall be capable of stabilizing the soil surface from erosion.

(3) Vegetative cover shall be considered of the same aspection when it consists of a mixture of species of equal or superior utility for the approved postmining land use, when compared with the utility of naturally occurring vegetation during each season of the year.

(4) If both the premining and postmining land uses are cropland, the reclaimed land shall have the capability of meeting or exceeding the pre-mining crop production.

C. The re-established plant species shall:

(1) be compatible with the approved postmining land use;

(2) have the same seasonal characteristics of growth as the original vegetation;

(3) be capable of self-regeneration and plant succession;

(4) be compatible with the plant and animal species of the area; and

(5) meet the requirements of applicable state and federal seed, poisonous and noxious plant, and introduced species laws or regulations.

[11-29-97; 19.8.20.2060 NMAC - Rn, 19 NMAC 8.2.20.2060, 9-29-2000]

19.8.20.2061 REVEGETATION: USE OF INTRODUCED SPECIES:

Introduced species may be substituted for native species only if approved by the director under the following conditions:

A. after appropriate field trials have demonstrated that the introduced species are desirable and necessary to achieve the approved postmining land use;

B. the species are necessary to achieve a quick, temporary, and stabilizing cover that aids in controlling erosion; and measures to establish permanent vegetation are included in the approved plan submitted under Paragraph (3) of Subsection B of 19.8.9.906 and 19.8.9.908;

C. introduced species must meet the requirements of Subsection C of 19.8.20.2060 NMAC;

D. the species meet the requirements of applicable state and federal seed, poisonous and noxious plant, and introduced species laws or regulations.

[11-29-97; 19.8.20.2061 NMAC - Rn, 19 NMAC 8.2.20.2061, 9-29-2000]

19.8.20.2062 REVEGETATION: TIMING:

Seeding and planting of disturbed areas shall be conducted during the first normal period for favorable planting conditions after final preparation. The normal period for favorable planting shall be that planting time generally accepted locally for the type of plant materials selected. When necessary to effectively control erosion, any disturbed area shall be seeded and planted, as contemporaneously as practicable with the completion of backfilling and grading, with a temporary cover of small grains, grasses, or legumes until a permanent cover is established.

[11-29-97; 19.8.20.2062 NMAC - Rn, 19 NMAC 8.2.20.2062, 9-29-2000]

19.8.20.2063 REVEGETATION: MULCHING AND OTHER SOIL STABILIZING PRACTICES:

A. Suitable mulch and other soil stabilizing practices shall be used on all regraded and topdressed areas to control erosion, promote germination of seeds, or increase the moisture retention capacity of the soil. The director may, on a case-by-case basis, suspend the requirement for mulch, if the permittee can demonstrate that alternative procedures will achieve the requirements of 19.8.20.2065 NMAC and do not cause or contribute to air or water pollution.

B. When required by the director mulches shall be mechanically or chemically anchored to the soil surface to assure effective protection of the soil and vegetation.

C. Annual grasses and grains may be use alone, as in situ mulch, or in conjunction with another mulch, when the director determines that they will provide adequate soil

erosion control and will later be replaced by perennial species approved for the postmining land use.

D. Chemical soil stabilizers alone, or in combination with appropriate mulches, may be used in conjunction with vegetative covers approved for the postmining land use.

[11-29-97; 19.8.20.2063 NMAC - Rn, 19 NMAC 8.2.20.2063, 9-29-2000]

19.8.20.2064 REVEGETATION: GRAZING:

When the approved postmining land use is range or pasture land, the operator shall demonstrate to the director, that the reclaimed land has the capability of supporting livestock grazing at rates approximately equal to that for similar non-mined lands for at least two of the last four full years of liability required under Subsection B of 19.8.20.2065 NMAC.

[11-29-97; 19.8.20.2064 NMAC - Rn, 19 NMAC 8.2.20.2064 & A, 9-29-2000]

19.8.20.2065 REVEGETATION: STANDARDS FOR SUCCESS:

A. Success of revegetation shall be measured by techniques identified in the director's "coal mine reclamation program vegetation standards", as approved by the director after consultation with appropriate state and federal agencies. Comparison of ground cover and productivity shall be made on the basis of reference areas or technical standards developed using an historic record of premining conditions.

B. Liability period, ground cover and productivity standards, and normal husbandry practices.

(1) Ground cover and productivity of living plants on the revegetated area within the permit area shall be equal to the ground cover and productivity of living plants on the approved reference area or to technical standards developed in accordance with the "coal mine reclamation program vegetation standards", as approved by the director. The period of extended responsibility under the performance bond requirements of 19.8.14 NMAC begins after the last year of augmented seeding, fertilizing, irrigation, or other work, excluding husbandry practices that are approved by the director in accordance with Paragraph (6) of Subsection B of 19.8.20.2065 NMAC.

(2) In areas of more than 26.0 inches average annual precipitation, the period of liability under the performance bond requirements of 19.8.14 NMAC shall continue for not less than five full years. Ground cover and productivity shall equal or exceed the approved standard for two of the last four years of the responsibility period.

(3) In areas of less than or equal to 26.0 inches average annual precipitation, the period of liability under the performance bond requirements of 19.8.14 NMAC shall continue for not less than 10 full years. Ground cover and productivity shall equal the

approved standard for at least two of the last four years, starting no sooner than year eight of the responsibility period.

(4) For purposes of Paragraphs (1), (2) and (3) of Subsection B of 19.8.20.2065 NMAC, the average annual precipitation can be determined either:

(a) by interpolation, using standard techniques, from mean annual precipitation map, page 97, "the national atlas of the United States", U.S. department of the interior, geological survey, 1970; or from "climatic atlas of the United States", U.S. department of commerce, national oceanic and atmospheric administration, 1974; or from long-term precipitation averages from climatological data, U.S. department of commerce, national oceanic and atmospheric administration; or from other official records; or

(b) based on at least 10 years of continuous and reliable precipitation records from stations located in or adjacent to the permit area.

(5) The ground cover and productivity of the revegetated area shall be considered equal if they are at least 90 percent of the ground cover and productivity of the reference area with 90 percent statistical confidence, or ground cover, productivity, or shrubland stocking are at least 90 percent of the standards developed under Subsection A of 19.8.20.2065 NMAC for an historic record. Exceptions may be authorized by the director under the following standards:

(a) for previously mined areas that were not reclaimed to the requirements of 19.8.20 NMAC, as a minimum the ground cover of living plants shall not be less than can be supported by the best available topdressing in the reaffected area, shall not be less than the ground cover existing before redisturbance, and shall be adequate to control erosion;

(b) for areas to be developed for industrial or residential use less than 2 years after regrading is completed, the ground cover of living plants shall not be less than required to control erosion; and

(c) for areas to be used for cropland, success in revegetation of cropland shall be determined on the basis of crop production from the mined area as compared to approved reference areas or other technical guidance procedures; crop production from the mined area shall be equal to or greater than that of the approved standard for two of the last four growing seasons of the 5 or 10 year liability period established in Paragraphs (1), (2) and (3) of Subsection B of 19.8.20.2065 NMAC, starting no sooner than year eight of the 10-year liability period; the applicable 5 or 10 year period of responsibility for revegetation shall commence at the date of initial planting of the crop being grown;

(d) on areas to be developed for fish and wildlife management, recreation, shelterbelts or forestland, success of vegetation shall be determined on the basis of

tree, shrub, or half-shrub stocking and ground cover; the tree, shrub, or half-shrub stocking shall meet the standards described in 19.8.20.2066 NMAC; vegetative ground cover shall not be less than that required by the director under Subsections A and B of 19.8.20.2065 NMAC to meet the post mining land use; 19.8.20.2065 NMAC shall determine the responsibility period and the frequency of ground cover measurement.

(6) The director has the discretion to approve selective husbandry practices without extending the period of responsibility for revegetation success or bond liability. Husbandry practices are those activities that can be expected to continue as part of the post mining land use, and are employed within the region for unmined lands having land uses similar to the approved postmining land use of the disturbed area, to control disease, pest and vermin and appropriate pruning, reseeding, and transplanting activities. Practices may also be allowed that will not reduce the probability of permanent revegetative success if they are discontinued after the liability period expires. Any practice the director determines to be augmented seeding, fertilization or irrigation shall not be considered a husbandry practice.

C. The person who conducts surface coal mining operations shall:

(1) maintain any necessary fences and proper management practices; and

(2) conduct periodic measurements of vegetation, soils, and water prescribed or approved by the director, to identify conditions during the applicable period of liability specified in Subsection B of 19.8.20.2065 NMAC.

[11-29-97; A, 12-15-99; 19.8.20.2065 NMAC - Rn, 19 NMAC 8.2.20.2065 & A, 9-29-2000; A, 12-31-2007]

19.8.20.2066 REVEGETATION: TREE AND SHRUB STOCKING:

19.8.20.2066 NMAC sets forth forest resource conservation standards for reforestation operations to ensure that a cover of commercial tree species, noncommercial tree species, shrubs, or half-shrubs is established for the development of fish and wildlife habitat, recreation, shelterbelts or forestry after surface coal mining operations. Trees and shrubs used in determining the success of stocking and the adequacy of plant arrangement shall have utility for the approved postmining land use.

A. At a minimum, at the time of final bond release, at least 80 percent of all trees and shrubs used to determine revegetation success has been in place for at least 60 percent of the applicable minimum period of responsibility.

B. Stocking, i.e., the number of stems per unit area, will be determined using the following criteria:

(1) root crown or root sprouts more than 1 foot in height shall count as one toward meeting the stocking requirements; where multiple stems occur only the tallest stem will be counted;

(2) a countable tree or shrub means a tree that can be used in calculating the degree of stocking under the following criteria:

(a) the tree or shrub shall be in place at least 2 growing seasons;

(b) the tree or shrub shall be alive and healthy; and

(c) the tree or shrub shall have at least one-third of its length in live crown;

(3) rock areas, which replace similar natural features, permanent road and surface water drainage ways on the revegetated area shall not require stocking.

C. The following are the minimum performance standards for areas where commercial forest land is the approved postmining land use:

(1) the area shall have a minimum stocking of trees or shrubs as determined by the state forester on a permit specific basis;

(2) a minimum of 75 percent of countable trees or shrubs shall be commercial tree species;

(3) the number of trees or shrubs and the ground cover shall be determined using procedures described in Subparagraph (d) of Paragraph (5) of Subsection B of 19.8.20.2065 NMAC and Subsection B of 19.8.20.2066 NMAC and the sampling methods approved by the director;

(4) upon expiration of the 5 or 10 year responsibility period and at the time of request for bond release, each permittee shall provide documentation showing that the stocking of trees and shrubs and the groundcover on the revegetated area satisfies 19.8.20.2065 and 2066 NMAC.

D. The following are the minimum performance standards for areas where woody plants are used for wildlife management, recreation, shelter belts, or forest uses other than commercial forest land:

(1) an inventory of trees, half-shrubs and shrubs shall be conducted to comply with 19.8.8.808 NMAC and 19.8.20.2060 NMAC according to methods approved by the director after consultation with and approval by the state forester and the department of game and fish; this inventory shall contain, but not be limited to:

(a) site quality;

- (b) stand size;
- (c) stand condition;
- (d) site and species relations; and
- (e) appropriate forest land utilization considerations.

(2) the stocking of trees, half-shrubs, shrubs, and the ground cover established on the revegetated area shall approximate the inventory pursuant to Subparagraph (d) of Paragraph (5) of Subsection B of 19.8.20.2065 NMAC and Paragraph (1) of Subsection D of 19.8.20.2066 NMAC and shall utilize local and regional recommendations regarding species composition, spacing and planting arrangement and shall be approved the director in consultation with and approval of the appropriate state agency responsible for the administration of forestry and wildlife programs, on a permit specific basis;

(3) upon expiration of the 5 or 10 year responsibility period and at the time of request for bond release, each permittee shall provide documentation showing that:

(a) the woody plants established on the revegetated site are equal to or greater than 90 percent of the stocking of live woody plants of the same life form ascertained pursuant to Subsection B of 19.8.20.2066 NMAC with 90 percent statistical confidence, using an appropriate (parametric or nonparametric) one-tail test with a 10 percent alpha error; and

(b) the groundcover on the revegetated area satisfies Subparagraph (d) of Paragraph (5) of Subsection B of 19.8.20.2065 NMAC; species diversity, aspection and regenerative capacity of the vegetation of the revegetated area shall be evaluated on the basis of the results which could reasonably be expected using the revegetation methods described in the mining and reclamation plan.

[11-29-97; 19.8.20.2066 NMAC - Rn, 19 NMAC 8.2.20.2066, 9-29-2000; A, 12-31-2007]

19.8.20.2067 SUBSIDENCE CONTROL: GENERAL REQUIREMENTS:

A. The permittee must either adopt measures consistent with known technology that prevent subsidence from causing material damage to the extent technologically and economically feasible, maximize mine stability, and maintain the value and reasonably foreseeable use of surface lands or adopt mining technology that provides for planned subsidence in a predictable and controlled manner.

B. If a permittee employs mining technology that provides for planned subsidence in a predictable and controlled manner, the permittee must take necessary and prudent measures, consistent with the mining method employed, to minimize material damage to the extent technologically and economically feasible to non-commercial buildings and

occupied residential dwellings and structures related thereto except that measures required to minimize material damage to such structures are not required if:

- (a) the permittee has the written consent of their owners, or;
- (b) unless the anticipated damage would constitute a threat to health or safety, the costs of such measures exceed the anticipated costs of repair.

C. Nothing in 19.8.20 NMAC prohibits the standard method of room-and-pillar mining.

D. The person engaged in underground mining activities shall comply with all provisions of the subsidence control plan prepared pursuant to 19.8.9.918 NMAC and approved by the director.

[11-29-97; 19.8.20.2067 NMAC - Rn, 19 NMAC 8.2.20.2067, 9-29-2000]

19.8.20.2068 SUBSIDENCE CONTROL: PUBLIC NOTICE:

The mining schedule shall be distributed by mail to all owners of property and residents residing within the permit area above the underground workings and adjacent areas. Each such person shall be notified by mail at least six months prior to mining beneath his property or residence. The notification shall contain, at a minimum:

- A. identification of specific areas in which mining will take place;
- B. dates that specific areas will be undermined; and
- C. the location or locations where the operator's subsidence control plan may be examined.

[11-29-97; 19.8.20.2068 NMAC - Rn, 19 NMAC 8.2.20.2068, 9-29-2000; A, 12-31-2007]

19.8.20.2069 SUBSIDENCE CONTROL: SURFACE OWNER PROTECTION:

A. The permittee must correct any material damage resulting from subsidence caused to surface lands, to the extent technologically and economically feasible, by restoring the land to a condition capable of maintaining the value and reasonably foreseeable uses that it was capable of supporting before subsidence damage.

B. The permittee must promptly replace any drinking, domestic or residential water supply that is contaminated, diminished or interrupted by underground mining activities conducted after October 24, 1992, if the affected well or spring was in existence before the date the regulatory authority received the permit application for the activities causing the loss, contamination or interruption. The baseline hydrologic information required in

19.8.9.907 NMAC will be used to determine the impact of mining activities upon the water supply.

C. The permittee must promptly repair, or compensate the owner for, material damage resulting from subsidence caused to any non-commercial building or occupied residential dwelling or associated structures that existed at the time of mining. If repair option is selected, the permittee must fully rehabilitate, restore or replace the damaged structure. If compensation is selected, the permittee must compensate the owner of the damaged structure for the full amount of the decrease in value resulting from the subsidence-related damage. The permittee may provide compensation by the purchase, before mining, of a non-cancelable premium-prepaid insurance policy. The requirements of Subsection C of 19.8.20.2069 NMAC apply only to subsidence-related damage caused by underground mining activities conducted after October 24, 1992.

D. The permittee must, to the extent required under applicable provisions of state law, either correct material damage resulting from subsidence caused to any structures or facilities not protected by Subsection C of 19.8.20.2069 NMAC by repairing the damage or compensate the owner of the structures or facilities for the full amount of the decrease in value resulting from the subsidence. Repair of damage includes rehabilitation, restoration, or replacement of damaged structures or facilities. Compensation may be accomplished by the purchase before mining of a non-cancelable premium-prepaid insurance policy.

[11-29-97; 19.8.20.2069 NMAC - Rn, 19 NMAC 8.2.20.2069, 9-29-2000]

19.8.20.2070 SUBSIDENCE CONTROL: REBUTTAL PRESUMPTION OF CAUSATION FOR DAMAGE FROM SUBSIDENCE:

A. If damage to any non-commercial building or occupied residential dwelling or associated structure occurs as a result of earth movement within an area determined by projecting a specified angle of draw from the outermost boundary of any underground mine workings to the surface of the land, a rebuttal presumption exists that the permittee caused the damage. The presumption will normally apply to a 30 degree angle of draw. A state regulatory authority may amend its program to apply the presumption to a different angle of draw if the regulatory authority shows in writing that the angle has a more reasonable basis than the 30 degree angle of draw, based on geotechnical analysis of the factors affecting potential surface impacts of underground coal mining operations.

B. A permittee or permit applicant may request that the presumption apply to a different angle of draw. The director may approve a request to vary from the 30-degree angle of draw based on a site-specific analysis submitted by an applicant. To establish a site-specific angle of draw, an applicant must demonstrate and the director must determine in writing that the proposed angle of draw has a more reasonable basis than the standard in Subsection A of 19.8.20.2070 NMAC, based on a site-specific geotechnical analysis of the potential surface impacts of the mining operation.

C. If the permittee was denied access to the land or property for the purpose of conducting the pre-subsidence survey in accordance with Subsection A of 19.8.9.918 NMAC, no rebuttal presumption will exist.

D. The presumption will be rebutted if, for example, the evidence establishes that:

- (1)** the damage predated the mining in question;
- (2)** the damage was proximately caused by some other factor or factors and was not proximately caused by subsidence; or,
- (3)** the damage occurred outside the surface area within which subsidence was actually caused by the mining in question.

E. In any determination whether damage to protected structures was caused by subsidence from underground mining, all relevant and reasonably available information will be considered by the regulatory authority.

[11-29-97; N, 12-15-99; 19.8.20.2070 NMAC - Rn, 19 NMAC 8.2.20.2070, 9-29-2000]

19.8.20.2071 SUBSIDENCE CONTROL: BUFFER ZONES:

A. Underground mining activities shall not be conducted beneath or adjacent to any perennial stream or impoundment having a storage volume of 20 acre-feet or more, unless the director, on the basis of detailed subsurface information, determines that subsidence will not cause material damage, or a reduction in a reasonably foreseeable use, to streams, water bodies and associated structures. If subsidence causes material damage, then measures will be taken to the extent technologically and economically feasible to correct the damage and to prevent additional subsidence from occurring. The director may suspend the underground mining until the subsidence control plan is modified to ensure prevention of further material damage to such features or facilities.

B. Underground mining activities beneath any aquifer, perennial stream or water body that serves as a significant source of water supply to a public water system shall be conducted so as to avoid disruption of the aquifer and consequent exchange of ground water between the aquifer and other strata. The director will prohibit mining in the vicinity of the aquifer or limit the percentage of coal extraction to protect the aquifer and other water supply, unless a finding can be made, based on detailed documentation, that subsidence will not cause material damage to, or reduce the reasonably foreseeable use of these features.

C. Underground mining activities shall not be conducted beneath or in close proximity to any public buildings, including but not limited to churches, schools, hospitals, courthouses and government offices, unless the director, on the basis of detailed subsurface information, determines that subsidence from those activities will

not cause material damage, or reduce a reasonably foreseeable use, to these structures and specifically authorizes the mining activities.

D. The director shall suspend underground coal mining under urbanized areas, cities, towns, and communities and adjacent to industrial or commercial buildings, major impoundments or perennial streams, if imminent danger is found to inhabitants of urbanized areas, cities, towns or communities.

[11-29-97; Rn, 19 NMAC 8.2.20.2070, 12-15-99; 19.8.20.2071 NMAC - Rn, 19 NMAC 8.2.20.2071 & A, 9-29-2000]

19.8.20.2072 SUBSIDENCE CONTROL: ADJUSTMENT OF BOND AMOUNT FOR SUBSIDENCE DAMAGE:

A. When subsidence-related material damage occurs to land, structures or facilities, or contamination, diminution, or interruption to a water supply protected under Subsections A through D of 19.8.20.2069 NMAC, the director must require the permittee to obtain additional performance bond in the amount of the estimated cost of the repairs if the permittee will be repairing, or in the amount of the decrease in value if the permittee will be compensating the owner, or in the amount of the estimated cost to replace the protected water supply if the permittee will be replacing the water supply, until the repair, compensation, or replacement is completed. If repair, compensation, or replacement is completed within 90 days of the occurrence of damage, no additional bond is required. The regulatory authority may extend the 90-day time frame, but not to exceed one year, if the permittee demonstrates and the regulatory authority finds in writing that subsidence is not complete, that not all probable subsidence-related material damage has occurred to lands or protected structures, or that not all reasonably anticipated changes have occurred affecting the protected water supply, and that therefore it would be unreasonable to complete within 90 days the repair of the subsidence-related material damage to lands or protected structures, or the replacement of protected water supply.

B. [RESERVED]

[11-29-97; N, 12-15-99; 19.8.20.2072 NMAC - Rn, 19 NMAC 8.2.20.2072, 9-29-2000]

19.8.20.2073 CESSATION OF OPERATIONS: TEMPORARY:

A. Each person who conducts surface coal mining operations shall effectively secure surface facilities and support and maintain any surface access openings to underground operations in areas in which there are no current operations, but in which operations are to be resumed under an approved permit. Temporary abandonment shall not relieve a person of his obligation to comply with any provisions of the approved permit.

B. Before temporary cessation of mining and reclamation operations for a period of thirty days or more, or as soon as it is known that a temporary cessation will extend beyond 30 days, persons who conduct surface coal mining operations shall submit to the director a notice of intention to cease or abandon mining and reclamation operations. This notice shall include a statement of the exact number of acres, and for underground mines the horizontal and vertical extent of subsurface strata which will have been affected in the permit area, prior to such temporary cessation, the extent and kind of reclamation of those areas which will have been accomplished and identification of the backfilling, regrading, revegetation, environmental monitoring, underground opening closures, and water treatment activities that will continue in the temporary cessation.

C. At the director's discretion, the permittee may be directed to take other reasonable actions consistent with 19.8 NMAC to ensure the protection of public safety and the environment while the operation is under temporary cessation.

D. No temporary cessation of mining and reclamation operations shall extend beyond the current permit term, unless the director approves an extension of the temporary cessation during the permit renewal process conducted in accordance with 19.8.13 NMAC.

E. To continue under a temporary cessation beyond an existing permit term, the permittee must demonstrate that the mining operation has a reasonable expectation of continuing operations.

F. A temporary cessation may not be used to justify a lengthy delay to final reclamation or to preserve facilities beyond what may be considered appropriate for its use in association with an existing permit.

[11-29-97; Rn, 19 NMAC 8.2.20.2071, 12-15-99; 19.8.20.2073 NMAC - Rn, 19 NMAC 8.2.20.2073, 9-29-2000; A, 7-30-2004]

19.8.20.2074 CESSATION OF OPERATIONS: PERMANENT:

A. Persons who cease surface coal mining operations permanently shall close or backfill or otherwise permanently reclaim all affected areas, in accordance with 19.8.2074 NMAC and the permit approved by the director.

B. All underground openings, equipment, structures, or other facilities not required for monitoring, unless approved by the director as suitable for the postmining land use or environmental monitoring, shall be removed and the affected land reclaimed.

C. [RESERVED]

D. [RESERVED]

E. [RESERVED]

F. [RESERVED]

[11-29-97; Rn, 19 NMAC 8.2.20.2072, 12-15-99; 19.8.20.2074 NMAC - Rn, 19 NMAC 8.2.20.2074, 9-29-2000]

19.8.20.2075 POSTMINING LAND USE:

A. General. All surface land areas affected shall be restored in a timely manner:

(1) to conditions that are capable of supporting the uses which they were capable of supporting before any mining; or

(2) to higher or better uses achievable under criteria and procedures of 19.8.2075 NMAC.

B. Determining premining use of land. The premining uses of land to which the postmining land use is compared shall be those uses which the land previously supported, if the land had not been previously mined and had been properly managed.

(1) The postmining land use for land that has been previously mined and not reclaimed shall be judged on the basis of a use which the land was capable of supporting prior to all previous mining, that is compatible with the surrounding areas.

(2) The postmining land use for land that has received improper management shall be judged on the basis of the premining use of surrounding lands that have received proper management.

(3) If the premining use of the land was changed within 5 years of the beginning of mining, the comparison of postmining use to premining use shall include a comparison with the historic use of the land as well as its use immediately preceding mining.

C. Prior to the release of lands from the permit area in accordance with 19.8.14.1413 NMAC, the permit area shall be restored in a timely manner, either to conditions capable of supporting the uses they were capable of supporting before any mining or to conditions capable of supporting approved alternative land uses. Alternative land uses may be approved by the director after consultation with the landowner or the land management agency having jurisdiction over the land if the following criteria are met:

(1) The proposed postmining land use is compatible with adjacent land use and, where applicable, with existing local, state, or federal land use policies and plans. A written statement of the views of the authorities with statutory responsibilities for land use policies and plans shall be submitted to the director no less than 60 days prior to

the proposed land use change. Any required approval including any necessary zoning or other changes required for land use by local, state or federal land management agencies is obtained and remains valid throughout the surface coal mining operations.

(2) Specific plans are prepared and submitted to the director which show the feasibility of the postmining land use as related to projected land use trends and markets and that include a schedule showing how the proposed use will be developed and achieved within a reasonable time after mining and will be sustained. The director may require appropriate demonstrations to show that the planned procedures are feasible, reasonable, and integrated with mining and reclamation, and that the plans will result in successful reclamation.

(3) Provisions of any necessary public facilities shall be ensured as evidenced by letters of commitment from parties other than the person who conducts surface coal mining operations, as appropriate, to provide the public facilities in a manner compatible with the plans submitted under 19.8.9.908 NMAC. The letters shall be submitted to the director no less than 60 days prior to the proposed land use change.

(4) Specific and feasible plans are submitted to the director which show that financing, attainment and maintenance of the postmining land use are feasible.

(5) Plans for the postmining land use are designed under the general supervision of a registered professional engineer or other appropriate professional who will ensure that the plans conform to applicable accepted standards for adequate land stability, drainage, vegetative cover, and aesthetic design appropriate for the postmining use of the site.

(6) The proposed use will neither present actual or probable hazard to public health or safety nor will it pose any actual or probable threat of water flow diminution or pollution.

(7) The use will not involve unreasonable delays in reclamation.

(8) Necessary approval of measures to prevent or mitigate adverse effects on fish, wildlife and related environmental values and threatened or endangered plants is obtained from the director, and appropriate state and federal fish and wildlife management agencies have been provided a 60-day period in which to review the plan.

(9) Proposals to change premining land uses of range, fish and wildlife habitat, forest land, hayland, or pasture to a postmining cropland use, where the cropland would require continuous maintenance such as seeding, plowing, cultivation, fertilization, or other similar practices to be practicable or to comply with applicable federal, state and local laws are reviewed by the director to ensure that:

(a) there is sufficient water available and committed to maintain crop production; and

(b) topdressing quality and depth are sufficient to support the proposed use.

D. [RESERVED]

E. [RESERVED]

[11-29-97; Rn, 19 NMAC 8.2.20.2073, 12-15-99; 19.8.20.2075 NMAC - Rn, 19 NMAC 8.2.20.2075, 9-29-2000]

19.8.20.2076 ROADS: GENERAL:

A. Road classification system.

(1) Each road shall be classified as either a primary road or an ancillary road.

(2) A primary road is any road which is:

(a) used for transporting coal or spoil, except for the portions of those roads located within coal spoil and coal processing waste disposal areas;

(b) frequently used for access or other purposes for a period in excess of six (6) months, with the exception of those roads the sole surface coal mining operation use of which is for exploration purposes; or

(c) to be retained for an approved postmining land use.

(3) An ancillary road is any road not classified as a primary road

B. Performance standards. Roads shall be located, designed, constructed, reconstructed, used, maintained and reclaimed so as to:

(1) control or prevent erosion, siltation and the air pollution attendant to erosion by vegetating or otherwise stabilizing all exposed surfaces in accordance with current, prudent engineering practice;

(2) control or prevent damage to fish, wildlife or their habitat and related environmental values;

(3) control or prevent additional contributions of suspended solids to stream flow or runoff outside the permit area;

(4) neither cause nor contribute to, directly or indirectly, the violation of state or federal water quality standards applicable to receiving waters;

(5) minimize the diminution to or degradation of the quality or quantity of surface and ground-water systems;

(6) refrain from significantly altering the normal flow of water in streambeds or drainage channels;

(7) prevent or control damage to public or private property; and

(8) use nonacid- or nontoxic-forming substances in road surfacing.

C. Design and construction limits and establishment of design criteria. To ensure environmental protection and safety appropriate for their planned duration and use, including consideration of the type and size of equipment used, the design and construction or reconstruction of roads shall incorporate appropriate limits for grade, width, surface materials, surface drainage control, culvert placement, culvert size, and any necessary design criteria established by the director.

D. Location.

(1) No part of any road shall be located in the channel of an intermittent or perennial stream unless specifically approved by the director in accordance with 19.8.20.2009 through 2012, and 2025 NMAC.

(2) Roads shall be located to minimize downstream sedimentation and flooding.

E. Maintenance.

(1) A road shall be maintained throughout its life to meet the performance standards of 19.8.20 NMAC and any additional criteria specified by the director.

(2) A road damaged by a catastrophic event, such as a flood or earthquake, shall be repaired as soon as practical after the damage has occurred.

F. Reclamation. A road not to be retained for use under an approved postmining land use shall be reclaimed immediately after it is no longer needed for mining and reclamation operations, including:

(1) closing the road to traffic;

(2) removing all bridges and culverts;

(3) restoring the natural drainage patterns;

(4) reshaping all cut and fill slopes to be compatible with the postmining land use and to complement the drainage pattern, of the surrounding terrain, and

(5) scarifying or ripping the roadbed; replacing topsoil or substitute material; and revegetating disturbed surfaces in accordance with 19.8.20.2005 through 2008 and 2060 through 2066 NMAC.

(6) removing or otherwise disposing of road surfacing materials that are incompatible with the postmining land use and revegetation requirements; and

(7) protecting the natural drainage patterns by installing dikes or cross drains as necessary to control surface runoff and erosion.

[11-29-97; Rn, 19 NMAC 8.2.20.2074, 12-15-99; 19.8.20.2076 NMAC - Rn, 19 NMAC 8.2.20.2076, 9-29-2000]

19.8.20.2077 PRIMARY ROADS:

Primary roads shall meet the requirements of 19.8.20.2076 NMAC and the additional requirements of 19.8.20.2077 NMAC.

A. Certification. The design and construction or reconstruction of primary roads shall be certified by a qualified registered professional engineer as meeting:

- (1) the requirements of 19.8.20.2076 NMAC;
- (2) current, prudent engineering practices; and
- (3) any design criteria established by the director; and
- (4) shall include a statement that the road has been constructed or reconstructed as designed and in accordance with the approved plan; and
- (5) at a minimum, a static factor of safety of 1.3 for all embankments.

B. Location.

(1) To minimize erosion, a primary road is to be located, insofar as practical, on the most stable available surfaces.

(2) Stream fords of perennial or intermittent streams by primary roads are prohibited unless they are specifically approved by the director as temporary routes during periods of road construction.

C. Drainage control.

(1) Each primary road shall be designed, constructed or reconstructed, and maintained to have adequate drainage control, using structures such as, but not limited to, bridges, ditches, cross drains, and ditch relief drains. The drainage control system

described in Paragraphs (1) through (6) of Subsection C of 19.8.20.2077 NMAC shall be designed to pass the peak runoff safely from a 10-year, 6-hour precipitation event or such greater event as may be specified by the director.

(2) Drainage pipes and culverts shall be constructed and maintained to avoid plugging or collapse and erosion at inlets and outlets.

(3) Drainage ditches shall be designed and maintained to prevent uncontrolled drainage over the road surface and embankment. Trash racks and debris basins shall be installed in the drainage ditches where debris from the drainage area may impair the functions of drainage and sediment control structures.

(4) Culverts shall be designed, installed, and maintained to sustain the vertical soil pressure, the passive resistance of the foundation, and the weight of vehicles using the road.

(5) Natural stream channels shall not be altered or relocated without the prior approval of the director in accordance with 19.8.20.2009 - 2012 and 2025 NMAC.

(6) Except as provided in Paragraph (2) of Subsection B of 19.8.20.2077 NMAC, structures for perennial or intermittent stream channel crossings shall be made using bridges, culverts, low-water crossings, or other structures designed, constructed, and maintained using current, prudent engineering practices. Low water crossings shall be designed, constructed, and maintained to prevent erosion of the structure or streambed and additional contributions of suspended solids to streamflow.

D. Surfacing. The surfacing of primary roads shall be rock, crushed gravel, asphalt, or other material approved by the director as being sufficiently durable for the anticipated volume of traffic and the weight and speed of vehicles using the road.

E. Maintenance. Routine maintenance for primary roads shall include repairs to the road surface, blading, filling potholes, and replacing surfacing material. It shall also include, as necessary, revegetation, brush removal, and minor reconstruction of road segments.

[11-29-97; Rn, 19 NMAC 8.2.20.2075, 12-15-99; 19.8.20.2077 NMAC - Rn, 19 NMAC 8.2.20.2077, 9-29-2000]

19.8.20.2078 OTHER TRANSPORTATION FACILITIES:

Railroad loops, spurs, sidings, surface conveyor systems, chutes, aerial tramways, or other transportation facilities shall be designed, constructed or reconstructed, and maintained and the area restored, to:

A. prevent, to the extent possible using the best technology currently available:

(1) damage to fish, wildlife, and related environmental values; and

(2) additional contributions of suspended solids to streamflow or runoff outside the permit area. Any such contributions shall not be in excess of limitations of state or federal law;

B. control and minimize diminution or degradation of water quality and quantity;

C. control and minimize erosion and siltation;

D. control and minimize air pollution; and

E. prevent damage to public or private property.

[11-29-97; Rn, 19 NMAC 8.2.20.2076, 12-15-99; 19.8.20.2078 NMAC - Rn, 19 NMAC 8.2.20.2078, 9-29-2000]

19.8.20.2079 SUPPORT FACILITIES AND UTILITY INSTALLATIONS:

A. Support facilities required for, or used incidentally to, the operation of the mine, including, but not limited to, mine buildings, coal loading facilities at, or near, the mine site, coal storage facilities, equipment storage facilities, fuel storage facilities, chemical and lubricant storage facilities, fan buildings, hoist buildings, preparation plants, sheds, shops, and other buildings, shall be designed, constructed or reconstructed, and located to prevent or control erosion and siltation, water pollution and damage to public or private property. Support facilities shall be designed, constructed or reconstructed, maintained, and used in a manner which prevents to the extent possible using the best technology currently available damage to fish, wildlife, and related environmental values and additional contributions of suspended solids to streamflow outside the permit area. Any such contributions shall not be in excess of limitations of state or federal law.

B. All surface coal mining operations shall be conducted in a manner which minimizes damage, destruction, or disruption of services provided by oil, gas, and water wells, oil, gas, and coal-slurry pipelines; railroads; electric and telephone lines; and water and sewage lines which pass over, under or through the permit area, unless otherwise approved by the owner of those facilities and the director.

[11-29-97; Rn, 19 NMAC 8.2.20.2077, 12-15-99; 19.8.20.2079 NMAC - Rn, 19 NMAC 8.2.20.2079, 9-29-2000]

PART 21: SPECIAL PERFORMANCE STANDARDS - CONCURRENT SURFACE AND UNDERGROUND MINING

19.8.21.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.21.1 NMAC - N, 9-29-2000]

19.8.21.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979)

[19.8.21.2 NMAC - N, 9-29-2000]

19.8.21.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979)

[19.8.21.3 NMAC - N, 9-29-2000]

19.8.21.4 DURATION:

Permanent

[19.8.21.4 NMAC - N, 9-29-2000]

19.8.21.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.21.5 NMAC - N, 9-29-2000]

19.8.21.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.21.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.21.7 DEFINITIONS:

[RESERVED]

[19.8.21.7 NMAC - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.21.8-19.8.21.2099 [RESERVED]:

[19.8.21.8 - 19.8.21.2099 NMAC - N, 9-29-2000]

19.8.21.2100 APPLICABILITY:

A variance under this part applies only to those specific areas within the permit area that the person conducting combined surface and underground mining operations has shown to be necessary for implementing the proposed concurrent operations and that the director has approved in the permit under 19.8.10.1005 NMAC. The variance is effective for any particular portion of the permit area only for the time necessary to facilitate and to complete the authorized underground mining activities.

[11-29-97; 19.8.21.2100 NMAC- Rn, 19 NMAC 8.2.21.2100, 9-29-2000]

19.8.21.2101 COMPLIANCE WITH VARIANCE TERMS:

A. Each person who conducts operations under a variance issued under 19.8.10.1005 NMAC shall comply with all applicable requirements of this part and the act and these rules and regulations except to the extent that:

(1) a delay in compliance with these requirements is specifically authorized by the variance issued under the permit; and

(2) the delay in compliance is necessary to achieve the purposes for which the variance was granted.

B. Each person who conducts operations under a variance issued under 19.8.10.1005 NMAC shall comply with each requirement of the variance as set forth in the permit.

[11-29-97; 19.8.21.2101 NMAC- Rn, 19 NMAC 8.2.21.2101, 9-29-2000]

19.8.21.2102 ADDITIONAL PERFORMANCE STANDARDS:

In addition to the requirements of 19.8.20 NMAC, each person who conducts combined surface and underground mining operations shall comply with the following:

A. A 500-foot barrier pillar of coal shall be maintained between the surface and underground mining activities in any one seam. The director and the mine safety and health administration, and the state mine inspector, may, however, approve a lesser distance, after finding by the director that mining at a lesser distance will result in:

(1) improved coal resources recovery;

(2) abatement of water pollution; or

(3) elimination of hazards to the health and safety of the public.

B. The vertical distance between combined surface and underground mining activities working separate seams shall be sufficient to provide for the health and safety of the workers and to prevent surface water from entering the underground workings.

C. No combined activities shall reduce the protection provided public health and safety below the level of protection required for those activities if conducted without a variance.

[11-29-97; 19.8.21.2102 NMAC- Rn, 19 NMAC 8.2.21.2102, 9-29-2000]

PART 22: SPECIAL PERFORMANCE STANDARDS - AUGER MINING

19.8.22.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.22.1 NMAC - N, 9-29-2000]

19.8.22.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979)

[19.8.22.2 NMAC - N, 9-29-2000]

19.8.22.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979)

[19.8.22.8 - 19.8.22.2199 NMAC - N, 9-29-2000]

19.8.22.2200 AUGER MINING: ADDITIONAL PERFORMANCE STANDARDS:

A. Any auger mining associated with surface mining operations shall be conducted to maximize recoverability of mineral reserves remaining after the mining activities are completed. Each person who conducts auger mining operations shall leave areas of undisturbed coal to provide access for removal of those reserves by future underground mining activities, unless the director determines that the coal reserves have been depleted or are limited in thickness or extent to the point that it will not be practicable to recover the remaining coal reserves. The director shall make such determination only upon presentation of appropriate technical evidence by the operator. Undisturbed areas of coal shall be left in unmined sections which:

(1) are a minimum of 250 feet wide at any point between each group of auger openings to the full depth of the auger hole;

(2) are no more than 2,500 feet apart, measured from the center of one section to the center of the next section, unless a greater distance is set forth in the permit application under 19.8.10.1007 NMAC and approved by the director; and

(3) for multiple seam mining, shall have a width of at least 250 feet plus 50 feet for each subjacent workable coal seam. The centers of all unmined sections shall be aligned vertically.

B. No auger hole shall be made closer than 500 feet in horizontal distance to any abandoned or active underground mine workings, except as approved in accordance with 19.8.20.2038 NMAC.

C. In order to prevent pollution of surface and ground water and to reduce fire hazards, each auger hole, except as provided in Subsection D of 19.8.22.2200 NMAC, shall be plugged so as to prevent the discharge of water from the hole and access of air to the coal, as follows:

(1) each auger hole discharging water containing toxic-forming or acid-forming material shall be plugged within 72 hours after completion by backfilling and compacting noncombustible and impervious material into the hole to a depth sufficient to form a water-tight seal or the discharge shall be treated commencing within 72 hours after completion to meet applicable effluent limitations and water quality standards under 19.8.20.2010 NMAC, until the hole is properly sealed; and

(2) each auger hole not discharging water shall be sealed as in Paragraph (1) of Subsection C of 19.8.22.2200 NMAC, to close the opening within 30 days following completion.

D. An auger hole need not be plugged, if the director finds:

(1) impoundment of the water which would result from plugging the hole may create a hazard to the environment or public health or safety; and

(2) drainage from the auger hole will not pose a threat of pollution to surface water and will comply with the requirements of 19.8.20.2009 and 2010 NMAC.

E. The director shall prohibit auger mining if he determines that:

(1) adverse water quality impacts cannot be prevented or corrected;

(2) fill stability cannot be achieved;

(3) the prohibition is necessary to maximize the utilization, recoverability or conservation of the solid fuel resources; or

(4) subsidence resulting from auger mining may disturb or damage powerlines, pipelines, buildings, or other facilities.

[19.8.23.5 NMAC - N, 9-29-2000]

19.8.23.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

19.8.23.8-19.8.23.2299 [RESERVED]:

[19.8.23.8 - 19.8.23.2299 NMAC - N, 9-29-2000]

19.8.23.2300 ALLUVIAL VALLEY FLOORS: ESSENTIAL HYDROLOGIC FUNCTIONS:

A. Surface coal mining and reclamation operations shall be conducted to preserve, throughout the mining and reclamation process, the essential hydrologic functions of alluvial valley floors not within an affected area. These functions shall be preserved by maintaining those geologic, hydrologic and biologic characteristics that support those functions.

B. Surface coal mining and reclamation operations shall be conducted to reestablish, throughout the mining and reclamation process, the essential hydrologic functions of alluvial valley floors within an affected area. These functions shall be reestablished by reconstructing those geologic, hydrologic and biologic characteristics that support those functions.

C. The characteristics that support the essential hydrologic, functions of alluvial valley floors are those in Paragraph (3) of Subsection B of 19.8.10.1006 NMAC and those other geologic, hydrologic, or biologic characteristics identified during premining investigations or monitoring conducted during the surface coal mining and reclamation operation.

[11-29-97; 19.8.23.2300 NMAC- Rn, 19 NMAC 8.2.23.2300, 9-29-2000]

19.8.23.2301 ALLUVIAL VALLEY FLOORS: PROTECTION OF FARMING AND WATER SUPPLIES:

A. Surface coal mining and reclamation operations shall not interrupt, discontinue, or preclude farming on alluvial valley floors, unless:

(1) the premining land use is undeveloped rangeland which is not significant to farming; or

(2) the area of affected alluvial valley floor is small and provides or may provide negligible support for production from one or more farms.

B. If environmental monitoring shows that a surface coal mining operation is interrupting, discontinuing, or precluding farming on alluvial valley floors, the operation shall cease until remedial measures are taken by the person who conducts the operation. The remedial measures shall be approved by the director prior to the resumption of mining.

C. Surface coal mining and reclamation operations shall not cause material damage to the quality or quantity of water in surface or underground water systems that supply alluvial valley floors. If environmental monitoring shows that the surface coal mining operation is causing material damage to water that supplies alluvial valley floors, the mining operations shall cease until remedial measures are taken by the person who

conducts the operation. The remedial measures shall be approved by the director prior to the resumption of mining operations.

D. Subsections A and B of 19.8.23.2301 NMAC do not apply to those lands which were identified in a reclamation plan approved by the state prior to August 3, 1977 for any surface coal mining and reclamation operation that, in the year preceding August 3, 1977:

(1) produced coal in commercial quantities and was located within or adjacent to an alluvial valley floor, or

(2) obtained specific permit approval by the New Mexico coal surface mining commission to conduct surface coal mining and reclamation operations within an alluvial valley floor.

[11-29-97; 19.8.23.2301 NMAC- Rn, 19 NMAC 8.2.23.2301, 9-29-2000]

19.8.23.2302 ALLUVIAL VALLEY FLOORS: PROTECTION OF AGRICULTURAL USES:

Surface coal mining and reclamation operations shall be conducted to ensure that the agricultural utility and the level of productivity of alluvial valley floors in affected areas are reestablished.

[11-29-97; 19.8.23.2302 NMAC- Rn, 19 NMAC 8.2.23.2302, 9-29-2000]

19.8.23.2303 ALLUVIAL VALLEY FLOORS: MONITORING:

A. An environmental monitoring system shall be installed, maintained and operated by the permittee on all alluvial valley floors during surface coal mining and reclamation operations and continued until all bonds are released in accordance with 19.8.14 NMAC. The monitoring system shall provide sufficient information to allow the director to determine that:

(1) the agricultural utility and production of the alluvial valley floor not within the affected area is being preserved;

(2) the potential agricultural utility and production on the alluvial valley floor within the affected area has been reestablished;

(3) the important characteristics supporting the essential hydrologic functions of the alluvial valley floor in the affected area have been reestablished after mining; and

(4) the important characteristics supporting the essential hydrologic functions of an alluvial valley floor in areas not affected are preserved during and after mining.

B. Monitoring shall be performed at adequate frequencies, to indicate long-term trends that could affect agricultural use of the alluvial valley floor.

C. Monitoring shall be performed during operations, to identify characteristics of the alluvial valley floor not identified in the permit application and to evaluate the importance of all characteristics.

D. All monitoring data collected and analyses thereof shall routinely be made available to the director.

[19.8.24.8 - 19.8.24.2399 NMAC - N, 9-29-2000]

19.8.24.2400 PRIME FARMLAND: SPECIAL REQUIREMENTS:

Surface coal mining and reclamation operations conducted on prime farmland shall meet the following requirements:

A. a permit shall be obtained for those operations under 19.8.10.1004 NMAC;

B. soil materials to be used in the reconstruction of the prime farmland soil shall be removed before drilling, blasting or mining, in accordance with 19.8.24.2401 NMAC and in a manner that prevents mixing or contaminating these materials with undesirable material; where removal of soil materials results in erosion that may cause air and water pollution, the director shall specify methods to control erosion of exposed overburden;

C. the aggregate total prime farmland acreage shall not be decreased from that which existed prior to mining; water bodies, if any, to be constructed during mining and reclamation operations must be located within the post-reclamation non-prime farmland portions of the permit area; the creation of any such water bodies must be approved by the regulatory authority and the consent of all affected property owners within the permit area must be obtained.

[11-29-97; 19.8.24.2400 NMAC- Rn, 19 NMAC 8.2.24.2400, 9-29-2000; A, 1-15-2002]

19.8.24.2401 PRIME FARMLAND: SOIL REMOVAL:

A. Surface coal mining and reclamation operations on prime farmland shall be conducted to:

(1) separately remove the entire A horizon or other suitable soil material which will create a final soil having a greater productive capacity than that which existed prior to mining;

(2) separately remove the B horizon of the soil, a combination of B horizon and underlying C horizon, or other suitable soil material that will create a reconstructed soil of equal or greater productive capacity than that which existed before mining;

(3) separately remove the underlying C horizons, other strata, or a combination of horizons or other strata to be used instead of the B horizon; when replaced, these combinations shall be equal to, or more favorable for plant growth than the B horizon.

B. The minimum depth of soil and soil material to be removed for use in reconstruction of prime farmland soils shall be sufficient to meet the soil replacement requirements of Subsection A of 19.8.24.2403 NMAC.

[11-29-97; 19.8.24.2401 NMAC- Rn, 19 NMAC 8.2.24.2401, 9-29-2000]

19.8.24.2402 PRIME FARMLAND: SOIL STOCKPILING:

If not utilized immediately the A horizon or other suitable soil materials specified in Paragraph (1) of Subsection A of 19.8.24.2401 NMAC and the B horizon or other suitable soil materials specified in Paragraphs (2) and (3) of Subsection A of 19.8.24.2401 NMAC shall be stored separately from each other and from spoil. These stockpiles shall be placed within the permit area where they are not disturbed or exposed to excessive water or wind erosion before the stockpiled horizons can be redistributed. Stockpiles in place for more than 30 days shall meet the requirements of 19.8.20.2006 NMAC.

[11-29-97; 19.8.24.2402 NMAC- Rn, 19 NMAC 8.2.24.2402, 9-29-2000]

19.8.24.2403 PRIME FARMLAND: SOIL REPLACEMENT:

Surface coal mining and reclamation operations on prime farmland shall be conducted according to the following:

A. the minimum depth of soil and soil material to be reconstructed for prime farmland shall be 48 inches, or a depth equal to the depth of a subsurface horizon in the natural soil that inhibits root penetration, whichever is shallower; the director shall specify a depth greater than 48 inches, wherever necessary to restore productive capacity due to uniquely favorable soil horizons at greater depths; soil horizons shall be considered as inhibiting root penetration if their densities, chemical properties, or water

supplying capacities restrict or prevent penetration by roots of plants common to the vicinity of the permit area and have little or no beneficial effect on soil productive capacity;

B. replace soil material only on land which has been first returned to final grade and scarified according to 19.8.20.2054 through 2058 NMAC, unless site-specific evidence is provided and approved by the director showing that scarification will not enhance the capability of the reconstructed soil to achieve equivalent or higher levels of yield;

C. replace the soil horizons or other suitable soil material in a manner that avoids excessive compaction;

D. replace the B horizon or other suitable material specified in Paragraphs (2) and (3) of Subsection A of 19.8.24.2401 NMAC to the thickness needed to meet the requirements of Subsection A of 19.8.24.2401 NMAC;

E. replace the A horizon or other suitable soil materials specified in Paragraph (1) of Subsection A of 19.8.24.2401 NMAC as the final surface soil layer; this surface soil layer shall equal or exceed the thickness of the original soil, as determined in 19.8.10.1004 NMAC, and be replaced in a manner that protects the surface layer from wind and water erosion before it is seeded or planted;

F. apply nutrients and soil amendments as needed to quickly establish vegetative growth.

[11-29-97; 19.8.24.2403 NMAC- Rn, 19 NMAC 8.2.24.2403, 9-29-2000]

19.8.24.2404 PRIME FARMLAND: REVEGETATION:

Each person who conducts surface coal mining and reclamation operations on prime farmland shall meet the following revegetation requirements during reclamation:

A. following soil replacement, that person shall establish a vegetative cover capable of stabilizing the soil surface with respect to erosion; all vegetation shall be in compliance with the plan approved by the director under 19.8.10.1004 NMAC and carried out in a manner that encourages prompt vegetative cover and recovery of productive capacity; the timing and mulching provisions of 19.8.20.2062 and 2063 NMAC shall be met;

B. within a time period specified in the permit, but not to exceed 10 years after completion of backfilling and rough grading, any portion of the permit area which is prime farmland must be used for crops commonly grown, such as corn, alfalfa, permanent pasture grain, sorghum, wheat, oats, barley, or other crops on surrounding prime farmland; the crops may be grown in rotation with any or pasture crops as defined for cropland; the director may approve a crop use of perennial plants for hay, where this

is a common long-term use of prime farmland soils in the surrounding area; the level of management shall be equivalent to that on which the target yields are based;

C. measurement of success in prime farmland revegetation will be determined based upon the techniques approved in the permit by the director under 19.8.10.1004 NMAC; as a minimum, the following standards shall be met:

(1) average annual crop production shall be determined based upon a minimum of 3 years data; crop production shall be measured for the three years immediately prior to release of bond according to 19.8.14 NMAC;

(2) revegetation on prime farmland shall be considered achieved when the average yield during the measurement period equals or exceeds the average yield of the reference crop established for the same period for non-mined soils of the same or similar texture or slope phase of the soil series in the surrounding area under equivalent management practices;

(3) the reference crop on which restoration of soil productivity is proven shall be selected from the crops most commonly produced on the surrounding prime farmland; where row crops are the dominant crops grown on prime farmland in the area, the row crop requiring the greatest rooting depth shall be chosen as one of the reference crops;

(4) reference crop yields for a given crop season are to be determined from:

(a) the current yield records of representative local farms in the surrounding area, with concurrence by the U.S. natural resources conservation service; or

(b) the average county yields recognized by the U.S. department of agriculture, which have been adjusted by the U.S. natural resources conservation service for local yield variation within the county that is associated with differences between non-mined prime farmland soil and all other soils that produce the reference crop.

(5) under either procedure in Paragraph (4) of Subsection C of 19.8.24.2404 NMAC, the average reference crop yield may be adjusted, with the concurrence of the U.S. natural resources conservation service for:

(a) disease, pest, and weather-induced seasonal variations; or

(b) differences in specific management practices where the overall management practices of the crops being compared are equivalent;

(6) a statistically valid sampling technique at a 90-percent or greater statistical confidence level shall be used as approved by the director in consultation with U.S. natural resources conservation service.

