19.25.20.115 WATER MASTER DETERMINATION OF INTERFERENCE AND OFFSETS TO SURFACE WATER RIGHTS FROM EXERCISE OF PUEBLO WATER RIGHTS ON PUEBLO LANDS:

A. A Pueblo seeking a new or changed use of water under Pueblo future basin use water rights on that Pueblo's lands shall advise the water master, in writing, of any such proposed action at least 60 days before implementing the proposed action. Within 30 days of receiving notice of such a proposed action (or report of anticipated uses of water) under 19.25.20.114 NMAC, the water master shall determine and advise the Pueblo and other affected Pueblos and owners of record whether the proposed action interferes with Pueblo surface water rights or non-Pueblo surface water rights and the amount of any offsets that may be required to avoid interference. In making these determinations, the water master shall use the hydrologic model developed by the state of New Mexico and the United States.

B. A Pueblo whose proposed action is determined to cause interference shall offset the interference in the amount determined by the water master. Prior to implementing the proposed action, the Pueblo causing the interference shall notify the water master how it will offset any interference. Within 10 days of receiving such notification, the water master shall notify that Pueblo and any affected owners of record and other affected Pueblos whether the proposed actions are sufficient to offset any interference.

The Pueblo shall not implement the proposed action until the water master determines that the amount of the offset and the delivery method are sufficient to offset any interference.

C. The water master may work with the affected parties to resolve such matters either formally or informally and may discuss matters with one or more affected parties without the need to have all parties present.

D. If the hydrologic record after implementation of the proposed action does not support the water master's determination of interference and required offsets, an affected Pueblo or water right owner of record may request modification of the offset amounts. The Pueblo implementing the proposed action shall make the previously determined offsets until such time as the water master determines that a different amount is appropriate.

E. Provision of offset water by a Pueblo to avoid interference shall not constitute use of water under the Pueblo's first priority water rights. The Pueblos shall offset interference with Pueblo surface water rights and non-Pueblo surface water rights entitled to section 4 protection resulting from a Pueblo's provision of offset water.

[19.25.20.115 NMAC - N, 9/12/2017]

19.25.20.116 WATER MASTER DETERMINATION OF IMPAIRMENT TO GROUNDWATER RIGHTS FROM EXERCISE OF PUEBLO WATER RIGHTS ON PUEBLO LANDS:

A. Within 60 days of receiving notice of a proposed action (or report of anticipated uses of water) under 19.25.20.114 NMAC, the water master shall determine if any non-Pueblo groundwater rights will be impaired by a new use or change in use of water under Pueblo water rights on Pueblo lands. In making these determinations, the water master shall utilize the hydrologic model developed by the state of New Mexico and the United States.

B. Notice of any projected impairment shall be mailed to the affected owner of record by certified mail. The notice of impairment shall include a description of the factual or technical basis for the determination, and any recommended mitigation action such as drilling a replacement well or obtaining an alternate water supply. The water master shall post a notice of all projected impairments on the office of the state engineer's website, together with the reports on anticipated uses of water submitted by the Pueblos. Notice of all projected impairments shall also be mailed to the Governor of each Pueblo.

C. An owner of record that is not identified as being impaired by the uses identified in the Pueblos' reports on anticipated uses of water may within 60 days of the posting of the water master's notice of projected impairments on the office of the state engineer's website request in writing a hearing before the state engineer to demonstrate that their

groundwater rights will be impaired by the Pueblos' use of their first priority water rights and may seek reimbursement for the cost of mitigating the impairment from the mitigation fund in accordance with 19.25.20.118 NMAC.

D. The water master may identify owners of record that will be impaired in addition to those identified pursuant to Subsection A of this Section. The water master shall notify any additional affected owners of record and Pueblos in accordance with the provisions of this Section. Owners of record of water rights that are identified pursuant to this Subsection may seek reimbursement for the cost of mitigating the impairment from the mitigation fund in accordance with 19.25.20.118 NMAC.

[19.25.20.116 NMAC - N, 9/12/2017]

19.25.20.117 CHANGES TO POINT OF DIVERSION, PURPOSE OR PLACE OF USE OF PUEBLO WATER RIGHTS OR NEW EXERCISES OFF THAT PUEBLO'S LANDS:

A. By application to the state engineer, a Pueblo may change the point of diversion, purpose or place of use of its first priority water rights, including a lease of such rights to non-Pueblos, to a point of diversion, place or purpose of use off that Pueblo's lands within the NPT basin.

(1) Applications to the state engineer for use of Pueblo first priority water rights off that Pueblo's lands shall be governed by applicable statutory provisions and administrative rules.

(2) The water master shall determine if any Pueblo or non-Pueblo groundwater rights will be impaired by the granting of an application, and consider any remedies proposed by the Pueblos to reduce impacts on groundwater rights below the threshold for impairment.

(3) An application shall be denied if the proposed change will impair Pueblo or non-Pueblo water rights and remedies are not available to reduce groundwater effects below the level of impairment.

(4) The exercise of a Pueblo's first priority water rights on the lands of another Pueblo is not contrary to the conservation of water within the state or detrimental to the public welfare of the state. The exercise of a Pueblo's first priority water rights on non-Pueblo lands, in and of itself, is not contrary to the conservation of water in the state or detrimental to the public welfare of the state.

(5) An approval of a proposed change to a point of diversion, purpose or place of use off a Pueblo's land shall be conditioned to require offsets to avoid interference with Pueblo surface water rights or non-Pueblo surface water rights entitled to section 4 protection.

(6) Notice of the approval or denial of an application, and any required offsets, shall be mailed to the Pueblo tribal council or governor by certified mail, and posted on the state engineer's website.

(7) Non-Pueblo water rights eligible for section 4 protection shall not be curtailed to provide water for the new or changed exercise of future basin use rights under Pueblo alternative administration.

B. Applications to the state engineer for use of a Pueblo's state law water rights off that Pueblo's lands shall be governed by applicable statutes and administrative rules.

[19.25.20.117 NMAC - N, 9/12/2017]

19.25.20.118 MITIGATION FUND:

A. The New Mexico finance authority shall administer the mitigation fund. The unavailability of funds shall not affect the rights of the Pueblos to utilize their water rights.

B. Money in the mitigation fund may only be expended to mitigate the effects of impairment to non-Pueblo groundwater rights as determined in accordance with 19.25.20.116 NMAC, including reimbursement to non-Pueblo water rights owners of record for the cost to drill a replacement well or to obtain an alternative water supply.

C. An owner of record that is eligible for reimbursement from the mitigation fund pursuant to 19.25.20.116 NMAC may request reimbursement from the mitigation fund for the costs of mitigating the impairment. To request reimbursement, an owner of record shall:

(1) Within 30 days of the receipt of the notice of impairment or a favorable decision pursuant to 19.25.20.116 NMAC, notify the state engineer in writing of their intent to request reimbursement; and

(2) Within 90 days of the notification to the state engineer of their intent to request reimbursement, submit to the state engineer a proposal for mitigation of the impairment and estimated cost of the mitigation with supporting documentation. The state engineer may grant an extension of time to submit a mitigation proposal and estimated cost for good cause shown. The state engineer may request additional information as needed.

D. Within 60 days of receipt of the mitigation proposal and supporting documentation, the state engineer shall approve or disapprove of the mitigation proposal and estimated cost, and notify the owner of record of the determination by certified mail. The state engineer may rely on the documentation submitted by the owner of record or other information available to the office of the state engineer. If the

state engineer disapproves a mitigation proposal or cost estimate, the owner of record may request a hearing within 30 days of the notice of disapproval.

E. Within 90 days of completion of an approved mitigation proposal, the owner of record shall submit an accounting of the amount paid by the owner to mitigate the impairment of their water right.

F. Within 30 days of receipt of the accounting, the state engineer shall direct the New Mexico finance authority to reimburse the owner of record for the mitigation costs, and notify the owner of record of the amount of reimbursement by certified mail. The state engineer may limit the reimbursement to the amount of the approved estimate. An owner of record that is aggrieved by the state engineer's determination the amount of reimbursement from the mitigation fund may request a hearing within 30 days of the notice of the amount of reimbursement.

G. The New Mexico finance authority shall make expenditures from the fund in accordance with this Section and to pay for the finance authority's reasonable costs of administering the fund.

H. Payments from the mitigation fund shall be contingent upon the New Mexico finance authority receiving sufficient appropriations. Nothing in this rule establishes or creates any liability or responsibility on the part of the state to pay mitigation costs for impairment to non-Pueblo groundwater right owners of record as a result of new or changed Pueblo uses of water from any source other than the mitigation fund, nor shall the state have any liability or responsibility to make any payments if the balance in the fund is insufficient to cover those costs.

I. If the New Mexico finance authority determines that the mitigation fund balance is insufficient to reimburse the amount required to mitigate the effects of an impairment, the finance authority shall promptly notify that water right owner of record and the state engineer. Reimbursement shall be paid if and when sufficient amounts are available in the fund, subject to the provisions of this Section.

J. Money remaining in the fund at the end of any fiscal year shall not revert to the general fund but shall accrue to the mitigation fund and shall be used solely for the purposes set forth in this Section.

[19.25.20.118 NMAC - N, 9/12/2017]

19.25.20.119 PRIORITY ADMINISTRATION:

A. The water master may implement priority administration in the NPT water master district. Priority administration may be initiated by the state engineer as a result of the state engineer's independent determination that priority administration is necessary, as provided by 19.25.13.43 NMAC, and in response to a request for priority administration

by a water right owner of record, Pueblo, the United States as trustee for the Pueblos, or the interstate stream commission.

B. The forms of priority administration applicable in the NPT are described in Subsection C of 19.25.13.7 NMAC, which include direct flow administration, storage water administration, depletion limit administration, and alternative administration. Depletion limit administration and alternative administration are the two forms of administration applicable when the exercise of groundwater rights is causing a surface water owner of record to not receive the water to which the surface water right owner of record is entitled.

C. Sections 2.4.4.5, 3.1.7.2 and 4 of the settlement agreement constitute Pueblo alternative administration that has been accepted by the state engineer as between the Pueblos' first priority rights and the water rights of the non-Pueblo settlement parties. Section 4.1.2 of the settlement agreement constitutes alternative administration that has been accepted by the state engineer of the Pueblo of Tesuque's existing basin use rights.

D. Non-settlement parties' water rights shall only be curtailed under Pueblo alternative administration to the extent such curtailment would occur without the settlement agreement.

E. Non-settlement parties seeking priority administration shall have the same rights and benefits that would be available without the settlement agreement.

[19.25.20.119 NMAC - N, 9/12/2017]

19.25.20.120 ESSENTIAL INDOOR HOUSEHOLD USES NOT SUBJECT TO CURTAILMENT:

Essential indoor household uses from domestic wells shall not be curtailed under priority or Pueblo alternative administration. Essential indoor household uses include drinking, cooking, indoor cleaning, sanitary, and cooling purposes, and exclude all uses made outside of a building.

[19.25.20.120 NMAC - N, 9/12/2017]

19.25.20.121 ALTERNATIVE ADMINISTRATION OF THE PUEBLO OF TESUQUE'S EXISTING BASIN USE RIGHTS:

Under alternative administration of the first priority of the Pueblo of Tesuque's existing basin use rights, the curtailment of non-Pueblo surface water rights entitled to protection under section 4 of the settlement agreement whose points of diversion on the Rio Tesuque are upstream from the Pueblo of Tesuque's southern boundary ("upstream acequias"), shall be limited to the extent necessary to provide a diversion amount by the Pueblo of Tesuque from the Rio Tesuque for irrigation of 71 acres of Pueblo land (71

acres x 4.65 AFA/Y=330.15 AFY). To ensure that the Pueblo of Tesuque receives the 330.15 AFY, the Pueblo of Tesuque and the upstream acequias have agreed that:

A. Upstream acequias may proceed with lawful diversions if, for a period of more than 48 hours:

(1) the USGS 08302500 Tesuque Creek Above Diversions gage indicates a flow of 3 cubic feet per second ("cfs") or more, or

(2) the USGS No.08308050 Rio Tesuque Below Diversions gage, at or near the Pueblo's southern boundary, indicates a flow of 1.5 cfs or more.

B. Upstream acequias shall reduce or cease their diversions as specified by the water master if the USGS 08302500 Tesuque Creek Above Diversions gage indicates a flow of less than 3 cfs and the USGS No. 08308050 Rio Tesuque Below Diversions gage, at or near the Pueblo's southern boundary indicates a flow of less than 1.5 cfs but more than 0.8 cfs.

C. Upstream acequias will cease all diversions and will allow all water in the Rio Tesuque to flow down to the Pueblo boundary if for a period of 48 hours, the USGS 08302500 Tesuque Creek Above Diversions gage indicates a flow of less than 1.5 cfs, or the USGS No. 08308050 gage, at or near the Pueblo's southern boundary, indicates a flow of less than 0.8 cfs.

[19.25.20.121NMAC - N, 9/12/2017]

19.25.20.122 IDENTIFICATION AND REPORTING OF NON-PUEBLO IRRIGATED ACREAGE WHICH MAY NO LONGER BE ELIGIBLE FOR SECTION 4 PROTECTION:

A. The water master shall each year compile a list of non-Pueblo lands with surface water irrigation rights that were not irrigated in the past calendar year and that may no longer be eligible for section 4 protection.

B. The list shall include the names and addresses of the current owners of record as they are shown in subfile orders and the records of the office of the state engineer, a description of the location and amount of the non-irrigated acreage, and the number of consecutive years that the acreage has not been irrigated.

C. This list shall be made available for review on the state engineer's website and at the district VI office of the water rights division of the office of the state engineer, and shall be provided to each Pueblo and the United States by July 1 of the following year.

D. After four consecutive years of non-use, the water master shall provide written notice to the owner of record that the water right may no longer be eligible for section 4

protection if the water right is not put to beneficial use within one year, subject to the exceptions described in Subsection C of 19.25.20.123 NMAC.

E. If the water right is not put to beneficial use for more than five consecutive years the irrigation water right is no longer eligible for section 4 protection, unless the owner of the water right demonstrates that (1) such non-use is due to circumstances beyond the control of the water right owner and (2) that the water could not be placed to beneficial use by the owner's diligent efforts.

[19.25.20.122 NMAC - N, 9/12/2017]

19.25.20.123 VOLUNTARY ALTERNATIVE ADMINISTRATION:

A. In addition to Pueblo alternative administration, voluntary alternative administration may be accepted by the water master if the criteria below are met. Voluntary alternative administration may include shortage sharing, such as, but not limited to, percentage division or pro rata allocation, rotation of water use, and reduced diversions. The owners of record of administrable water rights subject to priority administration may request that the water master implement a voluntary form of alternative administration by submitting a written plan to the water master that includes:

(1) an agreement by the owners of record to the terms and conditions of the plan;

(2) the name, address and phone number, and electronic mail address, if applicable, of the person designated as the contact person for the owners of record, or in the case of an acequia, the mayordomo of the ditch;

(3) a description of the water rights included in the plan, the proposed operation of the plan, the specific steps required of the water master to administer the plan, and requirements for reporting the progress of the plan to the water master; and

(4) a demonstration, through accurate analysis using analytic tools acceptable to the water master, that the implementation of the plan will:

(a) economically and satisfactorily apportion the available water supply among owners of record who have agreed to the alternative administration plan;

(b) not impair the administrable water rights of owners of record who are not participating in, or have not agreed to, the alternative administration plan;

(c) not be contrary to conservation of water in the State; and

(d) not be detrimental to the public welfare of the State.

B. The water master shall not implement an alternative administration plan if:

(1) other owners of record of administrable water rights that may be affected by the alternative administration plan object to its implementation, unless the water master determines that the objection is without merit;

(2) one or more owners of record of the administrable water rights subject to the plan rescinds his agreement in writing; or

(3) the water master cannot adequately administer or supervise the alternative administration plan in a manner that ensures that the plan will:

(a) economically and satisfactorily apportion the available water supply among owners of record who have agreed to the alternative administration plan;

(b) not impair the administrable water rights of owners of record who are not participating in, or have not agreed to, the alternative administration plan;

(c) not be contrary to conservation of water in the State; and

(d) not be detrimental to the public welfare of the State.

C. Periods of time during which non-Pueblo acreage with an appurtenant water right is not irrigated because of the implementation of an alternative administration plan shall not be counted as part of any period of non-use that may support a determination that the water right is no longer eligible for protection under section 4.

D. Nothing in this Section prevents the water master from exercising his authority and duties set forth in Section 19.25.20.101 NMAC.

[19.25.20.123 NMAC - N, 9/12/2017]

19.25.20.124 APPORTIONMENT OF WATER BY ACEQUIAS:

Upon notice to the water master of an agreement between acequias taking water from the same source or river for the apportionment and distribution of water for their respective ditches in accordance with Section 73-2-47 NMSA 1978, the water master may recognize the agreement as a form of voluntary alternative administration under this rule.

[19.25.20.124 NMAC - N, 9/12/2017]

19.25.20.125 ALLOCATION OF WATER BY THE BUREAU OF RECLAMATION, POJOAQUE VALLEY IRRIGATION DISTRICT:

Nothing in this rule shall be construed as an assertion by the state engineer of jurisdiction over the process used by the United States bureau of reclamation, the Pojoaque Valley irrigation district, and the Pueblos to allocate storage water prior to

release from Nambé reservoir to members of the Pojoaque Valley irrigation district and the Pueblos.

[19.25.20.125 NMAC - N, 9/12/2017]

CHAPTER 26: SURFACE WATER

PART 1: GENERAL PROVISIONS [RESERVED]

PART 2: ADMINISTRATION

19.26.2.1 ISSUING AGENCY:

Office of the State Engineer.

[19.26.2.1 NMAC - N, 1/31/2005]

19.26.2.2 SCOPE:

The administration of all natural waters flowing in streams and watercourses, and supplemental groundwater, within the limits of the state of New Mexico.

[19.26.2.2 NMAC - N, 1/31/2005]

19.26.2.3 STATUTORY AUTHORITY:

Chapter 72, Articles 1, 2, 5, 6, 7 and 9, NMSA. Section 72-1-1 NMSA provides that all natural waters flowing in streams and water courses belong to the public and are subject to appropriation for beneficial use. Section 72-2-1 NMSA gives the state engineer general supervision of waters of the state and of the measurement, appropriation and distribution thereof and such other duties as required. Section 72-2-8 NMSA gives the state engineer authority to adopt regulations and codes to implement and enforce any provision of any law administered by him and also provides the state engineer with authority to issue orders necessary to implement his decisions and to aid him in the accomplishment of his duties. Section 72-2-9 NMSA gives the state engineer authority over and supervision of the apportionment of water in this state according to the licenses issued by him and his predecessors and the adjudications of the courts. Section 72-9-1 NMSA gives the state engineer authority to regulate reservoirs, canals, pipelines or other works and the rights of the owners thereof. Nothing in these rules shall be construed so as to limit the state engineer's authority to take lawful alternative or additional actions relating to the management of surface water resources.

[19.26.2.3 NMAC - N, 1/31/2005]

19.26.2.4 DURATION:

Permanent.

[19.26.2.4 NMAC - N, 1/31/2005]

19.26.2.5 EFFECTIVE DATE:

January 31, 2005, unless a later date is cited at the end of a section.

[19.26.2.5 NMAC - N, 1/31/2005]

19.26.2.6 OBJECTIVE:

To establish standards and procedures implementing the duties of the state engineer as set forth by statute and further defined by judicial decisions to supervise and administer the appropriation, allocation, and use of surface water and supplemental groundwater of the state.

[19.26.2.6 NMAC - N, 1/31/2005]

19.26.2.7 DEFINITIONS:

Unless defined below or in a specific section of these regulations, all other words used herein shall be given their customary and accepted meaning.

A. Abandonment: The loss of a water right based on the nonuse of water and the intent by the water right owner to permanently relinquish or forsake the right.

B. Acequia: An irrigation ditch managed and maintained by the local community it serves. Acequias and community ditch associations are considered legal subdivisions of the state pursuant to Section 73-2-28 NMSA.

C. Acre-foot: A volume of water sufficient to cover one (1) acre of land one (1) foot deep. One acre-foot is equal to 43,560 cubic feet or 325,851 gallons.

D. Beneficial use: The direct use or storage and use of water by man for a beneficial purpose including, but not limited to, agricultural, municipal, commercial, industrial, domestic, livestock, fish and wildlife, and recreational uses. Beneficial use shall be the basis, the measure, and the limit of a water right.

E. Certificate of construction: A document issued by the state engineer which recognizes that construction of the works has been in accordance with the permit.

F. Community ditch: An irrigation ditch managed and maintained by the local community it serves. Acequias and community ditch associations are considered legal subdivisions of the state pursuant to Section 73-2-28 NMSA.

G. Consumptive irrigation requirement (CIR): The quantity of irrigation water, expressed as a depth or volume, exclusive of effective rainfall, that is consumptively used by plants or is evaporated from the soil surface during one calendar year. The consumptive irrigation requirement (CIR) may be numerically determined by subtracting effective rainfall from the consumptive use.

H. Consumptive use: The quantity of water consumed during the application of water to beneficial use. The quantity of water beneficially consumed depends on the requirements of a particular enterprise and how it applies and consumes the water. The authorized diversion of water that is not beneficially consumed in the course of water use is not part of the allowable consumptive use allocation of the water right. The consumptive use of water by a crop (evapotranspiration) does not include depletions such as evaporation from canals, ditches or irrigated fields during surface application, transpiration by vegetation along ditches, evaporation or leakage from irrigation water pipes, evaporation of sprinkler spray and drift losses, and evaporation of runoff and seepage from irrigated fields.

I. Dam: A man-made barrier constructed across a watercourse or off-channel for the purpose of storage, control, or diversion of water.

J. Effective rainfall: The average rainfall during the growing period of a crop that becomes available to help meet the consumptive use of water by the crop.

K. Duty of water (farm delivery requirement): The average quantity of water that is delivered on an annual basis to the farm headgate or is diverted from a source of water that originates on the farm itself - such as a well or spring - to satisfy the consumptive irrigation requirement of crops grown on a farm. In practice, the farm delivery requirement is estimated by dividing the crop irrigation requirement by the irrigation efficiency.

L. Forty-year planning entity: A municipality, county, state university, member-owned community water system, special water users' association, or public utility supplying water to a municipality or county which is allowed a water use planning period of not to exceed forty years pursuant to Section 72-1-9 NMSA.

M. Headgate: A mechanism in a dam or ditch that controls the flow of water through the outlet.

N. Hearing: An administrative proceeding on an order entered by the state engineer, or the filing of an application, protest, aggrievance or other pleading, in which parties may present evidence according to the rules and procedures contained in 19.25.2 NMAC.

O. Historical supply: The average quantity of water historically available from a specific source at the point of diversion to meet the farm delivery requirement. Historical supply is expressed as a percentage of the total farm delivery requirement.

P. Impoundment: Any man made or modified structure or diversion works intended for the retention or detention of water, including but not limited to livestock water tanks, sumps, spring boxes, subsurface excavations, metal tanks, ponds and dams.

Q. Infiltration gallery: Constructed works laid in, adjacent to, or below a streambed or spring source that intercepts surface water.

R. Irrigation efficiency: The portion of the duty of water, expressed as a percentage, consumed to meet the crop irrigation requirement.

S. License: A document issued by the state engineer after final proof of application of water to beneficial use has been filed and inspection has been completed that confirms the extent of diversion and beneficial use of water made in conformance with permit conditions.

T. Livestock: All domestic or domesticated animals that are used or raised on a farm or ranch, including exotic animals in captivity and includes horses, asses, mules, cattle, sheep, goats, swine, bison, poultry, ostriches, emus, rheas, camelids and farmed cervidae. Livestock does not include canine or feline animals.

U. Livestock water impoundment: Any impoundment used exclusively for watering livestock.

V. Perennial stream: A stream or reach of a stream that flows continuously throughout the year. Under extreme conditions such as severe drought some streams considered perennial may not contain water.

W. Permit: A document issued by the state engineer that authorizes the diversion of water from a specific point of diversion, for a particular beneficial use, and at a particular place of use, in accordance with the conditions of approval. A permit allows the permittee to develop a water right through the application of water to beneficial use, in conformance with the permit's conditions of approval. A permit in itself does not constitute a water right.

X. Point of diversion: The location of constructed works where water is diverted from a stream, watercourse, or well.

Y. Project diversion requirement or off-farm diversion requirement: When the source of water does not originate on the farm, the project diversion requirement or off-farm diversion requirement is the average quantity of water that is diverted from an off-farm source to satisfy the farm delivery requirement for one calendar year.

Z. Proof of application of water to beneficial use: A document filed with the state engineer by a permittee demonstrating the actual beneficial use to which water has been applied under a permit.

AA. Rate of diversion: The instantaneous measurement of water being taken from a stream, watercourse, or well.

BB. Spring: A site where surface water flows freely from the ground under natural conditions. The flow at land surface may be perennial or intermittent in nature.

CC. Stream system: The surface waters of a river or stream and all groundwater hydrologically connected to those surface waters.

DD. Surface water: Water found in any watercourse including impoundments, ponds, lakes, reservoirs, springs, streams and rivers or flows obtained from an infiltration gallery.

EE. Water right: The legal right to appropriate water for a specific beneficial use. The elements of a water right generally include owner, point of diversion, place of use, purpose of use, priority date, amount of water, periods of use, and any other element necessary to describe the right. A permitted or declared right is considered to be a valid water right only to the extent water has been legally placed to beneficial use.

FF. Watercourse: Any river, creek, arroyo, canyon, draw or wash, or any other channel having definite banks and bed with visible evidence of the flow of water.

[19.26.2.7 NMAC - N, 1/31/2005]

19.26.2.8 DECLARATION OF A WATER RIGHT DEVELOPED PRIOR TO MARCH 19, 1907:

All water rights established by beneficial use in New Mexico prior to March 19, 1907, were recognized and confirmed by the state constitution at the time of its adoption. Any person, firm or corporation claiming to be the owner of a water right established prior to March 19, 1907, from any surface water source may file a declaration on a form prescribed by the state engineer setting forth the history and continuity of the beneficial use to which said water has been applied. A declaration may be accompanied by a map prepared pursuant to 19.26.2.26 NMAC and may be accompanied by deeds, survey plats, affidavits and other evidence tending to substantiate the claim. If such supporting documents are filed with the state engineer, they will be filed together with the declaration. The declaration may be filed by the declarant on his personal information and belief. No declarations will be accepted for filing within any stream system where an adjudication court has entered an order or decree that operates to bar such claims.

A. Form - content: A declaration shall be filed on a form prescribed by the state engineer. The declaration shall include the following information: the name and address of the declarant, the owner of the land on which the water is used, legal descriptions for the point of diversion and the place of use, the purpose of use, quantity of water used, periods of use, the date water was first applied to beneficial use and the continuity thereof, and any other information deemed necessary by the state engineer. The point

of diversion shall be described using latitude and longitude or the New Mexico state plane coordinate system. The declarant shall sign the declaration before a notary.

B. Amended declaration: An amended declaration may be filed to supplement the evidence substantiating the claim or to correct any clerical errors in the initial declaration. An amended declaration that changes the purpose of use or amount of water, or that is filed after an application affecting the declared water right has been filed, will only be accepted for filing if substantial and specific documentation supporting the change(s) is filed with the amended declaration. The state engineer will not accept an amended declaration after an application affecting the declared rights has been acted upon by the state engineer in accordance with Subsections F and H of 19.26.2.12 NMAC or 19.25.2 NMAC. An amended declaration may be accompanied by deeds, survey plats, affidavits and other evidence to further substantiate the claim.

C. Filing fee: A fee of \$10 must accompany a declaration, with or without attachments. An amended declaration requires a fee of \$25 with or without attachments. After a declaration has been accepted for filing, submission of any other document associated with the declaration, which becomes a part of the permanent water right record, requires a fee of \$5.00.

D. Action of the state engineer: Upon receipt of a declaration or amended declaration a preliminary investigation may be performed by the state engineer. If this preliminary investigation reveals deficiencies in the declaration or amended declaration, the declaration may be returned to the declarant. If the declaration is accepted for filing by the state engineer, the acceptance does not constitute validation of the right claimed. The declaration may be recorded by the declarant in the office of the county clerk of the county wherein the diversion works are located.

[19.26.2.8 NMAC - N, 1/31/2005]

19.26.2.9 NOTICE OF INTENTION TO FILE APPLICATION FOR PERMIT TO APPROPRIATE SURFACE WATER:

A notice of intention to file an application for permit to appropriate surface water may be filed for the purpose of establishing priority of application. The application shall be prepared and filed within one year of the date of filing of the notice. A notice of intention to file an application for permit to appropriate surface water, automatically expires at the end of one year if an application as described in the notice of intention is not filed.

A. Form - content: A notice of intention to file application for permit to appropriate surface water shall be filed on a form prescribed by the state engineer. A notice of intention shall include the following information: the name and address of the applicant, the use to which the water will be applied, the amount of water required for the proposed use, legal descriptions for the point of diversion and the place of use, the method of conveyance, and the annual water use schedule. The point of diversion shall

be described using latitude and longitude or the New Mexico state plane coordinate system. If a notice lacks any of this information, it may be returned for completion.

B. Filing fee: A fee of \$25 must accompany the notice of intention to file an application.

C. Rejection of notice of intention: When the state engineer is of the opinion that there is no unappropriated surface water available, the notice of intention shall be rejected or refused.

[19.26.2.9 NMAC - N, 1/31/2005]

19.26.2.10 APPLICATION FOR PERMIT TO APPROPRIATE SURFACE WATER:

Any appropriation of surface water initiated on or after March 19, 1907 requires a valid permit issued by the state engineer. Any person, firm, corporation, public or private, or any other entity intending to appropriate surface water shall file an application on a form prescribed by the state engineer. Except where a notice of intention is filed, the date of filing of an application for permit to appropriate establishes the priority of application. Application maps (see 19.26.2.25 NMAC), preliminary surveys, design data and additional information shall be included with an application to provide all essential facts relating to the request.

A. Form - content: An application to appropriate surface water shall be filed on a form prescribed by the state engineer. The application shall include the following information: the name and address of the applicant, the proposed use, the annual diversion of water requested for the proposed use, legal descriptions of the point of diversion and the place of use, the method of conveyance, the annual diversion schedule, and other information the state engineer may deem necessary. The point of diversion shall be described using latitude and longitude or the New Mexico state plane coordinate system.

B. Filing fee: An application to appropriate surface water shall be accompanied with filing fees as follows:

(1) \$25 for a rate of diversion amount not to exceed five (5) cubic feet of water per second;

(2) \$25 plus \$5 for each additional cubic foot per second over five (5) cubic feet per second, unless the appropriation is for power generation purposes and the amount of water diverted is returned to the river bed in substantially undiminished quantity, in which case, the filing fee shall be \$25 plus \$1 for each additional cubic foot per second required;

(3) \$10 for each one thousand (1000) acre-feet, or fraction thereof, of storage capacity if the request is primarily for storage of excess and flood water;

(4) For a canal or other water conduit, \$25 where the capacity does not exceed fifty (50) cubic feet of water per second, and \$10 for each additional fifty (50) cubic feet per second or fraction thereof.

(5) Additional required fees for examining plans and specifications for dams and for inspection of dam sites are described in 19.25.12 NMAC.

[19.26.2.10 NMAC - N, 1/31/2005]

19.26.2.11 CHANGES TO DECLARED, PERMITTED, LICENSED OR ADJUDICATED RIGHTS:

Any change in point of diversion, place of use, or purpose of use of declared, permitted, licensed, or adjudicated surface water rights may be made only upon issuance of a permit by the state engineer. The owner of record of a water right must be the applicant or co-applicant on an application. An access agreement shall accompany an application if the applicant is not the owner of the land on which a new point of diversion is proposed.

A. Application for permit to change point of diversion: A permit from the state engineer is required to change any point of diversion. A point of diversion may be changed within a stream system without losing the priority of the right if such change can be made without detriment to existing surface water rights or impairment to existing ground water rights, and is not contrary to the conservation of water within the state nor detrimental to the public welfare of the state.

(1) **Form - content:** The owner of record of a water right shall file an application on a form prescribed by the state engineer. An application shall include the following information: the name and address of applicant, the pertinent state engineer file numbers, the source of water supply for the move-from point of diversion, the source of water supply for the move-to point of diversion, the priority date of the water right, the diversion amount, the consumptive use amount, the purpose of use, the reason for change, the legal description of the place of use, the location of the present point of diversion, the location of proposed point of diversion, and other information the state engineer deems necessary. The locations of the move-from and move-to points of diversion shall be described using latitude and longitude or the New Mexico state plane coordinate system. An application for a change in point of diversion of a water right into or out of an acequia or community ditch shall include the documentary evidence required by Subsection F of 19.26.2.11 NMAC.

(2) **Filing fee:** A fee of \$100 must accompany each application.

B. Application for permit to change place and/or purpose of use: A permit from the state engineer is required to change the place and/or purpose of use of all or any part of a water right. If the applicant is not the landowner, written consent by the owner of the land upon which water rights are appurtenant must accompany the application.

Water rights may be transferred within a stream system without losing the priority of the right if such change can be made without detriment to existing surface water rights or impairment to existing ground water rights, and is not contrary to the conservation of water within the state nor detrimental to the public welfare of the state. For applications proposing to change the purpose of use, only the consumptive use established and available at the move-from location may be considered for transfer to the new purpose of use. In the context of permits and declarations, only that amount of water that has been legally placed to actual beneficial use may be considered for a change in place and or purpose of use.

(1) Form - content: The owner of record of a water right shall file an application on a form prescribed by the state engineer. The application shall include the following information: the name and address of applicant, the pertinent state engineer file numbers, the source of water supply, the priority date of the water right, the location of the point(s) of diversion, the present diversion amount, the present consumptive use amount, the present purpose of use, the reason for change, the legal description of the present place of use, the proposed diversion amount, the proposed consumptive use amount, the proposed purpose of use, the legal description of the proposed place of use and other information the state engineer deems necessary. The point of diversion shall be described using latitude and longitude or the New Mexico state plane coordinate system. An application for a change in place and/or purpose of use of a water right into or out of an acequia or community ditch shall include the documentary evidence required by Subsection F of 19.26.2.11 NMAC.

(2) Filing fee: A fee of \$100 must accompany each application.

(3) Appurtenance: No irrigation right shall be assigned or transferred apart from the land, and title to land may not be transferred apart from appurtenant water rights, except in the manner specifically provided in Sections 72-1-2, 72-5-22, and 72-5-23 NMSA.

C. Application for permit to drill and use a well to supplement a surface water right: Within declared underground water basins an application for a permit from the state engineer is required to drill a well and use the groundwater to supplement any part of a surface water right. Surface water rights may be supplemented with groundwater provided that groundwater is available for appropriation and such change can be made without impairment to existing water rights, is not contrary to conservation of water within the state, and is not detrimental to the public welfare of the state. In the context of declared, permitted, licensed, or adjudicated surface water rights, only that amount of water that has been historically and legally placed to beneficial use from the surface source may be supplemented with groundwater. In no event shall the combined diversion from the surface source and supplemental well exceed the historical supply. Upon approval of a supplemental well, the state engineer shall require metering and reporting of diversions from both sources.

(1) Form - content: The owner of record of a water right shall file an application on a form prescribed by the state engineer. An application shall include the following information: the name and address of applicant, the pertinent state engineer file numbers, the source of surface water supply, the priority date of the surface water right, the location of the surface water point of diversion, the diversion amount, the consumptive use amount, the purpose of use, the legal description of the place of use, the reason for the supplemental well, the location of the proposed well, and other information the state engineer deems necessary. The proposed supplemental well shall be described using latitude and longitude or the New Mexico state plane coordinate system. If an application lacks any of this information, it may be returned to the applicant for completion.

(2) Filing fee: A fee of \$100 must accompany an application.

(3) Emergency supplemental wells: Emergency authorization to drill and use a well to supplement a primary surface water rights is not authorized in statute and will not be considered.

D. Emergency change in point of diversion, storage or use of an existing water right: Written authorization from the state engineer is required for an emergency change in point of diversion, storage, or use of water. Emergency authorization may be requested upon the filing of an application and an affidavit showing that an emergency exists in which the delay caused by awaiting publication or hearing would result in crop loss or other serious economic loss. The state engineer may grant the authorization if he determines, after preliminary review, that no foreseeable detriment will occur to existing water rights of other ownership. Within thirty (30) days of an authorization granted by the state engineer, if notice of the application has not already been published, the applicant shall publish the notice in accordance with 19.26.2.12 NMAC. The emergency authorization shall continue in effect as conditioned in the emergency authorization or until the state engineer enters a final decision on the application, whichever occurs first. The emergency authorization will be revoked upon violation of any condition of the emergency authorization. Issuance of the authorization does not obligate favorable consideration by the state engineer on the pending application. A request for an emergency change in the point of diversion or place or purpose of use of a water right into or out of an acequia or community ditch shall include the documentary evidence required by Subsection F of 19.26.2.11 NMAC.

E. Return flow credit: Surface water return flow is that percentage of the total diversion of surface water that has been applied to beneficial use pursuant to a water right or permit and returned to the same surface water stream from which it was appropriated. In no instance may a return flow credit allow an increase in the authorized consumptive use amount, impair existing water rights, be contrary to the conservation of water within the state, or be detrimental to the public welfare of the state. A permit from the state engineer is required to receive return flow credit. An application for return flow shall be accompanied by a return flow plan. Upon review of a return flow application and plan, the state engineer may request additional information, correction, clarification,

modification, or other revision as deemed necessary. The permittee has the final burden of demonstrating return flow. The state engineer may approve an application for return flow if the permitted, licensed, or adjudicated consumptive use amount is not increased, the return flow does not violate any applicable standards, regulations, or permits promulgated pursuant to the New Mexico Water Quality Act, or the federal Clean Water Act, and the requirements of 19.26.2.12 NMAC have been satisfied.

(1) Form - content: An application shall be filed on a form prescribed by the state engineer. An application shall include the following information: the name and address of applicant, the pertinent state engineer file numbers, the source of water supply, the priority date of the water right, the location of point of diversion, the authorized diversion amount, the authorized consumptive use amount, the purpose of use, the legal description of the place of use, the proposed diversion amount, the location of the return flow back to the source, the measurement technique employed to quantify the total diversion, the measurement technique employed to quantify the return flow, proof of any applicable New Mexico environment department or other discharge permits, and other information the state engineer deems necessary. The location of the point of diversion and the location of return flow back to the source shall be described using latitude and longitude or the New Mexico state plane coordinate system.

(2) Filing fee: A fee of \$100 must accompany an application.

(3) Return flow plan: The permittee shall demonstrate any return flow claimed by submitting a return flow plan acceptable to the state engineer. The actual timing and amount of return flows shall be demonstrated by acceptable field measurement. The plan shall describe the hydrologic conditions and must substantiate the return flow sought by a method acceptable to the state engineer.

(4) Monitoring, reporting and continuing jurisdiction: All approved permits for return flow credit shall require monitoring and annual reporting. The state engineer shall retain jurisdiction over all return flow credit permits and may revise return flow credits as deemed appropriate. The amount of return flow credit may be administered on a year-to-year basis. Return flow credits shall not accrue and may not be carried over to the following year. In the event of changes in established patterns of water use, appropriately revised return flow plans may be required in order to receive continued consideration for return flow credit.

F. Additional application requirements for water rights associated with acequias or community ditches: In addition to the requirements of Subsections A, B, C, and D of 19.26.2.11 NMAC, an application for a change, including an emergency change in point of diversion or place or purpose of use of a water right into or out of an acequia or community ditch subject to Sections 73-2-1 through 73-2-68 and Sections 73-3-1 through 73-3-11 NMSA, shall include the documentary evidence of the applicant's compliance with the requirements of Section 72-5-24.1 NMSA. The documentary evidence shall include a copy of the applicant's written request to the commissioners of the acequia or community ditch for approval of the proposed change,

together with the evidence that the request was delivered to the commissioners by certified mail; and one of the following:

(1) documentary evidence provided by the commissioners of the acequia or community ditch showing that the applicant has complied with all applicable requirements duly adopted by the acequia or community ditch pursuant to Sections 73-2-21 or 73-3-4.1 NMSA; or

(2) an affidavit provided by the commissioners of the acequia or community ditch stating that the acequia or community ditch has not adopted any requirements pursuant to Sections 73-2-21 or 73-3-4.1 NMSA; or

(3) an affidavit provided by the applicant stating that the acequia failed to make a decision in response to the applicant's written request for approval of the proposed change within one hundred and twenty (120) days after the applicant mailed the request to the commissioners by certified mail.

G. Additional changes requiring permit: Any other change requiring a permit from the state engineer not specifically covered by this section shall conform generally to this section and the rules and regulations of the office of the state engineer.

[19.26.2.11 NMAC - N, 1/31/2005]

19.26.2.12 APPLICATION PROCESSING:

This section describes the process in which applications filed pursuant to 19.26.2.10 or 19.26.2.11 NMAC will be processed.

A. Return of application: The state engineer may return an application to the applicant, with a statement of corrections required, if the application is found to be faulty or incomplete. If the application is returned to the state engineer with the necessary information within sixty (60) days from the date the application is returned by the state engineer, the original filing date of the application shall be retained.

B. Rejection of application: When, after preliminary review of the information provided by the applicant, the state engineer is of the opinion that there is no unappropriated surface water available, or that the approval of the application would be contrary to the conservation of water within the state or detrimental to the public welfare of the state, or that the applicant has not complied with the applicable requirements of Section 72-5-24.1 NMSA, then the application shall be rejected. The state engineer shall decline to order the publication of notice of any such application.

C. Publication: After receipt of an acceptable application, the state engineer will issue a notice for publication to the applicant. The notice issued by the state engineer shall be published once a week for three (3) consecutive weeks in a newspaper of general circulation - as prescribed by the state engineer - for every county affected. The

notice will also be placed on the state engineer web-site (www.ose.state.nm.us). Only notices issued by the state engineer pursuant to Section 72-5-4 or Section 72-12-3 NMSA shall be valid. Prior to publication, the applicant shall ensure that the notice provides all essential facts pertaining to the application, including the location of the point(s) of diversion, the amount and timing of the diversion of water, the place of use, and the purpose for which the water is to be used. The applicant shall ensure the accuracy of publication of the notice in the newspaper. The responsibility for publication and all expenses associated with publication or republication shall be borne by the applicant. An affidavit of the publication shall be filed with the state engineer within sixty (60) days of the notice being issued to the applicant by the state engineer. Failure to file an affidavit of publication within the stated time shall result in the filing date of the application being postponed to the date the last affidavit is filed.

D. Amended notice and republication: If publication of the notice is defective, the state engineer may order republication. If an amendment is made to an application after publication of the original notice that changes the location of the point of diversion, requests a larger diversion amount or a larger consumptive use of water or changes the place or purpose of use of the water, the state engineer shall issue an amended notice and require the publication of the amended notice. Any republication cost or cost to publish an amended notice shall be paid by the applicant. An amended notice shall be published in accordance with the requirements of Subsection C of 19.26.2.12 NMAC.