[11-29-97; 19.8.24.2404 NMAC- Rn, 19 NMAC 8.2.24.2404, 9-29-2000; A, 12-31-2007]

19.8.25.2500 MOUNTAIN TOP REMOVAL: PERFORMANCE STANDARDS:

Surface coal mining activities may be conducted under a variance from the requirement of this part for restoring affected areas to their approximate original contour, if:

- A.** the director grants the variance under a permit in accordance with 19.8.10.1001 NMAC;
- B.** the activities involve the mining of an entire coal seam running through the upper fraction of a mountain, ridge, or hill, by removing all of the overburden and creating a level plateau or gently rolling contour with no highwalls remaining;
- C.** an industrial, commercial, agricultural, residential, or public facility (including recreational facilities) use is proposed and approved for the affected land;
- D.** the alternative land use requirements of 19.8.20.2073 NMAC are met;
- E.** all applicable requirements of this part, the act and 19.8.1 through 19.8.35 NMAC, other than the requirement to restore affected areas to their approximate original contour, are met;
- F.** an outcrop barrier of sufficient width, consisting of the toe of the lowest coal seam, and its associated overburden, are retained to prevent slides and erosion, except that the director may permit an exemption to the retention of the coal barrier requirement if the following conditions are satisfied:

(1) the proposed mine site was mined prior to May 3, 1978, and the toe of the lowest seam has been removed;

(2) a coal barrier adjacent to a head-of-hollow fill may be removed after the elevation of a head-of-hollow fill attains the elevation of the coal barrier if the head-of-hollow fill provides the stability otherwise ensured by the retention of a coal barrier; or

(3) the operator demonstrates to the director, and the director determines that no outcrop barrier is necessary to prevent slides and erosion.

G. the final graded slopes on the mined area are less than 1v:5h, so as to create a level plateau or gently rolling configuration, and the outcrops of the plateau do not exceed 1v:2h except where engineering data substantiates, and the director finds, in writing, and includes in the permit under 19.8.10.1001 NMAC, that a minimum static safety factor of 1.5 will be attained;

H. the resulting level or gently rolling contour is graded to drain inward from the outslope, except at specified points where it drains over the outslope in stable and protected channels. The drainage shall not be through or over a valley fill or head-of-hollow fill;

I. natural watercourse below the lowest coal seam mined are not damaged;

J. all waste and acid-forming or toxic-forming materials, including the strata immediately below the coal seam, are covered with non-toxic spoil to prevent pollution and achieve the approved postmining land use; and

K. spoil is placed on the mountaintop bench as necessary to achieve the postmining land use approved under Paragraphs (3) and (4) of Subsection A of 19.8.25.2500 NMAC. All excess spoil material not retained on the mountaintop shall be placed in accordance with 19.8.20.2020 and 2034 through 2037 NMAC.

[19.8.26.8 NMAC - 19.8.26.2599 NMAC - N, 9-29-2000]

19.8.26.2600 APPLICABILITY:

A. Any surface coal mining and reclamation operations on steep slopes shall meet the requirements of this part.

B. The standards of this part do not apply to mining conducted on a flat or gently rolling terrain with an occasional steep slope through which the mining proceeds and leaves a plain or predominantly flat area, or to operations covered by 19.8.25 NMAC.

[11-29-97; 19.8.26.2600 NMAC -Rn, 19 NMAC 8.2.26.2600, 9-29-2000]

19.8.26.2601 STEEP SLOPES: PERFORMANCE STANDARDS:

Surface coal mining and reclamation operations subject to this part shall comply with requirements of 19.8.5 NMAC and the following, except to the extent a variance is approved under 19.8.26.2602 NMAC.

A. Materials not allowed on downslopes.

(1) The person engaged in surface coal mining and reclamation operations shall prevent the following materials from being placed or allowed to remain on the downslope:

- (a)** spoil;
 - (b)** waste materials, including waste mineral matter;
 - (c)** debris, including that from clearing the grubbing of haul road construction;
- and
- (d)** abandoned or disabled equipment.

(2) Nothing in this subsection shall prohibit the placement of material in road embankments located on the downslope, so long as the materials used and embankment design comply with the requirements of 19.8.20.2076 through 2078 NMAC and the material is moved and placed in a controlled manner.

B. The highwall shall be completely covered with compacted spoil and the disturbed area graded to comply with the provisions of 19.8.20.2054 through 2059 NMAC including, but not limited to, the return of the site, to the approximate original contour. The person who conducts the surface coal mining and reclamation operations must demonstrate to the director, using standard geotechnical analysis, that the minimum static factor of safety for the stability of all portions of the reclaimed land is at least 1.3.

C. Land above the highwall shall not be disturbed, unless the director finds that the disturbance facilitates compliance with environmental protection standards of this part and the disturbance is limited to that necessary to facilitate compliance.

D. Material in excess of that required by the grading and backfilling provisions of Subsection B of 19.8.26.2601 NMAC shall be disposed of in accordance with the requirements of 19.8.20.2034 through 2037 NMAC.

E. Woody materials shall not be buried in the backfilled area unless the director determines that the proposed method for placing woody material beneath the highwall will not deteriorate the stable condition of the backfilled area as required in Subsection B of 19.8.26.2601 NMAC. Woody materials may be chipped and distributed over the surface of the backfill as mulch, if special provision is made for their use and approved by the director.

F. Unlined or unprotected drainage channels shall not be constructed on backfills unless approved by the director as stable and not subject to erosion.

[11-29-97; 19.8.26.2601 NMAC - Rn, 19 NMAC 8.2.26.2601, 9-29-2000; A, 12-31-2007]

19.8.26.2602 STEEP SLOPES: LIMITED VARIANCES:

Persons may be granted variances from the approximate original contour requirements of Subsection B of 19.8.26.2601 NMAC for steep slope surface coal mining and reclamation operations, if the following standards are met and a permit incorporating the variance is approved under 19.8.10.1003 NMAC.

A. The highwall shall be completely backfilled with spoil material, in a manner which results in a static factor of safety of at least 1.3 using standard geotechnical analyses.

B. The watershed control of the area within which the mining occurs shall be improved by reducing the peak flow from precipitation or thaw and reducing the total suspended solids or other pollutants in the surface water discharge during precipitation or thaw. The total volume of flow during every season of the year shall not vary in a way that adversely affects the ecology of any surface water or any existing or planned public or private use of surface or ground water.

C. Land above the highwall may be disturbed only to the extent that the director deems appropriate and approves as necessary to facilitate compliance with the provisions of this part and if the director finds that the disturbance is necessary to:

- (1) blend the solid highwall and the backfilled material;
- (2) control surface runoff; or
- (3) provide access to the area above the highwall.

D. The landowner of the permit area has requested, in writing, as part of the permit application under 19.8.10.1003 NMAC, that the variance be granted.

E. The operations are conducted in full compliance with a permit issued in accordance with 19.8.10.1003 NMAC.

F. Only the amount of spoil as is necessary to achieve the postmining land use, ensure the stability of spoil retained on the bench, and meet all other requirements of the act and these rules and regulations shall be placed off the mine bench. All spoil not retained on the bench shall be placed in accordance with 19.8.20.2034 through 2037 and 2054 and 2055 NMAC.

[11-29-97; 19.8.26.2602 NMAC -Rn, 19 NMAC 8.2.26.2602, 9-29-2000]

19.8.26.2603 STEEP SLOPES: MULTIPLE SEAM:

In multiple-seam steep slope affected areas, spoil not required to reclaim and restore the permit area may be placed on a pre-existing bench, if approved by the director and if the following requirements are met:

- A.** all excess spoil must be hauled, placed, and retained on the solid bench;
- B.** the spoil must be graded to the most moderate slope so as to eliminate the existing highwall to the extent possible with the available spoil;
- C.** the fill must comply with 19.8.20.2034, 2035, or 2036 NMAC and the other requirements of 19.8.19 NMAC through 19.8.28 NMAC;
- D.** the bench on which the spoil is to be placed must have been created and abandoned due to coal mining prior to August 3, 1977.

[11-29-97; 19.8.26.2603 NMAC - Rn, 19 NMAC 8.2.26.2603, 9-29-2000]

PART 27: SPECIAL PERFORMANCE STANDARDS - COAL PROCESSING PLANTS AND SUPPORT FACILITIES NOT LOCATED AT OR NEAR THE MINE SITE OR NOT WITHIN THE PERMIT AREA FOR A MINE

19.8.27.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.27.1 - N, 9-29-2000]

19.8.27.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.27.2 - N, 9-29-2000]

19.8.27.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979)

[19.8.27.3 - N, 9-29-2000]

19.8.27.4 DURATION:

Permanent.

[19.8.27.4 - N, 9-29-2000]

19.8.27.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.27.5 - N, 9-29-2000]

19.8.27.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.27.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.27.7 DEFINITIONS:

[RESERVED]

[19.8.27.7 - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.27.8-19.8.27.2699 [RESERVED]:

[19.8.27.8 - 19.8.27.2699 NMAC - N, 9-29-2000]

19.8.27.2700 APPLICABILITY:

Each person who conducts surface coal mining and reclamation operations, which includes the operation of a coal processing plant or support facility which is not located within the permit area for a specific mine, shall obtain a permit in accordance with 19.8.10.1008 NMAC to conduct those operations and comply with 19.8.27.2701 NMAC.

[11-29-97; 19.8.27.2700 NMAC - Rn, 19 NMAC 8.2.27.2700, 9-29-2000]

19.8.27.2701 COAL PROCESSING PLANTS: PERFORMANCE STANDARDS:

Construction, operation, maintenance, modification, reclamation, and removal activities at operations covered by this part shall comply with the following:

A. signs and markers for the coal processing plant, coal processing waste disposal area, and water treatment facilities shall comply with 19.8.20.2000 NMAC;

B. roads, transport, and associated structures shall be constructed, maintained, and reclaimed in accordance with 19.8.20.2076 through 2078 NMAC;

C. any stream or channel realignment shall comply with 19.8.20.2012 NMAC;

D. if required by the director, any disturbed area related to the coal processing plant or associated facilities shall have sediment control structures, in compliance with 19.8.20.2013 and 2014 NMAC, and all discharges from these areas shall meet the requirements of 19.8.20.2010 NMAC and any other applicable state or federal law;

E. permanent impoundments associated with coal processing plants shall meet the requirements of 19.8.20.2017 and 2024 NMAC; dams constructed of or impounding coal processing waste shall comply with 19.8.20.2047 through 2049 NMAC;

F. use of water wells shall comply with 19.8.20.2021 NMAC and water rights shall be protected in accordance with 19.8.20.2022 NMAC;

G. disposal of coal processing waste, solid waste, and any excavated materials shall comply with 19.8.20.2034 through 2037 and 2039 through 2046 NMAC;

H. discharge structures for diversions and sediment control structures shall comply with 19.8.20.2015 NMAC;

I. air pollution control measures associated with fugitive dust emissions shall comply with 19.8.20.2050 NMAC;

J. fish, wildlife and related environmental values shall be protected in accordance with 19.8.20.2051 NMAC;

K. slide areas and other surface areas shall comply with 19.8.20.2052 NMAC;

L. adverse effects upon or resulting from nearby underground coal mining activities shall be minimized by appropriate measures including, but not limited to, compliance with 19.8.20.2023 and 2038 NMAC;

M. reclamation shall include proper topdressing handling procedures, revegetation, and abandonment, in accordance with 19.8.20.2024, 2053 through 2059, 2060 through 2066, and 2071 through 2073 NMAC;

N. conveyors, buildings, storage bins or stockpiles, water treatment facilities, water storage facilities, and any structure or system related to the coal processing plant shall comply with 19.8.20 NMAC;

O. any coal processing plant or associated structures located on prime farmland shall meet the requirements of 19.8.24 NMAC.

[11-29-97; 19.8.27.2701 NMAC - Rn, 19 NMAC 8.2.27.2701, 9-29-2000; A, 12-31-2007]

PART 28: SPECIAL PERFORMANCE STANDARDS - IN SITU PROCESSING

19.8.28.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.28.8 - 19.8.28.2799 NMAC - N, 9-29-2000]

19.8.28.2800 IN SITU PROCESSING: PERFORMANCE STANDARDS:

A. The person who conducts in situ processing activities shall comply with 19.8.20 NMAC and this section.

B. In situ processing activities shall be planned and conducted to minimize disturbance to the prevailing hydrologic balance by:

(1) avoiding discharge of fluids into holes or wells, other than as approved by the director;

(2) injecting process recovery fluids only into geologic zones or intervals approved as production zones by the director;

(3) avoiding annual injection between the wall of the drill hole and the casing;
and

(4) preventing discharge of process fluid into surface waters.

C. Each person who conducts in situ processing activities shall submit for approval as part of the application for permit under 19.8.10.1009 NMAC and follow after approval, a plan that ensures that all acid-forming, toxic-forming, or radioactive gases, solids, or liquids constituting a fire, health, safety or environmental hazard and caused by the mining and recovery process are promptly treated, confined, or disposed of, in a manner that prevents contamination of ground and surface waters, damage to fish, wildlife and related environmental values, and threats to the public health and safety.

D. Each person who conducts in situ processing activities shall prevent flow of the process recovery fluid:

(1) horizontally beyond the affected area identified in the permit; and

(2) vertically into overlying or underlying aquifers.

E. Each person who conducts in situ processing activities shall restore the quality of affected ground water in the permit and adjacent area, including ground water above and below the production zone, to the approximate premining levels or better, to ensure that the potential for use of the ground water is not diminished.

[11-29-97; 19.8.28.2800 NMAC - Rn, 19NMAC 8.2.28.2800, 9-29-2000]

19.8.28.2801 IN SITU PROCESSING: MONITORING:

A. Each person who conducts in situ processing activities shall monitor the quality and quantity of surface and ground water and the subsurface flow and storage characteristics in a manner approved by the director under 19.8.20.2020 NMAC to measure changes in the quantity and quality of water in surface and ground water systems in the permit and adjacent areas.

B. Air and water quality monitoring shall be conducted in accordance with monitoring programs approved by the director as necessary according to appropriate federal and state air and water quality standards.

[11-29-97; 19.8.28.2801 NMAC - Rn, 19NMAC 8.2.28.2801, 9-29-2000]

PART 29: INSPECTIONS

19.8.29.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.29.1 - N, 9-29-2000]

19.8.29.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.29.2 - N, 9-29-2000]

19.8.29.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[19.8.29.5 - N, 9-29-2000]

19.8.29.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.29.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.29.7 DEFINITIONS:

[RESERVED]

[19.8.29.7 - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.29.8-19.8.29.2899 [RESERVED]:

[19.8.29.8 - 19.8.29.2899 - N, 9-29-2000]

19.8.29.2900 INSPECTIONS:

A. The director through his duly authorized representative shall conduct an average of at least one partial inspection per month and one complete inspection per calendar quarter of each active surface coal mining and reclamation operation. A partial inspection is an on-site or aerial review of an operator's compliance with some of the permit conditions and requirements under the act and 19.8 NMAC, and includes collection of evidence of any violations observed. Aerial inspections shall be conducted in a manner which reasonably ensures the identification and documentation of conditions at each surface coal mining and reclamation site inspected. Any potential violation observed during an aerial inspection shall be investigated on site within three calendar days: Provided that any indication of a condition, practice or violation constituting cause for issuance of a cessation order under 19.8.30.3000 NMAC shall be investigated on site immediately. And provided further, that an on-site investigation of a potential violation observed during an aerial inspection shall not be considered to be an additional partial or complete inspection for the purposes of this part. A complete

inspection is an on-site review of an operator's compliance with all permit conditions and requirements within the entire area disturbed or affected by the operations, and includes collection of evidence with respect to every violation.

B. The director, through his duly authorized representative shall conduct periodic inspections of all inactive surface coal mining operations and exploration sites required to comply, in whole or in part, with the act and 19.8 NMAC, including collection of evidence with respect to every violation of any condition of the exploration approval or surface coal mining and reclamation operation permit, or any requirement of this act or 19.8 NMAC. At least one complete inspection per calendar quarter shall be conducted on inactive surface coal mining operations. For purposes of this part, an inactive surface coal mining operation is one for which the director has received the written notice provided for under 19.8.20.2073 NMAC, or reclamation of phase II as defined in Paragraph (2) of Subsection C of 19.8.14.1412 NMAC has been completed.

C. Permits issued under 19.8.11 NMAC shall be inspected quarterly until notice required by Subsection D of 19.8.11.1112 NMAC has been received by the director. Upon receipt of notice, or as determined necessary by the director, inspections will be conducted as required under Subsection A of 19.8.29.2900 NMAC.

D. The inspections shall be carried out on an irregular basis so as to monitor compliance at all operations, shall occur without prior notice except for necessary on-site meetings and include the prompt filing of inspection reports adequate to enforce the requirements and carry out the terms and conditions of the act and 19.8 NMAC.

E. The authorized representatives of the director without advance notice and upon presentation of appropriate credentials:

(1) shall have the right of entry to, upon or through any coal exploration site, surface coal mining and reclamation operations or any premises in which any records required to be maintained under the act or 19.8 NMAC are located; and

(2) may at reasonable times, and without delay, have access to and copy any records, inspect any monitoring equipment or method of operation required under the act.

F. The inspections shall be in accordance with Subsection D of 69-25A-21 and Subsection E of 69-25A-25 NMSA 1978 of the act, except that a search warrant is required to enter a building to inspect if the permittee or operator does not consent to entry.

G. "Abandoned site" means a surface coal mining and reclamation operation for which the regulatory authority has found in writing that:

(1) All surface and underground coal mining and reclamation activities at the site have ceased;

(2) The regulatory authority or OSM has issued at least one notice of violation or the initial program equivalent, and either:

(a) is unable to serve the notice despite diligent efforts to do so; or

(b) the notice was served and has progressed to a failure-to-abate cessation order or the initial program equivalent;

(3) The regulatory authority:

(a) is taking action to ensure that the permittee and operator, and owners and controllers of the permittee and operator, will be precluded from receiving future permits while violations continue at the site; and

(b) is taking action pursuant to Section 518(e), 518(f), 521(a)(4) or 521(c) of SMCRA or counterparts included in the act to ensure that abatement occurs or that there will not be a recurrence of the failure-to-abate, except where after evaluating the circumstances it concludes that further enforcement offers little or no likelihood of successfully compelling abatement or recovering any reclamation costs; and

(4) Where the site is, or was, permitted and bonded:

(a) the permit has either expired or been revoked; and

(b) the regulatory authority has initiated and is diligently pursuing forfeiture of, or has forfeited, any available performance bond.

H. In lieu of the inspection frequency established in Subparagraphs (a) and (b) of Paragraph (1) of Subsection H of 19.8.29.2900 NMAC, the regulatory authority shall inspect each abandoned site on a set frequency commensurate with the public health and safety and environmental considerations present at each specific site, but in no case shall the inspection frequency be set at less than one complete inspection per quarter.

(1) In selecting an alternate inspection frequency authorized under Subsection H of 19.8.29.2900 NMAC, the regulatory authority shall first conduct a complete inspection of the abandoned site and provide public notice under Paragraph (2) of Subsection H of 19.8.29.2900 NMAC. Following the inspection and public notice, the regulatory authority shall prepare and maintain for public review a written finding justifying the alternative inspection frequency selected. This written finding shall justify the new inspection frequency by affirmatively addressing in detail all of the following criteria:

(a) how the site meets each of the criteria under the definition of an abandoned site under Subsection G of 19.8.29.2900 NMAC and thereby qualifies for a reduction in inspection frequency;

(b) whether, and to what extent, there exist on the site impoundments, earthen structures or other conditions that pose, or may reasonably be expected to become, imminent dangers to the health or safety of the public or significant environmental harms to land, air, or water resources;

(c) the extent to which existing impoundments or earthen structures were constructed and certified in accordance with prudent engineering designs approved in the permit;

(d) the degree to which erosion and sediment control is present and functioning;

(e) the extent to which the site is located near or above urbanized areas, communities, occupied dwellings, schools and other public or commercial buildings and facilities;

(f) the extent of reclamation completed prior to abandonment and the degree of stability of unreclaimed areas, taking into consideration the physical characteristics of the land mined and the extent of settlement or revegetation that has occurred naturally with them; and

(g) based on a review of the complete and partial inspection report record for the site during at least the last two consecutive years, the rate at which adverse environmental or public health and safety conditions have and can be expected to progressively deteriorate.

(2) The public notice and opportunity to comment required under Paragraph (1) of Subsection H of 19.8.29.2900 NMAC shall be provided as follows:

(a) the regulatory authority shall place a notice in the newspaper with the broadest circulation in the locality of the abandoned site providing the public with a 30-day period in which to submit written comments;

(b) the public notice shall contain the permittee's name, the permit number, the precise location of the land affected, the inspection frequency proposed, the general reasons for reducing the inspection frequency, the bond status of the permit, the telephone number and address of the regulatory authority where written comments on the reduced inspection frequency may be submitted, and the closing date of the comment period.

[11-29-97; 19.8.29.2900 NMAC - Rn, 19 NMAC 8.2.29.2900, 9-29-2000; A, 1-15-2002; A, 12-31-2007]

19.8.29.2901 CITIZEN'S REQUEST FOR INSPECTION:

A. A citizen may request an inspection by furnishing a signed written statement or an oral report followed by a signed, written statement giving the director reason to believe that a violation, condition, or practice referred to in Subsection B of 19.8.29.2901 NMAC exists and setting forth a phone number and address where the citizen can be contacted.

B. The director shall immediately conduct an inspection to enforce any requirement of the act, 19.8 NMAC, or any condition of a permit or an exploration approval imposed under the act and 19.8 NMAC when the representative has reason to believe, on the basis of information available to him (other than information resulting from a previous inspection), that there exists a violation of the act, 19.8 NMAC, or any condition of a permit or exploration approval, or that there exists any condition, practice or violation which creates an imminent danger to the health or safety of the public or is causing or can reasonably be expected to cause a significant, imminent environmental harm to land, air or water resources.

C. The identity of any person supplying information to the director relating to a possible violation or imminent danger or harm shall remain confidential with the director if requested by that person, unless that person elects to accompany the inspector on the inspection, or unless disclosure is required under state law.

D. If an inspection is conducted as a result of information provided to the director by a citizen as described in Subsection A of 19.8.29.2901 NMAC, the citizen shall be notified as far in advance as practicable when the inspection is to occur and shall be allowed to accompany the authorized representative of the director during the inspection. Such person has a right of entry to, upon and through the coal exploration or surface coal mining and reclamation operation about which he supplied information, but only if he is in the presence of and is under the control, direction and supervision of the authorized representative while on the mine property. Such right of entry does not include a right to enter buildings without consent of the person in control of the building or without a search warrant.

E. Within 10 days of the inspection or, if there is no inspection, within 15 days of receipt of the citizen's written statement, the director shall send the citizen the following:

(1) if an inspection was made, a description of the enforcement action taken, which may consist of copies of the inspection report and all notices of violation and cessation orders issued as a result of the inspection or an explanation of why no enforcement action was taken;

(2) if no inspection was conducted, an explanation of the reason why; and

(3) an explanation of the citizen's right, if any, to informal review of the action or inaction of the director under 19.8.29.2903 NMAC.

F. The director shall give copies of all materials in Paragraphs (1) and (2) of Subsection E of 19.8.29.2901 NMAC within the time limits specified in those paragraphs to the person alleged to be in violation, except that the name of the citizen shall be removed unless disclosure of the citizen's identity is permitted under Subsection C of 19.8.29.2901 NMAC.

G. Nothing in this part shall be construed to create any greater degree of liability upon the operator for the safety of the person or property of a private citizen accompanying the authorized representative of the director than may exist under common law.

[11-29-97; 19.8.29.2901 NMAC - Rn, 19 NMAC 8.2.29.2901, 9-29-2000]

19.8.29.2902 REVIEW OF ADEQUACY AND COMPLETENESS OF INSPECTION:

Any person who is or may be adversely affected by a surface coal mining and reclamation operation or a coal exploration operation may notify the director in writing of any alleged failure on his part to make adequate and complete or periodic inspections as provided in 19.8.29.2900 NMAC. The notification shall include sufficient information to create a reasonable belief that 19.8.29.2900 NMAC is not being complied with and to demonstrate that the person is or may be adversely affected. The director shall within 15 days of receipt of the notification determine whether 19.8.29.2900 NMAC is being complied with, and if not shall immediately order an inspection to remedy the noncompliance. The director shall also furnish the complainant with a written statement of the reasons for such determination and the actions, if any, taken to remedy the noncompliance.

[11-29-97; 19.8.29.2902 NMAC - Rn, 19 NMAC 8.2.29.2902, 9-29-2000]

19.8.29.2903 REVIEW OF DECISION NOT TO INSPECT OR ENFORCE:

A. Any person who is or may be adversely affected by a coal exploration or surface coal mining and reclamation operation may ask the director to review informally the decision not to inspect or take appropriate enforcement action with respect to any violation alleged by that person in a request for an inspection under 19.8.29.2901 NMAC. The request for review shall be in writing and include a statement of how the person is or may be adversely affected and why the decision merits review.

B. The director shall conduct the review and inform the person, in writing, of the results of the review within 30 days of his or her receipt of the request. The person alleged to be in violation shall also be given a copy of the results of the review, except that the name of the citizen shall not be disclosed unless confidentiality has been waived or disclosure is required under state law.

C. Informal review under this part shall not affect any right to informal review under 69-25A-29 NMSA 1978 of the act or to a citizen's suit under 69-25A-24 NMSA 1978 of the act.

[11-29-97; 19.8.29.2903 NMAC - Rn, 19 NMAC 8.2.29.2903, 9-29-2000]

19.8.29.2904 AVAILABILITY OF RECORDS:

Copies of all records, reports, inspection materials, or information obtained by the director shall be made immediately available to the public in the manner provided for by the state statutes providing for inspection of public records, Sections 14-2-1 through 14-2-3 NMSA 1978.

[11-29-97; 19.8.29.2904 NMAC - Rn, 19 NMAC 8.2.29.2904, 9-29-2000]

PART 30: ENFORCEMENT

19.8.30.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.30.1 NMAC - N, 9-29-2000]

19.8.30.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.30.2 NMAC - N, 9-29-2000]

19.8.30.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[19.8.30.3 NMAC - N, 9-29-2000]

19.8.30.4 DURATION:

Permanent.

[19.8.30.4 NMAC - N, 9-29-2000]

19.8.30.5 EFFECTIVE DATE:

November 29, 1997 unless a later date is cited at the end of a section.

[19.8.30.5 NMAC - N, 9-29-2000]

19.8.30.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

19.8.30.7 DEFINITIONS:

[RESERVED]

[19.8.30.7 NMAC - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.30.8-19.8.30.2999 [RESERVED]:

[19.8.30.8 - 19.8.30.2999 NMAC - N, 9-29-2000]

19.8.30.3000 CESSATION ORDERS:

A. The director, or his duly authorized representative shall immediately order a cessation of coal exploration operations or surface coal mining and reclamation operations or relevant portions thereof, if he determines, on the basis of an inspection, any conditions or practices exist or that any permittee is in violation of any requirements of the act, 19.8 NMAC or any permit condition, which condition, practice or violation creates an imminent danger to the health or safety of the public, or is causing or can reasonably be expected to cause significant, imminent environmental harm to land, air or water resources.

B. Surface coal mining operations conducted by any person without a valid surface coal mining permit constitute a condition or practice which causes or can reasonably be expected to cause significant imminent environmental harm to land, air, or water resources unless such operations are an integral, uninterrupted extension of previously permitted operations, and the person conducting such operations has filed a timely and complete application for a permit to conduct such operations.

C. If the cessation order will not completely abate the imminent danger or harm in the most expeditious manner possible, the inspector shall impose affirmative obligations to abate the condition, practice or violation, specifying the time by which the abatement shall be accomplished. If affirmative obligations to abate are imposed, the inspector

may consider suggestions by the operator concerning the economic and technological feasibility, in determining the most expeditious means of abatement and the period for correction of the condition, practice or violation causing an imminent danger to the health or safety of the public or significant environmental harm to land, air or water resources.

D. The director, or his duly authorized representative, shall immediately order a cessation of coal exploration or surface coal mining and reclamation operations or relevant portions thereof, if he finds that a violation has not been abated within the period specified in a notice of violation issued under 19.8.30.3001 NMAC. The cessation order shall specify measures deemed necessary by the inspector to abate the violations in the most expeditious manner possible.

E. A cessation order shall be effective upon prompt delivery to the permittee or his agent. The order shall remain in effect until the condition, practice or violation has been abated or until vacated, modified or terminated in writing by the director or his duly authorized representative. A cessation order shall be in writing, signed by the director or his duly authorized representative, and shall set forth with reasonable specificity:

(1) the nature of the violation, including a citation to the requirement allegedly violated and the imminent danger or harm allegedly involved;

(2) the remedial action or affirmative obligation required, if any, including interim steps, if appropriate;

(3) the time established for abatement, if appropriate, including the time for meeting any interim steps; and

(4) a reasonable description of the portion of the coal exploration or surface coal mining and reclamation operation to which it applies.

F. Reclamation operations and other activities intended to protect public health and safety and the environment shall continue during the period of any order unless otherwise provided in the order.

G. The director, or his duly authorized representative may modify, terminate or vacate a cessation order for a good cause, provided that no cessation order may be vacated because of inability to comply. The director may extend the time for abatement if he determines that good cause exists and that the failure to abate within the time previously set forth was not caused by lack of diligence on the part of the person to whom the cessation order was issued.

H. The director or his duly authorized representative shall terminate a cessation order by written notice to the person to whom the order was issued, when he determines that all conditions, practices or violations listed in the order have been

abated. Termination shall not affect the right to assess civil penalties for violations included in the order.

I. A modification of an order shall result in the commencement of a new period within which to abate. However, before any extension in the total abatement time is granted, the requirements of Subsection F of 19.8.30.3000 NMAC must be complied with.

J. A cessation order which requires cessation of mining, expressly or by implication, shall expire within thirty (30) days after it has been served unless a hearing has been held within that time, or unless the cessation order has been previously terminated, modified, or vacated in writing. The hearing shall be held on site or within such reasonable proximity as will permit viewing of the site during the course of the hearing. A cessation order shall not expire as provided above if the condition, practice, or violation in question has been abated or if the hearing has been waived or postponed at the request of the permittee. Expiration of the cessation order for failure to hold a hearing within thirty (30) days from notice of issuance does not affect the right of the director to assess any civil penalty for violations giving rise to such cessation order.

K. The hearing shall be conducted in accordance with the notice and hearing requirements of 19.8.30.3003 NMAC and 19.8.30.3004 NMAC governing informal hearings.

L. Within sixty days after issuing a cessation order, the director shall notify in writing any person who has been identified under Subsection F of 19.8.11.1119 NMAC, Subsection C of 19.8.7.701 NMAC and Subsection D of 19.8.7.701 NMAC as owning or controlling the permittee, that the cessation order was issued and that the person has been identified as an owner or controller.

[11-29-27; 19.8.30.3000 NMAC - Rn, 19 NMAC 8.2.30.3000, 9-29-2000; A, 12-31-2007; A, 08-31-2010]

19.8.30.3001 NOTICES OF VIOLATION:

A. The director, through his duly authorized representative shall issue a notice of violation if, on the basis of an inspection, he determines a violation of any requirement of the act, 19.8 NMAC or any permit or exploration approval condition which does not create an imminent danger or harm for which a cessation order must be issued under 19.8.30.3000 NMAC.

B. A notice of violation shall be in writing, signed by the director or by his duly authorized representative and shall set forth with reasonable specificity:

(1) the nature of the violation, including a citation to the requirement allegedly violated;

- (2) the remedial action required which may include interim steps;
- (3) a reasonable time, but not more than ninety days for abatement, which may include time for accomplishment of interim steps;
- (4) a reasonable description of the portion of the coal exploration or surface coal mining and reclamation operation to which it applies; and
- (5) a notice of opportunity for review pursuant to 19.8.12.1203 NMAC.

C. The director or his authorized representative may extend the time set for abatement or for accomplishment of an interim step, if the failure to meet the time previously set was not caused by lack of diligence on the part of the permittee. The total time for abatement under a notice of violation, including all extensions, shall not exceed 90 days from the date of issuance, except upon a showing by the permittee that it is not feasible to abate the violation within 90 calendar days due to one or more of the circumstances in Subsection D of 19.8.30.3001 NMAC. An extended abatement date pursuant to this section shall not be granted when the permittee's failure to abate within 90 days has been caused by a lack of diligence or intentional delay by the permittee in completing the remedial action required.

D. Circumstances which may qualify a surface coal mining operation for an abatement period of more than 90 days are:

- (1) where the permittee of an ongoing permitted operation has timely applied for and diligently pursued a permit renewal or other necessary approval of designs or plans but such permit or approval has not been or will not be issued within 90 days after a valid permit expires or is required, for reasons not within the control of the permittee;
- (2) where there is a valid judicial order precluding abatement within 90 days as to which the permittee has diligently pursued all rights of appeal and as to which he has no other effective legal remedy;
- (3) where the permittee cannot abate within 90 days due to a labor strike;
- (4) where climatic conditions preclude abatement within 90 days, or where, due to climatic conditions, abatement within 90 days clearly would cause more environmental harm than it would prevent; or
- (5) where abatement within 90 days requires action that would violate safety standards established by statute or regulation under the Mine Safety and Health Act of 1977.

E. Whenever an abatement time in excess of 90 days is permitted, interim abatement measures shall be imposed to the extent necessary to minimize harm to the public or the environment.

F. If any of the conditions in Subsection D of 19.8.30.3001 NMAC exists, the permittee may request the authorized representative to grant an abatement period exceeding 90 days. The authorized representative shall not grant such an abatement period without the concurrence of the director or his or her designee and the abatement period granted shall not exceed the shortest possible time necessary to abate the violation. The permittee shall have the burden of establishing by clear and convincing proof that he is entitled to an extension under the provisions of Subsections C and D of 19.8.30.3001 NMAC. In determining whether or not to grant an abatement period exceeding 90 days the authorized representative may consider any relevant written or oral information from the permittee or any other source. The authorized representative shall promptly and fully document in the file his reasons for granting or denying the request. The authorized representative's immediate supervisor shall review this document before concurring in or disapproving the extended abatement date and shall promptly and fully document the reasons for his concurrence or disapproval in the file.

G. Any determination made under Subsection F of 19.8.30.3001 NMAC shall contain a notice of opportunity for review pursuant to 19.8.12.1203 NMAC.

H. No extension granted under Subsection F of 19.8.30.3001 NMAC may exceed 90 days in length. Where the condition or circumstance which prevented abatement within 90 days exists at the expiration of any such extension, the permittee may request a further extension in accordance with the procedures of Subsection F of 19.8.30.3001 NMAC.

I. The director or his duly authorized representative shall terminate a notice of violation by written notice to the person to whom it was issued, when the director determines that all violations listed in the notice of violation have been abated.

J. Failure-to-abate cessation order.

(1) If the director or his duly authorized representative finds that a violation has not been abated within expiration of the time originally fixed or subsequently extended, he shall immediately issue an order of cessation of coal surface mining and reclamation operations, or coal exploration or the portion of operations relevant to the violation as provided in 19.8.30.3000 NMAC.

(2) If the director or his duly authorized representative finds an interim step has not been accomplished within the time originally fixed or subsequently extended he may immediately issue an order of cessation of coal surface mining and reclamation operations, or coal exploration or the portions of operations relevant to the violation as provided in 19.8.30.3000 NMAC.

K. A notice of violation which requires cessation of mining, expressly or by necessary implication, shall not be effective to cause cessation of mining following thirty (30) days after it is served unless an informal public hearing has been held within that time. The public hearing shall be on site within such reasonable proximity as will permit

viewing of the site during the course of the hearing. The hearing on a notice of violation shall be conducted in accordance with the notice and hearing requirements of 19.8.30.3003 NMAC and 19.8.30.3004 NMAC governing informal hearings.

L. A notice of violation shall not be vacated simply by virtue of the fact that the condition, practice, or violation in question has been abated or if the hearing has been waived or postponed at the request of the permittee. Termination of a notice of violation by the director or expiration of a notice of violation for failure to hold a public hearing within thirty (30) days shall not affect the director's right to assess civil penalties for the violation mentioned in the notice.

[11-29-27; 19.8.30.3001 NMAC - Rn, 19 NMAC 8.2.30.3001, 9-29-2000; A, 12-31-2007]

19.8.30.3002 PERMIT SUSPENSION OR REVOCATION:

A. When on the basis of an inspection the director determines that a pattern of violations of any requirements of the act, 19.8 NMAC or any permit conditions exist or has existed and if the director also finds that such violations are caused by the unwarranted failure of the permittee to comply with such requirements or conditions or that such violations are willfully caused by the permittee, the director shall, except as otherwise provided in Subsection E of 19.8.30.3002 NMAC, issue an order to a permittee requiring him to show cause as to why the permit should not be suspended or revoked. The order shall be in writing, signed by the director and shall set forth with reasonable specificity:

(1) the nature of the violations, including a citation to the requirements or conditions allegedly violated;

(2) the conduct alleged to justify the finding that such violations are the result of the permittee's unwarranted failure or were willful; and

(3) the opportunity for a hearing to be held pursuant to Subsection E of 69-25A-29 NMSA 1978 of the act.

B. For purposes of determining the propriety of an order to show cause why a permit should not be suspended or revoked, the following definitions shall apply:

(1) Willful violation means an act or omission which violates the requirements of the act, 19.8 NMAC or any permit condition, committed by a person who intends the result which actually occurs.

(2) Unwarranted failure to comply means the failure of the permittee to prevent the occurrence of any violation of any requirement of the act, or 19.8 NMAC or any permit condition, due to indifference, lack of diligence or lack of reasonable care or the failure to abate any violation of a permit, the act or 19.8 NMAC due to indifference, lack of diligence or lack of reasonable care. Violations by any person conducting

surface coal mining operations on behalf of the permittee shall be attributed to the permittee unless the permittee establishes by clear and convincing evidence, that the acts were not within the scope of employment or agency.

(3) The director may determine that a pattern of violations exists or has existed, based upon two (2) or more inspections of the permit area within any twelve month period, after considering:

(a) the number and seriousness of violations cited on more than one occasion of the same or related requirements of the act, 19.8 NMAC or the permit;

(b) the number and seriousness of violations cited on more than one occasion of different requirements of the act; and

(c) the extent to which the violations are isolated departures from lawful conduct.

C. The director shall determine that a pattern of violations exists, if he finds that there were violations of the same or related requirements of the act, the permit or 19.8 NMAC during three or more inspections of the permit area within any twelve month period.

D. Whenever a permittee fails to abate a violation contained in a notice of violation or cessation order within the abatement period set in the notice or order or as subsequently extended, the director shall review the permittee's history of violations to determine whether a pattern of violations exists pursuant to this section, and shall issue an order to show cause as appropriate pursuant to this section.

E. The director may decline to issue a show cause order, or may vacate an outstanding show cause order, if he finds that, taking into account exceptional factors present in the particular case, it would be demonstratively unjust to issue or to fail to vacate the show cause order. The basis for this finding shall be fully explained and documented in the records of the case, provided that no show cause order or order revoking or suspending a permit may be vacated because it is subsequently determined that the director or his duly authorized representative did not have information sufficient to justify an inspection for any condition, practice or violation which creates an imminent danger to the health or safety of the public or is causing or can reasonably expect it to cause a significant imminent environmental harm to land, air or water resources.

[11-29-27; 19.8.30.3002 NMAC - Rn, 19 NMAC 8.2.30.3002, 9-29-2000; A, 12-31-2007]

19.8.30.3003 SERVICE OF NOTICES OF VIOLATION AND CESSATION ORDERS:

A. A notice of violation or cessation order shall be served on the person to whom it is directed or his designated agent promptly after issuance as follows.

(1) By tendering a copy at the coal exploration or surface coal mining and reclamation operation to the designated agent or to the individual who, based upon reasonable inquiry by the director's duly authorized representative, appears to be in charge of the coal exploration or surface coal mining and reclamation operation referred to in the notice or order. If no such individual can be located at the site, a copy may be tendered to any individual at the site who appears to be a supervisory employee or agent of the person to whom the notice or order is issued. Service shall be complete upon tender of the notice or order and shall not be deemed incomplete because of refusal to accept.

(2) As an alternative, service may be made by sending a copy of the notice or order by certified mail or by hand to the person to whom it is issued or his designated agent. Service shall be complete upon tender of the notice or order or of the mail and shall not be deemed incomplete because of refusal to accept.

B. A show cause order may be served on the person to whom it is issued in either manner provided in Subsection A of 19.8.30.3003 NMAC.

C. Designation by any person of an agent for service of notices and orders shall be made in writing to the director.

D. The director shall cause copies of notices and order to be furnished to any person having an interest in the coal exploration, surface coal mining and reclamation operation or the permit area, such as the owner of the fee, a corporate officer of the permittee or entity conducting coal exploration, or the bonding company when so requested in writing.

E. Upon request, the director shall furnish copies of notices and orders and all documents relating to inspection and enforcement actions to the director of the office of surface mining reclamation and enforcement, pertaining to coal exploration operations and surface coal mining and reclamation operations which are subject to the provisions of a state-federal cooperative agreement.

[11-29-27; 19.8.30.3003 NMAC - Rn, 19 NMAC 8.2.30.3003, 9-29-2000; A, 08-31-2010]

19.8.30.3004 INFORMAL HEARINGS:

A. Within ten (10) days of service of a notice of violation under 19.8.30.3001 NMAC or cessation order under 19.8.30.3001 NMAC, the person to whom the notice or order was issued may require an informal hearing by notifying the director, in writing, of his request for such hearing. The director may, for good cause shown, extend the time for requesting a notice of a hearing provided that the total time for request including any such extension, does not exceed fifteen (15) days from service of notice or order.

B. The right to an informal hearing, as provided in this section, shall be deemed waived if the person to whom notice of violation or cessation order is given fails to

request in writing such hearing within ten (10) days or if granted by the director, within any additional extension of time after service of the notice or order.

C. Within five days after the close of an informal hearing the director may affirm, modify or vacate the notice or order in writing. The decision shall be sent to the person to whom the notice or order was issued, or any person who filed a report which led to the notice or order.

D. At the request of the operator to whom the notice or order is given, the hearing on a notice of violation or cessation order may be delayed until a proposed civil penalty assessment is served in accordance with 19.8.31.3105 NMAC. In any event, the director may, at an informal hearing, resolve the amount of a civil penalty with the agreement of the operator, notwithstanding that no proposed civil penalty assessment has yet been served in accordance with 19.8.31.3105 NMAC.

[11-29-27; 19.8.30.3004 NMAC - Rn, 19 NMAC 8.2.30.3004, 9-29-2000; A, 08-31-2010]

PART 31: PENALTIES

19.8.31.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.31.1 NMAC - N, 9-29-2000]

19.8.31.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.31.2 NMAC - N, 9-29-2000]

19.8.31.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[19.8.31.3 NMAC - N, 9-29-2000]

19.8.31.4 DURATION:

Permanent.

[19.8.31.4 NMAC - N, 9-29-2000]

19.8.31.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.31.5 NMAC - N, 9-29-2000]

19.8.31.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[RESERVED]

[19.8.31.7 NMAC - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.31.8-19.8.31.3099 [RESERVED]:

[19.8.31.8 - 19.8.31.3099 NMAC - N, 9-29-2000]

19.8.31.3100 CIVIL PENALTIES: ASSESSMENT:

A. The director shall review each notice of violation and cessation order in accordance with the assessment procedures described in this part to determine whether a civil penalty will be assessed, the amount of the penalty and whether each day of a continuing violation will be deemed a separate violation for purposes of the total penalty assessed.

B. The director shall assess a penalty for each cessation order.

C. The director may assess a penalty for each violation. In determining whether to assess a penalty, the director shall consider the factors listed in 19.8.31.3101 NMAC. Normally, a penalty will be assessed when a violation is assigned 31 points or more.

[11-29-97; 19.8.31.3100 NMAC - Rn, 19 NMAC 8.2.31.3100, 9-29-2000]

19.8.31.3101 POINT SYSTEM FOR PENALTIES:

A. The director shall use the point system described in this section to determine the amount of the penalty, and, in the cases of notices of violation, whether a mandatory penalty should be assessed as provided in 19.8.31.3100 NMAC.

B. Points shall be assigned as follows.

(1) History of previous violations. The director shall assign up to 25 points based on the history of previous violations. One point shall be assigned for each past violation contained in a notice of violation. Five points shall be assigned for each violation (but not a condition or practice) contained in a cessation order. The history of previous violations, for the purpose of assigning points, shall be determined and the points assigned with respect to a particular coal exploration or surface coal mining operation. Points shall be assigned as follows:

(a) a violation shall not be counted, if the notice or order is the subject of pending administrative or judicial review or if the time to request any administrative or judicial decision has not expired, and thereafter it shall be counted for only one year;

(b) no violation for which the notice or order has been vacated shall be counted; and

(c) a violation, not resulting in a civil penalty assessment shall not receive more than 50% of the points than would have been assigned if the violation had resulted in an assessment.

(2) Seriousness. The director shall assign up to 25 points based on the seriousness of the violation, as follows:

(a) Foreseeability of occurrence. The director shall assign up to 10 points based on the foreseeability of the occurrence of the event which a violated standard is designed to prevent. Points shall be assessed according to the following schedule:

Foreseeability of Occurrence	Points
None	0
Insignificant	1-2
Unlikely	3-5
Likely	6-9
Clearly	10

(b) Extent of potential or actual damage. The director shall assign up to 15 points, based on the extent of the potential or actual damage, in terms of area and impact on the public or environment, as follows:

(i) if the damage or impact which the violated standard is designed to prevent would remain within the coal exploration or permit area, the director shall assign zero to seven points, depending on the duration and extent of the damage or impact;

(ii) if the damage or impact which the violated standard is designed to prevent would extend outside the coal exploration or permit area, the director shall assign eight to fifteen points, depending on the duration and extent of the damage or impact.

(c) Alternative. In the case of a violation of an administrative requirement, such as a requirement to keep records, the director shall, in lieu of Subparagraphs (a) and (b) of Paragraph (2) of Subsection B of 19.8.31.3101 NMAC, assign up to 10 points for seriousness, based upon the extent to which enforcement is obstructed by the violation.

(3) Negligence.

(a) The director shall assign up to 25 points based on the degree of fault of the person to whom the notice or order was issued in causing or failing to correct the violation, condition, or practice which led to the notice or order, either through act or omission. Points shall be assessed as follows:

(i) a violation which occurs through no negligence shall be assigned no penalty points for negligence;

(ii) a violation which is caused by negligence shall be assigned 12 points or less, depending on the degree of negligence; or

(iii) a violation which occurs through a greater degree of fault than negligence shall be assigned 13 to 25 points, depending on the degree of fault.

(b) In determining the degree of negligence involved in a violation the number of points to be assigned, the following definitions apply:

(i) no negligence means an inadvertent violation which was unavoidable by the exercise of reasonable care;

(ii) negligence means the failure of a permittee to prevent the occurrence of any violation of his permit or any requirement of the act or 19.8 NMAC due to indifference, lack of diligence, or lack of reasonable care, or the failure to abate any violation of such permit, the act or 19.8 NMAC due to indifference, lack of diligence, or lack of reasonable care;

(iii) a greater degree of fault than negligence means reckless, knowing, or intentional conduct.

(c) In calculating points to be assigned for negligence, the acts of all persons working on the coal exploration or surface coal mining and reclamation site shall be attributed to the person to whom the notice or order was issued unless he establishes, by clear and convincing evidence, that the acts were not within the scope of employment or agency.

(4) Good faith in attempting to achieve compliance.

(a) The director shall add points based on the degree of good faith of the person to whom the notice or order was issued in attempting to achieve rapid compliance after notification of the violation. Points shall be assigned as follows:

Degree of Good Faith	Points
Rapid compliance	-1 to -15
Use of additional equipment or labor	-1 to -25
Normal compliance	<u>0</u>

(Total not to exceed -25)

(b) The following definitions shall apply under Subparagraph (a) of Paragraph (4) of Subsection B of 19.8.31.3101 NMAC:

(i) rapid compliance means that the person to whom the notice or order was issued took extraordinary measures to abate the violation in the shortest possible time and that abatement was achieved before the time set for abatement;

(ii) use of additional equipment or labor means rapid compliance and the employment of equipment and/or labor in amounts and at a cost greater than would normally be employed;

(iii) normal compliance means the person to whom the notice or order was issued abated the violation within the time given for abatement.

(c) If the consideration of these criteria is impractical because of the length of the abatement period, the assessment may be made without considering this criterion and shall be reassessed after the violation has been abated.

[11-29-97; 19.8.31.3101 NMAC - Rn, 19 NMAC 8.2.31.3101, 9-29-2000]

19.8.31.3102 DETERMINATION OF PENALTY AMOUNT:

The director shall determine the amount of any civil penalty by converting the total number of points assigned under 19.8.31.3101 NMAC to a dollar amount which falls within the range of penalties contained in the following schedule:

<u>Points</u>	<u>Dollars</u>	<u>Points</u>	<u>Dollars</u>
1	10-30	37	1700-1800
2	30-50	38	1800-1900
3	50-70	39	1900-2000
4	70-90	40	2000-2100

19.8.31.3103 ASSESSMENT OF SEPARATE VIOLATION FOR EACH DAY:

A. The director may assess separately a civil penalty for each day from the date of issuance of the notice of violation or cessation order to the date set for abatement of the violation. In determining whether to make such an assessment, the director shall consider the factors listed in 19.8.31.3101 NMAC and may consider the extent to which the person to whom the notice or order was issued gained any economic benefit as a result of a failure to comply. For any violation which continues for two or more days and which is assigned more than 70 points, the director shall assess a civil penalty for a minimum of two separate days.

B. Whenever a violation contained in a notice of violation or cessation order has not been abated within the abatement period set in the notice or order, a civil penalty of not less than \$750 shall be assessed for each day, not exceeding thirty (30) days for each such violation, during which such failure continues, except that, if the person to whom the notice or order was issued initiates review proceedings with respect to the violation, the abatement period shall be extended as follows:

(1) if suspension of the abatement requirements of the notice or order is ordered in a temporary relief proceeding under Subsection D of 69-25A-29 NMSA 1978 of the act, after a determination that the person to whom the notice or order was issued will suffer irreparable loss or damage from the application of the requirements, the period permitted for abatement shall not end until the date on which the director issues a final order with respect to the violation in question; and

(2) if the person to whom the notice or order was issued initiated review proceedings under Section 69-25A-30 NMSA 1978 of the act with respect to the violation, in which the obligations to abate are suspended by the court pursuant to Subsection B of Section 69-25A-30 NMSA 1978 of the act, the daily assessment of a penalty shall not be made for any period before entry of a final order by the court not subject to appeal.

[11-29-97; 19.8.31.3103 NMAC - Rn, 19 NMAC 8.2.31.3103, 9-29-2000; A, 08-31-2010]

19.8.31.3104 WAIVER OF USE OF FORMULA TO DETERMINE CIVIL PENALTY:

A. The director, upon his own initiative or upon written request received with 15 days of service of a notice of civil penalty assessment, may waive the use of the formula contained in 19.8.31.3101 NMAC to set the civil penalty, if he determines that, taking into account exceptional factors present in the particular case, the penalty is demonstrably unjustified. However, the director shall not waive the use of the formula or reduce the proposed assessment on the basis of an argument that a reduction in the proposed penalty could be used to abate violations of the act, 19.8 NMAC or any conditions of any permit or exploration approval. The basis of every waiver shall be fully explained and documented in the records of the case.

B. If the director waives the use of the formula, he shall use the criteria set forth in Subsection A of Section 69-25A-22 NMSA 1978 of the act, to determine the appropriate penalty. When the director has elected to waive the use of the formula, he shall give a written explanation of the basis for the assessment made to the person to whom the notice or order was issued.

[11-29-97; 19.8.31.3104 NMAC - Rn, 19 NMAC 8.2.31.3104, 9-29-2000]

19.8.31.3105 PROCEDURE FOR CIVIL PENALTY ASSESSMENT:

A. Within 15 days of service of a notice or order, the person to whom it was issued may submit written information about the violation to the director and to the inspector who issued the notice of violation or cessation order. The director or his authorized representative shall consider any information so submitted in determining the facts surrounding the violation and the amount of the penalty.

B. The director shall serve a copy of the proposed assessment and of the worksheet showing the computation of the proposed assessment on the person to whom the notice or order was issued, by certified mail, within 30 days of the issuance of the notice or order. If the mail is tendered at the address of that person set forth in the sign required under Subsection C of 19.8.20.2000 NMAC or at any address at which that person is in fact located, and he refuses to accept delivery of or to collect such mail, the requirements of this subsection shall be deemed to have been complied with upon such tender. Failure by the director to serve any proposed assessment within 30 days shall not be grounds for dismissal of all or part of such assessment unless the person against whom the proposed penalty has been assessed:

(1) proves actual prejudice as a result of the delay; and

(2) makes a timely objection to the delay; an objection shall be timely only if made in the normal course of administrative and judicial review.

C. Unless a conference has been requested, the director or his representative shall review and reassess any penalty if necessary to consider facts which were not reasonably available on the date of issuance of the proposed assessment because of the length of the abatement period. The director shall serve a copy of any such reassessment and of the worksheet showing the computation of the reassessment in the manner provided in Subsection B of 19.8.31.3105 NMAC within 30 days after the date the violation is abated.

D. Consolidation of hearings. If the director proposes an assessment or reassessment prior to the running of the time for requesting an informal hearing pursuant to 19.8.30.3004 NMAC, any conference requested pursuant to 19.8.31.3106 NMAC may be consolidated with such informal hearing procedure upon a determination by the director that consolidation is appropriate.

[11-29-97; 19.8.31.3105 NMAC - Rn, 19 NMAC 8.2.31.3105, 9-29-2000; A, 12-31-2007]

19.8.31.3106 PROCEDURE FOR ASSESSMENT CONFERENCE:

A. The director shall arrange for a conference to review the proposed assessment or reassessment, upon written request of the person to whom the notice or order was issued, if the request is received within 15 days from the date of the proposed assessment or reassessment is served.