E. Protest to application: Any person, firm, corporation or other entity objecting that the granting of the application will impair the objector's water rights shall have standing to file objections or protests. Any person, firm, corporation or other entity objecting that granting of the application will be contrary to the conservation of water within the state or detrimental to the public welfare of the state and showing that the objector will be substantially and specifically affected by the granting of the application shall have standing to file objections or protests. Pursuant to Section 72-5-5.1 NMSA, standing shall be afforded for those asserting legitimate concerns involving public welfare and conservation of water in a manner which avoids unduly burdening the administrative and judicial process. All objections and protests shall set forth the grounds for asserting standing. All objections or protests failing to meet the above criteria for standing will not be recognized as valid protests. The state of New Mexico or any of its branches, agencies, and political subdivisions shall have standing to file objections or protests. The state engineer will mail one copy of the objections or protests to the applicant.

(1) Filing deadline: All objections and protests must be filed with the state engineer not later than ten (10) calendar days after the date of the last publication of the notice. If the final day for filing a protest falls on a weekend or a state of New Mexico recognized holiday, protests received on the next business day shall be deemed timely. All objections or protests filed after the ten-day period will not be recognized as valid protests.

(2) Filing an objection or protest by facsimile: Objections or protests may be filed via facsimile no later than 5:00 p.m. (mountain time) of the tenth calendar day after the date of last publication of notice, provided the original objections or protests are mailed and postmarked within twenty-four (24) hours after transmission of the facsimile. If the original objections or protests are not mailed and postmarked within twenty-four (24) hours of transmission, the protest will be deemed untimely, and will not be recognized by the state engineer as a valid protest.

(3) Hearing before the state engineer: The state engineer encourages the parties to resolve the objection or protest. If the applicant and protestant cannot reach agreement by which the protest can be withdrawn, the matter shall proceed to hearing as described in 19.25.2 and 19.25.4 NMAC, unless the state engineer determines that the application should be denied, in which case the state engineer may deny the application prior to holding a hearing.

F. Action of the state engineer - protested application:

(1) Denial of application: The state engineer may deny a protested application, prior to or after holding a hearing, if the state engineer determined one or more of the following:

(a) No water right exists.

(b) Granting the application would be detrimental to or impair existing water rights.

(c) Granting the application would be contrary to the conservation of water within the state.

(d) Granting the application would be detrimental to the public welfare of the state.

(e) For a new appropriation, available information indicates that there is no unappropriated surface water.

(2) Permits - conditions of approval: The state engineer may approve a protested application after holding a hearing and may impose reasonable conditions of approval.

G. Withdrawal of application: An applicant may request in writing that an application be withdrawn. A withdrawn application is not subject to reinstatement, although the applicant may refile the application or a similar application at a later date. A copy of the withdrawn application remains part of the public record. A protested application may not be withdrawn and refiled for the purpose of removing a standing protest. When a protested application is withdrawn and the same or similar application is filed within one calendar year of the withdrawal date, the state engineer will attempt to

notify the previous protestant(s) of the refiled application. The withdrawal of an application that is currently in the hearing process before the state engineer may only be withdrawn pursuant to 19.25.2 NMAC.

H. Action of the state engineer - unprotested application: After receipt of an affidavit of publication for an application to which no timely protest was received or remains, the state engineer will act on the application.

(1) Denial of application: The state engineer shall deny an application if the state engineer makes any of the five determinations listed in Paragraph 1 of Subsection F of 19.26.2.12 NMAC.

(2) Permits - conditions of approval: The state engineer may approve an application and may impose reasonable conditions of approval including measurement at the point of diversion. The state engineer retains jurisdiction of all permits.

I. Request to set aside decision for reconsideration or hearing: Upon receipt of notice from the state engineer of the decision on an application, if the permittee is aggrieved by any of the conditions of approval, the permittee may within thirty (30) calendar days of such receipt request in writing that the decision be set aside for the purpose of reconsideration or hearing. The state engineer may issue an order setting aside all or part of his decision for the purpose of reconsideration or hearing. That part of the permit which is set aside shall revert to application status and may not be exercised.

(1) State engineer order to set aside decision for the purpose of reconsideration: At the request of the permittee, the state engineer may issue an order setting aside all or part of his decision for the purpose of reconsideration. If additional information is to be submitted for reconsideration, the order shall specify the time allowed for submission. Failure to submit information within the specified time shall result in reinstatement of the original decision. Upon receipt of notice from the state engineer of the decision on a reconsideration of an application, if the permittee is aggrieved by the decision, the permittee may within thirty (30) calendar days of such receipt request in writing that the decision be set aside for the purpose of hearing in accordance with 19.25.2 and 19.25.4 NMAC.

(2) State engineer order to set aside decision for the purpose of hearing: At the request of the permittee, the state engineer shall issue an order setting aside all or part of his decision for the purpose of hearing. After the state engineer issues an order setting aside all or part of his decision for the purpose of hearing in accordance with 19.25.2 and 19.25.4 NMAC.

[19.26.2.12 NMAC - N, 1/31/2005]

19.26.2.13 PERMITS:

Upon state engineer approval an application becomes a permit. A permit allows the permittee to place water to beneficial use in accordance with the permit conditions of approval.

A. Construction of works and proof of completion: No works for the storage, diversion, or carriage of water may be constructed or substantially modified except in accordance with the permit conditions of approval. Any such construction or modification must be supervised by a professional engineer, registered in the state of New Mexico, unless the state engineer in his discretion expressly waives this requirement. On or before the date set in the permit for the completion of works, the permittee shall notify the state engineer that work has been completed by filing with the state engineer proof of completion of works.

(1) Form - content: The permittee shall submit proof of completion of works on a form prescribed by the state engineer. The form shall include the following information: the name and address of the permittee, the pertinent state engineer file number(s), the source of water supply, the name of the stream system, the location of point of diversion, a description of the constructed works - including diversion dams, storage dams, main canals, headgates, pipelines, flumes, reservoirs, and laterals, the date the construction of works was completed, a description of rights-of-way, and other information the state engineer deems necessary. The point(s) of diversion shall be described using latitude and longitude or the New Mexico state plane coordinate system. If the proof of completion form filed by the permittee lacks any of this information, it may be returned for completion.

(2) Filing fee: A fee of \$25 must accompany a proof of completion of works.

(3) Unsafe or defective construction: Upon submission of a proof of completion of works, the state engineer will order the inspection of the works after notice to the permittee. At any time before or after issuance of a certificate of construction, the state engineer may order the inspection of the works after notice to the permittee. If the state engineer determines after inspection that the works for the storage, diversion, or carriage of water are unsafe or do not comply with the permit conditions of approval, the state engineer may require the permittee to make necessary changes within a reasonable time.

(4) Certificate of construction: Upon completion of the works to the satisfaction of the state engineer, the state engineer will issue a certificate of construction, which shall describe the constructed works, the location of the point(s) of diversion, the capacities of the works for the storage, diversion, or carriage of water, and certify the adequacy of the works for the permitted uses.

B. Proof of application of water to beneficial use: Upon applying water to beneficial use as provided by the permit, on or before the due date set by the permit, the permittee shall file with the state engineer proof of application of water to beneficial use. The beneficial use of water must be in accordance with the permit conditions of

approval. Once a proof of application of water to beneficial use has been filed, the water right shall be limited to the amount of water that has been put to beneficial use, and no further development of the water right may occur.

(1) Form - content: The permittee shall submit proof of application of water to beneficial use on a form prescribed by the state engineer. The form shall include the following information: the name and address of permittee, the pertinent state engineer file number(s), the source of water supply, the name of the stream system, the location of the point(s) of diversion, the location of the place of use, the purpose of use to which the water is being beneficially applied, the annual diversion of water, the method of conveyance, the annual diversion schedule, and other information the state engineer may deem necessary. The point(s) of diversion shall be described using latitude and longitude or the New Mexico state plane coordinate system. If the form filed by the permittee lacks any of this information, it may be returned for completion.

(2) Filing fee: A fee of \$25 must accompany a proof of application of water to beneficial use.

(3) Survey plat: A survey shall be conducted in accordance with the requirements of 19.26.2.26 NMAC of the diversion works and place of use of the water by a surveyor or professional engineer registered in the state of New Mexico. The permittee shall submit a plat of the survey with the proof of beneficial use.

C. Application for extension of time: When a permittee is unable to construct the necessary works or apply water to beneficial use within the time authorized, the permittee may file with the state engineer an application for extension of time. The application shall state all reasons for the request for additional time, describe the works which have been completed, the extent of application of water to beneficial use under the permit at the time of the request, and a plan setting forth the dates when the project will be completed or when the total amount of water to be appropriated under the permit will be applied to beneficial use. The application may be accompanied by affidavits, photographs of works completed, or other information supporting the request. The state engineer may grant an extension of time upon a proper showing of due diligence or reasonable cause for delay, or upon the state engineer finding that it is in the public interest to allow additional time. Financial inability of the permittee to proceed with a project is not a sufficient reason for granting an extension of time. Failure of the permittee to provide a proper showing of due diligence or reasonable cause for delay as described in Section 72-5-28 NMSA, shall result in denial of the extension of time. Denied requests for extension of time may be appealed as provided in Subsection I of 19.26.2.12 NMAC. The water right established shall be limited by that amount of water lawfully applied to beneficial use pursuant to the terms of the permit. Failure to file proof of beneficial use within the time allotted by the state engineer shall result in cancellation of the permit.

(1) Term: An extension of time may be granted for a period not to exceed three (3) years. Except as provided in Subsections F and G of 19.26.2.19 NMAC, no

extensions of time shall be granted which in combination extend the time allowed by the permit beyond ten (10) years from the initial date of approval of the application, unless the state engineer in his discretion expressly waives this limitation pursuant to Section 72-5-14 NMSA. For applications for extension of time for filing proof of completion of works, the state engineer may upon the request of the applicant allow additional time for the completion of works equal to the time during which work was prevented by acts of God, operation of law, or other causes beyond the control of the applicant. For applications for new appropriations pursuant to Subsection G of 19.26.2.19 NMAC, and for application for water rights transferred pursuant to Subsection F of 19.26.2.19 NMAC, no extensions of time shall be granted which in combination extend the time allowed by the permit beyond forty (40) years from the date the application was filed at the office of the state engineer.

(2) Form - content: The permittee shall submit an application for extension of time on a form prescribed by the state engineer. The form shall include the following information: the name and address of the permittee, the pertinent state engineer file number(s), the reason(s) for requesting additional time under which to complete constructed works or apply water to beneficial use, a plan setting forth the dates when the project will be completed or when the total amount of water to be appropriated under the permit will be applied to beneficial use, a description of the works which have been completed and the extent of application of water to beneficial use under the permit at the time of the request, and other information the state engineer may deem necessary. If an application lacks any of this information, it may be returned for completion. The application may be accompanied by affidavits, photographs of works completed, or other information supporting the request.

(3) Filing fee: A fee of \$50 must accompany an application for extension of time.

D. License to appropriate: After notice to the permittee, the state engineer or his designee may perform a field inspection of the permittee's application of water to beneficial use. Upon application of water to beneficial use in accordance with the permit conditions of approval the state engineer will issue a license to appropriate water, which shall define the extent and conditions of use under which the water right has been established. A license to appropriate shall recognize a water right only to the extent water has been applied to beneficial use under the conditions of the permit, and shall not recognize any diversion of water that exceeds the permit conditions of approval. A license may be revoked for failure to comply with the terms of the license.

E. Cancellation of permit: The state engineer may cancel a permit upon failure of a permittee to comply with the permit conditions of approval or any applicable provisions of 19.26.2 NMAC or Chapter 72 NMSA. The state engineer may also cancel a permit upon request from the permittee. Upon final cancellation of a permit, the water subject to the permit reverts to the public.

19.26.2.14 LIVESTOCK WATER IMPOUNDMENTS:

A permit is required to impound surface water for watering livestock. If the proposed impoundment is created by a dam that exceeds ten feet in height measured from the lowest point on the downstream toe to the dam crest, or exceeds ten acre-feet in storage capacity, the applicant shall comply with the applicable dam construction requirements in 19.25.12 NMAC. Watering of livestock does not include the impoundment of surface or groundwater in any amount for fishing, fish propagation, recreation, or aesthetic purposes.

A. Form - content: An application for permit for livestock water impoundment shall be filed on a form prescribed by the state engineer. The application shall include the following information: the name and mailing address of the applicant, owner of land on which the livestock water impoundment will be constructed, proof of permission from land owner (if other than applicant) to construct a livestock water impoundment, name of the livestock water impoundment, location of the livestock water impoundment using public land survey system, latitude and longitude, or the New Mexico state plane coordinate system, name of the watercourse, maximum depth of the livestock water impoundment, height of dam and height of spillway from the lowest natural ground surface on the downstream side to the dam crest, surface area and storage capacity of the impoundment at lowest spillway elevation, map illustrating location of proposed livestock water impoundment and source of water, type of stock, amount of stock, other sources of water locally available for stock watering, and any other information deemed necessary by the state engineer. If an application lacks any of this information, it may be returned to the applicant for completion.

B. Filing fee: A fee of \$10 must accompany the application for a livestock water impoundment.

C. Return or rejection of an application: After reviewing each application, the state engineer will notify the applicant if any deficiencies are found with the application. The applicant will be given an opportunity to correct any deficiencies noted in the application. All deficiencies noted by the state engineer shall be corrected prior to acceptance and action on the proposed application for livestock water impoundment.

D. Action of the state engineer: The state engineer shall approve an application if, after review, the state engineer is of the opinion that the proposed use qualifies as a livestock water impoundment by meeting the following requirements: the impoundment is not fed by or located on a perennial stream, the impoundment is used for stock watering, and the capacity of impoundment is 10 acre-feet or less. The state engineer may take into account the maximum amount of water required per livestock unit and shall take into account regional and climatic conditions that affect consumption. The state engineer may impose reasonable conditions of approval. An application may be denied if the state engineer is of the opinion that the proposed impoundment does not qualify as a livestock water impoundment. A permit to appropriate water must be obtained pursuant to Section 19.26.2.10 or 19.26.2.11 NMAC if the proposed

impoundment is located on or fed by a perennial stream or if the capacity of the impoundment exceeds 10 acre-feet.

E. Proof of construction: No works may be constructed or modified except in accordance with the permit conditions of approval. Upon completion of a livestock water impoundment, a statement of completion of construction shall be filed with the state engineer on a form prescribed by the state engineer. Said statement of completion shall be filed within one year of approval or the permit shall automatically expire. An expired permit shall not be subject to reinstatement.

F. Declaration of existing livestock water impoundments: Any person, firm or corporation claiming to be the owner of a water right established prior to March 19, 1907, from any surface water source, may file a declaration on a form prescribed by the state engineer pursuant to 19.26.2.8 NMAC. Any person, firm or corporation claiming to be the owner of a livestock water impoundment where the impoundment was created after March 19, 1907 but before May 19, 2004, may file a declaration of existing livestock water impoundment, provided the storage capacity is less than ten acre-feet. The declaration shall set forth the history and continuity of the beneficial use to which said water has been applied. A declaration may be accompanied by a map prepared pursuant to 19.26.2.26 NMAC and may be accompanied by deeds, survey plats, affidavits and other evidence tending to substantiate the claim. If such supporting documents are filed with the state engineer, they will be filed together with the declaration. The declaration may be filed by the declarant on his personal information and belief. No declarations will be accepted for filing within any stream system where an adjudication court has entered an order or decree that operates to bar such claims.

(1) Form - content: A declaration of livestock water impoundment shall be filed on a form prescribed by the state engineer. The declaration shall include the following information: the name and mailing address of the declarant, owner of land on which the livestock water impoundment is located, proof of permission from land owner(if other than declarant) to construct a livestock water impoundment, name of the livestock water impoundment, location of the livestock water impoundment using public land survey system, latitude and longitude, or the New Mexico state plane coordinate system, name of the watercourse, maximum depth of the livestock water impoundment, height of dam and height of spillway from the lowest natural ground surface on the downstream side to the dam crest, surface area and storage capacity of the impoundment at lowest spillway elevation, map illustrating location of the livestock water impoundment and source of water, type of stock, amount of stock, other sources of water, quantity of water used, the date of construction, the date water was first applied to beneficial use and the continuity thereof, and any other information deemed necessary by the state engineer. The declarant shall sign the declaration before a notary. If a declaration lacks any of this information, it may be returned to the declarant for completion.

(2) Filing fee: A fee of \$10 must accompany the declaration for a livestock water impoundment.

[19.26.2.14 NMAC - N, 1/31/2005]

19.26.2.15 PONDS AND OTHER IMPOUNDMENTS:

A permit is required to capture or store surface water in an impoundment. An application to capture and store surface water shall be filed pursuant to 19.26.2.10 NMAC or 19.26.2.11 NMAC unless the impoundment of water is authorized as a livestock watering impoundment under 19.26.2.14 NMAC. A permit to appropriate water is required for an impoundment created by constructed works, sand and gravel operations, or mining operations, including excavations that fill with water. Dams exceeding 10 feet in height or that can store in excess of 10 acre-feet shall meet the requirements of 19.25.12 NMAC.

A. Form - content: An application for an impoundment shall be filed pursuant to the requirements of 19.26.2.10 NMAC or 19.26.2.11 NMAC. In addition to the information required for an application filed under 19.26.2.10 NMAC or 19.26.2.11 NMAC, an application for a pond or other impoundment shall also include: the name of the proposed impoundment, the location of the impoundment using public land survey system, latitude and longitude, or the New Mexico state plane coordinate system, the maximum depth of the impoundment, the perimeter of the impoundment, the maximum surface area, the estimation of annual evaporative losses, the slope(s) of the interior basin, the outlet conduit size and slope, a table showing the stage, surface area and storage capacity of the impoundment, and the time to empty the impoundment.

B. Flood control: No permit to appropriate water is required for an impoundment when the primary purpose of the impoundment is flood control, provided the outlet drains the impoundment (from the spillway crest) in 96 hours. The water shall not be detained in the impoundment in excess of 96 hours unless the state engineer has issued a waiver to the owner of the impoundment.

[19.26.2.15 NMAC - N, 1/31/2005]

19.26.2.16 [RESERVED]

19.26.2.17 CHANGE OF OWNERSHIP:

In the event of any changes of ownership affecting the title to a declaration, permit, license, or adjudicated water right, the new owner shall file a change of ownership form with the state engineer. The new owner shall file a separate change of ownership for each declaration, permit, license, or adjudicated water right of record filed with the state engineer. Upon acceptance by the state engineer for filing, the new owner shall record a copy of the change of ownership form filed with the state engineer with the clerk of the county in which the declaration, permit, license, or adjudicated water right is located.

A. Form - content: The new owner shall file a change of ownership in duplicate on a form prescribed by the state engineer. A change of ownership shall include the

following information: the name of the owner of record, the name and address of the new owner, the state engineer file number, the diversion amount, the consumptive use amount, the purpose of use, the legal description of the place of use, the priority date(s), and any other information the state engineer deems necessary. The new owner shall sign each form before a notary. If a change of ownership form lacks any of this information, it may be returned for completion.

B. Filing fee: A fee of \$5 must accompany a change of ownership form.

C. Proof of ownership: The new owner shall attach to the change of ownership form a copy of a warranty deed or other instrument of conveyance that has been duly recorded with the clerk of the county in which the declaration, permit, license, or adjudicated water right is located. The warranty deed or other instrument of conveyance shall show the ownership of the declaration, permit, license, or adjudicated water right in the name of the new owner. The state engineer will not accept for filing a change of ownership form that is not accompanied by a recorded instrument of conveyance.

(1) Acceptable instruments of conveyance for the purposes of this section include, but are not limited to, warranty deeds, special warranty deeds, quitclaim deeds, personal representative's deeds, special master's deeds, and tax deeds, where such instruments unconditionally convey present title to the declaration, permit, license, or adjudicated water right.

(2) Real estate installment sales contracts or memoranda of such contracts, mortgages, instruments conveying security interests, or other documents that do not on their face unconditionally convey present title to the declaration, permit, license, or adjudicated water right are not acceptable instruments of conveyance for the purposes of this section.

D. Effect: A change of ownership form filed with the state engineer notifies the state engineer that a change in ownership has been effected by a legal instrument of conveyance. Acceptance of a change of ownership form by the state engineer for filing does not constitute approval by the state engineer of either the validity of the conveyance or the validity of the right conveyed.

E. Appurtenance: Except as otherwise provided by written contract between the owner of the land and the owner of a ditch, reservoir, or other works for the storage or conveyance of water, all surface waters appropriated for irrigation purposes are appurtenant to the land upon which they are used by operation of Sections 72-1-2 and 72-5-23 NMSA. No irrigation water right appurtenant to the land irrigated shall be assigned or conveyed apart from the land unless it is expressly severed from the land in the manner provided by law.

[19.26.2.17 NMAC - N, 1/31/2005]

19.26.2.18 LEASE OF WATER RIGHTS:

An owner of a water right may lease all or any part of their right for a period not to exceed ten (10) years pursuant to Section 72-6-3 NMSA except that a water right may be leased for a period not to exceed forty years by a forty year planning entity as provided in Section 72-1-9 NMSA. Transfers of agricultural water to municipal/industrial use pursuant to Section 73-10-48 NMSA will be covered by rules and regulations promulgated pursuant to the statute. Prior to the use of water pursuant to a lease, if the proposed point of diversion or place or purpose of use differs from that of the owner's water right in any respect, a permit must be obtained from the state engineer for the term of the lease. The procedure for filing an application shall be the same as described in 19.26.2.11 NMAC. The amount of water that an owner/lessor may use during the term of a lease shall be reduced by the amount of water so leased. Upon termination of such a lease, the point of diversion and place and purpose of use subject to the lease shall revert to the owner's original point of diversion and place and purpose of use. Renewal of a lease shall require a new application, unless a longer period has been previously applied for, advertised, and approved by the state engineer.

[19.26.2.18 NMAC - N, 1/31/2005]

19.26.2.19 WATER DEVELOPMENT PLANS:

A forty-year planning entity shall be allowed a water use planning period, not to exceed forty years, to acquire and hold water rights pursuant to Section 72-1-9 NMSA. A water development plan may be filed at any time. If a plan is not already on file, a water development plan shall be filed with an application to appropriate water or transfer a water right where the water right will be held unused or undeveloped pursuant to the plan.

A. Planning period: The water rights of a forty-year planning entity subject to this section shall be based upon the reasonably projected additional needs for water within forty years set out in a water development plan. The implementation of the plan shall not exceed a forty-year period from the date the forty-year planning entity files with the state engineer an application to change the place or purpose of use of a water right pursuant to the plan or an application for a new appropriation pursuant to the plan.

B. Water development plan - content: A water development plan shall include the following information: the name and address of the owner of record of the water rights subject to the plan, a summary of all water rights subject to the plan, the place and purpose of use of the identified water rights, the historical and current water use, the historical and existing population served by the identified water rights, reasonable population projections, implemented water conservation measures, planned water conservation measures, a summary of the per capita water use including a comparison with the per capita water use of other similar forty-year planning entities, reasonably projected additional needs - taking into account the variability of surface water supply and the sustainability of groundwater supply - for water within forty years, and any other information the state engineer deems necessary. If a development plan lacks any of this information, it may be returned to the forty-year planning entity for completion.

C. Filing fee: A fee of \$100 must accompany a water development plan.

D. Return of plan: The state engineer may return the plan to the forty-year planning entity, with a statement of corrections required, if it is found to be faulty or incomplete.

E. Approval of plan: Upon review of the plan, if the state engineer finds the plan to be reasonable, the plan and projected needs of the planning entity will be approved by the state engineer. Notification of the approval shall be given to the planning entity.

F. Water rights held pursuant to plan: For permits for water rights acquired by forty-year planning entities pursuant to a forty-year plan, the state engineer may grant extensions of time which in combination extend the time allowed by the permit up to forty (40) years from the date of the application where:

(1) the planning entity acquires and holds the water right pursuant to a water development plan approved by the state engineer; and

(2) upon acquisition of the water right it files with the state engineer an application to change the place or purpose of use of the water right pursuant to the water development plan; and

(3) the quantity of water associated with the water right, together with the quantity of water associated with the other water rights and permits held pursuant to the plan, does not exceed the reasonably projected additional needs for water within forty years set out in the plan.

G. Permits for new appropriations held pursuant to plan: For permits for new appropriations for forty-year planning entities, the state engineer may grant extensions of time which in combination extend the time allowed by the permit up to forty (40) years from the date of the application where:

(1) the application is filed and the permit will be held pursuant to a water development plan approved by the state engineer; and

(2) the quantity of water authorized in the permit, together with the quantity of water associated with the water rights and other permits held pursuant to the plan, does not exceed the reasonably projected additional needs for water within the forty years set out in the plan.

[19.26.2.19 NMAC - N, 1/31/2005]

19.26.2.20 FORFEITURE AND ABANDONMENT OF A WATER RIGHT:

A water right may be lost for nonuse in two ways. First, the right may be forfeited pursuant to Section 72-5-28 NMSA or Section 72-12-8 NMSA. Alternatively, the right may be abandoned. Abandonment is a judicial doctrine.

A. Forfeiture: All or any part of a water right is subject to forfeiture when a person entitled to the use of water fails to apply water to beneficial use for a period of four or more consecutive years. If the state engineer determines that a water right is subject to forfeiture, the water right owner will be sent a notice and declaration of nonuse by certified mail. If failure to apply water to its associated beneficial use persists for one year after receipt of notice and declaration of nonuse given by the state engineer the water right will be forfeited and the unused water shall revert to the public. The requirement for an issuance of a notice and declaration of nonuse by the state engineer shall not apply to water that has reverted to the public by operation of law prior to June 1, 1965 (see Sections 72-5-28 and 72-12-8 NMSA). Periods of non-use for the following reasons shall not be applied towards the four or more consecutive year period required for a water right to be subject to forfeiture:

(1) Despite the diligent effort on the part of the water right owner, circumstances beyond the control of the water right owner have prevented the application of water to beneficial use.

(2) The state engineer has granted an extension of time in which to apply water to beneficial use.

(3) The water is part of a state engineer approved water development plan (see 19.26.2.19 NMAC).

(4) The water right owner is on active duty in the armed forces of the United States of America.

(5) The water right is acquired and placed in a state engineer approved water conservation program.

(6) The water right is appurtenant to irrigated farm lands which have been placed under the acreage reserve or conservation reserve program provided by the Food Security Act of 1985, P.L. 99-108.

B. Abandonment: Common law abandonment of a water right requires both the nonuse of water by a person entitled to such use and the intent to abandon the right. Whether or not a court would determine that a water right has been abandoned depends on the facts and circumstances in each particular case. The intent to abandon the right may be express or may be inferred from the acts of the water right owner. In making such determination, the state engineer is not adjudicating a right, but merely making a threshold administrative determination of the validity and existence of the underlying water right. Nonuse for an unreasonable period of time establishes a presumption of abandonment and prima facie evidence of the intention to abandon the right. To rebut a presumption of abandonment a person must establish not merely their expressions of desire or hope or intent, but some fact or condition excusing the period of nonuse.

[19.26.2.20 NMAC - N, 1/31/2005]

19.26.2.21-19.26.2.24 [RESERVED]

19.26.2.25 APPLICATION MAPS:

An application for appropriation, change in point of diversion or change in place and/or purpose of use shall require a map delineating the proposal described in the application. The map shall include a description of all lands, point(s) of diversion, place(s) of use, accurate locations of canals and streams, and other relevant features included in the application. In general, maps accepted by the state engineer are: irrigation and conservancy district maps, maps prepared by a licensed professional surveyor or engineer, and state engineer hydrographic survey maps. Plan drawings and maps prepared with the aid of a computer shall be submitted with a copy of the digital data files in a format acceptable to the state engineer.

[19.26.2.25 NMAC - N, 1/31/2005]

19.26.2.26 FORMAT FOR PLAN DRAWINGS, PROOF OF BENEFICIAL USE AND DECLARATION MAPS:

All plan drawings, proof of beneficial use maps, and declaration maps filed with the state engineer shall meet the requirements listed below. Proof of beneficial use maps and declaration maps shall be prepared by either a licensed professional surveyor or licensed professional engineer in the state of New Mexico. Plan drawings and maps prepared with the aid of a computer shall be submitted with a copy of the digital data files in a format acceptable to the state engineer.

A. Map quality: Plan drawings and maps shall be made from actual field or photogrammetric surveys of an accuracy acceptable to the state engineer. Plan drawings and maps shall be prepared with permanent black ink on mylar. All original signatures, dates, and acknowledgments appearing on the sheet(s) shall be in permanent ink. If more than one sheet is required, each shall be numbered in sequence (example: Sheet 1 of 3). Plan drawings and maps shall always be rolled - never folded - for transmittal.

B. Scale and size: Mylar sheets shall be twenty-four (24) inches by thirty-six (36) inches with one (1) inch margins on all sides unless otherwise specified by the state engineer. The scale(s) used on the drawings may vary according to requirements and space available to show all necessary data in detail clearly in feet and decimals. Detailed dimensions of structures, headgates, drops, etc. shall be given in feet and 1/10th of a foot or inches.

C. Map details: The following information is required on declaration and proof of beneficial use maps.

(1) Title sheet: The following title shall be placed on and made a part of the first sheet:

MAP

of the

(name of system: ditch, ditch & reservoir, irrigation, power, etc.)

_____, Applicant/Declarant/Permit Holder

State Engineer File Number(s): _____

Located in _____ County, State of New Mexico.

Scale of Map: 1 inch = _____ feet.

The undersigned,

_____ ,

whose address is: _____ ,

Zip Code _____ , County of _____ , State of _____ .

(2) Location of point of diversion: The location of the point of diversion on the stream, whether supplying water to direct diversion to a ditch or to an off-channel reservoir, shall be identified on the drawings as follows:

The headgate, which is the point of diversion from _____ (river, creek, spring, arroyo) from which the works derive their water supply, is located as follows _____ (latitude) and _____ (longitude) or X = _____ and Y = _____, (New Mexico state plane coordinate system), NAD _____.

(3) Acreage irrigated, to be irrigated, or retired: Acreage irrigated or retired from irrigation shall be clearly indicated on the maps. Cross-hatching the subject area on the location map is preferred. A written description of the location of the acreage, acceptable to the state engineer, shall be provided.

D. Orientation and date: The direction of north and the basis of bearings shall be shown on all maps. The date that field surveys are made or the date of the aerial photography used shall be shown on the maps.

E. Vicinity map: A vicinity map of sufficient scale and size to locate the pertinent area shall be shown on the maps and/or plan drawings.

F. Surveyor's certification and seal: A licensed professional surveyor preparing maps shall place on the first sheet the certificate shown below and the certificate shall be signed. The surveyor's license number and the seal impression shall accompany the certificate.

State of New Mexico)

) ss.

County of _____)

I, _____, hereby certify that I am licensed professional surveyor and that the accompanying maps were prepared by me or under my direction, and that the same are true and correct to the best of my knowledge and belief.

Licensed Professional Surveyor

License Number: _____

Date Submitted: _____

G. Engineer's certification and seal: A licensed professional engineer preparing maps, plan drawings, or specifications shall place on the first sheet of the map or plan drawings and the first page of the specifications the certificate shown below and the certificate shall be signed. The engineer's license number and the seal impression shall accompany the certificate.

State of New Mexico)

) ss.

County of _____)

I, _____, hereby certify that I am a licensed professional engineer, qualified in _____ (agricultural, civil, geological etc.) engineering and that the accompanying _____ (maps, drawings or specifications) were prepared by me or under my direction, and that the same are true and correct to the best of my knowledge and belief.

Licensed Professional Engineer

License Number: _____

Date Submitted: _____

H. Owner's certificate: An owner's certificate shall be placed on the first sheet of the plan drawings and shall be signed by the owner and acknowledged by a notary public.

State of New Mexico _____)

19.26.10.8 DECLARATION OF LOWER PECOS WATER DISTRICT OF PECOS RIVER STREAM SYSTEM: Order No. 31:

A. WHEREAS the United States district court for the district of New Mexico handed down a decree on May 9, 1933, entitled "The United States of America, plaintiff, vs. Hope community ditch, et al, defendants., no. 712 Equity" defining the rights of the several parties to the use of water along the Pecos river in New Mexico and some of its tributaries, and

B. WHEREAS, on the 6th day of May, 1935, said court relinquished jurisdiction of said cause to the state engineer, and

C. WHEREAS, the district court for the fifth judicial district of the state of New Mexico handed down a decree on June 7, 1931, in cause No. 5144, defining the rights from Pecos river, exclusive of Black river, for the lands below lake Avalon and north of the Texas New Mexico boundary, and

D. WHEREAS, certain water rights along Black river were defined by the district court for the fifth judicial district in cause no. 112, by decree issued January 3, 1912, and by certain court orders related thereto, and

E. WHEREAS, in order to properly distribute the waters of the lower Pecos river in De Baca, Chaves and Eddy counties, New Mexico, the employment of a water master in and for said sub-district of the Pecos river stream system is necessary;

F. NOW, THEREFORE, I. John H. Bliss, duly appointed and qualified state engineer of the state of New Mexico, in accordance with Section 77-301 New Mexico Statutes, 1941 Annotated, do hereby declare the lower Pecos sub-district of the Pecos river system as hereinafter described to be a water district in the state of New Mexico for the purpose of administration and distribution of the waters thereof. The limits of the water district subject to the jurisdiction of the water master are as follows:

- (1) the Pecos river from the mouth of Buffalo creek in township 1 south, range 26 east to the New Mexico-Texas state line,
- (2) Salt creek below the mouth of Cienega del Macho;
- (3) Rio Felix downstream from Hagerman canal;

(4) Rio Penasco downstream from the west line of township 18 south, range 26 east;

(5) the Black river stream system.

G. WITNESS my hand and official seal this 1st day of July 1952, John H. Bliss, State Engineer.

[Recompiled 8/30/02]

19.26.10.9 DECLARATION OF PECOS RIVER WATER DISTRICT OF PECOS RIVER STREAM SYSTEM:

Order No. 55.

A. WHEREAS, the United States district court for the district of New Mexico handed down a decree on May 9, 1933, entitled "The United States of America, plaintiff, vs. Hope community ditch, et al, defendants, No. 712 equity" defining the rights of the several parties to the use of water along the Pecos river in New Mexico and some of its tributaries, and

B. WHEREAS, on the 6th day of May, 1935, said court relinquished jurisdiction of said cause to the state engineer, and

C. WHEREAS, the district court for the fifth judicial district of the state of New Mexico handed down a decree on. June 7, 1931, in cause no. 5144, defining the rights from the Pecos river, exclusive of Black river, for the lands below lake Avalon and north of the Texas-New Mexico boundary, and

D. WHEREAS, certain water rights along Black river were defined by the district court for the fifth judicial district in cause no. 112, by decree issued January 3, 1912, and by certain court orders related thereto, and

E. WHEREAS, in order to properly distribute the waters of the Pecos river in San Miguel, Guadalupe, De Baca, Chaves and Eddy counties, New Mexico, the employment of a water master in and for said sub-district of the Pecos river stream system is necessary, and

F. WHEREAS, on July 1, 1952, the lower Pecos water district was declared by the state engineer, and

G. WHEREAS, it is now found to be necessary to administer a larger area of the Pecos river than has heretofore been administered under the declaration of July 1, 1952;

H. NOW, THEREFORE, I, S. E. Reynolds, duly appointed and qualified state engineer of the state of New Mexico, in accordance with Section 75-3-1, New Mexico Statutes Annotated, 1953, do hereby declare the Pecos river sub-district of the Pecos river system as hereinafter described to be a water district in the state of New Mexico for the purpose of administration and distribution of the waters thereof. The limits of the water district subject to the jurisdiction of the water master are as follows:

- (1) the Pecos river from the mouth of Cow creek in section 24, township 14 north, range 13 east, to the New Mexico-Texas state line;
- (2) the Rio Agua Chiquita stream system and the Santa Rosa swamps;
- (3) Salt creek below the mouth of Cienega del Macho;
- (4) the Rio Hondo and tributaries (including the northern canal system of the Hagerman irrigation company) downstream from the west line of range 24 east.
- (5) Rio Felix, downstream from the Hagerman canal;
- (6) Rio Penasco, downstream from the west line of township 18 south, range 26 east;
- (7) Black river stream system.

I. WITNESS, my hand and official seal, this the 20th day of January 1956, S. E. REYNOLDS, State Engineer.

Order No. 75.

A. WHEREAS, the United States district court for the district of New Mexico handed down a decree on May 9, 1933, entitled "The United States of America, plaintiff, vs. Hope community ditch, et al, defendants, no. 712 equity" defining the rights of the several parties to the use of water along the Pecos river in New Mexico and some of its tributaries, and

B. WHEREAS, on the 6th day of May, 1935, said court relinquished jurisdiction of said cause to the state engineer, and

C. WHEREAS, the district court for the fifth judicial district of the state of New Mexico handed down a decree on June 7, 1931, in cause no. 5144, defining the rights

from the Pecos river, exclusive of Black river, for the lands below lake Avalon and north of the Texas-New Mexico boundary, and

D. WHEREAS, certain water rights along Black river were defined by the district court for the fifth judicial district in cause no. 112, by decree issued January 3, 1912, and by certain court orders related thereto, and

E. WHEREAS, in order to properly distribute the waters of the Pecos river in Guadalupe, De Baca, Chaves and Eddy counties., New Mexico, the employment of a watermaster in and for said sub-district of the Pecos river stream system is necessary, and

F. WHEREAS, on July 1, 1952, the lower Pecos water district was declared by the state engineer, and

G. WHEREAS, on January 20, 1956, the Pecos river water district was declared by the state engineer, and

H. WHEREAS, it is now found to be necessary for the economical and satisfactory apportionment of water, to administer a smaller area of the Pecos river than has heretofore been administered under the declaration of January 20, 1956;

I. NOW THEREFORE, I, S. E. Reynolds, duly appointed and qualified state engineer of the state of New Mexico, in accordance with Section 75-3-1, New Mexico Statutes Annotated, 1953, do hereby declare the Pecos valley surface water district of the Pecos river stream system as hereinafter described to be a water district in the state of New Mexico to be effective July 1, 1959, for the purpose of administration and distribution of the waters thereof. The limits of the water district subject to the jurisdiction of the watermaster are as follows:

(1) the Pecos river from the south line of the Jose Perea grant (being in section 20, township 9 north, range 21 east, N.M.P.M., as extended into said Jose Perea, grant) to the New Mexico-Texas state line;

(2) the Rio Agua Chiquita stream system, the Rio Agua Negra stream system downstream from U.S. highway 54 in Section 29, township 8 north, range 21 east and the area known as the Santa Rosa swamps;

(3) Salt Creek below the south of Cienega del Macho;

(4) the Rio Hondo and tributaries (including the northern canal system of the Hagerman irrigation company) downstream from the west line of range 24 east;

(5) Rio Felix, downstream from the Hagerman canal;

(6) Rio Penasco downstream from the west line of township 18 south, range 26 east;

(7) Black river stream system.

J. WITNESS my hand and official seal, this the 11th day of May 1959, S. E. Reynolds, State Engineer.

[Recompiled 8/30/02]

**19.26.10.11 DECLARATION OF PECOS VALLEY SURFACE WATER DISTRICT
PECOS RIVER STREAM SYSTEM:**

Order No. 92.

A. WHEREAS, the United States district court for the district of New Mexico handed down a decree on May 9, 1933, entitled "The United States of America, plaintiff, vs. Hope community ditch, et al, defendants, no. 712 Equity" defining the rights of the several parties to the use of water along the Pecos river in New Mexico and some of its tributaries, and

B. WHEREAS, on the 6th day of May, 1935, said court relinquished jurisdiction of said cause to the state engineer, and

C. WHEREAS, the district court for the fifth judicial district of the state of New Mexico handed down a decree on June 7, 1931, in cause No. 5144, defining the rights from the Pecos river, exclusive of Black river, for the lands below lake Avalon and north of the Texas-New Mexico boundary, and

D. WHEREAS, certain water rights along Black river were defined by the district court for the fifth judicial district in cause no. 112, by decree issued January 3, 1912, and by certain court orders related thereto, and

E. WHEREAS, in order to properly distribute the waters of the Pecos river in Guadalupe, De Baca, Chaves and Eddy counties, New Mexico, the employment of a watermaster in and for said sub-district of the Pecos river stream system is necessary, and

F. WHEREAS, on July 1, 1952, the lower Pecos water district was declared by the state engineer, and

G. WHEREAS, on January 20, 1956, the Pecos river water district was declared by the state engineer, and

H. WHEREAS, on May 11, 1959, the Pecos valley surface water district was declared by the state engineer, and

I. WHEREAS, it is now found to be necessary for the economical and satisfactory apportionment of water, to administer a smaller area of the Pecos river than has heretofore been administered under the declaration of May 11, 1959;

J. NOW THEREFORE, I, S. E. Reynolds, duly appointed and qualified state engineer of the state of New Mexico, in accordance with Section 75-3-1, New Mexico Statutes Annotated, 1953, do hereby declare the Pecos valley surface water district of the Pecos river stream system as hereinafter described to be a water district in the state of New Mexico to be effective July 1, 1963, for the purpose of administration and distribution of the waters thereof. The limits of the water district subject to the jurisdiction of the watermaster are as follows:

(1) the Pecos river from the section line dividing sections 19 and 30, township 8 north, range 22 east, N.M.P.M., to the New Mexico-Texas state line;

(2) the Rio Agua Negra stream system downstream from U.S. highway 54 in section 29, township 8 north, range 21 east, to its mouth;

(3) Salt creek below the mouth of Cienega del Macho;

(4) the Rio Hondo and tributaries (including the northern canal system of the Hagerman irrigation company) downstream from the west line of range 24 east;

(5) Rio Felix, downstream from the Hagerman canal;

(6) Rio Penasco, downstream from the west line of township 18 south, range 26 east;

(7) Black river stream system.

K. WITNESS my hand and official seal, this 4th day of June 1963, S. E. Reynolds, State Engineer.

[Recompiled 8/30/02]

PART 11: DECLARATION OF THE GALLINAS RIVER WATER SUB-DISTRICT OF THE PECOS RIVER STREAM SYSTEM

19.26.11.1 ISSUING AGENCY:

Office of State Engineer ("OSE").

[19.26.11.1 NMAC - N, 8/29/03]

19.26.11.2 SCOPE:

This rule applies to all waters of the Gallinas river located in San Miguel and Guadalupe counties, state of New Mexico.

[19.26.11.2 NMAC - N, 8/29/03]

19.26.11.3 STATUTORY AUTHORITY:

A. Section 72-2-8 NMSA (1997 Repl.) authorizes the OSE to develop, adopt, and promulgate all rules necessary to implement and administer the provisions of the Water Code.

B. New Mexico law declares that all natural water flowing in streams and watercourses, whether such be perennial, or torrential, within the limits of the state of New Mexico, belong to the public and are subject to appropriation for beneficial use. NMSA 1978, Section 72-1-1 (1907).

C. The state engineer has a statutory duty to provide general supervision of waters of the state and of the measurement, appropriation, distribution thereof and such other duties as required. NMSA 1978, Section 72-2-1 (1907).

D. The state engineer has the responsibility for appropriation of the state's waters in accordance with the laws of the state. NMSA 1978, Section 72-2-1 (1907); Const. Art. XVI, Section 2.