B. Conference format and timing.

(1) The director shall assign a conference officer to hold the assessment conference who shall not be the inspector signing the notice or order. The conference shall be informal in nature and not be governed by the rules for adjudicatory hearings found in 19.8.12 NMAC. The assessment conference shall be held within 60 days from the date of issuance of the proposed assessment or the end of the abatement period, whichever is later. A failure by the director to hold such conference within 60 days shall not be grounds for dismissal of all or part of an assessment unless the person against whom the proposed penalty has been assessed proves actual prejudice as a result of the delay.

(2) The director shall post notice of the time and place of the conference at his office at least five (5) days before the conference. Any person shall have a right to attend and participate in the conference.

(3) The conference officer shall consider all relevant information in the violation. Within 30 days after the conference is held, the conference officer shall either:

(a) settle the issues, in which case a settlement agreement shall be prepared by the conference officer and signed by the director and by the person assessed; or

(b) affirm, raise, lower or vacate the penalty.

(4) An increase or reduction of a proposed civil penalty assessment of more than 25 percent and more than \$500 shall not be final and binding until approved by the director.

C. The conference officer shall promptly serve the person assessed with a notice of his action in the manner provided in Subsection B of 19.8.31.3105 NMAC and shall include a worksheet if the penalty has been raised or lowered. The reasons for the conference officer's action shall be fully documented in the file.

D. Settlement agreements.

(1) If a settlement agreement is entered into, the person assessed will be deemed to have waived all rights to further review of the violation or penalty in question, except as otherwise expressly provided for in the settlement agreement. The settlement agreement shall contain a clause to this effect.

(2) If full payment of the amount specified in the settlement agreement is not received by the director within 30 days after the date of signing, the director shall order the civil penalty fixed at an amount determined to be appropriate, in light of the criteria set forth in 19.8.31.3101 NMAC and relevant information received at any assessment conference.

E. The conference officer may terminate the conference when he determines that the issues cannot be resolved or that the person assessed is not diligently working toward resolution of the issues.

F. The conference officer may, if persuaded by the information presented, modify or vacate a notice of violation, with the approval of the director.

G. At formal review proceedings under 69-25A-29 NMSA 1978 of the act no evidence as to statements made or evidence produced by one party at a conference shall be introduced as evidence by another party or to impeach a witness.

[11-29-97; 19.8.31.3106 NMAC - Rn, 19 NMAC 8.2.31.3106, 9-29-2000; A, 12-31-2007]

19.8.31.3107 REQUEST FOR HEARING:

A. The person charged with the violation may contest the proposed penalty or the alleged violation by submitting a petition and an amount equal to the proposed penalty, or, if a conference has been held, the reassessed or affirmed penalty to the director to be held in escrow as provided in Subsection B of 19.8.31.3107 NMAC within 30 days from receipt of the proposed assessment or reassessment or 30 days from the date of service of the conference officer's action, whichever is later. The fact of the violation may not be contested, if it has been decided in a review proceeding commenced under 19.8.31.3108 NMAC.

B. All funds submitted under Subsection A of 19.8.31.3107 NMAC shall be held in escrow pending completion of the administrative and judicial review process, at which time the director shall disburse them as provided 19.8.31.3108 NMAC.

C. The request for hearing and any hearing procedure shall be governed by 19.8.12.1203 NMAC and any contest of a proposed penalty may, unless inconsistent with the timing of a hearing on a notice of violation or cessation order, be combined with any such proceeding under 19.8.12.1203 NMAC.

[11-29-97; 19.8.31.3107 NMAC - Rn, 19 NMAC 8.2.31.3107, 9-29-2000; A, 1-15-2002]

19.8.31.3108 FINAL ASSESSMENT AND PAYMENT OF PENALTY:

A. If the person to whom a notice of violation or cessation order is issued fails to request a hearing as provided in 19.8.31.3107 NMAC, the proposed assessment shall become a final order of the director and the penalty assessed shall become due and payable upon expiration of the time allowed to request a hearing.

B. If any party requests judicial review of a final order of the director, the proposed penalty shall continue to be held in escrow until completion of the review. Otherwise, subject to Subsection C of 19.8.31.3108 NMAC, the escrowed funds shall be released to the director in payment of the penalty, and the escrow shall end.

C. If the final decision in the administrative and judicial review results in an order reducing or eliminating the proposed penalty assessed, the director shall within 30 days of receipt of the order refund to the person assessed all or part of the escrowed amount, with interest from the date of payment into escrow to the date of the refund at the rate of 6 percent or at the rate established by the U.S. department of treasury pursuant to Section 6621(b) of the internal revenue code, whichever is greater.

D. If the review results in an order increasing the penalty, the person to whom the notice or order was issued shall pay the difference to the director within 15 days after the order is mailed to such person.

[11-29-97; 19.8.31.3108 NMAC - Rn, 19 NMAC 8.2.31.3108, 9-29-2000; A, 12-31-2007]

19.8.31.3109 INDIVIDUAL CIVIL PENALTIES:

A. Except as provided in Subsection B of 19.8.31.3109 NMAC, the director may assess an individual civil penalty against any corporate director, officer or agent of a corporate permittee who knowingly and willfully authorized, ordered or carried out a violation of a permit condition, or a failure or refusal to comply with any order issued under the act.

B. The director shall not assess an individual civil penalty in situations resulting from a permit violation by a corporate permittee until a cessation order has been issued by the director to the corporate permittee for the violation, and the cessation order has remained unabated for 30 days.

[11-29-97; 19.8.31.3109 NMAC - Rn, 19 NMAC 8.2.31.3109, 9-29-2000; A, 08-31-2010]

19.8.31.3110 AMOUNT OF INDIVIDUAL CIVIL PENALTY:

A. In determining the amount of an individual civil penalty assessed under 19.8.31.3109 NMAC, the director shall consider the criteria specified in Section 69-25A-22 NMSA 1978, including:

(1) the individual's history of authorizing, ordering or carrying out previous violations, failures or refusals at the particular surface coal mining operations;

(2) the seriousness of the violation, failure or refusal (as indicated by the extent the environment and any hazard to the health or safety of the public; and

(3) the demonstrated good faith of the individual charged in attempting to achieve rapid compliance after notice of the violation, failure or refusal.

B. The penalty shall not exceed \$5,000 for each violation. Each day of a continuing violation may be deemed a separate violation and the director may assess a separate individual civil penalty for each day the violation, failure or refusal continues, from the

date of service of the underlying notice of violation, cessation order or other order incorporated in a final decision issued by the director until abatement or compliance is achieved.

[11-29-97; 19.8.31.3110 NMAC - Rn, 19 NMAC 8.2.31.3110, 9-29-2000; A, 12-31-2007]

19.8.31.3111 PROCEDURE FOR ASSESSMENT OF INDIVIDUAL CIVIL PENALTY:

A. The director shall serve on each individual to be assessed an individual civil penalty a notice or proposed individual civil penalty assessment, including a narrative explanation of the reasons for the penalty, the amount to be assessed, and a copy of any underlying notice of violation and cessation order.

B. The notice of proposed individual civil penalty assessment shall become a final order of the director 30 days after service upon the individual unless:

(1) the individual files within 30 days of service of the notice of proposed individual civil penalty assessment a petition for review in accordance with 19.8.12.1203 NMAC; or

(2) the director and the individual or responsible corporate permittee agree within 30 days of service of the notice or proposed individual civil penalty assessment to a schedule or plan for the abatement or correction of the violation, failure or refusal.

C. Service. For purposes of this section, service is sufficient if it would satisfy SCRA 1986, 1-004 for service of a summons and complaint.

[11-29-97; 19.8.31.3111 NMAC - Rn, 19 NMAC 8.2.31.3111, 9-29-2000]

19.8.31.3112 PAYMENT OF PENALTY:

A. If a notice of proposed individual civil penalty assessment becomes a final order in the absence of a petition for review or abatement agreement, the penalty shall be due upon issuance of the final order.

B. If an individual named in a notice of proposed individual civil penalty assessment files for review in accordance with 19.8.12.1203 NMAC, the penalty shall be due upon issuance of a final administrative order affirming, increasing or decreasing the proposed penalty.

C. Where the director and the corporate permittee or individual have agreed in writing on a plan for the abatement of or compliance with the unabated order, an individual named in a notice of proposed individual civil penalty assessment may postpone payment until receiving either a final order from the director stating that the penalty is due on the date of such final order, or written notice that abatement or compliance is satisfactory and the penalty has been withdrawn.

[11-29-97; 19.8.31.3112 NMAC - Rn, 19 NMAC 8.2.31.3112, 9-29-2000]

19.8.31.3113 CRIMINAL PENALTIES:

Under Section 69-25A-22 NMSA 1978, the director may request the attorney general to pursue criminal penalties against any person who:

A. willfully and knowingly violates a condition of the permit;

B. willfully and knowingly fails or refuses to comply with:

(1) any order issued under 69-25A-25 or 69-25A-30 NMSA 1978; or

(2) any order incorporated into a final decision issued by the director under the act (except for those orders specifically excluded under Subsection E of 69-25A-22 NMSA 1978); or

C. knowingly makes any false statement, representation, or certification, or knowingly fails to make any statement, representation, or certification in any application, record, report, plan, or other document filed with or required to be maintained by the director, or any order or decision issued by the director under the act.

[19.8.31.3113 NMAC - N, 08-31-2010]

PART 32: SMALL OPERATOR ASSISTANCE PROGRAM

19.8.32.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.32.1 NMAC - N, 9-29-2000]

19.8.32.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.32.2 NMAC - N, 9-29-2000]

19.8.32.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[19.832.3 NMAC - N, 9-29-2000]

19.8.32.4 DURATION:

Permanent.

[19.8.32.4 NMAC - N, 9-29-2000]

19.8.32.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.32.5 NMAC - N, 9-29-2000]

19.8.32.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[RESERVED]

[19.8.32.7 NMAC - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.32.8-19.8.32.3199 [RESERVED]:

[19.8.32.8 - 19.8.32.3199 NMAC N, 9-29-2000]

19.8.32.3200 ELIGIBILITY FOR ASSISTANCE:

An applicant is eligible for assistance if he:

A. intends to apply for a permit pursuant to the act;

B. establishes that his probable total actual and attributed production from all locations during any consecutive 12-month period either during the term of his permit or during the first 5 years after issuance of his permit, whichever period is shorter, will not exceed 300,000 tons. Production from the following operations shall be attributed to the applicant:

(1) the pro rata share, based upon percentage of ownership of applicant, of coal produced by operations in which the applicant owns more than a 10 percent interest;

(2) the pro rata share, based upon percentage of ownership of applicant, of coal produced in other operations by persons who own more than 10 percent of the applicant's operation;

(3) all coal produced by operations owned by persons who directly or indirectly control the applicant by reason of direction of the management;

(4) all coal produced by operations owned by members of the applicant's family and the applicants' relatives, unless it is established that there is no direct or indirect business relationship between or among them.

C. is not restricted in any manner from receiving a permit under the permanent regulatory program; and

D. does not organize or reorganize his company solely for the purpose of obtaining assistance under the SOAP.

[11-29-97; 19.8.32.3200 NMAC - Rn, 19 NMAC 8.2.32.3200, 9-29-2000; A, 1-15-2002]

19.8.32.3201 FILING FOR ASSISTANCE:

Each application for assistance shall include the following information:

A. a statement of the operator's intent to file a permit application;

B. the names and addresses of:

(1) the permit applicant; and

(2) the operator if different from the applicant;

C. a schedule of the estimated total production of coal from the proposed permit area and all other locations from which production is attributed to the applicant under 19.8.32.3200 NMAC; the schedule shall include for each location:

(1) the operator or company names under which coal is or will be mined;

(2) the permit number and mine safety and health administration (MSHA) number;

(3) the registration number issued by the state mine inspector;

(4) the actual coal production during the year preceding the year for which the applicant under 19.8.32.3200 NMAC, and

(5) the estimated coal production and any production which may be attributed to the applicant for each year of the proposed permit;

D. a description of:

(1) the proposed method of coal mining;

(2) the anticipated starting and termination dates of mining operations;

(3) the number of acres of land to be affected by the proposed mining operation; and

(4) a general statement on the probable depth and thickness of the coal resource including a statement of reserves in the permit area and the method by which they were calculated;

E. a U.S. geological survey topographic map at a scale of 1:24,000 or larger or other topographic map of equivalent detail which clearly shows:

(1) the area of land to be affected;

(2) the location of any existing or proposed test borings; and

(3) the location and extent of known workings of any underground mines.

F. copies of documents which show that:

(1) the applicant has a legal right to enter and commence mining within the permit area; and

(2) a legal right of entry has been obtained for the director and laboratory personnel to inspect the lands to be mined and adjacent areas to collect environmental data or to install necessary instruments.

[11-29-97; 19.8.32.3201 NMAC - Rn, 19 NMAC 8.2.32.3201, 9-29-2000]

19.8.32.3202 APPLICATION APPROVAL AND NOTICE:

A. If the director finds the applicant eligible, he shall inform the applicant in writing that the application is approved.

B. If the director finds the applicant ineligible, he shall inform the applicant in writing that the application is denied and shall state the reasons for denial.

[11-29-97; 19.8.32.3202 NMAC - Rn, 19 NMAC 8.2.32.3202, 9-29-2000]

19.8.32.3203 PROGRAM SERVICES AND DATA REQUIREMENTS:

A. To the extent possible with available funds, the director shall select and pay a qualified laboratory to make the determination and statement and provide other services referenced in Subsection B of 19.8.32.3203 NMAC for eligible operators who request assistance.

B. The director shall determine the data needed for each applicant or group of applicants. Data collected and the results provided to the director shall be sufficient to satisfy the requirements for:

(1) the determination of the probable hydrologic consequences of the surface mining and reclamation operations in the proposed permit area and adjacent areas, including the engineering analyses and designs necessary for the determination in accordance with Subsection C of 19.8.9.907 NMAC and any other applicable provisions of 19.8 NMAC;

(2) the drilling and statement of the results of test borings or core samplings for the proposed permit area in accordance with 19.8.8.803 NMAC and any other applicable provisions of 19.8.1 through 19.8.35 NMAC;

(3) the development of cross-section maps and plans required by 19.8.8.813 NMAC;

(4) the collection of archaeological and historic information and related plans required by 19.8.8.801 NMAC and 19.8.9.912 NMAC and any other archaeological and historic information required by the regulatory authority;

(5) pre-blast surveys required by Subsection E of 19.8.9.902 NMAC; and

(6) the collection of site-specific resources information, the production of protection and enhancement plans for fish and wildlife habitats required by 19.8.8.809 NMAC and 19.8.9.905 NMAC, and information and plans for any other environmental values required by the regulatory authority under SMCRA and the act.

C. Data collection and analysis may proceed concurrently with the development of mining and reclamation plans by the operator.

D. Data collected under this program shall be made publicly available in accordance with the New Mexico Public Record Act. The director shall develop procedures for interstate coordination and exchange of data.

[11-29-97; 19.8.32.3203 NMAC - Rn, 19 NMAC 8.2.32.3203, 9-29-2000; A, 1-15-2002]

19.8.32.3204 QUALIFIED LABORATORIES:

A. Basic qualifications. To be designated a qualified laboratory, a firm shall demonstrate that it:

(1) is staffed with experienced, professional or technical personnel in the fields applicable to the work to be performed;

(2) has adequate space for material preparation and cleaning and sterilizing equipment and has stationary equipment, storage, and space to accommodate workloads during peak periods;

(3) meets applicable federal or state safety and health requirements;

(4) has analytical, monitoring and measuring equipment capable of meeting applicable standards; and

(5) has the capability of collecting necessary field samples and making hydrologic field measurements and analytical laboratory determinations by acceptable requirements of 19.8.8.802 NMAC, 19.8.8.804 NMAC and Subsection C of 19.8.9.907 NMAC and any other applicable provisions of this part; other appropriate methods or guidelines for data acquisition may be approved by the director;

(6) has the capability of performing services for either the determination or statement referenced in Subsection B of 19.8.32.3204 NMAC.

B. Subcontractors. Subcontractors may be used to provide some of the required services provided their use is identified at the time a determination is made that a firm is qualified and they meet requirements specified by the director.

C. Disqualification. The director shall disqualify a designated laboratory if that laboratory is interested, directly or indirectly in an applicant for small operator assistance.

[11-29-97; 19.8.32.3204 NMAC - Rn, 19 NMAC 8.2.32.3204, 9-29-2000]

19.8.32.3205 ALLOCATION OF FUNDS:

The director shall establish a formula for allocating funds to provide services for eligible small operators if available funds are less than those required to provide services pursuant to this part.

[11-29-97; 19.8.32.3205 NMAC - Rn, 19 NMAC 8.2.32.3205, 9-29-2000]

19.8.32.3206 APPLICANT LIABILITY:

A. The applicant shall reimburse the director for the cost of the services rendered pursuant to this part if:

(1) the applicant submits false information, fails to submit a permit application within 1 year from the date of receipt of the approved laboratory report, or fails to mine after obtaining a permit;

(2) the director finds that the applicant's actual and attributed annual production of coal for all locations exceeds 300,000 tons during any consecutive 12-month period either during the term of the permit for which assistance is provided or during the first 5 years after issuance of the permit whichever is shorter, or

(3) the permit is sold, transferred, or assigned to another person and the transferee's total actual and attributed production exceeds the 300,000 tons annual production limit during any consecutive 12-month period of the remaining term of the permit. Under this paragraph the applicant and its successor are jointly and severally obligated to reimburse the director.

B. The director may waive the reimbursement obligation if he finds that the applicant at all times acted in good faith.

[11-29-97; 19.8.32.3206 NMAC - Rn, 19 NMAC 8.2.32.3206, 9-29-2000; A, 1-15-2002]

PART 33: TRAINING AND CERTIFICATION OF BLASTERS

19.8.33.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.33.1 NMAC - N, 9-29-2000]

19.8.33.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.33.2 NMAC - N, 9-29-2000]

19.8.33.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[19.8.33.3 NMAC - N, 9-29-2000]

19.8.33.4 DURATION:

Permanent.

[19.8.33.4 NMAC - N, 9-29-2000]

19.8.33.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.33.5 NMAC - N, 9-29-2000]

19.8.33.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.33.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.33.7 DEFINITIONS:

Blaster means a person directly responsible for the use of explosives in surface coal mining operations who is certified under this part. Persons working under the direct supervision of a certified blaster need not be certified.

[11-29-97; 19.8.33.7 NMAC - Rn, 19 NMAC 8.2.33.3300, 9-29-2000]

[Other Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.33.8-19.8.33.3300 [RESERVED]:

[19.8.33.8 - 19.8.33.3300 NMAC - N, 9-29-2000]

19.8.33.3301 RESPONSIBILITY:

The director shall require blasters who are directly responsible for use of explosives in a surface coal mining operation to be certified within 12 months after approval of this section as part of the state program. Persons responsible solely for receiving, handling, transportation, drilling, or loading explosives need not be certified; individuals responsible for the conduct of blasting operations must be certified.

[11-29-97; 19.8.33.3301 NMAC - Rn, 19 NMAC 8.2.33.3301, 9-29-2000]

19.8.33.3302 ESTABLISHMENT OF BLASTER TRAINING PROGRAM:

A. Persons seeking to become certified as blasters shall receive training including, but not limited to the technical aspects of blasting operations and state and federal laws governing the storage, transportation and use of explosives; and

B. persons who are not certified and who are assigned to a blasting crew or assist in the use of explosives shall receive direction and on-the-job training from a blaster.

C. The director shall identify courses available to train persons responsible for the use of explosives in surface coal mining operations. The courses shall provide training and discuss practical applications of:

(1) explosives, including:

(a) selection of the type of explosive to be used;

(b) determination of the properties of explosives which will produce desired results at an acceptable level of risk; and

(c) handling, transportation, and storage;

(2) blast designs, including:

(a) geologic and topographic considerations;

(b) design of a blast hole, with critical dimensions;

(c) pattern design, field layout, and timing of blast holes; and

(d) field applications;

(3) loading blastholes, including priming and boosting;

(4) initiation systems and blasting machines;

(5) blasting vibrations, airblast and flyrock, including:

(a) monitoring techniques, and

(b) methods to control adverse affects;

(6) secondary blasting applications;

(7) current federal and state rules applicable to the use of explosives;

(8) blast records;

- (9) schedules;
- (10) preblasting survey, including:
 - (a) availability;
 - (b) coverage; and
 - (c) use of in-blast design;
- (11) blast-plan requirements;
- (12) certification and training;
- (13) signs, warning signals, and site control;
- (14) unpredictable hazards, including:
 - (a) lightning;
 - (b) stray currents;
 - (c) radio waves; and
 - (d) misfires.

[11-29-97; 19.8.33.3302 NMAC - Rn, 19 NMAC 8.2.33.3302, 9-29-2000]

19.8.33.3303 QUALIFICATION:

A. The director shall ensure that candidates for blaster certification are examined by reviewing and verifying the:

(1) competence of persons directly responsible for the use of explosives in surface coal mining operations through a written examination in technical aspects of blasting and state and federal laws governing the storage, use, and transportation of explosive; and

(2) practical field experience of the candidates as necessary to qualify a person to accept the responsibility for blasting operations in surface coal mining operations; such experience shall demonstrate that the candidate possesses a minimum of one year of practical field experience and knowledge of blasting techniques, understands the hazards involved in the use of explosives, and otherwise has exhibited a pattern of conduct consistent with the acceptance of responsibility for blasting operations.

B. Applicants for blaster certification shall be examined, at a minimum, in the topics set forth in 19.8.33.3302 NMAC and receive a minimum score of 80%.

[11-29-97; 19.8.33.3303 NMAC - Rn, 19 NMAC 8.2.33.3303, 9-29-2000]

19.8.33.3304 CERTIFICATION:

A. Issuance of certification. The director shall certify for a period of four years, those candidates examined and found to be competent and to have the necessary experience to accept responsibility for blasting operations in surface coal mining operations.

B. Suspension and revocation.

(1) The director, when practicable, following written notice and opportunity for a hearing, may, and upon a finding of willful conduct, shall suspend or revoke the certification of a blaster during the term of the certification or take other necessary action for any of the following reasons:

(a) non-compliance with any order of the regulatory authority;

(b) unlawful use in the work place of, or current addiction to, alcohol, narcotics, or other dangerous drugs;

(c) violation of any provision of the state or federal explosives laws or regulations; or

(d) providing false information or a misrepresentation to obtain certification;

(e) non-compliance with the provisions of the New Mexico Parental Responsibility Act, Sections 40-5A-1 et. seq. NMSA 1978. An applicant for a new certification or recertification shall provide their social security number to the director.

(2) If advance notice and opportunity for hearing cannot be provided, an opportunity for a hearing shall be provided as soon as practical following the suspension, revocation, or other adverse action.

(3) Upon notice of a revocation, the blaster shall immediately surrender to the regulatory authority the revoked certificate.

C. Recertification. The director shall require reexamination, training, and a demonstration of continued blaster competency at a maximum interval of four years.

D. Protection of certification. Certified blasters shall take every reasonable precaution to protect their certificates from loss, theft, or unauthorized duplication. Any such occurrence shall be reported immediately to the certifying authority.

E. Conditions. The director shall specify conditions for maintaining certification which shall include the following:

(1) a blaster shall immediately exhibit his or her certificate to any authorized representative of the director upon request;

(2) blasters' certifications shall not be assigned or transferred; and

(3) blasters shall not delegate their responsibility to any individual who is not a certified blaster.

[11-29-97; 19.8.33.3304 NMAC - Rn, 19 NMAC 8.2.33.3304, 9-29-2000]

PART 34: EXEMPTION FOR COAL EXTRACTION INCIDENTAL TO THE EXTRACTION OF OTHER MINERALS

19.8.34.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.34.1 NMAC - N, 9-29-2000]

19.8.34.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.34.2 NMAC - N, 9-29-2000]

19.8.34.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[19.8.34.3 NMAC - N, 9-29-2000]

19.8.34.4 DURATION:

Permanent.

[19.8.34.4 NMAC - N, 9-29-2000]

19.8.34.5 EFFECTIVE DATE:

November 29, 1997, unless a later date is cited at the end of a section.

[19.8.34.5 NMAC - N, 9-29-2000]

19.8.34.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.33.6 NMAC - N, 9-29-2000; A, 1-15-2002]

19.8.34.7 DEFINITIONS:

[RESERVED]

[19.8.34.7 NMAC - N, 9-29-2000]

[Definitions for this part can be found in 19.8.1.7 NMAC.]

19.8.34.8-19.8.34.3399 [RESERVED]:

[19.8.34.8 - 19.8.34.3399 NMAC - N, 9-29-2000]

19.8.34.3400 SCOPE:

This part implements the exemption contained in Paragraph (1) of Subsection P of Section 69-25A-3 NMSA 1978 concerning the extraction of coal incidental to the extraction of other minerals where coal does not exceed 16 2/3 percent of the total tonnage of coal and other minerals removed for purposes of commercial use or sale.

[11-29-97; 19.8.34.3400 NMAC - Rn, 19 NMAC 8.2.34.3400, 9-29-2000; A, 12-31-2007]

19.8.34.3401 DEFINITIONS:

As used in this part, the following terms have the meaning specified, except where otherwise indicated:

A. Cumulative measurement period means the period of time over which both cumulative production and cumulative revenue are measured.

(1) For purposes of determining the beginning of the cumulative measurement period, subject to approval by the director, the operator must select and consistently use one of the following:

(a) for mining areas where coal or other minerals were extracted prior to August 3, 1977, the date extraction of coal or other minerals commenced at that mining area or August 3, 1977, or

(b) for mining areas where extraction of coal or other minerals commenced on or after August 3, 1977, the date extraction of coal or other minerals commenced at that mining area, whichever is earlier.

(2) For annual reporting purposes pursuant to 19.8.34.3409 NMAC, the end of the period for which cumulative production and revenue is calculated is either:

(a) for mining areas where coal or other minerals were extracted prior to October 1, 1995, and every October 1 thereafter; or

(b) for mining areas where extraction of coal or other minerals commenced on or after October 1, 1995, the last day of the calendar quarter during which coal extraction commenced, and each anniversary of that day thereafter.

B. Cumulative production means the total tonnage of coal or other minerals extracted from a mining area during the cumulative measurement period. The inclusion of stockpiled coal and other mineral tonnages in this total is governed by 19.8.34.3407 NMAC.

C. Cumulative revenue means the total revenue derived from the sale of coal or other minerals and the fair market value of coal or other minerals transferred or used, but not sold, during the cumulative measurement period.

D. Mining area means an individual excavation site or pit from which coal, other minerals and overburden are removed.

E. Other minerals means any commercially valuable substance mined for its mineral value, excluding coal, topsoil, waste and fill material.

[11-29-97; 19.8.34.3401 NMAC - Rn, 19 NMAC 8.2.34.3401, 9-29-2000; A, 12-31-2007]

19.8.34.3402 APPLICATION REQUIREMENTS AND PROCEDURES:

A. New operations.

(1) Any person who plans to commence or continue coal extraction after October 1, 1995, in reliance on the incidental mining exemption shall file a complete application for exemption with the director for each mining area.

(2) No person may commence coal extraction based upon the exemption until the director approves such application, except as provided in Paragraph (3) of Subsection E of 19.8.34.3402 NMAC.

B. Existing operations. Any person who has commenced coal extraction at a mining area in reliance upon the incidental mining exemption prior to October 1, 1995, may continue mining operations for 60 days after October 1, 1995. Coal extraction may not

continue after such 60 day period unless that person files an administratively complete application or exemption with the director. If an administratively complete application is filed within 60 days the person may continue extracting coal in reliance on the exemption beyond the 60-day period until the director makes an administrative decision on such application.

C. Additional information. The director shall notify the applicant if the application for exemption is incomplete and may at any time require submittal of additional information.

D. Public comment period. Following publication of the newspaper notice required by Subsection I of 19.8.34.3403 NMAC, the director shall provide a period of no less than 30 days during which time any person having an interest which is or may be adversely affected by a decision on the application may submit written comments or objections.

E. Exemption determination.

(1) No later than 90 days after filing of an administratively complete application, the director shall make a written determination whether, and under what conditions, the persons claiming the exemption are exempt under this part, and shall notify the applicant and persons submitting comments on the application of the determination and the basis for the determination.

(2) The determination of exemption shall be based upon information contained in the application and any other information available to the director at that time.

(3) If the director fails to provide an applicant with the determination as specified in Paragraph (1) of Subsection E of 19.8.34.3402 NMAC, an applicant who has not begun may commence coal extraction pending a determination on the application unless the director issues an interim finding, together with reasons therefore, that the applicant may not begin coal extraction.

F. Administrative review.

(1) Any adversely affected person may request administrative review of a determination under Subsection E of 19.8.34.3402 NMAC within 30 days of the notification of such determination in accordance with procedures established under 19.8.12.1200 NMAC.

(2) A petition for administrative review filed under 19.8.12.1200 NMAC shall not suspend the effect of a determination under Subsection E of 19.8.34.3402 NMAC.

[11-29-97; 19.8.34.3402 NMAC - Rn, 19 NMAC 8.2.34.3402, 9-29-2000; A, 12-31-2007; A, 08-31-2010]

19.8.34.3403 CONTENTS OF APPLICATIONS FOR EXEMPTION:

An application for exemption shall include at a minimum:

- A.** the name and address of the applicant;
- B.** a list of the minerals sought to be extracted;
- C.** estimates of annual production of coal and the other minerals within each mining area over the anticipated life of the mining operation;
- D.** estimated annual revenues to be derived from bona fide sales of coal and other minerals to be extracted within the mining area;
- E.** where coal or the other minerals are to be used rather than sold, estimated annual fair market values at the time of projected use of the coal and other minerals to be extracted from the mining area;
- F.** the basis for all annual production, revenue, and fair market value estimates;
- G.** a description, including county, township if any, and boundaries of the land, of sufficient certainty that the mining areas may be located and distinguished from other mining areas;
- H.** an estimate to the nearest acre of the number of acres that will compose the mining area over the anticipated life of the mining operation;
- I.** evidence of publication in a newspaper of general circulation in the county of the mining area, of a public notice that an application for exemption has been filed with the director (the public notice must identify the persons claiming the exemption and must contain a description of the proposed operation and its locality that is sufficient for interested persons to identify the operation);
- J.** representative stratigraphic cross-section(s) based on test borings or other information identifying and showing the relative position, approximate thickness and density of the coal and each other mineral to be extracted for commercial use or sale and the relative position and thickness of any material, not classified as other minerals, that will also be extracted during the conduct of mining activities;
- K.** a map of appropriate scale which clearly identifies the mining area;
- L.** a general description of mining and mineral processing activities for the mining area;

M. a summary of sales commitments and agreements for future delivery, if any, which the applicant has received for other minerals to be extracted from the mining area, or a description of potential markets for such minerals;

N. if the other minerals are to be commercially used by the applicant, a description specifying the use;

O. for operations having extracted coal or other minerals prior to filing an application for exemption, in addition to the information required above, the following information must also be submitted:

(1) any relevant documents the operator has received from the director documenting its exemption from the requirements of 69-25A-1 through 35 NMSA 1978;

(2) the cumulative production of the coal and other minerals from the mining area; and

(3) estimated tonnages of stockpiled coal and other minerals; and

P. any other information pertinent to the qualification of the operation as exempt.

[11-29-97; 19.8.34.3403 NMAC - Rn, 19 NMAC 8.2.34.3403, 9-29-2000; A, 12-31-2007]

19.8.34.3404 PUBLIC AVAILABILITY OF INFORMATION:

A. Except as provided in Subsection B of 19.8.34.3404 NMAC, all information submitted to the director under this part shall be made immediately available for public inspection and copying at the local offices of the director until at least three years after expiration of the period during which the subject mining area is active.

B. The director may keep information submitted under this part confidential if the person submitting it requests in writing, at the time of submission, that it be kept confidential and the information concerns trade secrets or is privileged commercial or financial information of the persons intending to conduct operations under this part.

C. Information requested to be held as confidential under Subsection B of 19.8.34.3404 NMAC shall not be made publicly available until after notice and opportunity to be heard is afforded persons both seeking and opposing disclosure of the information.

[11-29-97; 19.8.34.3404 NMAC - Rn, 19 NMAC 8.2.34.3404, 9-29-2000; A, 12-31-2007]

19.8.34.3405 REQUIREMENTS FOR EXEMPTIONS:

A. Activities are exempt from the requirements of 69-25A-1 through 35 NMSA 1978 if all of the following are satisfied:

(1) the cumulative production of coal extracted from the mining area determined annually as described in this subsection does not exceed 16 2/3 percent of the total cumulative production of coal and other minerals removed during such period for purposes of bona fide sale or reasonable commercial use;

(2) coal is produced from a geological stratum lying above or immediately below the deepest stratum from which other minerals are extracted for the purposes of bona fide sale or reasonable commercial use;

(3) the cumulative revenue derived from the coal extracted from the mining area determined annually shall not exceed 50 percent of the total cumulative revenue derived from the coal and other minerals removed for purposes of bona fide sale or reasonable commercial use; if the coal extracted or the minerals removed are used by the operator or transferred to a related entity for use instead of being sold in a bona fide sale, then the fair market value of the coal or other minerals shall be calculated at the time of use or transfer and shall be considered rather than revenue.

B. Persons seeking or that have obtained an exemption from the requirements of the act shall comply with the following:

(1) each other mineral upon which an exemption under this part is based must be a commercially valuable mineral for which a market exists or which is mined in bona fide anticipation that a market will exist for the mineral in the reasonably foreseeable future, not to exceed twelve months from the end of the current period for which cumulative production is calculated; a legally binding agreement for the future sale of other minerals is sufficient to demonstrate the above standard;

(2) if either coal or other minerals are transferred or sold by the operator to a related entity for its use or sale, the transaction must be made for legitimate business purposes.

[11-29-97; 19.8.34.3405 NMAC - Rn, 19 NMAC 8.2.34.3405, 9-29-2000; A, 12-31-2007]

19.8.34.3406 CONDITIONS OF EXEMPTION AND RIGHT OF INSPECTION AND ENTRY:

A person conducting activities covered by this part shall:

A. maintain, on-site or at other locations available to the authorized representative of the director and the secretary of the interior, information necessary to verify the exemption including, but not limited to, commercial use and sales information, extraction tonnages, and a copy of the exemption application and exemption approved by the director;

B. notify the director upon the completion of the mining operation or permanent cessation of all coal extraction activities; and

C. conduct operations in accordance with the approved application or when authorized to extract coal under Subsection B of 19.8.34.3402 NMAC or Paragraph (3) of Subsection E of 19.8.34.3402 NMAC prior to submittal or approval of an exemption application, in accordance with the standards of this part.

D. Authorized representatives of the director and the secretary of the interior shall have the right to conduct inspections of operations claiming exemption under this part.

E. Each authorized representative of the director and the secretary of the interior conducting an inspection under this part:

(1) shall have a right of entry to, upon, and through any mining and reclamation operations without advance notice or a search warrant, upon presentation of appropriate credentials;

(2) may, at reasonable times and without delay, have access to and copy any records relevant to the exemption; and

(3) shall have a right to gather physical and photographic evidence to document conditions, practices or violations at a site.

F. No search warrant shall be required with respect to any activity under Subsections D and E of 19.8.34.3406 NMAC, except that a search warrant may be required for entry into a building.

[11-29-97; 19.8.34.3406 NMAC - Rn, 19 NMAC 8.2.34.3406, 9-29-2000; A, 12-31-2007]

19.8.34.3407 STOCKPILING OF MINERALS:

A. Coal. Coal extracted and stockpiled may be excluded from the calculation of cumulative production until the time of its sale, transfer to a related entity or use:

(1) up to an amount equaling a 12-month supply of the coal required for future sale, transfer or use as calculated based upon the average annual sales, transfer and use from the mining area over the two preceding years; or

(2) for a mining area where coal has been extracted for a period of less than two years, up to an amount that would represent a 12-month supply of the coal required for future sales, transfer or use as calculated based on the average amount of coal sold, transferred or used each month.

B. Other minerals.

(1) The director shall disallow all or part of an operator's tonnages of stockpiled other minerals for purposes of meeting the requirements of this part if the operator fails to maintain adequate and verifiable records of the mining area of origin,

the disposition of stockpiles or if the disposition of the stockpiles indicates the lack of commercial use or market for the minerals.

(2) The director may only allow an operator to utilize tonnages of stockpiled other minerals for purposes of meeting the requirements of this part if:

(a) the stockpiling is necessary to meet market conditions or is consistent with generally accepted industry practices; and

(b) except as provided in Paragraph (3) of Subsection B of 19.8.34.3407 NMAC, the stockpiled other minerals do not exceed a 12-month supply of the mineral required for future sales as approved by the director on the basis of the exemption application.

(3) The director may allow an operator to utilize tonnages of stockpiled other minerals beyond the 12-month limit established in Paragraph (2) of Subsection B of 19.8.34.3407 NMAC if the operator can demonstrate to the director's satisfaction that the additional tonnage is required to meet future business obligations of the operator, such as may be demonstrated by a legally binding agreement for future delivery of the minerals.

(4) The director may periodically revise the other mineral stockpile tonnage limits in accordance with the criteria established by Paragraphs (2) and (3) of Subsection B of 19.8.34.3407 NMAC based on additional information available to the director.

[11-29-97; 19.8.34.3407 NMAC - Rn, 19 NMAC 8.2.34.3407, 9-29-2000; A, 12-31-2007]

19.8.34.3408 REVOCATION AND ENFORCEMENT:

A. Responsibility of the director. The director shall conduct an annual compliance review of the mining area utilizing the annual report submitted pursuant to 19.8.34.3409 NMAC, an on-site inspection and any other information available to the director.

B. If the director has reason(s) to believe that a specific mining area was not exempt under the provisions of this part at the end of the previous reporting period, is not exempt, or will be unable to satisfy the exemption criteria at the end of the current reporting period, the director shall notify the operator that the exemption may be revoked and the reason(s) therefor. The exemption will be revoked unless the operator demonstrates to the director within 30 days that the mining area in question should continue to be exempt.

C. Director's finding and administrative review.

(1) If the director finds that an operator has not demonstrated that activities conducted in the mining area qualify for the exemption, the director shall revoke the

exemption and immediately notify the operator and intervenors. If a decision is made not to revoke an exemption, the director shall immediately notify the operator and intervenors.

(2) Any adversely affected person may request administrative review of a decision whether to revoke an exemption within 30 days of the notification of such decision in accordance with procedures established under 19.8.12.1200 NMAC.

(3) A petition for administrative review filed under 19.8.12.1200 NMAC shall not suspend the effect of a decision whether to revoke an exemption.

D. Direct enforcement.

(1) An operator mining in accordance with the terms of an approved exemption shall not be cited for violations of these regulations which occurred prior to the revocation of the exemption.

(2) An operator who does not conduct activities in accordance with the terms of an approved exemption and knows or should know such activities are not in accordance with the approved exemption shall be subject to direct enforcement action for violations of these regulations which occur during the period of such activities.

(3) Upon revocation of an exemption or denial of an exemption application an operator shall stop conducting surface coal mining operations until a permit is obtained and shall comply with the reclamation standards of these regulations with regard to conditions, areas and activities existing at the time of revocation or denial.

[11-29-97; 19.8.34.3408 NMAC - Rn, 19 NMAC 8.2.34.3408, 9-29-2000; A, 12-31-2007; A, 08-31-2010]

19.8.34.3409 REPORTING REQUIREMENTS:

A. Annual report.

(1) Following approval by the director of an exemption for a mining area, the person receiving the exemption shall, for each mining area, file a written report annually with the director containing the information specified in Subsection B of 19.8.34.3409 NMAC.

(2) The report shall be filed no later than 30 days after the end of the 12-month period as determined in accordance with the definition of "cumulative measurement period" in 19.8.34.3401 NMAC.

(3) The information in the report shall cover:

(a) annual production of coal and other minerals and annual revenue derived from coal and other minerals during the preceding 12-month period; and

(b) the cumulative production of coal and other minerals and the cumulative revenue derived from coal and other minerals.

B. For each period and mining area covered by the report, the report shall specify:

(1) the number of tons of extracted coal sold in bona fide sales and total revenue derived from such sales;

(2) the number of tons of coal extracted and used or transferred by the operator or related entity and the estimated total fair market value of such coal;

(3) the number of tons of coal stockpiled;

(4) the number of tons of other commercially valuable minerals extracted and sold in bona fide sales and total revenue derived from such sales;

(5) the number of tons of other commercially valuable minerals extracted and used or transferred by the operator or related entity and the estimated total fair market value of such minerals; and

(6) the number of tons of other commercially valuable minerals removed and stockpiled by the operator.

[11-29-97; 19.8.34.3409 NMAC - Rn, 19 NMAC 8.2.34.3409, 9-29-2000; A, 12-31-2007]

PART 35: VALID EXISTING RIGHTS

19.8.35.1 ISSUING AGENCY:

New Mexico Coal Surface Mining Commission.

[19.8.35.1 NMAC - N, 1-15-2002]

19.8.35.2 SCOPE:

All persons subject to the New Mexico Surface Mining Act, NMSA 1978, Sections 69-25A-1 et. Seq. (1979).

[19.8.35.2 NMAC - N, 1-15-2002]

19.8.35.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 69-25A-1 et. seq. (1979).

[19.8.35.3 NMAC - N, 1-15-2002]

19.8.35.4 DURATION:

Permanent.

[19.8.35.4 NMAC - N, 1-15-2002]

19.8.35.5 EFFECTIVE DATE:

January 15, 2002, unless a later date is cited at the end of a section.

[19.8.35.5 NMAC - N, 1-15-2002]

19.8.35.6 OBJECTIVE:

The objective of Parts 1 - 35 of Chapter 8 is to establish regulations to implement the New Mexico Surface Mining Act as directed in NMSA 1978, Section 69-25A-5 (1979). These regulations are intended to ensure proper reclamation through permitting for operations subject to the New Mexico Surface Mining Act, in accordance with provisions and standards outlined in the New Mexico Surface Mining Act.

[19.8.35.6 NMAC - N, 1-15-2002]

19.8.35.7 DEFINITIONS:

A. VALID EXISTING RIGHTS (VER) means a set of circumstances under which a person may, subject to regulatory authority approval, conduct surface coal mining operations on lands where 19.8.2.201 NMAC would otherwise prohibit such operations. Possession of valid existing rights only confers an exception from the prohibitions of 19.8.2.201 NMAC. A person seeking to exercise valid existing rights must comply with all other pertinent requirements of the act, 19.8 NMAC and SMCRA.

(1) Property rights demonstration. Except as provided in Subsection D of 19.8.35.7 NMAC, a person claiming valid existing rights must demonstrate that a legally binding conveyance, lease, deed, contract, or other document vests that person, or a predecessor in interest, with the right to conduct the type of surface coal mining operations intended. This right must exist at the time that the land came under the protection of 19.8.2.201 NMAC. Other applicable state statutory or case law will govern interpretation of documents relied upon to establish property rights, unless federal law provides otherwise.

(2) Except as provided in Subsection D of 19.8.35.7 NMAC, a person claiming valid existing rights also must demonstrate compliance with one of the following standards:

B. GOOD FAITH/ALL PERMITS STANDARD. All permits and other authorizations required to conduct surface coal mining operations had been obtained, or a good faith effort to obtain all necessary permits and authorizations had been made, before the land came under the protection of 19.8.2.201 NMAC. At a minimum, an application must have been submitted for any permit required under 19.8 NMAC.

C. NEED FOR AND ADJACENT STANDARD. The land is needed for and immediately adjacent to a surface coal mining operation for which all permits and other authorizations required to conduct surface coal mining operations had been obtained, or a good faith attempt to obtain all permits and authorizations had been made, before the land came under the protection of 19.8.2.201 NMAC. To meet this standard, a person must demonstrate that prohibiting expansion of the operation onto that land would unfairly impact the viability of the operation as originally planned before the land came under the protection of 19.8.2.201 NMAC. Except for operations in existence before August 3, 1977, or for which a good faith effort to obtain all necessary permits had been made before August 3, 1977, this standard does not apply to lands already under the protection of 19.8.2.201 NMAC when the permit for the original operation was issued by the director or when the good faith effort to obtain all necessary permits for the original operation was made. The director may consider the following factors when evaluating whether a person meets this standard:

(1) The extent to which coal supply contracts or other legal and business commitments that predate the time that the land came under the protection of 19.8.2.201 NMAC depend upon use of that land for surface coal mining operations.

(2) The extent to which plans used to obtain financing for the operation before the land came under the protection of 19.8.2.201 NMAC rely upon use of that land for surface coal mining operations.

(3) The extent to which investments in the operation before the land came under the protection of 19.8.2.201 NMAC rely upon use of that land for surface coal mining operations.

(4) Whether the land lies within the area identified on the life-of-mine map submitted under Subsection C of 19.8.8.812 NMAC before the land came under the protection of 19.8.2.201 NMAC.

D. ROADS. A person who claims valid existing rights to use or construct a road across the surface of lands protected by 19.8.2.201 NMAC must demonstrate that one or more of the following circumstances exist if the road is included within the definition of "surface coal mining operations" in Paragraph (20) of Subsection S of 19.8.1.7 NMAC:

(1) the road existed when the land upon which it is located came under the protection of 19.8.2.201 NMAC, and the person has a legal right to use the road for surface coal mining operations;

(2) a properly recorded right of way or easement for a road in that location existed when the land came under the protection of 19.8.2.201 NMAC, and, under the document creating the right of way or easement, and under subsequent conveyances, the person has a legal right to use or construct a road across the right of way or easement for surface coal mining operations;

(3) a valid permit for use or construction of a road in that location for surface coal mining operations existed when the land came under the protection of 19.8.2.201 NMAC;

(4) a valid existing right exists under Paragraphs (1) and (2) of Subsection A of 19.8.35.7 NMAC.

[19.8.35.7 NMAC - N, 1-15-2002]

19.8.35.8 SUBMISSION AND PROCESSING OF REQUESTS FOR VER DETERMINATIONS:

A. The director will be responsible for making a determination on valid and existing rights for lands protected under 19.8.2.201 NMAC, with the exception of federal lands in protected features listed in Subsection F of 19.8.2.201 NMAC. A determination on valid existing rights not subject to the review of the director would be the responsibility of OSM.

B. A request for a valid and existing right must be submitted to the director, consistent with the provisions of Subsection A of 19.8.35.8 NMAC, if the request concerns the operation of a surface coal mine on the basis of valid existing rights under 19.8.2.201 NMAC or wish to confirm the right to do so. This request may be submitted before preparing and submitting an application for a permit or boundary revision for the land.

[19.8.35.8 NMAC - N, 1-15-2002]

19.8.35.9 REQUIREMENTS FOR A VER PROPERTY RIGHTS DEMONSTRATION:

A. A demonstration of property rights under the definition of valid existing rights in Paragraph (1) of Subsection A of 19.8.35.7 NMAC must be provided to the director if the request relies upon the good faith/all permits standard or the needed for and adjacent standard identified in Paragraph (2) of Subsection A of 19.8.35.7 NMAC. This demonstration must include the following:

(1) a legal description of the land to which the request pertains;

(2) complete documentation of the character and extent of the current interests in the surface and mineral estates of the land to which the request pertains;

(3) a complete chain of title for the surface and mineral estates of the land to which the request pertains;

(4) a description of the nature and effect of each title instrument that forms the basis for the request, including any provision pertaining to the type or method of mining or mining-related surface disturbances and facilities;

(5) a description of the type and extent of surface coal mining operations that the requester claim the right to conduct, including the method of mining, any mining-related surface activities and facilities, and an explanation of how those operations would be consistent with New Mexico property law;

(6) complete documentation of the nature and ownership, as of the date that the land came under the protection of 19.8.2.201 NMAC, of all property rights for the surface and mineral estates of the land to which the request pertains;

(7) names and addresses of the current owners of the surface and mineral estates of the land to which the request pertains;

(8) if the coal interests have been severed from other property interests, it must be documented that the owners of other property interests in the land to which the request pertains have been notified and provided reasonable opportunity to comment on the validity of the property rights claims;

(9) any comments received in response to the notification provided under Paragraph (8) of Subsection A of 19.8.35.9 NMAC.

B. Requirements for good faith/all permits standard. If a request relies upon the good faith/all permits standard in Subsection B of 19.8.35.7 NMAC, a submittal must include information required by Subsection A of 19.8.35.8 NMAC. The following information about permits, licenses, and authorizations for surface coal mining operations on the land to which the request pertains must also be submitted:

(1) approval and issuance dates and identification numbers for any permits, licenses, and authorizations that the requester for VER or a predecessor in interest obtained before the land came under the protection of 19.8.2.201 NMAC;

(2) application dates and identification numbers for any permits, licenses, and authorizations for which the requester or a predecessor in interest submitted a request before the land came under the protection of 19.8.2.201 NMAC;

(3) an explanation of any other good faith effort that the person making the VER or a predecessor in interest made to obtain the necessary permits, licenses, and authorizations as of the date that the land came under the protection of 19.8.2.201 NMAC.

C. Requirements for needed for and adjacent standard. If a request relies upon the needed for and adjacent standard in Subsection C of 19.8.35.7 NMAC, the information required under Subsection A of 19.8.35.9 NMAC must be submitted. In addition, the requester must explain how and why the land is needed for and immediately adjacent to the operation upon which the request is based, including a demonstration that prohibiting expansion of the operation onto that land would unfairly impact the viability of the operation as originally planned before the land came under the protection of 19.8.2.201 NMAC.

D. Requirements for standards for mine roads. If a request relies upon one of the standards for roads in Paragraphs (1) through (3) of Subsection D of 19.8.35.7 NMAC, the requester must submit satisfactory documentation that:

(1) the road existed when the land upon which it is located came under the protection of 19.8.2.201 NMAC, and the person making the VER request has a legal right to use the road for surface coal mining operations;

(2) a properly recorded right of way or easement for a road in that location existed when the land came under the protection of 19.8.2.201 NMAC, and, under the document creating the right of way or easement, and under any subsequent conveyances, the person making the VER request has a legal right to use or construct a road across that right of way or easement to conduct surface coal mining operations; or

(3) a valid permit for use or construction of a road in that location for surface coal mining operations existed when the land came under the protection of 19.8.2.201 NMAC.

[19.8.35.9 NMAC - N, 1-15-2002]

19.8.35.10 INITIAL REVIEW OF A VER REQUEST:

A. The director must conduct an initial review to determine whether a VER request includes all applicable components of the submission requirements of 19.8.35.9 NMAC. This review pertains only to the completeness of the request, not the legal or technical adequacy of the materials submitted.

B. If a request does not include all applicable components of the submission requirements of 19.8.35.9 NMAC, the director must notify the applicant and establish a reasonable time for submission of the missing information.

C. When a request includes all applicable components of the submission requirements of 19.8.35.9 NMAC, the director must implement the notice and comment requirements of 19.8.35.11 NMAC.

D. If the person making the VER does not provide information that the director requests under Subsection B of 19.8.35.10 NMAC within the time specified or as

subsequently extended, the director must issue a determination that the requester has not demonstrated valid existing rights, as provided in Subsection D of 19.8.35.12 NMAC.

[19.8.35.10 NMAC - N, 1-15-2002]

19.8.35.11 NOTICE AND COMMENT REQUIREMENTS AND PROCEDURES VER REQUEST:

A. When the person making the VER request satisfies the completeness requirements of 19.8.35.10 NMAC, the person requesting the VER must publish a notice for two consecutive weeks in a newspaper of general circulation in the county in which the land is located. An affidavit of publication will be provided to the director after the notice has been published. Each notice must include:

- (1) the location of the land to which the request pertains;
- (2) a description of the type of surface coal mining operations planned;
- (3) a reference to and brief description of the applicable standard(s) under the definition of valid existing rights in 19.8.2.102 NMAC;

(a) if the request relies upon the good faith/all permits standard or the needed for and adjacent standard in Paragraph (2) of Subsection A of 19.8.35.7 NMAC, the notice also must include a description of the property rights that the person making the VER claims and the basis for the claim;

(b) if a request relies upon the standard in Paragraph (1) of Subsection D of 19.8.35.7 NMAC, the notice also must include a description of the basis by which the person making the VER request claims that the road existed when the land came under the protection of 19.8.2.201 NMAC; in addition, the notice must include a description of the basis of the claim by which the person making the VER request has a legal right to use that road for surface coal mining operations;

(c) if a request relies upon the standard in Paragraph (2) of Subsection D of 19.8.35.7 NMAC, the notice also must include a description of the basis for the claim that a properly recorded right of way or easement for a road in that location existed when the land came under the protection of 19.8.2.201 NMAC; in addition, the notice must include a description of the basis for the claim that, under the document creating the right of way or easement, and under any subsequent conveyances, the person making the VER request has a legal right to use or construct a road across the right of way or easement to conduct surface coal mining operations;

(4) if a request relies upon one or more of the standards in Paragraph (2) of Subsections A of 19.8.35.7 NMAC , and Paragraphs (1) and (2) of Subsection D of 19.8.35.7 NMAC, a statement that the director will not make a decision on the merits of

a request if, by the close of the comment period under this notice or the notice required by Subsection C of 19.8.35.12 NMAC, a person with a legal interest in the land initiates appropriate legal action in the proper venue to resolve any differences concerning the validity or interpretation of the deed, lease, easement, or other documents that form the basis of a claim;

(5) a description of the procedures that the director will follow in processing a request;

(6) the closing date of the comment period, which must be a minimum of 30 days after the publication date of the notice;

(7) a statement that interested persons may obtain a 30-day extension of the comment period upon request;

(8) the name and address of the director's office where a copy of the request is available for public inspection and to which comments and requests for extension of the comment period should be sent.

B. The director must promptly provide a copy of the notice required under Subsection A of 19.8.35.11 NMAC to:

(1) all reasonably locatable owners of surface and mineral estates in the land included in a request;

(2) the owner of the feature causing the land to come under the protection of 19.8.2.201 NMAC, and, when applicable, the agency with primary jurisdiction over the feature with respect to the values causing the land to come under the protection of 19.8.2.201 NMAC. For example, both the landowner and the state historic preservation officer must be notified if surface coal mining operations would adversely impact any site listed on the national register of historic places. As another example, both the surface owner and the national park service must be notified if the request includes non-federal lands within the authorized boundaries of a unit of the national park system.

C. The letter transmitting the notice required under Subsection B of 19.8.35.11 NMAC must provide a 30-day comment period, starting from the date of service of the letter, and specify that another 30 days are available upon request. The director may grant additional time for good cause upon request. The director need not consider comments received after the closing date of the comment period.

[19.8.35.11 NMAC - N, 1-15-2002]

19.8.35.12 HOW A DECISION ON A VER REQUEST WILL BE MADE:

A. The director must review the materials submitted under 19.8.35.8 NMAC, comments received under 19.8.35.11 NMAC, and any other relevant, reasonably

available information to determine whether the record is sufficiently complete and adequate to support a decision on the merits of the request. If not, the director must notify the requester in writing, explaining the inadequacy of the record and requesting submittal, within a specified reasonable time, of any additional information that the director deems necessary to remedy the inadequacy.

B. Once the record is complete and adequate, the director must determine whether the requester has demonstrated valid existing rights. The decision document must explain how the requester has satisfied or has not satisfied all applicable elements of the definition of valid existing rights in 19.8.35.7 NMAC. It must contain findings of fact and conclusions, and it must specify the reasons for the conclusions.

C. Impact of property rights disagreements. This subsection applies only when a request relies upon one or more of the standards in Paragraph (2) of Subsection A of 19.8.35.7 NMAC, or Paragraphs (1) and (2) of Subsection D of 19.8.35.7 NMAC.

(1) The director must issue a determination that the requester has not demonstrated valid existing rights if the requester's property rights claims are the subject of pending litigation in a court or administrative body with jurisdiction over the property rights in question. The director will make this determination without prejudice, meaning that the requester may resubmit the request once the property rights dispute is finally adjudicated. This paragraph applies only to situations in which legal action has been initiated as of the closing date of the comment period under Subsection A of 19.8.35.11 NMAC or Subsection B of 19.8.35.11 NMAC.

(2) If the record indicates disagreement as to the accuracy of the requester's property rights claims, but this disagreement is not the subject of pending litigation in a court or administrative agency of competent jurisdiction, the agency must evaluate the merits of the information in the record and determine whether the requester has demonstrated that the requisite property rights exist under Paragraph (1) of Subsection A of 19.8.35.7 NMAC, or Paragraphs (1) or (2) of Subsection D of 19.8.35.7 NMAC of the definition of valid existing rights as appropriate. The director must then proceed with the decision process under 19.8.35.12 NMAC.

D. The director must issue a determination that the requester has not demonstrated valid existing rights if the requester does not submit information that the director requests under Subsection B of 19.8.35.10 NMAC or Subsection A of 19.8.35.12 NMAC within the time specified or as subsequently extended. The director will make this determination without prejudice, meaning that the requester may file a revised request at any time.

E. After making a determination, the director must:

(1) provide a copy of the determination, together with an explanation of appeal rights and procedures, to the requester, to the owner or owners of the land to which the determination applies, to the owner of the feature causing the land to come

under the protection of 19.8.2.201 NMAC, and, when applicable, to the director with primary jurisdiction over the feature with respect to the values that caused the land to come under the protection of 19.8.2.201 NMAC;

(2) the director will publish a notice of the determination in a newspaper of general circulation in the county in which the land is located; OSM will publish the determination, together with an explanation of appeal rights and procedures, in the federal register if the determination includes federal lands within an area listed in 19.8.2.201 NMAC.

[19.8.35.12 NMAC - N, 1-15-2002; A, 12-31-2007]

19.8.35.13 ADMINISTRATIVE AND JUDICIAL REVIEW OF A VER DETERMINATION:

A determination that the requester has or does not have valid existing rights is subject to administrative and judicial review under 19.8.12.1200 NMAC and 19.8.12.1202 NMAC.

[19.8.35.13 NMAC - N, 1-15-2002; A, 08-31-2010]

19.8.35.14 AVAILABILITY OF RECORDS FOR VER REQUESTS AND DETERMINATIONS:

The director must make a copy of the VER request available to the public under Subsection E of 19.8.11.1100 NMAC. In addition, the director must make records associated with the VER request, and any subsequent determination under 19.8.35.12 NMAC, available to the public in accordance with the requirements and procedures of New Mexico Inspection of Public Records Act NMSA 1978 14-2 et seq.

[19.8.35.14 NMAC - N, 1-15-2002; A, 12-31-2007]

PART 36: NEW MEXICO COAL SURFACE MINING REGULATIONS [CSMC 1979-1]

19.8.36.1 ISSUING AGENCY:

Coal Surface Mining Commission.

[Recompiled 6/4/02]

19.8.36.2 SCOPE:

[RESERVED]

[Recompiled 6/4/02]

19.8.36.3 STATUTORY AUTHORITY:

[Recompiled 6/4/02]

19.8.36.4 DURATION:

[Recompiled 6/4/02]

19.8.36.5 EFFECTIVE DATE:

[Filed February 12, 1985]

[Recompiled 6/4/02]

19.8.36.6 OBJECTIVE:

[RESERVED]

[Recompiled 6/4/02]

19.8.36.7 DEFINITIONS: INITIAL REGULATORY PROGRAM:

A. DEFINITIONS (700.5): These definitions except as otherwise provided for in this section shall apply to Sections 15 through 38 [now 19.8.36.7 NMAC, and 19.8.36.22 NMAC through 19.8.36.44 NMAC]. *Corresponding section number of federal regulations is in parenthesis.

(1) Auger mining means a method of mining coal at a cliff or highwall by drilling holes laterally into an exposed coal seam from the highwall and transporting the coal along an auger bit to the surface.

(2) Coal means combustible carbonaceous rock, classified as anthracite, bituminous, subbituminous, or lignite by A.S.T.M. designation 0-338-66.

(3) Director means the director, office of surface mining reclamation and enforcement, or his representative.

(4) Federal lands means any land, including mineral interests, owned by the United States without regard to how the United States acquired ownership of the lands and without regard to the agency having responsibility for management thereof, except Indian lands; provided, that for the purposes of the Act lands or mineral interests east of the one-hundredth meridian west longitude owned by the United States and entrusted to or managed by the Tennessee Valley Authority are not subject to sections 714 (Surface Owner Protection); and 715 (Federal Lessee Protection) of the Act.

(5) Imminent danger to the health and safety to the public means the existence of any condition or practice, or any violation of a permit or other requirement of the Act in a surface coal mining and reclamation operation, which condition, practice or violation could reasonably be expected to cause substantial physical harm to persons outside the permit area before such condition, practice or violation can be abated. A reasonable expectation of death or serious injury before abatement exists if a rational person, subjected to the same condition or practice giving rise to the peril, would not expose himself or herself to the danger during the time necessary for abatement.

(6) Office means the office of surface mining reclamation and enforcement established under Title II of the Act.

(7) Operator means any person engaged in coal mining.

(8) Permit means a permit to conduct surface coal mining and reclamation operations issued by the state under state law.

(9) Permittee means any individual, partnership, association, society, joint stock company, firm, company, corporation, or other business organization holding a permit to conduct surface coal mining and reclamation operations issued by the state under state law.

(10) Person means an individual, partnership, association, society, joint stock company, firm, company, corporation, or other business organization.

(11) Secretary means the secretary of the Interior or his representative.

(12) Significant, imminent environmental harm to land, air or water resources is determined as follows:

(a) An environmental harm is any adverse impact on land, air or water resources, including but not limited to plant and animal life.

(b) An environmental harm is imminent if a condition, practice or violation exists which is causing such harm or may reasonably be expected to cause such harm at any time before the end of the reasonable abatement time that would be set under section 521(a)(3) of the Act.

(c) An environmental harm is significant if that harm is appreciable and not immediately reparable.

(13) State program means a program established by a state pursuant to section 503 of the Act to regulate surface coal mining and reclamation operations on lands within such state in accord with the requirements of the Act and regulations issued by the secretary under the Act.

(14) State regulatory authority means the department or agency in each state which has primary responsibility at the State level for administering the Act under both the initial and permanent regulatory programs.

(15) Surface coal mining operations means: (a) activities conducted on the surface of lands in connection with a surface coal mine or subject to the requirements of Section 516 surface operations and surface impacts incident to an underground coal mine, the products of which enter commerce or the operations of which directly or indirectly affect interstate commerce. Such activities include excavation for the purpose of obtaining coal including such common methods as contour, strip, auger, mountaintop removal, box cut, open pit and area mining, the uses of explosives and blasting and in situ distillation or restoring, leaching or other chemical or physical processing, and the cleaning, concentrating or other processing or preparation, loading of coal for interstate commerce at or near the mine site; provided however, that such activities do not include the extraction of coal incidental to the extraction of other minerals where coal does not exceed $16 \frac{2}{3}$ per centum of the tonnage of minerals removed for purposes of commercial use or sale or coal exploration subject to Section 512 of the Act; and (b) the areas upon which such activities occur or where such activities disturb the natural land surface. Such area shall also include any adjacent land, the use of which is incidental to any such activities, all lands affected by the construction of new roads or the improvement or use of existing roads to gain access to the site of such activities and for haulage and excavation, workings, impoundments, dams, ventilation shafts, entryways, refuse banks, dumps, stock piles, overburden piles, spoil banks, culm banks, tailings, holes or depressions, repair areas, storage areas, processing areas, shipping areas and other areas upon which are sited structures, facilities or other property or material on the surface, resulting from or incident to such activities.

(16) Surface coal mining and reclamation operations means surface coal mining operations and all activities necessary and incidental to the reclamation of such operations. This term includes the term "surface coal mining operations."

(17) Ton means 2,000 pounds avoirdupois (.90718 metric ton).

(18) Approval of the state regulatory authority means approval by the chief of the bureau of surfacemining unless such approval is subsequently withdrawn by the commission.

B. DEFINITIONS (710.5): As used throughout the initial regulatory program the following terms have the specified meanings unless otherwise indicated:

(1) Acid drainage means water with a pH of less than 6.0 discharged from active or abandoned mines and from areas affected by coal mining operations.

(2) Acid-forming materials means earth materials that contain sulfide mineral or other materials which, if exposed to air, water or weathering processes, will cause acids that may create acid drainage.

(3) Alluvial valley floors means unconsolidated stream-laid deposits holding streams where water availability is sufficient for subirrigation or flood irrigation agricultural activities but does not include upland areas which are generally overlain by a thin veneer of colluvial deposits composed chiefly of debris from sheet erosion, deposits by unconcentrated runoff or slope wash, together with talus, other mass movement accumulation and windblown deposits.

(4) Approximate original contour means that surface configuration achieved by backfilling and grading of the mined area so that the reclaimed area, including any terracing or access roads, closely resembles the general surface configuration of the land prior to mining and blends into and complements the drainage pattern of the surrounding terrain, with all highwalls and spoil piles eliminated; water impoundments may be permitted where the regulatory authority determines that they are in compliance with Section 715.17.

(5) Aquifer means a zone, stratum or group of strata that can store and transmit water in sufficient quantities for a specific use.

(6) Combustible material means organic material that is capable of burning either by fire or through a chemical process (oxidation) accompanied by the evolution of heat and a significant temperature rise.

(7) Compaction means the reduction of pore spaces among the particles of soil or rock, generally done by running heavy equipment over the earth materials.

(8) Disturbed area means those lands that have been affected by surface coal mining and reclamation operations. "Disturbed area" is synonymous with the words "affected area" used in Section 1 through 37 [19.8.36.8 NMAC through 19.8.36.43 NMAC].

(9) Diversion means a channel, embankment, or other manmade structure constructed for the purpose of diverting water from one area to another.

(10) Downslope means the land surface between a valley floor and the projected outcrop of the lowest coalbed being mined along each highwall.

(11) Embankment means an artificial deposit of material that is raised above the natural surface of the land and used to contain, divert, or store water, support roads or railways, or other similar purposes.

(12) Essential hydrologic functions means, with respect to alluvial valley floors, the role of the valley floor in collecting, storing, and regulating the natural flow of surface water and groundwater, and in providing a place for irrigated and subirrigated farming, by reason of its position in the landscape and the characteristics of its underlying material.

(13) Flood irrigation means irrigation through natural overflow or the temporary diversion of high flows in which the entire surface of the soil is covered by a sheet of water.

(14) Groundwater means subsurface water that fills available openings in rock or soil materials such that they may be considered water-saturated.

(15) Highwall means the face of exposed overburden and coal in an open cut of surface or for entry to an underground coal mine.

(16) Hydrologic balance means the relationship between the quality and quantity of inflow to, outflow from, and storage in a hydrologic unit such as a drainage basin, aquifer, soil zone, lake or reservoir. It encompasses the quantity and quality relationships between precipitation, runoff, evaporation and the change in ground and surface water storage.

(17) Hydrologic regime means the entire state of water movement in a given area. It is a function of the climate, and includes the phenomena by which water first occurs as atmospheric water vapor, passes into a liquid or solid form and falls as precipitation, moves thence along or into the ground surface and returns to the atmosphere as vapor by means of evaporation and transpiration.

(18) Impoundment means a closed basin formed naturally or artificially built, which is dammed or excavated for the retention of water, sediment or waste.

(19) Intermittent or perennial stream means a stream or part of a stream that flows continuously during all (perennial) or for at least one month (intermittent) of the calendar year as a result of groundwater discharge or surface runoff. The term does not include an ephemeral stream which is one that flows for less than one month of a calendar year and only in direct response to precipitation in the immediate watershed and whose channel bottom is always above the local water table.

(20) Introduced species means a species which does not occur naturally in an area.

(21) Leachate means a liquid that has percolated through soil, rock or waste and has extracted dissolved or suspended materials.

(22) Native species means a species which either originated in an area or became naturalized and occurs naturally in an area.

(23) Noxious plants means species that have been included on official state lists of noxious plants for the state in which the operation occurs.

(24) Overburden means material of any nature, consolidated or unconsolidated, that overlies a coal deposit, excluding topsoil.

(25) Outslope means the exposed area sloping away from a bench or terrace being constructed as a part of a surface coal mining and reclamation operation.

(26) Productivity means the vegetative yield produced by a unit area for a unit of time.

(27) Recharge capacity means the ability of the soils and underlying materials to allow precipitation and runoff to infiltrate and reach the zone of saturation.

(28) Roads means access and haul roads constructed, used, reconstructed, improved or maintained for use in surface coal mining and reclamation operations, including use by coal-hauling vehicles leading to transfer, processing or storage areas. The term includes any such road used and not graded to approximate original contour within 45 days of construction other than temporary roads used for topsoil removal and coal haulage roads within the pit area. Roads maintained with public funds such as all federal, state, county, or local roads are excluded.

(29) Recurrence interval means the precipitation event expected to occur, on the average, once in a specified interval. For example, the ten-year 24-hour precipitation event would be that 24-hour precipitation event expected to be exceeded on the average once in ten years. Magnitude of such events are as defined by the national weather service technical paper no. 40, "Rainfall Frequency Atlas of the U.S.," May 1961, and subsequent amendments or equivalent regional or rainfall probability information developed therefrom.

(30) Runoff means precipitation that flows overland before entering a defined stream channel and becoming streamflow.

(31) Safety factor means the ratio of the available shear strength to the developed shear stress on a potential surface of sliding determined by accepted engineering practice.

(32) Sediment means undissolved organic and inorganic material transported or deposited by water.

(33) Sedimentation pond means any natural or artificial structure or depression used to remove sediment from water and store sediment or other debris.

(34) Slope means average inclination of a surface, measured from the horizontal. Normally expressed as a unit of vertical distance to a given number of units of horizontal distance (e.g., 1v to 5h=20 percent=11.3 degrees).

(35) Soil horizons means contrasting layers of soil lying one below the other, parallel or nearly parallel to the land surface. Soil horizons are differentiated on the basis of field characteristics and laboratory data. The three major soil horizons are:

(a) A horizon. The uppermost layer in the soil profile often called the surface soil. It is the part of the soil in which organic matter is most abundant, and where leaching of soluble or suspended particles is the greatest.

(b) B horizon. The layer immediately beneath the A horizon and often called the subsoil. This middle layer commonly contains more clay, iron, or aluminum than the A or C horizons.

(c) C horizon. The deepest layer of the soil profile. It consists of loose material or weathered rock that is relatively unaffected by biologic activity.

(36) Spoil means overburden that has been removed during surface mining.

(37) Stabilize means any method used to control movement of soil, spoil piles or areas of disturbed earth and includes increasing bearing capacity, increasing shear strength, draining, compacting or revegetating.

(38) Subirrigation means irrigation of plants with water delivered to the roots from underneath.

(39) Surface water means water, either flowing or standing, on the surface of the earth.

(40) Suspended solids means organic or inorganic materials carried or held in suspension in water that will remain on a 0.45 micron filter.

(41) Toxic-forming materials means earth materials or wastes which, if acted upon by air, water, weathering or microbiological processes, are likely to produce chemical or physical conditions in soils or water that are detrimental to biota or uses of water.

(42) Toxic-mine drainage means water that is discharged from active or abandoned mines and other areas affected by coal mining operations and which contains a substance which through chemical action or physical effects is likely to kill, injure or impair biota commonly present in the area that might be exposed to it.

(43) Valley fill and head-of-hollow fill means a structure consisting of any materials other than waste placed so as to encroach upon or obstruct to any degree any natural stream channel other than those minor channels located on highland areas where overland flow in natural rills and gullies is the predominant form of runoff. Such fills are normally constructed in the uppermost portion of a V-shaped valley in order to reduce the upstream drainage area (head-of-hollow fills). Fills located farther downstream (valley fills) must have larger diversion structures to minimize infiltration. Both fills are characterized by rock underdrains and are constructed in compacted lifts from the toe to the upper surface in a manner to promote stability.

(44) Waste means earth materials, which are combustible, physically unstable, or acid-forming or toxic-forming, wasted or otherwise separated from product coal and are slurried or otherwise transported from coal processing facilities or preparation plants after physical or chemical processing, cleaning or concentrating of coal.

(45) Water table means upper surface of a zone of saturation, where the body of groundwater is not confined by an overlying impermeable zone.

[Recompiled 6/4/02]

19.8.36.8 PERMIT APPLICATION - FEES:

A permit application accompanied by a written mining plan and signed by the operator shall be filed with the director of the mining and minerals division of the energy and minerals department (hereinafter director) along with the application and initial acreage fees required by Section 69-25-8 NMSA 1978, or such other application fee which may be subsequently established by regulation of the commission pursuant to Section 10 (A), Laws of 1979, Chapter 291.

[Recompiled 6/4/02]

19.8.36.9 MINING PLAN:

The mining plan prepared by the operator for approval by the Director shall set forth the following information:

A. a statement of the operator's name and address and the name and address of the person designated by the operator to receive service;

B. a description of the affected area;

C. the owner of the affected area;

D. the owner of the coal to be mined;

E. an estimate of the acreage to be affected during the operator's first year of the operation; for operators conducting mining operations on February 29, 1972, acreage shall be computed from that date;

F. a topographical map or maps of the area to be affected prepared on a scale suitable to facilitate interpretation showing the following:

(1) an outline and total acreage of the permit area and of the area anticipated to be affected by the mining operations;

(2) the location of any areas within the permit area which were affected prior to February 29, 1972, provided, however, that mining plans submitted for underground permits shall show the location of any areas within the permit area which were affected prior to May 4, 1978;

(3) drainage on and away from the affected area, showing direction and an estimate of the quantity of flow of water in drainways and natural surface water courses and streams (intermittent or flowing) discharging onto and receiving discharge from the affected area in its original character and as it is anticipated to be during mining and following reclamation;

(4) surface topography at an appropriate contour interval;

(5) location of land to become affected area during the first calendar year next succeeding February 29, 1972, in the case of operators conducting mining operations on that date or the location of land to become affected area during the year immediately succeeding the issuance of a permit in the case of operators requiring a permit before commencing operations;

(6) date the map was prepared or updated;

(7) north point; and

(8) name of United States geological survey quadrangle, if any, covering the same area.

G. a diagrammatic sketch comparing the physiographic features of the area prior to mining operations, with a projection of the physiographic features of the affected area after reclamation;

H. the present use of the land to be mined and the surface owner's proposed end use of the affected area including, as may be known, current and planned uses of surrounding land which by proximity may influence or guide the choice of end use in the affected area;

I. a summary of the climatological (including as available temperature ranges on a monthly basis, a statement of the annual rainfall for the preceding ten years in the area to be mined and maximum and minimum annual rainfall, if possible, on a monthly basis), topographical, soil, water, agricultural and wildlife data and other factors that influence the current use of the affected areas and will influence the proposed use of the reclaimed land;

J. an estimate of any water to be stored, diverted or used and any resulting pollutants;

K. a description of the soil types and analyses of the soils in the area to be affected prepared in conformance with professionally accepted standards (National Cooperative Soil Survey's Basic System of Soil Classification);

L. an estimate, on the basis of presently available information, of the range of depths of surface mining operations for which the operator requests the permit;

M. an estimate of the anticipated volume of overburden to be removed and its placement;

N. an estimate of the acreage to be affected on an annual basis;

O. the depth of the topsoil in the affected area before any mining takes place;

P. the efforts which will be made to remove and preserve topsoil prior to mining;

Q. a detailed proposal and time schedule for grading the affected area; the grading schedule shall be set out graphically on a separate copy of the topographical map;

R. a description of the existing vegetation in the area to be affected and a description of the vegetation as it is anticipated to be following reclamation, including a description of the general type or species of plant to be initially utilized in the revegetation procedure, together with estimates of planting times and growths to maturity;

S. a detailed proposal and time schedule for revegetating the affected area;

T. the type and quantity of any organic material or soil conditioner to be introduced in the affected area prior to or during planting;

U. a tentative statement of the operator's present plan with respect to revegetation and reclamation efforts not otherwise set forth in the proposed mining plan;

V. the location where waste materials will be deposited and the period of time for depositing waste materials in a given location prior to grading;

W. any comments which the operator feels may be desirable, including comments on any anticipated reclamation problems; and a statement that the operator shall comply with all of the general performance standards contained in these regulations.

[Recompiled 6/4/02]

19.8.36.10 SUBMISSION AND APPROVAL OF MINING PLAINS:

A. At least 50 days prior to submitting a permit application accompanied by a mining plan, the operator shall file with the director a notice of its intent to do so. The notice

shall include all of the information required by Section 2 [now 19.8.36.9 NMAC] above along with such other information as the operator may consider necessary or useful to the director.

B. Within 15 days after receipt of a notice of intent to submit a mining plan, the director shall establish the date and place of a hearing on the environmental impact of the proposed mining plan. The hearing shall be held in the county in which the mining is to be carried out.

C. Notice of the hearing on the environmental impact of the mining plan shall be given at least 20 days prior to the hearing, printed in a paper of general circulation in the county or counties in which the mining is to be carried out. The notice shall state the name of the operator, the area to be covered by the mining plan, the time and place of the hearing, and where the proposed mining plan and accompanying information shall be available for inspection and copying by the public at reasonable times.

D. Reasonable effort shall be made by the director to give notice to all persons who have made a written request for advance notice of environmental impact hearings.

E. Any person desiring to present evidence or give testimony at the environmental impact hearing on a proposed mining plan shall file a request to do so with the director at least ten days prior to the hearing. The director will transmit a copy of the request to the operator at least five days prior to the hearing. The request shall contain the name and address of the person desiring to participate and a plain and concise statement of the nature of the person's interests.

F. Any person who has filed a timely request to participate in a hearing on the environmental impact of a proposed mining plan shall be given reasonable time at the hearing to submit relevant evidence, data and views and shall be allowed to call and examine witnesses, introduce exhibits, cross-examine witnesses and submit rebuttal evidence.

G. The director may designate a hearing officer to take evidence at the hearing on the environmental impact of a proposed mining plan. The hearing officer so designated will preside and will have authority to direct the hearing, to examine witnesses and to make such rulings on evidence as may be necessary. The director shall maintain a verbatim record of said hearing and such record shall be a part of the record of the permit application hearing.

H. Within ten days after receipt of a permit application accompanied by a mining plan, the director shall establish a date for the permit application hearing to be held in Santa Fe.

I. Notice of the permit application hearing shall be given to the operator at least 15 days prior to the hearing.

J. Permit application hearings shall be conducted in accordance with the procedures set out in Section 8 [now 19.8.36.15 NMAC].

[Recompiled 6/4/02]

19.8.36.11 MINING PLAN AMENDMENTS:

For good cause shown, mining plans may be amended with the approval of the director. Upon request of the operator and upon 15 days notice to the operator, the director shall set a hearing on any proposal to amend a mining plan. The hearing shall be conducted in accordance with the procedures set out in Section 8 [now 19.8.36.15 NMAC].

[Recompiled 6/4/02]

19.8.36.12 OTHER APPROVALS:

Applications by operators to the director for approval shall be deemed to be application for extension of time to permit compliance with the requirement of obtaining such approval and the pendency of such application shall entitle the operator so applying to continue operations in accordance with these regulations in the absence of such approval while such application is pending and until such application is acted upon.

[Recompiled 6/4/02]

19.8.36.13 ANNUAL REPORTS:

A. Within 60 days after the end of the operator's mining year, the operator shall submit to the director two copies of a report, setting out in detail all measures taken to effect reclamation of the affected area. The report will be typewritten and signed by the operator. The report shall include the following information:

- (1) a statement of the operator's name, address and permit number;
- (2) the number of acres of affected area resulting from operations during the preceding mining year;
- (3) the number of acres for which grading was commenced during the preceding mining year and the location thereof;
- (4) the number of acres for which grading was completed during the preceding mining year and the location thereof;
- (5) the number of acres for which revegetation was commenced during the preceding mining year and the location thereof;

(6) an enumeration of the various types of vegetation planted and the location thereof;

(7) the number of acres for which revegetation had been completed during the preceding mining year and the location thereof;

(8) an appraisal of the success of any revegetation efforts;

(9) in the event of any failure of revegetation efforts, an explanation, if possible, of that failure;

(10) an analysis of the soil in the areas to be revegetated;

(11) a statement of the type and quantity of any organic material or soil conditioners introduced into the affected area prior to or during planting;

(12) a statement of the extent of any efforts made to replace topsoil;

(13) a statement of any reuse of the land which has taken place after the land has been reclaimed; and

(14) any other information about the operator's reclamation efforts which he feels would be of assistance to the director.

B. Accompanying the report, the operator shall submit a map prepared at the same scale as the map submitted with the mining plan or a suitable overlay showing the following:

(1) the outline of the permit area;

(2) the outline of the affected area;

(3) an outline of that portion of the affected area resulting from mining operations during the preceding mining year; and

(4) the location of the operator's grading efforts during the preceding mining year to enable the director to correlate the grading data given in the annual report.

[Recompiled 6/4/02]

19.8.36.14 ANNUAL FEE:

Each operator shall pay an annual fee of \$20.00 per acre of affected area resulting from his mining operations during the preceding mining year. The annual fee shall accompany the annual report.

[Recompiled 6/4/02]

19.8.36.15 PROCEEDINGS BEFORE THE DIRECTOR:

In the hearings provided for in Subsection 3 J and Section 4 of this Rule 79-1 [now Subsection J of 19.8.36.10 NMAC and 19.8.36.11 NMAC] and in Laws, 1979, Chapter 291, as being adjudicatory in nature:

A. the director may designate a hearing officer to take evidence at the hearing; the hearing officer so designated will preside and will have authority to direct the hearing, to administer oaths and to make such rulings on evidence and procedures as may be necessary.

B. the director shall maintain a verbatim record of the hearing and the record in the proceeding shall include:

- (1) all notices, pleadings, motions and intermediate rulings;
 - (2) evidence received or considered;
 - (3) a statement of matters officially noticed;
 - (4) questions and offers of proof, objections, and rulings thereon;
 - (5) proposed findings and conclusions; and
 - (6) the director's decision.
- (7) the costs of a transcript, if required by the director, shall be paid by the applicant.

C. irrelevant, immaterial or unduly repetitious evidence shall be excluded; the rules of evidence applicable in an administrative adjudicatory proceeding shall be followed; the director shall give effect to the rules of privilege recognized by law; objections to evidentiary offers may be made and shall be noted in the record; subject to these requirements, when a hearing of the parties will not be prejudiced substantially, any part of the evidence may be received in written form.

D. the parties to the proceeding and the director may call and examine witnesses, introduce exhibits, cross-examine witnesses and submit rebuttal evidence.

E. official notice may be taken of all facts of which judicial notice may be taken and of other facts within the specialized knowledge of the director, but whenever the director takes official notice of a fact, the noticed fact shall be stated before or during the hearing, and a party shall, on timely request, be afforded an opportunity to show to the contrary.

F. prior to the entry of the director's decision, the parties shall be afforded a reasonable opportunity to submit proposed findings of fact and conclusions of law.

G. the director must hear the evidence or read the record; the decision shall include a statement of findings and conclusions upon all material issues of fact and of law, together with the appropriate order, sanction, relief or denial thereof; findings of fact shall be based exclusively on the evidence presented and on matters officially noticed.

H. within five days after the decision is rendered, the director shall give a copy thereof to the operator.

I. the effective date of any notice or order issued pursuant to Section 25 of the Surface Mining Act by the director may be stayed by the commission during the statutory period within which an appeal might be filed, and in the event of an appeal therefrom during the pendency of such an appeal, the commission may, in the exercise of its discretion, require a supersedeas bond in an amount sufficient to alleviate any environmental injury to the affected land.

[Recompiled 6/4/02]

19.8.36.16 REVIEW OF DIRECTOR'S DECISIONS:

A. Any person who is or may be aggrieved by the decision of the director may appeal the director's decision by filing a notice of appeal with the chairman of the commission within 30 days of the date of the director's decision. The notice of appeal shall include a short concise statement of the decision appealed from and the reason for appeal.

B. Upon receipt of the notice of appeal, the chairman of the commission shall call a meeting of the commission within 30 days of the date the notice of appeal is filed to conduct a hearing on the appeal. The appealing party shall be given notice by the commission of the time and place of the hearing at least 20 days in advance of the convening.

C. The hearing shall be held by the commission at the time and place specified in the notice to the appealing party. At the hearing, the matter involved in the director's decision from which the appeal has been taken will be heard in accordance with the procedures set forth in Section 8 [now 19.8.36.15 NMAC], except as inconsistent with Section 29 of the Surface Mining Act.

D. The commission's decision may affirm, set aside, amend reverse, or remand the director's decision for further proceedings or may compel action unlawfully withheld or unreasonably delayed.

[Recompiled 6/4/02]

19.8.36.17 SERVICE:

Any notice, decision or other document required to be served by these regulations may be served either personally or by certified or registered mail, return receipt requested, directed to the operator or other person required to be served at his last known address as shown by the director's records. Where service is by certified or registered mail, the document will be considered served on the date borne by the return receipt showing delivery to the addressee or refusal of the addressee to accept the document.

[Recompiled 6/4/02]

19.8.36.18 SPECIAL DEFINITION OF MINING YEAR:

An operator's "mining year" shall be the calendar year.

[Recompiled 6/4/02]

19.8.36.19 BOND:

Whenever the director contemplates that it may be necessary to insure compliance under the provisions of the Act, or any regulation or mining plan requirement, he shall give notice of intention to require bond, its condition and amount, to the operator and the operator shall be given opportunity to respond to the proposed bond. In the event the operator does not agree on the necessity, or the terms, conditions or amount of any proposed bond, the director shall provide the operator the opportunity for a hearing thereupon under the procedures of Section 8 [now 19.8.36.15 NMAC] of these regulations.

[Recompiled 6/4/02]

19.8.36.20 AMENDMENT OF PERMITS:

For good cause shown, mining permits may be amended upon approval of the director. The director may, in the exercise of his discretion, order a public hearing upon reasonable notice to the permittee and the public. Such hearing shall be conducted in accordance with the provisions of Section 8 [now 19.8.36.15 NMAC] of these regulations.

[Recompiled 6/4/02]

19.8.36.21 INTERIM PERIOD PERMITS:

A. Permits issued pursuant to this Rule 79-1 [now 19.8.36 NMAC], preceding the date which occurs eight months following the date upon which the state program is approved, within the meaning of Section 503 of the Surfacemining Control and Reclamation Act of 1977, shall be deemed to be determined a permit issued pursuant to

Laws 1972, Chapter 68, and regulations that relate thereto. Such permits shall be subject to the performance standards set forth in Sections 16 through 38 of this Rule 79-1[now 19.8.36.22 NMAC through 19.8.36.44 NMAC].

B. Notwithstanding the foregoing subsection, and following the approval of a permanent state program, the director may issue permits pursuant to Section 9 of the Surface Mining Act.

[Recompiled 6/4/02]

19.8.36.22 GENERAL PERFORMANCE STANDARDS: GENERAL OBLIGATIONS (715.11):

A. Authorizations to operate. A copy of all current permits, licenses, approved plans, or other authorizations to operate the mine shall be available for inspection at or near the mine site.

B. Mine maps. Any person conducting surface coal mining and reclamation operations on and after May 3, 1978, shall submit two copies of an accurate map of the mine and permit area at a scale of 1:6000 or larger. The map shall show as of May 3, 1978, the lands from which coal has not yet been removed and the lands and structures which have been used or disturbed to facilitate mining. One copy of the mine map shall be submitted to the state regulatory authority and one copy shall be submitted to the regional director, OSM, before July 3, 1978.

[Recompiled 6/4/02]

19.8.36.23 GENERAL PERFORMANCE STANDARDS: SIGNS AND MARKERS (715.12):

A. Specifications. All signs required to be posted shall be of a standard design that can be seen and read easily and shall be made of durable material. The signs and other markers shall be maintained during all operations to which they pertain and shall conform to local ordinances and codes.

B. Mine and permit identification signs. Signs identifying the mine area shall be displayed at all points of access to the permit area from public roads and highways. Signs shall show the name, business address and telephone number of the permittee and identification numbers of current mining and reclamation permit. Such signs shall not be removed until after release of all bonds.

C. Perimeter markers. The perimeter of the permit area shall be clearly marked by durable and easily recognized markers or by other means approved by the regulatory authority.

D. Buffer zone markers. Buffer zones as defined in Section 715.17 shall be marked in a manner consistent with the perimeter markers along the interior boundary of the buffer zone.

E. Blasting signs. If blasting is necessary to conduct surface coal mining operations, signs reading "Blasting Area" shall be displayed conspicuously at the edge of blasting areas along access and haul roads within the mine property. Signs reading "Blasting Area" and explaining the blasting warning and all-clear signals shall be posted at all entrances to the permit area.

F. Topsoil markers. Where topsoil or other vegetation-supporting material is segregated and stockpiled according to Section 715.16(c), the stockpiled material shall be marked. Markers shall remain in place until the material is removed.

[Recompiled 6/4/02]

19.8.36.24 GENERAL PERFORMANCE STANDARDS:POSTMINING USE OF LAND (715.13):

A. General. All disturbed areas shall be restored in a timely manner (1) to conditions that are capable of supporting the uses which they were capable of supporting before any mining, or (2) to higher or better uses achievable under criteria and procedures of paragraph (d) of this Section [now Subsection D of 19.8.36.24 NMAC].

B. Determining premining use of land. The premining uses of land to which the postmining land use is compared shall be those uses which the land previously supported if the land had not been previously mined and had been properly managed.

(1) The postmining land use for land that has been previously mined and not reclaimed shall be judged on the basis of the highest and best use that can be achieved and is compatible with surrounding areas.

(2) The postmining land use for land that has received improper management shall be judged on the basis of the premining use of surrounding lands that have received proper management.

(3) If the premining use of the land was changed within five years of the beginning of mining, the comparison of postmining use to premining use shall include a comparison with the historic use of the land as well as its use immediately preceding mining.

C. Land-use categories. Land use is categorized in the following groups. Change from one to another land use category in premining to postmining constitutes an alternate land use and the permittee shall meet the requirements of paragraph (d) [now Subsection D of 19.8.36.24 NMAC] of this Section and all other applicable environmental protection performance standards of this chapter.

- (1) Heavy industry. Manufacturing facilities, powerplants, airports or similar facilities.
- (2) Light industry and commercial services. Office buildings, stores, parking facilities, apartment houses, motels, hotels or similar facilities.
- (3) Public services. Schools, hospitals, churches, libraries, water-treatment facilities, solid-waste disposal facilities, public parks and recreation facilities, major transmission lines, major pipelines, highways, underground and surface utilities and other servicing structures and appurtenances.
- (4) Residential. Single-and multiple-family housing (other than apartment houses) with necessary support facilities. Support facilities may include commercial services incorporated in and comprising less than five percent of the total land area of housing capacity, associated open space and minor vehicle parking and recreation facilities supporting the housing.
- (5) Cropland. Land used primarily for the production of cultivated and close-growing crops for harvest alone or in association with sod crops. Land used for facilities in support of farming operations are included.
- (6) Rangeland. Includes rangelands and forest lands which support a cover of herbaceous or scrubby vegetation suitable for grazing or browsing use.
- (7) Hayland or pasture. Land used primarily for the long-term production of adapted, domesticated forage plants to be grazed by livestock or cut and cured for livestock feed.
- (8) Forest land. Land with at least a 25 percent tree canopy or land at least ten percent stocked by forest trees of any size, including land formerly having had such tree cover and that will be naturally or artificially reforested.
- (9) Impoundments of water. Land used for storing water for beneficial uses such as stock ponds, irrigation, fire protection, recreation or water supply.
- (10) Fish and wildlife habitat and recreation lands. Wetlands, fish and wildlife habitat, and areas managed primarily for fish and wildlife or recreation.
- (11) Combined uses. Any appropriate combination of land uses where one land use is designated as the primary land use and one or more other land uses are designated as secondary land uses.

D. Criteria for approving alternative postmining use of land. An alternative postmining land use shall be approved by the regulatory authority, after consultation with the landowner or the land-management agency having jurisdiction over state or federal lands, if the following criteria are met. Proposals to remove an entire coal seam

running through the upper part of a mountain, ridge, or hill must also meet these criteria in addition to the requirements of Section 716.3 of this chapter.

(1) The proposed land use is compatible with adjacent land use and, where applicable, with existing local, state or federal land use policies and plans. A written statement of the views of the authorities with statutory responsibilities for land use policies and plans shall accompany the request for approval. The permittee shall obtain any required approval of local, state or federal land management agencies, including any necessary zoning or other changes necessarily required for the final land use.

(2) Specific plans have been prepared which show the feasibility of the proposed land use as related to needs, projected land use trends and markets and that include a schedule showing how the proposed use will be developed and achieved within a reasonable time after mining and be sustained. The regulatory authority may require appropriate demonstrations to show that the planned procedures are feasible, reasonable and integrated with mining and reclamation, and that the plans will result in successful reclamation.

(3) Provision of any necessary public facilities is assured as evidenced by letters of commitment from parties other than the permittee, as appropriate, to provide them in a manner compatible with the permittee's plans.

(4) Specific and feasible plans for financing attainment and maintenance of the postmining land use including letters of commitment from parties other than the permittee as appropriate, if the postmining land use is to be developed by such parties.

(5) The plans are designed under the general supervision of a professional engineer registered in the state of New Mexico, or other appropriate professional, who will ensure that the plans conform to applicable accepted standards for adequate land stability, drainage, and vegetative cover, and aesthetic design appropriate for the postmining use of the site.

(6) The proposed use or uses will neither present actual or probable hazard to public health or safety nor will they pose any actual or probable threat of water flow diminution or pollution.

(7) The use or uses will not involve unreasonable delays in reclamation.

(8) Necessary approval of measures to prevent or mitigate adverse effects on fish and wildlife has been obtained from the regulatory authority and appropriate state and federal fish and wildlife management agencies.

(9) Proposals to change premining land uses of range, fish and wildlife habitat, forest land, hayland, or pasture to a postmining cropland use, where the cropland would require continuous maintenance such as seeding, plowing, cultivation, fertilization, or other similar practices to be practicable or to comply with applicable

Federal, State, and local laws, shall be reviewed by the regulatory authority to assure that:

(a) There is a firm written commitment by the permittee or by the landowner or land manager to provide sufficient crop management after release of applicable performance bonds to assure that the proposed postmining cropland use remains practical and reasonable.

(b) There is sufficient water available and committed to maintain crop production; and

(c) Topsoil quality and depth are shown to be sufficient to support the proposed use.

(10) The regulatory authority has provided by public notice not less than 45 days nor more than 60 days for interested citizens and local, state and federal agencies to review and comment on the proposed land use.

[Recompiled 6/4/02]

19.8.36.25 GENERAL PERFORMANCE STANDARDS: BACKFILLING AND GRADING (715.14):

In order to achieve the approximate original contour, the permittee shall, except as provided in this section, transport, backfill, compact (where advisable to ensure stability or to prevent leaching of toxic materials) and grade all spoil material to eliminate all highwalls, spoil piles and depressions. Cut-and-fill terraces may be used only in those situations expressly identified in this section. The postmining graded slopes must approximate the premining natural slopes in the area as defined in paragraph (a) [now Subsection A of 19.8.36.25 NMAC].

A. Slope measurements.

(1) To determine the natural slopes of the area before mining, sufficient slopes to adequately represent the land surface configuration, and as approved by the regulatory authority in accordance with site conditions, must be accurately measured and recorded. Each measurement shall consist of an angle of inclination along the prevailing slope extending 100 linear feet above and below or beyond the coal outcrop or the area to be disturbed; or, where this is impractical, at locations specified by the regulatory authority. Where the area has been previously mined, the measurements shall extend at least 100 feet beyond the limits of mining disturbances as determined by the regulatory authority to be representative of the premining configuration of the land. Slope measurements shall take into account natural variations in slope so as to provide accurate representation of the range of natural slopes and shall reflect geomorphic differences of the area to be disturbed. Slope measurements may be made from

topographic maps showing contour lines, having sufficient detail and accuracy consistent with the submitted mining and reclamation plan.

(2) After the disturbed area has been graded, the final graded slopes shall be measured at the beginning and end of lines established on the prevailing slope at locations representative of premining slope conditions and approved by the regulatory authority. These measurements must not be made so as to allow unacceptably steep slopes to be constructed.

B. Final graded slopes.

(1) The final graded slopes shall not exceed either the approximate premining slopes as determined according to Paragraph (a)(1) [now Paragraph 1 of Subsection A of 19.8.36.25 NMAC] and approved by the regulatory authority or any lesser slope specified by the regulatory authority based on consideration of soil, climate or other characteristics of the surrounding area. Postmining final graded slopes need not be uniform. The requirements of this paragraph may be modified by the regulatory authority where the mining is re-affecting previously mined lands that have not been restored to the standards of this section and sufficient spoil is not available to return to the slope determined according to Paragraph (a)(1) [now Paragraph 1 of Subsection A of 19.8.36.25 NMAC]. Where such modifications are approved, the permittee shall, as a minimum, be required to:

(a) retain all overburden and spoil on the solid portion of existing or new benches; and

(b) backfill and grade to the most moderate slope possible to eliminate the highwall which does not exceed the angle of repose or such lesser slopes as is necessary to assure stability.

(2) On approval by the regulatory authority and in order to conserve soil moisture, ensure stability, and control erosion on final graded slopes, cut-and-fill terraces may be allowed if the terraces are compatible with the postmining land use approved under Section 715.13, and are appropriate substitutes for construction of lower grades on the reclaimed lands. The terraces shall meet the following requirements:

(a) The width of the individual terrace bench shall not exceed 20 feet unless specifically approved by the regulatory authority as necessary for stability, erosion control or roads included in the approved postmining land use plan.

(b) The vertical distance between terraces shall be as specified by regulatory authority to prevent excessive erosion and to provide long-term stability.

(c) The slope of the terrace outslope shall not exceed 1v:2h (50 percent). Outslopes which exceed 1v:2h (50 percent) may be approved if they have a minimum

static safety factor of more than 1.5 and provide adequate control over erosion and closely resemble the surface configuration of the land prior to mining. In no case may highwalls be left as part of terraces.

(d) Culverts and underground rock drains shall be used on the terrace only when approved by the regulatory authority.

(3) All operations on steep slopes of 20 degrees or more or on such lesser slopes as the regulatory authority defines as a steep slope shall meet the provisions of Section 716.2 of this Chapter.

C. Mountaintop removal. The requirements of this paragraph and of Section 716.3 shall apply to surface mining operations which remove entire coal seams in the upper part of a mountain, ridge, or hill by removing all of the overburden, and where the requirements for achieving the approximate original contour of this section cannot be met. Final graded top plateau slopes on the mined area shall be less than 1v:5h so as to create a level plateau or gently rolling configuration and the outslopes of the plateau shall not exceed 1v:2h, except where engineering data substantiates and the regulatory authority finds that a minimum static safety factor of 1.5 (or higher factors specified by the regulatory authority) will be attained. Although the area need not be restored to approximate original contour, all highwalls, spoil piles and depressions except as provided in Paragraphs (d) and (e) [now Subsections D and E of 19.8.36.25 NMAC] of this section shall be eliminated. All mountaintop removal operations shall in addition meet the provisions of Section 716.3 of this Chapter.

D. Small depressions. The requirement of this section to achieve approximate original contour does not prohibit construction of small depressions if they are approved by the regulatory authority to minimize erosion, conserve soil moisture or promote revegetation. These depressions shall be compatible with the approved postmining land use and shall not be inappropriate substitutes for construction of lower grade on the reclaimed lands. Depressions approved under this section shall have a holding capacity of less than one cubic yard of water or, if it is necessary that they be larger, shall not restrict normal access throughout the area or constitute a hazard. Large, permanent impoundments shall be governed by Paragraph (e) [now Subsection E of 19.8.36.25 NMAC] of this Section and by Section 715.17.

E. Permanent impoundments. Permanent impoundments may be retained in mined and reclaimed areas provided all highwalls are eliminated by grading to appropriate contour and the provisions for postmining land use (Section 715.13) and protection of the hydrologic balance (Section 715.17) are met. No impoundments shall be constructed on top of areas in which excess materials are deposited pursuant to Section 715.15 of this part. Impoundments shall not be used to meet the requirements of Paragraph (j) [now Subsection J of 19.8.36.25 NMAC] of this Section.

F. Definition of thin and thick restored overburden. The thin overburden provisions of Paragraph (g) [now Subsection G of 19.8.36.25 NMAC] of this section may apply only

where the final thickness is less than 0.8 of the initial thickness. The thick overburden provisions of Paragraph (h) [now Subsection H of 19.8.36.25 NMAC] of this section may apply only where the final thickness is greater than 1.2 of the initial thickness. Initial thickness is the sum of the overburden thickness and coal thickness. Final thickness is the product of the overburden thickness times the bulking factor to be determined for each mine area. The provisions of Paragraph (g) and (h) [now Subsection G and H of 19.8.36.25 NMAC] apply only when operations cannot be carried out to comply with the requirements of Paragraph (a) [now Subsection A of 19.8.36.25 NMAC] of this section to achieve the approximate original contour.

G. Thin overburden. In surface coal mining operations carried out continuously in the same limited pit area for more than one year from the day coal-removal operations begin and where the volume of all available spoil and suitable waste materials is demonstrated to be insufficient to achieve approximate original contour, surface coal mining operations shall be conducted to meet, at a minimum, the following standards:

(1) Transport, backfill and grade, using all available spoil and suitable waste materials from the entire mine area, to attain the lowest practicable stable grade, which may not exceed the angle of repose, and to provide adequate drainage and long-term stability of the regraded areas.

(2) Eliminate highwalls by grading or backfilling to stable slopes not exceeding 1v:2h (50 percent), or such lesser slopes as the regulatory authority may specify to reduce erosion, maintain the hydrologic balance, or allow the approved postmining land use.

(3) Transport, backfill, grade and revegetate to achieve an ecologically sound land use compatible with the prevailing land use in unmined areas surrounding the permit area.

(4) Transport, backfill, and grade to ensure the impoundments are constructed only where it has been demonstrated to the regulatory authority's satisfaction that all requirements of Section 715.17 have been met and that the impoundments have been approved by the regulatory authority as meeting the requirements of this Part and all other applicable federal and state regulations.

H. Thick overburden. In surface coal mining operations where the volume of spoil is demonstrated to be more than sufficient to achieve the approximate original contour surface coal mining operations shall be conducted to meet at a minimum the following standards:

(1) Transport, backfill and grade all spoil and wastes not required to achieve approximate original contour in the surface mining area to the lowest practicable grade.

(2) Deposit, backfill and grade excess spoil and wastes only within the permit area and dispose of such materials in conformance with this part.

(3) Transport, backfill and grade excess spoil and wastes to maintain the hydrologic balance in accordance with this part and to provide long-term stability.

(4) Transport, backfill, grade and revegetate wastes and excess spoil to achieve an ecologically sound land use compatible with the prevailing land uses in unmined areas surrounding the permit area.

(5) Eliminate all highwalls and depressions except as stated in Paragraph (e) [now Subsection E of 19.8.36.25 NMAC] of this Section by backfilling with spoil and suitable waste materials.

I. Regrading or stabilizing rills and gullies. When rills or gullies deeper than nine inches form in areas that have been regraded and the topsoil replaced but vegetation has not yet been established the permittee shall fill, grade, or otherwise stabilize the rills and gullies and reseed or replant the areas according to Section 715.20. The regulatory authority shall specify that rills or gullies of lesser size be stabilized if the rills or gullies will be disruptive to the approved postmining land use or may result in additional erosion and sedimentation.

J. Covering coal and acid-forming, toxic-forming, combustible and other waste materials; stabilizing backfilled materials; and using waste material for fill.

(1) Cover all exposed coal seams remaining after mining and any acid-forming, toxic-forming, combustible materials, or any other waste materials identified by the regulatory authority that are exposed, used or produced during mining shall be covered with a minimum of four feet of nontoxic and noncombustible material; or, if necessary, treated to neutralize toxicity in order to prevent water pollution and sustained combustion, and to minimize adverse effects on plant growth and land uses. Where necessary to protect against upward migration of salts, exposure by erosion, to provide an adequate depth for plant growth or to otherwise meet local conditions, the regulatory authority shall specify thicker amounts of cover using nontoxic material. Acid-forming or toxic-forming material shall not be buried or stored in proximity to a drainage course so as to cause or pose a threat of water pollution or otherwise violate the provisions of Section 715.17 of this Part.

(2) Stabilization. Backfilled materials shall be selectively placed and compacted wherever necessary to prevent leaching of toxic-forming materials into surface or subsurface waters in accordance with Section 715.17 and wherever necessary to ensure the stability of the backfilled materials. The method of compacting material and the design specifications shall be approved by the regulatory authority before the toxic materials are covered.

(3) Use of waste materials as fill. Before waste materials from a coal preparation or conversion facility or from other activities conducted outside the permit area such as municipal wastes are used for fill material, it must be demonstrated to the regulatory authority by hydrogeological means and chemical and physical analyses that

use of these materials will not adversely affect water quality, water flow and vegetation; will not present hazards to public health and safety; and will not cause instability in the backfilled area.

K. Grading along the contour. All final grading, preparation of overburden before replacement of topsoil and placement of topsoil, in accordance with Section 715.16 shall be done along the contour to minimize subsequent erosion and instability. If such grading, preparation or placement along the contour would be hazardous to equipment operators then grading, preparation or placement in a direction other than generally parallel to the contour may be used. In all cases, grading, preparation or placement shall be conducted in a manner which minimizes erosion and provides a surface for replacement of topsoil which will minimize slippage.

[Recompiled 6/4/02]

19.8.36.26 GENERAL PERFORMANCE STANDARDS: DISPOSAL OF SPOIL AND WASTE MATERIALS IN AREAS OTHER THAN THE MINE WORKINGS OR EXCAVATIONS (715.15):

A. Disposal of spoil in other than valley or head-of-hollow fills. Spoil not required to achieve the approximate original contour shall be transported to and placed in a controlled (engineered) manner in disposal areas other than the mine workings or excavations only if all the following conditions, in addition to the other requirements of this part, are met:

(1) The disposal areas shall be within the permit area, and they must be approved by the regulatory authority as suitable for construction of fills in accordance with the requirements of this paragraph.

(2) The disposal areas shall be located on the most moderate sloping and naturally stable areas available as approved by the regulatory authority. Where possible, fill materials suitable for disposal shall be placed upon or above a natural terrace, bench or berm if such placement provides additional stability and prevents mass movement.

(3) The fill shall be designed using recognized professional standards, certified by a professional engineer, registered in the state of New Mexico and approved by the regulatory authority.

(4) Where the slope in the disposal area exceeds 1v:2.8h (36 percent), or such lesser slope designated by the regulatory authority based on local conditions, measures such as keyway cuts (excavations to stable bedrock) or rock toe buttresses shall be constructed to stabilize the fill.

(5) The disposal area does not contain springs, natural water courses, or wet weather seeps unless lateral drains are constructed from the wet areas to the

underdrains in such a manner that infiltration of the water into the spoil pile will be prevented.