E. The state engineer is authorized to establish water districts upon any stream system within the state of New Mexico as necessary for the economical and satisfactory apportionment of said waters. NMSA 1978, Section 72-3-1 (1907).

F. The state engineer is authorized to divide a stream system into sub-districts, each of which said sub-district shall be designated by a distinct name. NMSA 1978, Section 72-3-1 (1907).

G. The state engineer is authorized, if in his opinion it is in the interest of public safety or the best interest of water users in a water district, to appoint a water master who shall have immediate charge of the apportionment of waters in his district under the general supervision of the state engineer, and shall so appropriate, regulate and control the waters of such water districts so as to prevent waste. NMSA 1978, Section 72-3-2 (1907).

[19.26.11.3 NMAC - N, 8/29/03]

19.26.11.4 DURATION:

Permanent.

[19.26.11.4 NMAC - N, 8/29/03]

19.26.11.5 EFFECTIVE DATE:

August 29, 2003, unless a later date is cited at the end of a section.

[19.26.11.5 NMAC - N, 8/29/03]

19.26.11.6 OBJECTIVE:

The objective of this rule is to declare the Gallinas River Water Sub-District of the Pecos River Stream System and to appoint a water master who will have immediate charge of such apportionment of such waters of the Gallinas river.

[19.26.11.6 NMAC - N, 8/29/03]

19.26.11.7 DEFINITIONS:

[RESERVED]

[19.26.11.7 NMAC - N, 8/29/03]

19.26.11.8 FINDINGS OF FACT:

A. The United States district court for the district of New Mexico handed down a decree on May 9, 1933 entitled "The United States of America, Plaintiff, vs. Hope Community Ditch, et al., Defendants, No. 712 Equity," defining the rights of several parties to the use of water along the Pecos river in New Mexico and some of its tributaries, among which is the Gallinas river.

B. On May 6, 1935, said court relinquished jurisdiction of said case to the state engineer.

C. In order to properly apportion the waters of the Gallinas river in San Miguel and Guadalupe counties, New Mexico, the establishment of a water sub-district for those waters and the appointment of a water master in and for said water sub-district of the Pecos river water district is necessary.

D. The amount of water flowing in the Gallinas river is finite and varies year to year based on annual spring run-off, which is dependent on annual precipitation.

E. The city of Las Vegas, numerous acequia associations ("acequias"), Gallinas canal storage and irrigation company, and Storrie project water user's association ("Storrie project") are all water users of the Gallinas river.

F. Adjudication of water rights along the Gallinas river has not been completed.

G. Recent droughts in the state of New Mexico have created a water shortage crisis in the Pecos river stream system, including the Gallinas river.

H. The shortage of water on the Gallinas river is a problem affecting the citizens of San Miguel and Guadalupe counties.

I. By letter dated March 19, 2003, Storrie project requested that the state engineer administer the water in the Gallinas river.

J. By letter facsimiled May 19, 2003, several acequias requested that the state engineer administer the water in the Gallinas river.

K. On January 20, 1956, the Pecos river water district was declared by the state engineer.

L. Creation of a water sub-district and appointment of a water master for the Gallinas river is needed to ensure public safety and that the interests of each water user are protected so that they receive the water to which they are entitled.

[19.26.11.8 NMAC - N, 8/29/03]

19.26.11.9 CONCLUSIONS OF LAW:

A. Water sub-district creation and appointment of water master

(1) The state engineer concludes that in the interest of public safety and in the interest of water users, the GALLINAS RIVER WATER SUB-DISTRICT should be formed and a water master appointed on a permanent basis, so as to administer the waters of the Gallinas river, a tributary of the Pecos river stream system, in accordance with New Mexico law.

(2) The GALLINAS RIVER WATER SUB-DISTRICT water master shall have immediate charge of the apportionment of waters in the water sub-district under the general supervision of the state engineer, and shall appropriate, regulate and control the waters of the water sub-district so as to prevent waste.

B. Administration of affected water rights

(1) The state engineer concludes that the immediate administration of water rights on the Gallinas river is necessary for the protection of the public, protection of prior water rights, and the prevention of waste.

(2) The state engineer concludes that the water master of the water sub-district created by this rule shall apportion the waters of the sub-district in accordance with the guidelines, existing or future regulations, manuals, directions, and supervision provided by the state engineer.

(3) Additional instructions to the water master for the apportionment of water within the sub-district will be based upon available data, models, (including water master manual models), surveys and the state engineer's best professional judgment.

(4) The state engineer concludes that the water sub-district created by this rule shall include the following organizational features:

(a) The appointment of a single water master for the GALLINAS RIVER WATER SUB-DISTRICT.

(b) The water master shall be a direct employee of the OSE and shall receive compensation in an amount to be determined by the state engineer. The water master shall also be compensated for all actual and necessary expenses incurred in performing the duties of water master.

(c) After appointment of the water master, the state engineer shall prepare a budget of estimated amount required to pay the compensation and expenses of the water master to the end of the current fiscal year, and shall certify the same to the board of county commissioners of San Miguel and Guadalupe counties, wherein the duties of the water master are to be performed. The budget shall specify the distribution of the amounts to be charged against and allotted to each water user or ditch owner, and which respective amounts shall be based upon the quantity of water received or to be received by each in proportion to the total quantities of water delivered or to be delivered under the water rights of all. The salary and expenses of the water master will be paid monthly by the board of county commissioners in accordance with the requirements of NMSA, 1978, Section 72-3-4 (1907).

[19.26.11.9 NMAC - N, 8/29/03]

CHAPTER 27: UNDERGROUND WATER

PART 1: GENERAL PROVISIONS

19.27.1.1 ISSUING AGENCY:

Office of State Engineer.

[Recompiled 12/31/01]

19.27.1.2 SCOPE:

[RESERVED]

[Recompiled 12/31/01]

19.27.1.3 STATUTORY AUTHORITY:

Adopted pursuant to the authority of Sections 72-2-8, 72-2-12 and 72-13-4, New Mexico Statutes Annotated, 1978 Compilation.

[Recompiled 12/31/01]

19.27.1.4 DURATION:

[Permanent]

[Recompiled 12/31/01]

19.27.1.5 EFFECTIVE DATE:

November 1, 1966

[Recompiled 12/31/01]

19.27.1.6 OBJECTIVE:

This rule is formulated for the purpose of carrying out the provisions of the statutes governing underground waters and describing the present extent of all declared underground water basins in New Mexico.

[Recompiled 12/31/01]

19.27.1.7 DEFINITIONS:

[RESERVED]

[Recompiled 12/31/01]

19.27.1.8 DECLARATION OF EXISTING WATER RIGHTS; INITIATION OF WATER RIGHTS: DECLARATIONS, AFFIDAVITS - FILING:

If declarations of existing water rights are filed as permitted by Section 75-11-5, [72-12-5 NMSA 1978] they shall be prepared in triplicate on forms furnished by the state engineer and shall be accompanied by the proper filing fee (Article 6-1) [now 19.25.5.8 NMAC]. Declarations may also be accompanied by affidavits of persons having personal knowledge of the history of the works or by other evidence tending to substantiate the claims and by copies of well logs, if available. If such supporting documents are filed in the state engineer office, they will be filed together with the declaration.

[SE-66-1 Article 1-1, Recompiled 12/31/01]

19.27.1.9 APPLICATIONS TO APPROPRIATE - PRIORITY:

Where the well is to be drilled within the boundaries of a declared underground water basin (Article 7) [now 19.27 NMAC] application to appropriate shall be filed in triplicate on forms provided by the state engineer accompanied by the proper filing fee (Article 6-1) [now 19.25.5.8 NMAC]. The date of receipt of an application by the state engineer or his authorized representative shall be endorsed thereon. The date of filing establishes the original priority date of any application, subject to the acceptance of the application and the issuance of a permit by the state engineer and the timely application of water to beneficial use.

[SE-66-1 Article 1-2, Recompiled 12/31/01]

19.27.1.10 AMOUNT OF WATER; AMENDMENT; ADVERTISEMENT:

The application and permit limit the nature and extent of the water right. A permit may be granted for an amount less than that asked for in the application. In any event the annual amount of the appropriation permitted under one application will be limited to the annual amount that can reasonably be expected to be produced and applied to beneficial use from a single well constructed at the point, in the manner, and for the purpose set forth in the application.

[SE-66-1 Article 1-3, Recompiled 12/31/01]

19.27.1.11 FORM OF APPLICATION; CORRECTIONS:

Before acceptance by the state engineer, applications tendered must conform to the requirements of the statutes and rules and regulations of the state engineer. The description of the well location shall be to the nearest forty (40) acre subdivision, unless otherwise prescribed by the state engineer. Applications which are defective as to form or fail to comply with the rules and regulations shall be returned promptly to the applicant with a statement of the changes required. If the changes are made and the application refiled with the state engineer within thirty (30) days after the applicant has been notified of the changes required, the application shall be processed with a priority date the same as the original filing date. When a corrected application is filed after the time allowed, it shall be treated in all respects as an original application received on the date of its refiling.

[SE-66-1 Article 1-4, Recompiled 12/31/01]

19.27.1.12 PUBLICATION:

Upon receipt of an acceptable application the state engineer shall prepare and issue a notice for publication and shall send it to the applicant with instructions that it be published weekly for three consecutive weeks in a newspaper of general circulation within the county in which the well is to be drilled. Cost of publication shall be borne by the applicant who shall also see that the newspaper's affidavit of publication is filed with the state engineer within sixty (60) days from date of issuance of the notice for

publication. If the application is for a new appropriation, failure to file affidavit of publication within the time allowed shall cause postponement of the priority date of the application to the date of receipt of such proof in proper form. In the case of any other type of application, failure to file proofs within the time allowed shall cause the application to be cancelled. The issuance of a notice for publication does not in any way indicate favorable action on the application by the state engineer.

[SE-66-1 Article 1-5, Recompiled 12/31/01]

19.27.1.13 RE-ADVERTISEMENTS - EXPENSES:

The completeness and accuracy of the notice for publication is the responsibility of the applicant. If there are substantive errors in the published notice, it shall be re-advertised at the expense of the applicant.

[SE-66-1 Article 1-6, Recompiled 12/31/01]

19.27.1.14 PROTEST - FILING, ANSWER:

Any person deeming that the granting of an application would be detrimental to his rights may protest in writing the proposal set forth in the application. The protest shall set forth reasons why the application should not be approved and must be filed in triplicate with the state engineer not later than ten (10) days after the date of the last publication of the notice referred to in Article 1-5 [now 19.27.1.12 NMAC]. The state engineer shall mail one copy of the protest to the applicant. The applicant may file with the state engineer, in triplicate, answers to such protests. The state engineer shall furnish all protestants with a copy thereof by mail.

[SE-66-1 Article 1-7, Recompiled 12/31/01]

19.27.1.15 HEARINGS:

In the event an application is protested, hearings shall be conducted pursuant to the provisions of Article 3 [now 19.25.4 NMAC] of these rules and regulations.

[SE-66-1 Article 1-8, Recompiled 12/31/01]

19.27.1.16 CANCELLATION:

Upon failure of the applicant to comply with the provisions of the permit within the time specified in such permit or to secure an extension of time within which to do so, the state engineer shall cancel the permit.

[SE-66-1 Article 1-9, Recompiled 12/31/01]

19.27.1.17 CONSTRUCTION OF WELL:

The well shall be constructed in full compliance with the terms of the permit and the rules and regulations of the state engineer.

[SE-66-1 Article 1-10, Recompiled 12/31/01]

19.27.1.18 TRANSPORTATION:

In the case of any ground water right initiated after September 6, 1912, the water may not be transported in earthen ditches more than one and one half (1 1/2) miles or in open ditches or flumes lined with concrete or other impervious material more than two (2) miles from the well which is the source of supply.

[SE-66-1 Article 1-11, Recompiled 12/31/01]

19.27.1.19 STORAGE:

Water from artesian or shallow ground water sources may be stored in reservoirs or ponds to facilitate and improve irrigation practices. The capacity of such reservoirs shall be so limited that they will store the continuous flow of a well producing more than three hundred (300) gallons of water per minute for no more than forty-eight (48) hours and the flow of a well producing three hundred (300) gallons of water per minute or less for no more than ninety-six (96) hours.

[SE-66-1 Article 1-12, Recompiled 12/31/01]

19.27.1.20 REQUIREMENTS AFTER COMPLETION OF WELL:

As soon as practicable after completing the well and the application of water to the intended use pursuant to the permit, the applicant shall have prepared and file a "final inspection and report" in triplicate on forms provided by the state engineer. The final report shall be accompanied by a plat prepared in accordance with Article 5 [now 19.25.3 NMAC]. The final inspection and report shall be prepared by a registered professional engineer and land surveyor or by a registered land surveyor as specified by the state engineer.

[SE-66-1 Article 1-13, Recompiled 12/31/01]

19.27.1.21 CERTIFICATE AND LICENSE:

Upon receipt of "final inspection and report" together with attachments thereto required by Article 1-13 [now 19.27.1.20 NMAC], the state engineer shall issue a "certificate and license to appropriate."

[SE-66-1 Article 1-14, Recompiled 12/31/01]

19.27.1.22 APPLICATIONS NOT REQUIRING PUBLICATION AND NOTICE - DOMESTIC AND LIVESTOCK USE - AMOUNT:

Section 75-11-1 [72-12-1 NMSA 1978] excepts applications for water for certain purposes from the requirement for publication of notice. The state engineer shall permit use under such applications for domestic, stock watering, drinking and sanitary purposes, and the irrigation of not to exceed one (1) acre of trees, lawn and non-commercial garden in an amount not to exceed three (3) acre-feet per annum, subject to limitation imposed by the courts. Applications for wells for such purposes shall be prepared and filed in triplicate on forms provided by the state engineer. Compliance with the provisions of Article 4 [now 19.27.4 NMAC] is required in the completion of such wells.

[SE-66-1 Article 1-15, Recompiled 12/31/01]

19.27.1.23 RETENTION OF OLD WELL FOR DOMESTIC USE - REQUIREMENTS:

If water rights have been transferred from a well but the owner thereof desires to retain the well for the purposes of Article 1-15 [now 19.27.1.22 NMAC], an application must be filed as required by that article. Prior to approval, the state engineer shall determine whether the subject well can be retained in use without causing waste.

[SE-66-1 Article 1-16, Recompiled 12/31/01]

19.27.1.24 CHANGE OF WELL LOCATION AND PLACE AND/OR PURPOSE OF USE; SUPPLEMENTAL WELLS; EXTENSIONS OF TIME; PREREQUISITES FOR DRILLING; DEEPENING AND REPAIRING:

A. Change of location of well: The owner of a water right within a declared underground water basin cannot change the location of his well without the approval of the state engineer except as otherwise provided in Section 75-11-23 [72-12-23 NMSA 1978].

B. Replacement well within one hundred feet of original well: The owner of a water right may drill and use a replacement well within one hundred (100) feet of the original well prior to application, publication, and hearing, if:

- (1) The well is drilled in the same, and only the same, underground source; and
- (2) The appropriation is of the same amount of water allowed by his water right in the original well; and
- (3) An emergency situation exists which would result in serious economic loss if application, publication and hearing were required; and

(4) The owner notifies the state engineer office of these facts and of the location of the proposed well by registered letter prior to drilling; provided he files application for a permit within thirty (30) days after drilling begins.

(5) The owners of other water rights claiming injury by the drilling of a replacement well under these circumstances may not enjoin the drilling of such well or the use of the water from the well but are limited to an action at law to recover damages and to their right to protest the granting of a permit.

C. Replacement well over one hundred feet from original well: The owner of a water right may drill and use a replacement well over one hundred (100) feet from his original well upon making application without waiting for the completion of publication and hearing, if:

(1) The well is drilled in the same and only the same underground source; and

(2) The appropriation is of the same amount of water allowed by his water right in the original well; and

(3) An emergency situation exists which would result in serious economic loss if publication and hearing were required; and

(4) The state engineer after preliminary investigation finds that the change does not impair existing water rights and grants him a permit authorizing the drilling and use of the replacement well prior to publication and hearing;

(5) When preliminary investigation by the state engineer causes him to reasonably believe that the drilling and use of a replacement well may impair existing rights then no permit shall be issued until after publication and hearing.

[SE-66-1 Article 2-1, Recompiled 12/31/01]

19.27.1.25 CHANGE OF PLACE AND/OR PURPOSE OF USE:

The owner of a water right within a declared underground water basin cannot change the place or purpose of use of the right without the approval of the state engineer. Such approval will be granted only after proper application is made and the state engineer determines that the proposed move would not impair existing water rights.

[SE-66-1 Article 2-2, Recompiled 12/31/01]

19.27.1.26 FORM OF APPLICATION:

Application to change the place or purpose of use and an application to change the location of a well may be combined in one application. Applications must be submitted to the state engineer in triplicate with the fee set out in Article 6 [now 19.25.5 NMAC].

[SE-66-1 Article 2-3, Recompiled 12/31/01]

19.27.1.27 SUPPLEMENTAL WELL:

The owner of a right to appropriate underground water may make application to drill a well to supplement his supply up to the amount of his existing right. Such application shall be filed on forms provided by the state engineer.

A. Supplemental well - emergency conditions: The owner of a water right may drill and use a supplemental well upon making application but prior to publication and hearing, if (Section 75-11-25) [72-12-24 NMSA 1978]:

- (1) The well is drilled in the same, and only the same, underground source; and
- (2) The supplemental well does not increase the appropriation of water to an amount above the existing water rights; and
- (3) An emergency situation exists which would result in serious economic loss if publication and hearing were required; and
- (4) The state engineer after preliminary investigation advises that the supplemental well does not impair existing water rights and grants him a permit authorizing the drilling and use of the supplemental well prior to publication and hearing.

B. If the preliminary investigation by the state engineer causes him to reasonably believe that the drilling and use of a supplemental well may impair existing rights then no permit shall be issued until after publication and hearing.

[SE-66-1 Article 2-4, Recompiled 12/31/01]

19.27.1.28 DESCRIPTION OF WELL LOCATION AND PLACE OF USE:

The legal description of both the present and the proposed well location must be set out in an application. Well description shall be to the nearest forty (40) acre subdivision, unless otherwise prescribed by the state engineer. If the use is for irrigation, the lands from which water rights are transferred and the lands to which water rights are transferred shall be described by legal subdivision in the application. Where the use is for other than irrigation, the place of use shall be described by legal subdivision.

[SE-66-1 Article 2-5, Recompiled 12/31/01]

19.27.1.29 DECLARATION PRIOR TO CHANGE:

A right not of record in the state engineer office must first be declared before an application to move it or change its use can be considered (Article 1-1) [now 19.27.1.8 NMAC]. Such declarations shall be accompanied by maps showing well locations and place of use and conforming with requirements of Article 5 [now 19.25.3 NMAC].

[SE-66-1 Article 2-6, Recompiled 12/31/01]

19.27.1.30 PUBLICATION; HEARING PROCEDURE:

The applicant must publish notice of the application the same as if it were an application to appropriate (Article 1-5) [now 19.27.1.12 NMAC]. Protest and hearing procedures are the same as for an application to appropriate (Article 1-7 and 1-8) [now 19.27.1.14 NMAC and 19.27.1.15 NMAC].

[SE-66-1 Article 2-7, Recompiled 12/31/01]

19.27.1.31 PERMIT - GRANTING OF, LIMITATIONS, CANCELLATION:

When the state engineer determines that the proposed change will not impair the existing rights of others, a permit shall be granted. The permit may be subject to limitations and failure of the applicant to comply with the limitations may result in cancellation of the permit.

[SE-66-1 Article 2-8, Recompiled 12/31/01]

19.27.1.32 REQUIREMENTS AFTER COMPLETION OF WELL:

As soon as practicable after completing a supplemental or replacement well, the permittee shall file "proof of completion of well" in triplicate on forms provided by the state engineer.

[SE-66-1 Article 2-9, Recompiled 12/31/01]

19.27.1.33 REQUIREMENT FOR LICENSE FOR CHANGE OF PLACE AND/OR PURPOSE OF USE:

The requirements for a license for change of place or purpose of use are the same as for a new appropriation (Article 1) [now 19.27.1 NMAC]. Provided that, with respect to irrigation rights, if only a portion of an irrigation right is transferred for the irrigation of other lands, then both the lands from which water rights are transferred and the lands to which water rights are transferred must be surveyed and maps prepared showing these lands. If the portion of an irrigation right moved is transferred to purposes other than irrigation, only the move-from area need be mapped. Such maps shall be included in the final inspection and report.

[SE-66-1 Article 2-10, Recompiled 12/31/01]

19.27.1.34 LICENSE - WHEN ISSUED:

When all the required documents have been filed, the license to appropriate water for the new place or purpose of use shall be issued. No license will be issued where only a change of location of well (replacement well) or supplemental well is involved.

[SE-66-1 Article 2-11, Recompiled 12/31/01]

19.27.1.35 MOVE-FROM AREA - TERMINATION OF WATER USAGE:

When a permit to change the place of use is granted, use of water at the move-from location shall immediately cease unless otherwise specified in the permit.

[SE-66-1 Article 2-12, Recompiled 12/31/01]

19.27.1.36 WELL PLUGGING:

Wells from which all water rights have been removed shall be plugged in accordance with Article 4-14 and 4-19.1 [now 19.27.4.21 NMAC and 19.27.4.26 NMAC].

[SE-66-1 Article 2-13, Recompiled 12/31/01]

19.27.1.37 DISCREPANCIES BETWEEN LANDS PERMITTED AND LANDS IRRIGATED:

The state engineer will not require application for change of place of use of underground waters when the description of the land actually irrigated varies slightly from the description shown on the original application.

[SE-66-1 Article 2-14, Recompiled 12/31/01]

19.27.1.38 APPLICATIONS FOR EXTENSIONS OF TIME:

Applications for extensions of time permitted by Section 75-11-8 [72-12-8 NMSA 1978] shall be filed in triplicate, accompanied by the proper filing fee and shall state the reasons why additional time is required. Such applications shall fully describe the well and work already completed, the lands irrigated or the extent to which water has otherwise been placed to beneficial use and shall be accompanied by a plan setting forth dates when the well will be completed and equipped and the water applied to use under the permit. Financial inability to proceed shall not be deemed sufficient reason for granting extensions of time.

[SE-66-1 Article 2-15, Recompiled 12/31/01]

19.27.1.39 PREREQUISITES OF DRILLING, DEEPENING, REPAIRING:

A licensed well driller may drill, deepen, repair or clean a well within a declared underground basin only when the owner of such well has a valid permit from the state engineer for the work to be performed; or when the laws have been met which cover emergency well drilling (Article 4-8) [now 19.27.4.15 NMAC].

[SE-66-1 Article 2-16, Recompiled 12/31/01]

PART 2-3: [RESERVED]

PART 4: WELL DRILLER LICENSING; CONSTRUCTION, REPAIR AND PLUGGING OF WELLS

19.27.4.1 ISSUING AGENCY:

Office of the State Engineer.

[19.27.4.1 NMAC - Rp, 19.27.4.1 NMAC, 6/30/2017]

19.27.4.2 SCOPE:

These regulations apply to well driller licensing, drill rig supervisor registration, and well drilling within the state of New Mexico. These rules do not apply to:

- A.** work on pumping equipment;
- B.** oil wells;
- C.** gas wells;
- D.** cathodic protection wells;
- E.** geothermal resources, as defined in the Geothermal Resources Act, currently at Sections 19-13-1 to -28 NMSA 1978 (1967, as amended through 2013);
- F.** construction boreholes and soil boreholes that encounter water and are less than thirty feet; or
- G.** mine drill holes that do not encounter water.

[19.27.4.2 NMAC - Rp, 19.27.4.2 NMAC, 6/30/2017]

19.27.4.3 STATUTORY AUTHORITY:

Section 72-12-1 NMSA provides that the water of underground streams, channels, artesian basins, reservoirs, or lakes having reasonably ascertainable boundaries are declared to be public waters which belong to the public and are subject to appropriation for beneficial use. Section 72-2-8 NMSA gives the state engineer authority to adopt regulations and codes to implement and enforce any provision of any law administered by the state engineer. Section 72-12-12 NMSA states that it shall be unlawful for any person, firm, or corporation to drill or to begin the drilling of a well for water from an underground source without a valid, existing license for the drilling of such wells issued by the state engineer of New Mexico. Section 72-12-13 NMSA states any person desiring to engage in the drilling of one or more wells for underground water within the boundaries of any underground source shall file an application with the state engineer for a well driller's license. Sections 72-12-14 through 72-12-17 NMSA further detail requirements for well drillers in New Mexico. Sections 72-12-25 through 72-12-28 NMSA provide requirements for deep wells in non-potable aquifers. Sections 72-13-1 through 72-13-12 NMSA detail the requirements for the drilling of artesian wells.

[19.27.4.3 NMAC - Rp, 19.27.4.3 NMAC, 6/30/2017]

19.27.4.4 DURATION:

Permanent.

[19.27.4.4 NMAC - Rp, 19.27.4.4 NMAC, 6/30/2017]

19.27.4.5 EFFECTIVE DATE:

June 30, 2017, unless a later date is cited at the end of a section.

[19.27.4.5 NMAC - Rp, 19.27.4.5 NMAC, 6/30/2017]

19.27.4.6 OBJECTIVE:

To establish requirements for well drilling in order to ensure wells are designed, drilled, constructed, repaired and plugged in a safe manner.

[19.27.4.6 NMAC - Rp, 19.27.4.6 NMAC, 6/30/2017]

19.27.4.7 DEFINITIONS:

Unless defined below or in a specific section of these rules, all other words used herein shall be given their customary and accepted meaning.

A. Aquifer: A geologic formation, group of formations, or part of a formation that contains sufficient saturated permeable material to yield significant quantities of water to wells.

B. Artesian well: A well that penetrates a saturated hydrogeologic unit and allows underground water to rise or move appreciably into another hydrogeologic unit, or allows underground water to rise to freely flow at the ground surface. For regulatory purposes, the determination of whether a well or borehole is artesian shall be made by the state engineer, taking into consideration the potential for loss of water at the ground surface or into another hydrogeologic unit.

C. Drill rig: Any power-driven percussion, rotary, boring, coring, digging, jetting, or augering machine used in the construction of a well or borehole.

D. Drill rig supervisor: A drill rig operator working under the direct supervision of a well driller, to whom the well driller assigns responsible charge of regulated well drilling activities using equipment that is under the direct control of the well driller, and who is registered with the office of the state engineer to perform such responsibilities.

E. Drilling: See definition for well drilling.

F. Ground source heat pump: A heat pump that uses the earth itself as a heat source and heat sink. It is coupled to the ground by means of a closed-loop heat exchanger (ground coil) installed horizontally or vertically underground. Also termed on-site geo-exchange heat pump and earth - or ground - coupled heat pump.

G. Hydrogeologic unit: Any soil or rock unit or zone which by virtue of its porosity or permeability, or lack thereof, has a distinct influence on the storage or movement of groundwater.

H. Inter-aquifer exchange: The movement of groundwater that flows appreciably between hydrogeologic units.

I. Mine drill hole: A borehole to explore for or delineate deposits or accumulations of ore, mineral, or rock resources.

J. Repair: Changing some part of an existing well by deepening, hydrofracturing, re-casing, perforating, re-perforating, installing packers or seals, and any other material change in the existing well design or construction. Material changes include but are not limited to casing installation or modification including casing extensions, installation or modification of liner pipe, reaming or under reaming of the borehole, pitless unit installation on an artesian well that flows (or capable of flowing) at ground surface, or any other work requiring a permit from the state engineer to repair and deepen the well.

K. Well: A borehole, cased, uncased or screened, or other hydraulic structure that is drilled, driven, or dug, vertically, horizontally, or at an angle, that penetrates, is intended to penetrate, or otherwise affects the water stored in a saturated hydrogeologic unit. The intended use may be: water supply; monitoring water levels or water quality; exploratory purposes; water remediation; injection of water, both into saturated and

unsaturated zones; dewatering purposes; ground source heat pump purposes, or for other purposes.

L. Well driller: A person subject to the licensing requirements of 72-12-12 through 72-12-17 NMSA 1978 and 19.27.4 NMAC.

M. Well drilling, well drilling activities: The activities associated with the drilling of a well, including, but not limited to, the construction, drilling, completion, repair, deepening, cleaning, and plugging of a well.

[19.27.4.7 NMAC - Rp, 19.27.4.7 NMAC, 6/30/2017]

19.27.4.8 WELL DRILLER'S LICENSE REQUIRED:

Any person who engages in well drilling activities shall obtain a well driller's license issued by the state engineer (except, under New Mexico state law, a well driller's license is not required for driven wells that do not require the use of a drill rig and which have an outside casing diameter of two and three-eighths ($2\frac{3}{8}$) inches or less). A person found engaged in the business of well drilling within the state of New Mexico without a license can be prosecuted in accordance with New Mexico statutes.

[19.27.4.8 NMAC - Rp, 19.27.4.8 NMAC, 6/30/2017]

19.27.4.9 [RESERVED]

19.27.4.10 [RESERVED]

19.27.4.11 [RESERVED]

19.27.4.12 WELL DRILLER REQUIREMENTS:

A. Bond requirements: A well driller shall have a bond in the penal sum of five thousand dollars (\$5,000) on a form acceptable to the state engineer. The surety backing the bond shall be acceptable to the state engineer. A well driller's license shall be valid only so long as the bond remains in effect. The bond shall:

- (1) be conditioned upon proper compliance with state law and the rules and regulations of the state engineer;
- (2) be effective for the period of time for which the well driller's license is issued;
- (3) stipulate the obligee as the "office of the state engineer"; and
- (4) not be represented to the public as a performance bond.

B. Insurance requirements: A well driller shall have general liability insurance in the minimum amount of three hundred thousand dollars (\$300,000) and appropriate insurance under the Workers' Compensation Act. Proof of insurance may be in the name of the well driller or in the name of the company for which the well driller is employed or doing business as (DBA). That insurance must be maintained continuously if the well driller is for hire.

C. National ground water association exams requirements: Required national ground water association exams shall consist of the general drilling exam and the appropriate specialized drilling exam(s) developed and administered by the national ground water association. A well driller engaging in the well drilling activities listed below shall have passed the corresponding national ground water association exams within five years prior to applying for a well driller license.

Well Drilling Activity	National Ground Water Association Exam*
Constructing wells by drilling using the cable tool method	General drilling exam and cable tool drilling exam
Constructing wells by drilling using the air rotary method	General drilling exam and air rotary drilling exam
Constructing wells by drilling using the mud rotary method	General drilling exam and mud rotary drilling exam
Constructing wells by drilling using the reverse circulation method	General drilling exam and reverse circulation drilling exam
Constructing wells using the jetting and driving methods	General drilling exam and jetting and driving wells exam
Constructing wells by augering or constructing monitoring wells	General drilling exam and augering and monitoring exam
All other well drilling activities	General drilling exam

*The state engineer shall make the final determination of the test(s) necessary should a question arise regarding applicability of available test(s) to specialized drilling method(s) of well construction.

D. New Mexico code exam requirements: A well driller shall have obtained a minimum score of seventy percent on the New Mexico code exam prepared and furnished by the state engineer or his authorized representative and self- administered by the applicant.

(1) Exam fee: No fees or advanced scheduling forms are required for the New Mexico code exam.

(2) Test content: The New Mexico code exam may include questions on the following subjects:

(a) New Mexico water law as it pertains to well driller licensing, well drilling and construction, and the administration of underground water, and

(b) the rules and regulations of the state engineer pertaining to well driller licensing, well drilling and construction, and the administration of underground water.

(3) **Re-examination:** An applicant who fails to obtain the minimum passing score on the exam may retake the exam.

(a) No fees or advanced scheduling forms are required to retake the New Mexico code exam.

(b) Any applicant found cheating on the exam, as determined by the state engineer, will not be permitted to reapply to take the exam for a period of one year.

E. Experience requirements: A well driller shall have at least two years of relevant, on-site experience working under the supervision of a well driller while exhibiting a due regard for the interest of the state in the protection of its public waters.

F. Drill rig requirements: A well driller shall continuously maintain with the state engineer a description of each drill rig the well driller owns or controls. The well driller's license number and the name of the well drilling company shall be clearly displayed on each drill rig.

G. Drill rig supervisor requirements: A well driller may allow a drill rig supervisor to provide onsite supervision of well drilling activities. The well driller is responsible for the actions of each drill rig supervisor while supervising well drilling activities.

[19.27.4.12 NMAC - Rp, 19.27.4.12 NMAC, 6/30/2017]

19.27.4.13 [RESERVED]

19.27.4.14 [RESERVED]

19.27.4.15 WELL DRILLER'S LICENSE APPLICATION AND REVIEW:

If the state engineer finds that an applicant has fulfilled the requirements for licensure, the state engineer shall issue a well driller's license and a well driller's identification card to the applicant.

A. Application - form and content: A well driller's license application shall be completed on a form prescribed by the state engineer. The application shall include:

- (1) proof of required bonds;
- (2) proof of required insurances;

- (3) documentation that applicant has passed the required exams listed in Subsection C of 19.27.4.12 NMAC;
- (4) the completed New Mexico code exam;
- (5) documentation of prior well drilling experience;
- (6) three letters of reference (one shall be from a well driller, or a state's licensing authority, attesting to the applicant's well drilling ability);
- (7) a separate form prescribed by the state engineer with a description and side-view photograph of each drill rig the applicant owns or controls;
- (8) registration forms and letters of reference and listing the name of each drill rig supervisor that the applicant plans to supervise; and
- (9) other information required by the state engineer.

B. Filing fee: A fee of fifty dollars (\$50) is required to accompany a well driller's license application.

C. Well driller's license duration: A well driller's license issued by the state engineer will be valid for a period of two years.

D. Well driller's license conditions: A well driller's license shall set forth which well drilling activities the well driller may engage in, corresponding to the table in Subsection C of 19.27.4.12 NMAC, and the conditions under which the well driller shall operate well drilling activities within the state of New Mexico.

E. Well driller's identification card: A well driller's identification card shall be made available for inspection upon request whenever a well driller is conducting well drilling activities.

[19.27.4.15 NMAC - Rp, 19.27.4.15 NMAC, 6/30/2017]

19.27.4.16 WELL DRILLER'S LICENSE AMENDMENT:

The well driller's license amendment application shall be filed with the state engineer to provide notification of any change to information provided for the current well driller's license or to request to engage in additional well drilling activities. A well driller shall notify the state engineer within 10 days of any change to the current well driller's license.

A. Application - form and content: A well driller's license amendment application shall be completed on a form prescribed by the state engineer. The application shall include:

- (1) any changes in address or any other contact information;
- (2) any changes to business or corporation name;
- (3) any change in current drill rig supervisors;
- (4) any change in current ownership or control of a drill rig;
- (5) documentation of passing the required exams listed in Subsection C of 19.27.4.12 NMAC, corresponding to the additional well drilling activities; and
- (6) other information required by the state engineer.

B. Filing fee: No fee is required to accompany a well driller's license amendment application.

C. Effect of amendment: An amendment to a well driller's license does not extend the original two year licensure period as set forth in Subsection D of 19.27.4.15 NMAC.

[19.27.4.16 NMAC - Rp, 19.27.4.16 NMAC, 6/30/2017]

19.27.4.17 [RESERVED]

[19.27.4.17 NMAC - Rp, 19.27.4.17 NMAC, 6/30/2017]

19.27.4.18 [RESERVED]

[19.27.4.18 NMAC - Rp, 19.27.4.18 NMAC, 6/30/2017]

19.27.4.19 WELL DRILLER'S LICENSE EXPIRATION:

A well driller's license shall expire on the date set out on the well driller's license. A well driller shall file a well driller's license renewal application in accordance with 19.27.4.20 NMAC at least 10 days prior to the expiration date. If a well driller fails to file a well driller's license renewal application prior to the expiration date, the well driller's license shall automatically expire. A well driller allowing their well driller's license to expire must apply for a new well driller's license in accordance with the requirements of 19.27.4.12 NMAC. A well driller failing to renew a well driller license by the expiration date due to circumstances beyond their control may apply for an extension of time in accordance with 19.27.4.37 NMAC, if the state engineer finds the request to be reasonable and just. The state engineer may impose additional conditions of approval.

[19.27.4.19 NMAC - Rp, 19.27.4.19 NMAC, 6/30/2017]

19.27.4.20 WELL DRILLER'S LICENSE RENEWAL:

A well driller's license renewal application shall be filed with the state engineer at least 10 days prior to the expiration date.

A. Application - form and content: A well driller's license renewal application shall be completed on a form prescribed by the state engineer. The application shall include:

- (1) proof of required bonds;
- (2) proof of required insurances;
- (3) a list of drill rig supervisors that the well driller supervises;
- (4) evidence of meeting the continuing education requirements of both the well driller and all drill rig supervisors; and
- (5) other information required by the state engineer.

B. Filing fee: A fee of fifty dollars (\$50) is required to accompany the well driller's license renewal application.

C. Continuing education requirements: During each two year licensing period, a well driller shall complete a minimum of eight continuing education hours approved by the state engineer. The continuing education hours shall relate to well drilling. At least two hours of the continuing education shall be specific to regulatory requirements regarding well drilling in the state of New Mexico. The state engineer will publish a list of approved continuing education courses for the current calendar year on the state engineer's website.

D. Incomplete application: If the well driller's license renewal application is deemed incomplete or lacks documentation required by the state engineer, the well driller will be notified in writing to submit missing information. The state engineer will allow 30 days to submit the missing information.

E. Renewal discretion: The state engineer will consider any complaints, reprimands, or compliance orders related to the previous two year license period when reviewing a well driller's license renewal application. Approval will be at the state engineer's discretion and shall set forth the conditions under which the well driller shall operate well drilling activities within the state of New Mexico.

[19.27.4.20 NMAC - Rp, 19.27.4.20 NMAC, 6/30/2017]

19.27.4.21 REPRIMANDS, SUSPENSION OR REVOCATION OF WELL DRILLER'S LICENSE:

The state engineer may issue a written reprimand, a compliance order issued pursuant to Section 72-2-18 NMSA, or, after notice and hearing held pursuant to 19.25.2 NMAC, suspend or revoke a well driller's license if it is found that a well driller:

- A. made a material misstatement of fact in an application for license;
- B. failed to submit or submitted an incomplete well record or well log;
- C. made a material misstatement of fact in a well record or well log;
- D. drilled a well in any declared underground water basin without a state engineer permit;
- E. violated the conditions of the state engineer permit under which the well was being drilled;
- F. violated the conditions of a well driller's license;
- G. failed to be present or ensure the presence of a drill rig supervisor at the drilling site during well drilling activities;
- H. violated the rules and regulations of the state engineer;
- I. failed to assure the protection of the public safety, health, welfare, and property in the well construction process; or
- J. for other cause as determined by the state engineer.

[19.27.4.21 NMAC - Rp, 19.27.4.21 NMAC, 6/30/2017]

19.27.4.22 WELL DRILLER'S LICENSE REINSTATEMENT AFTER REVOCATION:

A well driller with a revoked license is prohibited from engaging in well drilling activities, unless working under the supervision of a licensed well driller. License revocation may also result in the forfeiture of the well driller bond as set forth in Subsection A of 19.27.4.12 NMAC. After the revocation period has run, a well driller may apply for a new well driller's license pursuant to 19.27.4.15 NMAC.

[19.27.4.22 NMAC - N, 19.27.4.22 NMAC, 6/30/2017]

19.27.4.24 [RESERVED]

[19.27.4.24 NMAC - Rp, 19.27.4.24 NMAC, 6/30/2017]

19.27.4.25 APPLICATION FOR REGISTRATION AS A DRILL RIG SUPERVISOR:

A drill rig supervisor may provide onsite supervision of well drilling activities. A drill rig supervisor shall work under the direction of a well driller. The well driller is responsible for the actions of each drill rig supervisor that they direct to provide onsite supervision of well drilling activities. An applicant for registration as a drill rig supervisor shall meet the following requirements.

A. Qualified applicant: A qualified applicant for registration as a drill rig supervisor shall:

- (1) have at least two years of relevant, on-site experience working under the supervision of a well driller;
- (2) be at least 18 years of age; and
- (3) have passed the New Mexico code exam.

B. Application - form and content: An application for registration as a drill rig supervisor shall be completed on a form prescribed by the state engineer. The application shall include the name, physical and mailing addresses, and phone number of the applicant, a letter of reference from the well driller for whom the supervisor will work, or a state's licensing authority, attesting to applicant's well drilling ability, the license number and contact information of the well driller the applicant plans to work for, if known, documentation of prior well drilling experience, the completed New Mexico code exam, and other information required by the state engineer.

C. Filing fee: No fee is required to accompany the application.

[19.27.4.25 NMAC - Rp, 19.27.4.25 NMAC, 6/30/2017]

19.27.4.26 APPLICATION REVIEW AND REGISTRATION REQUIREMENTS FOR DRILL RIG SUPERVISOR:

If the state engineer finds that the applicant has fulfilled the requirements for registration as set forth in 19.27.4.25 NMAC, the state engineer shall register the applicant as a drill rig supervisor. The registration shall set forth the conditions under which the drill rig supervisor may provide onsite supervision of well drilling activities within the state of New Mexico.

A. Registration duration: A registration issued by the state engineer will be valid for a period of two years.

B. Identification card: The state engineer will issue a drill rig supervisor identification card with the registration showing the same date upon which the well driller's license expires. Each drill rig supervisor, when providing onsite supervision of well drilling activities within the state of New Mexico shall have their identification card available for inspection upon request.

[19.27.4.26 NMAC - Rp, 19.27.4.26 NMAC, 6/30/2017]

19.27.4.27 RENEWAL OF DRILL RIG SUPERVISOR REGISTRATION:

A drill rig supervisor may retain their registration by request on the well driller's license renewal application for whom they are registered.

A. Application - form and content: The application shall be the well driller's license renewal application that includes all drill rig supervisors employed by the well driller, evidence of meeting the continuing education requirements, and other information required by the state engineer.

B. Continuing education requirements: During each two year registration period, a drill rig supervisor shall complete a minimum of eight continuing education hours approved by the state engineer. The continuing education hours shall relate to well drilling. At least two hours of the continuing education shall be specific to regulatory requirements regarding well drilling in the state of New Mexico. The drill rig supervisor shall submit proofs of completion of their completed classes for the well driller to submit upon the renewal of the license in accordance with 19.27.4.19 NMAC.

[19.27.4.27 NMAC - Rp, 19.27.4.27 NMAC, 6/30/2017]

19.27.4.28 [RESERVED]

[19.27.4.28 NMAC - Rp, 19.27.4.28 NMAC, 6/30/2017]

19.27.4.29 WELL DRILLING - GENERAL REQUIREMENTS:

All wells shall be constructed in such a manner as to prevent contamination from entering the well or subsurface, to prevent commingling or inter-aquifer exchange of groundwater, to prevent loss of hydraulic head between hydrogeologic units, and to prevent unintended flood waters or surface water from entering the well and contaminating the aquifer. All well plugging shall be accomplished through filling or sealing the well in such a manner as to prevent the well, including the annular space outside the casing, from being a channel allowing the vertical movement of water. A well driller shall ensure that the appropriate permits, approval, or emergency authorization has been granted by the state engineer prior to the well drilling activities, or ensure that the state engineer has been properly notified in accordance with 72-12-22 NMSA 1978. While conducting well drilling activities, the well driller shall have a copy of the approved permit and plan of operations on site and available for inspection upon request. A well

driller shall ensure that well drilling activities are conducted in accordance with the appropriate sections of 19.27.4.30 NMAC through 19.27.4.33 NMAC, and the following requirements:

A. On-site supervision of well drilling: A well driller or drill rig supervisor shall be present at the drilling site during well drilling activities.

B. Materials: Materials and processes used in well drilling shall conform to industry standards acceptable to the state engineer. Acceptable standards include, but are not limited to, standards developed by the national ground water association (NGWA), the American water works association (AWWA), the American standard for testing materials (ASTM), the American petroleum institute (API), the American national standards institute (ANSI), and the national sanitation foundation (NSF). The state engineer shall make the final determination of applicability of standards if any of the acceptable standards are different from one another. Materials used in well construction shall be in new or good condition. No materials or substances shall be introduced during the drilling process that may cause water contamination or contamination to the subsurface. Drilling fluids, additives, sealants, treatment chemicals, and materials as applicable must be designated for potable water well use and be NSF/ANSI standard 60 certified.

C. Cleaning of drilling equipment: All equipment used in the borehole shall be maintained in a clean and sanitary condition to prevent contamination and to protect the public health. When drilling multiple boreholes on the same site in areas of known or presumed contamination, the equipment will be sanitized between boreholes.

D. Well setbacks: All wells shall be set back a minimum of 50 feet from an existing well of other ownership, unless a variance has been granted by the state engineer. All wells shall be set back from potential sources of contamination such as, but not limited to, septic tanks and sewage leach fields, cemeteries, livestock lagoons and sewage lines, in accordance with applicable federal, state, or local requirements.

E. Requirement to cover or cap well during construction stoppage: During construction stoppage, a well shall be securely covered or capped unless a well driller or drill rig supervisor is on-site tending to the well and takes all steps to protect public welfare.

F. Casing height: The top of the completed well casing shall extend a minimum of 18 inches above the ground and appropriate steps shall be taken to prevent damage to well casings.

G. Flush mount completion: Flush mount completions, such as monitor wells located within traffic areas or in areas where security risks call for discreet completion, shall be completed in a manner that appropriately seals against entry of foreign material and fluids, and with the well casing extending above bottom of the monitoring well vault, and with a monitoring well vault that incorporates a securely fastened lid designed to withstand traffic.

H. Subsurface vault: If a well is completed within a subsurface vault, the casing shall extend a minimum of 18 inches above the floor of the subsurface vault, and be appropriately sealed against entry of foreign materials and fluids.

I. Surface completion: Surface well completions shall be completed in a manner that appropriately seals against entry of foreign material and fluids.

J. Annular space: The annular space between borehole and casing or between casings shall be dimensioned and sealed in accordance with 19.27.4.30 through 19.27.4.33 NMAC. At well completion, the top of any annular space shall be sealed, or fitted with an appropriate cover, preventing entry of foreign materials and fluids and disallowing the upward escape of groundwater.

K. Requirement to cover or cap completed wells and for measurement ports: A permanent well cap or cover shall be securely affixed to the well casing upon completion, unless an installed pump assembly provides secure coverage of or a secure cover for the wellhead. All wellheads shall have a securable opening of at least a 1/2" diameter that allows convenient access for water level measurement. An artesian well that flows (or capable of flowing) at ground surface shall be equipped with a valve to which a pressure gauge may be connected for hydrostatic pressure measurement.

L. Wellhead venting: Vents installed in the wellhead shall be protected against the entrance of foreign materials or fluids by installation of down-turned and screened fittings. All other openings in wellheads shall be sealed to prevent entrance of foreign material and flood waters.

M. Well identification tag: Any well constructed to divert water shall be tagged with a well identification tag in plain view. For above-grade wells, the well identification tag shall be affixed to the exterior of the well casing or cap using an aluminum or stainless steel band or other method approved by the state engineer. For wells finished below-grade, the well identification tag shall be clearly placed inside the well vault next to the well riser or on the first exposed discharge pipe from the well. The state engineer will provide a well identification tag when a permit is issued. The permit holder is responsible for maintaining the well identification tag and replacing missing, damaged, or illegible well identification tags with a duplicate well identification tag.

N. Well record: The well driller shall keep a record of each well drilling activity as the work progresses.

(1) Time for filing: The well driller shall file a complete well record with the state engineer and the permit holder no later than 30 days after completion of the drilling project or well repair.

(2) Form - content: The well record shall be on a form prescribed by the state engineer and shall include the name and address of the permittee, the well driller's name and license number, the state engineer file number, the name of each drill rig

supervisor that supervised well drilling activities, the location of the well (reported in latitude and longitude using a global positioning system (gps) receiver capable of five meters accuracy), the date when drilling or other work began, the date when drilling or other work concluded, the depth of the well, the depth to water first encountered, the depth to water upon completion of the well (measured by a method approved by the state engineer), the estimated well yield, the method used to estimate well yield, the size and type of casing, the location of perforations, the location of the annular seal, the location of centralizers, the intervals and types of all annular fill and sealant material, and any other information required by the state engineer. The well record shall include a completed lithologic log. The lithologic log shall include detailed information on the depth, thickness, and lithology of all strata penetrated, including whether each stratum was water bearing.

(3) Forms - Incomplete: Well records deemed incomplete by the state engineer may be returned to the well driller for proper completion and shall be refiled within 30 days of the date of notification.

O. Lithologic samples: When requested by the state engineer, the well driller shall furnish lithologic samples ("drill cuttings") of the hydrogeologic units penetrated during drilling operations. The method of sampling, interval of sampling, and the quantities required will be specified by the state engineer.

P. Removal of drilling materials:

(1) In constructing a well, the well driller shall take all reasonable precautions to protect the producing aquifer from final retention of drilling solids, including cuttings, drilling mud, and drilling fluid additives. Prior to setting of filter pack, or upon completion of well, the well driller shall to the extent possible remove additives and drilling solids introduced into or accumulated in the wellbore during well drilling.

(2) Drilling fluids and cuttings shall be contained on the drilling site or on property under the control of the well owner, and not be allowed to migrate or be discharged off that property except for authorized disposal. Drilling fluids and cuttings shall not be discharged into any waters of the state.

Q. Repair of existing wells:

(1) If a well that is to be repaired or deepened is not in conformance with these rules, the application for permit shall describe the methods and materials by which the well will be brought into conformance with these rules. In the absence of a well log for the existing well it must be demonstrated to the satisfaction of the state engineer that the well is in conformance.

(2) If an inner casing is installed to prevent leakage of undesirable water into a well, the annular space between the casings shall be completely sealed by packers,

casing swedging, pressure grouting or other methods which will prevent the movement of water between the casings.

[19.27.4.29 NMAC - Rp, 19.27.4.29 NMAC, 6/30/2017]

19.27.4.30 WELL DRILLING - NON-ARTESIAN (UNCONFINED) WELL REQUIREMENTS:

A well driller shall ensure that the well drilling activities associated with the drilling of non-artesian wells are made in accordance with 19.27.4.29 NMAC and the following requirements:

A. Annular seal: All wells shall be constructed to prevent contaminants from entering the borehole from the ground surface by sealing the annular space around the outermost casing. If surface casing (outer casing) is used then there must be a seal between the surface casing and the production casing at the ground surface. When necessary, annular seals will be required to prevent inter-aquifer exchange of water, to prevent the loss of hydraulic head between hydrogeologic zones, and to prevent the flow of contaminated or low quality water. Sealing operations shall be made with an office of the state engineer approved sealant. Casings shall be centralized within the interval to be sealed so grout or sealing materials may be placed evenly around the casing.

(1) Annular space: The diameter of the borehole in which the annular seal is to be placed shall be at least four inches greater than the outside diameter of the outermost casing. The diameter of the borehole in which the annular seal is to be placed may be reduced to three inches greater than the outside diameter of the outermost casing if pressure grouting from the bottom up is used for grout placement and the well casing is centralized in the borehole. If surface casing is used, the inside diameter of the surface casing shall be at least three inches greater than the outside diameter of the production casing.

(2) Annular seal completed to ground surface: Annular seals shall extend from ground surface to at least 20 feet below ground surface.

(a) If a well is completed less than 20 feet below ground surface, the seal shall be placed from ground surface to the bottom of the blank casing used. However, if a monitoring well is completed less than 20 feet below ground surface, the seal shall be placed for the maximum length practical in order that the well is constructed to prevent contamination, to prevent inter-aquifer exchange of water, to prevent flood waters from contaminating the aquifer, and to prevent infiltration of surface water.

(b) The annular seal shall extend to ground surface unless a pitless adapter is installed. For wells completed with a pitless adapter, the top of the seal shall extend to one foot below the pitless adapter connection.

(c) All sealing materials placed deeper than 20 feet below ground surface shall be placed by tremie pipe or by pressure-grouting through the well casing and up the annulus.

(d) If in the event the water level in the annular space is less than 20 feet from surface, all sealing material shall be filled from the bottom upwards to ground surface using a tremie pipe. Time release bentonite pellets maybe used without a tremie pipe where standing water is above 20 feet.

(3) Annular seals to prevent inter-aquifer exchange of water or loss of hydraulic head between hydrogeologic units: Sufficient annular seal shall be placed to prevent inter-aquifer exchange of water and to prevent loss of hydraulic head between hydrogeologic units. Sufficient annular seal shall be placed to prevent loss of hydraulic head through the well annulus, through perforated or screened casing, or through an open bore interval.

(4) Annular seals to prevent the contamination of potable water: Wells which encounter non-potable, contaminated, or polluted water at any depth shall have the well annulus sealed and the well properly screened to prevent the commingling of the undesirable water with any potable or uncontaminated water. The use of salt-tolerant sealing materials may be required by the state engineer in wells that encounter highly mineralized water.

(5) Annular seal requirements for community water supply wells: Community water supply wells shall also be completed with annular seals in accordance with other regulatory agencies' applicable ordinances or rules. Well drillers may be subject to other applicable federal, state, or local regulations.

B. Well casing: The well casing shall have sufficient wall thickness to withstand formation and hydrostatic pressures placed on the casing during installation, well development, and well use.

C. Well plugging: A non-artesian well that is a permanently discontinued well or a well in a state of disrepair, a failed well drilling attempt, an improperly constructed or completed well, or a replaced well with a permit condition to plug shall be plugged. A well plugging plan of operations shall be approved by the state engineer prior to plugging unless the well is a replaced well with a permit condition to plug. The state engineer may require that the plugging process be witnessed by an authorized representative.

(1) Methods and materials: To plug a well, the entire well shall be filled from the bottom upwards to ground surface using a tremie pipe. The bottom of the tremie shall remain submerged in the sealant throughout the entire sealing process; other placement methods may be acceptable and approved by the state engineer. The well shall be plugged with an office of the state engineer approved sealant for use in the plugging of non-artesian wells. Wells that do not encounter a water bearing stratum

shall at a minimum be plugged by filling the well with drill cuttings or clean native fill to within 10 feet of ground surface and by plugging the remaining 10 feet of the well to ground surface with a plug of the office of the state engineer approved sealant.

(2) Contamination indicated: Wells encountering contaminated water or soil may require coordination between the office of the state engineer and the New Mexico environment department (or other authorized agency or department) prior to the plugging of the well. Specialty plugging materials and plugging methods may be required.

(3) Plugging record: A well driller shall keep a record of each plugging activity as the work progresses. The well driller shall file a complete plugging record with the state engineer and the permit holder no later than 30 days after completion of the plugging. The plugging record shall be on a form prescribed by the state engineer and shall include the name and address of the well owner, the well driller's name and license number, the name of each drill rig supervisor that supervised the well plugging, the state engineer file number for the well, the location of the well (reported in latitude and longitude using a global positioning system (gps) receiver capable of five meters accuracy), the date when plugging began, the date when plugging concluded, the plugging material(s) used, the interval in which each plugging material was installed, the amount of plugging material installed, the depth of the well, the size and type of casing, the location of perforations, and any other information required by the state engineer.

[19.27.4.30 NMAC - Rp, 19.27.4.30 NMAC, 6/30/2017]

19.27.4.31 WELL DRILLING – ARTESIAN (CONFINED) WELL REQUIREMENTS:

Artesian wells shall be constructed such that groundwater does not move appreciably between hydrogeologic units nor flow uncontrolled to the ground surface. For regulatory purposes, the final determination of whether a well is artesian shall be based upon evaluations made by the state engineer. A well driller shall ensure that well drilling activities associated with the drilling of artesian wells are made in accordance with 19.27.4.29 NMAC and the following requirements:

A. Plan of operations: Before conducting any well drilling activities for an artesian well, prior approval from the owner of the land upon which the well drilling activity is planned must be granted, the permittee, well owner, or the owner's agent or attorney, shall provide a plan of operations describing the proposed work on a form prescribed by the state engineer, and the plan of operations shall be approved by the state engineer. The plan of operations shall provide information on the well design and materials to be used in the well construction, including the cementing and testing procedures. If the materials or cementing and testing procedures are not provided for in these rules and regulations, then the plan of operations must provide documentation to support their use. The plan of operations shall be signed by a well driller. Well drilling activities of an artesian well shall be conducted in accordance with the plan of operations as approved and conditioned by the state engineer. While conducting well drilling activities the well

driller shall have a copy of the approved permit and plan of operations on site and available for inspection upon request.

B. Construction inspection: The casing, cementing, plugging, and testing of an artesian well shall be witnessed by an authorized representative of the state engineer. Alternatives to onsite witnessing may be utilized at the discretion of the state engineer.

C. Artesian wells - no prior knowledge of artesian condition: In the course of drilling a well, if a previously unidentified artesian stratum is encountered, the state engineer shall be immediately notified that an artesian stratum was encountered, any flowing groundwater to ground surface shall be controlled immediately, and a plan of operations shall be submitted for approval in accordance with Subsection A of 19.27.4.31 NMAC.

D. Casing and coupling material requirements: Casing and coupling material used in the construction of an artesian well shall meet specifications approved by the state engineer prior to well drilling. The casing for artesian wells shall be inspected by an authorized representative of the state engineer prior to well construction.

E. Casing installation requirements: The casing shall be centralized in the borehole throughout the casing string hole and centered at the top so grout may be evenly placed around the casing. A commercially made float shoe shall be installed on the lowermost joint of the casing to be landed unless an alternate method for cementing has been approved by the state engineer. The casing shall be un-perforated and the well shall be designed in a manner to prevent the commingling of water from the artesian stratum with water in an overlying or underlying hydrogeologic unit. All threaded casing joints must be tightened to manufacturer's designated torque specifications during installation. Casing shall be set at or near the base of the confining formation or the top of the artesian stratum.

F. Annular space: The diameter of the borehole in which the seal shall be placed shall be at least four inches greater than the outside diameter of the casing set to include the coupling diameter. If pressure grouting from the bottom up is used for sealant placement then the diameter of the borehole in which the seal shall be placed may be reduced to three inches greater than the outside diameter of the casing set. If surface casing is used, the inside diameter of the surface casing shall be at least three inches greater than the outside diameter of the production casing including the diameter of the coupling on the casing.

G. Annular space sealing requirements: The annular seal shall consist of an office of the state engineer approved sealant. The seal shall originate at or near the base of the confining unit and shall be continuously placed to ground surface. The sealing process shall be witnessed by an authorized representative of the state engineer. When necessary, sufficient annular seal shall be placed to prevent inter-aquifer exchange of water and to prevent loss of hydraulic head between hydrogeologic units.

H. Annular space - seal placement: The office of the state engineer approved sealant shall be placed in the annular space by one of the following methods:

(1) Tremie method: The office of the state engineer approved sealant shall be pumped using a tremie pipe to fill the annular space of the well from the bottom of the seal to ground surface. Flow of undiluted sealant out of the top of the annular space shall be established with the tremie pipe suspended in the annulus. The lower end of the tremie shall remain immersed in the sealant for the duration of pumping. The tremie pipe may be gradually removed as sealant level in the annulus rises.

(2) Pressure grout method: The office of the state engineer approved sealant shall be pumped down the inside of the casing, through the float shoe, and up the annular space until undiluted sealant circulates out of the annulus at ground surface. Excess sealant will be displaced out of the casing from behind by pumping an industry approved drillable plug in front of the drilling fluid until it has bumped up sufficiently at the float shoe. The fluid volume pumped into the casing to displace the sealant shall equal the inside volume of the casing string itself to assure total displacement. Should undiluted sealant not be displaced out the top of the annulus in a continuous pressure grouting operation, the sealing job may be completed by the use of the tremie method. If the tremie method is employed, then a tremie pipe shall be suspended in the annulus to the approximate level of the competent sealing material. The office of the state engineer approved sealant shall be pumped to fill the annular space of the well from the top of the competent sealing material to ground surface.

I. Sealing off formations: The compressive strength of office of the state engineer approved sealant shall be 500 psi or more before well drilling is resumed. Cement must be allowed to set a minimum of 48 hours before well drilling is resumed. Shorter set times may be requested if approved alternate sealants or accelerants are used. Sealing off of the formations shall be checked by a method acceptable to the state engineer. In the case of remediation of artesian boreholes, the compressive strength of office of the state engineer approved sealant shall be 1,000 psi or more before artesian head is shut-in at the wellhead.

J. Repair requirements: When an artesian well is in need of repair, the permittee, well owner, or the owner's agent or attorney with prior approval from the owner of the land upon which the well is located, shall provide a plan of operations to the state engineer for approval. The plan of operations shall be prepared in accordance with Subsection A of 19.27.4.31 NMAC. When required in the approved plan of operations, before repairs are made to an artesian well, the well shall first be inspected by an authorized representative of the state engineer to determine if the condition of the well is such that it may be repaired. When a leak in the casing is found and the casing and well are otherwise in good condition, the state engineer may allow the well to be repaired. A packer or bridge plug may be required to complete necessary well repairs. The use of a lead packer is prohibited. An inspection shall be made at the completion of the work to determine if the repair is satisfactory. During an inspection, the well shall be open to allow for the entrance of equipment for testing and inspection.

K. Plugging requirements: An artesian well that is a permanently discontinued well or a well in a state of disrepair, a failed well drilling attempt, or an improperly constructed or completed well shall be plugged. In accordance with Subsection A of 19.27.4.31 NMAC, a well plugging plan of operations shall be approved by the state engineer prior to plugging. The well shall be plugged from the bottom upwards with an office of the state engineer approved sealant. The well plugging shall be witnessed by an authorized representative of the state engineer.

(1) Contamination indicated: Wells encountering contaminated water or soil may require coordination between the office of the state engineer and the New Mexico environment department (or other authorized agency or department) prior to the plugging of the well. Specialty plugging materials and plugging methods may be required.

(2) Plugging record: A well driller shall keep a record of each plugging activity as the work progresses. A plugging record shall be filed in accordance with Paragraph (3) of Subsection C of 19.27.4.30 NMAC.

[19.27.4.31 NMAC - Rp, 19.27.4.31 NMAC, 6/30/2017]

19.27.4.32 [RESERVED]

[19.27.4.32 NMAC - Rp, 19.27.4.32 NMAC, 6/30/2017]

19.27.4.33 WELL DRILLING REQUIREMENTS FOR DEEP WELLS IN NON-POTABLE AQUIFERS:

Deep non-potable wells are wells administered under Article 12, Chapter 72-12-25 through Chapter 72-12-28 NMSA, and are defined as wells drilled or recompleted into an aquifer, the top of which aquifer is at a depth of 2500 feet or more below the ground surface at any location at which a well is drilled and which aquifer contains only non-potable water. Non-potable water means water containing greater than or equal to 1,000 part per million (or milligrams per liter) total dissolved solids ($TDS \geq 1,000 \text{ mg/L}$). A well driller shall ensure that well drilling activities associated with the drilling of deep non-potable wells are made in accordance with 19.27.4.29 NMAC and 19.27.4.31 NMAC and the following:

A. Deep non-potable well plan of operations: Before conducting the drilling of a deep non-potable well, a deep non-potable well plan of operations describing the proposed work shall be provided on a form prescribed by the state engineer. The deep non-potable well plan of operations shall provide information on the well design and materials to be used in the well construction, including the cementing and testing procedures, and any other pertinent data required by the state engineer. If the materials or cementing and testing procedures are not provided for in these rules and regulations, then the deep non-potable well plan of operations must provide documentation to support their use. The deep non-potable well plan of operations shall be signed by the

well driller conducting the well drilling activities. A deep non-potable well plan of operations must be approved by the state engineer before the drilling of any deep non-potable well. Drilling of a deep non-potable well shall be conducted in accordance with the deep non-potable well plan of operations as approved and conditioned by the state engineer. While conducting well drilling activities the well driller shall have a copy of the approved permit and deep non-potable well plan of operations on site and available for inspection upon request.

B. Longevity of casing: The deep non-potable well plan of operations required under subsection A must provide information that supports the longevity of the selected casing in response to potentially corrosive salt concentrations. Deep non-potable wells must use centralizers and H-55, J-55 grade casing equivalent or better.

C. Annular seals to prevent the contamination of potable water: Wells where non-potable, contaminated, or polluted water is anticipated or encountered at any depth shall have the well annulus sealed and the well properly screened to prevent the commingling of the undesirable water with any potable or uncontaminated water. The use of salt-tolerant sealing materials may be required by the state engineer in wells where highly mineralized water is anticipated or encountered.

D. Well schematic: The deep non-potable well plan of operations required under subsection A must provide a well schematic illustrating proposed construction depths, dimensions, materials, and methods as well as the target aquifer, stratigraphy and hydrogeology to be encountered during drilling.

E. Sealing off formations: Cement must be allowed to set a minimum of 48 hours before well drilling is resumed. Shorter set times may be requested if approved alternate sealants or accelerants are used. If shorter set times are requested, documentation shall be provided in the deep non-potable well plan of operations substantiating the appropriate cement curing time to meet the compressive strengths necessary, consistent with anticipated shut-in pressures. Shorter set times shall not be permitted unless prior approval is granted by the state engineer. Sealing off of the formations shall be checked by a method acceptable to the state engineer.

F. Cementing service reports: The well driller shall provide any cementing service reports with the submission of the well log within 30 days. The state engineer may require preliminary information as it becomes available.

G. Cement bond logging: The well driller shall provide the results of any cement bond logging conducted with the submission of the well log within 30 days. The state engineer may require results of cement bond logging within 24 hours of completion.

H. Mud logging and Geophysical logging: The well driller shall provide any mud logging and geophysical logging reports created with the submission of the well log within 30 days. The state engineer may require results of geophysical logging within 24

hours of completion. The state engineer may require periodic mud logging or lithologic logging during the course of the project.

I. Drill cuttings or core: The well driller shall submit copies of the well record and geophysical logs, and representative samples of drill cuttings or core collected during drilling of any deep non-potable well to the New Mexico bureau of geology and mineral resources for archiving in the bureau's library of subsurface data.

J. Specialized Drilling Equipment: The deep non-potable well plan of operations required under Subsection A of 19.27.4.33 NMAC must contain a request from the well driller to use of any specialized drilling equipment for the well construction. Specialized drilling equipment may not be used for well construction unless prior approval is granted by the state engineer.

19.27.4.36 REQUIREMENTS FOR MINE DRILL HOLES THAT PENETRATE A WATER-BEARING STRATUM:

Any person, firm, or corporation drilling a mine drill hole that penetrates a water-bearing stratum, whether confined or unconfined, shall immediately notify the state engineer by filing an application for permit to drill an exploratory well. The person, firm, or corporation shall file a well plugging plan of operations in accordance with Subsection C of 19.27.4.30 NMAC or Subsection K of 19.27.4.31 NMAC concurrently with the application for permit. Upon the state engineer's approval of the well plugging plan of operations, the person, firm, or corporation shall have the mine drill hole plugged within the timeframe stated on the conditions of approval.

[19.27.4.36 NMAC - Rp, 19.27.4.36 NMAC, 6/30/2017]

19.27.4.37 REQUEST FOR VARIANCE:

The rules in 19.27.4.29, 19.27.4.30, 19.27.4.31 and 19.27.4.33 NMAC are not intended to cover every situation encountered during well drilling. Hydrogeologic conditions vary across the state, and may warrant the need to deviate from the rules contained in 19.27.4.29, 19.27.4.30, 19.27.4.31, or 19.27.4.33 NMAC. A request for a variance to a rule in this part shall be submitted in writing. The request shall contain a detailed justification that demonstrates that such a variance is necessary to preclude

unreasonable hardship, or that application of a rule in this part would not be practicable. The state engineer may grant the variance if the state engineer finds the request to be reasonable and just. The state engineer shall respond in writing to the request for variance and, if the variance is granted, the state engineer may impose conditions of approval.

PART 5: THE USE OF PUBLIC UNDERGROUND WATERS FOR HOUSEHOLD OR OTHER DOMESTIC USE IN ACCORDANCE WITH SECTION 72-12-1.1 NMSA

19.27.5.1 ISSUING AGENCY:

State Engineer.

[19.27.5.1 NMAC - N, 8-15-2006]

19.27.5.2 SCOPE:

The requirements for the use of public underground waters in accordance with Section 72-12-1.1 NMSA.

[19.27.5.2 NMAC - N, 8-15-2006]

19.27.5.3 STATUTORY AUTHORITY:

Section 72-12-1 NMSA provides that the water of underground streams, channels, artesian basins, reservoirs or lakes, having reasonably ascertainable boundaries, is declared to belong to the public and to be subject to appropriation for beneficial use. Section 72-12-1 NMSA further provides for the limited use of relatively small amounts of public underground waters in the irrigation of not to exceed one acre of noncommercial

trees, lawn or garden, and for household or other domestic use. Section 72-12-1.1 NMSA sets out the requirements for the filing of applications and the issuance of permits for the use of public underground waters for the irrigation of not to exceed one acre of noncommercial trees, lawn or garden, and for household or other domestic use. Section 72-2-8 NMSA gives the state engineer authority to adopt regulations to implement and enforce any provision of any law administered by him.

[19.27.5.3 NMAC - N, 8-15-2006]

19.27.5.4 DURATION:

Permanent.

[19.27.5.4 NMAC - N, 8-15-2006]

19.27.5.5 EFFECTIVE DATE:

August 15, 2006, unless a later date is cited at the end of a section.

[19.27.5.5 NMAC - N, 8-15-2006]

19.27.5.6 OBJECTIVE:

To update the existing regulations and establish new regulations for the use of public underground waters for household or other domestic use in accordance with Section 72-12-1.1 NMSA.

[19.27.5.6 NMAC - N, 8-15-2006]

19.27.5.7 DEFINITIONS:

Unless defined below or in a specific section of these regulations, all other words used herein shall be given their customary and accepted meaning.

A. 72-12-1.1 domestic well permit: A permit issued for domestic use in accordance with Section 72-12-1.1 NMSA or its predecessor statutes. Included in this definition are 72-12-1.1 domestic well permits that have been adjudicated.

B. 72-12-1.1 domestic well: The point of diversion authorized under a 72-12-1.1 domestic well permit.

C. Administrative guidelines: A compilation of policies and procedures intended to provide guidance to office of the state engineer personnel for processing pending and future water rights applications in a specifically defined geographic area. The administrative guidelines shall not limit the state engineer's authority to take alternative or additional actions relating to the management of the water resources of the

specifically defined geographic area as provided by New Mexico statutes, orders of the court, or the written rules and regulations of the state engineer.

D. Association: A water users association established under the Sanitary Projects Act (Section 3-29-2(B) NMSA).

E. Consumptive use: The quantity of water consumed during the application of water to beneficial use. The quantity of water beneficially consumed depends on the requirements of a particular enterprise and how it applies and consumes the water. The authorized diversion of water that is not beneficially consumed in the course of water use is not part of the allowable consumptive use allocation of the water right. The consumptive use of water by a crop (evapotranspiration) does not include depletions such as evaporation from canals, ditches or irrigated fields during surface application, transpiration by vegetation along ditches, evaporation or leakage from irrigation water pipes, evaporation of sprinkler spray and drift losses, and evaporation of runoff and seepage from irrigated fields.

F. Domestic use: The use of water for household purposes or for the irrigation of not to exceed one acre of noncommercial trees, lawn, garden, or landscaping. Drinking and sanitary uses that are incidental to the operations of a governmental, commercial, or non-profit facility are included in this definition. This definition does not include the use of underground water from a well used primarily for livestock watering as provided for under Section 72-12-1.2 NMSA.

G. Domestic well management area: A bounded area overlying a stream-connected aquifer, specifically described by section, township and range, or by other land survey descriptions, that requires special water resource protection as determined by the state engineer.

H. Household: A single-family residence including outbuildings such as guesthouses, barns, and sheds.

I. Hydrologic unit: A physically definable, continuous and interconnected surface water or groundwater system. A hydrologic unit may consist of an aquifer, a group of interconnected aquifers, and any hydrologically connected springs, streams, rivers, lakes or other surface water bodies.

J. Infrastructure capacity area: An area defined by an association, based on factors determining the capacity to provide water, including, but not limited to, the location of existing lines, adequacy of existing infrastructure, the availability of water and water rights, and as reviewed by and then filed with the state engineer.

[19.27.5.7 NMAC - N, 8-15-2006; A, 10-31-2011]

19.27.5.8 FEE SCHEDULE:

An application for permit shall be accompanied by one of the following filing fees:

- A. \$125 for an application for a 72-12-1.1 domestic well permit.
- B. \$75 for an application for permit for replacement 72-12-1.1 domestic well.
- C. \$125 for an application for permit for supplemental 72-12-1.1 domestic well.
- D. \$75 for an application for permit to repair or deepen a 72-12-1.1 domestic well.
- E. \$75 for an application for permit to amend the type of domestic use authorized under a 72-12-1.1 domestic well permit.
- F. \$200 for an application for permit to transfer a valid, existing water right into a 72-12-1.1 domestic well permit pursuant to 19.27.5.10 NMAC.

[19.27.5.8 NMAC - N, 8-15-2006]

19.27.5.9 APPLICATION FOR A 72-12-1.1 DOMESTIC WELL PERMIT:

The following requirements apply to applications filed for 72-12-1.1 domestic well permits. In addition to the requirements listed in this section and part, the drilling of a 72-12-1.1 domestic well and the amount and uses of water permitted are subject to such additional or more restrictive limitations imposed by a court, or by lawful municipal or county ordinance.

A. Form - content: An application for a 72-12-1.1 domestic well permit shall be prepared on a form prescribed by the state engineer. An application shall include the following information: the name and mailing address of the applicant, the type of domestic use being applied for, the number of households to be served, the location of the proposed well, the name of the owner of the land on which the well is to be drilled, the name and license number of the well driller (if known), the proposed depth of the well, the outside diameter of the well casing, and other information the state engineer deems necessary. The state engineer may require an application to be accompanied by a deed or purchase contract and plat of survey on file with the appropriate county.

B. Well location: The well location shall be described using universal transverse mercator (NAD 83), latitude and longitude, or the New Mexico state plane coordinate system. In addition, the well location shall be described by the lot and block number of the lot where the well is to be located (if applicable). An application to drill a well on land owned by another person, the state of New Mexico, the federal government, or another entity shall be accompanied by written consent of the landowner.

C. Multiple use well: A 72-12-1.1 domestic well permit may be conditioned to allow the diversion of water from an existing well previously permitted for livestock, irrigation, or any other beneficial purpose of use other than domestic use. The diversion of water

from a multiple use well made pursuant to a 72-12-1.1 domestic well permit shall be separately metered.

D. Amount of water: The drilling of a 72-12-1.1 domestic well and the amount and uses of water permitted are subject to such additional or more restrictive limitations imposed by a court, or by lawful municipal or county ordinance. The maximum permitted diversion of water from a 72-12-1.1 domestic well that is not subject to additional or more restrictive limitations shall be as follows:

(1) Single household: The maximum permitted diversion of water from a 72-12-1.1 domestic well permitted to serve one household shall be 1.0 acre-foot per annum, except in hydrologic units where applicant can demonstrate to the satisfaction of the state engineer that the combined diversion from domestic wells will not impair existing water rights, then the maximum permitted diversion of water from a 72-12-1.1 domestic well permitted to serve one household shall be 3.0 acre-foot per annum.

(2) Multiple households: The maximum permitted diversion of water from a 72-12-1.1 domestic well permitted to serve more than one household shall not exceed 1.0 acre-foot per annum per household served. The maximum combined diversion from a 72-12-1.1 domestic well serving three or more households shall not exceed 3.0 acre-feet per annum. For a 72-12-1.1 domestic well serving multiple households, the permit holder shall file documentation with the state engineer listing the number of households being served by the well, the owner's contact information for each household being served, and a description of the legal lot of record for each household being served. A copy of a well share agreement may be filed to support the claim that the 72-12-1.1 domestic well is serving more than one household.

(3) Drinking and sanitary uses that are incidental to the operations of a governmental, commercial, or non-profit facility: The maximum permitted diversion of water from a 72-12-1.1 domestic well permitted for drinking and sanitary uses that are incidental to the operations of a governmental, commercial, or non-profit facility shall not exceed 1.0 acre-foot per annum. The state engineer shall not issue a permit for this use unless the applicant demonstrates that no alternative water supply is reasonably accessible or available. Water may not be used under this type of 72-12-1.1 domestic well permit for any commercial use such as the manufacture of a product, car wash, water bottling, concrete batching, or the irrigation of crops grown for commercial sale.

(4) Transfer of a valid, existing water right into a 72-12-1.1 domestic well permit: The applicant for or the owner of a 72-12-1.1 domestic well permit may apply to transfer a valid, existing consumptive use water right into the 72-12-1.1 domestic well permit in accordance with Sections 72-5-23, 72-5-24, 72-12-3, and 72-12-7 NMSA, as applicable, for the purpose of increasing the permitted diversion from the 72-12-1.1 domestic well.

E. Multiple 72-12-1.1 domestic well permits on a legal lot of record: An application for a new 72-12-1.1 domestic well permit where the proposed point of

diversion is to be located on the same legal lot of record as an operational 72-12-1.1 domestic well shall be treated as an application for a supplemental well pursuant to Subsection B of 19.27.5.11 NMAC. A legal lot of record is a parcel of land that is created in a manner consistent with the zoning and planning laws in place at the time the parcel is created.

F. 72-12-1.1 domestic well permit to accompany a house or other dwelling constructed for sale: A person or other entity planning to construct and sell a house or other dwelling may apply for a 72-12-1.1 domestic well permit to provide water to the dwelling. The permit holder may use water under a 72-12-1.1 domestic well permit for activities directly related to the construction of the dwelling only if the 72-12-1.1 domestic well permit is specifically conditioned to allow such use of water from the well. Upon sale of the house or dwelling, the permit holder shall provide the new owner notice in writing of the requirement to file a change of ownership with the state engineer for the 72-12-1.1 domestic well permit. A copy of the notice shall be filed at the office of the state engineer along with a copy of the deed or other instrument of conveyance which conveyed the land upon which the 72-12-1.1 domestic well is located. At any one time, a person or other entity may not hold more than ten 72-12-1.1 domestic well permits for a well to accompany a house or other dwelling constructed for sale. If a person or other entity holds ten or more such 72-12-1.1 domestic well permits, additional 72-12-1.1 domestic well permits will be issued as written notices are filed on existing permits that reduce the number of such permits held by the person or entity to less than ten.

[19.27.5.9 NMAC - N, 8-15-2006; A, 10-31-2011]

19.27.5.10 [RESERVED]

[19.27.5.10 NMAC - N, 8-15-2006; A, 10-31-2011]

19.27.5.11 OTHER 72-12-1.1 DOMESTIC WELL PERMIT APPLICATIONS:

Other 72-12-1.1 domestic well permit applications may be made only as specifically provided for in this section. Permit applications made in accordance with this section require an existing 72-12-1.1 domestic well permit in good standing. Applications shall be prepared on a form prescribed by the state engineer and the applicant shall be the owner of record of the 72-12-1.1 domestic well permit. The description of the well location shall be made in accordance with Subsection B of 19.27.5.9 NMAC. The publication of a legal notice is not required for a permit application made in accordance with Subsection A, B, C, or D of this section. A permit issued pursuant to Subsections A, B, or C of this section for an existing 72-12-1.1 domestic well permit in good standing will not affect the maximum authorized diversion amount from the 72-12-1.1 domestic well. No change may be made to the point of diversion, place of use, or purpose of use authorized under a 72-12-1.1 domestic well permit except as provided for in Subsection E of this section.

A. Application for permit to replace a 72-12-1.1 domestic well: A permit from the state engineer is required to drill a replacement 72-12-1.1 domestic well. The state engineer shall require the well being replaced to be plugged or capped in accordance with the regulations of the office of the state engineer. The replacement well shall be permitted by the state engineer to serve the same authorized legal lot(s) of record and to serve the same type of domestic use as the 72-12-1.1 domestic well being replaced. An application shall include the file number of the well to be replaced, the name and mailing address of the applicant, the type of domestic use, the location of the existing well, the proposed location of the replacement well, the name of the owner of the land on which the replacement well is to be drilled, the name and license number of the well driller (if known), the proposed depth of the replacement well, the outside diameter of the replacement well casing, the reason for replacing the well, and other information the state engineer deems necessary. The state engineer may require a meter on a replacement 72-12-1.1 domestic well as a condition of the new permit.

B. Application for permit for supplemental 72-12-1.1 domestic well: A permit from the state engineer is required to drill a supplemental 72-12-1.1 domestic well. The total combined diversion from the 72-12-1.1 domestic well and the supplemental well shall not exceed the maximum diversion amount authorized under the 72-12-1.1 domestic well permit. An application shall include the name and mailing address of the applicant, the type of domestic use, the state engineer file number, the location of the existing well, the authorized maximum diversion amount of the domestic well to be supplemented, the existing capacity of the well to be supplemented, the proposed location of the supplemental well, the name of the owner of the land on which the supplemental well is to be drilled, the name and license number of the well driller (if known), the proposed depth of the supplemental well, the outside diameter of the supplemental well casing, and other information the state engineer deems necessary. The state engineer shall require the installation of a meter on both the supplemental well and the 72-12-1.1 domestic well being supplemented as a condition of the new permit.

C. Application for permit to repair or deepen a 72-12-1.1 domestic well: A permit from the state engineer is required to repair or deepen a 72-12-1.1 domestic well. A permit to repair a 72-12-1.1 domestic well is required for any type of repair work involving the use of a drill rig. A permit is not required for work on pumping equipment. An application shall include the state engineer file number of the 72-12-1.1 domestic well to be deepened or repaired, the name and mailing address of the permit holder, the location of the well, the name and license number of the well driller (if known), a description of the work to be performed, the proposed depth (if the application is for deepening the well), and other information the state engineer deems necessary. The state engineer may require a meter on a 72-12-1.1 domestic well to be repaired or deepened as a condition of the new permit.

D. Application for permit to amend the type of domestic use of a 72-12-1.1 domestic well permit: A permit from the state engineer is required to amend the type of domestic use between single household, multiple household, or drinking and sanitary

uses that are incidental to the operations of a governmental, commercial, or non-profit facility. An application shall include the state engineer file number of the 72-12-1.1 domestic well permit, the name and mailing address of the applicant, the current authorized type of domestic use, the proposed type of domestic use, and other information deemed necessary by the state engineer. The state engineer may require a meter on a 72-12-1.1 domestic well as a condition of the new permit when the type of domestic use is changed.

E. Change in point of diversion or alternate point of diversion: The point of diversion of a permitted, declared, or adjudicated 72-12-1.1 domestic well may be changed only:

(1) pursuant to a water rights settlement approved by the state engineer and a court, for those wells drilled prior to a date specified and in a manner specifically authorized by the settlement, where such settlement requires the plugging of each 72-12-1.1 domestic well for which the point of diversion is changed and prohibits the drilling of new 72-12-1.1 domestic wells within the specifically described exclusive service area; or

(2) pursuant to 72-12-7 NMSA by an owner of a 72-12-1.1 domestic well located within the infrastructure capacity area of an association, to change the point of diversion into a well owned and operated by an association in accordance with the following provisions:

(a) the change in point of diversion shall be made upon application to the state engineer and upon a showing that the change will not impair existing rights and will not be contrary to conservation of water within the state and will not be detrimental to the public welfare of the state; the application may be granted only after notice and opportunity for hearing are provided as prescribed by Subsection D of Section 72-12-3 NMSA;

(b) an association that allows the point of diversion of a domestic well to be changed to that of an association's well shall file with the state engineer at the time of application a map depicting the boundaries of the association's infrastructure capacity area and updated maps of any expansion of the boundaries of the association's infrastructure capacity area, if not already on file;

(c) only domestic wells located within the boundaries of the infrastructure capacity area of the association that were permitted prior to the time the association files its infrastructure capacity area boundaries or an update of those boundaries with the state engineer may have their points of diversion changed to the association's point of diversion;

(d) once the association files its infrastructure capacity area map or updated map with the state engineer, the state engineer shall issue permits only for new domestic wells to be located on property from which no domestic well point of diversion

has been previously changed; exceptions will be considered only if necessitated by public health, safety and welfare concerns;

(e) an association shall be listed as co-applicant on the application.

[19.27.5.11 NMAC - N, 8-15-2006; A, 10-31-2011]

19.27.5.12 CHANGE OF OWNERSHIP:

In the event of any change of ownership of a 72-12-1.1 domestic well permit the new owner shall file a change of ownership form with the state engineer in accordance with Section 72-1-2.1 NMSA. If the new owner fails to file a change of ownership in a timely manner the state engineer may cancel the 72-12-1.1 domestic well permit. The state engineer may provide written notice to a new owner of a 72-12-1.1 domestic well permit of the requirement to file change of ownership.

[19.27.5.12 NMAC - N, 8-15-2006]

19.27.5.13 ACTION OF THE STATE ENGINEER:

The state engineer shall act on all applications that are properly filed.

A. Rejection of application: The state engineer may reject an application for a 72-12-1.1 domestic well permit when the proposed 72-12-1.1 domestic well is to be located in an area where a restriction on the use of water or the drilling of new wells has been imposed by a court. The state engineer may reject an application for a 72-12-1.1 domestic well permit when the proposed 72-12-1.1 domestic well is to be located in an area of water quality concern where a prohibition on or a recommendation against the drilling of new wells has been established by a government entity.

B. Approval of application - conditions of approval: The state engineer may set forth conditions of approval for a 72-12-1.1 domestic well permit, which may include any of the following:

(1) The casing shall not exceed 7 inches outside diameter except under specific conditions in which reasons satisfactory to the state engineer are shown.

(2) The well shall be set back a minimum of 50 feet from any existing well of other ownership.

(3) If artesian water is encountered, all rules and regulations pertaining to the drilling and casing of artesian wells shall be complied with except under specific conditions in which reasons satisfactory to the state engineer are shown.

(4) The well shall be constructed by a driller licensed in the state of New Mexico. A licensed driller shall not be required for the construction of a driven well when the outside diameter of the casing does not exceed two and three-eighths ($2\frac{3}{8}$) inches.

(5) Pursuant to Section 72-8-1 NMSA, the permittee shall allow the state engineer and his representatives entry upon private property for the performance of their respective duties, including access to the well for meter reading and water level measurement.

(6) The drilling of the well and amount and uses of water permitted are subject to such limitations as may be imposed by the courts or by lawful municipal and county ordinances which are more restrictive than the conditions of this permit and applicable state engineer regulations.