(6) All organic material shall be removed from the disposal area and the topsoil must be removed and segregated pursuant to Section 715.16 before the material is placed in the disposal area. However, if approved by the regulatory authority, organic material may be used as mulch or may be included in the topsoil.

(7) The spoil shall be transported and placed in a controlled manner, concurrently compacted as necessary to ensure mass stability and prevent mass movement, covered, and graded to allow surface and subsurface drainage to be compatible with the natural surroundings, and to ensure long-term stability. The final configuration of the fill must be suitable for postmining land uses approved in accordance with Section 715.13. Terraces shall not be constructed unless approved by the regulatory authority.

(8) If any portion of the fill interrupts, obstructs or encroaches upon any natural drainage channel, the entire fill is classified as a valley or head-of-hollow fill and must be designed and constructed in accordance with the requirements of Paragraph (b) [now Subsection B of 19.8.36.26 NMAC] of this Section.

(9) The fill shall be inspected for stability by a registered engineer or other qualified professional specialist during critical construction periods to assure removal of all organic material and topsoil, placement of under-drainage systems, and proper construction of terraces according to the approved plan. The registered engineer or other qualified professional specialist shall provide a certified report after each inspection that the fill has been constructed as specified in the design approved by the regulatory authority.

B. Disposal of spoil in valley or head-of-hollow fills. Waste material must not be disposed of in valley or head-of-hollow fills. Spoil to be disposed of in natural valleys must be placed in accordance with the following requirements:

(1) The disposal areas shall be within the permit area, and they must be approved by the regulatory authority as suitable for construction of fills in accordance with the requirements of Paragraph (b) [now Subsection B of 19.8.36.26 NMAC].

(2) The disposal site shall be near the ridge top of a valley selected to increase the stability of the fill and to reduce the drainage area above the fill. Where possible, spoil shall be placed above a natural terrace, bench or berm, if such placement provides additional stability and prevents mass movement.

(3) The fill shall be designed using recognized professional standards, certified by a professional engineer registered in the State of New Mexico and approved by the regulatory authority.

(4) All organic material shall be removed from the disposal area and the topsoil must be removed and segregated pursuant to Section 715.16 of this Part before the material is placed in the disposal area. However, if approved by the regulatory authority, organic material may be used as mulch or may be included in the topsoil.

(5) Where the slope in the disposal area exceeds 1v:2.8h (36 percent), or such lesser slope designated by the regulatory authority based on local conditions, measures such as keyway cuts (excavations to stable bedrock) or rock toe buttresses shall be constructed to stabilize the fill.

(6) A system of underdrains constructed of durable rock shall be installed along the natural drainage system, shall extend from the toe to the head of the fill and contain lateral drains to each area of potential drainage or seepage. In constructing the underdrains, no more than ten percent of the rock may be less than 12 inches in size and no single rock may be larger than 25 percent of the width of the drain. No rock shall be used in underdrains if it tends to easily disintegrate and thereby clog the drain or if it is acid-forming or toxic-forming. The minimum size of the main underdrain shall be:

Total amount of Fill material	Predominant type of fill Material	Minimum size of drain in feet	
		Width	Height
Less than 1 million yd ³ .	Sandstone--	10	4
Do-----	Shale-----	16	8
More than 1 million yd ³ .	Sandstone-----	16	8
Do-----	Shale-----	16	8

(7) Spoil shall be transported and placed in a controlled manner and concurrently compacted as specified by the regulatory authority in lifts that are less than four feet thick in order to achieve the densities designed to ensure mass stability, to

prevent mass movement, to avoid contamination of the rock underdrain and to prevent formation of voids. The final configuration of the fill must be suitable for postmining land uses approved in accordance with Section 715.13.

(8) Terraces shall be constructed to stabilize the face of the fill. The outslope of each terrace shall not exceed 50 feet in length and the width of the terrace shall not be less than 20 feet.

(9) The tops of the fill and each terrace shall be graded no steeper than 1v:20h (five percent) and shall be constructed to drain surface water to the sides of the fill where stabilized surface channels shall be established off the fill to carry drainage away from the fill. Drainage shall not be directed over the outslope of the fill unless approved by the regulatory authority.

(10) All surface drainage from the undisturbed area above the fill shall be diverted away from the fill by approved structures leading into water courses.

(11) The outslope of the fill shall not exceed 1v:2h (50 percent). The regulatory authority may require a flatter slope.

(12) The fill shall be inspected for stability by a professional engineer registered in the State of New Mexico or other qualified professional specialist during critical construction periods and at least quarterly throughout construction to assure removal of all organic material and topsoil, placement of underdrainage systems and proper construction of terraces according to the approved plan. The registered engineer or other qualified professional specialist shall provide a certified report after each inspection that the fill has been constructed as specified in the design approved by the regulatory authority.

[Recompiled 6/4/02]

19.8.36.27 GENERAL PERFORMANCE STANDARDS: TOPSOIL HANDLING (715.16):

To prevent topsoil from being contaminated by spoil or waste materials, the permittee shall remove the topsoil as a separate operation from areas to be disturbed. Topsoil shall be immediately redistributed according to the requirements of Paragraph (b) [now Subsection B of 19.8.36.27 NMAC] of this section on areas graded to the approved postmining configuration. The topsoil shall be segregated, stockpiled and protected from wind and water erosion and from contaminants which lessen its capability to support vegetation if sufficient graded areas are not immediately available for redistribution.

A. Topsoil removal. All topsoil to be salvaged shall be removed before any drilling for blasting, mining or other surface disturbance.

(1) All topsoil shall be removed unless use of alternative materials is approved by the regulatory authority in accordance with Subparagraph (4) [now Paragraph 4 of Subsection A of 19.8.36.27 NMAC]. Where the removal of topsoil results in erosion that may cause air or water pollution, the regulatory authority shall limit the size of the area from which topsoil may be removed at any one time and specify methods of treatment to control erosion of exposed overburden.

(2) All of the A horizon of the topsoil as identified by soil surveys shall be removed according to Paragraph (a) [now Subsection A of 19.8.36.27 NMAC] and then replaced on disturbed areas as the surface soil layers. Where the A horizon is less than six inches, a six-inch layer that includes the A horizon and the unconsolidated material immediately below the A horizon (or all unconsolidated material if the total available is less than six inches) shall be removed and the mixture segregated and replaced as the surface soil layer.

(3) Where necessary to obtain soil productivity consistent with postmining land use, the regulatory authority may require that the B horizon or portions of the C horizon or other underlying layers demonstrated to have comparable quality for root development be segregated and replaced as subsoil.

(4) Selected overburden materials may be used instead of, or as a supplement to, topsoil where the resulting soil medium is equal to or more suitable for vegetation, and if all the following requirements are met:

(a) The permittee demonstrates that the selected overburden materials or an overburden-topsoil mixture is more suitable for restoring land capability and productivity by the results of chemical and physical analyses. These analyses shall include determinations of pH, percent organic material, nitrogen, phosphorus, potassium, texture class and water-holding capacity, and such other analyses as required by the regulatory authority. The regulatory authority also may require that results of field-site trials or greenhouse tests be used to demonstrate the feasibility of using such overburden materials.

(b) The chemical and physical analyses and the results of field-site trials and greenhouse tests are accompanied by a certification from a qualified soil scientist or agronomist.

(c) The alternative material is removed, segregated and replaced in conformance with this Section.

B. Topsoil Redistribution.

(1) Regraded land shall be scarified or otherwise treated to eliminate slippage surfaces and to promote root penetration.

(2) Topsoil shall be redistributed in a manner that:

(a) achieves an approximate uniform thickness consistent with the postmining land uses;

(b) prevents excess compaction of the spoil and topsoil; and

(c) protects the topsoil from wind and water erosion before it is seeded and planted.

C. Topsoil storage. If the permit allows storage of topsoil, the stockpiled topsoil shall be placed on a stable area within the permit area where it will not be disturbed or be exposed to excessive water, wind erosion or contaminants which lessen its capability to support vegetation before it can be redistributed on terrain graded to final contour. Stockpiles shall be selectively placed and protected from wind and water erosion, unnecessary compaction, and contamination by undesirable materials either by a vegetative cover as defined in Section 715.20(g) or by other methods demonstrated to provide equal protection such as snow fences, chemical binders and mulching. Unless approved by the regulatory authority, stockpiled topsoil shall not be moved until required for redistribution on a disturbed area.

D. Nutrients and soil amendments. Nutrients and soil amendments in the amounts and analyses as determined by soil tests shall be applied to the surface soil layer so that it will support the postmining requirements of Section 715.13 and the revegetation requirements of Section 715.20.

[Recompiled 6/4/02]

19.8.36.28 GENERAL PERFORMANCE STANDARDS: PROTECTION OF THE HYDROLOGIC SYSTEM (715.17):

The permittee shall plan and conduct coal mining and reclamation operations to minimize disturbance to the prevailing hydrologic balance in order to prevent long-term adverse changes in the hydrologic balance that could result from surface coal mining and reclamation operations, both on-and off-site. Changes in water quality and quantity, in the depth to groundwater, and in the location of surface water drainage channels shall be minimized such that the postmining land use of the disturbed land is not adversely affected and applicable federal and state statutes and regulations are not violated. The permittee shall conduct operations so as to minimize water pollution and shall, where necessary, use treatment methods to control water pollution. The permittee shall emphasize surface coal mining and reclamation practices that will prevent or minimize water pollution and changes in flows in preference to the use of water treatment facilities. Practices to control and minimize pollution include, but are not limited to, stabilizing disturbed areas through grading, diverting runoff, achieving quick growing stands of temporary vegetation, lining drainage channels with rock or vegetation, mulching, sealing acid-forming and toxic-forming materials, and selectively placing waste materials in backfill areas. If pollution can be controlled only by treatment,

the permittee shall operate and maintain the necessary water-treatment facilities for as long as treatment is required.

[Recompiled 6/4/02]

19.8.36.29 GENERAL PERFORMANCE STANDARDS: WATER QUALITY STANDARDS AND EFFLUENT LIMITATIONS (715.17)(a):

¹The standards in this section will be enjoined to the extent that they supersede, amend, repeal or modify the provisions of the Federal Water Pollution Control Act and its regulations.

A. All surface drainage from the disturbed area, including disturbed areas that have been graded, seeded, or planted, shall be passed through a sedimentation pond or a series of sedimentation ponds before leaving the permit area. Sedimentation ponds shall be retained until drainage from the disturbed area has met the water quality requirements of this section and the revegetation requirements of Section 715.20 have been met. The regulatory authority may grant exemptions from this requirement only when the disturbed drainage area within the total disturbed area is small and if the permittee shows that sedimentation ponds are not necessary to meet the effluent limitations of this paragraph and to maintain water quality in downstream receiving waters. For purpose of this section only, disturbed area shall not include those areas in which only diversion ditches, sedimentation ponds, or roads are installed in accordance with this section and the upstream area is not otherwise disturbed by the permittee. Sedimentation ponds required by this paragraph shall be constructed in accordance with Paragraph (e) [now Subsection E of 19.8.36.29 NMAC] of this section in appropriate locations prior to any mining in the affected drainage area in order to control sedimentation or otherwise treat water in accordance with this paragraph. Discharges from areas disturbed by surface coal mining and reclamation operations must meet all applicable Federal and State laws and regulations and, at a minimum, the following numerical effluent limitations:

EFFLUENT LIMITATIONS IN MILLIGRAMS PER LITER

mg/1, Except For pH

		Average of Daily values
Effluent	Maximum	for 30
Characteristics	allowable ¹	consecutive

discharge days¹

Iron, total-----	7.0	3.5
Manganese, total-----	4.0	2.0
Total suspended solids	70.0	35.0
pH ²	Within the----- range 6.0 to 9.0.	

¹Based on representative sampling.

²Where the applications of neutralization and sedimentation treatment technology results in inability to comply with the manganese limitations set forth, the regulatory authority may allow the pH level in the discharge to exceed to a small extent the upper limit of 9.0 in order that the manganese limitations will be achieved.

(1) Any overflow or other discharge of surface water from the disturbed area within the permit area demonstrated by the permittee to result from a precipitation event larger than a ten-year 24-hour frequency event will not be subject to the effluent limitations of Paragraph (a) [now Subsection A of 19.8.36.29 NMAC].

(2) The permittee shall install, operate, and maintain adequate facilities to treat any water discharged from the disturbed area that violates applicable federal or state laws or regulations or the limitations of Paragraph (a) [now Subsection A of 19.8.36.29 NMAC]. If the pH of waters to be discharged from the disturbed area is normally less than 6.0, an automatic lime feeder or other neutralization process approved by the regulatory authority shall be installed, operated and maintained. If the regulatory authority finds (1) that small and infrequent treatment requirements to meet applicable standards do not necessitate use of an automatic neutralization process, and (2) that the mine normally produces less than 500 tons of coal per day, then the regulatory authority may approve the use of a manual system if the permittee ensures consistent and timely treatment.

B. Surface-water monitoring.

(1) The permittee shall submit for approval by the regulatory authority a surface-water monitoring program which meets the following requirements:

(a) Provides adequate monitoring of all discharge from the disturbed area.

(b) Provides adequate data to describe the likely daily and seasonal variation in discharges from the disturbed area in terms of water flow, pH, total iron, total manganese and total suspended solids and, if requested by the regulatory authority, any other parameter characteristic of the discharge.

(c) Provides monitoring at appropriate frequencies to measure normal and abnormal variations in concentrations.

(d) Provides an analytical quality control system including standard methods of analysis such as those specified in 40 CFR 136.

(e) Provides a regular report of all measurements to the regulatory authority within 60 days of sample collection unless violations of permit conditions occur in which case the regulatory authority shall be notified immediately after receipt of analytical results by the permittee. If the discharge is subject to regulation by a federal or state permit issued in compliance with the Federal Water Pollution Control Act Amendment of 1972 (33 U.S.C. ' 1251-1-378), a copy of the completed reporting form supplied to meet the permit requirements may be submitted to the regulatory authority to satisfy the reporting requirements if the data meet the sampling frequency and other requirements of this paragraph.

(2) After disturbed areas have been regraded and stabilized in accordance with this Part, the permittee shall monitor surface water flow and quality. Data from this monitoring shall be used to demonstrate that the quality and quantity of runoff without treatment will be consistent with the requirement of this section to minimize disturbance to the prevailing hydrologic balance and with the requirements of this part to attain the approved postmining land use. These data shall provide a basis for approval by the regulatory authority for removal of water quality or flow control systems and for determining when the requirements of this Section are met. The regulatory authority shall determine the nature of data, frequency of collection and reporting requirements.

(3) Equipment, structures and other measures necessary to accurately measure and sample the quality and quantity of surface water discharges from the disturbed area of the permit area shall be properly installed, maintained and operated and shall be removed when no longer required.

C. Diversion and conveyance of overland flow away from disturbed areas. In order to minimize erosion and to prevent or remove water from contacting toxic-producing deposits, overland flow from undisturbed areas may, if required or approved by the regulatory authority, be diverted away from disturbed areas by means of temporary or permanent diversion structures. The following requirements shall be met:

(1) Temporary diversion structures shall be constructed to safely pass the peak runoff from a precipitation event with a one year recurrence interval, or a larger

event as specified by the regulatory authority. The design criteria must assure adequate protection of the environment and public during the existence of the temporary diversion structure.

(2) Permanent diversion structures are those remaining after mining and reclamation and approved for retention by the regulatory authority and other appropriate state and federal agencies. To protect fills and property and to avoid danger to public health and safety, permanent diversion structures shall be constructed to safely pass the peak runoff from a precipitation event with a 100-year recurrence interval, or a larger event as specified by the regulatory authority. Permanent diversion structures shall be constructed with gently sloping banks that are stabilized by vegetation. Asphalt, concrete or other similar linings shall not be used unless specifically required to prevent seepage or to provide stability and are approved by the regulatory authority.

(3) Diversions shall be designed, constructed and maintained in a manner to prevent additional contributions of suspended solids to streamflow or to runoff outside the permit area to the extent possible, using the best technology currently available. In no event shall such contributions be in excess of requirements set by applicable state or federal law. Appropriate sediment control measures for these diversions shall include, but not be limited to, maintenances of appropriate gradients, channel lining, revegetation, roughness structures and detention basins.

D. Stream channel diversions.

(1) Flow from perennial and intermittent streams within the permit area may be diverted only when the diversions are approved by the regulatory authority and they are in compliance with local, state, and federal statutes and regulations. When streamflow is allowed to be diverted, the new stream channel shall be designed and constructed to meet the following requirements:

(a) The average stream gradient shall be maintained and the channel designed, constructed, and maintained to remain stable and to prevent additional contributions of suspended solids to streamflow, or to runoff outside the permit area to the extent possible, using the best technology currently available. In no event shall such contributions be in excess of requirements set by applicable state or federal law. Erosion control structures such as channel lining structures, retention basins and artificial channel roughness structures shall be used only when approved by regulatory agency for temporary diversions where necessary or for permanent diversions where they are stable and will require only infrequent maintenance.

(b) Channel, bank and flood-plain configurations shall be adequate to safely pass the peak runoff of a precipitation event with a ten-year recurrence interval for temporary diversions and a 100-year recurrence interval for permanent diversions, or larger events as specified by the regulatory authority.

(c) Fish and wildlife habitat and water and vegetation of significant value for wildlife shall be protected in consultation with appropriate state and federal fish and wildlife management agencies.

(2) All temporary diversion structures shall be removed and the affected land regraded and revegetated consistent with the requirements of Section 715.14 and Section 715.20. At the time such diversions are removed, the permittee shall ensure that downstream water treatment facilities previously protected by the diversion are modified or removed to prevent overtopping or failure of the facilities.

(3) Buffer zone. No land within 100 feet of an intermittent or perennial stream shall be disturbed by surface coal mining and reclamation operations unless the regulatory authority specifically authorizes surface coal mining and reclamation operations through such a stream. The area not to be disturbed shall be designated a buffer zone and marked as specified in Section 715.12.

E. ² Sediment control measures. Appropriate sediment control measures shall be designed, constructed, and maintained to prevent additional contributions of sediment to streamflow or to runoff outside the permit area to the extent possible, using the best technology currently available. ²The standards in Section 715.17(e) will be preliminarily enjoined.

(1) Sediment control measures include practices carried out within and adjacent to the disturbed area. The scale of downstream practices shall reflect the degree to which successful techniques are applied at the sources of the sediment. Sediment control measures consist of the utilization of proper mining, reclamation methods, and sediment control practices (singly or in combination) including but not limited to:

(a) Disturbing the smallest practicable area at any one time during the mining operation through progressive backfilling, grading and timely revegetation.

(b) Consistent with the requirements of Section 715.14 and Section 715.15 shaping the backfill material to promote a reduction of the rate and volume of runoff.

(c) Retention of sediment within the pit and disturbed area.

(d) Diversion of overland and channelized flow from undisturbed areas around or in protected crossings through the disturbed area.

(e) Utilization of straw dikes, riprap, check dams, mulches, vegetative sediment filters, dugout ponds and other measures that reduce overland flow velocity, reduce runoff volume or entrap sediment.

(f) Sedimentation ponds.

(2) Sedimentation ponds, may be used individually or in series, should be located as near as possible to the disturbed area and where possible out of major stream courses, and shall (either individually or in series) meet the following criteria:

(a) Sedimentation ponds must provide 24-hour theoretical detention time for the inflow or runoff entering the ponds from a ten-year, 24-hour precipitation event. Runoff diverted, in accordance with Paragraphs (c) and (d) [now Subsections C and D of 19.8.36.29 NMAC] of this Section, away from the disturbed drainage areas need not be considered in sedimentation pond design. In determining the runoff volume the characteristics of the mine site, reclamation procedures and on-site sediment control practices shall be considered.

(b) Upon approval of the regulatory authority theoretical detention time may be reduced to not less than ten hours, as demonstrated by the permittee, equal to the improvement in sedimentation removal efficiency as a result of pond design including but not limited to pond configuration, inflow-outflow facilities and their relative location, baffles to decrease inflow velocity and short circuiting, a surface area sufficient to achieve the sediment trap efficiency necessary to meet effluent limitations (Sec. 715.17 (a)) and sediment control measures provided in Section 715.17 (e)(1).

(c) The regulatory authority may approve a detention time less than the time required by Paragraph (e)(2) (i) or (ii) [now Subparagraphs a and b of Paragraph 2 of Subsection E of 19.8.36.29 NMAC] of this section, when the permittee has demonstrated that the size distribution or the specific gravity of the suspended matter or the utilization of chemical treatment or flocculation are such that the effluent limitations can be met. The detention time shall be stipulated.

(3) An additional sediment storage volume must be provided equal to 0.2 acre-feet for each acre of disturbed area within the upstream drainage area. Upon approval of the regulatory authority, the sediment storage volume may be reduced in an amount, as demonstrated by the permittee, equal to the sediment removed by other appropriate sediment control measures such as those identified in Paragraph (e)(1) [now Paragraph 1 of Subsection E of 19.8.36.29 NMAC] of this section, or by lesser sediment yields as evidenced by empirical data for runoff characteristics.

(4) Ponds may be of the permanent pool or self-dewatering type. Dewatering-type ponds shall use siphon or other dewatering methods approved by the regulatory authority to prevent discharges of pollutants within the design flow.

(5) Spillway systems shall be properly located to maximize the distances from the point of inflow into the pond to maximize detention times. Spillway systems shall be provided to safely discharge the peak runoff from a precipitation event with a 25-year recurrence interval, or larger event as specified by the regulatory authority.

(6) Sediment shall be removed from sedimentation ponds so as to assure maximum sediment removal efficiency and attainment and maintenance of effluent

limitations. Sediment removal shall be done in a manner that minimizes adverse effects on surface waters due to its chemical and physical characteristics, on infiltration, on vegetation, and on surface and groundwater quality. Sediment that has been removed from sedimentation ponds and that meets the requirements for topsoil may be redistributed over graded areas in accordance with Section 715.16.

(7) If a sedimentation pond has an embankment that is more than 20 feet in height, as measured from the downstream toe of the embankment to the top of the embankment, or has a storage volume of 20 acre-feet or more, the following additional requirements shall be met:

(a) An appropriate combination of principal and emergency spillways shall be provided to safely discharge the runoff resulting from a 100-year six-hour precipitation event, or larger event as specified by the regulatory authority.

(b) Ponds shall be designed and constructed with an acceptable static safety factor of at least 1.5 of maximum design flood elevation of the pool to ensure embankment slope stability.

(c) The minimum top width of the embankment shall not be less than the quotient of $H+35/5$ where H is the height of the embankment as measured from the downstream toe to the top of the embankment.

(d) Ponds shall have appropriate barriers to control seepage along conduits that extend through the embankment.

(8) All ponds shall be designed and inspected under the supervision of, and certified after construction by a professional engineer registered in the state of New Mexico.

(9) All ponds, including those not meeting the size or other criteria of 'Section 77.216(a) of this title, shall be examined for structural weakness, erosion, and other hazardous conditions in accordance with the inspection requirements contained in' Section 77.216-3 of this title.

(10) All ponds shall be removed and the affected land regraded and revegetated consistent with the requirements of Section 715.14 and Section 715.20, unless the regulatory authority approves retention of the ponds pursuant to Paragraph (k) [now Subsection K of 19.8.36.29 NMAC] of this Section.

F. Discharge structures. Discharges from sedimentation ponds and diversions shall be controlled, where necessary, using energy dissipators, surge ponds and other devices to reduce erosion and prevent deepening or enlargement of stream channels and to minimize disturbances to the hydrologic balance.

G. Acid and toxic materials. Drainage from acid-forming and toxic-forming mine waste materials and soils into ground and surface water shall be avoided by:

(1) Identifying, burying and treating where necessary, spoil or other materials that, in the judgment of the regulatory authority, will be toxic to vegetation or that will adversely affect water quality if not treated or buried. Such material shall be disposed of in accordance with the provision of Section 715.14(j).

(2) Preventing or removing water from contact with toxic-producing deposits.

(3) Burying or otherwise treating all toxic or harmful materials within 30 days, if such materials are subject to wind and water erosion, or within a lesser period designated by the regulatory authority. If storage of such materials is approved, the materials shall be placed on impermeable material and protected from erosion and contact with surface water. Coal waste ponds and other coal waste materials shall be maintained according to Section 715.17(g) (4), and Section 715.18 shall apply.

(4) Burying or otherwise treating waste materials from coal preparation plants no later than 90 days after the cessation of the filling of the disposal area. Burial or treatment shall be in accordance with Section 715.14(j).

(5) Casing, sealing or otherwise managing boreholes, shafts, wells and auger holes or other more or less horizontal holes to prevent pollution of surface or groundwater and to prevent mixing of groundwaters of significantly different quality. All boreholes that are within the permit area but are outside the surface coal mining area or which extend beneath the coal to be mined and into water bearing strata shall be plugged permanently in a manner approved by the regulatory authority, unless the boreholes have been approved for use in monitoring.

(6) Taking such other actions as required by the regulatory authority.

H. Groundwater.

(1) Recharge capacity of reclaimed lands. The disturbed area shall be reclaimed to restore approximate premining recharge capacity through restoration of the capability of the reclaimed areas as a whole to transmit water to the groundwater system. The recharge capacity should be restored to support the approved postmining land use and to minimize disturbances to the prevailing hydrologic balance at the mined area and in associated offsite areas. The permittee shall be responsible for monitoring according to Paragraph (h) (3) [now Paragraph 3 of Subsection H of 19.8.36.29 NMAC] of this section to ensure operations conform to this requirement.

(2) Groundwater systems. Backfilled materials shall be placed to minimize adverse effects on groundwater flow and quality, to minimize offsite effects, and to support the approved postmining land use. The permittee shall be responsible for

performing monitoring according to Paragraph (h)(3) [now Paragraph 3 of Subsection H of 19.8.36.29 NMAC] of this section to ensure operations conform to this requirement.

(3) Monitoring. Groundwater levels, infiltration rates, subsurface flow and storage characteristics, and the quality of groundwater shall be monitored in a manner approved by the regulatory authority to determine the effects of surface coal mining and reclamation operations on the recharge capacity of reclaimed lands and on the quantity and quality of water in groundwater systems at the mine area and in associated off-site areas. When operations are conducted in such a manner that may affect the groundwater system, groundwater levels and groundwater quality shall be periodically monitored using wells that can adequately reflect changes in groundwater quantity and quality resulting from such operations. Sufficient water wells must be used by the permittee. The regulatory authority may require drilling and development of additional wells if needed to adequately monitor the groundwater system. As specified and approved by the regulatory authority, additional hydrologic tests, such as infiltration tests and aquifer tests, must be undertaken by the permittee to demonstrate compliance with Subparagraphs (1) and (2) [now Paragraphs 1 and 2 of Subsection H of 19.8.36.29 NMAC] of this paragraph.

I. Water rights and replacement. The permittee shall replace the water supply of an owner of interest in real property who obtains all or part of his supply of water for domestic, agricultural, industrial or other legitimate use from an underground or surface source where such supply has been affected by contamination, diminution or interruption proximately resulting from surface coal mine operation by the permittee.

J. Alluvial valley floors west of the 100th meridian west longitude.

(1) Surface coal mining operations conducted in or adjacent to alluvial valley floors shall be planned and conducted so as to preserve the essential hydrologic functions of these alluvial valley floors throughout the mining and reclamation process. These functions shall be preserved by maintaining or reestablishing those hydrologic and biologic characteristics of the alluvial valley floor that are necessary to support the functions. The permittee shall provide information to the regulatory authority as required in Paragraph (j)(3) [now Paragraph 3 of Subsection J of 19.8.36.29 NMAC] of this section to allow identification of essential hydrologic functions and demonstrate that the functions will be preserved. The characteristics of an alluvial valley floor to be considered include, but are not limited to:

(a) The longitudinal profile (gradient), cross-sectional shape and other channel characteristics of streams that have formed within the alluvial valley floor and that provide for maintenance of the prevailing conditions of surface flow;

(b) Aquifers (including capillary zones and perched water zones) and confining beds within the mined area which provide for storage, transmission and regulation of natural groundwater and surface water that supply the alluvial valley floors;

(c) Quantity and quality of surface and groundwater that supply alluvial valley floors;

(d) Depth to and seasonal fluctuations of groundwater beneath alluvial valley floors;

(e) Configuration and stability of the land surface in the flood plain and adjacent low terraces in alluvial valley floors as they allow or facilitate irrigation with flood waters or subirrigation and maintain erosional equilibrium; and

(f) Moisture-holding capacity of soils (or plant growth medium) within the alluvial valley floors, and physical and chemical characteristics of the subsoil which provide for sustained vegetation growth or cover through dry months.

(2) Surface coal mining operations located west of the 100th meridian west longitude shall not interrupt, discontinue or preclude farming on alluvial valley floors and shall not materially damage the quantity or quality of surface or groundwater that supplies these valley floors unless the premining land use has been undeveloped rangeland which is not significant to farming on the alluvial valley floors or unless the area of affected alluvial valley floor is small and provides negligible support for the production from one or more farms. This Subparagraph (2) [now Paragraph 2 of Subsection J of 19.8.36.29 NMAC] does not apply to those surface coal mining operations that:

(a) Were in production in the year preceding August 3, 1977, were located in or adjacent to an alluvial valley floor, and produced coal in commercial quantities during the year preceding August 3, 1977; or

(b) Had specific permit approval by the state regulatory authority before August 3, 1977, to conduct surface coal mining operations for an area within an alluvial valley floor.

(3)

(a) Before surface mining and reclamation operations authorized under Paragraph (j)(2) [now Paragraph 2 of Subsection J of 19.8.36.29 NMAC] of this section may be issued a new, revised or amended permit, the permittee shall submit, for regulatory authority approval, detailed surveys and baseline data to establish standards against which the requirements of Paragraph (j)(1) [now Paragraph 1 of Subsection J of 19.8.36.29 NMAC] of this section may be measured and from which the degree of material damage to the quantity and quality of surface and groundwater that supply the alluvial valley floors may be assessed. The surveys and data shall include--

(i) A map, at a scale determined by the regulatory authority, showing the location and configuration of the alluvial valley floor;

(ii) Baseline data covering a full water year for each of the hydrologic functions identified in Paragraph (j)(1) [now Paragraph 1 of Subsection J of 19.8.36.29 NMAC] of this section;

(iii) Plans showing how the operation will avoid, during mining and reclamation, interruption, discontinuance or preclusion of farming on the alluvial valley floors and will not materially damage the quantity or quality of water in surface and groundwater systems that supply such valley floors;

(iv) Historic land use data for the proposed permit area and for farms to be affected; and

(v) Such other data as the regulatory authority may require.

(b) Surface mining operations which qualify for the exceptions in Paragraph (j)(2) [now Paragraph 2 of Subsection J of 19.8.36.29 NMAC] of this section are not required to submit the plans prescribed in (i)(C) [now Sub-subparagraph (iii) of Subparagraph a of Paragraph 3 of Subsection J of 19.8.36.29 NMAC] of this subparagraph.

(4) The holder of a federal coal lease or the fee holder of any coal deposit located within or adjacent to an alluvial valley floor west of the 100th meridian west from which coal was not produced in commercial quantities between August 3, 1976, and August 3, 1977, and for which no specific permit by the appropriate state or federal regulatory authority to conduct surface coal mining operations in the alluvial valley floors has been obtained, may be entitled to an exchange of the federal coal lease for a lease of other federal coal deposits under section 510(b)(5) of the Act or to the conveyance by the secretary of fee title to other available federal coal deposits in exchange for the fee title to such deposits under Section 206 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2743), if the secretary determines that substantial financial and legal commitments were made by the operator prior to January 1, 1977, in connection with surface coal mining operations on such lands.

(5) The secretary may, if he determines that the person is qualified for an exchange of federal coal leases under the provisions of section 510(b)(5) of the Act or a conveyance of other federal coal deposits under section 206 of the Federal Land Policy and Management Act, take appropriate steps to complete the exchange of lands. The secretary may require the person to submit additional information and a formal application for exchange.

K. Permanent impoundments. The permittee may construct, if authorized by the regulatory agency pursuant to this paragraph and Section 715.13, permanent water impoundments on mining sites as a part of reclamation activities only when they are adequately demonstrated to be in compliance with Section 715.13 and Section 715.14 in addition to the following requirements:

- (1) The size of the impoundment is adequate for its intended purposes.
- (2) The impoundment dam construction is designed to achieve necessary stability with an adequate margin of safety compatible with that of structures constructed under Pub. L. 83-566 (16 U.S.C.1006).
- (3) The quality of the impounded water will be suitable on a permanent basis for its intended use and discharges from the impoundment will not degrade the quality of receiving waters below the water quality standards established pursuant to applicable federal and state law.
- (4) The level of water will be reasonably stable.
- (5) Final grading will comply with the provisions of Section 715.14 and will provide adequate safety and access for proposed water users.
- (6) Water impoundments will not result in the diminution of the quality or quantity of water used by adjacent or surrounding landowners for agricultural, industrial, recreational or domestic uses.

L. Hydrologic impact of roads.

(1) General. Access and haul roads and associated bridges, culverts, ditches and road rights-of-way shall be constructed, maintained and reclaimed to prevent additional contributions of suspended solids to streamflow, or to runoff outside the permit area to the extent possible, using the best technology currently available. In no event shall the contributions be in excess of requirements set by applicable state or federal law. All access and haul roads shall be removed and the land affected regraded and revegetated consistent with the requirements of Section 715.14 and Section 715.20, unless retention of a road is approved as part of a postmining land use under Section 715.13 as being necessary to support the postmining land use or necessary to adequately control erosion and the necessary maintenance is assured.

(2) Construction.

(a) All roads, insofar as possible, shall be located on ridges or on the available flatter and more stable slopes to minimize erosion. Stream fords are prohibited unless they are specifically approved by the regulatory authority as temporary routes across dry streams that will not adversely affect sedimentation and that will not be used for coal haulage. Other stream crossing shall be made using bridges, culverts or other structures designed and constructed to meet the requirements of this paragraph. Roads shall not be located in active stream channels nor shall they be constructed or maintained in a manner that increases erosion or causes significant sedimentation or flooding. However, nothing in this paragraph will be construed to prohibit relocation of stream channels in accordance with Paragraph (d) [now Subsection D of 19.8.36.29 NMAC] of this section.

(b) In order to minimize erosion and subsequent disturbances of the hydrologic balance, roads shall be constructed in compliance with the following grade restrictions or other grades determined by the regulatory authority to be necessary to control erosion.

(i) The overall sustained grade shall not exceed 1v:10h (ten percent).

(ii) The maximum grade greater than ten percent shall not exceed 1v:6.5h (15 percent) for more than 300 feet.

(iii) There shall not be more than 300 feet of grade exceeding ten percent within each 1,000 feet.

(c) All access and haul roads shall be adequately drained using structures such as, but not limited to, ditches, water barriers, cross drains, and ditch relief drains. For access and haul roads that are to be maintained for more than one year, water-control structures shall be designed with a discharge capacity capable of passing the peak runoff from a ten-year, 24-hour precipitation event. Drainage pipes and culverts shall be constructed to avoid plugging or collapse and erosion at inlets and outlets. Drainage ditches shall be provided at the toe of all cut slopes formed by construction of roads. Trash racks and debris basins shall be installed in the drainage ditches wherever debris from the drainage area could impair the functions of drainage and sediment control structures. Ditch relief and cross drains shall be spaced according to grade. Effluent limitations of Paragraph (a) [now Subsection A of 19.8.36.29 NMAC] of this Section shall not apply to drainage from access and haul roads located outside the disturbed area as defined in this Section unless otherwise specified by the regulatory authority.

(d) Access and haul roads shall be surfaced with durable material. Toxic- or acid-forming substances shall not be used. Vegetation may be cleared only for the essential width necessary for road and associated ditch construction and to serve traffic needs.

(3) Maintenance.

(a) Access and haul roads shall be routinely maintained by means such as, but not limited to, wetting, scraping or surfacing.

(b) Ditches, culverts, drains, trash racks, debris basins and other structures serving to drain access and haul roads shall not be restricted or blocked in any manner that impedes drainage or adversely affects the intended purpose of the structure.

M. Hydrologic impacts of other transport facilities. Railroad loops, spurs, sidings and other transport facilities shall be constructed, maintained and reclaimed to control diminution or degradation of water quality and quantity and to prevent additional contributions of suspended solids to streamflow, or to runoff outside the permit area to

the extent possible, using the best technology currently available. In no event shall contributions be in excess of requirements set by applicable State or Federal law.

N. Discharge of waters into underground mines. Surface and groundwaters shall not be discharged or diverted into underground mine workings.

[Recompiled 6/4/02]

19.8.36.30 GENERAL PERFORMANCE STANDARDS: DAMS CONSTRUCTED OF WASTE MATERIAL (715.18):

A. General. No waste material shall be used in existing or new dams without the approval of the regulatory authority. The permittee shall design, locate, construct, operate, maintain, modify and abandon or remove all dams (used either temporarily or permanently) constructed of waste materials, in accordance with the requirements of this Section.

B. Construction of dams:

(1) Waste shall not be used in the construction of dams unless demonstrated through appropriate engineering analysis, to have no adverse effect on stability.

(2) Plans for dams subject to this Section, and also including those dams that do not meet the size or other criteria of Section 77.216 (a) of this Title, shall be approved by the regulatory authority before construction and shall contain the minimum plan requirements established by the mining enforcement and safety administration pursuant to Section 77.216-2 of this title.

(3) Construction requirements are as follows:

(a) Design shall be based on the flood from the probable maximum precipitation event unless the permittee shows that the failure of the impounding structure would not cause loss of life or severely damage property or the environment, in which case, depending on site conditions, a design based on a precipitation event of no less than 100-year frequency may be approved by the regulatory authority.

(b) The design freeboard distance between the lowest point on the embankment crest and the maximum water elevation shall be at least three feet to avoid overtopping by wind and wave action.

(c) Dams shall have minimum safety factors as follows:

Case	Loading Condition	Minimum Safety Factor
------	-------------------	-----------------------

I-----	End of construction-----
--1.3	
II-----	Partial pool with steady seepage saturation
1.5	
III-----	Steady seepage from spillway or decant crest.
1.5	
IV-----	Earthquake (cases II and III with seismic loading).
1.0	

(d) The dam, foundation and abutments shall be stable under all conditions of construction and operation of the impoundment. Sufficient foundation investigations and laboratory testing shall be performed to determine the factors of safety of the dam for all loading conditions in Paragraph (b)(3)(iii) [now Subparagraph c Paragraph 3 of Subsection B of 19.8.36.30 NMAC] of this Section and for all increments of construction.

(e) Seepage through the dam, foundation and abutments shall be controlled to prevent excessive uplift pressures, internal erosion, sloughing, removal of material by solution or erosion of material by loss into cracks, joints and cavities. This may require the use of impervious blankets, previous drainage zones or blankets, toe drains, relief wells or dental concreting of jointed rock surface in contact with embankment materials.

(f) Allowances shall be made for settlement of the dams and the foundation so that the freeboard will be maintained.

(g) Impoundments created by dams of waste materials shall be subject to a minimum drawdown criteria that allows the facility to be evacuated by spillways or decants of 90 percent of the volume of water stored during the design precipitation event within ten days.

(h) During construction of dams subject to this section, the structures shall be periodically inspected by a professional engineer registered in the state of New Mexico to ensure construction according to the approved design. On completion of construction, the structure shall be certified by a professional engineer registered in the state of New Mexico experienced in the field of dam construction as having been constructed in accordance with accepted professional practice and the approved design.

(i) A permanent identification marker, at least six feet high that shows the dam number assigned pursuant to' Section 77-216-1 of this title and the name of the person operating or controlling the dam, shall be located on or immediately adjacent to each dam within 30 days of certification of design pursuant to this section.

(4) All dams, including those not meeting the size or other criteria of Section 77.216 (a) of this title, shall be routinely inspected by a professional engineer registered in the state of New Mexico, or someone under the supervision of a registered professional engineer, in accordance with mining enforcement and safety administration regulations pursuant to Section 77.216-3 of this title.

(5) All dams shall be routinely maintained. Vegetative growth shall be cut where necessary to facilitate inspection and repairs. Ditches and spillways shall be cleaned. Any combustible materials present on the surface, other than that used for surface stability such as mulch or dry vegetation, shall be removed and any other appropriate maintenance procedures followed.

(6) All dams subject to this Section shall be certified annually as having been constructed and modified in accordance with current prudent engineering practices to minimize the possibility of failures. Any changes in the geometry of the impounding structure shall be highlighted and included in the annual certification report. These certifications shall include a report on existing and required monitoring procedures and instrumentation, the average and maximum depths and elevations of any impounded waters over the past year, existing storage capacity of impounding structures, any fires occurring in the material over the past year and any other aspects of the structures affecting their stability.

(7) Any enlargements, reductions in size, reconstruction or other modification of the dams shall be approved by the regulatory authority before construction begins.

(8) All dams shall be removed and the disturbed areas regraded, revegetated and stabilized before the release of bond unless the regulatory authority approves retention of such dams as being compatible with an approved postmining land use (Section 715.13).

[Recompiled 6/4/02]

19.8.36.31 GENERAL PERFORMANCE STANDARDS: USE OF EXPLOSIVES (715.19):

A. General.

(1) The permittee shall comply with all applicable local, state and federal laws and regulations and the requirements of this section in the storage, handling, preparation and use of explosives.

(2) Blasting operations that use more than the equivalent of 5 pounds of TNT shall be conducted according to a time schedule approved by the regulatory authority.

(3) All blasting operations shall be conducted by experienced, trained and competent persons who understand the hazards involved. Persons working with explosive materials shall:

(a) Have demonstrated a knowledge of, and a willingness to comply with safety and security requirements;

(b) Be capable of using mature judgement in all situations;

(c) Be in good physical condition and not addicted to intoxicants, narcotics or other similar types of drugs;

(d) Possess current knowledge of the local, state and federal laws and regulations applicable to his work; and

(e) Have obtained a certificate of completion of training and qualification as required by state law or the regulatory authority.

B. Preblasting survey.

(1) On the request to the regulatory authority of a resident or owner of a manmade dwelling or structure that is located within one-half mile of any part of the permit area, the permittee shall conduct a preblasting survey of the dwelling or structure and submit a report of the survey to the regulatory authority.

(2) Personnel approved by the regulatory authority shall conduct the survey to determine the condition of the dwelling or structure and to document any preblasting damage and other physical factors that could reasonably be affected by the blasting. Assessments of structures such as pipes, cables, transmission lines and wells and other water systems shall be limited to surface condition and other readily available data. Special attention shall be given to the preblasting condition of wells and other water systems used for human, animal or agricultural purposes and to the quantity and quality of the water.

(3) A written report of the survey shall be prepared and signed by the person or persons who conducted the survey and prepared the written report. The report shall include recommendations of any special conditions or proposed adjustments to the blasting procedures outlined in Paragraph (e) [now Subsection E of 19.8.36.31 NMAC] of this Section which should be incorporated into the the blasting plan to prevent damage. Copies of the report shall be provided to the person requesting the survey and to the regulatory authority.

C. Public notice of blasting schedule. At least 10 days, but not more than 20 days before beginning a blasting program in which explosives that use more than the equivalent of 5 pounds of TNT are detonated, the permittee shall publish a blasting schedule in a newspaper of general circulation in the locality of the proposed site. Copies of the schedule shall be distributed by mail to local governments and public utilities and to each residence within one-half mile of the blasting sites described in the schedule. The permittee shall republish and redistribute the schedule by mail at least every 3 months. Blasting schedules shall not be so general as to cover all working hours but shall identify as accurately as possible the location of the blasting site and the time periods when blasting will occur. The blasting schedule shall contain at a minimum:

(1) Identification of the specific areas in which blasting will take place. The specific blasting areas described shall not be larger than 300 acres with a generally contiguous border;

(2) Dates and times when explosives are to be detonated expressed in not more than 4-hour increments;

(3) Methods to be used to control access to the blasting area;

(4) Types of audible warnings and all-clear signals to be used before and after blasting; and

(5) A description of possible emergency situations (defined in Paragraph (e)(1)(ii) of this Section) [now Subparagraph b of Paragraph 1 of Subsection E of 19.8.36.31 NMAC], which have been approved by the regulatory authority, when it may be necessary to blast at times other than those described in the schedule.

D. Public notice of changes to blasting schedules. Before blasting in areas not covered by a previous schedule or whenever the proposed frequency of individual detonations are materially changed, the permittee shall prepare a revised blasting schedule in accordance with the procedures in Paragraph (c) [now Subsection C of 19.8.36.31 NMAC] of this Section. If the change involves only a temporary adjustment of the frequency of blasts, the permittee may use alternate methods to notify the governmental bodies and individuals to whom the original schedule was sent.

E. Blasting procedures.

(1) General.

(a) All blasting shall be conducted only during the daytime hours, defined as sunrise until sunset. Based on public requests or other considerations, including the proximity to residential areas, the regulatory authority may specify more restrictive time periods.

(b) Blasting may not be conducted at times different from those announced in the blasting schedule except in emergency situations where rain, lightning, other atmospheric conditions or operator or public safety requires unscheduled detonation.

(c) Warning and all-clear signals of different character that are audible within a range of one-half mile from the point of the blast shall be given. All persons within the permit area shall be notified of the meaning of the signals through appropriate instructions and signs posted as required by Section 715.12.

(d) Access to the blasting area shall be regulated to protect the public and livestock from the effects of blasting. Access to the blasting area shall be controlled to prevent unauthorized entry at least 10 minutes before each blast and until the permittee's authorized representative has determined that no unusual circumstances such as imminent slides or undetonated charges exist and access to and travel in or through the area can safely resume.

(e) Areas in which charged holes are awaiting firing shall be guarded, barricaded and posted, or flagged against unauthorized entry.

(f) Airblast shall be controlled such that it does not exceed 128 decibel linear-peak at any manmade dwelling or structure located within one-half mile of the permit area.

(g) Except where lesser distances are approved by the regulatory authority (based upon a preblasting survey or other appropriate investigations) blasting shall not be conducted within:

(i) 1,000 feet of any building used as a dwelling, school, church, hospital or nursing facility;

(ii) 500 feet of facilities including, but not limited to, disposal wells, petroleum or gas-storage facilities, municipal water-storage facilities, fluid-transmission pipelines, gas or oil collection lines or water and sewage lines; and

(iii) 500 feet of an underground mine not totally abandoned except with the concurrence of the mining enforcement and safety administration.

(2) Blasting standards.

(a) Blasting shall be conducted to prevent injury to persons, damage to public or private property, outside the permit area, adverse impacts on any underground mine and change in the course, channel or availability of ground or surface waters outside the permit area.

(b) In all blasting operations, except as otherwise stated, the maximum peak particle velocity of the ground motion in any direction shall not exceed 1 inch per second

at the immediate location of any dwelling, public building, school, church or commercial or institutional building. The regulatory authority may reduce the maximum peak particle velocity allowed if it determines that a lower standard is required because of density of population or land use, age or type of structure, geology or hydrology of the area, frequency of blasts or other factors.

(c) The maximum peak particle velocity of ground motion does not apply to property inside the permit area that is owned or leased by the permittee.

(d) An equation for determining the maximum weight of explosives that can be detonated within any 8 millisecond period is given in Paragraph (v) [now Subparagraph e of Paragraph 2 of Subsection E of 19.8.36.31 NMAC]. If the blasting is conducted in accordance with this equation, the regulatory authority will consider the vibrations to be within the 1 inch per second limit.

(e) The maximum weight of explosives to be detonated within any 8 millisecond period shall be determined by the formula

$$W = (D/60)^2$$

where W=the maximum weight of explosives, in pounds, that can be detonated in any 8 millisecond period, and D=the distance, in feet, to the nearest dwelling, school, church or commercial or institutional building.

For distances between 350 and 5,000 feet, solution of the equation results in the following maximum weight:

Distance, in feet (D):	Maximum weight, in pounds (W):
350-----	34
400-----	44
500-----	69
600-----	100
700-----	136
800-----	178
900-----	225
1,000-----	278
1,100-----	336

1,200	-----	400
1,300	-----	469
1,400	-----	544
1,500	-----	625
1,600	-----	711
1,700	-----	803
1,800	-----	900
1,900	-----	1,002
2,000	-----	1,111
2,500	-----	1,736
3,000	-----	2,500
3,500	-----	3,402
4,000	-----	4,444
4,500	-----	5,625
5,000	-----	6,944

(f) If on a particular site the peak particle velocity continuously exceeds one-half inch per second after a period of 1 second following the maximum ground particle velocity, the regulatory authority shall require the blasting procedures to be revised to limit the ground motion.

(3) Seismograph measurements.

(a) where a seismograph is used to monitor the velocity of ground motion and the peak particle velocity limit of 1 inch per second is not exceeded, the equation in Paragraph (v) [now Subparagraph e of Paragraph 2 of Subsection E of 19.8.36.31 NMAC] need not be used. However, if the equation is not being used, a seismograph record shall be obtained for every shot.

(b) The use of a modified equation to determine maximum weight of explosives for blasting operations at a particular site may be approved by the regulatory authority on receipt of a petition accompanied by reports including seismograph records

of test blasting on the site. However, in no case shall the regulatory authority approve the use of a modified equation where the peak particle velocity limit of 1 inch per second required in Paragraph (e)(2)(ii) [now Subparagraph b of Paragraph 2 of Subsection E of 19.8.36.31 NMAC] of this Section would be exceeded.

(c) The regulatory authority may require a seismograph recording of any or all blasts.

(4) Records of blasting operations. A record of each blast, including seismograph reports, shall be retained for at least 3 years and shall be available for inspection by the regulatory authority and the public on request. The record shall contain the following data:

- (a) Name of permittee, operator or other person conducting the blast;
- (b) Location, date and time of blast;
- (c) Name, signature and license number of blaster-in charge;
- (d) Direction and distance, in feet, to nearest dwelling, school, church or commercial or institutional building neither owned or leased by the permittee;
- (e) Weather conditions;
- (f) Type of material blasted;
- (g) Number of holes, burden and spacing;
- (h) Diameter and depth of holes;
- (i) Types of explosives used;
- (j) Total weight of explosives used;
- (k) Maximum weight of explosives detonated within any 8 millisecond period;
- (l) Maximum number of holes detonated within any 8 millisecond period;
- (m) Methods of firing and type of circuit;
- (n) Type and length of stemming;
- (o) If mats or other protections were used;
- (p) Type of delay detonator used and delay periods used;

(q) Seismograph records, where required, including:

- (i) Seismograph reading, including exact location of seismograph and its distance from the blast;
- (ii) Name of person taking the seismograph reading; and
- (iii) Name of person and firm analyzing the seismograph record.

[Recompiled 6/4/02]

19.8.36.32 GENERAL PERFORMANCE STANDARDS: REVEGETATION (715.20):

A. General.

(1) The permittee shall establish on all land that has been disturbed, a diverse, effective and permanent vegetative cover of species native to the area of disturbed land or species that will support the planned postmining uses of the land approved according to Section 715.13. For areas designated as prime farmland, the reclamation procedures of Section 716.7 shall apply.

(2) Revegetation shall be carried out in a manner that encourages a prompt vegetative cover and recovery of productivity levels compatible with approved land uses. The vegetative cover shall be capable of stabilizing the soil surface with respect to erosion. All disturbed lands, except water areas and surface areas of roads that are approved as a part of the postmining land use, shall be seeded or planted to achieve a vegetative cover of the same seasonal variety native to the area of disturbed land. If both the pre-and postmining land use is intensive agriculture, planting of the crops normally grown will meet the requirement. Vegetative cover will be considered of the same seasonal variety when it consists of a mixture of species of equal or superior utility for the intended land use when compared with the utility of naturally occurring vegetation during each season of the year.

(3) On federal lands, the surface management agency shall be consulted for approval prior to revegetation regarding what species are selected, and following revegetation, to determine when the area is ready to be used.

B. Use of introduced species. Introduced species may be substituted for native species only if appropriate field trials have demonstrated that the introduced species are of equal or superior utility for the approved postmining land use, or are necessary to achieve a quick, temporary and stabilizing cover. Such species substitution shall be approved by the regulatory authority. Introduced species shall meet applicable state and federal seed or introduced species statutes, and shall not include poisonous or potentially toxic species.

C. Timing of revegetation. Seeding and planting of disturbed areas shall be conducted during the first normal period for favorable planting conditions after final preparation. The normal period for favorable planting shall be that planting time generally accepted locally for the type of plant materials selected to meet specific site conditions and climate. Any disturbed areas, except water areas and surface areas of roads that are approved under Section 715.13 as part of the postmining land use, which have been graded shall be seeded with a temporary cover of small grains, grasses or legumes to control erosion until an adequate permanent cover is established. When rills or gullies, that would preclude the successful establishment of vegetation or the achievement of the postmining land use, form in regraded topsoil and overburden materials as specified in Section 715.14, additional regrading or other stabilization practices will be required before seeding and planting.

D. Mulching. Mulch shall be used on all regraded and topsoiled areas to control erosion, to promote germination of seeds and to increase the moisture retention of the soil. Mulch shall be anchored to the soil surface where appropriate, to ensure effective protection of the soil and vegetation. Mulch means vegetation residues or other suitable materials that aid in soil stabilization and soil moisture conservation, thus providing micro-climatic conditions suitable for germination and growth, and do not interfere with the postmining use of the land. Annual grains such as oats, rye and wheat may be used instead of mulch when it is shown to the satisfaction of the regulatory authority that the substituted grains will provide adequate stability and that they will later be replaced by species approved for the postmining use. Where supplemental irrigation is required by the regulatory authority during the initial plant establishment period, if the operator can prove to the satisfaction of the regulatory authority that permanent revegetation equal to or better than that which would result from the use of mulch will result, the requirement for mulch may be eliminated if approved by the regulatory authority.