(7) This permit authorizes the drilling of a well to accompany a house or other dwelling being constructed for sale. Water may only be diverted for activities directly related to the construction of the dwelling that the well will serve. Upon sale of the house or dwelling, the permit holder shall provide the new owner notice in writing of the requirement to file a change of ownership with the state engineer for the 72-12-1.1 domestic well permit. A copy of the notice shall be filed at the office of the state engineer along with a copy of the deed or other instrument of conveyance which conveyed the land upon which the 72-12-1.1 domestic well is located. This condition shall automatically expire when the office of the state engineer accepts a change of ownership for filing in the name of the new owner intending to divert water from the well. No water may be diverted from the 72-12-1.1 domestic well by the new owner until a change of ownership has been recorded at the office of the state engineer.

(8) The permit holder shall ensure that a well record has been filed with the state engineer no later than twenty days after the completion of the well drilling.

(9) Any diversion of water made in excess of the authorized maximum diversion amount in any calendar year shall be repaid with twice the amount of the over-diversion during the following calendar year. Repayment shall be made by either: (a) reducing the diversion during the following calendar year from the 72-12-1.1 domestic well that is the source of the over-diversion; or (b) acquiring or leasing a valid, existing consumptive use water right in an amount equal to the repayment amount and submitting to the state engineer for his approval a plan for the proposed repayment during the following calendar year. The plan for the proposed repayment shall be on a form prescribed by the state engineer.

(10) The permit is subject to cancellation for non-compliance with the conditions of approval or if otherwise not exercised in accordance with the terms of the permit.

(11) The right to divert water under this permit is subject to curtailment by priority administration as implemented by the state engineer or a court.

(12) A 72-12-1.1 domestic well permit shall automatically expire unless the well is completed and the well record is filed with the state engineer within one year of the date of issuance of the permit.

C. Metering requirements: When a metering device is required by the state engineer on a 72-12-1.1 domestic well, the totalizing meter shall be installed before the first branch of the discharge line from the well. The meter installation shall be in accordance with the specifications adopted by the state engineer. The holder of the 72-12-1.1 domestic well permit shall file a meter installation and inspection report with the office of the state engineer, documenting the make, model, serial number, date of installation, and initial reading of the meter prior to diversion of water. Pumping records for the 3 proceeding calendar months shall be submitted to the appropriate state engineer district office on or before the 10th of January, April, July, and October of each year unless a different reporting period has been established in the conditions of approval of the permit.

(1) The state engineer shall require a meter on each new 72-12-1.1 domestic well permitted:

- (a)** within a domestic well management area;
- (b)** when a metering requirement is imposed by the courts;
- (c)** for drinking and sanitary domestic use that is incidental to the operations of a governmental, commercial, or non-profit facility;
- (d)** for multiple households domestic use;
- (e)** as a supplemental 72-12-1.1 well; the 72-12-1.1 domestic well being supplemented shall also require a meter; and
- (f)** as a multiple use well such that the diversion of water for domestic use is separately metered.

(2) The state engineer may require a meter on a new 72-12-1.1 domestic well:

- (a)** permitted for single household domestic use;
- (b)** permitted to accompany a residence or other dwelling constructed for sale;
- (c)** as a condition of a permit to repair or deepen a 72-12-1.1 domestic well;
- (d)** as a condition of a permit to amend the type of domestic use of a 72-12-1.1 domestic well permit; or

(e) as a condition of a permit to transfer a valid, existing water right to a 72-12-1.1 domestic well permit in accordance with subsection E of 19.27.5.14 NMAC.

D. Well setbacks: All new 72-12-1.1 domestic wells shall be set back a minimum of 50 feet from an existing well of other ownership unless a variance has been granted by the state engineer. The state engineer may grant a variance for a replacement well or to allow for maximum spacing of the well from a source of groundwater contamination. All 72-12-1.1 domestic wells shall be set back from potential sources of contamination in accordance with the rules and regulations of the New Mexico environment department.

E. Well identification tag: The state engineer may require that a 72-12-1.1 domestic well be tagged with a well identification tag. If a well tag is required, the tag shall be affixed in plain view and the permit holder shall be responsible for maintaining the well identification tag.

F. Permit expiration: Each 72-12-1.1 domestic well permit shall be conditioned by the state engineer to require the 72-12-1.1 domestic well be completed and a well record be filed with the state engineer within one year of the date of issuance of the permit. A 72-12-1.1 domestic well permit shall automatically expire unless the well is completed and the well record is filed with the state engineer within one year of the date of issuance of the permit. No extension of time shall be granted by the state engineer, and if a 72-12-1.1 domestic well permit expires, a new permit shall be obtained and the appropriate fee paid.

G. Well record: The well driller shall keep a record of each well drilled as the work progresses. The well driller shall file a complete well record with the state engineer and the permit holder no later than twenty (20) days after completion of the well drilling. A well log shall be filed for each hole drilled, including a drill hole that does not encounter water. It is the responsibility of the permit holder to ensure that the well record for the 72-12-1.1 domestic well has been properly filed with the state engineer.

[19.27.5.13 NMAC - N, 8-15-2006; A, 10-31-2011]

19.27.5.14 DOMESTIC WELL MANAGEMENT AREA:

As hydrologic conditions require, the state engineer may declare all or part of a stream connected aquifer as a domestic well management area to prevent impairment to valid, existing surface water rights. The additional protection of mined aquifers is managed by the state engineer through the declaration of a critical management area and the development of administrative guidelines for the critical management area.

A. Administrative guidelines: The state engineer shall develop administrative guidelines for each declared domestic well management area. The administrative guidelines will be based on the hydrologic conditions of the domestic well management area and the valid, existing water rights located therein. The administrative guidelines shall set forth the maximum diversion amounts and other additional restrictions that will

be conditioned on new 72-12-1.1 domestic well permits issued within the management area. Administrative guidelines for a domestic well management area and accompanying maps shall be available at each district office of the state engineer. The administrative guidelines shall also be posted on the office of the state engineer website (www.ose.state.nm.us).

B. Declaration of domestic well management area: The state engineer shall hold a public meeting within the geographic area of a proposed domestic well management area before he declares the area and adopts the administrative guidelines. Notice of the public meeting and a copy of the draft administrative guidelines for the domestic well management area shall be posted at the appropriate district office a minimum of 30 days prior to the date of the meeting. Notice of the public meeting and of the draft administrative guidelines will be published in a newspaper of general circulation in the area being declared once a week for three consecutive weeks, with final publication occurring not less than 10 days before the date of the public meeting. Persons who are or may be affected by the proposed declaration of the domestic well management area may appear and comment. Written public comments on the proposed domestic well management area and the administrative guidelines shall be filed with the office of the state engineer on or before the date of the public meeting. The additional restrictions and maximum diversion amounts established for new 72-12-1.1 domestic well permits in the draft administrative guidelines shall be adopted by the state engineer on an interim basis. The interim period shall start on the day the draft administrative guidelines are posted for public inspection and shall end on the day the state engineer adopts the administrative guidelines or otherwise signs an order canceling the interim period. Any changes made to the administrative guidelines during the interim period, including a change in the geographic area of a domestic well management area, shall be applied retroactively to each new 72-12-1.1 domestic well permit issued within the domestic well management area during the interim period.

C. Amount of water: Except as otherwise provided or restricted in Paragraph (2) of Subsection C, and Subsections D and E of this section, the maximum diversion of water from a new 72-12-1.1 domestic well within a domestic well management area shall not exceed 0.25 acre-foot per annum. The state engineer may establish a maximum diversion amount for a new 72-12-1.1 domestic well in a domestic well management area that is less than 0.25 acre-foot per annum.

(1) Single household: The maximum permitted diversion of water from a new 72-12-1.1 domestic well permitted to serve one household shall not exceed 0.25 acre-foot per annum.

(2) Multiple household: The maximum permitted diversion of water from a 72-12-1.1 domestic well permitted to serve more than one household shall not exceed 0.25 acre-foot per annum per household served. The maximum combined diversion from such a 72-12-1.1 domestic well shall not exceed 3.0 acre-feet per annum. For a 72-12-1.1 domestic well serving multiple households, the permit holder shall file documentation with the state engineer listing the number of households being served by

the well, the owner's contact information for each household being served, and a description of the legal lot of record for each household being served. A copy of a well share agreement may be filed to support the claim that the 72-12-1.1 domestic well is serving more than one household.

(3) Drinking and sanitary uses that are incidental to the operations of a governmental, commercial, or non-profit facility: The maximum permitted diversion of water from a 72-12-1.1 domestic well permitted for drinking and sanitary uses that are incidental to the operations of a governmental, commercial, or non-profit facility shall not exceed 0.25 acre-foot per annum. The state engineer shall not issue a permit for this use unless the applicant demonstrates that no alternative water supply is reasonably accessible or available. Water may not be used under this type of permit for any commercial use such as the manufacture of a product, car wash, water bottling, concrete batching, or irrigation of crops grown for commercial sale.

D. Transfer of a valid, existing water right to a 72-12-1.1 domestic well permit: The applicant for a new 72-12-1.1 domestic well permit or the holder of an existing 72-12-1.1 domestic well permit may apply to transfer a valid, existing consumptive use water right into the 72-12-1.1 domestic well permit in accordance with Subsection E of 19.27.5.14 NMAC. Only a valid, existing, consumptive use water right located within the domestic well management area may be transferred.

E. Application for permit to transfer a valid, existing water right into a 72-12-1.1 domestic well permit - maximum diversion of water from the 72-12-1.1 domestic well not to exceed one acre-foot per annum: The applicant for or the owner of a 72-12-1.1 domestic well permit may apply to transfer a valid, existing consumptive use water right into the 72-12-1.1 domestic well permit for the purpose of increasing the maximum diversion of underground water up to an amount of water not to exceed one acre-foot per annum. The water right to be transferred shall be from the same hydrologic unit that will be impacted by the diversion of water from the 72-12-1.1 domestic well. The determination of whether a proposed transfer of a water right is occurring within the same hydrologic unit shall be made by the office of the state engineer. For a 72-12-1.1 domestic well permit located within a domestic well management area or other geographic area specifically defined in a state engineer order or administrative guidelines, only a valid, existing consumptive use water right located within the domestic well management area or other specifically defined geographic area may be transferred.

(1) Form - content: Applications shall be prepared on a form prescribed by the state engineer. An application shall include the following information: the name and address of applicant, the pertinent state engineer file number(s), the source of water supply for the move-from point of diversion, the source of water supply for the move-to point of diversion, the priority date of the water right, the diversion amount to be retired, the consumptive use amount to be transferred, the move-from purpose of use, the legal description of the move-from place of use, the location of the move-from point of diversion, the location of move-to point of diversion, and other information the state

engineer deems necessary. An application for a change in point of diversion or place or purpose of use of a water right into or out of an acequia or community ditch subject to Sections 73-2-1 through 73-2-68 NMSA or Sections 73-3-1 through 73-3-11 NMSA shall include the documentary evidence of the applicant's compliance with the requirements of Section 72-5-24.1 NMSA.

(2) Well location: The description of the well location shall be made in accordance with Subsection B of 19.27.5.9 NMAC.

(3) Transfer process: Consistent with the issuance of a 72-12-1.1 domestic well permit pursuant to Section 72-12-1.1 NMSA, public notice is not required nor protest allowed for an application for permit to transfer a valid, existing consumptive use water right into a 72-12-1.1 domestic well permit for the purpose of increasing the maximum diversion of underground water up to an amount of water not to exceed one acre-foot per annum. However, with such transfer applications, documentation shall be provided by the applicant, pursuant to Section 72-5-24.1 NMSA. In all other respects, the application for such a transfer shall be processed in a manner consistent with Section 72-12-3 NMSA and no change may be made to the point of diversion, place of use, or purpose of use authorized under such a permit except as provided for in Subsection E of 19.27.5.11 NMAC.

[19.27.5.14 NMAC - N, 8-15-2006; A, 10-31-2011]

19.27.5.15 ENFORCEMENT:

The holder of a 72-12-1.1 domestic well permit is subject to possible fines and remedial action including cancellation of the permit for any failure to comply with the terms and conditions of the 72-12-1.1 domestic well permit or any applicable provision of 19.27.5 NMAC or Chapter 72 NMSA.

A. Diversion of water in excess of the authorized maximum diversion amount:

The holder of a 72-12-1.1 domestic well permit who diverts water in excess of the authorized maximum diversion amount in any calendar year shall repay twice the amount of the over-diversion during the following calendar year. Repayment shall be made by either:

(1) reducing diversions during the following calendar year from the 72-12-1.1 domestic well that is the source of the over-diversion; or

(2) acquiring or leasing a valid, existing consumptive use water right in an amount equal to the repayment amount and submitting to the state engineer for his approval a plan for the proposed repayment during the following calendar year on a form prescribed by the state engineer; such repayment water shall be derived from either:

(a) reduction of the consumptive use associated with the actual average historic use of a valid, existing water right with an irrigation purpose of use, by fallowing of a specific tract of land that has been consistently historically irrigated; or

(b) reduction of the diversion and associated historical average consumptive use of a valid water right with a purpose of use other than irrigation.

B. Active water resource management: In any water district or subdistrict declared by the state engineer in accordance with Section 72-3-2 NMSA, and for which district or subdistrict the state engineer has adopted final district specific regulations in accordance with 19.25.13.10 and 19.25.13.23 NMAC, the water master shall have authority to curtail out-of-priority outdoor domestic uses consistent with the district or subdistrict specific rules.

C. Cancellation of permit: The state engineer may cancel a 72-12-1.1 domestic well permit upon failure of a permit holder to comply with any permit condition of approval or any applicable provision of 19.27.5 NMAC or Chapter 72 NMSA. The state engineer may cancel a 72-12-1.1 domestic well permit and proceed with enforcement action if a permit holder diverts water in excess of the authorized maximum amount and fails to repay the over-diversion in a time and manner acceptable to the state engineer.

[19.27.5.15 NMAC - N, 8-15-2006; A, 10-31-2011]

19.27.5.16 APPEAL PROCESS:

In accordance with Section 72-2-16 NMSA, if, without holding a hearing, the state engineer enters a decision, any person aggrieved by the decision is entitled to a hearing, if a request for a hearing is made in writing within thirty days of receipt of notice of the decision from the state engineer. Hearings shall be held before the state engineer or his appointed examiner pursuant to 19.25.2 NMAC. No appeal shall be taken to the district court until the state engineer has held a hearing and entered his decision in the hearing.

[19.27.5.16 NMAC - N, 8-15-2006]

19.27.5.17 LIBERAL CONSTRUCTION:

This part shall be liberally construed to carry out its purpose.

[19.27.5.17 NMAC - N, 8-15-2006]

19.27.5.18 SEVERABILITY:

If any portion of 19.27.5 NMAC is found to be invalid, the remaining portion of 19.27.5 NMAC shall remain in force and not be affected.

[19.27.5.18 NMAC - N, 8-15-2006]

[RESERVED]

[Recompiled 12/31/01]

19.27.30.8 ESTANCIA BASIN:

A. The lands declared within the Estancia Basin on January 31, 1950, are as follows: Beginning at the northeast corner of Township 11 North, Range 10 East; thence westerly along township line to the northwest corner of Township 11 North, Range 8 East; thence southerly along range line to the southwest corner of said township; thence westerly along township line to the northwest corner of Township 10 North, Range 7 East; thence southerly along range line to the southwest corner of Township 9 North, Range 7 East; thence westerly along township line to the northwest corner of Township 8 North, Range 7 East; thence southerly along range line and range line as projected across the Chilili Grant to the northeast corner of Township 6 North, Range 6 East; thence westerly along township line to the northwest corner of Section 5, of said township; thence southerly along section line to the southwest corner of Section 32 of

said township; thence westerly along township line to the northwest corner of Section 1, Township 5 North, Range 5 East; thence southerly along section line to the southwest corner of Section 36 of said township; thence westerly along township line to the northwest corner of Section 1, Township 4 North, Range 5 East; thence southerly along section line to the southwest corner of Section 24 of said township; thence easterly along section line to the northwest corner of Section 29, Township 4 North, Range 6 East; thence southerly along section line to the southwest corner of Section 32 of said township; thence easterly along township line to the northwest corner of Township 3 North, Range 9 East; thence southerly along range line to the southwest corner of Section 7 of said township; thence easterly along section line to the northwest corner of Section 13 of said township; thence southerly along section line to the southwest corner of said Section 13; thence easterly along section line to the southeast corner of said Section 13; thence southerly along range line to the southwest corner of Township 3 North, Range 10 East; thence easterly along township line to the northwest corner of Section 4, Township 2 North, Range 10 East; thence southerly along section line to the southwest corner of Section 9 of said township; thence easterly along section line to the northwest corner of Section 13 of said township; thence southerly along section line to the southwest corner of Section 24 of said township; thence easterly along section line to the northwest corner of Section 29, Township 2 North, Range 11 East; thence southerly along section line to the southwest corner of Section 32 of said township; thence easterly along township line to the southeast corner of said township; thence northerly along range line to the northeast corner of Township 4 North, Range 11 East; thence easterly along township line to the southeast corner of Township 5 North, Range 11 East; thence northerly along range line to the northeast corner of Township 7 North, Range 11 East; thence westerly along township line to the southeast corner of Township 8 North, Range 10 East; thence northerly along range line to the point of beginning.

B. The lands included by the extension of March 28, 1975, are as follows:

(1) Beginning at the southeast corner of Section 32, Township 12 North, Range 10 East, a point common to the presently declared boundaries of the Estancia Underground Water Basin and the Rio Grande Underground Water Basin; thence north along section line to its intersection with the topographical drainage boundary between the Estancia Valley and the Rio Grande on the east line of Section 32, Township 12 North, Range 10 East; thence westerly along said topographical drainage boundary to its intersection with the east boundary of the Sandia Underground Water Basin also being the Bernalillo-Santa Fe county line, within the San Pedro Grant; thence south along the Bernalillo-Santa Fe county line to the southwest corner of Section 31, Township 11 North, Range 7 East, a point on the presently-declared Estancia Underground Water Basin boundary; thence easterly along existing basin boundary to the point of beginning.

(2) Beginning at the northeast corner of Section 24, Township 10 North, Range 6 East, a point common to the presently declared boundaries of the Estancia Underground Water Basin and the Sandia Underground Water Basin; thence west

along section lines to the northwest corner of Section 23, Township 10 North, Range 6 East; thence south along section line to the southwest corner of said Section 23; thence west along section line to the northwest corner of Section 27, Township 10 North, Range 6 East; thence south along section line to the southwest corner of said Section 27; thence west along section line to the northwest corner of Section 33, Township 10 North, Range 6 East; thence south along section lines to the southwest corner of Section 33, Township 9 North, Range 6 East; thence west along township line to the northwest corner of Section 4, Township 8 North, Range 6 East; thence south along section line to its intersection with the north boundary of the Isleta Indian Reservation, being on the west line of said Section 4; thence southwesterly along said reservation boundary to its intersection with the west line of Section 23, Township 7 North, Range 5 East; thence south along section lines to the northeast corner of Section 3, Township 6 North, Range 5 East; thence west along township line to the northwest corner of said Section 3; thence south along section lines to the southwest corner of Section 15, Township 6 North, Range 5 East; thence east along section line to the southeast corner of said Section 15; thence south along section lines to the northeast corner of Section 10, Township 5 North, Range 5 East; thence west along section lines to the northwest corner of Section 9, Township 5 North, Range 5 East; thence south along section lines to the southwest corner of Section 33, Township 5 North, Range 5 East; thence west along township line to the northwest corner of Section 4, Township 4 North, Range 5 East; thence south along section line to the southwest corner of said Section 4; thence east along section lines to the northwest corner of Section 11, Township 4 North, Range 5 East; thence south along section line to the southwest corner of said Section 11; thence east along section line to the southeast corner of said Section 11, a point on the presently-declared boundary of the Estancia Underground Water Basin; thence northerly along the existing basin boundary to the point of beginning.

C. ESTANCIA BASIN - SPECIAL PROVISION: Because of the low quality of the upper or first water, all permits granted in the following described areas shall have as a condition of approval that this water be cased off in such manner that it cannot commingle with other waters found in this basin: East 1/2 of Township 5 North, Range 9 East; E 1/2 of Township 6 North, Range 9 East; E 1/2 of Township 7 North, Range 9 East; E 1/2 of Township 8 North, Range 9 East; all of Townships 5, 6, 7 and 8 North, Range 10 East. An exception may be made if additional water samples at the drilling site indicate the upper water to be acceptable for irrigation purposes. The State Engineer's representative will determine the necessary casing program to protect the known fresh waters.

D. [TOWNSHIP AND RANGE MAP: See 7-6.2 Estancia Basin, [PDF file No. 19.027.0030.8-Estancia.](#)]

B. The corrected boundaries of the extension of the Ft. Sumner Underground Water Basin as originally intended by special order No. 148 are as follows: May 7, 1964 (corrections are underlined): Beginning at the southeast corner of Section 31, Township (T) 6 South (S), Range (R) 26 East (E), New Mexico Principal Meridian (N.M. P.M.) , a point on the existing west boundary of the Ft. Sumner Underground Water Basin; thence west along township line to the southwest corner of said Section 31; thence north along range line to the northwest corner of Section 6, T 6 S, R 26 E, N.M.P.M.; thence west along township line to the southwest corner of Section 32, T 5 S, R 23 E, N.M.P.M.; thence north along section lines to the southeast corner of Section 6, T 5 S, R 23 E, N.M.P.M.; thence west along section lines to the southwest corner of Section 1, T 5 S, R 22 E, N.M.P.M.; thence north along section line to the northwest corner of said Section 1; thence west along township line to the southwest corner of Section 34, T 4 S, R 22 E, N.M.P.M.; thence north along section lines to the southeast corner of Section 21, T 3 S, R 22 E, N.M.P.M.; thence west along section line to the southwest corner of said Section 21; thence north along section lines to the southeast corner of Section 8, T 3 S, R 22 E, N.M.P.M.; thence west along section lines to the southwest corner of Section 7, T 3 S, R 22 E, N.M.P.M.; thence north along range line to the southeast corner of Section 13, T 2 S, R 21 E, N.M.P.M.; thence west along section lines to the southwest corner of Section 14, T 2 S, R 21 E, N.M.P.M.; thence north along section lines to the southeast corner of Section 15, T 1 S, R 21 E, N.M.P.M.; thence west along section lines to the southwest corner of Section 16, T 1 S, R 21 E, N.M.P.M.; thence north along section lines to the southeast corner of Section 20, T 1 North (N), R 21 E, N.M.P.M.; thence west along section lines to the southwest corner of Section 23, T 1 N, R 20 E, N.M.P.M.; thence north along section line to the northwest corner of said section 23; thence west along section lines to the southwest corner of Section 16, T 1 N, R 20 E, N.M.P.M.; thence north along section line to the northwest corner of said Section 16; thence west along section lines to the southwest corner of Section 7, T 1 N, R 20 E, N.M.P.M., a point on the De Baca-Lincoln county line; thence north along range

line and said county line to the northwest corner of said Section 7; thence west along section line to the southwest corner of Section 1, T 1 N, R 19 E, N.M.P.M.; thence north along section lines to the southeast corner of Section 23, T 2 N, R 19 E, N.M.P.M.; thence west along section lines to the southwest corner of Section 22, T 2 N, R 19 E, N.M.P.M.; thence north along section lines to the southeast corner of Section 16, T 3 N, R 19 E, N.M.P.M.; thence west along section lines to the southwest corner of Section 15, T 3 N, R 18 E, N.M.P.M.; thence north along section lines to the southeast corner of Section 33, T 4 N, R 18 E, N.M.P.M.; thence west along township line to the southwest corner of Section 31, T 4 N, R 17 E, N.M.P.M.; thence north along range line to the northwest corner of said Section 31; thence west along section lines to the southwest corner of Section 28, T 4 N, R 16 E, N.M.P.M.; thence south along section lines to the southeast corner of Section 5, T 3 N, R 16 E, N.M.P.M.; thence west along section lines to the northeast corner of Section 7, T 3 N, R 15 E, N.M.P.M.; thence south along section line to the southeast corner of said Section 7; thence west along section lines to the southwest corner of Section 10, T 3 N, R 14 E, N.M.P.M.; thence north along section line to the northwest corner of said Section 10; thence west along section lines to the southwest corner of Section 6, T 3 N, R 14 E, N.M.P.M.; thence north along range line to the northwest corner of said Section 6; thence west along township line to the southwest corner of Section 31, T 4 N, R 13 E, N.M.P.M.; thence north along range line to the northwest corner of said Section 31; thence west along section lines to the southwest corner of Section 28, T 4 N, R 12 E, N.M.P.M.; thence north along section lines to the northwest corner of Section 17, T 5 N, R 12 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 16, T 5 N, R 12 E, N.M.P.M.; thence north along section lines to the northwest corner of Section 3, T 5 N, R 12 E, N.M.P.M.; thence east along township line to the northeast corner of Section 3, T 5 N, R 13 E, N.M.P.M.; thence south along section lines to the southeast corner of Section 10, T 5 N, R 13 E, N.M.P.M.; thence east along section lines to the southwest corner of Section 7, T 5 N, R 15 E, N.M.P.M.; thence north along section line to the northwest corner of said Section 7; thence east along section line to the northeast corner of said Section 7; thence north along section line to the northwest corner of Section 5, T 5 N, R 15 E, N.M.P.M.; thence east along township line to the northeast corner of said Section 5; thence north along section line to the northwest corner of Section 33, T 6 N, R 15 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 33; thence north along section line to the northwest corner of Section 27, T 6 N, R 15 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 27; thence north along section line to the northwest corner of Section 23, T 6 N, R 15 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 23; thence north along section line to the northwest corner of Section 13, T 6 N, R 15 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 13, T 6 N, R 21 E, N.M.P.M.; thence north along range line to the northwest corner of Section 6, T 6 N, R 22 E, N.M.P.M., a point on the existing Ft. Sumner Underground Water Basin boundary; thence north along range line to the northeast corner of Section 1, T 7 N, R 21 E, N.M.P.M., a point of intersection of the boundaries of the existing Ft. Sumner and Upper Pecos Underground Water Basins; thence east along said existing Ft. Sumner and Upper Pecos Underground Water Basin boundary to the southwest corner of Section 34, T 8 N, R 22 E, N.M.P.M.; thence north along section lines to the northwest

corner of Section 3, T 9 N, R 22 E, N.M.P.M. ; thence east along township line to the northeast corner of said Section 3; thence north along projected section lines to the northwest corner of projected Section 23, T 10 N, R 22 E, within the Preston Beck Grant; thence east along projected section lines to the northeast corner of projected Section 24, T 10 N, R 22 E, within the Preston Beck Grant; thence south along projected section lines to the southeast corner of projected Section 36, T 10 N, R 22 E, within the Preston Beck Grant; thence east along township line to the northeast corner of Section 2, T 9 N, R 23 E, N.M.P.M.; thence south along section line to the northwest corner of Section 24, T 9 N, R 23 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 24; thence south along range line to the northwest corner of Section 31, T 9 N, R 24 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 31; thence south along section lines to the southeast corner of Section 6, T 8 N, R 24 E, N.M.P.M.; thence east along section lines to the southwest corner of Section 2, T 8 N, R 24 E, N.M.P.M.; thence north along section line to the northwest corner of said Section 2; thence east along township line to the southwest corner of Section 35, T 9 N, R 24 E, N.M.P.M.; thence north along section line to the northwest corner of said Section 35; thence east along section lines to the northwest corner of Section 35, T 9 N, R 26 E, N.M.P.M.; thence north along section lines to the northwest corner of Section 23, T 9 N, R 26 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 21, T 9 N, R 27 E, N.M.P.M.; thence south along section line to the southeast corner of said Section 21; thence east along section line to the northeast corner of Section 27, T 9 N, R 27 E, N.M.P.M.; thence south along section lines to the southeast corner of Section 34, T 9 N, R 27 E, N.M.P.M.; thence west along township line to the northeast corner of Section 3, T 8 N, R 27 E, N.M.P.M.; thence south along section lines to the northeast corner of Section 27, T 8 N, R 27 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 29, T 8 N, R 28 E, N.M.P.M.; thence south along section lines to the southeast corner of Section 32, T 8 N, R 28 E, N.M.P.M.; thence east along township line to the northeast corner of Section 2, T 7 N, R 28 E, N.M.P.M.; thence south along section lines to the northwest corner of Section 13, T 7 N, R 28 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 18, T 7 N, R 30 E, N.M.P.M.; thence south along section line to the southeast corner of Section 19, T 7 N, R 30 E, N.M.P.M.; thence east along section line to the northeast corner of Section 29, T 7 N, R 30 E, N.M.P.M.; thence south along section lines to the southeast corner of Section 32, T 7 N, R 30 E, N.M.P.M.; thence east along township line to the northeast corner of Section 3, T 6 N, R 30 E, N.M.P.M.; thence south along section lines to the southeast corner of Section 10, T 6 N, R 30 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 13, T 6 N, R 30 E, N.M.P.M.; thence south along range line to the southeast corner of said Section 13; thence east along section lines to the northeast corner of Section 20, T 6 N, R 31 E, N.M.P.M.; thence south along section line to the southeast corner of said Section 20; thence east along section line to the northeast corner of Section 28, T 6 N, R 31 E, N.M.P.M.; thence south along section line to the southeast corner of said Section 28; thence east along section line to the northeast corner of Section 34, T 6 N, R 31 E, N.M.P.M.; thence South along section line to the southeast corner of said Section 34, a point on the Quay-Curry county line and the existing boundary of the Curry County Underground Water Basin; thence west along

township line and said Curry County underground water Basin boundary to the northeast corner of Section 1, T 5 N, R 30 E, N.M.P.M.; thence south along range line and said Curry County Underground Water Basin boundary to the southeast corner of Section 36, T 5 N, R 30 E, N.M.P.M.; thence west along township line to the northeast corner of Section 1, T 4 N, R 30 E, N.M.P.M.; thence south along range line to the southeast corner of Section 12, T 3 N, R 30 E, N.M.P.M.; thence west along section line to the southwest corner of said section 12; thence south along section line to the southeast corner of Section 14, T 3 N, R 30 E, N.M.P.M.; thence west along section line to the southwest corner of said Section 14; thence south along section lines to the southeast corner of Section 34, T 2 N, R 30 E, N.M. P.M. , a point on the existing Portales Underground Water Basin boundary; thence west along township line and said Portales Underground Water Basin boundary to the southwest corner of Section 31, T 2 N, R 30 E, N.M.P.M., said point being at the intersection of the boundaries of the existing Portales and Ft. Sumner Underground Water Basins; thence south along said existing Portales and Ft. Sumner Underground Water Basin boundaries to the northeast corner of Section 13, T 1 N, R 29 E, N.M.P.M.; thence south along range line, and said existing boundary of the Portales underground water Basin to the southeast corner of Section 36, T 1 N, R 29 E, N.M.P.M.; thence east along township line to the northeast corner of Section 1, T 1 S, R 29 E, N.M.P.M.; thence south along range line to the northwest corner of Section 18, T 1 S, R 30 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 18; thence south along section lines to the northwest corner of Section 5, T 2 S, R 30 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 5; thence south along section lines to the northwest corner of Section 16, T 2 S, R 30 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 16; thence south along section lines to southeast corner of Section 28, T 2 S, R 30 E, N.M.P.M.; thence west along section line to the southwest corner of said Section 28; thence south along section lines to the northwest corner of Section 16, T 3 S, R 30 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 16; thence south along section line to the northwest corner of Section 22, T 3 S, R 30 E, N.M.P.M.; thence east along section lines to the northeast corner of said Section 22; thence south along section lines to the southeast corner of Section 10, T 4 S, R 30 E, N.M.P.M.; thence west along section line to the southwest corner of said Section 10; thence south along section lines to the southeast corner of Section 21, T 4 S, R 30 E, N.M.P.M.; thence west along section lines to the southwest corner of Section 19, T 4 S, R 30 E, N.M.P.M., a point on the Roosevelt-Chaves county line; thence south along range line and said county line to the southeast corner of Section 36, T 4 S, R 29 E, N.M.P.M.; thence west along township line to the southwest corner of Section 34, T 4 S, R 28 E, N.M.P.M.; thence north along section lines to the southwest corner of Section 22, T 4 S, R 28 E, N.M.P.M.; thence west along section lines to the southwest corner of Section 20, T 4 S, R 27 E, N.M.P.M.; thence south along section lines to the southeast corner of Section 31, T 5 S, R 27 E, N.M.P.M.; thence west along township line to the northeast corner of Section 3, T 6 S, R 27 E, N.M.P.M.; thence south along section lines to the southeast corner of Section 3, T 7 S, R 27 E, N.M. P.M. ; thence west along section lines to the southwest corner of Section 4, T 7 S, R 27 E, N.M.P.M.; thence north along section line to the northwest corner of said Section 4; thence west along township line to the southwest corner of

Section 34, T 6 S, R 26 E, N.M.P.M., and point of intersection of the boundaries of the existing Ft. Sumner and Roswell Underground Water Basins; thence west along the existing Ft. Sumner and Roswell Underground Water Basin boundary to the point of beginning.

19.27.33.8 GALLUP UNDERGROUND WATER BASIN:

A. The lands declared within the Gallup Underground Water Basin on March 5, 1980, are as follows: Beginning at the point of intersection of the New Mexico-Arizona state line and the McKinley-San Juan county line; thence east along the McKinley-San Juan county line approximately 4.2 miles to a point on the west drainage boundary of Bowl Creek, part of the Puerco River stream system; thence northerly and northeasterly along the drainage boundary of Bowl Creek to a point common to the topographic drainage of the San Juan River stream system and Bowl Creek, part of the Puerco River stream system, which is a point on the presently-declared San Juan Underground Water Basin boundary; thence southerly along the topographic drainage boundary between the San Juan River stream system and the Puerco River stream system, which is the boundary of the presently-declared San Juan Underground Water Basin, passing near Tohatchi Lookout, along said drainage boundary across Manuelito Plateau, continuing along said drainage boundary, through Dalton Pass in Section 4, Township 16 North, Range 14 West, N.M.P.M., to the point common to the topographic drainage boundary of the San Juan River stream system, the Puerco River stream system and the Rio Grande stream system, in the southeast quarter of Section 25, Township 16 North, Range 13 West, N.M.P.M.; thence southwesterly along the continental divide, which is the boundary of the presently-declared Bluewater Underground Water Basin, to a point common to the topographic drainage boundary of the Rio Grande stream system, the Rio Nutria stream system, and the Puerco River stream system in the northeast quarter of Section 23, Township 13 North, Range 15 West, N.M.P.M.; thence northwesterly along the topographic drainage boundary between the Puerco River stream system and the Rio Nutria stream system, passing along McKenzie Ridge, passing through the northeast quarter of Section 3, Township 13 North, Range 16 West, N.M.P.M.; thence westerly and southwesterly along the topographic drainage boundary between the Puerco River stream system and the Rio Nutria stream system, to a point common to the topographic drainage boundary of the Puerco River stream system, the Rio Nutria stream system and the Whitewater Arroyo stream system in the northeast quarter of Section 12, Township 13 North, Range 17 West, N.M.P.M.; thence westerly and southwesterly along the topographic drainage boundary between the Puerco River stream system and Whitewater Arroyo stream system, passing through Township 13 North, Ranges 17 through 19 West, Township 12 North, Ranges 19 through 21 West, to

the point of intersection of the New Mexico-Arizona state line and said drainage boundary in the south half of Section 15, Township 12 North, Range 21 West, N.M.P.M., near milepost 120; thence north along the New Mexico-Arizona state line to the point of beginning.

B. The boundaries of the extension of the Gallup Underground Water Basin, Special Order No. 151-A are described as follows: Beginning at the point of intersection of the New Mexico-Arizona state line and the topographic drainage boundary between the Rio Puerco stream system and Whitewater Arroyo stream system, which is a point on the boundary of the presently-declared Gallup Underground Water Basin, in the south half of Section 15, Township 12 North, Range 21 West, NMPM; thence easterly and northeasterly along said topographic drainage boundary, which is the boundary of the presently-declared Gallup Underground Water Basin, passing through Township 12 North, Ranges 21 through 19 West and passing through Township 13 North, Ranges 19 through 17 West to a point common to the topographic drainage boundary of the Rio Puerco, Rio Nutria and Whitewater stream systems; thence easterly and northeasterly along the topographic drainage boundary between the Puerco River stream system and the Rio Nutria stream system and the southern boundary of the Gallup Underground Water Basin passing through the northeast quarter of Section 3, Township 13 North, Range 16 West, NMPM; thence southeasterly passing along McKenzie Ridge to a point common to the topographic drainage boundary of the Rio Grande, Rio Puerco and the Rio Nutria stream systems, which is a point on the presently declared Bluewater Underground Water Basin and the Continental Divide in the northeast quarter of Section 23, Township 13 North, Range 15 West, NMPM; thence southeasterly along the Continental Divide and the topographic drainage boundary of the Rio Grande and Zuni River stream systems passing along the crest of the Zuni Mountains to a point near the west line of Section 14, Township 9 North, Range 12 West, NMPM; thence southwesterly along the Continental Divide to the point common of the Bluewater Underground Water Basin and the Rio Grande Underground Water Basin and the Continental Divide located on the south section line of Section 15, Township 8 North, Range 13 West; thence southwesterly along the Continental Divide, which is the existing west boundary of the Rio Grande Underground Water Basin to the southwest corner of Section 31, Township 5 North, Range 15 West, NMPM; thence southeasterly along the Continental Divide to its intersection with the west line of Section 7, Township 1 North, Range 11 West, NMPM; thence southwesterly along the Continental Divide to its intersection with the east line of Section 22, Township 3 South, Range 15 West, a point on the existing Gila-San Francisco Underground Water Basin; thence north along the existing boundary of the Gila-San Francisco Underground Water Basin to the northwest corner of Section 23, Township 3 South, Range 15 West, thence west along section lines to the southwest corner of Section 13, Township 3 South, Range 16 West; thence north along section line to the northwest corner of said Section 13; thence west along section line to the southwest corner of Section 11, Township 3 South, Range 16 West; thence north along section line to the northwest corner of said Section 11; thence west along section lines to the southwest corner of Section 5, Township 3 South, Range 16 West; thence south along section line to the southeast corner of Section 7, Township 3 South, Range 16 West; thence west along section line to the southwest corner of said

Section 7; thence north along section line to the northwest corner of said Section 7; thence west along section lines to the southwest corner of Section 4, Township 3 South, Range 17 West; thence south along section line to the southeast corner of Section 8, Township 3 South, Range 17 West; thence west along section line to the southwest corner of said Section 8; thence north along section lines to the southwest corner of Section 32, Township 2 South, Range 17 West; thence west along township line to the southwest corner of Section 34, Township 2 South, Range 18 West; thence south along section lines to the southeast corner of Section 9, Township 3 South, Range 18 West; thence west along section line to the southwest corner of said Section 9; thence south along section line to the southeast corner of Section 17, Township 3 South, Range 18 West; thence west along section lines to the southwest corner of Section 17, Township 3 South, Range 19 West; thence south along section line to the southeast corner of Section 19, Township 3 South, Range 19 West; thence west along section lines to the southwest corner of Section 21, Township 3 South, Range 20 West; thence south along section line to the southeast corner of Section 29, Township 3 South, Range 20 West; thence west along section lines to the southwest corner of Section 25, Township 3 South, Range 21 West; thence south along section line to the southwest corner of Section 36, Township 3 South, Range 21 West; thence west along section lines to the southwest corner of Section 33, Township 3 South, Range 21 West a point at the intersection of the existing boundary of the Gila-San Francisco Underground Water Basin and the New Mexico-Arizona state line; thence north along the New Mexico-Arizona state line to the point of beginning.

PART 35: [RESERVED]

PART 36: HONDO BASIN

19.27.36.1 ISSUING AGENCY:

Office of State Engineer.

[Recompiled 12/31/01]

19.27.36.2 SCOPE:

[RESERVED]

[Recompiled 12/31/01]

19.27.36.3 STATUTORY AUTHORITY:

Adopted pursuant to the authority of Sections 72-2-8, 72-2-12 and 72-13-4, New Mexico Statutes Annotated, 1978.

[Recompiled 12/31/01]

19.27.36.4 DURATION:

[Permanent]

[Recompiled 12/31/01]

19.27.36.5 EFFECTIVE DATE:

November 1, 1966

19.27.36.6 OBJECTIVE:

This Rule is formulated for the purpose of carrying out the provisions of the statutes governing underground waters and describing the present extent of all declared underground water basins in New Mexico.

[Recompiled 12/31/01]

19.27.36.7 DEFINITIONS:

[RESERVED]

[Recompiled 12/31/01]

19.27.36.8 HONDO BASIN:

A. The lands included within the Hondo Basin are as follows:

TOWNSHIP	RANGE	SECTION	DATE DECLARED
9 S.	13 E.	1 thru 3, 10 thru 15, 20 thru 36	9/5/69
9 S.	14 E.	All	9/5/69
9 S.	15 E.	All	9/1/53
9 S.	16 E.	All	9/1/53
10 S.	13 E.	All	9/5/69
10 S.	14 E.	All	9/5/69
10 S.	15 E.	All	9/1/53
10 S.	16 E.	All	9/1/53

10 S.	17 E.	All	9/1/53
11 S.	13 E.	All	9/1/53
11 S.	14 E.	All	9/1/53
11 S.	15 E.	All	9/1/53
11 S.	16 E.	All	9/1/53
11 S.	17 E.	All	9/1/53
11 S.	18 E.	All	9/1/53
11 S.	19 E.	All	9/1/53
11 S.	20 E.	4 thru 9, 16 thru 21, 28 thru 33	9/1/53
12 S.	18 E.	1 thru 3, 10 thru 15	9/1/53
12 S.	19 E.	1 thru 18	9/1/53

The lands included by the extension of December 28, 1984, are as follows: Beginning at the northeast corner of Section 1, Township 12 South, Range 16 East, a point on the existing boundary of the Hondo and Roswell Underground Water Basins; thence south along the existing boundary of the Roswell Underground Water Basin to the southeast corner of said Section 1; thence west along section line to the southwest corner of said Section 1; thence south along section line to the southeast corner of Section 11, Township 12 South, Range 16 East; thence west along section lines to the southwest corner of Section 10, Township 12 South, Range 16 East; thence north along section line to the northwest corner of said Section 10; thence west along section line to the southwest corner of Section 4, Township 12 South, Range 16 East; thence north along section line to the northwest corner of said Section 4, a point on the existing boundary of the Hondo Underground Water basin; thence west along the existing boundary of the Hondo Underground Water Basin to the northeast corner of Section 2, Township 12 South, Range 15 East; thence south along section lines to the southeast corner of Section 11, Township 12 South, Range 15 East; thence west along section line to the southwest corner of said Section 11; thence south along section lines to the southeast corner of Section 22, Township 12 South, Range 15 East; thence west along section lines to the southwest corner of Section 19, Township 12 South, Range 15 East; thence

north along range line to the northeast corner of Section 24, Township 12 South, Range 14 East; thence west along section lines to the northwest corner of Section 22, Township 12 South, Range 14 East; thence south along section line to the southeast corner of Section 21, Township 12 South, Range 14 East; thence west along section line to the southwest corner of said Section 21; thence south along section line to the southeast corner of Section 29, Township 12 South, Range 14 East; thence west along section line to the southwest corner of said Section 29; thence south along section line to the southeast corner of Section 31, Township 12 South, Range 14 East; thence west along township line to the northeast corner of Section 1, Township 13 South, Range 13 East; thence south along range line to the southeast corner of Section 24, Township 13 South, Range 13 East; thence west along section lines to the southwest corner of Section 23, Township 13 South, Range 13 East; thence north along section line to intersection with the drainage divide between the Tularosa Basin and the Pecos River Stream System, a point on the existing boundary of the Tularosa Underground Water Basin; thence northerly along the existing Tularosa Underground Water Basin boundary to intersection with the north line of Section 2, Township 8 South, Range 13 East; thence east along township line to the northeast corner of Section 5, Township 8 South, Range 14 East; thence south along section line to the southeast corner of said Section 5; thence east along section lines to the northeast corner of Section 9, Township 8 South, Range 15 East; thence south along section line to the southeast corner of said Section 9; thence east along section line to the northeast corner of Section 15, Township 8 South, Range 15 East; thence south along section line to intersection with the north drainage divide of the Hondo Stream System; thence easterly along said north drainage divide through Padilla Point and Pierce Canyon Pass to the intersection of the east drainage boundary of a tributary to Chavez Canyon, thence southerly along the east drainage boundary of Chavez Canyon to intersection with the north line of Section 6, Township 9 South, Range 17 East; thence east along section line to the northeast corner of said Section 6; thence south along section lines to the southeast corner of Section 30, Township 9 South, Range 17 East; thence east along section lines to the southeast corner of Section 28, Township 9 South, Range 17 East; thence due south to intersection with the existing boundary of the Hondo Underground Water Basin; thence east and south along the existing basin boundary to the southwest corner of Section 18, Township 10 South, Range 18 East; thence east along section lines to the southeast corner of Section 17, Township 10 South, Range 18 East; thence south along section lines to the southeast corner of Section 32, Township 10 South, Range 18 East, a point on the existing boundary of the Hondo Underground Water Basin; thence east, south, westerly along the existing basin boundary to the point of beginning.

B. The corrected boundaries of the extension of the Hondo Underground Water Basin as originally intended by Special Order No. 144 are as follows (corrections are underlined): Beginning at the northeast corner of Section 12, Township (T) (12) South (S) , Range (R) 16 East (E) , New Mexico Principal Meridian (N.M.P.M.), point on the boundary of the existing Hondo and Roswell Underground Water Basins; thence westerly along the south boundary of the existing Hondo Underground Water Basin to the southwest corner of Section 19, T 13 S, R 14 E, N.M.P.M.; thence south along section lines to the southwest corner of Section 31, T 13 S, R 14 E, N.M.P.M.; thence

east along section line to the northwest corner of Section 5, T 14 S, R 14 E, N.M.P.M.; thence south along section line to the southwest corner of said section 5; thence east along section line to the northwest corner of Section 9, T 14 S, R 14 E, N.M.P.M.; thence south along section line to the southwest corner of said Section 9; thence east along section lines to the southeast corner of Section 10, T 14 S, R 15 E, N.M.P.M.; thence north along section line to the east quarter corner of said Section 10; thence east to the east quarter corner of Section 10, T 14 S, R 16 E, N.M.P.M. ; thence north along section line to the northeast corner of said Section 10; thence east along section lines to the southeast corner of Section 1, T 14 S, R 16 E, a point on the west boundary of the existing Roswell Underground Water Basin; thence north along range line and said west boundary of the Roswell Underground Water Basin to the point of beginning.

19.27.37.7 DEFINITIONS:

[RESERVED]

[Recompiled 12/31/01]

19.27.37.8 HOT SPRINGS ARTESIAN BASIN:

A. The lands declared within the Hot Springs Artesian Basin on April 15, 1935, are as follows:

TOWNSHIP	RANGE	SECTIONS
13 S.	4 W.	27 thru 34
13 S.	5 W.	25 thru 28, 33 thru 36
14 S.	4 W.	Portions of 4, 5, 6, 7, 17, 18, 19, 20, 29, 30, 31 and 32 North and West of Rio Grande
14 S.	5 W.	1 thru 5, NE 1/4 of 6, E 1/2 and NW 1/4 of 8, 9 thru 15, N 1/2 of 16, NE 1/4 of 22, 23 thru 25, NE 1/4 of 26, NE 1/4 of 36

B. The lands included by the extension of September 17, 1982, are as follows:

Beginning at the intersection of the southern surface drainage boundary of Palomas Creek with the east line of the northwest quarter of Section 22, T-14-S, R-5-W, N.M.P.M., a point on the existing boundary of the Hot Springs Underground Water Basin; thence westerly along the southern surface drainage boundary of Palomas Creek, passing through the Salado Mountains near the northwest corner of Township-14-South, Range-6-West, and the northeast corner of Township-14-South, Range-7-West, through South Salado Peak in Sections 6 and 7, T-14-S, R-7-W, Indian Peak in Section 4, T-14-S, R-8-W, Lake Mountain in Section 34, T-13-S, R-9-W and along Spud Patch Ridge in projected* Township 13 South, Range 9 West to its intersection with the surface drainage boundary between the Rio Grande and the Mimbres River, a point approximately one mile south of Reeds Peak on the Grant-Sierra County line and the existing boundary of the Mimbres Underground Water Basin; thence northerly along the existing boundary of the Mimbres Underground Water Basin to its intersection with the existing boundary of the Gila-San Francisco Underground Water Basin at a point approximately one-half mile south of Reeds Peak in projected* Section 26, T-13-S, R-10-W; thence northerly along the existing boundary of the Gila-San Francisco Underground Water Basin to the northwest corner of projected* Section 17, T-12-S, R-9-W, a point on the existing boundary of the Rio Grande Underground Water Basin; thence easterly along the existing boundary of the Rio Grande Underground Water Basin to the southeast corner of Section 24, T-13-S, R-5-W, a point on the existing boundary of the Hot Springs Underground Water Basin; thence west along the existing boundary of the Hot Springs Underground Water Basin to the southwest corner of Section 21, T-13-S, R-5-W, south to the southeast corner of Section 32, T-13-S, R-5-W, west to the south quarter corner of Section 31, T-13-S, R-5-W, and southeasterly along said basin boundary to the point of beginning.

*Projected Sections and townships are based on meridian and parallel projections of surveyed townships.

[SE 66-1, Article 7-12; Recompiled 12/31/01]

PART 41: LORDSBURG VALLEY BASIN

19.27.41.1 ISSUING AGENCY:

Office of State Engineer.

[Recompiled 12/31/01]

19.27.41.2 SCOPE:

[RESERVED]

[Recompiled 12/31/01]

19.27.41.3 STATUTORY AUTHORITY:

Adopted pursuant to the authority of Sections 72-2-8, 72-2-12 and 72-13-4, New Mexico Statutes Annotated, 1978.

[Recompiled 12/31/01]

19.27.41.4 DURATION:

[Permanent]

[Recompiled 12/31/01]

19.27.41.5 EFFECTIVE DATE:

November 1, 1966

[Recompiled 12/31/01]

19.27.41.6 OBJECTIVE:

This Rule is formulated for the purpose of carrying out the provisions of the statutes governing underground waters and describing the present extent of all declared underground water basins in New Mexico.

[Recompiled 12/31/01]

19.27.41.7 DEFINITIONS:

[RESERVED]

[Recompiled 12/31/01]

19.27.41.8 LORDSBURG VALLEY BASIN:

A. The lands declared within the Lordsburg Valley Basin on November 18, 1960, are as follows:

TOWNSHIP	RANGE	SECTIONS
22 S.	17 W.	19 thru 36
22 S.	18 W.	All
22 S.	19 W.	All
23 S.	16 W.	All
23 S.	17 W.	All
23 S.	18 W.	1 thru 6, 9 thru 16, 22 thru 27, 34 thru 36
24 S.	16 W.	All
24 S.	17 W.	All
24 S.	18 W.	1 thru 3, 10 thru 15, 22 thru 27,

34 thru 36

25 S. 16 W. All

25 S. 17 W. 1 thru 18

19.27.45.8 UPPER PECOS BASIN:

A. The lands declared within the Upper Pecos Basin on February 24, 1972, are as follows: Beginning at the southeast corner of Section 12, Township 7 North, Range 21 East (a point on the western boundary of the declared Fort Sumner Underground Water Basin boundary); thence west along section lines to the southwest corner of Section 7, Township 7 North, Range 16 East, a point on the Guadalupe county-Torrance county line; thence north along range line and the Guadalupe county line to the southwest corner of Section 31, Township 11 North, Range 16 East; thence west along township line to the southwest corner of Section 31, Township 11 North, Range 15 East; thence north along range line to the northwest corner of Section 6, Township 11 North, Range 15 East; thence west along township line to the southwest corner of Section 31, Township 12 North, Range 14 East; thence north along range line to the northwest corner of Section 6, Township 12 North, Range 14 East; thence west along township line to the southwest corner of Section 34, Township 13 North, Range 13 East; thence north along section lines to the northwest corner of Section 3, Township 13 North, Range 13 East; thence west along township line to its intersection with the drainage boundary between the Pecos River and the Rio Grande on the south line of Section 33, Township 14 North, Range 12 East (a point on the eastern boundary of the Rio Grande Underground Water Basin); thence northerly along said drainage boundary and said eastern boundary of the Rio Grande Underground Water Basin, passing through Glorieta Baldy, Penitente Peak, Santa Fe Baldy, and Pecos Baldy Peak to Truchas Peak (near Latitude 35 degrees 57' 45" North, Longitude 105 degrees 38' 40" West, X=112,000, Y=1,808,200 N. M. Grid System East Zone), a point on the Mora county-Arriba county line; thence northeasterly along said county line passing through North Truchas Peak and Chimayosos Peak, to its intersection with the drainage boundary between the Pecos River and the Canadian River (near Latitude 35 degrees 59' 03" North, Longitude 105 degrees 33' 25" West, X=137,950, Y=1,815,600 N. M. Grid System East Zone); thence southeasterly along said drainage boundary passing through Cebolla Station (U. S. Coast and Geodetic Survey Triangulation Point), Spring Mountain, Lone Pine Mesa, Hermit Peak and Pyro Station (U. S. Coast and Geodetic Survey Triangulation Point), to its intersection with Longitude 105 degrees 10' West; thence south along Longitude 105 degrees 10' West to its intersection with Latitude 35 degrees 40' North; thence east along Latitude 35 degrees 40' North to its intersection with Longitude 105 degrees 00' West; thence south along Longitude 105 degrees 00' West to its intersection with the north boundary of the Antonio Ortiz Grant; thence east along said grant boundary to its intersection with Longitude 104 degrees 53' West; thence south along Longitude 104 degrees 53' West to its intersection with Latitude 35 degrees 20' North; thence east along Latitude 35 degrees 20' North to its intersection with Longitude 104 degrees 50' West; thence south along Longitude 104 degrees 50' West to its intersection with the Guadalupe county-San Miguel county line; thence east along said county line to its intersection with Longitude 104 degrees 35' West; thence south along Longitude 104 degrees 35' West to its intersection with the south boundary of the Preston Beck Grant, a point on the north line of Section 2, Township 9 North, Range 22 East; thence west along said grant line to the northeast corner of Section 4, Township 9 North, Range 22 East; thence south along section lines to the southeast corner of Section 33, Township 8 North, Range 22 East, a point on the northern boundary of the Fort Sumner Underground Water Basin; thence west along township

line to the southeast corner of Section 36, Township 8 North, Range 21 East; thence south along range line to the southeast corner of Section 12, Township 7 North, Range 21 East, the point of beginning

B. The corrected boundaries of the extension of the Upper Pecos Underground Water Basin as originally intended by Special Order 149 are as follows: Beginning at the northeast corner of Section 13, Township (T) 7 North (N) , Range (R) 21 East (E) , New Mexico Principal Meridian (N.M.P.M.); thence south along range line to the southeast corner of Section 12, T 6 N, R 21 E, N.M.P.M.; thence west along section lines to the northeast corner of Section 14, T 6 N, R 15 E, N.M.P.M.; thence south along section line to the southeast corner of said Section 14; thence west along section line to the southwest corner of said Section 14; thence south along section line to the southeast corner of Section 22, T 6 N, R 15 E, N.M.P.M.; thence west along section line to the southwest corner of said Section 22; thence south along section line to the southeast corner of Section 28, T 6 N, R 15 E, N.M.P.M.; thence west along section line to the southwest corner of said Section 28; thence south along section line to the southeast corner of Section 32, T 6 N, R 15 E, N.M.P.M.; thence west along township line to the southwest corner of said Section 32; thence south along section line to the southeast corner of Section 6, T 5 N, R 15 E, N.M. P.M.; thence west along section line to the southwest corner of said Section 6; thence south along range line to the southeast corner of Section 12, T 5 N, R 14 E, N.M.P.M.; thence west along section lines to the southwest corner of Section 11, T 5 N, R 13 E, N.M.P.M.; thence north along section lines to the southwest corner of Section 35, T 6 N, R 13 E, N.M.P.M.; thence west along township line to the southwest corner of Section 34, T 6 N, R 12 E, N.M.P.M.; thence north along section lines to the northwest corner of Section 22, T 7 N, R 12 E, N.M.P.M.; thence west along section line to the southwest corner of Section 16, T 7 N, R 12 E, N.M.P.M.; thence north along section lines to the northwest corner of Section 4, T 7 N, R 12 E, N.M.P.M.; thence west along township line to the southwest corner of Section 31, T 8 N, R 12 E, N.M.P.M.; thence north along range line to the northwest corner of Section 18, T 8 N, R 12 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 18; thence north along section lines to the northwest corner of Section 5- -T 8 N, R 12 E. N.M.P.M.; thence east along township line to the southwest corner of Section 32, T 9 N, R 12 E, N.M.P.M.; thence north along section lines to the northwest corner of Section 20, T 9 N, R 12 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 20; thence north along section lines to the northwest corner of Section 21, T 10 N, R 12 E, N.M.P.M.; thence east along section lines to the northwest corner of Section 24, T 10 N, R 12 E, N.M.P.M.; thence north along section lines to the northwest corner of Section 12, T 10 N, R 12 E, N.M.P.M.; thence west along section lines to the southwest corner of Section 3, T 10 N, R 12 E, N.M.P.M.; thence north along section lines to the northwest corner of Section 15, T 11 N, R 12 E, N.M.P.M.; thence west along section lines to the southwest corner of Section 7, T 11 N, R 12 E, N.M.P.M., a point on the San Miguel-Santa Fe county line; thence north along range line and said county line to the northwest corner of Section 6, T 11 N, R 12 E, N.M.P.M.; thence west along township line to the southwest corner of Section 34, T 12 N, R 11 E, N.M.P.M.; thence north along section lines to the northwest corner of Section 27, T 12 N, R 11 E, N.M.P.M.; thence west along section line to the

intersection of the northerly line of Section 28, T 12 N, R 11 E, N.M.P.M., and the drainage boundary between the Rio Grande and Pecos River stream system; thence northeast along said drainage boundary to a point where said drainage boundary intersects the north line of Section 3, T 13 N, R 12 E, N.M.P.M., a point on the south boundary of the existing Upper Pecos Underground Water Basin; thence south and east along said boundary of the existing Upper Pecos Underground Water Basin to the point of beginning.

19.27.49.8 LOWER RIO GRANDE UNDERGROUND WATER BASIN:

A. The lands declared within the Lower Rio Grande Underground Water Basin on September 11, 1980, are as follows: Beginning at a point described as boundary monument number 8 on the United States of America and the Republic of Mexico boundary; thence westerly along said United States of America-Republic of Mexico boundary to its intersection with the west line of Section 18, Township 29 South, Range 1 West; thence northerly along the west lines of Sections 18, 7 and 6, Township 29 South, Range 1 West, and Section 31, Township 28 South, Range 1 West to the northwest corner of said Section 31; thence westerly along the south line of Section 25, Township 28 South, Range 2 West to its southwest corner; thence northerly along the west lines of Sections 25, 24 and 13, Township 28 South, Range 2 West to the northwest corner of said Section 13; thence westerly along the south line of Section 11, Township 28 South, Range 2 West to its southwest corner; thence northerly along the west lines of Sections 11 and 2, Township 28 South, Range 2 West and Sections 35 and 26, Township 27 South, Range 2 West to the northwest corner of said Section 26; thence westerly along the south lines of Sections 22, 21, 20 and 19, Township 27 South, Range 2 West, Sections 24, 23, 22, 21, 20 and 19, Township 27 South, Range 3 West, and Section 24, Township 27 South, Range 4 West to the southwest corner of Section 24, Township 27 South, Range 4 West; thence northerly along the west lines of Sections 24 and 13, Township 27 South, Range 4 West to the northwest corner of said Section 13; thence easterly along the north line of Section 13, Township 27 South, Range 4 West to its northeast corner; thence northerly along the west line of Section 7, Township 27 South, Range 3 West to its northwest corner; thence easterly along the north line of Section 7, Township 27 south, Range 3 West to its northeast corner; thence northerly along the west line of Section 5, Township 27 South, Range 3 West to its northwest corner; thence easterly along the north line of Section 5, Township 27 South, Range 3 West to its northeast corner; thence northerly along the west lines of Sections 33 and 28, Township 26 South, Range 3 West to the northwest corner of said Section 28; thence westerly along the south line of Section 20, Township 26 South, Range 3 West to its southwest corner; thence northerly along the west lines of Sections 20, 17, 8 and 5, Township 26 South, Range 3 West to the northwest corner of said Section 5; thence westerly along the southern line of Section 32, Township 25 South, Range 3 West to its southwest corner; thence northerly along the west line of Section

32, Township 25 South, Range 3 West to its northwest corner; thence easterly along the north line of Section 32, Township 25 South, Range 3 West to its northeast corner; thence northerly along the west line of Section 28, Township 25 South, Range 3 West to its northwest corner; thence easterly along the north line of Section 28, Township 25 South, Range 3 West to its northeast corner; thence northerly along the west lines of Sections 22, 15 and 10, Township 25 South, Range 3 West to the northwest corner of said Section 10; thence easterly along the north line of Section 10, Township 25 South, Range 3 West to its northeast corner; thence northerly along the west line of Section 2, Township 25 South, Range 3 West to its northwest corner; thence easterly along the north lines of Sections 2 and 1, Township 25 South, Range 3 West to the northeast corner of said Section 1; thence northerly along the west lines of Sections 31 and 30, Township 24 South, Range 2 West to the northwest corner of said Section 30; thence easterly along the north line of Section 30, Township 24 South, Range 2 West to its northeast corner; thence northerly along the west lines of Sections 20 and 17, Township 24 South, Range 2 West to the northwest corner of said Section 17; thence easterly along the north line of Section 17, Township 24 South, Range 2 West to its northeast corner; thence northerly along the west line of Section 9, Township 24 South, Range 2 West to its northwest corner; thence easterly along the north line of Section 9, Township 24 South, Range 2 West to its northeast corner; thence northerly along the west lines of Section 3, Township 24 South, Range 2 West and Sections 34, 27, 22, 15, 10 and 3, Township 23 South, Range 2 West to the northwest corner of Section 3, Township 23 South, Range 2 West; thence westerly along the south lines of Sections 33, 32 and 31, Township 22 South, Range 2 West to the southwest corner of said Section 31; thence northerly along the west lines of Sections 31, 30, 19 and 18, Township 22 South, Range 2 West to the northwest corner of said Section 18; thence easterly along the north lines of Sections 18, 17, 16 and 15, Township 22 South, Range 2 West to the northeast corner of said Section 15; thence northerly along the west lines of Sections 11 and 2, Township 22 South, Range 2 West, and Sections 35, 26, 23, 14, 11 and 2, Township 21 South, Range 2 West to the northwest corner of Section 2, Township 21 South, Range 2 West; thence easterly along the north lines of Sections 2 and 1, Township 21 South, Range 2 West, to the southwest corner of Section 31, Township 20 South, Range 1 West; thence northerly along the west lines of Sections 31 and 30, Township 20 South, Range 1 West to the northwest corner of said Section 30; thence easterly along the north line of Section 30, Township 20 South, Range 1 West to its northeast corner; thence northerly along the west line of Section 20, Township 20 South, Range 1 West to its northwest corner; thence easterly along the north lines of Sections 20, 21, 22, 23 and 24, Township 20 South, Range 1 West, Sections 19, 20, 21, 22, 23 and 24, Township 20 South, Range 1 East, Sections 19, 20, 21, 22, 23 and 24, Township 20 South, Range 2 East and Sections 19, 20, 21, 22, 23 and 24, Township 20 South, Range 3 East to the northeast corner of Section 24, Township 20 South, Range 3 East; thence northerly along the west line of Section 19, Township 20 South, Range 4 East to its northwest corner; thence easterly along the north lines of Sections 19 and 20, Township 20 South, Range 4 East to the northeast corner of said Section 20; thence southerly along the east lines of Sections 20, 29 and 32, Township 20 South, Range 4 East, to the southeast corner of said Section 32; thence westerly along the south line of Section 32, Township 20 South, Range 4 East to the northeast corner of Section 5, Township 21

South, Range 4 East; thence southerly along the east lines of Sections 5, 8, 17 and 20, Township 21 South, Range 4 East, to the southeast corner of said Section 20; thence westerly along the south line of Section 20, Township 21 South, Range 4 East to the southwest corner of said Section 20; thence southerly along the east lines of Sections 30 and 31, Township 21 South, Range 4 East, to the southeast corner of said Section 31; thence easterly along the north line of Section 6, Township 22 South, Range 4 East to its northeast corner; thence southerly along the east line of Section 6, Township 22 South, Range 4 East to its southeast corner; thence westerly along the south line of Section 6, Township 22 South, Range 4 East to its southwest corner; thence southerly along the east lines of Sections 12, 13, 24 and 25, Township 22 South, Range 3 East to the southeast corner of said Section 25; thence easterly along the north line of Section 31, Township 22 South, Range 4 East to its northeast corner; thence southerly along the east lines of Section 31, Township 22 South, Range 4 East, Sections 6, 7, 18, 19, 30 and 31, Township 23 South, Range 4 East and Section 6, Township 24 South, Range 4 East to the southeast corner of Section 6, Township 24 South, Range 4 East; thence easterly along the north line of Section 8, Township 24 South, Range 4 East to its northeast corner; thence southerly along the east lines of Sections 8, 17, 20, 29 and 32, Township 24 South, Range 4 East to the southeast corner of said Section 32; thence westerly along the south line of Section 32, Township 24 South, Range 4 East to its southwest corner; thence southerly along the east lines of Sections 6, 7, 18 and 19, Township 25 South, Range 4 East, to the southeast corner of said Section 19; thence easterly along the north line of Section 29, Township 25 South, Range 4 East to its northeast corner; thence southerly along the east lines of Sections 29 and 32, Township 25 South, Range 4 East, and Sections 5 and 8, Township 26 South, Range 4 East to the southeast corner of said Section 8; thence easterly along the north line of Section 16, Township 26 South, Range 4 East to its northeast corner; thence southerly along the east lines of Sections 16, 21 and 28, Township 26 South, Range 4 East to the southeast corner of said Section 28; thence easterly along the north line of Section 34, Township 26 South, Range 4 East to its northeast corner; thence southerly along the east line of Section 34, Township 26 South, Range 4 East to its intersection with the New Mexico-Texas State boundary; thence westerly and southerly along the New Mexico-Texas State boundary to a point which is the intersection of the New Mexico, Texas and Republic of Mexico boundaries being further described as boundary monument number 1; thence westerly along the United States of America-Republic of Mexico boundary to a point described as boundary monument number 8, being the place and point of beginning.

B. The lands included by the extension of September 17, 1982, are as follows: Beginning at the southwest corner of Section 7, T-22-S, R-2-W, N.M.P.M., a point on the existing boundaries of the Lower Rio Grande and the Mimbres Underground Water Basins; thence north and west along the existing boundary of the Mimbres Underground Water Basin to the intersection of said boundary with the west surface drainage boundary of Silva Canyon on the south line of Section 22, T-21-S, R-3-W; thence from the existing boundary of the Mimbres Underground Water Basin northwesterly along the western surface drainage boundary of the Rio Grande passing through Magdalena Peak in Section 8, T-21-S, R-3-W, Sugarloaf Peak in Section 7, T-21-S, R-3-W, Big

White Gap in Section 31, T-20-S, R-3-W, and Little White Gap in Section 30, T-20-S, R-3-W, to its intersection with the west line of Section 15, T-20-S, R-4-W, a point on the existing boundary of the Nutt-Hockett Underground Water Basin; thence northerly along the existing boundary of the Nutt-Hockett Underground Water Basin to the northwest corner of Section 21, T-19-S, R-4-W and west to the southwest corner of Section 17, T-19-S, R-5-W; thence west from the existing boundary of the Nutt-Hockett Underground Water Basin along section lines to the northeast corner of Section 22, T-19-S, R-6-W; thence south along section lines to the southeast corner of Section 27, T-19-S, R-6-W, a point on the existing boundary of the Mimbres Underground Water Basin; thence north and west along the existing boundary of the Mimbres Underground Water Basin to Hillsboro Peak; a point on the existing boundary on the Las Animas Creek Underground Water Basin; thence northeasterly along the existing boundary of the Las Animas Creek Underground Water Basin to Granite Peak; thence southeasterly along said boundary to the intersection of the south line of the N 1/2, of Section 36, T-15-S, R-5-W, with the western boundary of Caballo Reservoir established at contour 4204 feet above mean sea level; thence northerly along the eastern boundary of the Las Animas Creek Underground Water Basin to the intersection of said contour 4204 with the north line of said Section 36; thence northwesterly along the existing boundary of the Las Animas Creek Underground Water Basin to its intersection with the west surface drainage boundary of the Rio Grande, the Grant-Sierra county line and the existing boundary of the Mimbres Underground Water Basin in projected* Section 24, T-14-S, R-10-W, near Mimbres Lake; thence northerly along county line and the existing boundary of the Mimbres Underground Water Basin to its intersection with the south surface drainage boundary of Palomas Creek, a point on the existing boundary of the Hot Springs Underground Water Basin near the section line between projected* Sections 35 and 36, T-13-S, R-10-W; thence southeasterly along the existing boundary of the Hot Springs Underground Water Basin to the Rio Grande in Section 32, T-14-S, R-4-W; thence northeasterly along the existing boundary of the Hot Springs Underground Water Basin to its intersection with the boundary of Rio Grande Underground Water Basin at the intersection of the north line of Section 3, T-14-S, R-4-W, with the west line of the Pedro Armendariz Grant; thence south and east along the existing boundary of the Rio Grande Underground Water Basin to the northeast corner of Section 10, T-15-S, R-3-W and north and east to the northeast corner of Section 28, T-13-S, R-2-E, a point on the existing boundary of the Tularosa Underground Water Basin; thence southerly along the existing boundary of the Tularosa Underground Water Basin to the southeast corner of Section 17, T-20-S, R-4-E, a point on the existing boundary of the Lower Rio Grande Underground Water Basin; thence west and south along the existing boundary of the Lower Rio Grande Underground Water Basin to the point of beginning.

*Projected sections are based on meridian and parallel projections or surveyed townships.

PART 49: RIO GRANDE BASIN

19.27.49.1 ISSUING AGENCY:

Office of State Engineer.

[Recompiled 12/31/01]

19.27.49.2 SCOPE:

[RESERVED]

[Recompiled 12/31/01]

19.27.49.3 STATUTORY AUTHORITY:

Adopted pursuant to the authority of Sections 72-2-8, 72-2-12 and 72-13-4, New Mexico Statutes Annotated, 1978.

[Recompiled 12/31/01]

19.27.49.4 DURATION:

[Permanent]

[Recompiled 12/31/01]

19.27.49.5 EFFECTIVE DATE:

November 1, 1966

[Recompiled 12/31/01]

19.27.49.6 OBJECTIVE:

This Rule is formulated for the purpose of carrying out the provisions of the statutes governing underground waters and describing the present extent of all declared underground water basins in New Mexico.

19.27.49.7 DEFINITIONS:

[RESERVED]

[Recompiled 12/31/01]

19.27.49.8 RIO GRANDE BASIN:

A. The lands declared within the Rio Grande Basin on November 29, 1956, are as follows: Beginning at a point where the New Mexico-Colorado state line intersects Longitude 105 degrees 30' West; thence south along Longitude 105 degrees 30' West to its intersection with Latitude 36 degrees 54' North; thence west along Latitude 36 degrees 54' North to its intersection with Longitude 105 degrees 33' West; thence south along Longitude 105 degrees 33' West to its intersection with the Carson National Forest Boundary; thence south along the Carson National Forest Boundary to the southeast corner of Section 33, Township 30 North, Range 13 East; thence west along section line to the southeast corner of Section 32, Township 30 North, Range 13 East; thence south along section lines to the southeast corner of Section 20, Township 29 North, Range 13 East; thence southwest along the Carson National Forest Boundary to the northeast corner of Section 6, Township 28 North, Range 13 East; thence south along section lines to the southeast corner of Section 30, Township 28 North, Range 13 East; thence west along section line to the southwest corner of Section 30, Township 28 North, Range 13 East; thence south along range line to its intersection with the north boundary of the Arroyo Hondo Grant; thence northeast along the north boundary of the Arroyo Hondo Grant to the northeast corner of said Grant; thence south along the east boundary of the Arroyo Hondo Grant to its intersection with the Carson National Forest Boundary; thence south and east along the Carson National Forest Boundary to its intersection with Longitude 105 degrees 30' West; thence south along Longitude 105 degrees 30' West to its intersection with Latitude 36 degrees 20' North; thence west along Latitude 36 degrees 20' North to its intersection with the west boundary of the Cristobal De La Serna Grant; thence southwest along the west boundary of the Cristobal De La Serna Grant to its intersection with the north section line of Section 32, Township 24 North, Range 12 East; thence west along section lines to the southeast corner of Section 27, Township 24 North, Range 11 East; thence south along section line to the southeast corner of Section 34, Township 24 North, Range 11 East; thence west along township line to the southeast corner of Section 32, Township 24 North, Range 11 East; thence south along section line to the southeast corner of Section 5, Township 23 North, Range 11 East; thence west along section line to the southeast corner of Section 6, Township 23 North, Range 11 East; thence south along section line to the southeast corner of Section 7, Township 23 North, Range 11 East; thence west along section line to the southeast corner of Section 12, Township 23 North, Range 10 East; thence south along range line to its intersection with the north boundary of the Sebastian Martin Grant; thence west along the north boundary of the Sebastian Martin Grant to its intersection with Longitude 105 degrees 56' West; thence south along Longitude 105 degrees 56' west to its intersection with the north boundary of Township 21 North, Range 9 East; thence east along township line to the northeast corner of Section 1, Township 21 North, Range 9 East; thence south along range line to the northeast corner of Section 25, Township 21 North, Range 9 East; thence east along section lines to the intersection with the west boundary of the Nuestra Senora Del Rosario San Fernando Santiago Grant; thence south along the west boundary of the Nuestra Senora Del Rosario San Fernando Santiago Grant to the northeast corner of Section 4, Township 20 North, Range 10 East; thence south along section lines to the

intersection with the north boundary of the Santo Domingo De Cundiyo Grant; thence northeast along the boundary of the Santo Domingo De Cundiyo Grant to the northeast corner of said Grant; thence south along the boundary of the Santo Domingo De Cundiyo Grant to the southeast corner of said Grant; thence northwest along the boundary of the Santo Domingo De Cundiyo Grant to its intersection with the east section line of Section 28, Township 20 North, Range 10 East; thence south along section lines to the southeast corner of Section 33, Township 19 North, Range 10 East; thence west along section line to the northeast corner of Section 5, Township 18 North, Range 10 East; thence south along section lines to the intersection with the north boundary of the Juan De Gabaldon Grant; thence south to a point being the intersection of the east section line of Section 5, Township 17 North, Range 10 East and the south boundary of the Juan De Gabaldon Grant; thence south along section lines to the northeast corner of the City of Santa Fe Grant; thence south along the east boundary of the City of Santa Fe Grant to the southeast corner of said Grant; thence west along the south boundary of the City of Santa Fe Grant to its intersection with the west boundary of Sebastian De Vargas Grant; thence south along the west boundary of the Sebastian De Vargas Grant to its intersection with the south boundary of Township 16 North, Range 9 East; thence west along township line to the southeast corner of Section 32, Township 16 North, Range 9 East; thence south along section lines to the southeast corner of section 32, Township 15 North, Range 9 East; thence west along township line to the northeast corner of Section 4, Township 14 North, Range 6 East; thence south along section lines to the southeast corner of Section 16, Township 14 North, Range 6 East; thence west along section lines to the southwest corner of Section 18, Township 14 North, Range 6 East; thence south along range line to the southeast corner of Section 12, Township 13 North, Range 5 East; thence west along section line to its intersection with the north boundary of the Town of Tejon Grant; thence west along the north boundary of the Town of Tejon Grant to the northwest corner of said Grant; thence south along the west boundary of the Town of Tejon Grant to its intersection with the north boundary of the San Antonio De Las Huertas Grant; thence west along the north boundary of the San Antonio De Las Huertas Grant to the northwest corner of said Grant; thence south along the west boundary of the San Antonio De Las Huertas Grant to its intersection with the south boundary of Township 13 North, Range 5 East; thence west along township line to the northeast corner of Section 1, Township 12 North, Range 4 East; thence south along range line to the southeast corner of section 36, Township 12 North, Range 4 East; thence west along township line to the northeast corner of Section 2, Township 11 North, Range 4 East; thence south along section lines to the intersection with the north boundary of the Elena Gallegos Grant; thence east along the north boundary of the Elena Gallegos Grant to the northeast corner of said Grant; thence south along the east boundary of the Elena Gallegos Grant to the southeast corner of said Grant; thence west along the south boundary of the Elena Gallegos Grant to its intersection with the east boundary of Township 11 North, Range 4 East; thence south along range line to its intersection with the boundary of Valencia and Torrance Counties; thence south along the boundary between Valencia and Torrance Counties to its intersection with the south boundary of the Lo De Padilla Grant; thence west along the south boundary of the Lo De Padilla Grant to the northeast corner of Section 29, Township 7 North, Range 4 East; thence

south along section lines to the intersection with the northern boundary of the Tome Claim; thence west along the northern boundary of the Tome Claim to its intersection with Longitude 106 degrees 35' West; thence south along Longitude 106 degrees 35' West to its intersection with the south boundary of the Tome Claim; thence west along the south boundary of the Tome Claim to its intersection with Longitude 106 degrees 37' West; thence south along Longitude 106 degrees 37' West to its intersection with Latitude 34 degrees 20' North; thence west along Latitude 34 degrees 20' North to its intersection with Longitude 106 degrees 45' West; thence south along Longitude 106 degrees 45' West to its intersection with the south boundary of Township 1 South, Range 2 East; thence west along township line to the northeast corner of Section 1, Township 2 South, Range 1 East; thence south along range line to its intersection with the north boundary of the Bosque Del Apache Migratory Waterfowl Refuge; thence east along the north boundary of the Bosque Del Apache Migratory Waterfowl Refuge to the northeast corner of said Refuge; thence southwest along the east and south boundary of the Bosque Del Apache Migratory Waterfowl Refuge to the intersection with the east boundary of the Pedro Armendariz Grant No. 33; thence southeast along the east boundary of the Pedro Armendariz Grant No. 33 to its intersection with Latitude 33 degrees 40' North; thence west along Latitude 33 degrees 40' North to its intersection with Longitude 106 degrees 56' West; thence south along Longitude 106 degrees 56' West to its intersection with Latitude 33 degrees 35' North; thence west along Latitude 33 degrees 35' North to its intersection with Longitude 107 degrees 00' West; thence south along Longitude 107 degrees 00' West to its intersection with the boundary of Socorro and Sierra Counties; thence west along the boundary between Socorro and Sierra Counties to the west bank of the Rio Grande; thence south along the west bank of the Rio Grande to its intersection with the east section line of Section 34, Township 13 South, Range 4 West; thence north along section lines to the southeast corner of Section 22, Township 13 South, Range 4 West; thence west along section lines to the southwest corner of Section 19, Township 13 South, Range 4 West; thence north along range line to the northwest corner of Section 6, Township 11 South, Range 4 West; thence east along township line to the southwest corner of Section 34, Township 10 South, Range 4 West; thence north along section lines to the northwest corner of Section 3, Township 9 South, Range 4 West; thence east along township line to the southwest corner of Section 31, Township 8 South, Range 3 West; thence north along range line to the northwest corner of Section 19, Township 8 South, Range 3 West; thence east along section lines to the northwest corner of Section 22, Township 8 South, Range 3 West; thence north along section lines to the northwest corner of Section 3, Township 8 South, Range 3 West; thence east along township line to the southwest corner of section 36, Township 7 South, Range 3 west; thence north along section lines to the intersection with Latitude 33 degrees 45' North; thence east along Latitude 33 degrees 45' North to its intersection with Longitude 107 degrees 00' West; thence north along Longitude 107 degrees 00' West to its intersection with the north boundary of the Pedro Armendariz Grant No. 34; thence east along the north boundary of the Pedro Armendariz Grant No. 34 to its intersection with the west boundary of Township 5 South, Range 1 West; thence north along range line to its intersection with the south boundary of the Sevilleta Grant; thence west along the south boundary of the Sevilleta Grant to its intersection with Longitude 107 degrees 00' West; thence north

along Longitude 107 degrees 00' West to the north boundary of the Sevilleta Grant; thence east along the north boundary of the Sevilleta Grant to the west boundary of Township 2 North, Range 1 West; thence north along range line to the southeast corner of Section 36, Township 6 North, Range 2 West; thence west along township line to the southwest corner of Section 34, Township 6 North, Range 2 West; thence north along section lines to the southwest corner of Section 34, Township 7 North, Range 2 West; thence west along township line to the southwest corner of Section 35, Township 7 North, Range 3 West; thence north along section line to its intersection with the boundary of the Antonio Sedillo Grant; thence north along the west boundary of the Antonio Sedillo Grant to the northwest corner of said Grant; thence east along the north boundary of the Antonio Sedillo Grant to its intersection with the west boundary of Township 9 North, Range 1 West; thence north along range line to its intersection with the south boundary of the Bernabe M. Montano Grant; thence east along the south boundary of the Bernabe M. Montano Grant to the southeast corner of said Grant; thence north along the east boundary of the Bernabe M. Montano Grant to its intersection with the north boundary of Township 11 North, Range 1 West; thence east along township line to the southwest corner of Section 31, Township 12 North, Range 1 East; thence north along range line to the northwest corner of Section 6, Township 12 North, Range 1 East; thence east along township line to its intersection with the west boundary of the Town of Alameda Grant; thence north along the west boundary of the Town of Alameda Grant to the northwest corner of said Grant; thence east along the north boundary of the Town of Alameda Grant to its intersection with the west boundary of Township 13 North, Range 2 East; thence north along range line to the northwest corner of Section 6, Township 13 North, Range 2 East; thence east along township line to the southwest corner of Section 31, Township 14 North, Range 3 East; thence north along range line to the northwest corner of Section 6, Township 14 North, Range 3 East; thence east along township line to the southwest corner of Section 31, Township 15 North, Range 5 East; thence north along range line to the northwest corner of Section 19, Township 16 North, Range 5 East; thence east along section lines to the intersection with the west boundary of the Pueblo Cochiti Grant; thence north along the west boundary of the Pueblo Cochiti Grant to the northwest corner of said Grant; thence east along the north boundary of the Pueblo Cochiti Grant to its intersection with the west boundary of Township 17 North, Range 6 East; thence north to the southwest corner of the Bandelier National Monument; thence north along the Santa Fe National Forest Boundary to its intersection with the west boundary of Township 19 North, Range 6 East; thence north along range line to its intersection with the Santa Fe National Forest Boundary; thence northeast along the Santa Fe National Forest Boundary to its intersection with Longitude 106 degrees 15' West; thence north along Longitude 106 degrees 15' West to its intersection with Latitude 36 degrees 10' North; thence west along Latitude 36 degrees 10' North to its intersection with the west boundary of the Juan Jose Lobato Grant; thence north along the west boundary of the Juan Jose Lobato Grant to its intersection with Latitude 36 degrees 15' North; thence east along Latitude 36 degrees 15' North to its intersection with Longitude 106 degrees 15' West; thence north along Longitude 106 degrees 15' West to its intersection with the north boundary of the Juan Jose Lobato Grant; thence east along the north boundary of the Juan Jose Lobato Grant to the northeast corner of said Grant; thence south along the east

boundary of the Juan Jose Lobato Grant to its intersection with the north boundary of Township 24 North, Range 7 East; thence east along township line to its intersection with the east bank of the Rio Grande; thence north along the east bank of the Rio Grande to its intersection with the New Mexico-Colorado State Line; thence east along the New Mexico-Colorado State Line to its intersection with Longitude 105 degrees 30' West being the point of beginning.

B. The lands included by the extension of May 4, 1965, are as follows: Beginning at the intersection of the west boundary of the Carson National Forest and Latitude 36 degrees 43' North; thence east along Latitude 36 degrees 43' North to its intersection with Longitude 105 degrees 25' 30" West; thence south along Longitude 105 degrees 25' 30" West to its intersection with Latitude 36 degrees 42' North; thence west along Latitude 36 degrees 42' North to its intersection with Longitude 105 degrees 27' West; thence south along Longitude 105 degrees 27' West to its intersection with Latitude 36 degrees 40' North; thence west along Latitude 36 degrees 40' North to its intersection with Longitude 105 degrees 30' West; thence south along Longitude 105 degrees 30' West to its intersection with Latitude 36 degrees 38' North; thence west along Latitude 36 degrees 38' north to its intersection with Longitude 105 degrees 32' West; thence north along Longitude 105 degrees 32' West to its intersection with Latitude 36 degrees 40' North; thence west along Latitude 36 degrees 40' North to its intersection with the east line of Section 18, Township 28 North, Range 13 East (a point on the eastern boundary of the presently declared basin); thence northerly along the eastern boundary of the presently described basin to the point of beginning.

C. The lands included by the extension of May 4, 1966, are as follows: Beginning at the northeast corner of the presently declared basin which is at a point where the New Mexico - Colorado State Line intersects Longitude 105 degrees 30' West; thence east along the state line to its intersection with the east boundary of the Sangre de Cristo Grant; thence south and west along the Sangre de Cristo Grant boundary to its intersection with Longitude 105 degrees 25' 30" West; thence south along Longitude 105 degrees 25' 30" West to its intersection with the boundary of the presently declared basin; thence west and north along the eastern boundary of the presently described basin to the point of beginning.

D. The lands included by the extension of June 8, 1967, are as follows: Beginning at the northeast corner of Section 24, T. 21 N., R. 9 E., on the east boundary of the presently declared basin; thence east along section lines to the intersection of the north line of Section 21, T. 21 N., R. 10 E., with the topographic boundary of the Santa Cruz River drainage; thence southeasterly along said topographic boundary to its intersection with the topographic divide between the Rio Grande drainage and the Pecos River drainage; thence southwesterly along said divide (passing through Truchas Peak, Pecos Baldy Peak and Santa Fe Baldy) to Penitente Peak; thence southwesterly along the topographic boundary of the Pojoaque River drainage to its intersection with the east boundary of Section 9, T. 17 N., R. 10 E.; thence south along section lines to the southeast corner of Section 16, T. 17 N., R. 10 E.; thence west along section lines to its

intersection with the east boundary of the presently declared basin; thence northerly along the existing basin boundary to the point of beginning.