E. Methods of revegetation.

(1) The permittee shall use technical publications or the results of laboratory and field tests approved by the regulatory authority to determine the varieties, species, seeding rates and soil amendment practices essential for establishment and self-regeneration of vegetation. The regulatory authority shall approve species selection and planting plans.

(2) Where hayland, pasture or range is to be the postmining land use, the species of grasses, legumes, browse, trees or forbes for seeding or planting and their pattern of distribution shall be selected by the permittee to provide a diverse, effective and permanent vegetative cover with the seasonal variety, succession, distribution and regenerative capabilities native to the area. Livestock grazing will not be allowed on reclaimed land until the seedlings are established and can sustain managed grazing. The regulatory authority in consultation with the permittee and the landowner or in concurrence with the governmental land-managing agency having jurisdiction over the surface, shall determine when the revegetated area is ready for livestock grazing.

(3) Where forest is to be the postmining land use, the permittee shall plant trees adapted for local site conditions and climate. Trees shall be planted in combination with an herbaceous cover of grains, grasses, legumes, forbs or woody plants to provide a diverse, effective and permanent vegetation cover with the seasonal variety, succession and regeneration capabilities native to the area.

(4) Where wildlife habitat is to be included in the postmining land use, the permittee shall consult with appropriate State and Federal wildlife and land management agencies and shall select those species that will fulfill the needs of wildlife, including food, water, cover and space. Plant groupings and water resources shall be spaced and distributed to fulfill the requirements of wildlife.

F. Standards for measuring success of revegetation.

(1) Success of revegetation shall be measured on the basis of reference areas approved by the regulatory authority. Reference areas mean land units of varying size and shape identified and maintained under appropriate management for the purpose of measuring ground cover, productivity and species diversity that are produced naturally. The reference areas must be representative of geology, soils slope, aspect and vegetation in the permit area. Management of the reference area shall be comparable to that which will be required for the approved postmining land use of the area to be mined. The regulatory authority shall approve the estimating techniques that will be used to determine the degree of success in the revegetated area.

(2) The ground cover of living plants on the revegetated area shall be equal to the ground cover of living plants of the approved reference area for a minimum of two growing seasons. The ground cover shall not be considered equal if it is less than 90 percent of the ground cover of the reference area for any significant portion of the mined area. Exceptions may be authorized by the regulatory authority for:

(a) Previously mined areas that were not reclaimed to the standards required by this chapter prior to the effective date of these regulations. The ground cover of living plants for such areas shall not be less than required to control erosion, and in no case less than that existing before redisturbance;

(b) Areas to be developed immediately for industrial or residential use. The ground cover of living plants shall not be less than required to control erosion. As used in this paragraph, immediately means less than 2 years after regrading has been completed for the area to be used; and

(c) Areas to be used for agricultural cropland purposes. Success in revegetation of cropland shall be determined on the basis of crop production from the mined area compared to the reference area. Crop production from the mined area shall be equal to that of the approved reference area for a minimum of two growing seasons. Production shall not be considered equal if it is less than 90 percent of the production of the reference area for any significant portion of the mined area.

(3) Species diversity, distribution, seasonal variety, and vigor shall be evaluated on the basis of the results which could reasonably be expected using the methods of revegetation approved under Paragraph (e) [now Subsection E of 19.8.36.32 NMAC] of this Section.

G. Seeding of stockpiled topsoil. Topsoil stockpiled in compliance with Section 715.16 must be seeded or planted with an effective cover of nonnoxious, quick growing annual and perennial plants during the first normal period for favorable planting conditions or protected by other approved measures as specified in Section 715.16.

[Recompiled 6/4/02]

19.8.36.33 SPECIAL PERFORMANCE STANDARDS: GENERAL OBLIGATIONS (716.1):

All surface coal mining and reclamation operations subject to this part shall comply with the applicable special performance standards in this part. Such operations shall also comply with all general performance standards in Part 715 of this chapter unless specifically exempted in this part from the requirements of Part 715.

[Recompiled 6/4/02]

19.8.36.34 SPECIAL PERFORMANCE STANDARDS: STEEP-SLOPE MINING (716.2):

The permittee conducting surface coal mining and reclamation operations on natural slopes that exceed 20 degrees, or on lesser slopes that require measures to protect the area from disturbance, as determined by the regulatory authority after consideration of soils, climate, the method of operation, geology and other regional characteristics, shall meet the following performance standards. The standards of this section do not apply where mining is done on a flat or gently rolling terrain with an occasional steep slope through which the mining proceeds and leaves a plain or pre-dominantly flat area; or where the mining is governed by Section 716.3.

A. Spoil, waste materials or debris, including that from clearing and grubbing, and abandoned or disabled equipment, shall not be placed or allowed to remain on the downslope.

B. The highwall shall be completely covered with spoil and the disturbed area graded to comply with the provisions of Section 715.14 of this chapter. Land above the highwall shall not be disturbed unless the regulatory authority finds that the disturbance will facilitate compliance with the requirements of this Section.

C. Material in excess of that required to meet the provisions Section 715.14 of this chapter shall be disposed of in accordance with the requirements of Section 715.15 of this chapter.

D. Woody materials may be buried in the backfilled area only when burial does not cause, or add to, instability of the backfill. Woody materials may be chipped and distributed through the backfill when approved by the regulatory authority.

[Recompiled 6/4/02]

19.8.36.35 SPECIAL PERFORMANCE STANDARDS: MOUNTAINTOP REMOVAL (716.3):

A. Surface coal mining and reclamation operations that remove entire coal seams running through the upper fraction of a mountain, ridge or hill by removing all of the overburden and creating a level plateau or gently rolling contour with no highwalls remaining are exempt from the requirements of Section 715.14 of this chapter for achieving approximate original contour, if the following requirements are met:

- (1) An industrial, commercial, agricultural, residential or public facility (including recreational facilities) use is proposed for the affected land.
- (2) The alternative land use criteria in Section 715.13(d) of this chapter are met and the proposal is approved by the regulatory authority.
- (3) All other applicable requirements of Part 715 of this chapter can be met.

B. Surface coal mining and reclamation operations conducted under this Section shall comply with the following standards:

- (1) An outcrop barrier of sufficient width, consisting of the toe of the lowest coal seam, and its associated overburden shall be retained to prevent slides and erosion.
- (2) The final graded top plateau slopes on the mined area shall be less than 1v: 5h so as to create a level plateau or gently rolling configuration and the outslopes of the plateau shall not exceed 1v:2h, except where engineering data substantiates and the regulatory authority finds that a minimum static safety factor of 1.5 will be attained.
- (3) The resulting level or gently rolling contour shall be graded to drain inward from the outslope except at specific points where it drains over the outslope in protected stable channels.
- (4) Damage to natural watercourses below the area to be mined shall be prevented.
- (5) Spoil shall be placed on the mountaintop bench as is necessary to achieve the postmining land use approved under Section 715.13 of this chapter. All excess spoil material not retained on the mountaintop shall be placed in accordance with the standards of Section 715.15 of this chapter.

C.

(1) All permits giving approval for mountaintop removal shall be reviewed not more than 3 years from the date of issuance of the permit, unless the permittee affirmatively demonstrates and the regulatory authority finds that all operations are proceeding in accordance with the terms of the permit and applicable requirements of the Act and the regulations of this Part. The terms of the permit shall be in accordance with the requirements of the Act and the regulations of this Part.

(2) The terms of a permit for mountaintop removal may be modified by the regulatory authority if it determines that more stringent measures are necessary to prevent or control slides and erosion, prevent damage to natural water courses, avoid water pollution or to assure successful revegetation.

[Recompiled 6/4/02]

19.8.36.36 SPECIAL PERFORMANCE STANDARDS: PRIME FARMLANDS (716.7):³

³ - Enforcement of these provisions promulgated pursuant to Sections 510(d) and 515(b)(7) of the federal act will be enjoined to the extent they impose performance standards on operations that are exempt from these requirements pursuant to Section 510(d)(2).

A. Applicability.

(1) Permittees of surface coal mining and reclamation operations conducted on prime farmland shall comply with the general performance standards of Part 715 of this chapter in addition to the special requirements of this Section. Prime farmlands are those lands defined in Paragraph (b) [now Subsection B of 19.8.36.36 NMAC] of this Section that have been used for the production of cultivated crops, including nurseries, orchards and other speciality crops, and small grains for at least 5 years out of the 20 years preceding the date of the permit application.

(2) The requirements of this Section are applicable to any permit issued on or after August 3, 1977. Permits issued before that date and revisions or renewals of those permits need not conform to the provisions of this Section regarding actions to be taken before a permit is issued. Permit renewals or revisions shall include only those areas that:

(a) Were in the original permit area or in a mining plan approved prior to August 3, 1977; or

(b) Are contiguous and under State regulation or practice would have normally been considered as a renewal or revision of a previously approved plan.

B. Definition. Prime farmland means those lands that meet the applicability requirements in Paragraph (a) [now Subsection A of 19.8.36.36 NMAC] of this section and the specific technical criteria prescribed by the secretary of agriculture as published in the FEDERAL REGISTER on August 23, 1977. These criteria are included here for convenience. Terms used in this section are defined in U.S. department of agriculture publications: Soil Taxonomy, Agriculture Handbook 436: Soil Survey Manual. Agriculture Handbook 18; Rainfall-Erosion Losses From Cropland, Agriculture Handbook 282; and Saline and Alkali Soils, Agriculture Handbook 60. To be considered prime farmland soils must meet all of the following criteria:

(1) The soils have:

(a) Aquic, udic, ustic or xeric moisture regimes and sufficient available water capacity within a depth of 40 inches or in the root zone, if the root zone is less than 40 inches deep, to produce the commonly grown crops in 7 or more years out of 10; or

(b) Xeric or ustic moisture regimes in which the available water capacity is limited but the area has a developed irrigation water supply that is dependable and of adequate quality (a dependable water supply is one in which enough water is available for irrigation in 8 out 10 years for the crops commonly grown); or

(c) Aridic or torric moisture regimes and the area has a developed irrigation water supply that is dependable and of adequate quality.

(2) The soils have a temperature regime that is frigid, mesic, thermic or hyperthermic (pergelic and cryic regimes are excluded). These are soils that at a depth of 20 inches have a mean annual temperature higher than 32 degrees F. In addition, the mean summer temperature at this depth in soils with an O horizon is higher than 47 degrees F in soils that have no O horizon the mean summer temperature is higher than 59 degrees F.

(3) The soils have a pH between 4.5 and 8.4 in all horizons within a depth of 40 inches or in the root zone if the root zone is less than 40 inches deep.

(4) The soils either have no water table or have a water table that is maintained at a sufficient depth during the cropping season to allow food, feed, fiber, forage and oilseed crops common to the area to be grown.

(5) The soils can be managed so that, in all horizons within a depth of 40 inches or in the root zone if the root zone is less than 40 inches deep during part of each year the conductivity of saturation extract is less than 4 mmhos/cm and the exchangeable sodium percentage (ESP) is less than 15.

(6) The soils are not flooded frequently during the growing season (less often than once in 2 years).

(7) The soils have a product of K (erodibility factor) x percent slope of less than 2.0 and a product of I (soil erodibility) x C (climatic factor) not exceeding 60.

(8) The soils have a permeability rate of at least 0.06 inch per hour in the upper 20 inches and the mean annual soil temperature at a depth of 20 inches is less than 59 degrees F.; the permeability rate is not a limiting factor if the mean annual soil temperature is 59 degrees F. or higher.

(9) Less than 10 percent of the surface layer (upper 6 inches) in these soils consists of rock fragments coarser than 3 inches.

C. Identification of prime farmland. Prime farmland shall be identified on the basis of soil survey submitted by the applicant. The regulatory authority also may require data on irrigation drainage, flood control, and subsurface water management. The requirement for submission of soil surveys may be waived by the regulatory authority if the applicant can demonstrate according to the procedures in Paragraph (d) [now Subsection D of 19.8.36.36 NMAC] of this Section that no prime farmlands are involved. Soil surveys shall be conducted according to standards of the National Cooperative Soil Survey which include the procedures set forth in U.S. department of agriculture Handbooks 436 (Soil Taxonomy) and 18 (Soil Survey Manual) , and shall include:

(1) Data on moisture availability, temperature regime, flooding, water table, erosion characteristics, permeability, or other information that is needed to determine prime farmland in accordance with Paragraph (b) [now Subsection B of 19.8.36.36 NMAC] of this Section;

(2) A map designating the exact location and extent of the prime farmland;
and

(3) A description of each soil mapping unit.

D. Negative determination of prime farmland. The land shall not be considered as prime farmland where the applicant can demonstrate one or more of the following situations:

(1) Lands within the proposed permit boundaries have been used for the production of cultivated crops for less than 5 years out of 20 years preceding the date of the permit application.

(2) The slope of all land within the permit area is 10 percent or greater.

(3) Land within the permit area is not irrigated or naturally subirrigated, has no developed water supply that is dependable and of adequate quality and the average annual precipitation is 14 inches or less.

(4) Other factors exist, such as a very rocky surface, or the land is frequently flooded, which clearly place all land within the area outside the purview of prime farmland.

(5) A written notification based on scientific findings and soil surveys that land within the proposed mining area does not meet the applicability requirements in Paragraph (a) [now Subsection A of 19.8.36.36 NMAC] of this Section is submitted to the regulatory authority by a qualified person other than the applicant, and is approved by the regulatory authority.

E. Plan for restoration of prime farmland. The applicant shall submit to the regulatory authority a plan for the mining and restoration of any prime farmland within the proposed permit boundaries. This plan shall be used by the regulatory authority in judging the technological capability of the applicant to restore prime farmlands. The plan shall include:

(1) A description of the original undisturbed soil profile, as determined from a soil survey, showing the depth and thickness of each of the soil horizons that collectively constitute the root zone of the locally adapted crops and are to be removed, stored and replaced;

(2) The proposed method and type of equipment to be used for removal, storage, and replacement of the soil in accordance with Paragraph (g) [now Subsection G of 19.8.36.36 NMAC] of this section;

(3) The location of areas to be used for the separate stockpiling of the soil and plans for soil stabilization before redistribution;

(4) If applicable, documentation such as agricultural school studies or other scientific data from comparable areas that supports the use of other suitable material, instead of the A, B or C soil horizon, to obtain on the restored area equivalent or higher levels of yield as non-mined prime farmlands in the surrounding area under equivalent levels of management; and

(5) Plans for seeding or cropping the final graded mine land and the conservation practices to control erosion and sedimentation during the first 12 months after regrading is completed. Proper adjustments for seasons must be made so that final graded land is not exposed to erosion during seasons when vegetation or conservation practices cannot be established due to weather conditions; and

(6) Available agricultural school studies, company data or other scientific data for comparable areas that demonstrate that the applicant using his proposed method of reclamation will achieve, within a reasonable time, equivalent or higher levels of yield after mining as existed before mining.

F. Consultation with secretary of agriculture and issuance of permit.

(1) The regulatory authority may grant a permit which shall incorporate the plan submitted under Paragraph (e) [now Subsection E of 19.8.36.36 NMAC] of this section, if it finds in writing that the applicant:

(a) has the technological capability to restore the prime farmland within the proposed permit area, within a reasonable time, to equivalent or higher levels of yield as non-mined prime farmland in the surrounding area under equivalent levels of management; and

(b) Will achieve compliance with the standards of Paragraph (g) [now Subsection G of 19.8.36.36 NMAC] of this Section.

(2) Before any permit is issued for areas that include prime farmlands, the regulatory authority shall consult with the secretary of agriculture. The secretary of agriculture will provide a review of the proposed method of soil reconstruction and comment on possible revisions that will result in a more complete and adequate restoration. The secretary of agriculture has assigned his responsibilities under this paragraph to the administrator of the U.S. soil conservation service and the U.S. soil conservation service will carry out the consultation and review through their state conservationist, located in each state.

G. Special requirements. For all prime farmlands to be mined and reclaimed the applicant shall meet the following special requirements:

(1) All soil horizons to be used in the reconstruction of the soil shall be removed before drilling, blasting or mining to prevent contaminating the soil horizons with undesirable materials. Where removal of soil horizons result in erosion that may cause air and water pollution, the regulatory authority shall specify methods of treatment to control erosion of exposed overburden. The permittee shall:

(a) Remove separately the entire A horizon or other suitable soil materials which will create a final soil having an equal or greater productive capacity than that which existed prior to mining in a manner that prevents mixing or contamination with other material before replacement;

(b) Remove separately the B horizon of the natural soil or a combination of B horizon and underlying C horizon or other suitable soil material that will create a reconstructed root zone of equal or greater productivity capacity than that which existed prior to mining in a manner that prevents mixing or contamination with other material; and

(c) Remove separately the underlying C horizons or other strata, or a combination of such horizons or other strata, to be used instead of the B horizon that are of equal or greater thickness and that can be shown to be equal or more favorable for plant growth than the B horizon, and that when replaced will create in the

reconstructed soil a final root zone of comparable depth and quality to that which existed in the natural soil.

(2) If stockpiling of soil horizons is allowed by the regulatory authority in lieu of immediate replacement, the A horizon and B horizon must be stored separately from each other. The stockpiles must be placed within the permit area and where they will not be disturbed or exposed to excessive erosion by water or wind before the stockpiled horizons can be redistributed on terrain graded to final contour. Stockpiles in place for more than 30 days must meet the requirements of Section 715.16(c).

(3) Scarify the final graded land before the soil horizons are replaced.

(4) Replace the material from the B horizon or other suitable material specified in Paragraph (g)(1)(ii) or (g)(1)(iii) [now Subparagraphs b or c of Paragraph 1 of Subsection G of 19.8.36.36 NMAC] of this Section in such a manner as to avoid excessive compaction of overburden and to a thickness comparable to the root zone that existed in the soil before mining.

(5) Replace the A horizon or other suitable soil materials which will create a final soil having an equal or greater productive capacity than existed prior to mining, as the final surface soil layer to the thickness of the original soil as determined in Paragraph (g)(1)(i) [now Subparagraphs a of Paragraph 1 of Subsection G of 19.8.36.36 NMAC] of this Section in a manner that:

(a) Prevents excess compaction of both the surface layer and underlying material and reduction of permeability to less than 0.06 inch per hour in the upper 20 inches of the reconstructed soil profile; and

(b) Protects the surface layer from wind and water erosion before it is seeded or planted.

(6) Apply nutrients and soil amendments as needed to establish quick vegetative growth.

[Recompiled 6/4/02]

19.8.36.37 UNDERGROUND MINING GENERAL PERFORMANCE STANDARDS: GENERAL OBLIGATIONS (717.11):

A. Compliance. All underground coal mining and associated reclamation operations conducted on lands where any element of the operations is regulated by a state shall comply with the initial performance standards of this Part.

(1) For the purposes of this Part, underground coal mining and associated reclamation operations mean a combination of surface operations and underground operations. Surface operations include construction, use, and reclamation of new and

existing access and haul roads, aboveground repair areas, storage areas, processing areas, shipping areas and areas upon which are sited support facilities including hoist and ventilating ducts, and on which material incident to underground mining operations are placed. Underground operations include underground construction, operation, and reclamation of shafts, adits, underground support facilities, underground mining, hauling, storage and blasting.

(2) For the purpose of this Part the term permittee means the person permitted to conduct underground mining operations by a state or if no permit is issued in the state, the person operating a mine.

(3) For the purpose of this Part, disturbed areas means surface work areas and lands affected by surface operations including, but not limited to, roads, mine entry excavations, above ground (surface) work areas, such as tipples, coal processing facilities and other operating facilities, waste work and spoil disposal areas, and mine waste impoundments or embankments. "Disturbed area" is synonymous with the word's "affected area" used in Sections 1 through 37 [now 19.8.36.8 NMAC through 19.8.36.43 NMAC].

(4) Where state environmental protection standards are adopted for a specific state because they are more stringent than the standards of this part, they will be published in Part 718 of this chapter.

B. Authorizations to operate. A copy of all current permits, licenses, approved plans or other authorizations to operate the mine shall be available for inspection at or near the mine site.

[Recompiled 6/4/02]

19.8.36.38 UNDERGROUND MINING GENERAL PERFORMANCE STANDARDS: SIGNS AND MARKERS (717.12):

A. Specifications. All signs required to be posted shall be of a standard design that can be seen and read easily and shall be made of durable material and shall conform to local ordinances and codes. The signs and other markers shall be maintained during all operations to which they pertain.

B. Mine and permit identification signs. Signs identifying the mine area shall be displayed at all points of access to the permit area from public highways. Signs shall show the name, business address and telephone number of the permittee and identification numbers of current mining and reclamation permit. Such signs shall not be removed until after release of all bonds.

[Recompiled 6/4/02]

19.8.36.39 UNDERGROUND MINING GENERAL PERFORMANCE STANDARDS: BACKFILLING AND GRADING OF ROAD CUTS, MINE ENTRY AREA CUTS AND OTHER SURFACE WORK AREAS (717.14):

A. Upon completion of underground mining, surface work areas which are involved in excavation, disposal of materials or otherwise affected, shall be regraded to approximate original contour. The permittee shall transport, backfill and compact fill material to assure stability or to prevent leaching of toxic pollutants. Barren rock or similar materials excess to the mining operations and which are disposed on the land surface shall be subject to the provision of Section 717.15 of this Part. Roads and support facility areas existing prior to the effective date of this Part and used in support of underground mining operations which are subject to this Part shall be regraded to the extent deemed feasible by the regulatory authority based on the availability of backfill material and resulting stability of the affected lands after reclamation. As a minimum, the permittee shall be required to:

(1) Retain all earth, rock and other mineral nonwaste materials on the solid portion of existing or new benches, except that the regulatory authority may permit placement of such material at the site of the faceup as a means of disposing of excavated spoil when additional working space is needed to facilitate operations. Such placement of material shall be limited to minimize disturbance of land and to the hydrologic balance. Such fills shall be stabilized with vegetation and shall achieve a minimum static safety factor of 1.5. In no case shall the outslope exceed the angle of repose.

(2) Backfill and grade to the most moderate slope possible to eliminate any highwall along roads, mine entry faces or other areas. Slopes shall not exceed the angle of repose or such lesser slopes as required by the regulatory authority to maintain stability.

B. On approval by the regulatory authority and in order to conserve soil moisture, ensure stability, and control erosion on final graded slopes, cut-and-fill terraces may be allowed if the terraces are appropriate substitutes for construction of lower grades on the reclaimed lands. The terraces shall meet the following requirements:

(1) The width of the individual terrace bench shall not exceed 20 feet unless specifically approved by the regulatory authority as necessary for stability erosion control or roads.

(2) The vertical distance between terraces shall be as specified by the regulatory authority to prevent excessive erosion and to provide long-term stability.

(3) The slope of the terrace outslope shall not exceed 1v:2h (50 percent). Outslopes which exceed 1v:2h (50 percent) may be approved if they have a minimum static safety factor of 1.5 or more and provide adequate control over erosion and closely

resemble the surface configuration of the land prior to mining. In no case may highwalls be left as part of terraces.

(4) Culverts and underground rock drains shall be used on the terrace only when approved by the regulatory authority.

C. All surface operations on steep slopes of 20 degrees or more or on such lesser slopes as the regulatory authority define as a steep slope shall be conducted so as not to place any material on the downslope below road cuts, mine working or other benches, other than in conformance with Paragraph (a)(1) [now Paragraph 1 of Subsection A of 19.8.36.39 NMAC] of this Part.

D. Regrading or stabilizing rills and gullies. When rills or gullies deeper than 9 inches form in areas that have been regraded and the topsoil replaced but vegetation has not yet been established, the permittee shall fill, grade or otherwise stabilize the rills and gullies and reseed or replant the areas according to Section 717.20. The regulatory authority shall specify that erosional features of lesser size be stabilized if they result in additional erosion and sedimentation.

E. Covering coal and acid-forming, toxic-forming, combustible and other waste materials; stabilizing backfilled materials; and using waste material for fill. Any acid-forming, toxic-forming, combustible materials, or any other waste materials as identified by the regulatory authority that are exposed, used, or produced during underground mining and which are deposited on the land surface shall, after placement in accordance with Section 717.15 of this Part, be covered with a minimum of 4 feet of non-toxic and non-combustible material; or, if necessary, treated to neutralize toxicity, in order to prevent water pollution and sustained combustion, and to minimize adverse effects on plant growth and land uses. Where necessary to protect against upward migration of salts, exposure by erosion, to provide an adequate depth for plant growth, or to otherwise meet local conditions, the regulatory authority shall specify thicker amount of cover using nontoxic material. Acid-forming or toxic-forming material shall not be buried or stored in proximity to a drainage course so as to cause or pose a threat of water pollution or otherwise violate the provisions of Section 717.17 of this Part.

F. Grading along the contour. All final grading, preparation of earth, rock and other nonwaste materials before replacement of topsoil, and placement of topsoil in accordance with Section 717.20 shall be done along the contour to minimize subsequent erosion and instability. If such grading, preparation or placement along the contour would be hazardous to equipment operators, grading, preparation or placement in a direction other than generally parallel to the contour may be used. In all cases, grading, preparation or placement shall be conducted in a manner which minimizes erosion and provides a surface for replacement of topsoil which will minimize slippage.

[Recompiled 6/4/02]

19.8.36.40 UNDERGROUND MINING GENERAL PERFORMANCE STANDARDS: DISPOSAL OF EXCESS ROCK AND EARTH MATERIALS ON SURFACE AREAS (717.15):

Excess rock and earth materials produced from an underground mine and not disposed in underground workings or used in backfilling and grading operations shall be placed in surface disposal areas in accordance with requirements of Section 715.15. Where the volume of such material is small and its chemical and physical characteristics do not pose a threat to either public safety or the environment the regulatory authority may modify the requirements of Section 715.15 in accordance with Section 717.14(a)(1).

[Recompiled 6/4/02]

19.8.36.41 UNDERGROUND MINING GENERAL PERFORMANCE STANDARDS: PROTECTION OF THE HYDROLOGIC SYSTEM (717.17):

The permittee shall plan and conduct underground coal mining and reclamation operations to minimize disturbance of the prevailing hydrologic balance in order to prevent long-term adverse changes in the hydrologic balance that could result from underground coal mining operations, both on and off site. Changes in water quality and quantity, in the depth to ground water, and in the location of surface water drainage channels shall be minimized and applicable Federal and State statutes and regulations shall not be violated. The permittee shall conduct operations so as to minimize water pollution and shall, where necessary, use treatment methods to control water pollution. The permittee shall emphasize underground coal mining and reclamation practices that will prevent or minimize water pollution and changes in flows in preference to the use of water treatment facilities prior to discharge to surface waters. Practices to control and minimize pollution include, but are not limited to, diverting water from underground workings or preventing water contact with acid or toxic-forming materials, and minimizing water contact time with waste materials, maintaining mine barriers to enhance postmining inundation and sealing, establishing disturbed areas through grading, diverting runoff, achieving quick growing stands of temporary vegetation, and lining drainage channels. If treatment is required to eliminate pollution of surface or ground waters, the permittee shall operate and maintain the necessary water treatment facilities as set forth in this section.⁴ ⁽⁴⁾The standards in Section 717.17(a) will be enjoined to the extent that they supersede, amend, repeal or modify the provisions of the Federal Water Pollution Control Act and its regulations.

A. Water quality standards and effluent limitations. All surface drainage from the disturbed areas, including disturbed areas that have been graded, seeded or planted and which remain subject to the requirements of this section, except for drainage from disturbed areas that have met the requirements of Section 717.20 shall be passed through a sedimentation pond or a series of sedimentation ponds prior to leaving the permit area. All waters which flow or are removed from underground operations or underground waters which are removed from other areas to facilitate mining and which discharge to surface waters must be passed through appropriate treatment facilities

prior to discharge where necessary to meet effluent limitations. For purposes of this section only, disturbed areas shall include areas of surface operations but shall not include those areas in which only diversion ditches, sedimentation ponds or roads are installed in accordance with this section and the upstream area is not otherwise disturbed by the permittee. Disturbed areas shall not include those surface areas overlying the underground working unless those areas are also disturbed by surface operations such as fill (disposal) areas, support facilities areas or other major activities which create a risk of pollution. The regulatory authority may grant exemptions from this requirement only when the disturbed drainage area within the total disturbed area is small and if the permittee shows that sedimentation ponds are not necessary to meet effluent limitations of this paragraph and to maintain water quality in downstream receiving waters. Sedimentation ponds required by this paragraph shall be constructed in accordance with Paragraph (e) [now Subsection E of 19.8.36.41 NMAC] of this Section in appropriate locations prior to any mining in the affected drainage area in order to control sedimentation or otherwise treat water in accordance with this paragraph. Discharges from areas disturbed by underground operation and by surface operation and reclamation activities conducted thereon, must meet all applicable federal and state regulations and, at a minimum, the following numerical effluent limitations:

EFFLUENT LIMITATIONS IN MILLIGRAMS PER LITER

mg/l, Except For pH

Effluent characteristics discharge days ¹	Maximum Allowable ¹	Average of daily values for consecutive
Iron, total _ _ _ _ _	7.0	3.5
Manganese, total _ _ _	4.0	2.0
Total suspended solids pH ²	70.0	35.0
	Within the range 6.0 to 9.0 _ _ _ _ _	

¹ Based on representative sampling.

² Where the application of neutralization and sedimentation treatment technology results in inability to comply with the manganese limitations set forth, the regulatory authority may allow the pH level in the discharge to exceed to a small extent the upper limit of 9.0 in order that the manganese limitations will be achieved.

(1) Any overflow or other discharge of surface water from the disturbed area within the permit area demonstrated by the permittee to result from a precipitation event larger than the 10-year 24-hour frequency event will not be subject to the effluent limitations of paragraph (a) [Subsection A of 19.8.36.41 NMAC].

(2) The permittee shall install, operate, and maintain adequate facilities to treat any water discharged from the disturbed area that violates applicable federal or state regulations or the limitations of Paragraph (a) [now Subsection A of 19.8.36.41 NMAC]. If the pH of waters to be discharged from the disturbed area is normally less than 6.0, an automatic lime feeder or other neutralization process approved by the regulatory authority shall be installed, operated and maintained. If the regulatory authority finds that small and infrequent treatment requirements to meet applicable standards do not necessitate use of an automatic neutralization process, and the mine normally produces less than 500 tons of coal per day, the regulatory authority can approve the use of a manual system if the permittee agrees to ensure that consistent and timely treatment is carried out.

B. Surface water monitoring.

(1) The permittee shall submit for approval by the regulatory authority a surface water monitoring program which meets the following requirements:

(a) Provides adequate monitoring of all discharge from the disturbed area and from the underground operations.

(b) Provides adequate data to describe the likely daily and seasonal variation in discharges from the disturbed area in terms of flow, pH, total iron, total manganese and total suspended solids and as requested by the regulatory authority, any other parameter characteristic of the discharge.

(c) Provides monitoring at appropriate frequencies to measure normal and abnormal variations in concentrations.

(d) Provides an analytical quality control system including standard methods of analysis such as those specified in 40 CFR 136.

(e) Provides regular reports of all measurements to the regulatory authority within 60 days of sample collection unless violations of permit conditions occur in which case the regulatory authority shall be notified immediately after receipt of analytical

results by the permittee. If the discharge is subject to regulation by a federal or state permit issued in compliance with section 301 of the Federal Water Pollution Control Act Amendment of 1972 (33 U.S.C. Section 1311), a copy of the completed reporting form supplied to meet the permit requirements may be submitted to the regulatory authority to satisfy the reporting requirements if the data meet the frequency and other requirements of this paragraph.

(2) Equipment, structures or other measures necessary to accurately measure and sample the quality and quantity of surface water discharges from the disturbed area of the permit area shall be properly installed, maintained and operated and shall be removed when no longer required.

C. Diversion and conveyance of overland flow away from disturbed areas. In order to minimize erosion and to prevent or remove water from contacting toxic-producing deposits, overland flow from undisturbed areas may, as required or approved by the regulatory authority, be diverted away from disturbed areas by means of temporary or permanent diversion structures. The following requirements shall be met for such diversions:

(1) Temporary diversion structures shall be constructed to safely pass the peak runoff from a precipitation event with a one year recurrence interval, or a larger event as specified by the regulatory authority. The design criteria must assure adequate protection of the environment and public during the existence of the temporary diversion structure.

(2) Permanent diversion structures are those remaining after mining and reclamation and approved for retention by the regulatory authority and other appropriate state and federal agencies. To protect fills and property, to prevent water from contacting toxic-producing deposits, and to avoid danger to public health and safety, permanent diversion structures shall be constructed to safely pass the peak runoff from a precipitation event with a 100-year recurrence interval or a larger event as specified by the regulatory authority. Permanent diversion structures shall be constructed with gently sloping banks that are stabilized by vegetation. Asphalt, concrete or other similar linings shall not be used unless specifically required to prevent seepage or to provide stability and they are approved by the regulatory authority.

(3) Diversions shall be designed, constructed and maintained in a manner so as to prevent additional contributions of suspended solids to streamflow, or to runoff outside the permit area to the extent possible, using the best technology currently available. In no event shall such contributions be in excess of requirements set by applicable State or Federal law. Appropriate sediment control measures for these diversions shall include, but not be limited to, maintenance of appropriate gradients, channel lining, vegetation and roughness structures and detention basins.

D. Stream channel diversions. In the event that the regulatory authority permits diversion of streams, the regulations of Section 715.17(d) shall apply.

E. Sediment control measures⁵. Appropriate sediment control measures shall be designed, constructed, and maintained to prevent additional contributions of sediment to streamflow or to runoff outside the permit area to the extent possible, using the best technology currently available. ⁵The standards in Section 717.17(e) will be preliminarily enjoined.

(1) Sediment control measures include practices carried out within and adjacent to the disturbed area. The scale of downstream practices shall reflect the degree to which successful techniques are applied at the sources of the sediment. Sediment control measures consist of the utilization of proper mining, reclamation methods and sediment control practices (singly or in combination) including but not limited to:

(a) Disturbing the smallest practicable area at any one time during the mining operation through progressive backfilling, grading and timely revegetation;

(b) Consistent with the requirements of Sections 715.14 and 715.15 of this chapter shaping the backfill material to promote a reduction of the rate and volume of runoff;

(c) Retention of sediment within the pit and disturbed area;

(d) Diversion of overland and channelized flow from undisturbed areas around or in protected crossings through the disturbed area;

(e) Utilization of straw dikes, riprap, check dams, mulches, vegetative sediment filters, dugout ponds and other measures that reduce overland flow velocity, reduce runoff volume or entrap sediment;

(f) Sedimentation ponds.

(2) Sedimentation ponds may be used individually or in series, should be located as near as possible to the disturbed area and where possible out of major stream courses, and shall (either individually or in a series) meet the following criteria:

(a) Sedimentation ponds must provide 24 hour theoretical detention time for the inflow or runoff entering the pond(s) from a 10 year, 24-hour precipitation event. Runoff diverted, in accordance with Paragraphs (c) and (d) [now Subsections C and D of 19.8.36.41 NMAC] of this Section, away from the disturbed drainage areas need not be considered in sedimentation pond design. In determining the runoff volume the characteristics of the mine site, reclamation procedures and on-site sediment control practices shall be considered.

(b) Upon approval of the regulatory authority theoretical detention time may be reduced to not less than 10 hours, as demonstrated by the permittee, equal to the improvement in sedimentation removal efficiency as a result of pond design including

but not limited to pond configuration, inflow outflow facilities and their relative location, baffles to decrease inflow velocity and short circuiting, a surface area sufficient to achieve the sediment trap efficiency necessary to meet effluent limitations (Sec. 715.17 (a)) and sediment control measures provided in Section 715.17(e)(1).

(c) The regulatory authority may approve a detention time less than the time required by Paragraph (e) (2) (i) or (ii) [now Subparagraphs an or b of Paragraph 2 of Subsection E of 19.8.36.41 NMAC] of this Section, when the permittee has demonstrated that the size distribution or the specific gravity of the suspended matter or the utilization of chemical treatment or flocculation are such that the effluent limitations can be met. The detention time shall be stipulated.

(3) An additional sediment storage volume must be provided equal to 0.2 acre-feet for each acre of disturbed area within the upstream drainage area. Upon approval of the regulatory authority, the sediment storage volume may be reduced in an amount as demonstrated by the permittee equal to the sediment removed by other appropriate sediment control measures such as those identified in Paragraph (e)(1) [now Paragraph 1 of Subsection E of 19.8.36.41 NMAC] of this Section, or by lesser sediment yields as evidenced by empirical data for runoff characteristics.

(4) Ponds may be of the permanent pool or self-dewatering type. Dewatering-type ponds shall use siphon or other dewatering methods approved by the regulatory authority to prevent discharges of pollutants within the design flow.

(5) Spillway systems shall be properly located to maximize the distances from the point of inflow into the pond to maximize detention times. Spillway systems shall be provided to safely discharge the peak runoff from a precipitation event with a 25-year recurrence interval, or larger event as specified by the regulatory authority.

(6) Sediment shall be removed from sedimentation ponds so as to assure maximum sediment removal efficiency and attainment and maintenance of effluent limitations. Sediment shall be disposed of in a manner that minimizes adverse effects on surface waters due to its chemical and physical characteristics, on infiltration, vegetation or surface or ground water quality.

(7) If a sedimentation pond includes an embankment that is more than 20 feet in height, as measured from the downstream toe of the embankment to the top of the embankment or has a storage volume of 20 acre-feet or more, the following additional requirements shall be met:

(a) An appropriate combination of principal and emergency spillways shall be provided to safely discharge the runoff resulting from a 100-year-6-hour precipitation event, or larger event as specified by the regulatory authority.

(b) Ponds shall be designed and constructed with an acceptable static safety factor of at least 1.5 for the normal pool level to ensure embankment slope stability.

(c) The minimum top width of the embankment shall not be less than the quotient of $H+35/5$ where H is the height of the embankment as measured from the downstream toe to the top of the embankment.

(d) Ponds shall have appropriate barriers to control seepage along conduits that extend through the embankment.

(8) All ponds shall be designed and inspected under the supervision of, and certified after construction by a professional engineer registered in the state of New Mexico.

(9) All ponds, including those not meeting the size or other criteria of Section 77.216(a) of this title, shall be examined for structural weakness, erosion and other hazardous conditions in accordance with the inspection requirements contained in Section 77.216-3 of this title.

(10) All ponds shall be removed and the land affected regraded and revegetated consistent with the requirements of Sections 717.14 and 717.20.

F. Discharge structures. Discharges from sedimentation ponds and diversion structures shall be controlled, where necessary, using energy dissipators, surge ponds and other devices to reduce erosion and prevent deepening or enlargement of stream channels and to minimize disturbances to the hydrologic balance.

G. Acid and toxic materials. Drainage to ground and surface waters which emanates from acid-forming or toxic-forming mine waste materials and spoils placed on the land surface shall be avoided by:

(1) Identifying, burying and treating where necessary, spoil or other materials that, in the judgment of the regulatory authority, will be toxic to vegetation or that will adversely affect water quality if not treated or buried. Such material shall be disposed in accordance with the provision of Section 717.14(e);

(2) Preventing or removing water from contact with toxic-producing deposits;

(3) Burying or otherwise treating all toxic or harmful materials within 30 days if such materials are subject to wind and water erosion or within a lesser period designated by the regulatory authority. If storage of such materials is approved, the materials shall be placed on impermeable material and protected from erosion and contact with surface water. Coal waste ponds and other coal waste materials shall be maintained according to Sections 717.17(g)(4) and 717.18 shall apply;

(4) Burying or otherwise treating waste materials from coal preparation plants no later than 90 days after the cessation of the filling of the disposal area. Burial or treatment shall be in accordance with Section 717.14(e) of this Part;

(5) Casing, sealings or otherwise managing boreholes, shafts, wells and auger holes or other more or less horizontal holes to prevent pollution of surface or ground water and to prevent mixing of ground waters or significantly different quality. All boreholes that are within the permit area but are outside the surface coal mining area or which extend beneath the coal to be mined and into water-bearing strata shall be plugged permanently in a manner approved by the regulatory authority, unless boreholes have been approved for use in monitoring.

H. Ground water systems.

(1) Underground operations shall be conducted to minimize adverse effects on ground water flow and quality, and to minimize off-site effects. The permittee will be responsible for performing monitoring according to Subparagraph (2) [now Paragraph 2 of Subsection H of 19.8.36.41 NMAC] of this paragraph to ensure operations conform to this requirement.

(2) Ground water levels subsurface flow and storage characteristics, and the quality of ground water shall be monitored in a manner approved by the regulatory authority to determine the effects of underground coal mining operations on the quantity and quality of water in ground water systems at the mine area and in associated offsite areas. When operations are conducted in such a manner that may affect the ground water system, ground water levels and ground water quality shall be periodically monitored using wells which can adequately reflect changes in ground water quantity and quality resulting from such operations. Sufficient water wells must be used by the permittee. The regulatory authority may require drilling and development of additional wells if needed to adequately monitor the ground water system. As specified and approved by the regulatory authority, additional hydrologic tests, such as aquifer tests, must be undertaken by the permittee to demonstrate compliance with Subparagraph (1) [now Paragraph 1 of Subsection H of 19.8.36.41 NMAC] of this Paragraph.

I. Water rights and replacement. The permittee shall replace the water supply of an owner of interest in real property who obtains all or part of his supply of water for domestic, agricultural, industrial or other legitimate use from an underground or surface source where such supply has been affected by contamination, diminution, or interruption proximately resulting from surface coal mine operation by the permittee.

J. Hydrologic impact of roads.

(1) General. Access and haul roads and associated bridges, culverts, ditches and road rights-of-way shall be constructed, maintained and reclaimed so as to the extent possible, using the best technology currently available, prevent additional contributions of suspended solids to streamflow, or to runoff outside the permit area to the extent possible, using the best technology currently available. In no event shall the contributions be in excess of requirements set by applicable state or federal law. All haul and access roads shall be removed and the land affected shall be regraded and revegetated consistent with the requirements of Sections 717.14 and 717.20, unless

retention of a road is approved and assured of necessary maintenance to adequately control erosion.

(2) Construction.

(a) All roads, insofar as possible, shall be located on ridges or on flatter and more stable slopes to minimize erosion. Stream fords are prohibited unless they are specifically approved by the regulatory authority as temporary routes across dry streams that will not adversely affect sedimentation and that will not be used for coal haulage. Other stream crossings shall be made using bridges, culverts or other structures designed and constructed to meet the requirements of this Paragraph. Roads shall not be located in active stream channels nor shall they be constructed or maintained in a manner that increases erosion or causes significant sedimentation or flooding. However, nothing in this paragraph will be construed to prohibit relocation of stream channels in accordance with Paragraph (d) [now Subsection D of 19.8.36.41 NMAC] of this Section.

(b) In order to minimize erosion and subsequent disturbances of the hydrologic balance, roads shall be constructed in compliance with the following grade restrictions or other grades determined by the regulatory authority to be necessary to control erosion:

(i) The overall sustained grade shall not exceed 1v:10h (10 percent).

(ii) The maximum grade greater than 10 percent shall not exceed 1v:6.5h (15 percent) for more than 300 feet.

(iii) There shall not be more than 300 feet of grade exceeding 10 percent within each 1,000 feet.

(c) All access and haul roads shall be adequately drained using structures such as, but not limited to, ditches, water barriers, cross drains and ditch relief drains. For access and haul roads that are to be maintained for more than 1 year, water-control structures shall be designed with a discharge capacity capable of passing the peak runoff from a 10-year, 24-hour precipitation event. Drainage pipes and culverts shall be constructed to avoid plugging or collapse and erosion at inlets and outlets. Drainage ditches shall be provided at the toe of all cut slopes formed by construction of roads. Trash racks and debris basins shall be installed in the drainage ditches wherever debris from the drainage area could impair the functions of drainage and sediment control structures. Ditch relief and cross drains shall be spaced according to grade. Effluent limitations of Paragraph (a) [now Subsection A of 19.8.36.41 NMAC] of this Section shall not apply to drainage from access and haul roads located outside the disturbed area as defined in this section unless otherwise specified by the regulatory authority.

(d) Access and haul roads shall be surfaced with durable material. Toxic- or acid-forming substances shall not be used. Vegetation may be cleared only for the

essential width necessary for road and associated ditch construction and to serve traffic roads.

(3) Maintenance.

(a) Access and haul roads shall be routinely maintained by means such as, but not limited to, wetting, scraping or surfacing.

(b) Ditches, culverts, drains, trash racks, debris basins and other structures serving to drain access and haul roads shall not be restricted or blocked in any manner that impedes drainage or adversely affects the intended purpose of the structure.

(4) Access roads constructed for and used only to provide infrequent service to surface facilities, such as ventilators or monitoring devices shall be exempt from the requirements of Subparagraph (2) [now Paragraph 2 of Subsection J of 19.8.36.41 NMAC] of this Paragraph provided adequate stabilization to control erosion is achieved through use of alternative measures.

K. Hydrologic impacts of other transport facilities. Railroad loops, spurs, conveyors or other transport facilities shall be constructed, maintained and reclaimed to prevent additional contributions of suspended solids to streamflow, or to runoff outside the permit area to the extent possible, using the best technology currently available and to control other diminution or degradation of water quality and quantity. In no event shall contributions be in excess of requirements set by applicable state or federal law. Discharge of waters into underground mines. Surface and ground waters shall not be discharged or diverted into underground mine workings.

[Recompiled 6/4/02]

**19.8.36.42 UNDERGROUND MINING GENERAL PERFORMANCE STANDARDS:
DAMS CONSTRUCTED OF WASTE MATERIAL (717.18):**

A. General. No waste material shall be used in existing or new dams without the approval of the regulatory authority. The permittee shall design, locate, construct, operate, maintain, modify and abandon or remove all dams (used either temporarily or permanently) constructed of waste materials in accordance with the requirements of this Section.

B. Construction of dams.

(1) Waste shall not be used in the construction of dams unless demonstrated through appropriate engineering analysis to have no adverse effect on stability.

(2) Plans for dams subject to this Section, and also including those dams that do not meet the size or other criteria of Section 77.216(a) of this title, shall be approved by the regulatory authority before construction and shall contain the minimum plan

requirements established by the mining enforcement and safety administration pursuant to Section 77.216-2 of this title.

(3) Construction requirements are as follows:

(a) Design shall be based on the flood from the probable maximum precipitation event unless the permittee shows that the failure of the impounding structure would not cause loss of life or severely damage property or the environment, in which case, depending on site conditions, a design based on a precipitation event of no less than 100-year frequency may be approved by the regulatory authority.

(b) The design freeboard distance between the lowest point on the embankment crest and the maximum water elevation shall be at least 3 feet to avoid overtopping by wind and wave action.

(c) Dams shall have minimum safety factors as follows:

Case	Loading condition	Minimum safety factor
I	End of construction	1.3
II	Partial pool with steady seep-age saturation	1.5
III	Steady seepage from spillway or decant crest	1.5
IV	Earthquake (cases II and III with seismic loading)	1.0

(d) The dam, foundation and abutments shall be stable under all conditions of construction and operation of the impoundment. Sufficient foundation investigations and laboratory testing shall be performed to determine the factors of safety of the dam for all loading conditions in Paragraph (b)(3)(ii) [now Subparagraph b of Paragraph 3 of Subsection B of 19.8.36.42 NMAC] of this Section and for all increments of construction.

(e) Seepage through the dam, foundation and abutments shall be controlled to prevent excessive uplift pressures, internal erosion, sloughing, removal of material by solution or erosion of material by loss into cracks, joints and cavities. This may require the use of impervious blankets, pervious drainage zones or blankets, toe drains, relief wells or dental concreting of jointed rock surface in contact with embankment materials.

(f) Allowances shall be made for settlement of the dams and the foundation so that the freeboard will be maintained.

(g) Impoundments created by dams of waste materials shall be subject to a minimum drawdown criteria that allows the facility to be evacuated by spillways or decants of 90 percent of the volume of water stored during the design precipitation event within 10 days.

(h) During construction of dams subject to this Section, the structures shall be periodically inspected by a registered professional engineer to ensure construction according to the approved design. On completion of construction the structure shall be certified by a professional engineer registered in the State of New Mexico, experienced in the field of dam construction as having been constructed in accordance with accepted professional practice and the approved design.

(i) A permanent identification marker, at least 6 feet high that shows the dam number assigned pursuant to Section 77.216-1 of this title and the name of the person operating or controlling the dam, shall be located on or immediately adjacent to each dam within 30 days of certification of design pursuant to this Section.

(4) All dams, including those not meeting the size or other criteria of Section 77.216(a) of this title, shall be routinely inspected by a registered professional engineer, or someone under the supervision of a registered professional engineer, in accordance with mining enforcement and safety administration regulations pursuant to Section 77.216-3 of this title.

(5) All dams shall be routinely maintained. Vegetative growth shall be cut where necessary to facilitate inspection and repairs. Ditches and spillways shall be cleaned. Any combustible materials present on the surface, other than that used for surface stability such as mulch or dry vegetation shall be removed and any other appropriate maintenance procedures followed.

(6) All dams subject to this section shall be recertified annually as having been constructed and modified in accordance with current prudent engineering practices to minimize the possibility of failures. Any changes in the geometry of the impounding structure shall be highlighted and included in the annual recertification report. These certifications shall include a report on existing and required monitoring procedures and instrumentation, the average and maximum depths and elevations of any impounded waters over the past year, existing storage capacity of impounding

structures, any fires occurring in the material over the past year and any other aspects of the structures affecting their stability.

(7) Any enlargements, reductions in size, reconstruction or other modification of the dams shall be approved by the regulatory authority before construction begins.

(8) All dams shall be removed and the disturbed areas regraded, revegetated and stabilized before the release of bond unless the regulatory authority approves retention of such dams as being compatible with an approved postmining land use (Section 715.13).

[Recompiled 6/4/02]

**19.8.36.43 UNDERGROUND MINING GENERAL PERFORMANCE STANDARDS:
TOPSOIL HANDLING AND REVEGETATION (717.20):**

A. Topsoil shall be removed as a separate operation from areas to be disturbed by surface operations such as roads and areas upon which support facilities are to be sited. Selected overburden materials may be used instead of, or as a substitute for topsoil where the resulting soil medium is determined by the regulatory authority to be equal to or more suitable for revegetation. Topsoil shall be segregated, stockpiled, and protected from wind and water erosion or contaminants. Disturbed areas no longer required for the conduct of mining operations shall be regraded, topsoil distributed and revegetated.

B. The permittee shall establish on all land that has been disturbed by mining operations a diverse, effective and permanent vegetative cover capable of self-regeneration and plant succession, and adequate to control soil erosion. Introduced species may be substituted for native species if approved by the regulatory authority. Introduced species shall meet applicable State and Federal seed or introduced species statutes, and may not include poisonous or potentially toxic species.

[Recompiled 6/4/02]

**19.8.36.44 UNDERGROUND MINING GENERAL PERFORMANCE STANDARDS:
COAL EXPLORATION:**

Prior to conducting any exploration, any person must file with the Director notice of intention to explore and such notice shall include a description of the exploration area and the period of supposed exploration; and provisions for reclamation in accordance with the performance standards in Section 19 of the Surfacemining Act of all lands substantially disturbed in exploration, including excavation, roads, drill holes and the removal of the necessary facilities and equipment.

[Recompiled 6/4/02]

19.8.36.45 APPROVED:

D.E. Gray

Chairman

New Mexico Coal Surfacemining Commission

CHAPTER 9: [RESERVED]

CHAPTER 10: NON-COAL MINING

PART 1: GENERAL PROVISIONS

19.10.1.1 ISSUING AGENCY:

New Mexico Mining Commission.

[2-15-96; 19.10.1.1 NMAC - Rn, 19 NMAC 10.2.1.100, 05-15-2001]

19.10.1.2 SCOPE:

All persons subject to the New Mexico Mining Act NMSA 1978, Section 69-36-1 et. seq.

[2-15-96; 19.10.1.2 NMAC - Rn, 19 NMAC 10.2.1.101, 05-15-2001]

19.10.1.3 STATUTORY AUTHORITY:

NMSA 1978, Section 69-36-1 et. seq.

[2-15-96; 19.10.1.3 NMAC - Rn, 19 NMAC 10.2.1.102, 05-15-2001]

19.10.1.4 DURATION:

Permanent.

[2-15-96; 19.10.1.4 NMAC - Rn, 19 NMAC 10.2.1.103, 05-15-2001]

19.10.1.5 EFFECTIVE DATE:

February 15, 1996, unless a later date is cited at the end of a section.

A. All references to the Mining Act Parts 1-13 in any other rule shall be understood as a reference to 19.10 NMAC.

B. The amendment and replacement of The Mining Act Parts 1-13 shall not affect any administrative or judicial enforcement action pending on the effective date of this amendment nor the validity of any permit issued pursuant to the Mining Act Parts 1-13.

[2-15-96, 12-14-96; 19.10.1.5 NMAC - Rn, 19 NMAC 10.2.1.104, 05-15-2001]

19.10.1.6 OBJECTIVE:

The objective of Parts 1-14 of 19.10 NMAC is to establish regulations to implement the New Mexico Mining Act as directed in NMSA 69-36-7A. These regulations are designed to ensure proper reclamation through permitting for operations subject to the Mining Act, in accordance with provisions and standards outlined in the Mining Act.