E. The lands included by the extension of June 10, 1968 are as follows: Beginning at the northeast corner of Section 25, Township 7 North, Range 4 East, on the east boundary of the presently declared basin; thence southerly along the east boundary line of Valencia County to its intersection with the east boundary of the Casa Colorado Grant being on the north line of Section 6, Township 3 North, Range 5 East; thence southerly along the east boundary of the Casa Colorado Grant to its intersection with the west line of Section 30, Township 3 North, Range 5 East; thence south along range line to the southeast corner of Section 1, Township 2 North, Range 4 East; thence west along section lines to its intersection with the east boundary of the Sevilleta Grant; thence southerly along the east boundary of the Sevilleta Grant to its intersection with the east line of Section 36, Township 1 South, Range 2 East; thence south along range line to the southeast corner of Section 36, Township 5 South, Range 2 East; thence west along township line to its intersection with the east boundary of the Bosque del Apache National Wildlife Refuge, also being the east boundary of the presently declared basin; thence northerly along the existing basin boundary to the point of beginning.

F. The lands included by the extension of January 26, 1970 are as follows:

(1) Beginning at the point of intersection of the topographic boundary of the Rio Chama drainage with the west section line of Section 6, Township 20 North, Range 6 East, the presently existing boundary of the Rio Grande Underground Water Basin; thence westerly along said topographic boundary, passing through Tschicoma Mountain in Section 34, Township 21 North, Range 5 East; Cerro Pelon in Section 26, Township 21 North, Range 3 East; U. S. Geological Survey VABM 9598 "Brown" in Section 19, Township 21 North, Range 3 East to Cerro Jarocito in Section 10, Township 21 North, Range 2 East; thence northwesterly along the topographic boundary of the Rio Chama drainage in Township 21 North, Ranges 2 East and 1 East, Township 22 North, Ranges 1 East and 1 West and Township 23 North, Range 1 West to its intersection with the Continental Divide in Section 21, Township 23 North, Range 1 West; thence northerly along the Continental Divide to the intersection of the topographic boundary of Canoncito de las Yeguas (tributary to Rio Gallina) and Stinking Lake (Burford Lake) drainages in Section 5, Township 26 North, Range 1 West; thence easterly along the topographic boundary of the Rio Chama drainage below El Vado Dam to El Vado Dam; thence easterly along the topographic boundary of the Rio Chama drainage below El Vado Dam to the intersection of the topographic boundary of Rio Nutrias and Rio Vallecitos drainages in the Tierra Amarilla Grant (near Section 36, Township 28 North, Range 5 East); thence northerly along the topographic boundary of Rio Vallecitos drainage to the topographic boundary of Rio Tusas drainage in the vicinity of Section 13, Township 29 North, Range 6 East and Jawbone Mountain; thence northeasterly along the topographic boundary of Rio Tusas drainage to Broke Off mountain in the vicinity of Section 35, Township 30 North, Range 7 East; thence southeasterly along the topographic boundary of Rio Tusas drainage passing along Tusas Ridge in Townships 29 and 28 North, Range 8 East and Townships 28 and 27 North, Range 9 East; along

Comanche Rim in Township 27 North, Range 9 East and in Townships 26 and 25 North, Ranges 9 and 10 East; through Cerro Mojino in Section 7, Township 25 North, Range 10 East to the intersection with the north line of Section 5, Township 24 North, Range 10 East, being the boundary of the presently declared Rio Grande Underground Water Basin; thence southwesterly along the presently existing boundary to the point of beginning.

(2) Beginning at the point of intersection of the north topographic boundary of Rio de Truchas drainage with Longitude 105 degrees 56' West, the presently existing boundary of the Rio Grande Underground Water Basin in the vicinity of Township 22 North, Range 9 East projected into the Sebastian Martin Grant; thence southeasterly along the north topographic boundary of Rio de Truchas drainage to its intersection with the existing boundary of the Rio Grande Underground Water Basin, being the topographic boundary of the Santa Cruz River drainage in Township 20 North, Range 12 East (projected); thence northwesterly along the existing basin boundary to the point of beginning.

(3) Beginning at the point of intersection of the topographic boundary of the Rio Hondo drainage with the presently declared basin boundary in the vicinity of the northeast corner of the Arroyo Hondo Grant and Lobo Peak; thence easterly and southeasterly along said topographic boundary passing through Bull-of-the-Woods Mountain, Frazer Mountain, Mount Walter and Wheeler Peak to its intersection with the topographic boundary of Rio Pueblo de Taos drainage; thence southeasterly along the topographic boundary of Rio Pueblo de Taos drainage passing through Simpson Peak, Old Mike Peak, Red Dome and Taos Cone to its intersection with the Taos County line; thence southerly along the Taos County line passing through Apache Peak, Palo Flechado Pass on U. S. Highway 64 in Section 10, Township 25 North, Range 15 East; Osha Pass in Section 3, Township 24 North, Range 15 East; Osha Mountain and Cuchillo de Fernando to Cerro Vista; thence southwesterly along the topographic boundary of the Rio Grande del Rancho drainage, tributary to Rio Pueblo de Taos, passing through Cerro Olla, Cerro del Oso, and Gallegos Peak in the vicinity of Section 35, Township 23 North, Range 13 East; thence northwesterly along the topographic boundary of the Rio Pueblo de Taos drainage to its intersection with the boundary of the presently declared basin in the vicinity of Section 29, Township 24 North, Range 12 East; thence northeasterly along the existing basin boundary to the point of beginning.

G. The lands included by the extension of November 16, 1970 are as follows:

(1) Beginning at the intersection of the topographic boundary of Canoncito de las Yeguas (tributary to Rio Gallina) and Stinking Lake (Burford Lake) drainages with the Continental Divide in Section 5, Township 26 North, Range 1 West, the presently existing boundary of the Rio Grande Underground Water Basin; thence northerly along the Continental Divide to its intersection with the New Mexico-Colorado state line; thence east along state line to its intersection with the eastern drainage boundary of Wolf Creek (tributary to Rio Chama); thence southeasterly along the Rio Cbama drainage boundary to its intersection with the existing basin boundary in Section 12,

Township 29 North, Range 6 East; thence southwesterly along existing basin boundary to the point of beginning.

(2) Beginning at the intersection of the south boundary of the Sangre de Cristo Grant with longitude 105 degrees 25' 30" West, the presently, existing boundary of the Rio Grande Underground Water Basin; thence easterly along the Sangre de Cristo Grant line to its intersection with the Taos-Colfax county line (also the west line of the Maxwell Grant); thence southerly along the Taos-Colfax county line to its intersection with the existing Rio Grande Underground Water Basin line at Taos Cone; thence northerly along the existing basin boundary to the point of beginning.

H. The lands included by the extension of December 31, 1970, are as follows: Beginning on the drainage boundary between the Rio Grande and the Pecos River at the intersection of the drainage boundary between Rio Nambe and the Santa Fe River in the vicinity of Penitente Peak, the presently existing boundary of the Rio Grande Underground Water Basin; thence southerly along the drainage boundary between the Rio Grande and the Pecos River, passing through Glorieta Baldy in Section 5, Township 16 North, Range 11 East, to its intersection with the north line of Section 28, Township 12 North, Range 11 East; thence east along the section line to the northeast corner of said Section 28; thence south along section lines to the southeast corner of Section 33, Township 12 North, Range 11 East; thence west along the township line to the southwest corner of Section 33, Township 12 North, Range 10 East; thence north along section line to its intersection with the Rio Grande drainage boundary; thence westerly along the Rio Grande drainage boundary to its intersection with the east line of the Sandia Underground Water Basin, also being the Bernalillo-Santa Fe County line; thence north along the Bernalillo-Santa Fe County line to the southeast corner of Sandoval County and west along the Bernalillo-Sandoval County line to its intersection with the west line of the San Pedro Grant, also being on the existing Sandia Underground Water Basin boundary; thence southerly along the Sandia Underground Water Basin boundary to its intersection with the southern drainage boundary of San Pedro Creek, tributary to Tonque Arroyo, near the northwest corner of Section 14, Township 11 North, Range 5 East; thence northwesterly along said drainage boundary to the southern drainage boundary of Las Huertas Creek; thence along said Las Huertas Creek drainage boundary to its intersection with the Bernalillo-Sandoval County line; thence along the Bernalillo-Sandoval County line to the southeast corner of Section 36, Township 12 North, Range 4 East on the existing boundary of the Rio Grande Underground Water Basin; thence northerly and easterly to the point of beginning.

I. The lands included by the extension of December 22, 1971 are as follows:

(1) Beginning at the southwest corner of Section 18, Township 13 South, Range 4 West, a point on the presently existing boundary of the Rio Grande Underground Water Basin; thence west along section line to the southwest corner of Section 13, Township 13 South, Range 5 West; thence north along section line to the northwest corner of said Section 13; thence west along section lines to the southwest corner of Section 10, Township 13 South, Range 5 West; thence north along section

line to the northwest corner of said Section 10; thence west along section line to the southwest corner of Section 4, Township 13 South, Range 5 West; thence north along section lines to the northwest corner of Section 33, Township 12 South, Range 5 West; thence west along section lines to the southwest corner of Section 26, Township 12 South, Range 6 West; thence north along section line to the northwest corner of said Section 26; thence west along section lines to the northeast corner of Section 27, Township 12 South, Range 7 West; thence south along section line to the southeast corner of said Section 27; thence west along section lines to the northeast corner of Section 35, Township 12 South, Range 8 West; thence south along section line to the east quarter corner of said Section 35; thence west to the west quarter corner of Section 34, Township 12 South, Range 8 West; thence north along section line to the northwest corner of said Section 34; thence west along section line to the southwest corner of Section 28, Township 12 South, Range 8 West, a point on the present east boundary of the Gila National Forest; thence north along section lines to the northwest corner of Section 21, Township 12 South, Range 8 West; thence west along section line to the southwest corner of Section 17, Township 12 South, Range 8 West; thence north along section lines to the northwest corner of Section 5, Township 11 South, Range 8 West; thence west along section line to the southwest corner of Section 31, Township 10 South, Range 8 West; thence north along range line to the northwest corner of Section 6, Township 10 South, Range 8 West, a point on the Catron County, Sierra County and Socorro County line; thence west along section line to the southwest corner of Section 36, Township 9 South, Range 9 West; thence north along section lines to the northwest corner of Section 24, Township 7 South, Range 9 West, the northeast corner of the Gila National Forest; thence east along section line to the northeast corner of said Section 24, a point on the Catron County-Socorro County line; thence north along range line and said county line to the northwest corner of Section 6, Township 6 South, Range 8 West, a point on the First Standard Parallel South of the New Mexico Public Land Survey; thence east along said Standard Parallel to the southwest corner of Section 34, Township 5 South, Range 5 West; thence north along section lines to the northwest corner of Section 3, Township 5 South, Range 5 West; thence east along township line to the northwest corner of Section 6, Township 5 South, Range 1 West, a point on the presently declared basin boundary; thence southerly along the existing basin boundary to the point of beginning.

(2) Beginning at the northeast corner of Section 5, Township 6 South, Range 2 East, a point on the presently existing basin boundary; thence south along section lines to the southeast corner of Section 32, Township 9 South, Range 2 East, a point on the Sierra county - Socorro county line; thence west along the Township line and said County line to the intersection with the present basin boundary at longitude 107 degrees 00' west; thence northerly along the existing basin boundary to the point of beginning.

(3) Beginning at the point of intersection of the east line of Section 34, Township 13 South, Range 4 West and the west bank of the Rio Grande on the west boundary of the Pedro Armendariz Grant No. 33, a point on the presently existing boundary; thence south along the west boundary of said grant to the southwest corner

of said grant; thence east along said grant boundary to its intersection with the drainage boundary between the Rio Grande and the Jornada del Muerto on the north line of Section 2, Township 14 South, Range 3 west; thence northerly along said drainage boundary; progressing to the ridge crest of the Fra Cristobal Range, and proceeding along said ridge crest, passing through Massacre Gap, Red Gap and Fra Cristobal Mountain, to its intersection with the Sierra County-Socorro County line approximately 1 1/2 miles east of the east bank of the Rio Grande, a point on the existing basin boundary; thence southerly along the existing basin boundary to the point of beginning.

J. The lands included by the extension of September 7, 1973, are as follows:

(1) Beginning at the intersection of the New Mexico-Colorado State Line and the east bank of the Rio Grande, a point on the presently declared Rio Grande Underground Water Basin boundary; thence southerly along the existing basin boundary to the intersection of the east bank of the Rio Grande with the north line of Township 24 North; thence west along said township line, being the presently declared basin boundary, to its intersection with Comanche Rim on the north line of Section 5, Township 24 North, Range 10 East; thence northwesterly along the existing basin boundary to its intersection with the New Mexico-Colorado State Line, a point on the eastern drainage boundary of Wolf Creek (tributary to Rio Chama); thence east along the New Mexico-Colorado State Line to the point of beginning.

(2) Beginning at Cerro Vista Peak, a point on the eastern topographic drainage boundary of the Rio Grande, the common boundary of the Rio Grande and Canadian River Underground Water Basins, and the Mora County-Taos County line; thence southerly along said topographic drainage boundary and the Canadian River Underground Water Basin boundary, passing through Cerro Picacho, to the point on the common boundary of the topographic drainages of the Rio Grande, the Canadian River and the Pecos River in the vicinity of Latitude 35 degrees 59' 03" North, Longitude 105 degrees 33' 25" West; thence westerly along the topographic drainage boundary of the Rio Grande and the presently declared Upper Pecos Underground Water Basin boundary to North Truchas Peak, a point on the presently declared Rio Grande Underground Water Basin boundary; thence northwesterly along said boundary to the intersection of Longitude 105 degrees 56' West with the north boundary of the Sebastian Martin Grant; thence northeasterly along the presently declared basin boundary to its intersection with the southwestern topographic drainage boundary of the Rio Pueblo de Taos in the vicinity of Section 29, Township 24 North, Range 12 East; thence southeasterly along said drainage boundary and presently declared basin boundary to Cerro del Oso; thence northeasterly along the presently declared basin boundary to Cerro Vista Peak, the point of beginning.

(3) Beginning at the southwest corner of Section 21, Township 12 South, Range 8 West, a point on the presently declared Rio Grande Underground Water Basin boundary; thence west along section lines to the southwest corner of Section 19, Township 12 South, Range 8 West; thence north along section line to the northwest corner of said Section 19; thence west along section lines to the southwest corner of

Section 14, Township 12 South, Range 9 West; thence north along section line to the northwest corner of said Section 14; thence west along section lines to the southwest corner of Section 8, Township 12 South, Range 9 West; thence north along section lines to the southeast corner of Section 30, Township 11 South, Range 9 West*; thence west along section line to the southwest corner of said Section 30; thence north along range line to the northwest corner of Section 19, Township 11 South, Range 9 West*; thence east along section line to the northeast corner of said Section 19; thence north along section lines to the northwest corner of Section 5, Township 11 South, Range 9 West; thence west along township line to the southwest corner of Section 36, Township 10 South, Range 10 West; thence north along section line to the northwest corner of said Section 36; thence west along section line to the southwest corner of Section 26, Township 10 South, Range 10 West; thence north along section lines to the southeast corner of Section 15, Township 10 South, Range 10 West; thence west along section line to the southwest corner of said Section 15; thence north along section line to the northwest corner of said Section 15; thence east along section line to the northeast corner of said Section 15; thence north along section lines to the northwest corner of Section 2, Township 10 South, Range 10 West; thence east along township line to the southwest corner of Section 36, Township 9 South, Range 10 West; thence north along section lines to the northwest corner of Section 25, Township 9 South, Range 10 West; thence east along section line to the northeast corner of said Section 25; thence north along range line to the northwest corner of Section 19, Township 9 South, Range 9 West; thence east along section line to the northeast corner of said Section 19; thence north along section lines to the northwest corner of Section 32, Township 8 South, Range 9 West; thence east along section line to the northeast corner of said Section 32; thence north along section lines to the southeast corner of Section 17, Township 8 South, Range 9 West; thence west along section line to the southwest corner of said Section 17; thence north along section line to the southeast corner of Section 7, Township 8 South, Range 9 West; thence west along section line to the southwest corner of said Section 7; thence north along section line to the northwest corner of said Section 7; thence east along section line to the northeast corner of said Section 7; thence north along section line to the northwest corner of Section 5, Township 8 South, Range 9 West; thence east along township line to the northeast corner of said Section 5; thence north along section lines to the southeast corner of Section 20, Township 7 South, Range 9 West; thence west along section line to the southwest corner of said Section 20; thence north along section line to the northwest corner of said Section 20; thence east along section line to the northeast corner of said Section 20; thence north along section line to the northwest corner of Section 16, Township 7 South, Range 9 West; thence east along section line to the northeast corner of said Section 16; thence north along section line to the northwest corner of Section 10, Township 7 South, Range 9 West; thence east along section lines to the south quarter corner of Section 1, Township 7 South, Range 9 West; thence north to the north quarter corner of said Section 1; thence west along township line to the south quarter corner of Section 35, Township 6 South, Range 9 West; thence north to the north quarter corner of Section 26, Township 6 South, Range 9 West; thence east along section line to the northeast corner of said Section 26; thence north along section lines to the northwest corner of Section 13, Township 6 South, Range 9 West; thence east along section line to the

northeast corner of said Section 13, a point on the presently declared Rio Grande Underground Water Basin boundary; thence southerly along the presently declared basin boundary to the point of beginning.

*Projected sections are based on meridian and parallel projections of surveyed townships.

(4) Beginning at the intersection of the Bernalillo County-Valencia County line with the north boundary of the Antonio Sedillo Grant, a point on the presently declared Rio Grande Underground Water Basin boundary near the southeast corner of Section 1, Township 9 North, Range 3 West; thence northwesterly along the Bernalillo County-Valencia County line to the south line of Sandoval County; thence northwesterly along the Sandoval County-Valencia County line to the northeast corner of Valencia County; thence west along the Sandoval County-Valencia County line to the southeast corner of McKinley County; thence north along the McKinley County-Sandoval County line to the north east corner of McKinley County at the northwest corner of Section 6, Township 20 North, Range 4 West; thence east along township line to the southwest corner of Section 31, Township 21 North, Range 4 West; thence north along range line to its intersection with the Continental Divide on the west line of Section 7, Township 21 North, Range 4 West; thence northeasterly along the Continental Divide to its intersection with the southwestern drainage boundary of the Rio Chama in Section 21, Township 23 North, Range 1 West, a point on the presently declared Rio Grande Underground Water Basin boundary; thence southeasterly along the south drainage boundary of the Rio Chama, being the presently declared basin boundary, to the west line of Section 6, Township 20 North, Range 6 East; thence southerly along the presently declared basin boundary to the intersection with the north boundary of the Pueblo de Cochiti Grant; thence southwesterly along the presently declared basin boundary to the point of beginning.

K. The lands included by the extension of May 14, 1976, are as follows:

(1) Beginning at the southeast corner of Section 8, Township 7 South, Range 9 West, a point common to the existing boundaries of the Rio Grande Underground Water Basin and the Gila-San Francisco Underground Water Basin; thence westerly along the existing boundary of the Gila-San Francisco Underground Water Basin at or near the Continental Divide to the southwest corner of Section 27, Township 8 South, Range 16 West; thence northerly along the existing boundary of the Gila-San Francisco Underground Water Basin at or near the Continental Divide to the southwest corner of Section 23, Township 3 South, Range 15 West; thence north along section line to the intersection of the west line of said Section 23 with the Continental Divide; thence northerly along the Continental Divide to the intersection with the north line of Section 22, Township 8 North, Range 13 West; thence east along section lines to the southwest corner of Section 15, Township 8 North, Range 9 West; thence north along section lines to the northwest corner of Section 3, Township 8 North, Range 9 West; thence west along township line to the southwest corner of Section 34, Township 9 North, Range 9 West; thence north along section lines to the northwest corner of Section 3, Township 9

North, Range 9 West, a point on the existing boundary of the Bluewater Underground Water Basin; thence northerly along the existing boundary of the Bluewater Underground Water Basin to the southwest corner of Section 12, Township 10 North, Range 9 West; thence north along section lines to the northwest corner of Section 13, Township 11 North, Range 9 West; thence east along section lines to the southwest corner of Section 8, Township 11 North, Range 8 West; thence north along section line to the northwest corner of said Section 8; thence east along section lines to the southwest corner of Section 3, Township 11 North, Range 8 West; thence north along section line to the northwest corner of said Section 3; thence east along township line to the southwest corner of Section 31, Township 12 North, Range 7 West; thence north along range line to the northwest corner of said Section 31; thence east along section line to the northeast corner of said Section 31; thence north along section line to the northwest corner of Section 29, Township 12 North, Range 7 West; thence east along section line to the northeast corner of said Section 29; thence north along section lines to the northwest corner of Section 4, Township 12 North, Range 7 West; thence west along township line to the southwest corner of Section 33, Township 13 North, Range 7 West; thence north along section lines to the southeast corner of Section 20, Township 13 North, Range 7 West; thence west along section line to the southwest corner of said Section 20; thence north along section lines to the intersection of the west line of Section 8, Township 13 North, Range 7 West, with the southern boundary of the Bartolome Fernandez Grant; thence west along the southern boundary of said Grant to the southwest corner of said Grant; thence north along the western boundary of said Grant to the intersection with the south line of Section 2, Township 13 North, Range 8 West; thence west along section lines to the southwest corner of Section 4, Township 13 North, Range 8 West; thence north along section line to the northwest corner of said Section 4; thence west along township line to the southwest corner of Section 32, Township 14 North, Range 8 West; thence north along section line to the northwest corner of said Section 32; thence west along section line to the southwest corner of Section 30, Township 14 North, Range 8 West; thence north along range line to the southeast corner of Section 12, Township 14 North, Range 9 West; thence west along section lines to the southwest corner of Section 10, Township 14 North, Range 9 West; thence north along section lines to the northwest corner of Section 34, Township 15 North, Range 9 West; thence west along section lines to the southwest corner of Section 30, Township 15 North, Range 9 West; thence north along range line to the southeast corner of Section 24, Township 15 North, Range 10 West; thence west along section lines to the southwest corner of Section 19, Township 15 North, Range 10 West; thence north along range line to the southeast corner of Section 13, Township 15 North, Range 11 West; thence west along section line to the southwest corner of said Section 13; thence north along section lines to the intersection of the west line of Section 1, Township 15 North, Range 11 West with the Continental Divide; thence northeasterly along the Continental Divide to the intersection with the east line of Section 12, Township 21 North, Range 5 West, a point on the existing boundary of the Rio Grande Underground Water Basin; thence southerly along the existing boundary of the Rio Grande Underground Water Basin to the point of beginning.

(2) Beginning at the northwest corner of Section 14, Township 11 North, Range 5 East, a point on the existing boundary of the Sandia Underground Water Basin; thence southerly along the existing boundary of the Sandia Underground Water Basin to the southeast corner of Section 16, Township 10 North, Range 5 East; thence east along the existing boundary of the Sandia Underground Water Basin to the northeast corner of Section 22, Township 10 North, Range 6 East, a point common to the boundaries of the Sandia Underground Water Basin and the Estancia Underground Water Basin; thence southerly along the existing boundary of the Estancia Underground Water Basin to the southeast corner of Section 31, Township 4 North, Range 6 East; thence east along the existing boundary of the Estancia Underground Water Basin to the northeast corner of Section 5, Township 3 North, Range 7 East; thence south along section lines to the southeast corner of Section 32, Township 3 North, Range 7 East; thence west along township line to the northeast corner of Section 1, Township 2 North, Range 6 East; thence south along range line to the southeast corner of Section 36, Township 2 North, Range 6 East; thence west along township line to the northeast corner of Section 2, Township 1 North, Range 5 East; thence South along section lines to the southeast corner of Section 11, Township 1 North, Range 5 East; thence west along section line to the southwest corner of said Section 11; thence south along section line to the southeast corner of Section 15, Township 1 North, Range 5 East; thence west along section line to the southwest corner of said Section 15, being a point on the Socorro-Torrance county line; thence south along section and county line to the southeast corner of Section 21, Township 1 North, Range 5 East; thence west along section lines to the southwest corner of Section 20, Township 1 North, Range 5 East; thence north along section line to the northwest corner of said Section 20; thence west along section lines to the northeast corner of Section 21, Township 1 North Range 4 East; thence south along section lines to the southeast corner of Section 33, Township 1 North, Range 4 East; thence west along township line to the northeast corner of Section 5, Township 1 South, Range 4 East; thence south along section lines to the southeast corner of Section 20, Township 1 South, Range 4 East; thence west along section lines to the northeast corner of Section 25, Township 1 South, Range 3 East; thence south along range line to the southeast corner of Section 36, Township 1 South, Range 3 East; thence west along township line to the northeast corner of Section 4, Township 2 South, Range 3 East; thence south along section lines to the southeast corner of Section 21, Township 2 South, Range 3 East; thence west along section lines to the southwest corner of Section 19, Township 2 South, Range 3 East, a point on the existing boundary of the Rio Grande Underground Water Basin; thence northerly along the existing boundary of the Rio Grande Underground Water Basin to the southwest corner of Section 36, Township 12 North, Range 4 East and thence southeasterly along existing boundary to the point of intersection of the north section line of Section 14, Township 11 North, Range 5 East with the southern topographical drainage boundary of San Pedro Creek, tributary to Tonque Arroyo of the Rio Grande Stream System, being a point common to the existing boundaries of the Rio Grande Underground Water Basin and the Sandia Underground Water Basin; thence west along section line to the point of beginning at the northwest corner of said Section 14.

L. The lands included by the extension of December 23, 1980, are as follows: Beginning at the northwest corner of Section 31, Township 2 North, Range 7 East, at a point on the presently existing boundary of the Rio Grande Underground Water Basin; thence east along section lines to the northeast corner of Section 32, Township 2 North, Range 7 East; thence south along section lines to the southeast corner of Section 5, Township 1 North, Range 7 East; thence east along section line to the northeast corner of Section 9, Township 1 North, Range 7 East; thence south along section lines to the southeast corner of Section 16, Township 1 North, Range 7 East; thence east along section lines to the northeast corner of Section 23, Township 1 North, Range 7 East; thence south along section lines to the southeast corner of Section 35, Township 1 North, Range 7 East; thence west along township line to the northeast corner of Section 2, Township 1 South, Range 7 East; thence south along section lines to the southeast corner of Section 14, Township 2 South, Range 7 East; thence east along section line to the northeast corner of Section 24, Township 2 South, Range 7 East; thence south along range line to the southeast corner of Section 12, Township 3 South, Range 7 East; thence west along section line to the southwest corner of said Section 12; thence south along section lines to the southeast corner of Section 14, Township 4 South, Range 7 East; thence west along section line to the southwest corner of said Section 14; thence south along section lines to the southeast corner of Section 34, Township 4 South, Range 7 East; thence west along township line to the southwest corner of said Section 34; thence south along section lines to the southeast corner of Section 9, Township 5 South, Range 7 East; thence west along section line to the southwest corner of said Section 9; thence south along section line to the southeast corner of Section 17, Township 5 South, Range 7 East; thence west along section lines to the southwest corner of Section 18, Township 5 South, Range 7 East; thence south along range line to the southeast corner of Section 36, Township 5 South, Range 6 East; thence East along township line to the northeast corner of Section 6, Township 6 South, Range 7 East; thence south along section lines to the southeast corner of Section 18, Township 6 South, Range 7 East; thence west along section lines to the southwest corner of Section 13, Township 6 South, Range 6 East; thence south along section lines to the southeast corner of Section 35, Township 6 South, Range 6 East; thence west along township line to the southwest corner of Section 31, Township 6 South, Range 6 East; thence south along range line to the southeast corner of Section 36, Township 7 South, Range 5 East; thence west along township line to the northeast corner of Section 2, Township 8 South, Range 5 East; thence south along section lines to the southeast corner of Section 14, Township 8 South, Range 5 East; thence west along section lines to the southwest corner of Section 15, Township 8 South, Range 5 East; thence south along section lines to the southeast corner of Section 33, Township 8 South, Range 5 East; thence east along township line to the northeast corner of Section 4, Township 9 South, Range 5 East; thence south along section line to the southeast corner of said Section 4; thence west along section line to the southwest corner of said Section 4; thence south along section line to the southeast corner of Section 8, Township 9 South, Range 5 East; thence west along section lines to the southwest corner of Section 7, Township 9 South, Range 5 East; thence south along range line to the southeast corner of Section 25, Township 9 South, Range 4 East; thence west along section lines to the southwest corner of Section 26, Township 9 South, Range 4 East; thence south along

section lines to the southeast corner of Section 27, Township 10 South, Range 4 East; thence west along section lines to the southwest corner of Section 28, Township 10 South, Range 4 East; thence south along section line to the southeast corner of Section 32, Township 10 South, Range 4 East; thence west along township line to the northeast corner of Section 1, Township 11 South, Range 4 East; thence south along range line to the southeast corner of Section 24, Township 11 South, Range 4 East; thence west along section line to the southwest corner of said Section 24; thence south along section lines to the southeast corner of Section 35, Township 11 South, Range 4 East; thence west along township line to the southwest corner of Section 32, Township 11 South, Range 4 East; thence south along section lines to the southeast corner of Section 7, Township 12 South, Range 4 East; thence west along section line to the southwest corner of said Section 7; thence south along range line to the southeast corner of Section 12, Township 12 South, Range 3 East; thence west along section lines to the southwest corner of Section 11, Township 12 South, Range 3 East; thence south along range line to the southeast corner of Section 12, Township 12 South, Range 2 East; thence west along section line to the southwest corner of said Section 12; thence south along section lines to the southeast corner of Section 23, Township 12 South, Range 2 East; thence west along section line to the southwest corner of said Section 23; thence south along section line to the southeast corner of Section 27, Township 12 South, Range 2 East; thence west along section line to the southwest corner of said Section 27; thence south along section lines to the southeast corner of Section 21, Township 13 South, Range 2 East; thence west along section lines to the southwest corner of Section 24, Township 13 South, Range 1 West; thence south along section line to the southeast corner of Section 26, Township 13 South, Range 1 West; thence west along section lines to the southwest corner of Section 28, Township 13 South, Range 1 West; thence south along section lines to the southeast corner of Section 17, Township 14 South, Range 1 West; thence west along section lines to the southwest corner of Section 13, Township 14 South, Range 3 West; thence south along section line to the southeast corner of Section 23, Township 14 South, Range 3 West; thence west along section lines to the southwest corner of said Section 23; thence south along section lines to the southeast corner of Section 3, Township 15 South, Range 3 West; thence west along section lines to the southwest corner of Section 4, Township 15 South, Range 3 West; thence north along section lines to the northwest corner of Section 16, Township 14 South, Range 3 West; thence west along section line to the southwest corner of Section 8, Township 14 South, Range 3 West; thence north along section lines to the intersection of the west line of Section 5, Township 14 South, Range 3 West with the southern boundary of the Pedro Armendaris Grant #33, a point along the existing Rio Grande Underground Water Basin boundary; thence easterly and northerly along said existing basin boundary to the point of beginning.

[Recompiled 12/31/01]

19.27.50.8 ROSWELL UNDERGROUND WATER BASIN:

A. The corrected boundaries of the extension of the Roswell Underground Water Basin as originally intended by special order No. 147 are as follows: (corrections are underlined). Beginning at a point on the south section line of Section 35, Township (T) 7 South (S), Range (R) 13 East (E), New Mexico Principal Meridian (N.M.P.M.), a point on the boundary of the existing Hondo and Tularosa Underground Water Basins, and a point on the drainage divide between the Tularosa Basin and the Pecos River stream system; thence northerly along the east boundary of the existing Tularosa Underground Water Basin to the southwest corner of Section 23, T 1 S, R 11 E, N.M.P.M.; thence north along section lines to the northwest corner of Section 14, T 1 S, R 11 E, N.M.P.M.; thence west along section line to the southwest corner of Section 10, T 1 S, R 11 E, N.M.P.M.; thence north along section lines to the southeast corner of Section 9, T 1 North (N), R 11 E, N.M.P.M.; thence west along section line to the south quarter corner of said Section 9; thence north to the north quarter corner of said Section 9; thence west along section line to the southwest corner of Section 4, T 1 N, R 11 E, N.M.P.M.; thence north along section line to the northwest corner of said Section 4, a point on the south boundary of the Estancia Underground Water Basin; thence east along section lines to the north quarter corner of Section 6, T 1 N, R 12 E, N.M.P.M.; thence north to the north quarter corner of Section 31, T 2 N, R 12 E, N.M.P.M.; thence east along section line to the northwest corner of Section 32, T 2 N, R 12 E, N.M.P.M.; thence north along section lines to the northwest corner of Section 32, T 3 N, R 12 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 32; thence north along section lines to the northwest corner of Section 33, T 4 N, R 12 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 36, T 4 N, R 12 E, N.M.P.M.; thence south along range line to the northwest corner of Section 6, T 3 N, R 13 E, N.M.P.M.; thence east along township line to the northeast corner of Section 1, T 3 N, R 13 E, N.M.P.M.; thence south along range line to the southeast corner of said Section 1; thence east along section lines to the northeast corner of Section 9, T 3 N, R 14 E, N.M.P.M.; thence south along section line to the southeast corner of said Section 9; thence east along section lines to the southwest corner of Section 8, T 3 N, R 15 E, N.M.P.M.; thence north along section line to the northwest corner of said Section 8; thence east along section lines to the northwest corner of Section 9, T 3 N, R 16 E, N.M.P.M.; thence north along section lines to the northwest corner of Section 33, T 4 N, R 16 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 36, T 4 N, R 16 E, N.M.P.M.; thence south along range line to the southeast corner of said Section 36; thence east along township line to the northeast corner of Section 4, T 3 N, R 18 E, N.M.P.M.; thence south along section lines to the northeast corner of Section 21, T 3 N, R 18 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 21, T 3 N, R 19 E, N.M.P.M.; thence south along section lines to the northeast corner of Section 28, T 2 N, R 19 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 26, T 2 N, R 19 E, N.M.P.M.; thence south along section lines to the northwest corner of Section 12, T 1 N, R 19 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 12; thence south along range line to the northeast corner of Section 13, T 1 N, R 19 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 17, T 1 N, R 20 E, N.M.P.M.; thence south along section line to the northeast corner of Section 20, T 1 N, R 20 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 22, T 1 N, R 20 E, N.M.P.M.;

thence south along section line to the northeast corner of Section 27, T 1 N, R 20 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 29, T 1 N, R 21 E, N.M.P.M.; thence south along section lines to the northeast corner of Section 20, T 1 S, R 21 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 22, T 1 S, R 21 E, N.M.P.M.; thence south along section lines to the northeast corner of Section 22, T 2 S, R 21 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 24, T 2 S, R 21 E, N.M.P.M.; thence south along range line to the northeast corner of Section 13, T 3 S, R 21 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 17, T 3 S, R 22 E, N.M.P.M.; thence south along section lines to the northeast corner of Section 29, T 3 S, R 22 E, N.M.P.M.; thence east along section line to the northeast corner of Section 28, T 3 S, R 22 E, N.M.P.M.; thence south along section lines to the northeast corner of Section 4, T 5 S, R 22 E, N.M.P.M.; thence east along township line to the northeast corner of Section 2, T 5 S, R 22 E, N.M.P.M.; thence south along section line to the northeast corner of Section 11, T 5 S, R 22 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 7, T 5 S, R 23 E, N.M.P.M.; thence south along section lines to the southeast corner of Section 31, T 5 S, R 23 E, N.M.P.M.; thence east along township line to the northeast corner of Section 1, T 6 S, R 25 E, N.M.P.M.; thence south along range line to the southeast corner of Section 36, T 6 S, R 25 E, N.M.P.M., a point on the existing Roswell Underground Water Basin boundary; thence east on said existing boundary of Roswell Underground water Basin to the northwest corner of Section 3, T 7 S, R 26 E, N.M.P.M., a point of intersection of the boundaries of the existing Ft. Sumner and Roswell Underground Water Basins; thence east along township line to the northeast corner of Section 5, T 7 S, R 27 E, N.M.P.M.; thence south along section line to the southeast corner of said Section 5; thence east along section lines to the northeast corner of Section 10, T 7 S, R 27 E, N.M.P.M.; thence north along section lines to the northwest corner of Section 2, T 6 S, R 27 E, N.M.P.M.; thence east along township line to the southwest corner of Section 32, T 5 S, R 27 E, N.M.P.M.; thence north along section lines to the northwest corner of Section 29, T 4 S, R 27 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 28, T 4 S, R 28 E, N.M.P.M.; thence south along section lines to the northeast corner of Section 4, T 5 S, R 28 E, N.M.P.M.; thence east along township line to the northeast corner of Section 1, T 5 S, R 29 E, N.M.P.M., a point on the Chaves-Roosevelt county line; thence north along range line and said county line to the northwest corner of Section 30, T 4 S, R 30 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 28, T 4 S, R 30 E, N.M.P.M.; thence south along section lines to the northwest corner of Section 10, T 5 S, R 30 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 10; thence south along section line to the southeast corner of said Section 10; thence east along section line to the northeast corner of Section 13, T 5 S, R 30 E; thence south along range line to the southeast corner of Section 36, T 5 S, R 30 E, N.M.P.M., a point on the Roosevelt - Chavez county line; thence east along township line and said county line to the northeast corner of Section 1, T 6 S, R 31 E, N.M.P.M.; thence south along range line and said county line to the northwest corner of Section 6, T 7 S, R 32 E, N.M.P.M.; thence east along township line to the northeast corner of said Section 6; thence south along section lines to the northwest corner of Section 17, T 7 S, R 32 E, N.M.P.M.; thence east along section line to the northeast

corner of said Section 17; thence south along section lines to the northwest corner of Section 28, T 7 S, R 32 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 28; thence south along section lines to the northwest corner of Section 3, T 8 S, R 32 E, N.M.P.M., a point on the Roosevelt-Chaves county line; thence east along township line and said county line to the northeast corner of said Section 3; thence south along section lines to the southeast corner of Section 34, T 8 S, R 32 E, N.M.P.M., a point on the Chaves-Lea county line; thence west along township line and said county line to the northeast corner of Section 6, T 9 S, R 32 E, N.M.P.M.; thence south along section lines to the northwest corner of Section 32, T 9 S, R 32 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 32; thence south along section lines to the southeast corner of Section 20, T 10 S, R 32 E, N.M.P.M.; thence west along section lines to the southwest corner of Section 19, T 10 S, R 32 E, N.M.P.M., a point on the Lea-Chaves county line; thence south along range line and said county line to the southeast corner of Section 36, T 10 S, R 31 E, N.M.P.M.; thence west along township line to the northeast corner of Section 3, T 11 S, R 31 E, N.M.P.M.; thence south along section lines to the southeast corner of Section 10, T 11 S, R 31 E, N.M.P.M.; thence west along section line to the southwest corner of said Section 10; thence south along section line to the southeast corner of Section 16, T 11 S, R 31 E, N.M.P.M.; thence west along section line to the southwest corner of said Section 16; thence south along section lines to the northwest corner of Section 33, T 11 S, R 31 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 33; thence south along section lines to the northwest corner of Section 3, T 13 S, R 31 E, N.M.P.M.; thence east along section line to the northeast corner of said Section 3; thence south along section lines to the southeast corner of Section 15, T 14 S, R 31 E, N.M.P.M.; thence west along section line to the southwest corner of said Section 15; thence south along section lines to the southeast corner of Section 33, T 14 S, R 31 E, N.M.P.M.; thence west along township line to the northeast corner of Section 6, T 15 S, R 31 E, N.M.P.M.; thence south along section lines to the southeast corner of Section 31, T 15 S, R 31 E, N.M.P.M., a point on the Chaves-Eddy county line; thence east along township line and said county line to the northeast corner of section 3, T 16 S, R 31 E, N.M.P.M.; thence south along section lines to the southeast corner of Section 22, T 16 S, R 31 E, N.M.P.M.; thence east along section lines to the northeast corner of Section 25, T 16 S, R 31 E, N.M.P.M., a point on the Eddy-Lea county line; thence south along range line to the southeast corner of said Section 25; thence east along section lines to the northeast corner of Section 32, T 16 S, R 32 E, N.M.P.M.; thence south along section line to the southeast corner of said Section 32; thence east along township line to the northeast corner of Section 4, T 17 S, R 32 E, N.M.P.M.; thence south along section line to the southeast corner of said Section 4; thence east along section lines to the northeast corner of Section 11, T 17 S, R 32 E, N.M.P.M.; thence south along section line to the southeast corner of said Section 11; thence east along section line to the northeast corner of Section 13, T 17 S, R 32 E, N.M.P.M.; thence south along range line to the southeast corner of said Section 13; thence east along section line to the northeast corner of Section 19, T 17 S, R 33 E, N.M.P.M.; thence south along section line to the southeast corner of said Section 19; thence east along section line to the northeast corner of Section 29, T 17 S, R 33 E, N.M.P.M.; thence south along section line to the southeast corner of said Section 29; thence east

along section line to the northeast corner of Section 33, T 17 S, R 33 E, N.M.P.M.; thence south along section line to the southeast corner of said Section 33, a point of intersection of the boundaries of the existing Lea County and Capitan Underground Water Basins; thence west and south along the existing Capitan Underground Water Basin boundary to the southwest corner of section 31, T 18 S, R 28 E, N.M.P.M., a point of intersection of the existing Capitan and Roswell Underground Water Basin boundaries; thence south, west and north along the existing Roswell Underground Water Basin boundary to the southeast corner of Section 28, T 23 S, R 20 E, N.M.P.M.; thence, leaving the existing Roswell Underground Water Basin boundary, west along section line to the southwest corner of said Section 28; thence north along section line to the northwest corner of said Section 28; thence west along section line to the southwest corner of Section 20, T 23 S, R 20 E, N.M.P.M.; thence north along section line to the northwest corner of said Section 20; thence west along section line to the southwest corner of Section 18, T 23 S, R 20 E, N.M.P.M.; thence north along range line to the northwest corner of said Section 18; thence west along section line to the southwest corner of Section 12, T 23 S, R 19 E, N.M.P.M.; thence north along section line to the northwest corner of said Section 12; thence west along section line to the southwest corner of Section 2, T 23 S, R 19 E, N.M.P.M.; thence north along section line to the southeast corner of Section 27, T 22 S, R 19 E, N.M.P.M.; thence west along section line to the southwest corner of said Section 27; thence north along section lines to the southeast corner of Section 21, T 22 S, R 19 E, N.M.P.M.; thence west along section line to the southwest corner of said Section 21; thence north along section line to the northwest corner of said Section 21; thence west along section line to the southwest corner of Section 17, T 22 S, R 19 E, N.M.P.M.; thence north along section lines to the southeast corner of Section 6, T 22 S, R 19 E, N.M.P.M.; thence west along section line to the southwest corner of said Section 6; thence north along range line to the northwest corner of said Section 6; thence west along township line to the southwest corner of Section 34, T 21 S, R 18 E, N.M.P.M.; thence north along section line to the southeast corner of Section 28, T 21 S, R 18 E, N.M.P.M.; thence west along section line to the southwest corner of said Section 28; thence north along section line to the northwest corner of said Section 28; thence west along section line to the southwest corner of Section 20, T 21 S, R 18 E, N.M.P.M.; thence north along section lines to the southwest corner of Section 20, T 19 S, R 18 E, N.M.P.M.; thence west along section lines to the southwest corner of Section 24, T 19 S, R 17 E, N.M.P.M.; thence north along section line to the northwest corner of said Section 24; thence west along section lines to the southwest corner of Section 15, T 19 S, R 16 E, N.M.P.M.; thence north along section line to the northwest corner of said Section 15; thence west along section line to the southwest corner of Section 9, T 19 S, R 16 E, N.M.P.M.; thence north along section line to the northwest corner of said Section 9; thence west along section line to the southwest corner of Section 5, T 19 S, R 16 E, N.M.P.M.; thence north along section line to the northwest corner of said Section 5, a point on the south boundary of the Penasco Underground Water Basin; thence east and north along south boundary of the existing Penasco Underground Water Basin to the northeast corner of Section 17, T 18 S, R 18 E, N.M.P.M., a point at the intersection of the boundaries of the existing Penasco and Roswell Underground Water Basins; thence north, west, east and south along the boundary of the existing Roswell Underground

Water Basin to the southeast corner of Section 33, T 10 S, R 20 E, N.M.P.M., a point of intersection of the existing boundaries of the Roswell and Hondo Underground Water Basins; thence west and north along the existing boundary of the Hondo Underground Water Basin to the point of beginning.