[2-15-96, 12-29-2000; 19.10.1.6 NMAC - Rn, 19 NMAC 10.2.1.105, 05-15-2001]

19.10.1.7 DEFINITIONS:

A. Definitions with letter "A."

(1) "Acid/Acid Drainage" means water that is discharged from an area affected by mineral exploration, mining or reclamation, with a pH of less than 5.5 and in which total acidity exceeds total alkalinity as defined by the latest edition of Standard Methods for the Examination of Water and Wastewater.

(2) "Act" means the New Mexico Mining Act, Sections 69-36-1 through 69-36-20, NMSA 1978.

(3) "Affected area" means the area outside of the permit area where the land surface, surface water, ground water or air resources are impacted by mining operations within the permit area.

(4) "As-built drawings" means engineering drawings signed and sealed by a professional engineer registered in New Mexico which portray facilities as constructed and which the engineer certifies that the facility meets the requirements of the relevant rule.

B. Definitions with the letter "B." **[RESERVED]**

C. Definitions with the letter "C."

(1) "Commission" means the Mining Commission established in the Act.

(2) "Contaminated" means the presence of substances at concentrations exceeding state or federal standards as a result of mining exploration or reclamation.

D. Definitions with the letter "D."

(1) "Director" means the Director of the Division or his designee.

(2) "Disturbed area" means an area where the earth's surface is disturbed as a result of mining or activities facilitating mining.

(3) "Diversion" means a channel, embankment, or other man-made structure constructed to divert water from one area to another.

(4) "Division" means the Mining and Minerals Division of the Energy, Minerals and Natural Resources Department.

E. Definitions with the letter "E."

(1) "Ephemeral stream" means a stream or reach of a stream that flows briefly only in direct response to precipitation or snowmelt in the immediate locality; its channel bed is always above the water table of the region adjoining the stream.

(2) "Existing mining operation" means an extraction operation that produced marketable minerals for a total of at least two years between January 1, 1970 and June 18, 1993.

(3) "Exploration" means the act of searching for or investigating a mineral deposit, including sinking shafts, tunneling, drilling core and bore holes, digging pits, making cuts and other works for the purpose of extracting samples prior to commencement of development or extraction operations and the building of roads, access ways and other facilities related to such work; however, activities that cause no, or very little, surface disturbance, such as airborne surveys and photographs, use of instruments or devices that are hand carried or otherwise transported over the surface to perform magnetic, radioactive or other tests and measurements, boundary or claim surveying, location work or other work that causes no greater disturbance than is caused by ordinary lawful use of the area by persons not engaged in exploration are excluded from the meaning of "exploration."

F. Definitions with the letter "F." [RESERVED]

G. Definitions with the letter "G."

(1) "Ground cover" means foliar or basal area cover of living plant material, rock or litter.

(2) "Ground water" means interstitial water which occurs in saturated earth material and which is capable of entering a well in sufficient amounts to be utilized as a water supply.

H. Definitions with the letter "H." [RESERVED]

I. Definitions with the letter "I."

(1) "Important habitat" means vegetation, water and physical resources that are utilized by sensitive wildlife species or are critical to the survival or productivity of important wildlife populations.

(2) "Important wildlife" means wildlife populations determined by the Department of Game and Fish as having high recreational, ecological or commercial values.

(3) "Impoundment" means a basin constructed for the retention of water or sediment, but does not include impoundments for process solutions or tailings.

(4) "Intermittent stream" means a stream or reach of a stream that flows only at certain times of the year, such as when it receives flow from springs, melting snow, or localized precipitation.

J. Definitions with the letter "J." [RESERVED]

K. Definitions with the letter "K." [RESERVED]

L. Definitions with the letter "L."

(1) "Life zone of the surrounding area" means the climate, elevation and topography of the undisturbed environment in the locality of lands disturbed by mining.

(2) "Location work" means the minimum amount of labor or improvements required to establish a federal mining claim.

M. Definitions with the letter "M."

(1) "Mineral" means a nonliving commodity that is extracted from the earth for use or conversion into a saleable or usable product, but does not include clays, adobe, flagstone, potash, sand, gravel, caliche, borrow dirt, quarry rock used as aggregate for construction, coal, surface water or subsurface water, geo-thermal resources, oil and natural gas together with other chemicals recovered with them, commodities, byproduct materials and wastes that are regulated by the Nuclear Regulatory Commission or waste regulated under Subtitle C of the federal Resource Conservation and Recovery Act.

(2) "Minimal impact mining operation" means a mining operation or an exploration operation determined by the Director, in consultation with other state agencies, likely to have minimal environmental impact if operated and reclaimed in accordance with the approved permit. In making this determination, the Director shall, except as set forth in Subsection M, Paragraph 2, Subparagraph j of 19.10.1.7 NMAC exclude from minimal impact status operations with any of the characteristics:

(a) Located in or expected to have a direct surface impact on wetlands, springs, perennial or intermittent streams, lakes, rivers, reservoirs or riparian areas, except those excluded by 19.10.3.300 NMAC;

(b) Located in designated critical habitat areas as determined in accordance with the federal Endangered Species Act of 1973 or in areas determined by the Department of Game and Fish likely to result in an adverse impact on an endangered species designated in accordance with the Wildlife Conservation Act, Sections 17-2-37 through 17-2-46 NMSA 1978 or by the State Forestry Division for the Endangered Plants Act, Section 75-6-1 NMSA 1978;

(c) Located in an area with cultural resources listed on either the National Register of Historic Places or the State Register of Cultural Properties;

(d) Having or expected to have a direct impact on ground water that has a total dissolved solids concentration of less than 10,000 mg/l, except exploratory drilling intersecting ground water may be performed as a minimal impact operation;

(e) Expected to use or using cyanide, mercury amalgam, heap leaching or dump leaching in its operations;

(f) Located in a known cemetery or other burial ground;

(g) Located in an area designated as a Federal Wilderness Area, Wilderness Study Area, Area of Critical Environmental Concern, or an area within the National Wild and Scenic River System;

(h) Expected to result in point or non-point source surface or subsurface releases of acid or other toxic substances from the permit area; or

(i) Requiring a variance from any element of these regulations as part of the permit application.

(j) The Director may determine that an operation with any of the characteristics set forth in Subsection M, Paragraph 2, Subparagraphs a through d of 19.10.1.7 NMAC may qualify for minimal impact status, if the Director finds the operation is likely to have minimal environmental impact if operated and reclaimed in accordance with the approved permit. In making this determination, the Director shall:

(i) obtain written concurrence from the Secretary of the Environment Department for a waiver of characteristics in Subsection M, Paragraph 2, Subparagraphs a or d of 19.10.1.7 NMAC;

(ii) obtain written concurrence from the Director of the Department of Game and Fish for a waiver of any portion of characteristic in Subsection M, Paragraph

2, Subparagraph b of 19.10.1.7 NMAC that does not apply to the State Forestry Division; and

(iii) obtain written consultation from and cooperate with the Office of Cultural Affairs for a waiver of characteristics in Subsection M, Paragraph 2, Subparagraph c of 19.10.1.7 NMAC.

(k) In addition, where interrelated mining operations are located in close proximity to each other, the Director may determine to issue one permit for all the operations which may eliminate these operations from consideration as minimal impact operations. In determining whether or not the operations are interrelated, the Director shall look for common owners or operators, immediate family members as owners or operators, related corporations as owners or operators or other common, reliable indicators of interrelated operations.

(3) "Mining" means the process of obtaining useful minerals from the earth's crust or from previously disposed or abandoned mining wastes, including exploration, open-cut mining and surface operation, the disposal of refuse from underground and in situ mining, mineral transportation, concentrating, milling, evaporation, leaching and other processing. "Mining" does not mean the exploration and extraction of potash, sand, gravel, caliche, borrow dirt and quarry rock used as aggregate in construction, the exploration and extraction of natural petroleum in a liquid or gaseous state by means of wells or pipes, the development or extraction of coal, the extraction of geothermal resources, smelting, refining, cleaning, preparation, transportation or other off-site operations not conducted on permit areas or the extraction, processing or disposal of commodities, byproduct materials or wastes or other activities regulated by the federal Nuclear Regulatory Commission.

N. Definitions with the letter "N." "New mining operation" means a mining operation that engages in a development or extraction operation after June 18, 1993 and that is not an existing mining operation.

O. Definitions with the letter "O." "Obtaining useful minerals" does not include the recovery of minerals from previously disposed or abandoned mining wastes when the Director determines the following:

(1) that those wastes are removed from a location that does not require a permit under the Act;

(2) the wastes are removed pursuant to a plan approved by appropriate Federal or State authorities for mitigating and controlling adverse environmental impacts from the wastes and from the removal activities; and

(3) the wastes are taken to a facility appropriately permitted for processing.

P. Definitions with the letter "P."

(1) "Perennial stream" means a stream or reach of a stream that flows continuously throughout the year in all years; its upper surface, generally, is lower than the water table of the region adjoining the stream.

(2) "Permit-by-rule" means an authorization to engage in mining activities without obtaining an individual permit under this Act provided that the conditions specified in Subsection B of 19.10.3.301 NMAC are met.

(3) "Permit area" means the geographical area defined in the permit for a new mining operation or for an existing mining operation on which mining operations are conducted or cause disturbance

(4) "Permittee" is the person or entity issued the permit by the Director, or required to have a permit under the Mining Act.

(5) "Post-mining land use" means a beneficial use or multiple uses which will be established on a permit area after completion of a mining project. The post-mining land use may involve active management of the land. The use shall be selected by the owner of the land and approved by the Director. The uses which may be approved as post-mining land uses may include agricultural, commercial or ecological uses that would ensure compliance with Federal, State or local laws, regulations and standards and which are feasible. Approved post-mining land use categories include, but are not limited to:

(a) cropland

(b) pasture land or land occasionally cut for hay

(c) grazing land

(d) forestry

(e) residential

(f) industrial/commercial

(g) recreation or tourism

(h) wildlife habitat

(i) developed water resources

(j) scientific or educational

(6) "Precipitation event" means an event with a specified frequency of return and specified period of duration as defined in "Precipitation-Frequency Atlas of the Western United States," vol. IV-New Mexico.

Q. Definitions with the letter "Q." "Quarry rock used as aggregate in construction" means rock extracted from a surface mine which is actually used in construction. Construction use includes building materials, landscaping, erosion control and stabilization and road maintenance activities.

R. Definitions with the letter "R."

(1) "Reclamation" means the employment during and after a mining operation of measures designed to mitigate the disturbance of affected areas and permit areas and to the extent practicable, provide for the stabilization of a permit area following closure that will minimize future impact to the environment from the mining operation and protect air and water resources.

(2) "Revision" means a modification to a permit that has a significant environmental impact and requires public notice and an opportunity for public hearing.

(3) "Riparian area" means a geographically delineated area with distinct resource values, that is characterized by plant species that depend on having roots in the water table or its capillary zone and that occurs within or adjacent to a perennial or intermittent stream, lake, pond, spring, or marsh bed maintained by natural water sources. For the purposes of 19.10 NMAC, "Riparian area" does not include areas in or adjacent to man-made bodies of water which neither were originally created in a natural watercourse nor resulted in an impoundment of a natural watercourse.

S. Definitions with the letter "S."

(1) "Safeguard" means to restrict, to the extent practicable, entrance or access by unauthorized persons to mine shafts, adits, pits, highwalls or other hazardous areas created by the operator or owner of a mining operation in order to reduce the possibility of accidents.

(2) "Self-sustaining ecosystem" means reclaimed land that is self-renewing without augmented seeding, amendments, or other assistance which is capable of supporting communities of living organisms and their environment. A self-sustaining ecosystem includes hydrologic and nutrient cycles functioning at levels of productivity sufficient to support biological diversity.

(3) "Sensitive wildlife species" means a species that has been identified by federal or state agencies pursuant to the Endangered Species Act of 1973 or the Wildlife Conservation Act, Sections 17-2-37 through 17-2-46 NMSA 1978, as requiring special protection to maintain its continued existence throughout all or a significant portion of its range.

(4) "Stabilize" means to control movement of soil or areas of disturbed earth by modifying the landform, or by otherwise modifying physical or chemical properties, such as by providing a protective surface coating or vegetation.

(5) "Standby status" means the permitted temporary cessation of a mining operation which is expected to resume.

T. Definitions with the letter "T."

(1) "Topdressing" means geological material and other amendments capable of supporting vegetation.

(2) "Topsoil" means the "A" soil horizon or other soil material capable of supporting vegetation.

U. Definitions with the letter "U." "Unit" means a component of a mining operation including but not limited to processing, leaching, excavation, storage, stockpile or waste units.

V. Definitions with the letter "V." [RESERVED]

W. Definitions with the letter "W."

(1) "Wetlands" means those areas which are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions in New Mexico. For the purposes of 19.10 NMAC, "wetlands" does not include areas in or adjacent to man-made bodies of water which neither were originally created in a natural watercourse nor resulted in an impoundment of a natural watercourse.

(2) "Wildlife" means all wild birds, fish, mammals, mollusks, reptiles, amphibians and crustaceans.

X. Definitions with the letter "X." [RESERVED]

Y. Definitions with the letter "Y." [RESERVED]

Z. Definitions with the letter "Z." [RESERVED]

[19.10.2.8 - 19.10.2.200 NMAC - N, 05-15-2001]

19.10.2.201 APPLICATION FEES:

Applications filed with the director shall be accompanied by a fee determined under the following schedule:

A. The permit application fee for an existing mining operation shall be determined by adding:

- (1) \$1,000.00 base fee;
- (2) \$15.00 per acre for the first 50 acres of land expected to be disturbed over the life of the mine (design limits) for surface disturbance, plus \$5.00 per acre for all such land over 50 acres;
- (3) a fee determined in accordance with 19.10.2.203 NMAC; and
- (4) if a closeout plan is submitted with the initial application, an additional fee will be assessed in accordance with Subsection K of 19.10.2.201 NMAC.

B. The permit application fee for a new mining operation shall be determined by adding:

- (1) \$5,000.00 base fee;
- (2) \$200.00 per acre for the first 50 acres of land expected to be disturbed over the life of the mine (design limits) for surface disturbance, plus \$40.00 per acre for all such land over 50 acres;
- (3) a fee determined in accordance with 19.10.2.203 NMAC; and
- (4) in addition, any cost associated with the preparation of an environmental evaluation by a third party shall be paid for by the applicant.

C. The initial application fee for an existing minimal impact mining operation is \$250.00. If a closeout plan is submitted with the initial application, an additional fee of \$250.00 will be assessed.

D. The initial application fee for a new minimal impact mining operation is \$1,000.00.

E. The fee for an exploration permit is \$1,000.00.

F. The fee for a minimal impact exploration permit is \$500.00.

G. The fee for transferring a permit is \$250.00.

H. The fee is \$1,000.00 for a non-minimal impact operation permit modification which is not a revision.

I. The fee for a minimal impact operation modification is \$250.00.

J. The fee for each permit revision, excluding revisions for closeout plans, is \$5,000.00.

K. The fee for a permit revision for a closeout plan for an existing mining operation shall be determined by the following table. Acreage calculations must be based on total existing and proposed disturbance as described in the closeout plan.

(1)	> 0 to 10 acres	\$750
(2)	> 10 to 30 acres	\$1,500
(3)	> 30 to 100 acres	\$3,000
(4)	> 100 to 300 acres	\$4,500
(5)	> 300 to 3,000 acres	\$6,000
(6)	> 3,000 to 10,000 acres	\$7,500
(7)	> 10,000 acres	\$9,000

L. The fee for a permit modification for a closeout plan for a minimal impact existing mine is \$250.00.

M. The fee for each application for a variance is \$500.00.

N. The director may waive application fees for a variance, modification, revision, or transferring a permit that requires little or no cost for investigation and issuance.

O. The application fee to determine whether a mine or a portion of a mine qualifies for prior reclamation is \$250.00. The fee shall be paid at the time an inspection is requested.

[7-12-94, 11-15-95, 12-15-95, 2-15-96; 19.10.2.201 NMAC - Rn, 19 NMAC 10.2.2.201, 05-15-2001; A, 03-16-09]

19.10.2.202 ANNUAL FEES:

A. The annual fee for an existing mining operation shall be determined by adding:

- (1)** \$800.00 base fee;
- (2)** \$15.00 per acre for the first 50 acres of currently disturbed surface land plus \$3.00 per acre for all disturbed land over 50 acres;
- (3)** a fee determined in accordance with 19.10.2.203 NMAC;
- (4)** a surcharge of 75% shall be added to the total annual fees for mining operations that have 500 acres or more disturbed area in their permit as defined in Paragraph (2) of Subsection D of 19.10.1.7 NMAC; substantially reclaimed acreage as defined in Paragraph (1) of Subsection F of 19.10.2.202 NMAC will not be counted as disturbed acreage for purposes of this paragraph;
- (5)** a surcharge of 50% shall be added to the total annual fees for existing mining operations that did not obtain an extension in accordance with Subsection D of 19.10.5.501 NMAC and have not obtained closeout plan approval; and
- (6)** the annual fee shall be calculated each year based on cumulative acreage disturbed as of December 31st of the prior year, and shall be due on or before April 30th of each year until all Mining Act requirements are met.

B. The annual fee for the new mining operation shall be determined by adding:

- (1)** \$1,000.00 base fee;
- (2)** \$30.00 per acre for the first 50 acres of currently disturbed surface land plus \$10.00 per acre for all disturbed land over 50 acres;
- (3)** a fee determined in accordance with 19.10.2.203 NMAC; and
- (4)** the annual fee shall be calculated each year based on cumulative acreage disturbed as of December 31st of the prior year, and shall be due on or before April 30th of each subsequent year following initial submittal of a permit application.

C. The annual fee for a minimal impact existing mining operation shall be \$250.00. This fee shall be due on or before April 30th of each year following initial submittal of permit application.

D. The annual fee for a minimal impact new mining operation shall be \$250.00. This fee shall be due on or before April 30th of each year following initial submittal of permit application.

E. Formula for reducing fees for substantially reclaimed acreage.

(1) For the purposes of 19.10.2 NMAC, "substantially reclaimed" means financial assurance has been released pursuant to 19.10.12.1210 NMAC except the amount to establish revegetation pursuant to Subsection A of 19.10.12.1204 NMAC.

(2) For the purposes of 19.10.2 NMAC, the total annual pre-reclamation fee is the total annual fee calculated assuming no reclamation has taken place.

(3) Base fees, disturbance fees and facility fees calculated pursuant to Subsection A of 19.10.2.202 NMAC or Subsection B of 19.10.2.202 NMAC shall be reduced in proportion to the area substantially reclaimed as compared to the total pre-reclamation fee but shall not be reduced to less than 60 percent of the total annual pre-reclamation fee. Formula for fee calculation: Fee owed = pre-reclamation fee - (AR/AT) * (pre-reclamation fee), where AT = total acreage and AR = reclaimed acreage.

[7-12-94, 11-15-95, 2-15-96, 5-31-97, 6-30-99, 12-29-2000; 19.10.2.202 NMAC - Rn, 19 NMAC 10.2.2.202, 05-15-2001; A, 05-31-2001; A, 04-30-03; A, 12-30-05; A, 03-16-09; A, 2-15-12; 12-13-13]

19.10.2.203 ASSESSMENT OF FACILITY-RELATED FEES:

A. The following table is used to calculate the portion of the fee based on certain types of facilities. These tables reflect the complexity of an operation. A facility fee in each applicable category will be assessed based on total acreage for all facilities of that type.

B. This portion of permit application and annual fees for existing and new mining operations shall be the sum of the costs within each of the following categories of fees applicable to the operation: Application Fees. For existing and new mine initial application fees, when determining acreages of facilities in the following categories, the total acreage identified as current and future sites (design limits) of these facilities is counted. Annual Fees. For existing and new mine annual fees, when determining acreages of facilities in the following categories, cumulative acreage disturbed up to June 30 of the current fee year will be counted.

Facility

Fee

(1) Open Pit Mine

(a) > 0 to 4 acres	\$500
(b) > 4 to 10 acres	\$1,000
(c) > 10 to 50 acres	\$2,500
(d) > 50 to 100 acres	\$5,000
(e) > 100 acres	\$7,500

(2) Tailings

(a) > 0 to 4 acres	\$500
(b) > 4 to 10 acres	\$1,000
(c) > 10 to 50 acres	\$2,500
(d) > 50 to 100 acres	\$5,000
(e) > 100 acres	\$7,500

(3) Waste Dumps

(a) > 0 to 4 acres	\$500
(b) > 4 to 10 acres	\$1,000
(c) > 10 to 50 acres	\$2,500
(d) > 50 to 100 acres	\$5,000
(e) > 100 acres	\$7,500

(4) Plant Site

(a) > 0 to 4 acres	\$500
(b) > 4 to 10 acres	\$1,000
(c) > 10 to 50 acres	\$2,500
(d) > 50 to 100 acres	\$5,000

[7-12-94, 11-15-95, 2-15-96; 19.10.2.203 NMAC - Rn, 19 NMAC 10.2.2.203, 05-15-2001]

19.10.2.204 PAYMENT:

A. Payments shall be in cash or check made payable to the Mining and Minerals Division and received by the Division on or prior to the date due. The Division shall deposit the payment with the state treasurer in the Mining Act Fund.

B. This fee schedule applies to all permit applications submitted after July 12, 1994. Permit fees submitted pursuant to Subsection A of 19.10.2.201 NMAC filed July 12, 1994 shall satisfy the requirement of Subsection A of 19.10.2.201 NMAC. Previously submitted fees exceeding those required under Subsection A of 19.10.2.201 NMAC shall be credited to annual fees for that operation.

[7-12-94, 12-15-95, 2-15-96; 19.10.2.204 NMAC - Rn, 19 NMAC 10.2.2.204, 05-15-2001]

19.10.2.205 LATE FEES:

A late fee shall be charged for fees that are paid after the due date of April 30th, each year. The late fee shall consist of (i) \$100 to cover administrative costs associated with the late payment and (ii) interest on the amount of the unpaid fees at an annual rate of fifteen percent (15%), compounded daily. The late fee will be applied to the mining act fund that is created by Section 69-36-19 of the New Mexico Mining Act.

[11-15-95, 12-15-95, 2-15-96, 5-31-97, 6-30-99; 19.10.2.205 NMAC - Rn, 19 NMAC 10.2.2.205, 05-15-2001; A, 12-28-01; A, 04-30-03; 19.10.2.205 NMAC - N, 2-15-12]

19.10.2.206 SURCHARGE FOR DEPARTMENT OF GAME AND FISH ACTIVITIES:

A. To compensate the department of game and fish for its costs required to implement its involvement in implementing the act, a percentage surcharge shall be added in the same percentage to each of the above application and annual fees. This surcharge shall be 4.5 percent of fees collected in FY 96 to be used in FY 97 and FY 98. This surcharge shall be 4.2 percent of fees collected in FY 98 and FY 99, to be used in FY 99 and FY 2000. This surcharge shall be 3.2 percent of fees collected in FY2000 to be used in FY 2001. No percentage surcharge shall be assessed in FY 2001 or FY 2002; instead, the balance of the surcharges assessed during FY 1996 through FY 2002 shall be used in FY 2002, FY 2003, FY 2004, FY 2005 and FY 2006.

B. Payment. On a quarterly basis, the director shall reimburse the department of game and fish, only from this surcharge, for its reasonably necessary costs incurred under the department's involvement with implementation of the act.

[19.10.2.206 NMAC - Rn, 19.10.2.205 NMAC, 2-15-12]

PART 3: MINIMAL IMPACT OPERATIONS

19.10.3.1 ISSUING AGENCY:

New Mexico Mining Commission.

[19.10.3.1 NMAC - N, 05-15-2001]

19.10.3.2 SCOPE:

All persons subject to the New Mexico Mining Act NMSA 1978, Section 69-36-1 et. seq.

[19.10.3.2 NMAC - N, 05-15-2001]

19.10.3.3 STATUTORY AUTHORITY:

NMSA 1978, Section 69-36-1 et. seq.

[19.10.3.3 NMAC - N, 05-15-2001]

19.10.3.4 DURATION:

Permanent.

[19.10.3.4 NMAC - N, 05-15-2001]

19.10.3.5 EFFECTIVE DATE:

February 15, 1996, unless a later date is cited at the end of a section.

A. All references to the Mining Act Parts 1-13 in any other rule shall be understood as a reference to 19.10 NMAC.

B. The amendment and replacement of The Mining Act Parts 1-13 shall not affect any administrative or judicial enforcement action pending on the effective date of this amendment nor the validity of any permit issued pursuant to the Mining Act Parts 1-13.

[19.10.3.5 NMAC - N, 05-15-2001]

19.10.3.6 OBJECTIVE:

The objective of Parts 1-14 of 19.10 NMAC is to establish regulations to implement the New Mexico Mining Act as directed in NMSA 69-36-7A. These regulations are designed to ensure proper reclamation through permitting for operations subject to the Mining Act, in accordance with provisions and standards outlined in the Mining Act.

[19.10.3.6 NMAC - N, 05-15-2001]

19.10.3.7 DEFINITIONS:

[RESERVED]

[19.10.3.7 NMAC - N, 05-15-2001]

[Definitions for this part can be found in 19.10.1.7 NMAC.]

19.10.3.8-19.10.3.299 [RESERVED]:

[19.10.3.8 - 19.10.3.299 NMAC - N, 05-15-2001]

19.10.3.300 EXCLUSION:

Prospectors, gold panners and rock collectors causing no or very little surface disturbance with their activities are excluded from the requirements of the Act and 19.10 NMAC pursuant to the definition of "Exploration," in 19.10.1 NMAC. Excavation(s) by one operator totaling greater than 2 cubic yards per year or the use of mechanized mining equipment, including mechanized sluices or dredges, are not eligible for this exclusion.

[7-12-94, 2-15-96, 12-14-96; 19.10.3.300 NMAC - Rn, 19 NMAC 10.2.3.300, 05-15-2001]

19.10.3.301 GENERAL PERMITS:

A. Validity:

(1) Operators must have a valid permit prior to commencing operations.

(2) A general permit for operations not occurring in intermittent streams, perennial streams or other bodies of water is valid for a period of one year once the applicant has submitted a signed copy of the general permit application to the director.

(3) For general permit operations occurring in intermittent streams, perennial streams or other bodies of water, the permit is valid for a period of one year once the applicant submits a signed copy of the general permit to the director and the environment department sends the director a copy of a certification from the environment department stating that water quality standards are expected to be met if the operation is conducted as described.

(4) General permits must be submitted for renewal at least 10 days prior to expiration.

B. Mining operations not occurring in intermittent streams, perennial streams or other bodies of water may apply to the director for a general permit if they meet the following requirements:

(1) the operation does not have any of the disqualifying characteristics listed in Subsection M, Paragraph (2), Subparagraphs (a) through (i) of 19.10.1.7 NMAC;

(2) not excavate greater than 200 cubic yards per year, with no more than 25 cubic yards and no more than 2 acres of unreclaimed surface disturbance at any time with all new disturbances including roads included in these amounts; for the purposes of this paragraph "unreclaimed" means the failure to meet the commitments of Subsection D, Paragraph (2), Subparagraphs (b) through (d) of 19.10.3.301 NMAC; and

(3) not cause a discharge of process water or drilling mud.

C. Mining operations occurring in intermittent streams, perennial streams or other bodies of water may apply to the director for a general permit if they meet the following requirements:

(1) the operation does not have any of the disqualifying characteristics listed in Subsection M, Paragraph (2), Subparagraphs (b) through (i) of 19.10.1.7 NMAC;

(2) not excavate greater than 2 cubic yards per day and 100 cubic yards per year;

(3) maintain a distance of at least 50 yards from other mining operations;

(4) not excavate into stream banks; and

(5) not drill.

D. An application for a general permit shall be on the form approved by the director and will include the following:

- (1)** the name and address of the operator, and location of the operation;
- (2)** a commitment from the applicant to comply with the following requirements:
 - (a)** not to exceed the applicable characteristics of Subsection B of 19.10.3.301 NMAC or Subsection C of 19.10.3.301 NMAC;
 - (b)** regrade the disturbed area to blend into and compliment the drainage pattern of the surrounding terrain upon cessation of operations;
 - (c)** revegetate the disturbed area with a seed mix appropriate for the surrounding area upon cessation of operations;
 - (d)** minimize erosion and sedimentation by use of best management practices;
 - (e)** safeguard against hazards to the health and safety of humans and domestic animals;
 - (f)** agree that the operation is subject to the inspection, enforcement and penalty provisions of 19.10.11 NMAC;
 - (g)** provide information necessary to meet other requirements specified by the director which are necessary to meet the definition of "minimal impact mining operation" Subsection M, Paragraph (2) of 19.10.1.7 NMAC or achieve reclamation;
 - (h)** agree to complete the requirements of Subsection D, Paragraph 2, Subparagraphs b through e of 19.10.3.301 NMAC prior to expiration of the permit; and
 - (i)** comply with applicable state and federal requirements and standards; and
- (3)** a signed statement by the operator agreeing to allow the director to inspect the operation, and to follow the terms of the general permit.

E. Operations meeting the general permit provisions are not required to provide financial assurance. An application fee of \$50.00 is required. General permit inspections are at the discretion of the director.

F. Operations not excluded from the act or not eligible for a general permit must meet the requirements of the definition of "minimal impact mining operation" in 19.10.1.7 NMAC in addition to the specific requirements set forth below for each type of operation in order to be granted minimal impact status. If the operation does not meet

minimal impact status it must be permitted in accordance with 19.10.4 NMAC, 19.10.5 NMAC or 19.10.6 NMAC.

[7-12-94, 2-15-96, 12-14-96, 12-29-2000; 19.10.3.301 NMAC - Rn, 19 NMAC 10.2.3.301, 05-15-2001; A, 05-31-2001]

19.10.3.302 MINIMAL IMPACT EXPLORATION OPERATIONS:

A. A minimal impact exploration operation will not exceed 1000 cubic yards of excavation per permit. Disturbances for constructed roads, drill pads and mud pits shall be no more than 5 acres total and will not be counted in the excavated materials. The type of road construction, the number and type of drill pads, and other disturbances when considered with site specific conditions will be major factors in determining eligibility for minimal impact status which is in the discretion of the director.

B. Timing of applications and deadlines for approval for minimal impact exploration operations must be in accordance with 19.10.4.401 NMAC, except that a complete application for minimal impact exploration operations shall be submitted not less than 45 days prior to the anticipated date of commencement of operations.

C. An applicant for a minimal impact exploration operation permit shall submit six copies of a completed application on a form provided by the director. If the proposed operation is on federal land, information submitted to the federal land management agency may be submitted with the application in lieu of providing duplicative information. Any confidential information shall be submitted separately in accordance with Subsection B of 19.10.4.402 NMAC.

D. The application shall include the following information:

(1) the name and address of the applicant, and if different, the name and address of the owner of the operation and the land; a statement of the basis on which the applicant has the right to enter the property to conduct the mining and reclamation;

(2) the location of the proposed operation as shown on a topographic map which indicates the proposed permit area and gives the location of the following: perennial, intermittent and ephemeral streams; springs; wetlands, riparian areas, lakes and reservoirs; residences; existing and proposed roads; other access routes; support facilities; cemeteries; burial grounds; cultural resources listed on either the *national register of historic places* or the *state register of cultural properties*; pipelines; and oil, gas and water wells on the permit area; areas and types of proposed disturbances shall be indicated; the anticipated dimensions of each proposed disturbance shall also be provided;

(3) an explanation of why the proposed operation qualifies as a minimal impact operation in accordance with 19.10 NMAC;

(4) a general description of the minerals sought and the methods of exploration; any chemicals to be used on site must be identified;

(5) an estimate of depth to ground water and total dissolved solids concentration; and

(6) a general description of how the operation will be operated and reclaimed to meet the requirements of reclamation, as defined in 19.10.1.7 NMAC.

E. The application must be accompanied by the permit fee as required by 19.10.2 NMAC.

F. If the permit area includes state or federally-owned lands, no permit will be issued unless the appropriate land management agency has approved or acknowledged the proposed operation, if such approval or acknowledgement is required by the agency's rules.

G. The director shall, after determining that the application is complete, deliver copies of the application (except those parts of the application designated confidential under Subsection B of 19.10.4.402 NMAC provided, however, that the director shall include with the application a list of the parts withheld and will provide such parts on specific request) to the agencies listed in Subsection F of 19.10.4.402 NMAC which shall have 20 days in which to provide comments to the director. The director shall consider comments from these agencies in making a determination of eligibility for minimal impact status.

H. The director shall determine if an operation is eligible for a minimal impact operation permit and may conduct a site visit in making this determination.

I. No permit for a minimal impact exploration operation will be issued until the director finds the following:

(1) the application is complete and demonstrates that the proposed operation and reclamation will meet the requirements of reclamation, as defined in 19.10.1.7 NMAC; reclamation of the disturbed area will be initiated as soon as possible, and will be completed within the permit term unless the disturbed area is included within a complete permit application for a new mining operation;

(2) the applicant has paid the permit fee determined by 19.10.2 NMAC;

(3) the applicant has signed a statement indicating he agrees to comply with the reclamation requirements of the permit, 19.10 NMAC, and the act and allows the director to enter the permit area, without delay, for the purpose of conducting inspections during exploration and reclamation;

(4) the applicant has certified he is not in violation of the New Mexico Mining Act or 19.10 NMAC; and

(5) the applicant has provided satisfactory financial assurance in an amount determined by the director; acceptable forms of financial assurance are limited to surety bonds, letters of credit or cash accounts described in 19.10.12.1208 NMAC.

J. The term of a permit for a minimal impact exploration operation is governed by Subsections A, C and D of 19.10.4.405 NMAC. Modifications to the permit are governed by 19.10.4.406 NMAC. A termination report pursuant to 19.10.4.407 NMAC is also required at the conclusion of an exploration operation not being renewed, unless the permittee has applied for a mining operation permit.

K. Reclamation of the disturbed area shall be initiated as soon as possible and completed in accordance with the schedule in the permit. Topsoil or topdressing material removal and stockpiling shall precede any excavation within the drill site area. All lands, including access roads or terrain damaged in gaining access to or clearing the site, or lands whose natural state has been substantially disturbed as a result of the exploration by drilling, shall be restored as nearly as possible to their original condition unless otherwise requested by the landowner and applicant and approved by the director. Where vegetation has been removed or destroyed within the permit area, vegetative cover shall be reestablished by seeding, planting, transplanting, or other adequate methods. All open mud pits shall be constructed in a manner to prevent wildlife entrapment, and shall be constructed to prevent any overflows. When drilling is completed, the mud pits shall be allowed to dry and then backfilled with native cover.

L. Each drill hole shall be plugged from total depth to within 2 feet of the original ground surface or the collar of the hole, whichever is lower, with a column of cement, high-density bentonite clay or other materials specified in the permit. If the approved plugging material is not cement, then the top ten feet of the column must be a cement plug. The hole shall be backfill with topdressing or topsoil from above the cement plug to the original ground surface. The hole shall be plugged as soon as practicable and satisfy the requirements of the state engineer and the New Mexico environment department for proper plugging of such holes. This plugging requirement may be waived if the state engineer issues a permit for a well for the exploration drill hole.

M. Financial assurance may only be released after the permittee has submitted a termination report that meets the requirements of 19.10.4.407 NMAC and the director has determined, after inspection, that the reclamation requirements of this section and the permit have been satisfied.

[7-12-94, 2-15-96; 19.10.3.302 NMAC - Rn, 19 NMAC 10.2.3.302, 05-15-2001; A, 04-30-09]

19.10.3.303 MINIMAL IMPACT EXISTING MINING OPERATIONS:

A. An existing mining operation that continues mining operations will not be considered a minimal impact existing mining operation if it exceeds 10 acres of disturbed land, or 40 acres of disturbed land in the case of dolomite, garnet, humate, perlite and zeolite operations that: (1) are located outside Bernalillo, Dona Ana and Santa Fe counties; and (2) are committed to perform concurrent reclamation of disturbed areas to the extent practicable. Permanent roads and areas within the permit area that are reclaimed will not be counted as part of the acreage limitation for a minimal impact existing mining operation. Reclaimed, for this purpose, means all financial assurance has been released, except the amount held to re-establish vegetation pursuant to Subsection A of 19.10.12.1204 NMAC. Construction of roads and access ways, the types of disturbances, and the applicant's previous history of compliance with the act and 19.10 NMAC will be major factors in the director's determination of minimal impact status. Notwithstanding the frequency for inspections of minimal impact mining operations specified in Paragraph (4) of Subsection A of 19.10.11.1101 NMAC, if a minimal impact operation permit is issued under this subsection for more than 10 acres of disturbance, the director shall conduct on-site inspections at least once per year during the term of the permit.

B. A minimal impact existing mining operation that has discontinued or does not continue active mining operations may consist of unlimited acres of disturbed land; however, sites with the following characteristics will not be determined to be minimal impact operations:

(1) sites that exceed state or federal standards for soil or water contamination from mining activities that are subject to the act;

(2) sites likely to create acid mine drainage; or

(3) sites where the applicant proposes to seek a waiver from the usual reclamation requirements for a pit or waste unit.

C. Timing of applications and deadlines for approval for minimal impact existing mining operations must be in accordance with 19.10.5.501 NMAC or 19.10.5.511 NMAC.

D. An applicant for a minimal impact existing mining operation permit shall submit six copies of a completed application form provided by the director. If the proposed operation is on federal land, then information submitted to the federal land management agency may be submitted with the application in lieu of providing duplicative information on the form provided by the director. Any confidential information shall be submitted separately in accordance with Subsection B of 19.10.5.502 NMAC. Any information that was submitted with the site assessment must be updated to reflect current conditions.

E. The application shall include the following information:

(1) the name and address of the applicant, and if different, the name and address of the owner of the operation and the land; a statement of the basis on which the applicant has the right to enter the property to conduct the mining and reclamation;

(2) the location of the operation as shown on a topographic map which indicates the proposed permit area with the existing and proposed area of disturbance and gives the location of the following: the areas to be disturbed; perennial, intermittent and ephemeral streams; springs; wetlands, riparian areas, lakes and reservoirs; residences; existing and proposed roads; other access routes; support facilities; cemeteries; burial grounds; cultural resources listed on either the *national register of historic places* or the *state register of cultural properties*; pipelines; and oil, gas and water wells on and within one-half mile of the permit area;

(3) a general description of the minerals sought, the methods of extraction, and any processing to be conducted on site; any chemicals to be used on site must be identified;

(4) an estimate of depth to ground water and total dissolved solids concentration;

(5) an explanation of why the proposed operation qualifies as a minimal impact operation in accordance with 19.10 NMAC;

(6) a closeout plan, whether submitted with the permit application or as a modification, shall include a general description of how the permit area will be reclaimed to a condition that allows for re-establishment of a self-sustaining ecosystem appropriate for the life zone of the surrounding areas following closure unless conflicting with the approved post-mining land use; each closeout plan must be developed to meet the site-specific characteristics of the mining operations and the site; the closeout plan must specify incremental work to be done within specific time frames to accomplish the reclamation; and

(7) a list of other permits required for the operation, and the anticipated schedule for receipt of these; and

(8) information necessary to meet other requirements specified by the director which are necessary to meet the definition of "minimal impact mining operation" in Paragraph (2) of Subsection M of 19.10.1.7 NMAC or achieve reclamation.

F. The director shall determine the amount of financial assurance appropriate for each operation based on the cost of reclaiming the site by a third party. Operations less than 2 acres total disturbance are not required to provide financial assurance.

G. The application must be accompanied by the permit fee as required by 19.10.2 NMAC and a proposal for the required financial assurance.

H. If the permit area includes state or federally-owned lands, no permit will be issued unless the appropriate land management agency has approved or acknowledged the proposed operation, if such approval or acknowledgement is required by the agency's rules.

I. The director shall, after determining that the application is complete, deliver copies of the application (except those parts of the application designated confidential under Subsection B of 19.10.5.502 NMAC provided, however, that the director shall include with the application a list of the parts withheld and will provide such parts on specific request) to the agencies listed in Subsection E of 19.10.5.506 NMAC which shall have 20 days in which to provide comments to the director. The director shall consider comments from these agencies in making his determination of eligibility for minimal impact status.

J. The director shall determine if an operation is eligible for a minimal impact operation permit. The director may conduct an evaluation or site visit which may include other agencies in making this determination for operations that do not exceed 10 acres of disturbance. In making this determination for operations with more than 10 acres of disturbance, the director shall conduct an on-site inspection which may include other agencies.

K. No permit for a minimal impact operation will be issued until the director finds the following:

(1) the application is complete and demonstrates the closeout plan will meet the performance and reclamation standards and requirements Paragraphs (5) and (6) of Subsection E of 19.10.3.303 NMAC or provides a schedule for submitting such a plan in the shortest time practicable;

(2) the applicant has paid the permit fee;

(3) the applicant has provided satisfactory financial assurance; and

(4) the applicant has signed a notarized statement that he agrees to comply with the requirements of the permit, 19.10 NMAC and the act and allows the director to enter the permit area for the purpose of conducting inspections.

(5) the secretary of environment has provided a written determination stating that the permit applicant has demonstrated that the activities to be permitted or authorized will be expected to achieve compliance with all applicable air, water quality and other environmental standards if carried out as described in the closeout plan; this determination will address applicable standards for air, surface water and ground water protection enforced by the environment department or for which the environment department is otherwise responsible; the determination shall be made within the 20-day period provided in Subsection I of 19.10.3.303 NMAC, or the requirement is waived.

L. Modifications to a permit are allowed pursuant to 19.10.5.505 NMAC including modifications to incorporate a closeout plan. The term of a permit is governed by 19.10.5.504 NMAC. Annual reports are required for each permit pursuant to 19.10.5.510 NMAC.

[7-12-94, 2-15-96, 12-14-96; 19.10.3.303 NMAC - Rn, 19 NMAC 10.2.3.303, 05-15-01; A, 02-28-14; A, 05-31-16]

19.10.3.304 MINIMAL IMPACT NEW MINING OPERATIONS:

A. A minimal impact new mining operation will not exceed 10 acres of disturbed land, or 40 acres of disturbed land in the case of dolomite, garnet, humate, perlite and zeolite operations that: (1) are located outside Bernalillo, Dona Ana and Santa Fe counties; and (2) are committed to perform concurrent reclamation of disturbed areas to the extent practicable. Pre-existing roads and reclaimed acres within the permit area will not be counted as part of the acreage limitation for a minimal impact new mining operation. Reclaimed, for this purpose, means all financial assurance has been released, except the amount held to re-establish vegetation pursuant to Subsection A of 19.10.12.1204 NMAC. Construction of roads and access ways, the types of disturbances, and the applicant's previous history of compliance with the act and 19.10 NMAC will be major factors in the director's determination of minimal impact status. In determining whether a proposed operation with between 10 and 40 acres of disturbed land is eligible for a minimal impact new mining permit, the director shall conduct a site visit that may include other agencies in accordance with Subsection I of 19.10.3.304 NMAC. Notwithstanding the frequency for inspections of minimal impact mining operations specified in Paragraph (4) of Subsection A of 19.10.11.1101 NMAC, if a minimal impact operation permit is issued under this subsection for more than 10 acres of disturbance, the director shall conduct on-site inspections at least once per year during the term of the permit.

B. Timing of applications and deadline for approval for minimal impact new mining operations must be in accordance with 19.10.6.601 NMAC.

C. An applicant for a minimal impact new mining operation permit shall submit six copies of a completed application on a form to be provided by the director. If the proposed operation is on federal land, then the information submitted to the federal land management agency may be submitted with the application in lieu of providing duplicative information on the form provided by the director. Any confidential information shall be submitted separately in accordance with Subsection B of 19.10.6.602 NMAC.

D. The application shall include the following information:

(1) the name and address of the applicant, and if different, the name and address of the owner of the operation and the land; a statement of the basis on which the applicant has the right to enter the property to conduct the mining and reclamation;

(2) the location of the proposed operation as shown on a topographic map which indicates the proposed permit area and gives the location of the following: the areas to be disturbed; perennial, intermittent and ephemeral streams; springs; wetlands, riparian areas, lakes and reservoirs; residences; existing and proposed roads; other access routes; support facilities; cemeteries; burial grounds; cultural resources listed on either the *national register of historic places* or the *state register of cultural properties*; pipelines; and oil, gas and water wells on and within 1/2 mile of the permit area;

(3) a listing of other environmental permits held by the applicant for other mining operations within the United States and any violations issued for non-compliance with those permits;

(4) a general description of the minerals sought, the methods of extraction, and any processing to be conducted on site; any chemicals to be used on site must be identified;

(5) an estimate of depth to ground water and total dissolved solids concentration;

(6) an explanation of why the proposed operation qualifies as a minimal impact operation in accordance with 19.10 NMAC;

(7) a general description of how the operation will meet the following performance standards:

(a) the mining and reclamation operation shall be designed and operated using the most appropriate technology and best management practices;

(b) the mining and reclamation operation shall assure protection of human health and safety, the environment, wildlife and domestic animals;

(c) measures will be taken to safeguard the public from unauthorized entry into shafts, adits and tunnels and to prevent falls from highwalls or pit edges; depending on site-specific characteristics, the following measures shall be required:

(i) closing shafts, adits or tunnels to prevent entry;

(ii) posting warning signs, and restricting access to hazardous areas;
and

(iii) posting a sign at the main entrances giving a telephone number of a person to call in the event of emergencies;

(d) the disturbed area shall not contribute suspended solids above background levels, or where applicable the water quality control commission's standards, to intermittent and perennial streams; and

(e) mining and reclamation operations shall be conducted to control erosion;

(8) a general description of how the operation will be operated and reclaimed to a self-sustaining ecosystem appropriate for the life zone of the surrounding areas following closure unless conflicting with the approved post-mining land use;

(9) a list of other permits required for the operation, and the anticipated schedule for receipt of these; and

(10) information necessary to meet other requirements specified by the director which are necessary to meet the definition of "minimal impact mining operation" Paragraph (2) of Subsection M of 19.10.1.7 NMAC or achieve reclamation.

E. The director shall determine the amount of financial assurance appropriate for each operation based on the cost of reclaiming the site by a third party. Operations less than two acres total disturbance are not required to provide financial assurance.

F. The application must be accompanied by the permit fee as required by 19.10.2 NMAC and a proposal for the required financial assurance.

G. If the permit area includes state or federally-owned lands, no permit will be issued unless the appropriate land management agency has approved or acknowledged the proposed operation, if such approval or acknowledgement is required by the agency's rules.

H. The director shall, after determining that the application is complete, deliver copies of the application (except those parts of the application designated confidential under Subsection B of 19.10.6.602 NMAC provided, however, that the director shall include with the application a list of the parts withheld and will provide such parts on specific request) to the agencies listed in Subsection C of 19.10.6.605 which shall have 20 days in which to provide comments to the director. The director shall consider comments from these agencies in making his determination of eligibility for minimal impact status.

I. The director shall determine if an operation is eligible for a minimal impact operation permit. The director may conduct an evaluation or site visit which may include other agencies in making this determination for operations that do not exceed 10 acres of disturbance. In making this determination for operations with more than 10 acres of disturbance, the director shall conduct an on-site inspection which may include other agencies.

J. No permit for a minimal impact operation will be issued until the director finds the following:

(1) the application is complete and demonstrates the proposed operation will comply with the performance and reclamation standards and requirements of Paragraphs (6) through (8) of Subsection D of 19.10.3.304 NMAC;

(2) the applicant has paid the permit fee;

(3) the applicant has provided satisfactory financial assurance;

(4) the applicant, the operator or owner or any persons or entities directly controlled by the applicant, operator, owner or any persons or entities that directly control the applicant, operator or owner:

(a) are not currently in violation of the terms of another permit issued by the division or in violation of any substantial environmental law or substantive regulation at a mining operation in the United States, which violation is unabated and is not the subject of appeal, and have not forfeited or had forfeited financial assurance required for any mining, reclamation or exploration permit in the United States; for purposes of this subparagraph, a substantial environmental law or substantive regulation is one which is intended to protect natural resources from degradation and does not include violations of record-keeping or reporting requirements; if a violation occurred prior to the initiation of a legal relationship between the permit applicant and the violator, it shall not be considered for this purpose; and

(b) have not demonstrated a pattern of willful violations of the act or other New Mexico environmental statutes; if a violation occurred prior to the initiation of a legal relationship between the permit applicant and the violator, it shall not be considered for this purpose; and

(5) the applicant has signed a notarized statement that he agrees to comply with the requirements of the permit, 19.10 NMAC, and the act and allows the director to enter the permit area for the purpose of conducting inspections until release of the financial assurance;

(6) the secretary of environment has provided a written determination stating that the permit applicant has demonstrated that the activities to be permitted or authorized will be expected to achieve compliance with all applicable air, water quality and other environmental standards if carried out as described in the closeout plan; this determination shall address applicable standards for air, surface water and ground water protection enforced by the environment department or for which the environment department is otherwise responsible; the determination shall be made within the 20-day period provided in Subsection H of 19.10.3.304 NMAC, or the requirement is waived.

K. The term of a permit is governed by 19.10.6.607 NMAC. Modifications to a permit are allowed pursuant to 19.10.6.608 NMAC. Annual reports are required for each permit pursuant to 19.10.6.610 NMAC.

[7-12-94, 2-15-96; 19.10.3.304 NMAC - Rn, 19 NMAC 10.2.3.304, 05-15-01; A, 02-28-14; A, 05-31-16]

PART 4: EXPLORATION

19.10.4.1 ISSUING AGENCY:

New Mexico Mining Commission.

[19.10.4.1 NMAC - N, 05-15-2001]

19.10.4.2 SCOPE:

All persons subject to the New Mexico Mining Act NMSA 1978, Section 69-36-1 et. seq.

[19.10.4.2 NMAC - N, 05-15-2001]

19.10.4.3 STATUTORY AUTHORITY:

NMSA 1978, Section 69-36-1 et. seq.

[19.10.4.3 NMAC - N, 05-15-2001]

19.10.4.4 DURATION:

Permanent.

[19.10.4.4 NMAC - N, 05-15-2001]

19.10.4.5 EFFECTIVE DATE:

February 15, 1996, unless a later date is cited at the end of a section.

A. All references to the Mining Act Parts 1-13 in any other rule shall be understood as a reference to 19.10 NMAC.

B. The amendment and replacement of The Mining Act Parts 1-13 shall not affect any administrative or judicial enforcement action pending on the effective date of this amendment nor the validity of any permit issued pursuant to the Mining Act Parts 1-13.

[19.10.4.5 NMAC - N, 05-15-2001]

19.10.4.6 OBJECTIVE:

The objective of Parts 1-14 of 19.10 NMAC is to establish regulations to implement the New Mexico Mining Act as directed in NMSA 69-36-7A. These regulations are designed

to ensure proper reclamation through permitting for operations subject to the Mining Act, in accordance with provisions and standards outlined in the Mining Act.

[19.10.4.6 NMAC - N, 05-15-2001]

19.10.4.7 DEFINITIONS:

[RESERVED]

[19.10.4.7 NMAC - N, 05-15-2001]

[Definitions for this part can be found in 19.10.1.7 NMAC.]

19.10.4.8-19.10.4.400 [RESERVED]:

[19.10.4.8 - 19.10.4.400 NMAC - N, 05-15-2001]

19.10.4.401 TIMING OF SUBMITTAL AND DEADLINE FOR OBTAINING APPROVAL:

A. After December 31, 1994, no person shall engage in exploration operations in New Mexico without first obtaining a permit to conduct exploration from the Director.

B. Any person conducting exploration and who intends to continue exploration after December 31, 1994, shall submit an application by September 1, 1994.

C. For exploration commencing after December 31, 1994, applications for exploration operations shall be submitted not less than 120 days prior to the anticipated date of commencement of operations.

D. Renewal applications shall be filed at least 30 days preceding expiration of the current permit.

E. Permits for exploration operations are not required for exploration operations conducted within a permit area of a new or existing mining operation.

[7-12-94, 2-15-96; 19.10.4.401 NMAC - Rn, 19 NMAC 10.2.4.401, 05-15-2001]

19.10.4.402 PERMIT APPLICATION REQUIREMENTS:

A. Six copies of an application for a permit shall be submitted to the Director. The Director may require additional copies for distribution by the Director to other governmental agencies.

B. All information submitted to the Director shall be made available for public inspection and copying at the Director's office, except as designated confidential.

Information in the application which the applicant desires to keep confidential shall be clearly indicated and submitted separately from the rest of the application.

(1) If the operator designates as confidential an exploration map, financial information, information concerning the grade or location of ore reserves or trade secret information, the Director shall maintain the information as confidential and not subject to public records or disclosure laws.

(2) If a request is made for public review of the information held confidential, the Director shall notify the operator and provide a reasonable opportunity for substantiation of the claim that public disclosure of the information could harm the competitive position of the operator. If the claim of confidentiality is not substantiated to the satisfaction of the Director, the information shall be released.

(3) When a request is made for public review of information designated as confidential, the Director shall attempt to notify the operator within 24 hours of the request, and shall provide written notification by certified mail.

C. Each application shall be signed by an applicant or authorized agent of the applicant for the operation with the following certification made: I certify that I have personally examined and am familiar with the information submitted herein, and based on my inquiry of those individuals responsible for obtaining the information, I believe the submitted information is true, accurate, and complete. Further, the applicant certifies that he is not in violation of any other obligation under the New Mexico Mining Act or 19.10 NMAC adopted pursuant to that Act.

D. Each application for a permit shall include:

(1) The name of the applicant.

(2) A listing of all parties, including addresses and telephone numbers, which have an ownership or controlling interest in the proposed exploration operation or submittal of the applicant's most recent 10K form required by the United States Securities and Exchange Commission, and a listing of all mining operations within the United States owned, operated or directly controlled by the applicant, owner or operator and by persons or entities that directly control the applicant and the names and addresses of regulatory agencies with jurisdiction over the environmental aspects of those operations and that could provide a compliance history for those operations over the preceding ten years.

(3) Copies of documents upon which the applicant bases his right to enter the property to conduct the exploration and reclamation.

(4) A map(s) and list, including names and addresses, of all owners of surface and mineral estates within the proposed permit area, as shown by the most recent county assessor's property tax schedule.

(5) A map at a scale of at least 1 inch equals 2,000 feet (1:24,000) showing the areas of land to be disturbed by the proposed exploration and reclamation. The map shall specifically show the boundary of the proposed permit area, proposed and existing roads, previously disturbed areas, occupied dwellings, and pipelines; existing bodies of surface water, springs, wetlands, and riparian areas; topographic and drainage features; and oil, gas and water wells on the permit area. Areas and types of proposed disturbance shall be indicated. The anticipated depth of each proposed method of exploration shall also be provided.

(6) A description of the exploration methods to be used, the minerals sought and the proposed dates during which exploration will be conducted.

(7) An estimate of the total number of acres to be disturbed by the operations, including new road construction and reconstruction of existing roads. Estimates must include:

(a) the width and length of any new roads to be constructed including culvert locations and sizes;

(b) the approximate depth and diameter of all drill holes; and

(c) the general dimensions of all trenches, pits, shafts, cuts, or other types of disturbances.

(8) A list of chemicals contemplated for use by the exploration operation and a detailed plan for the containment, use, and disposal of such chemicals.

(9) An estimate of depth to ground water and total dissolved solids concentration.

(10) A reclamation plan which shall address:

(a) a general description of the vegetation of the area to be disturbed and, if applicable, a detailed description of species and methods to be used during revegetation;

(b) all applicable performance and reclamation standards and requirements in 19.10.4.403 NMAC; and

(c) an estimate of the proposed financial assurance required by 19.10.12 NMAC.

(11) The applicant shall designate an agent and provide the agent's street address for the service of notices and orders from the Director. This information shall be kept current during the term of the permit.

(12) A copy of the proposed form of notices required under 19.10.9 NMAC.

(13) The permit fees as determined pursuant to 19.10.2 NMAC.

(14) Any additional information necessary for evaluation of the permit application as required by the Director.

E. To avoid duplication and conflicting requirements, the applicant may include information from environmental permits relevant to the application. Permits issued by other governmental agencies shall be accepted by the Director to the extent such permits satisfy the requirements of the Act and 19.10 NMAC.

F. The Director shall, after determining the application is complete, deliver copies of the application or appropriate sections (except those parts of the application designated confidential under Subsection B of 19.10.4.402 NMAC, provided, however, that the Director shall include with the application a list of the parts withheld and will provide such parts at an agency's specific request) to the following agencies which shall have 60 days in which to provide comments to the Director: the Environment Department; the Department of Game and Fish; the State Forestry Division; the State Historic Preservation Office; the State Engineer; if the operation is on state or federal land, the appropriate state or federal land management agency; and any other agency the Director deems appropriate.

[7-12-94, 2-15-96; 19.10.4.402 NMAC - Rn, 19 NMAC 10.2.4.402, 05-15-2001]

19.10.4.403 PERFORMANCE AND RECLAMATION STANDARDS AND REQUIREMENTS:

Operations shall be designed and conducted to mitigate disturbance caused by exploration operations and, to the extent practicable, provide for the stabilization of disturbed areas to minimize future impact to the environment and protect air and water resources following closure. The reclamation plan must be developed to address site-specific characteristics and the exploration and excavation work to be performed.

A. Reclamation of the disturbed area shall be initiated and completed within the permit term, unless the disturbed area is included within a complete permit application for a new mining operation. Drill holes shall be plugged in accordance with Subsections K and L of 19.10.3.302 NMAC.

B. Cemeteries and burial grounds and the disturbance of cultural resources listed on or eligible for the *national register of historic places* or the *state register of cultural properties* shall be avoided until clearance has been granted by the director after consultation with the state historic preservation officer.

C. Measures shall be taken to safeguard the public from unauthorized entry into hazardous areas if such hazards were created by the operator. Depending on site-specific characteristics, the following measures shall be required:

- (1) closing shafts, adits and tunnels to prevent entry;
- (2) posting warning signs in locations near hazardous areas;
- (3) restricting access to hazardous areas; or
- (4) other measures as needed to protect human safety.

D. Trash, other materials and structures incidental to exploration shall be removed and disposed of appropriately.

E. Exploration and reclamation operations shall be conducted to minimize erosion.

F. Disturbance to riparian areas and wetlands shall be minimized during exploration. Adverse effects on riparian areas and wetlands shall be mitigated during reclamation.

G. Measures shall be taken during exploration and reclamation to minimize adverse impacts on wildlife and important habitat. Impacts on important habitat shall be mitigated during reclamation.

H. If necessary for the re-establishment of vegetation, topsoil or topdressing shall be salvaged, stockpiled, and distributed.

I. Vegetation shall be re-established with appropriate species.

J. Road construction should be limited. Roads shall be located to minimize disturbance to land and wildlife and enhance stability. Roads shall be constructed and maintained to control erosion. Roads constructed in or across intermittent or perennial streams require site specific designs. Roads to remain permanent must be approved by the surface owner and must be stabilized to control erosion.

K. Excavations shall be backfilled and graded to approximate the original topography. Adits and shafts created by the operator shall be sealed. Drill holes not regulated by the state engineer office shall be plugged or filled to prevent subsidence and injury to the public and wildlife.

L. Blasting shall be conducted to prevent injury to persons or damage to property not owned by the operator. Fly rock shall be confined to the permit area. The director may require a detailed blasting plan, pre-blast surveys or specific blast design limits to control possible adverse effects to structures.

[7-12-94, 2-15-96; 19.10.4.403 NMAC - Rn, 19 NMAC 10.2.4.403, 05-15-2001; A, 04-30-09]

19.10.4.404 COMPLIANCE WITH OTHER APPLICABLE LAWS:

A. Enforcement of other state or federal laws, regulations or standards shall be conducted by the agency charged with that responsibility under the applicable state or federal law, regulation or standard.

B. Enforcement of non-point source surface releases of acids or other toxic substances shall be performed by the Environment Department.

C. During the term of a permit issued pursuant to 19.10 NMAC, the permittee must maintain environmental permits required for the permit area. Revocation or termination of such a permit or the forfeiture of financial assurance related to the permit area by another governmental agency is adequate grounds for the Director to issue a cessation order pursuant to 19.10.11 NMAC.

[7-12-94, 2-15-96; 19.10.4.404 NMAC - Rn, 19 NMAC 10.2.4.404, 05-15-2001]

19.10.4.405 TERMS, ISSUANCE AND RENEWAL:

A. Terms

(1) A permit to conduct exploration and reclamation operations shall be valid for a period of not more than one year from the date of issuance.

(2) The permittee shall maintain a permit until financial assurance is released under 19.10.12 NMAC.

(3) If the permit area contains property owned by the federal or state government, the expiration or termination of the government's authorization to conduct exploration operations on the property automatically suspends the permittee's authority to continue exploration operations on the property, although not necessarily reclamation operations, by the permit issued under 19.10 NMAC.

B. Issuance - The Director may issue a permit subject to conditions necessary to meet the requirements of the Act and 19.10 NMAC. No permit shall be issued until the Director finds that:

(1) The applicant has agreed, in writing, to conduct only those operations described in the permit, including any subsequently approved revision or modification.

(2) The applicant has agreed, in writing, to reclaim any areas disturbed by the exploration operations in accordance with the permit.

(3) The applicant has paid the permit fee required by 19.10.2 NMAC.

(4) The financial assurance required by 19.10.12 NMAC has been provided and approved.

(5) The applicant's failure to comply with the provisions of the Act, 19.10 NMAC or a permit issued under 19.10 NMAC has not resulted in the forfeiture of financial assurance.

(6) If the proposed exploration operation is on state or federal lands, the appropriate land management agency approves or acknowledges the proposed exploration if approval or acknowledgement by the land management agency is required under that agency's regulations.

(7) The public participation requirements of 19.10.9 NMAC have been met.

(8) The applicant is not in violation of the Act or 19.10 NMAC.

(9) The applicant has submitted a notarized statement signed by the applicant that he agrees to comply with the performance standards and reclamation requirements of the permit, 19.10 NMAC, and the Act and allows the Director to enter the permit area without delay for the purpose of conducting inspections during mining and reclamation.

C. Renewal

(1) An exploration permit may be renewed from year to year.

(2) Renewal applications shall be filed 30 days preceding the expiration of the current permit.

(3) Applications for renewal shall not be approved if the applicant has outstanding violations of the Act or 19.10 NMAC or otherwise fails to meet the requirements of 19.10 NMAC.

D. Applications for the transfer of an exploration permit shall comply with the requirements of 19.10.8 NMAC.

[7-12-94, 2-15-96; 19.10.4.405 NMAC - Rn, 19 NMAC 10.2.4.405, 05-15-2001]

19.10.4.406 PERMIT MODIFICATIONS AND REVISIONS:

A. A permit modification or revision shall be required for exploration in areas or for types of disturbances not identified in the approved exploration permit.

B. A permit modification or revision shall be required for any change in the approved reclamation plan.

C. Revisions are modifications that require public notice and an opportunity for public hearing pursuant to 19.10.9 NMAC. The Director shall review each request for a permit modification to determine whether it must be processed as a revision

(1) The Director shall consider the following factors and their level of impact to determine whether a permit modification would have a significant environmental impact:

(a) Whether the proposed change would authorize an expansion of disturbed area beyond that currently authorized by the permit that:

(i) Would be located in or is expected to have a direct surface impact on wetlands, springs, perennial or intermittent streams, lakes, rivers, reservoirs or riparian areas.

(ii) Is expected to have a direct impact on ground water that has a total dissolved solids concentration of less than 10,000 mg/l.

(iii) Is expected to result in point or non-point source surface or subsurface releases of acid or other toxic substances from the permit area.

(iv) Would be located in designated critical habitat areas as determined in accordance with the federal Endangered Species Act of 1973 or in areas determined by the Department of Game and Fish likely to result in an adverse impact on an endangered species designated in accordance with the Wildlife Conservation Act, Sections 17-2-37 through 17-2-46 NMSA 1978 or by the State Forestry Division for the Endangered Plants Act, Section 75-6-1 NMSA 1978.

(v) Would adversely impact cultural resources listed on either the National Register of Historic Places or the State Register of Cultural Properties.

(vi) Would be located in a known cemetery or other burial ground.

(vii) Would be located in an area designated as a Federal Wilderness Area, Wilderness Study Area, Area of Critical Environmental Concern, or an area within the national Wild and Scenic River System.

(b) Whether the proposed change would result in a significant increase in the amount of financial assurance as determined by the Director; or

(c) Whether the proposed change would significantly depart from the nature or scale of the original exploration permit.

(2) An application for a permit modification or revision shall be accompanied by sufficient information for the Director to determine whether any of the factors listed in 19.10.4.406 NMAC are present.

(3) The Director shall consult with the Department of Environment, the Department of Game and Fish, State Forestry, applicable state or federal land management agency, or the State Historic Preservation if factors listed in this section are present relevant to the agency's area of expertise.

D. A permit modification or revision will not be granted unless the Director determines that the proposed modification or revision meets the requirements of 19.10.4 NMAC.

[7-12-94, 2-15-96, 12-29-2000; 19.10.4.406 NMAC - Rn, 19 NMAC 10.2.4.406, 05-15-2001]

19.10.4.407 TERMINATION REPORT:

At the conclusion of an exploration operation not to be renewed, the permittee shall submit to the director a termination report. The report shall:

A. certify that the exploration reclamation operations have been completed in accordance with the approved permit;

B. provide the total depth and diameter of each hole drilled, the date each hole was completed, depth of water bearing zones and a statement describing any flow to the surface;

C. identify on an approved map, the disturbed area including the number and the location of the disturbed acres, and the location, including identification number, of all drill holes and excavation sites; and

D. financial assurance may only be released after the permittee has submitted a termination report that meets the requirements of 19.10.4.407 NMAC and the director has determined, after inspection, that the reclamation requirements of 19.10.4.403 NMAC and the permit have been satisfied.

[7-12-94, 2-15-96; 19.10.4.407 NMAC - Rn, 19 NMAC 10.2.4.407, 05-15-2001; A, 04-30-09]

PART 5: EXISTING MINING OPERATIONS

19.10.5.1 ISSUING AGENCY:

New Mexico Mining Commission.

[19.10.5.1 NMAC - N, 05-15-2001]

19.10.5.2 SCOPE:

All persons subject to the New Mexico Mining Act NMSA 1978, Section 69-36-1 et. seq.
[19.10.5.2 NMAC - N, 05-15-2001]

19.10.5.3 STATUTORY AUTHORITY:

NMSA 1978, Section 69-36-1 et. seq.
[19.10.5.3 NMAC - N, 05-15-2001]

19.10.5.4 DURATION:

Permanent.
[19.10.5.4 NMAC - N, 05-15-2001]

19.10.5.5 EFFECTIVE DATE:

February 15, 1996, unless a later date is cited at the end of a section.

A. All references to the Mining Act Parts 1-13 in any other rule shall be understood as a reference to 19.10 NMAC.

B. The amendment and replacement of The Mining Act Parts 1-13 shall not affect any administrative or judicial enforcement action pending on the effective date of this amendment nor the validity of any permit issued pursuant to the Mining Act Parts 1-13.

[19.10.5.5 NMAC - N, 05-15-2001]

19.10.5.6 OBJECTIVE:

The objective of Parts 1-14 of 19.10 NMAC is to establish regulations to implement the New Mexico Mining Act as directed in NMSA 69-36-7A. These regulations are designed to ensure proper reclamation through permitting for operations subject to the Mining Act, in accordance with provisions and standards outlined in the Mining Act.

[19.10.5.6 NMAC - N, 05-15-2001]

19.10.5.7 DEFINITIONS:

[RESERVED]

[19.10.5.7 NMAC - N, 05-15-2001]

[Definitions for this part can be found in 19.10.1.7 NMAC.]

19.10.5.8-19.10.5.500 [RESERVED]:

[19.10.5.8 - 19.10.5.500 NMAC - N, 05-15-2001]

19.10.5.501 TIMING OF SUBMITTAL AND DEADLINE FOR OBTAINING APPROVAL:

A. An application for a permit for an existing mining operation shall be submitted by December 31, 1994.

B. The application shall include: a closeout plan; or a compliance schedule for completion of, within the shortest time practicable, a closeout plan, which shall be submitted no later than December 31, 1995, unless the applicant requests an extension and the Director grants approval for good cause shown.

C. Every existing mining operation must have a permit and closeout plan approved by the Director by December 31, 1997 unless the Director grants a non-renewable extension of time not to exceed two years for good cause shown. Notwithstanding the preceding sentence, prior to December 31, 1999 the Director may grant an additional extension of time pursuant to Subsection D of 19.10.5.501 NMAC.

D. At any time before September 22, 1999, an applicant may file a request for an additional non-renewable extension, which shall not extend beyond December 31, 2001. The application shall be filed in writing, with the Director. Upon receipt of the request, the Director shall provide a copy of the request to the department of environment which will have thirty days from receipt to provide comments. The Director shall approve the request for an extension if:

(1) The request is accompanied by a non-refundable application fee of \$5,000.00 payable pursuant to subsection A of 19.10.2.204 NMAC. The request will not be processed if the fee has not been paid.

(2) The request includes a detailed schedule of milestones and deliverables acceptable to the Director for obtaining closeout plan approval, which shall include:

(a) a schedule for carrying out supporting studies and submitting reports thereon;

(b) a description of steps to be taken for allowing public participation as provided in the Mining Act for Mining Act permits, closeout plans and revisions, taking into consideration public participation requirements under other authorities;

(c) a schedule for closeout plan approval for portions of the mining operation where approval is feasible prior to the final approval deadline, giving priority to completion of all studies and milestones necessary for prompt closeout plan approval for those portions of the mining operation;

(d) a schedule for submitting proposals for financial assurance for each portion of a mining operation having a separate closeout plan deadline, which allows sufficient time for review and comment prior to the final deadline, and which may include submission prior to the closeout plan being deemed approvable; and

(e) a final date by which the closeout plan must be approved and the financial assurance mechanism in place for each portion of a mining operation having a separate closeout plan deadline; this date should be as soon as feasible for each portion of a mining operation.

(3) It is not feasible for the applicant to obtain a closeout plan approval by December 31, 1999.

(4) Written concurrence is obtained by the Director from the secretary of environment for a request that will have an impact upon programs administered by the department of environment. MMD may consult with other state and federal agencies in determining the adequacy of the detailed schedule and request for extension.

(5) A public meeting to provide information to the public and to receive public comment on the request for extension has been held by the Director in the locality of the mining operation requesting an extension of time. At least 30 days prior to the meeting, the applicant shall make a copy of the request available for public inspection at a public repository in the county where the mining operation is located. The public meeting shall be held within 45 days of the applicant filing the request for an extension, and notice of the meeting shall be approved by the Director and given by the applicant at least 30 days prior to the meeting. The notice shall include the date, time and place of the meeting and the information identified in subsection A of 19.10.9.902 NMAC through subsection D of 19.10.9.902 NMAC, and shall meet requirements of subsection B of 19.10.9.903 NMAC through subsection H of 19.10.9.903 NMAC except that mailings may be sent by first class mail.

E. Any applicant who received an extension of time pursuant to Subsection D of 19.10.5.501 NMAC, and for which a public hearing on a closeout application has been requested but will not be held pursuant to subsection A of 19.10.9.904. NMAC prior to December 1, 2001 or for which a public hearing on a closeout application was not requested, must have the closeout plan approved by the Director by no later than October 1, 2002.

[7-12-94, 2-15-96, 9-15-99; 19.10.5.501 NMAC - Rn, 19 NMAC 10.2.5.501, 05-15-2001; A, 12-28-01]

19.10.5.502 PERMIT APPLICATION REQUIREMENTS:

A. A minimum of six copies of each application for a permit under this Part shall be submitted to the Director. The Director may require additional copies for distribution by

the Director to other governmental agencies with an interest in, or jurisdiction over, elements of the proposed operation.

B. All information submitted to the Director shall be made available for public inspection and copying at the Director's office, except as designated confidential. Information in the application which the applicant desires to keep confidential shall be clearly indicated and submitted separately from the rest of the application.

(1) If the operator designates as confidential an exploration map, financial information, information concerning the grade or location of ore reserves or trade secret information, the Director shall maintain the information as confidential and not subject to public records or disclosure laws.

(2) If a request is made for public review of the information held confidential, the Director shall notify the operator and provide a reasonable opportunity for substantiation of the claim that public disclosure of the information could harm the competitive position of the operator. If the claim is not substantiated to the satisfaction of the Director, the information shall be released.

(3) When a request is made for public review of information designated as confidential, the Director shall attempt to notify the operator within 24 hours of the request, and shall provide written notification by certified mail.

C. Each application shall be signed by an applicant or authorized agent of the applicant for the operation with the following certification made:

I certify that I have personally examined and am familiar with the information submitted herein, and based on my inquiry of those individuals responsible for obtaining the information, I believe the submitted information is true, accurate, and complete.

D. Each application under this Part shall be in a format acceptable to the Director and contain the following:

(1) The name of the applicant to whom the permit will be issued.

(2) A map(s) and list, including names and addresses, of all owners of surface and mineral estates within the proposed permit area, as shown by the most recent county assessor's property tax schedule.

(3) A statement of the basis on which the applicant has the right to enter the property to conduct the mining and reclamation. The applicant will allow the Director to examine, if necessary, the documents which establish such basis.

(4) The site assessment previously submitted pursuant to Section 69-36-5 of the Act shall be considered part of the application. If information in the site assessment requires updates to provide information necessary for evaluation of the permit or if the

site-specific conditions at the time of the assessment significantly deviate from conditions at the time of submittal of the permit application, such updated information or deviations must be described in the application.

(5) A map(s) showing all existing and proposed pits, shafts, adits, stockpiles, waste units, impoundments, leach piles, processing facilities, and support facilities such as office buildings. The map(s) shall identify the proposed permit area and design limits of each unit of the operation.

(6) A description of undisturbed vegetation including a comprehensive list of species and their relative abundance with regards to cover and production.

(7) Evidence that other applicable state and federal permits to be obtained either have been or will be issued before the activities subject to those permits begin.

(8) The applicant shall designate an agent and provide the agent's street address for the service of notices and orders in writing from the Director. This information shall be kept current if a permit is granted.

(9) A copy of the proposed form of notices required under 19.10.9 NMAC.

(10) A permit fee as determined pursuant to 19.10.2 NMAC

(11) Any additional information necessary for evaluation of the permit application as required by the Director.

E. To avoid duplication and conflicting requirements, the applicant may include information from environmental permits relevant to the application. Permits issued by other governmental agencies shall be accepted by the Director to the extent such permits satisfy the requirements of the Act and 19.10 NMAC.

F. Where physically separate but interrelated mining operations are located in close proximity to each other and are under the control of the same owner or operator, the applicant may request or the Director may determine to issue one permit for all of the operations and require only one permit application and closeout plan.

[7-12-94, 2-15-96; 19.10.5.502 NMAC - Rn, 19 NMAC 10.2.5.502, 05-15-2001; A, 05-31-2001]

19.10.5.503 PERMIT APPROVAL REQUIREMENTS:

A. Unless a proposed closeout plan is submitted with the permit application, the following procedure shall be followed. If a closeout plan is submitted with the permit application, the requirements of 19.10.5.506 NMAC shall also be met.

B. As soon as practicable after receipt of a permit application, the Director shall notify the applicant in writing whether the application is complete. If the application is not complete, the notice shall specify the items missing from the application.

C. The Director shall deliver copies of the complete application or appropriate sections (except those parts of the application designated confidential under Subsection B of 19.10.5.502, provided, however, that the Director shall include with the application a list of the parts withheld and will provide such parts at an agency's specific request) to the Environment Department, the Office of the State Engineer, Department of Game and Fish, the State Forestry Division, the State Historic Preservation Office, and the state or federal land management agency, if applicable, for their information.

D. Within 30 days of receipt of a notice from the Director that the application is complete, the applicant shall, in a form approved by the Director, give public notice of the application pursuant to 19.10.9 NMAC.

E. An application for a permit under 19.10.5 NMAC shall be approved or denied within six months after the application has been determined to be complete.

F. The Director shall approve the application and issue the permit if he finds that:

(1) The application contains all of the information required, including a closeout plan or a proposed compliance schedule for submittal of a closeout plan within the shortest time practicable.

(2) The applicant has provided written information stating the name and official business address of the applicant and its agent for service of process.

(3) The applicant has provided the required signature and certification on the application.

(4) A permit application fee as determined pursuant to 19.10.2 NMAC has been paid.

(5) The public participation requirements of 19.10.9 NMAC have been met.

(6) The applicant has submitted a notarized statement signed by the applicant that he agrees to comply with the performance standards and reclamation requirements of the permit, 19.10 NMAC, and the Act and allows the Director to enter the permit area without delay during mining and reclamation.

[7-12-94, 2-15-96; 19.10.5.503 NMAC - Rn, 19 NMAC 10.2.5.503, 05-15-2001]

19.10.5.504 PERMIT TERM:

A. The permittee shall maintain a permit until financial assurance is released under 19.10.12 NMAC.

B. A permit shall be reviewed by the Director and may be required to be modified or revised for any of the following:

(1) additional applicable requirements under the Act or 19.10 NMAC; or

(2) the Director determines that the permit contains a material mistake or that inaccurate statements were made in establishing the terms or conditions of the permit.

C. After this review, the Director shall notify the permittee of any required modifications or revisions of the permit necessary to ensure compliance with the Act and 19.10 NMAC. If an approvable application for the required modifications or revisions has not been made within 90 days of the date of initial notification, the Director may order cessation of the mining operations.

D. The Director shall periodically review the amount of financial assurance filed with the Director under 19.10.12 NMAC. The Director may require adjustments to the amount of financial assurance to reflect inflationary increases or increases in the anticipated costs of reclamation.

E. If the permit area contains property owned by the federal or state government, the expiration or termination of the government's authorization for the permittee to conduct mining operations on the property automatically suspends the permittee's authority to continue mining operations on the property, though not necessarily closeout plan operations, by the permit issued under 19.10 NMAC.

[7-12-94, 2-15-96; 19.10.5.504 NMAC - Rn, 19 NMAC 10.2.5.504, 05-15-2001]

19.10.5.505 PERMIT MODIFICATIONS AND REVISIONS:

A. A permit modification or revision will not be granted unless the Director determines that the proposed modification or revision meets the requirements of 19.10.5 NMAC.

B. Revisions are modifications that require public notice and an opportunity for public hearing pursuant to 19.10.9 NMAC. The Director shall review each request for a permit modification to determine whether it must be processed as a revision.

(1) The Director shall consider the following factors and their level of impact to determine whether a permit modification would have a significant environmental impact:

(a) Whether the proposed change would authorize an expansion of design limits beyond that currently authorized by the permit that:

(i) Would be located in or is expected to have a direct surface impact on wetlands, springs, perennial or intermittent streams, lakes, rivers, reservoirs or riparian areas.

(ii) Is expected to have a direct impact on ground water that has a total dissolved solids concentration of less than 10,000 mg/l.

(iii) Is expected to result in point or non-point source surface or subsurface releases of acid or other toxic substances from the permit area.

(iv) Would be located in designated critical habitat areas as determined in accordance with the federal Endangered Species Act of 1973 or in areas determined by the Department of Game and Fish likely to result in an adverse impact on an endangered species designated in accordance with the Wildlife Conservation Act, Sections 17-2-37 through 17-2-46 NMSA 1978 or by the State Forestry Division for the Endangered Plants Act, Section 75-6-1 NMSA 1978.

(v) Would adversely impact cultural resources listed on either the National Register of Historic Places or the State Register of Cultural Properties.

(vi) Would be located in a known cemetery or other burial ground.

(vii) Would be located in an area designated as a Federal Wilderness Area, Wilderness Study Area, Area of Critical Environmental Concern, or an area within the national Wild and Scenic River System.

(b) Whether the proposed change would result in a significant increase in the amount of financial assurance as determined by the Director; or

(c) Whether the proposed change would significantly depart from the nature or scale of the permit.

(2) An application for a permit modification or revision shall be accompanied by sufficient information for the Director to determine whether any of the factors listed in 19.10.5.505 NMAC are present.

(3) The Director shall consult with the Department of Environment, the Department of Game and Fish, State Forestry, applicable state or federal land management agency, or the State Historic Preservation if factors listed in Subsection B of 19.10.5.505 NMAC are present relevant to the agency's area of expertise.

C. An application for a permit modification or revision shall be in a format acceptable to the Director. A permit modification or revision shall be required for any changes in the approved closeout plan.

D. A permit modification or revision for a mining operation is required for each new discrete processing, leaching, excavation, storage or stockpile unit located within the permit area and not identified in the permit and for each expansion of such a unit identified in the permit that exceeds the design limits specified in the permit for such units. Modifications or revisions will be approved if the Director determines the unit will:

(1) incorporate the requirements of paragraphs 1, 2, 4, 5 and 6 of subsection H of Section 69-36-7 of the Act;

(2) be sited and constructed in a manner that facilitates, to the maximum extent practicable, contemporaneous reclamation consistent with the closeout plan; and

(3) meet all the requirements of 19.10.5 NMAC.

E. The following actions do not require permit modifications:

(1) the construction, relocation or modification of roads within the disturbed area that does not change the closeout plan;

(2) placement or movement of support buildings, equipment areas, maintenance shops, monitoring facilities, wells, power lines, power poles, substations, and communications facilities within the disturbed area that does not change the closeout plan;

(3) the movement of tanks, pipelines, utilities, and portable units; and

(4) changes to facilities subject to regulation under the Solid Waste Act.

[7-12-94, 2-15-96, 12-29-2000; 19.10.5.505 NMAC - Rn, 19 NMAC 10.2.5.505, 05-15-2001; A, 05-31-2001]

19.10.5.506 CLOSEOUT PLANS:

Six copies of an application for a permit revision shall be submitted, in a format acceptable to the Director, pursuant to Section 69-36-7G of the Act for the incorporation of an approved closeout plan or closeout plan for a portion of the mine if a closeout plan or closeout plan for a portion of the mine was not approved as part of the original permit application. If the original permit application includes a proposed closeout plan or closeout plan for a portion of the mine, the contents, review and approval of the closeout plan or closeout plan for a portion of the mine shall be in accordance with 19.10.5 NMAC.

A. A proposed closeout plan for all or a portion of the mine shall be based on site-specific characteristics and the anticipated life of the mining operation. Site-specific characteristics include, but are not limited to, disturbances from previous mining operations, past and current mining methods utilized, geology, hydrology and

climatology of the area. Information previously submitted to the Director in the site assessment or permit application may be referenced to support the proposed closeout plan, provided that, if the information in the site assessment significantly deviates from conditions at the time of submittal of the proposed closeout plan, deviations shall be described in the application.

B. A proposed closeout plan or a proposed closeout plan for a portion of the mine shall include a detailed description of how the permit area will be reclaimed to meet the requirements of Section 69-36-11B(3) of the Act and the performance and reclamation standards and requirements of 19.10.5 NMAC. The closeout plan shall also include the following:

(1) A description of the work proposed to be performed and a schedule, including anticipated starting and finishing dates, specifying the incremental work to be conducted and the period of time anticipated to be required for the various phases of the closeout.

(2) A list of all federal and state permits required for the closeout plan and evidence of when they were issued or a schedule by which these permits are anticipated to be received. To avoid duplication and conflicting requirements, the applicant may include information from environmental permits, or portions thereof, relevant to the application.

(3) A topographic map of the anticipated surface configuration of the permit area upon completion of the closeout plan. The map shall be at a scale approved by the Director to accurately represent the permit area.

(4) Additional information necessary for evaluation of the closeout plan as required by the Director.

C. Upon a showing that achieving a post-mining land use or self-sustaining ecosystem is not technically or economically feasible or is environmentally unsound, the Director may waive the requirement to achieve a self-sustaining ecosystem or post-mining land use for an open pit or waste unit if measures will be taken to ensure that the open pit or waste unit will meet all applicable federal and state laws, regulations and standards for air, surface water and ground water protection following closure and will not pose a current or future hazard to public health or safety.

D. As soon as practicable after the receipt of the application, the Director shall notify the applicant in writing whether the application is complete. If the application is not complete, the notice shall specify the items missing from the application.

E. The Director shall, after determining that the application is complete, deliver copies of the application or appropriate sections (except those parts of the application designated confidential under Subsection B of 19.10.5.502 NMAC, provided, however, that the Director shall include with the application a list of the parts withheld and will

provide such parts at an agency's specific request) to the following agencies which shall have 60 days in which to provide comments to the Director: the Environment Department; the Department of Game and Fish; the State Forestry Division; the State Historic Preservation Office; the State Engineer; if the operation is on state or federal land, the appropriate state or federal land management agency; and any other agency the Director deems appropriate.

F. Within 30 days of receipt of a notice from the Director that the application is complete, the applicant shall, in a form approved by the Director, give public notice of the application pursuant to 19.10.9 NMAC.

G. After notifying the applicant that the application is complete, the Director shall conduct a technical review of the closeout plan to determine if it is approvable. If the Director determines that the closeout plan is not approvable, the Director shall notify the applicant in writing of this determination, specifically describing each deficiency. The Director shall, upon submittal of additional information or changes, notify the applicant whether the resubmitted application is approvable or it continues to be deficient.

H. As soon as practicable after receiving notice that the closeout plan is approvable, the applicant shall submit a proposal for financial assurance in accordance with 19.10.12 NMAC.

I. The Director may approve a closeout plan subject to conditions necessary to meet the requirements of the Act and 19.10 NMAC.

J. The Director shall approve an application to incorporate a closeout plan or closeout plan for a portion of the mine if:

(1) the closeout plan and permit application are complete and the public participation requirements of 19.10.9 NMAC have been met;

(2) the closeout plan permit fee has been paid and the financial assurance is adequate and has been provided;

(3) the applicant has demonstrated that the work to be done will reclaim disturbed areas within the permit area to a condition that allows for the re-establishment of a self-sustaining ecosystem on the permit area following closure, appropriate for the life zone of the surrounding areas unless conflicting with the approved post-mining land use; provided that for purposes of 19.10.5 NMAC, upon a showing that achieving a post-mining land use or self-sustaining ecosystem is not technically or economically feasible or is environmentally unsound, the Director may waive the requirement to achieve a self-sustaining ecosystem or post-mining land use for an open pit or waste unit if measures will be taken to ensure that the open pit or waste unit will meet all applicable federal and state laws, regulations and standards for air, surface water and ground water protection following closure and will not pose a current or future hazard to public health or safety;

(4) the existing mining operation is on state or federal lands, the appropriate land management agency approves or acknowledges the proposed closeout plan if approval or acknowledgement by the land management agency is required under that agency's regulations;

(5) a written determination has been received from the Secretary of the Environment Department stating that the application has demonstrated that the activities to be permitted or authorized will be expected to achieve compliance with all applicable air, water quality, and other environmental standards if carried out as described in the closeout plan. This determination shall address applicable standards for air, surface water and ground water protection enforced by the Environment Department or for which the Environment Department is otherwise responsible;

(6) the applicant has submitted a notarized statement signed by the applicant that he agrees to comply with the performance and reclamation standards and requirements of the permit, 19.10 NMAC and the Act and allows the Director to enter the permit area without delay for the purpose of conducting inspections during mining and reclamation.

[7-12-94, 2-15-96; 19.10.5.506 NMAC - Rn, 19 NMAC 10.2.5.506, 05-15-2001; A, 05-31-2001]

19.10.5.507 PERFORMANCE AND RECLAMATION STANDARDS AND REQUIREMENTS:

A. The permit area will be reclaimed to a condition that allows for re-establishment of a self-sustaining ecosystem appropriate for the life zone of the surrounding areas following closure unless conflicting with the approved post-mining land use. Each closeout plan must be developed to meet the site-specific characteristics of the mining operation and the site. The closeout plan must specify incremental work to be done within specific time frames to accomplish the reclamation.

B. Waiver for Pits and Waste Units An operator may apply for a waiver for open pits or waste units from the requirement of achieving a post-mining land use or self-sustaining ecosystem. The operator must show that achieving a post-mining land use or self-sustaining ecosystem is not technically or economically feasible or is environmentally unsound. The Director may grant the waiver for an open pit or waste unit if he finds:

(1) measures will be taken to ensure that the open pit or waste unit will meet all applicable federal and state laws, regulations and standards for air, surface water and ground water protection following closure; and

(2) the open pit or waste unit will not pose a current or future hazard to public health or safety.

[7-12-94, 2-15-96; 19.10.5.507 NMAC - Rn, 19 NMAC 10.2.5.507, 05-15-2001]

19.10.5.508 NEW UNITS:

New discrete processing, leaching, excavation, storage or stockpile units located within the permit area of an existing mining operation and not identified in the permit of an existing mining operation, and for each expansion of such a unit identified in the permit for an existing mining operation that exceeds the design limits specified in the permit must meet the reclamation standard set forth in Subsection A of 19.10.5.507 NMAC above and must also comply with the standards and requirements set forth below. Site-specific characteristics, including the existing mining operation, must be considered in applying the standards and requirements.

A. Most Appropriate Technology and Best Management Practices The mining operation and the reclamation plan shall be designed and operated using the most appropriate technology and the best management practices.

B. Assure Protection The mining operation and completed reclamation shall meet the following requirements established to assure protection of human health and safety, the environment, wildlife and domestic animals.

(1) Signs, Markers and Safeguarding Measures will be taken, to safeguard the public from unauthorized entry into shafts, adits, and tunnels and to prevent falls from highwalls or pit edges. Depending on site-specific characteristics, the following measures shall be required:

- (a)** closing shafts, adits or tunnels to prevent entry;
- (b)** posting warning signs in locations near hazardous areas;
- (c)** restricting access to hazardous areas;
- (d)** marking the permit area boundaries;
- (e)** posting a sign at the main entrances giving a telephone number of a person to call in the event of emergencies related to the mine; or
- (f)** other measures as needed to protect human safety.

(2) Wildlife Protection Measures shall be taken to minimize adverse impacts on wildlife and important habitat. Based on site-specific characteristics, the following measures will be required:

- (a)** restricting access of wildlife and domestic animals to toxic chemicals or otherwise harmful materials;

(b) minimizing harm to wildlife habitat during mining; and

(c) reclaiming areas of wildlife habitat if not in conflict with the approved post-mining land use.

(3) Cultural Resources Cultural resources listed on or eligible for listing on the National Register of Historic Places or the State Register of Cultural Properties, and any cemeteries or burial grounds shall be protected until clearance has been granted by the State Historic Preservation Office or other appropriate authority.

(4) Hydrologic Balance Operations shall be planned and conducted to minimize negative impact to the hydrologic balance in both the permit and potentially affected areas.

(a) Operations shall be designed so that non-point source surface releases of acid or other toxic substances shall be contained within the permit area, and that all other surface flows from the disturbed area are treated to meet all applicable state and federal regulations.

(b) The disturbed areas shall not contribute suspended solids above background levels, or where applicable the Water Quality Control Commission's standards, to intermittent and perennial streams.

(c) To provide data to determine background levels for surface water entering the permit area, appropriate monitoring shall be conducted on drainages leading into the permit area.

(d) All diversions of overland flow shall be designed, constructed and maintained to minimize adverse impacts to the hydrologic balance and to assure the safety of the public.

(i) No diversion shall be located so as to increase the potential for landslides.

(ii) Unless site-specific characteristics require a different standard which is included in the approved permit, diversions which have watersheds larger than 10 acres shall be designed, constructed and maintained to safely pass the peak runoff from a 10-year, 24-hour precipitation event.

(iii) All diversion designs which have watersheds larger than 10 acres shall be certified by a professional engineer registered in New Mexico as having been designed in accordance with 19.10 NMAC. Diversion designs shall be kept on-site or otherwise be made available, upon request, to the Director for inspection.

(iv) When no longer needed, temporary diversions shall be removed and the disturbed area reclaimed.

(5) Stream Diversions When streams are to be diverted, the stream channel diversion shall be designed, constructed, and removed in accordance with the following:

(a) Unless site-specific characteristics require different measures to meet the performance standard and are included in the approved permit, the combination of channel, bank and flood plain configurations shall be adequate to safely pass the peak run-off of a 10-year, 24-hour precipitation event for temporary diversions, a 100-year, 24-hour precipitation event for permanent diversions;

(b) The design and construction of all intermittent and perennial stream channel diversions shall be certified as meeting 19.10 NMAC by a professional engineer registered in New Mexico. As-built drawings shall be completed promptly after construction and be retained on site or otherwise made available upon request to the Director; and

(c) When no longer needed, temporary stream channel diversions shall be removed and the disturbed area reclaimed.

(6) Impoundments If impoundments are required they shall be designed, constructed and maintained to minimize adverse impacts to the hydrologic balance and adjoining property and to assure the safety of the public.

(a) Unless site-specific characteristics require different measures to meet the performance standard and are included in the approved permit, impoundments having earthen embankments but not subject to the jurisdiction of the Mine Safety and Health Administration or the State Engineer shall:

(i) have a minimum elevation at the top of the settled embankment of 1.0 foot above the water surface in the pond with the spillway flowing at the design depth;

(ii) have a top width of the embankment not less than 6 feet;

(iii) have combined upstream and downstream side slopes of the settled embankment not less than 5 horizontal : 1 vertical with neither slope steeper than 2 horizontal : 1 vertical. Slopes shall be vegetated or otherwise stabilized to control erosion;

(iv) have the embankment foundation cleared of all vegetative matter, all surfaces sloped to no steeper than 1 horizontal : 1 vertical and the entire foundation area scarified;

(v) have fill material free of vegetative matter and frozen soil;

(vi) have spillways provided to safely discharge the peak runoff of a 25-year, 24-hour precipitation event, or an event with a 90-percent chance of not being exceeded for the design life of the structure;

(vii) have other site-specific design criteria for embankments as long as they result in a minimum static safety factor of 1.3 with water impounded to the design level;

(viii) be designed and certified by a professional engineer registered in New Mexico as having been designed and constructed in accordance with 19.10 NMAC. As-built drawings shall be completed promptly after construction and be retained on site or otherwise made available upon request to the Director; and

(viii) if necessary for sediment control, be in place before any other disturbance is made to the watershed for the impoundment.

(b) When no longer required, impoundments shall be graded to achieve positive drainage unless:

(i) the surface estate owner has requested in writing that they be retained;

(ii) they are consistent with the approved reclamation plan; and

(iii) they are appropriate for the post-mining land use or the self-sustaining ecosystem.

(7) Minimization of Mass Movement All man-made piles such as waste dumps, topsoil stockpiles and ore piles shall be constructed and maintained to minimize mass movement.

(8) Riparian and Wetland Areas Disturbance to riparian and wetland areas shall be minimized during mining. Adverse effects to riparian and wetland areas shall be mitigated during reclamation unless the mitigation conflicts with the approved post-mining land use.

(9) Roads Roads shall be constructed and maintained to control erosion.

(a) Drainage control structures shall be used as necessary to control runoff and to minimize erosion, sedimentation and flooding. Drainage facilities shall be installed as road construction progresses and shall be capable of safely passing a 10-year, 24 hour precipitation event unless site-specific characteristics indicate a different standard is appropriate and is included in the approved permit. Culverts and drainage pipes shall be constructed and maintained to avoid plugging, collapsing, or erosion.

(b) Roads to be constructed in or across intermittent or perennial streams require site-specific designs to be submitted with the permit application.

(c) Roads to be made permanent must be approved by the surface owner and be consistent with the approved post-mining land use.

(10) Subsidence Control Underground and in situ solution mining activities shall be planned and conducted, to the extent technologically and economically feasible, to prevent subsidence which may cause material damage to structures or property not owned by the operator.

(a) Underground and in situ solution mining activities near any aquifer that serves as a significant source of water supply to a public water system shall be conducted so as to avoid disruption of the aquifer and consequent exchange of ground water between the aquifer and other strata.

(b) Underground and in situ solution mining activities conducted beneath or adjacent to any perennial stream must be performed in a manner so that subsidence is not likely to cause material damage to streams, water bodies and associated structures.

(11) Explosives Blasting shall be conducted to prevent injury to persons or damage to property not owned by the operator. Fly rock shall be confined to the permit area. The Director may require a detailed blasting plan, pre-blast surveys or specify blast design limits to control possible adverse effects to structures.

C. Site Stabilization and Surface Configuration The permit area shall be stabilized, to the extent practicable, to minimize future impact to the environment and protect air and water resources. The final surface configuration of the disturbed area shall be suitable for achieving a self-sustaining ecosystem or approved post-mining land use.

(1) Final slopes and drainage configurations must be compatible with a self-sustaining ecosystem or approved post-mining land use.

(2) All reconstructed slopes, embankments and roads shall be designed, constructed and maintained to minimize mass movement.

(3) Measures must be taken to reduce, to the extent practicable, the formation of acid and other toxic drainage that may otherwise occur following closure to prevent releases that cause federal or state standards to be exceeded.

(4) Nonpoint source surface releases for acid or other toxic substances shall be contained within the permit area.

D. Erosion Control Reclamation of disturbed lands must result in a condition that controls erosion. Revegetated lands must not contribute suspended solids above

background levels to intermittent and perennial streams. Acceptable practices to control erosion include but are not limited to the following:

- (1) stabilizing disturbed areas through land shaping, berming, or grading to final contour;
- (2) minimizing reconstructed slope lengths and gradients;
- (3) diverting runoff;
- (4) establishing vegetation;
- (5) regulating channel velocity of water;
- (6) lining drainage channels with rock, vegetation or other geotechnical materials; and
- (7) mulching.

E. Revegetation To obtain the release of financial assurance revegetated lands must meet the following standards:

(1) Revegetation success for a self-sustaining ecosystem shall be determined through comparison of ground cover, productivity and diversity and shall be made on the basis of the following approved reference areas; through the use of technical guidance procedures published by the U. S. Department of Agriculture; other reasonably attainable standards approved by the Director; or a combination. Data collection shall be performed using the same methods and techniques on reference areas and reclaimed areas.

(a) foliar or basal cover and productivity of living perennial plants of the revegetated area shall be established equal to 90 percent of the reference area or equal to the approved revegetation standard to within a 90-percent statistical confidence;

(b) diversity of plant life forms (woody plants, grasses, forbs) shall consider what is reasonable based on the physical environment of the reclaimed area; and

(c) woody plant species shall be established to the approved density with an 80 percent statistical confidence.

(2) For areas for which the approved post-mining land use is for wildlife habitat or forest land, success of vegetation shall be determined on the basis of tree or shrub stocking (density) and ground cover.

(a) The ground cover of living perennial plants shall be equal to 90 percent of the native ground cover of the reference area or the approved standard to within a 90 percent statistical confidence and shall be adequate to control erosion.

(b) Tree stocking for forest land shall have stocking rates of plant species equal to 90 percent of the approved reference area or other approved standard with an 80 percent statistical confidence and shall be adequate to control erosion.

(c) If wildlife habitat is to be the post-mining land use, the operator shall select and use plant species on reclaimed areas based on the following criteria:

- (i) their proven nutritional value for fish and wildlife;
- (ii) their uses as cover and security for wildlife;
- (iii) their ability to support and enhance fish and wildlife habitat; and
- (iv) distribute plant life forms to maximize benefits of edge effect, cover and other benefits for fish and wildlife.

(3) Revegetation for other post-mining land shall be consistent with the approved post-mining land use. Site-specific standards may include standards for foliar or basal cover, production and diversity and will be included in the approved permit.

[7-12-94, 2-15-96; 19.10.5.508 NMAC - Rn, 19 NMAC 10.2.5.507.C, 05-15-2001]

19.10.5.509 COMPLIANCE WITH OTHER APPLICABLE LAWS:

A. Enforcement of other state or federal laws, regulation or standards shall be conducted by the agency charged with that responsibility under the applicable state or federal law, regulation or standard.

B. Enforcement of non-point source surface releases of acids or other toxic substances shall be performed by the Environment Department.

C. During the term of a permit issued pursuant to 19.10 NMAC, the permittee must maintain environmental permits required for the permit area. Revocation or termination of such a permit or the forfeiture of financial assurance related to the permit area by another governmental agency is adequate grounds for the Director to issue a cessation order pursuant to 19.10.11 NMAC.

[7-12-94, 2-15-96; 19.10.5.509 NMAC - Rn, 19 NMAC 10.2.5.508, 05-15-2001]

19.10.5.510 ANNUAL REPORT:

The permittee shall, on or before April 30 of each year after a permit has been issued, submit on a form provided by the Director a report for the preceding calendar year. The report must:

- A.** provide the status of the operation;
- B.** provide production figures for the operation;
- C.** identify, on a separate map(s), the location of the disturbed areas and if reclaimed, the year in which the work was done;
- D.** indicate the number of disturbed acres, number of acres reclaimed during the reporting year and the number of acres which have not yet been reclaimed;
- E.** indicate the current market value of any collateral posted as financial assurance in accordance with 19.10.12 NMAC; and
- F.** indicate compliance status for all existing state and federal environmental permits held by the permittee for this operation.

[7-12-94, 2-15-96; 19.10.5.510 NMAC - Rn, 19 NMAC 10.2.5.509, 05-15-2001]

19.10.5.511 PRIOR RECLAMATION:

A. The owner or operator of an existing mining operation who has completed some or all reclamation measures prior to July 12, 1994 may apply for an inspection of the reclaimed areas prior to August 31, 1994. This application shall be deemed to satisfy the deadline for a permit application for the areas covered as provided in Subsection A of 19.10.5.501 NMAC.

B. The Director shall release the owner or operator from further requirements of the Act and 19.10 NMAC if, after an inspection of the reclaimed areas, he determines that the reclamation measures satisfy the requirements of the Act and the substantive requirements for reclamation pursuant to 19.10 NMAC. The Director shall make the determination as soon as practicable, but not later than September 30, 1995. If the Director determines the reclamation measures do not satisfy the requirements of the Act and the substantive requirements for reclamation pursuant to 19.10 NMAC then, unless previously submitted, a permit application and closeout plan shall be submitted within 6 months after the owner or operator receives notice of the determination.

PART 6: NEW MINING OPERATIONS

19.10.6.1 ISSUING AGENCY:

New Mexico Mining Commission.

[19.10.6.1 NMAC – N, 05-15-2001]

19.10.6.2 SCOPE:

All persons subject to the New Mexico Mining Act NMSA 1978, Section 69-36-1 et. seq.

[19.10.6.2 NMAC – N, 05-15-2001]

19.10.6.3 STATUTORY AUTHORITY:

NMSA 1978, Section 69-36-1 et. seq.

[19.10.6.3 NMAC - N, 05-15-2001]

19.10.6.4 DURATION:

Permanent.

[19.10.6.4 NMAC - N, 05-15-2001]

19.10.6.5 EFFECTIVE DATE:

February 15, 1996, unless a later date is cited at the end of a section.

A. All references to the Mining Act Parts 1-13 in any other rule shall be understood as a reference to 19.10 NMAC.

B. The amendment and replacement of The Mining Act Parts 1-13 shall not affect any administrative or judicial enforcement action pending on the effective date of this amendment nor the validity of any permit issued pursuant to the Mining Act Parts 1-13.

[19.10.6.5 NMAC – N, 05-15-2001]

19.10.6.6 OBJECTIVE:

The objective of Parts 1-14 of 19.10 NMAC is to establish regulations to implement the New Mexico Mining Act as directed in NMSA 69-36-7A. These regulations are designed to ensure proper reclamation through permitting for operations subject to the Mining Act, in accordance with provisions and standards outlined in the Mining Act.

[19.10.6.6 NMAC - N, 05-15-2001]

19.10.6.7 DEFINITIONS:

[RESERVED]

[19.10.6.7 NMAC - N, 05-15-2001]

[Definitions for this part can be found in 19.10.1.7 NMAC.]

19.10.6.8-19.10.6.600 [RESERVED]:

[19.10.6.8 - 19.10.6.600 NMAC - N, 05-15-2001]

19.10.6.601 TIMING OF SUBMITTAL AND DEADLINES FOR OBTAINING APPROVAL:

A. Applications for permits for new mining operations operating pursuant to Section 69-36-5 of the Act shall be received by the Director by December 31, 1995. The Director may grant a six-month extension if the applicant has requested such and has shown good cause for the extension. Every new mining operation operating pursuant to Section 69-36-5 of the Act must have a permit approved by the Director by December 31, 1997.

B. Except as provided in Subsection A of 19.10.6.601 NMAC, after June 18, 1993, no person shall conduct a new mining operation without a permit issued by the Director.

C. Renewal applications shall be filed 120 days preceding expiration of the current permit.

[7-12-94, 2-15-96; 19.10.6.601 NMAC – Rn, 19 NMAC 10.2.6.601, 05-15-2001]

19.10.6.602 PERMIT APPLICATION REQUIREMENTS:

A. A minimum of six copies of applications for permits under this Part shall be submitted to the Director. The Director may require additional copies for distribution by the Director to other governmental agencies with an interest in, or jurisdiction over, elements of the proposed operation.

B. All information submitted to the Director shall be made available for public inspection and copying at the Director's office except as designated confidential. Information in the application which the applicant desires to keep confidential shall be clearly indicated and submitted separately from the rest of the application.

(1) If the operator designates as confidential an exploration map, financial information, information concerning the grade or location of ore reserves or trade secret information, the Director shall maintain the information as confidential and not subject to public records or disclosure laws.

(2) If a request is made for public review of the information held confidential, the Director shall notify the operator and provide a reasonable opportunity for substantiation of the claim that public disclosure of the information could harm the competitive position of the operator. If the claim is not substantiated to the satisfaction of the Director, the information shall be released.

(3) When a request is made for public review of information designated as confidential, the Director shall attempt to notify the operator within 24 hours of the request, and shall provide written notification by certified mail.

C. Each application shall be signed by the applicant or authorized agent of the applicant for the operation with the following certification made: I certify that I have personally examined and am familiar with the information submitted herein, and based on my inquiry of those individuals responsible for obtaining the information, I believe the submitted information is true, accurate, and complete.

D. Each application under this Part shall be in a format acceptable to the Director and shall contain the following:

(1) The name of the applicant to whom the permit may be issued.

(2) A map of the proposed permit area and a map and list, including names and addresses, of all known owners of surface and mineral estates within the proposed permit area as shown by the most recent county assessor's property tax schedule.

(3) Documents evidencing the applicant's right to enter the proposed permit area and conduct mining and reclamation.

(4) A listing of all parties, including addresses and telephone numbers, that have an ownership and controlling interests in the operation. Alternatively, the applicant may submit the applicant's most recent 10K form required by the United States Securities and Exchange Commission.

(5) A statement of all mining operations within the United States owned, operated or directly controlled by the applicant, owner or operator and by persons or entities that directly control the applicant and the names and addresses of regulatory agencies with jurisdiction over the environmental aspects of those operations and that could provide a compliance history for those operations over the preceding 10 years.

(6) The applicant shall designate an agent and provide the agent's street address for the service of notices and orders from the Director. This information shall be kept current if a permit is granted.

(7) To avoid duplication and conflicting requirements, the applicant may include information from environmental permit relevant to the application. Permits