19.27.52.5 EFFECTIVE DATE:

November 1, 1966

[Recompiled 12/31/01]

19.27.52.6 OBJECTIVE:

This Rule is formulated for the purpose of carrying out the provisions of the statutes governing underground waters and describing the present extent of all declared underground water basins in New Mexico.

[Recompiled 12/31/01]

19.27.52.7 DEFINITIONS:

[RESERVED]

[Recompiled 12/31/01]

19.27.52.8 SAN JUAN UNDERGROUND WATER BASIN:

A. The lands declared within the San Juan Underground Water Basin on July 29, 1976, are as follows: Beginning at the point of intersection of the Continental Divide and the New Mexico-Colorado state line near mile post 202, being the topographic drainage boundary between the San Juan River stream system and the Rio Grande stream system, at a point on the presently-declared Rio Grande Underground Water Basin boundary; thence southwesterly along the Continental Divide and said topographic drainage boundary to the point common to the topographic drainage boundary of the San Juan River stream system, the Rio Puerco of the Little Colorado River stream system, and the Rio Grande stream system, in the Southeast Quarter of Section 25, Township 16 North, Range 13 West, N.M.P.M.; thence westerly and northwesterly along the southern topographic drainage boundary of the San Juan River stream system, also being the topographic drainage boundary between the San Juan River stream system and the Rio Puerco of the Little Colorado River stream system, passing through Dalton Pass in Section 4, Township 16 North, Range 14 West, passing along Manuelito Plateau, passing near Tohatchi Lookout and passing along the Chuska Mountains, through Washington Pass, to its intersection with the New Mexico-Arizona state line, between latitude 36 degrees 18 minutes North and latitude 36 degrees 19 minutes North; thence northerly along the New Mexico-Arizona state line to its intersection with the New Mexico-Colorado state line, a point common to the boundaries of New Mexico, Arizona, Colorado and Utah; thence easterly along the New Mexico-Colorado state line to the point of beginning.

B. The lands included within the San Juan Underground Water Basin by amendment of March 12, 1980 are as follows: Beginning at the southernmost point of intersection of the New Mexico-Arizona state line and the topographic drainage boundary between the Chinle Wash and the Chaco River, both of the San Juan River stream system, being at about latitude 36 degrees, 18 minutes, 45 seconds North; thence easterly and southeasterly along the topographic drainage boundary between the Chinle Wash and the Chaco River along the Chuska Mountains, passing through Washington Pass, to a point common to the topographic drainage of the Chinle Wash and the Chaco River, both of the San Juan River stream system and Bowl Creek of the Puerco River stream system; thence northwesterly, westerly and then southwesterly

along the north drainage boundary of Bowl Creek, which is the topographic drainage boundary between the San Juan River stream system and the Puerco River stream system, to its intersection with the McKinley-San Juan county line; thence west along the McKinley-San Juan county line approximately 4.2 miles to its intersection with the New Mexico-Arizona state line; thence northerly along the New Mexico-Arizona state line to the point of beginning.

19.27.56.4 DURATION:

Permanent

[3/11/98; Recompiled 12/31/01]

19.27.56.5 EFFECTIVE DATE:

November 14, 1998, unless a different date is cited at the end of a section or paragraph.

[3-11-98; 11/14/98; Recompiled 12/31/01]

[Compiler's note: The words *or paragraph*, above, are no longer applicable. Later dates are now cited only at the end of sections, in the history notes appearing in brackets.]

19.27.56.6 OBJECTIVE:

The objective of this Special Order No. 156 is to take administrative control of the underground waters within a specific area of the state to provide for the orderly development of water rights and protection of existing water rights. The waters of the underground streams, channels, artesian basins, reservoirs, or lakes having reasonably ascertainable boundaries, are public waters and are subject to appropriation for beneficial use. The Tucumcari basin was declared and bounded by Special Order 132

of the state engineer dated July 7, 1982. The Tucumcari basin boundaries, as presently defined, do not include certain adjacent areas which are a part of the underground water basin having reasonably ascertainable boundaries and in which new appropriations of water might impair existing rights. Additionally, surface and underground waters in some areas within the boundaries of this extension may be interrelated with the surface and underground waters of the Tucumcari basin. THEREFORE, it is hereby declared that the area in San Miguel, Guadalupe, Quay, Colfax, Union and Harding counties comprising of approximately 5327 square miles and more fully described hereinafter is included by extension as part of the Tucumcari underground water basin, subject to New Mexico statutes, and the rules and regulations of the state engineer.

[3/11/98; 11/14/98; Recompiled 12/31/01]

19.27.56.7 DEFINITIONS:

[RESERVED]

19.27.56.8 STATE ENGINEER SPECIAL ORDER NO. 156 TUCUMCARI BASIN EXTENSION:

The area included within the Tucumcari basin extension begins at a point on the New Mexico and Texas state line approximately 500 feet southeast of the northwest corner of Section 17, Township 14 North, Range 37 East, NMPM; thence south along said state line to the northeast corner of Section 5, Township 8 North, Range 37 East, NMPM, being a point on the northern boundary of Curry County and the Curry County Underground Water Basin; thence west along county line to the southeast corner of Section 31, Township 9 North, Range 35 East, NMPM; thence north along section line to the northeast corner of said Section 31; thence west along section line to the northwest corner of Section 34, Township 9 North, Range 33 East, NMPM; thence south along section line to the southwest corner of said Section 34; thence west along Township line to the northwest corner of Section 3, Township 8 North, Range 33 East, NMPM; thence south along section line to the northeast corner of Section 21, Township 8 North, Range 33 East, NMPM; thence west along section line to the northwest corner of Section 19, Township 8 North, Range 33 East, NMPM; thence south along range line to the northeast corner of Section 36, Township 8 North, Range 32 East, NMPM; thence west along section line to the northwest corner of Section 34, Township 8 North, Range 32 East, NMPM; thence south along section line to the northeast corner of Section 4, Township 7 North, Range 32 East, NMPM; thence west along township line to the northwest corner of Section 3, Township 7 North, Range 31 East, NMPM; thence south along section line to the northeast corner of Section 9, Township 7 North, Range 31 East, NMPM; thence west along section line to the northwest corner of Section 11, Township 7 North, Range 30 East, NMPM; thence south along section line to the northeast corner of Section 15, Township 7 North, Range 30 East, NMPM; thence west along section line to the northwest corner of Section 17, Township 7 North, Range 30 East, NMPM, being a point on the existing boundary of the Fort Sumner Underground

Water Basin; thence west along section line to the northwest corner of Section 13, Township 7 North, Range 28 East, NMPM; thence north along section line to the northeast corner of Section 2, Township 7 North, Range 28 East, NMPM; thence west along township line to the southeast corner of Section 32, Township 8 North, Range 28 East, NMPM; thence north along section line to the northeast corner of Section 29, Township 8 North, Range 28 East, NMPM; thence west along section line to the northeast corner of Section 27, Township 8 North, Range 27 East, NMPM; thence north along section line to the northeast corner of Section 3, Township 8 North, Range 27 East, NMPM; thence East along township line to the southeast corner of Section 34, Township 9 North, Range 27 East, NMPM; thence north along section line to the northeast corner of Section 27, Township 9 North, Range 27 East, NMPM; thence west along section line to the southeast corner of Section 21, Township 9 North, Range 27 East, NMPM; thence north along section line to the northeast corner of said Section 21; thence west along section line to the northwest corner of Section corner of Section 23, Township 9 North, Range 26 East, NMPM; thence south along section line to the northwest corner of Section 35, Township 9 North, Range 26 East, NMPM; thence west along section line to the northwest corner of Section 35, Township 9 North, Range 24 East, NMPM; thence north along section line to the northeast corner of Section 27, Township 9 North, Range 24 East, NMPM; thence west along section line to the southeast corner of Section 21, Township 9 North, Range 24 East, NMPM; thence north along section line to the southeast corner of Section 4, Township 9 North, Range 24 East, NMPM; thence east along section line to the southeast corner of Section 3, Township 9 North, Range 24 East, NMPM; thence north along section line to the southeast corner of Section 34, Township 10 North, Range 24 East, NMPM; thence east along Township line to the southeast corner of Section 35, Township 10 North, Range 24 East, NMPM; thence north along section line to the southeast corner of Section 23, Township 10 North, Range 24 East, NMPM; thence east along section line to the southeast corner of Section 24, Township 10 North, Range 24 East, NMPM; thence north along range line to the southeast corner of Section 12, Township 10 North, Range 24 East, NMPM; thence east along section line to the southeast corner of Section 8, Township 10 North, Range 25 East, NMPM; thence north along section line to the southeast corner of Section 5, Township 10 North, Range 25 East, NMPM; thence east along section line to the southeast corner of Section 4, Township 10 North, Range 25 East, NMPM; thence north along section line to the southeast corner of Section 33, Township 11 North, Range 25 East, NMPM; thence east along township line to the southeast corner of Section 34, Township 11 North, range 25 East, NMPM; thence north along section line to the southeast corner of Section 27, Township 11 North, Range 25 East, NMPM; thence east along section line to the southeast corner of Section 26, Township 11 North, Range 25 East, NMPM; thence north along section line to the southeast corner of Section 23, Township 11 North, Range 25 East, NMPM; thence east along section line to the southeast corner of Section 19, Township 11 North, Range 26 East, NMPM; thence north along section line to the southeast corner of Section 18, Township 11 North, range 26 East, NMPM; thence east along section line to the southeast corner of Section 17, Township 11 North, Range 26 East, NMPM; thence north along section line to the northeast corner of Section 29, Township 12 North, Range 26 East, NMPM; thence west along section line to the intersection of the north

boundary of said Section 29 with Longitude 104E 12' 30"; thence north along said longitude to the intersection with latitude 35E 21' 30"; thence east along said latitude to the intersection with longitude 104E 10' 30"; thence north along said longitude to the intersection with latitude 35E 28' 45"; thence east along said latitude to the intersection with longitude 104E 09' 45"; thence north along said longitude to the intersection with the north boundary of Section 10, Township 17 North, Range 26 East, NMPM; thence west along section line to the northeast corner of Section 8, Township 17 North, Range 26 East, NMPM; thence north along section line to the northeast corner of Section 32, Township 18 North, Range 26 East, NMPM; thence west along section line to the northwest corner of Section 31, Township 18 North, Range 26 East, NMPM, being a point on the existing boundary of the Canadian River Underground Water Basin; thence north along range line and the existing east boundary of the Canadian River Basin to the southeast corner of Section 13, Township 27 North, Range 25 East, NMPM; thence east along section line to the southeast corner of Section 16, Township 27 North, Range 26 East, NMPM; thence east along section line to the southeast corner of Section 14, Township 27 North, Range 26 East, NMPM; thence north along section line to the northeast corner of said Section 14; thence east to the northeast corner of Section 16, Township 27 North, Range 27 East; NMPM; thence south to the southeast corner of said Section 16; thence east to the southeast corner of Section 14, Township 27 North, Range 27 East, NMPM; thence south to the southeast corner of Section 23, Township 27 North, Range 27 East, NMPM; thence east to the northeast corner of Section 28, Township 27 North, Range 28 East, NMPM; thence south along section line West of Lonesome Mountain to the southeast corner of said Section 28; thence east to the northeast corner of Section 36, Township 27 North, Range 28 East, NMPM; thence south to the southeast corner of said Section 36; thence east to the northeast corner of Section 6, Township 26 North, Range 29 East, NMPM; thence south to the southeast corner of Section 7, Township 26 North, Range 29 East, NMPM; thence west to the southwest corner of said Section 7; thence south along Township line to the southwest corner of Section 18, Township 25 North, Range 29 East, NMPM; thence east to the northwest corner of Section 21, Township 25 North, Range 29 East, NMPM; thence south through the Don Carlos Hills to the southwest corner of said Section 21; thence east to the northwest corner of Section 26, Township 25 North, Range 29 East, NMPM; thence south to the southwest corner of said Section 26; thence east to the southeast corner of said Section 26; thence south to the southwest corner of Section 36, Township 25 North, Range 29 East, NMPM; thence west along township line to the northeast corner of Section 1, Township 24 North, Range 29 East, NMPM; thence south to the northwest corner of Section 13, Township 24 North, Range 29 East, NMPM; thence east to the northeast corner of said Section 13; thence south along range line to the northwest corner of Section 31, Township 24 North, Range 30 East, NMPM; thence east to the northeast corner of said Section 31; thence south to the southeast corner of said Section 31; thence east to the northeast corner of Section 5, Township 23 North, Range 30 East, NMPM; thence south to the northwest corner of Section 4, Township 22 North, Range 30 East, NMPM; thence east to the northeast corner of said Section 4; thence south to the northwest corner of Section 15, Township 22 North, Range 30 East, NMPM; thence east to the northwest corner of Section 13, Township 22 North, Range 30 East, NMPM; thence south to the southwest corner of said Section 13; thence east

to the southeast corner of said Section 13; thence in a southeasterly direction diagonally across Sections 19, 29 and 33, Township 22 North, Range 31 East, NMPM, to the Union and Harding County line, being the line between Townships 21 North and 22 North, NMPM; at the northwest corner of Section 3, Township 21 North, Range 31 East, NMPM; thence east along said county line to the northeast corner of Section 2, Township 21 North, Range 31 East, NMPM; thence south to the southeast corner of said Section 2; thence east to the northwest corner of Section 12, Township 21 North, Range 32 East, NMPM; thence south to the northwest corner of Section 24, Township 21 North, Range 32 East, NMPM; thence east to the northeast corner of said Section 24; thence south to the northwest corner of Section 31, Township 21 North, Range 33 East, NMPM; thence east to the northeast corner of said Section 31; thence south to the southeast corner of said Section 31; thence east along Township line to the northwest corner of Section 4, Township 20 North, Range 33 East, NMPM; thence in a southeasterly direction diagonally across Sections 4, 10, 14 and 24, Township 20 North, Range 33 East, NMPM, to the northwest corner of Section 30, Township 20 North, Range 34 East, NMPM; thence south along Harding and Union County line, being the line between Ranges 33 East and 34 East, to the northwest corner of Section 18, Township 19 North, Range 34 East, NMPM; thence east to the northeast corner of said Section 18; thence south to the northeast corner of Section 18, Township 18 North, Range 34 East, NMPM; thence west to the northwest corner of said Section 18; thence south along Harding and Union County line and Harding and Quay County line to the southwest corner of Section 6, Township 17 North, Range 34 East, NMPM; thence east to the northwest corner of Section 10, Township 17 North, Range 34 East, NMPM; thence in a southeasterly direction diagonally across Sections 10 and 14, Township 17 North, Range 34 East, NMPM, to the northwest corner of Section 24, Township 17 North, Range 34 East, NMPM; thence east to the northeast corner of Section 19, Township 17 North, Range 35 East, NMPM; thence south to the southeast corner of said Section 19; thence east to the northwest corner of Section 26, Township 17 North, Range 35 East, NMPM; thence south to the southwest corner of said Section 26; thence east to the southeast corner of said Section 26 near Kerlin Hill; thence south to the southwest corner of Section 36, Township 17 North, Range 35 East, NMPM; thence east along township line to the northwest corner of Section 6, Township 16 North, Range 36 East, NMPM; thence south to the northwest corner of Section 7, Township 16 North, Range 36 East, NMPM; thence east to the northeast corner of said Section 7; thence south to the northwest corner of Section 29, Township 16 North, Range 36 East, NMPM; thence east to the northeast corner of said Section 29; thence south to the northwest corner of Section 4, Township 15 North, Range 36 East, NMPM; thence east to the northeast corner of said Section 4; thence south to the northwest corner of Section 15, Township 15 North, Range 36 East, NMPM; thence in a southeasterly direction diagonally across Sections 15 and 23 in Township 15 North, Range 36 East, NMPM, to the northwest corner of Section 25, Township 15 North, Range 36 East, NMPM; thence south to the northwest corner of Section 1, Township 14 North, Range 36 East, NMPM; thence in a southeasterly direction diagonally across Section 1, Township 14 North, Range 36 East, and Section 7, Township 14 North, Range 37 East, straight through the northwest corner of Section 17, Township 14 North, Range 37 East, to a point on the New Mexico and Texas state line, being the point of beginning.

PART 58: ROOSEVELT COUNTY UNDERGROUND WATER BASIN

19.27.58.1 ISSUING AGENCY:

Office of State Engineer.

[Recompiled 12/31/01]

19.27.58.2 SCOPE:

[RESERVED]

[Recompiled 12/31/01]

19.27.58.3 STATUTORY AUTHORITY:

Adopted pursuant to the authority of Sections 72-2-8, 72-2-12 and 72-13-4, New Mexico Statutes Annotated, 1978.

[Recompiled 12/31/01]

19.27.58.4 DURATION:

[Permanent]

[Recompiled 12/31/01]

19.27.58.5 EFFECTIVE DATE:

November 1, 1966

[Recompiled 12/31/01]

19.27.58.6 OBJECTIVE:

This Rule is formulated for the purpose of carrying out the provisions of the statutes governing underground waters and describing the present extent of all declared underground water basins in New Mexico.

[Recompiled 12/31/01]

19.27.58.7 DEFINITIONS:

[RESERVED]

[Recompiled 12/31/01]

19.27.58.8 THE UNDERGROUND WATER BASIN IN ROOSEVELT COUNTY, NEW MEXICO:

A. The following described lands be, and the same hereby are, excluded from the underground water basin in Roosevelt County, New Mexico, previously declared by order of the state engineer on July 18, 1955:

TOWNSHIP	RANGE	SECTION
1 N.	30 E.	19 thru 23, incl.
1 N.	30 E.	26 thru 36, incl.
1 N.	31 E.	31 and 32
1 S.	30 E.	All
1 S.	31 E.	4 thru 11, incl.
1 S.	31 E.	13 thru 36, incl.
1 S.	32 E.	19 thru 21, incl.
1 S.	32 E.	27 thru 34, incl.
2 S.	31 E.	All
2 S.	32 E.	3 thru 9, incl.

2 S.	32 E.	16 thru 20, incl.
2 S.	32 E.	29 thru 32, incl.
3 S.	31 E.	1 thru 12, incl.
3 S.	32 E.	1 thru 12, incl.
3 S.	33 E.	1 thru 12, incl.

B. The area in Roosevelt and Curry counties, more fully described as follows, overlies waters of an underground reservoir, lake or basin having reasonably ascertainable boundaries, the waters of which are public waters and are subject to appropriation for beneficial use in accordance with the statutes and the rules and regulations formulated by the State Engineer:

TOWNSHIP	RANGE	SECTION
1 N.	30 E.	1 thru 18, incl.
1 N.	30 E.	24 and 25
1 N.	31 E.	1 thru 30, incl.
1 N.	31 E.	33 thru 36, incl.
1 N.	32 E.	All
1 N.	33 E.	All
1 N.	34 E.	19 thru 36, incl.
1 N.	35 E.	19 thru 36, incl.
1 N.	36 E.	19 thru 36, incl.
1 N.	37 E.	19 thru 22, incl.
1 N.	37 E.	27 thru 34, incl.
1 S.	31 E.	1 thru 3, incl.
1 S.	31 E.	12
1 S.	32 E.	1 thru 18, incl.

1 S.	32 E.	22 thru 26, incl.
1 S.	32 E.	35 and 36
1 S.	33 E.	All
1 S.	34 E.	All
1 S.	35 E.	All
1 S.	36 E.	All
1 S.	37 E.	3 thru 10, incl.
1 S.	37 E.	15 thru 22, incl.
1 S.	37 E.	27 thru 34, incl.
2 S.	32 E.	1 and 2
2 S.	32 E.	10 thru 15, incl.
2 S.	32 E.	21 thru 28, incl.

19.27.60.8 LAS ANIMAS CREEK BASIN:

A. The lands declared within the Las Animas Creek Basin on August 9, 1968, are as follows:

TOWNSHIP	RANGE	SECTIONS
14 S.	7 W.	S 1/2 31, S 1/2 32, S 1/2 33, SW 1/4 and E 1/2 34, 35, W 1/2 and SE 1/4 36
14 S.	8 W.	26 thru 29, 32 thru 36
15 S.	5 W.	S 1/2 19, S 1/2 26, 27 thru 29, N 1/2 30, N 1/2 34, N 1/2 35, N 1/2 36 west of Caballo Reservoir boundary established

at the contour of 4204 feet above
mean sea level

15 S.	6 W.	W 1/2 and SE 1/4 6, 7, 8, S 1/2 9, W 1/2 and SE 1/4 14, 15, 16, N 1/2 17, 18, N 1/2 22, NW 1/4 and E 1/2 23, 24, NE 1/4 25
15 S.	7 W.	1 thru 24, N 1/2 29, N 1/2 30
15 S.	8 W.	1 thru 5, 8 thru 17, N 1/2 20, N 1/2 21, NW 1/4 and E 1/2 22, 23, 24

B. The lands included by the extension of September 17, 1982, are as follows: Beginning at the east quarter corner of Section 19, T-15-S, R-8-W, N.M.P.M., a point on the existing boundary of the Las Animas Creek Underground Water Basin; thence south along section line to its intersection with the southern surface drainage boundary of Las Animas Creek; thence northwesterly along said surface drainage boundary, passing through Bald Hill in projected * Section 13, T-15-S, R-9-W, westerly through Granite Peak and southerly to Hillsboro Peak on the surface drainage boundary between the Rio Grande and the Mimbres River, a point on the Grant-Sierra county line and the existing boundary of the Mimbres Underground Water Basin; thence northwesterly along the existing boundary of the Mimbres Underground Water Basin to its intersection with the northern surface drainage boundary of Las Animas Creek in projected *Section 24, T-14-S, R-10-W, near Mimbres Lake; thence easterly along the northern surface drainage boundary of Las Animas Creek, passing through Victoria Park Mountain, to its intersection with the north line of Section 30, T-14-S, R-8-W; thence east along section line to the northeast corner of said Section 30, a point on the existing boundary of the Las Animas Creek Underground Water Basin; thence south along the existing boundary of the Las Animas Creek Underground Water Basin to the point of beginning. *Projected sections are based on meridian and parallel projections of surveyed townships.

[SE 66-1, Article 7-24; Recompiled 12/31/01]

PART 61: SALT UNDERGROUND WATER BASIN

19.27.61.1 ISSUING AGENCY:

Office of the New Mexico State Engineer, P.O. Box 25102, Santa Fe, New Mexico 87504-5102, (505) 827-6091.

[19.27.61.1 NMAC – N, 9-13-00]

19.27.61.2 SCOPE:

Anyone proposing to drill a well and/or appropriate ground water in the area DEFINED AS the Salt Underground Water Basin.

[19.27.61.2 NMAC – N, 9-13-00]

19.27.61.3 STATUTORY AUTHORITY:

N.M.S.A. 72-1-1, 72-2-1, 72-2-8, 72-2-9, 72-12-1 and 72-12-3 through 72-12-28 (1997).

[19.27.61.3 NMAC – N, 9-13-00]

19.27.61.4 DURATION:

Permanent

[19.27.61.4 NMAC –N, 9-13-00]

19.27.61.5 EFFECTIVE DATE:

September 13, 2000

[19.27.61.5 NMAC – N, 9-13-00]

19.27.61.6 OBJECTIVE:

The objective of this Special Order No. 156 is to take administrative control of the underground waters within a specific area of the state, to provide for the orderly development of water rights and to protect existing water rights. The waters of the underground streams, channels, artesian basins, reservoirs or lakes having reasonable ascertainable boundaries, are public waters and are subject to appropriation for beneficial use. The Salt Basin is currently not part of a declared underground water basin.

THEREFORE, the area in Otero and Chaves counties comprising approximately 2420 square miles and more fully described hereinafter as the Salt Underground Water Basin is hereby declared , subject to New Mexico statutes and the rules and regulations of the State Engineer.

[19.27.61.6 NMAC – N, 9-13-00]

19.27.61.7 DEFINITIONS:

[RESERVED]

[19.27.61.7 NMAC – N, 9-13-00]

19.27.61.8 STATE ENGINEER SPECIAL ORDER NO. 156 – SALT UNDERGROUND WATER BASIN:

The area included within the Salt Underground Water Basin begins at the southeast corner of Section 31, Township 26 South, Range 10 East (a point where the eastern boundary of the declared Tularosa Underground Water Basin intersects the New Mexico-Texas border); thence north along section lines to the southeast corner of Section 7, Township 26 South, Range 10 East; thence east along section lines to the southeast corner of Section 10, Township 26 South, Range 10 East; thence north along section lines to the northwest corner of Section 35, Township 25 South, Range 10 East; thence east along section lines to the northeast corner of Section 36, Township 25 South, Range 10 East; thence north along the range line to the southwest corner of Section 6, Township 23 South, Range 11 East; thence east along the section line to the southeast corner of Section 6, Township 23 South, Range 11 East; thence north along section lines to the northeast corner of Section 18, Township 22 South, Range 11 East; thence west along section lines to the southwest corner of Section 12, Township 22 South, Range 10 East; thence north along section lines to the northwest corner of Section 1, Township 22 South, Range 10 East; thence east along the township line to the southeast corner of Section 31, Township 21 South, Range 11 East; thence north along the section line to the southeast corner of Section 30, Township 21 South, Range 11 East; thence east along the section line to the southeast corner of Section 29, Township 21 South, Range 11 East; thence north along the section line to the southeast corner of Section 20, Township 21 South, Range 11 East; thence east along the section line to the southeast corner of Section 21, Township 21 South, Range 11 East; thence north along section lines to the northwest corner of Section 3, Township 21 North, Range 11 East; thence east along the township line to the southeast corner of Section 35, Township 20 South, Range 11 East; thence north along the section line to the northeast corner of said Section 35; thence east along section lines to the northeast corner of Section 31, Township 20 South, Range 12 East; thence north along section lines to the southwest corner of Section 29, Township 19 South, Range 12 East; thence east along the section line of said Section 29 to its intersection with the drainage divide between the Tularosa Basin and the Sacramento River stream system; thence northerly along the drainage divide, passing through Sacramento Peak in Section 33, Township 17 South, Range 11 East to the intersection of the drainage boundary between a tributary of San Andres Canyon tributary of the Tularosa Basin, Water Canyon of the Penasco River of the Pecos River stream system and the Sacramento River on the east line for the northwest quarter of Section 27, Township 17 South, Range 11 East (a point where the existing Tularosa Basin intersects the existing Penasco Basin); thence south along the quarter section line to the center of

Section 27, Township 17 South, Range 11 East; thence east along the quarter section line to the west quarter corner of Section 26, Township 17 South, Range 11 East; thence south along the section line to the northwest corner of Section 35, Township 17 South, Range 11 East; thence east along the section line to the north quarter corner of said Section 35; thence south along the quarter section line to the center of said Section 35; thence east along the quarter section line to the west quarter corner of Section 36, Township 17 South, Range 11 East; thence south along the section line to the southwest corner of Section 36, Township 17 South, Range 11 East; thence east along the section line to the north quarter corner of Section 1, Township 18 South, Range 11 East; thence south along the quarter section line to the center of said Section 1; thence east along the quarter section line to the range line between Range 11 East and Range 12 East; thence south along the range line to the southwest corner of Section 6, Township 18 South, Range 12 East; thence east along section lines to the southwest corner of Section 4, Township 18 South, Range 12 East; thence south along section lines to the southwest corner of Section 16, Township 18 South, Range 12 East; thence east along the section line to the quarter corner of Section 21, Township 18 South, Range 12 East; thence south along the quarter section line to the center of said Section 21; thence east along the quarter section line to the west section line of Section 22, Township 18 South, Range 12 East; thence south along section lines to the northeast corner of Section 33, Township 18 South, Range 12 East; thence east along the section line to the northeast corner of Section 34, Township 18 South, Range 12 East; thence south along the section line to the west quarter corner of Section 35, Township 18 South, Range 12 East; thence east along the quarter section line to the east quarter corner of said Section 35; thence north along the section line to the northwest corner of Section 36, Township 18 South, Range 12 East; thence east along the section line to the northeast corner of Section 36, Township 18 South, Range 12 East; thence south along the range line to the southwest corner of Section 31, Township 18 South, Range 13 East; thence east along the township line to the northwest corner of Section 5, Township 19 South, Range 13 East; thence south along section lines to the northwest corner of Section 17, Township 19 South, Range 13 East; thence east along the section line to the quarter corner of said Section 17; thence south along the quarter section line to the center of said Section 17; thence east along the quarter section line to the east quarter corner of said Section 16, Township 19 South, Range 13 East; thence north along the section line to the northeast corner of said Section 16; thence east along the section line to the south quarter corner of Section 10, Township 19 South, Range 13 East; thence north along the quarter section line to the north quarter corner of said Section 10; thence east along the section line to the southwest corner of Section 2, Township 19 South, Range 13 East; thence north along the section line to the west quarter corner of said Section 2; thence east along quarter section lines to the center of Section 1, Township 19 South, Range 13 East; thence north along the quarter section line to the north quarter corner of said Section 1; thence east along the township line to the southeast corner of Section 31, Township 18 South, Range 14 East; thence north along the section line to the west quarter corner of Section 32, Township 18 South, Range 14 East; thence east along the quarter section line to the east quarter corner of said Section 32; thence north along the section line to the northwest corner of Section 33, Township 18 South, Range 14 East; thence east along the section line to the northeast corner of said Section 33; thence south to the west quarter corner of Section

34, Township 18 South, Range 14 East; thence east along the quarter section line to the east quarter corner to said Section 34; thence south along the section line to the southwest corner of Section 35, Township 18 South, Range 14 East; thence east along the township line to the southeast corner of Section 31, Township 18 South, Range 16 East (a point where the existing Penasco Basin and the existing Roswell Basin intersect); thence south along the section line to the southwest corner of Section 5, Township 19 South, Range 16 East; thence east along the section line to the northeast corner of Section 8, Township 19 South, Range 16 East; thence south along the section line to the northeast corner of Section 17, Township 19 South, Range 16 East; thence east along the section line to the northeast corner of Section 16, Township 19 South, Range 16 East; thence south along the section line to the southeast corner of said Section 16; thence east along section lines to the southwest corner of Section 13, Township 19 South, Range 17 East; thence south along the section line to the southwest corner of Section 24, Township 19 South, Range 17 East; thence east along section lines to the southeast corner of Section 19, Township 19 South, Range 18 East; thence south along section lines to the southwest corner of Section 20, Township 21 South, Range 18 East; thence east along the section line to the southwest corner of Section 21, Township 21 South, Range 18 East; thence south along the section line to the southwest corner of Section 28, Township 21 South, Range 18 East; thence east along the section line to the southwest corner of Section 27, Township 21 South, Range 18 East; thence south along the section line to the southwest corner of Section 34, Township 21 South, Range 18 East; thence east along the township line to the northwest corner of Section 6, Township 22 South, Range 19 East; thence south along the range line to the southwest corner of said Section 6; thence east along the section line to the southeast corner of said Section 6; thence south along section lines to the northeast corner of Section 19, Township 22 South, Range 19 East; thence east along the section line to the northeast corner of Section 20, Township 22 South, Range 19 East; thence south along the section line to the northeast corner of Section 29, Township 22 South, Range 19 East; thence east along the section line to the northeast corner of Section 28, Township 22 South, Range 19 East; thence south along the section line to the northeast corner of Section 33, Township 22 South, Range 19 East; thence east along the section line to the northeast corner of Section 34, Township 22 South, Range 19 East; thence south along section lines to the southwest corner of Section 2, Township 23 South, Range 19 East; thence east along the section line to the southwest corner of Section 1, Township 23 South, Range 19 East; thence south along the section line to the southwest corner of Section 12, Township 23 South, Range 19 East; thence east along the section line to the range line between Ranges 19 East and 20 East; thence south along the range line to the southwest corner of Section 18, Township 23 South, Range 20 East; thence east along the section line to the southeast corner of said Section 18; thence south along the section line to the southwest corner of Section 20, Township 23 South, Range 20 East; thence east along the section line to the northwest corner of Section 28, Township 23 South, Range 20 East; thence south along the section line to the southwest corner of said Section 28; thence east along the section line to the northeast corner of Section 33, Township 23 South, Range 20 East; thence south along the section line to the southeast corner of said Section 33; thence east along the township line to the northeast corner of Section 3, Township 24 South, Range 20 East; thence south along section lines to the northeast corner of Section

15, Township 24 South, Range 20 East; thence east along the section line to the northeast corner of Section 14, Township 24 South, Range 20 East; thence south along section lines to the southwest corner of Section 36, Township 24 South, Range 20 East; thence east along the township line to the northwest corner of Section 6, Township 25 South, Range 21 East; thence south along the range line to the southwest corner of said Section 6; thence east along section lines to the southeast corner of Section 5, Township 25 South, Range 21 East; thence south along section lines to the southeast corner of Section 32, Township 25 South, Range 21 East (a point where the existing Roswell Basin and the existing Carlsbad Basin intersect); thence south along section lines to the southeast corner of Section 32, Township 26 South, Range 21 East (a point where the existing Carlsbad Basin intersects the border between New Mexico and Texas); thence west along the New Mexico-Texas border to the southeast corner of Section 31, Township 26 South, Range 10 East (the point of beginning where the existing Tularosa Basin intersects the border between New Mexico and Texas).

[19.27.61.8 – N, 9-13-00]

PART 62: PLAYAS WATER BASIN

19.27.62.1 ISSUING AGENCY:

Office of State Engineer.

[Recompiled 12/31/01]

19.27.62.2 SCOPE:

[RESERVED]

[Recompiled 12/31/01]

19.27.62.3 STATUTORY AUTHORITY:

Adopted pursuant to the authority of Sections 72-2-8, 72-2-12 and 72-13-4, New Mexico Statutes Annotated, 1978.

[Recompiled 12/31/01]

19.27.62.4 DURATION:

[Permanent]

[Recompiled 12/31/01]

19.27.62.5 EFFECTIVE DATE:

November 1, 1966

[Recompiled 12/31/01]

19.27.62.6 OBJECTIVE:

This Rule is formulated for the purpose of carrying out the provisions of the statutes governing underground waters and describing the present extent of all declared underground water basins in New Mexico.

[Recompiled 12/31/01]

19.27.62.7 DEFINITIONS:

[RESERVED]

[Recompiled 12/31/01]

19.27.62.8 PLAYAS WATER BASIN:

A. The lands declared within the Playas Basin on February 23, 1956, are as follows:

TOWNSHIP	RANGE	SECTIONS
26 S.	17 W.	All
26 S.	18 W.	1 thru 3, 10 thru 15, 22 thru 27, 34 thru 36
27 S.	17 W.	All
27 S.	18 W.	1 thru 3, 10 thru 15, 22 thru 27, 34 thru 36
28 S.	17 W.	All
28 S.	18 W.	1, 2, 11 thru 14, 23 thru 26, 35, 36

29 S.	16 W.	5 thru 8, 17 thru 21, 28 thru 34
29 S.	17 W.	All
29 S.	18 W.	1, 2, 11 thru 13, 24, 25, 36
30 S.	16 W.	All
30 S.	17 W.	All
31 S.	16 W.	All
31 S.	17 W.	All
32 S.	16 W.	All
32 S.	17 W.	All
33 S.	16 W.	2 thru 11, 14 thru 23, 26 thru 35
33 S.	17 W.	1 thru 28, 33 thru 36
34 S.	16 W.	5 thru 8, 17 thru 20
34 S.	17 W.	1 thru 4, 9 thru 16, 21 thru 24

[SE 66-1, Article 7-17; Recompiled 12/31/01]

PART 63: DECLARATION OF THE CLAYTON UNDERGROUND WATER BASIN AND EXTENSION OF THE CANADIAN RIVER UNDERGROUND WATER BASIN

19.27.63.1 ISSUING AGENCY:

Office of the State Engineer.

[19.27.63.1 NMAC - N/E, 9/23/2005]

19.27.63.2 SCOPE:

The appropriation and use of underground water within the Clayton underground water basin and the extended area of the Canadian river underground water basin, areas declared by the state engineer to have reasonably ascertainable boundaries.

[19.27.63.2 NMAC - N/E, 9/23/2005]

19.27.63.3 STATUTORY AUTHORITY:

Chapter 72, Article 12, NMSA 1978. Section 72-1-1 NMSA 1978 provides that all natural waters flowing in streams and water courses belong to the public and are subject to appropriation for beneficial use. Section 72-2-1 NMSA 1978 gives the state engineer general supervision of waters of the state and of the measurement, appropriation and distribution thereof and such other duties as required. Section 72-2-8 NMSA 1978 gives the state engineer authority to adopt regulations and codes to implement and enforce any provision of any law administered by him and also provides the state engineer with authority to issue orders necessary to implement his decisions and to aid him in the accomplishment of his duties. Section 72-2-9 NMSA 1978 gives the state engineer authority over and supervision of the apportionment of water in this state according to the licenses issued by him and his predecessors and the adjudications of the courts.

[19.27.63.3 NMAC - N/E, 9/23/2005]

19.27.63.4 DURATION:

Permanent.

[19.27.63.4 NMAC - N/E, 9/23/2005]

19.27.63.5 EFFECTIVE DATE:

September 23, 2005, unless a later date is cited at the end of a section.

[19.27.63.5 NMAC - N/E, 9/23/2005]

19.27.63.6 OBJECTIVE:

To establish administrative control over the appropriation and use of underground water within the Clayton underground water basin and the extended area of the Canadian river underground water basin, areas declared by the state engineer to have reasonably ascertainable boundaries.

[19.27.63.6 NMAC - N/E, 9/23/2005]

19.27.63.7 DEFINITIONS:

[RESERVED]

19.27.63.8 BOUNDARY DESCRIPTION OF THE CLAYTON UNDERGROUND WATER BASIN:

Beginning at the point where the eastern topographic drainage boundary of the Canadian river basin intersects the New Mexico and Colorado state line, being a point on the north line of section 21, township 32 north, range 25 east, NMPM, near state line mile corner 68; thence southerly along the east topographic drainage boundary of the Canadian river to the point common to the Carrizozo creek drainage boundary and the Ute creek drainage boundary near the northeast corner of section 16, township 27 north, range 26 east, NMPM; thence south along section line to the southeast corner of said section 16; thence easterly along the drainage boundary between Carrizozo creek and Palo Blanco creek to the southeast corner of section 14, township 27 north, range 26 east, NMPM; thence north along section line to the northeast corner of said section 14; thence east to the northeast corner of section 16, township 27 north, range 27 east, NMPM; thence south to the southeast corner of said section 16; thence east to the southeast corner of section 14, township 27 north, range 27 east, NMPM; thence south to the southeast corner of section 23, township 27 north, range 27 east, NMPM; thence east to the northeast corner of section 28, township 27 north, range 28 east, NMPM; thence south along section line west of Lonesome mountain to the southeast corner of said section 28; thence east to the northeast corner of section 36, township 27 north, range 28 east, NMPM; thence south to the southeast corner of said section 36; thence east to the northeast corner of section 6, township 26 north, range 29 east, NMPM; thence south to the southeast corner of section 7, township 26 north, range 29 east, NMPM; thence west to the southwest corner of said section 7; thence south along township line to the southwest corner of section 18, township 25 north, range 29 east, NMPM; thence east to the northwest corner of section 21, township 25 north, range 29 east, NMPM; thence south through the Don Carlos hills to the southwest corner of said section 21; thence east to the northwest corner of section 26, township 25 north, range 29 east, NMPM; thence south to the southwest corner of said section 26; thence east to the southeast corner of said section 26; thence south to northwest corner of section 13, township 24 north, range 29 east, NMPM; thence east to the northeast corner of said section 13; thence south along range line to the northwest corner of section 31, township 24 north, range 30 east, NMPM; thence east to the northeast corner of said section 31; thence south to the southeast corner of said section 31; thence east to the northeast corner of section 5, township 23 north, range 30 east, NMPM; thence south to the northwest corner of section 4, township 22 north, range 30 east, NMPM; thence east to the northeast corner of said section 4; thence south to the northwest corner of section 15, township 22 north, range 30 east, NMPM; thence east to the northwest corner of section 13, township 22 north, range 30 east, NMPM; thence south to the southwest corner of said section 13; thence east to the southeast corner of said section 13; thence

in a southeasterly direction diagonally across sections 19, 29, and 33 township 22 north, range 31 east to the Union and Harding county line being the line between townships 21 north and 22 north, at the northwest corner of section 3, township 21 north, range 31 east, NMPM; thence east along said county line to the northeast corner of section 2, township 21 north, range 31 east, NMPM; thence south to the southeast corner of said section 2; thence east to the northwest corner of section 12, township 21 north, range 32 east, NMPM; thence south to the northwest corner of section 24, township 21 north, range 32 east, NMPM; thence east to the northeast corner of said section 24; thence south to the northwest corner of section 31, township 21 north, range 33 east, NMPM; thence east to the northeast corner of said section 31; thence south to the southeast corner of said section 31; thence east along township line to the northwest corner of section 4, township 20 north, range 33 east, NMPM; thence in a southeasterly direction diagonally across sections 4, 10, 14 and 24, township 20 north, range 33 east to the northwest corner of section 30, township 20 north, range 33 east, NMPM; thence south along Harding and Union county line, being the line between ranges 33 east and 34 east, to the northwest corner of section 18, township 19 north, range 34 east, NMPM; thence east to the northeast corner of said section 18; thence south to the northeast corner of section 18, township 18 north, range 34 east, NMPM; thence west to the northwest corner of said section 18; thence south along Harding and Union county line and Harding and Quay county line to the southwest corner of section 6, township 17 north, range 34 east, NMPM; thence east to the northwest corner of section 10, township 17 north, range 34 east, NMPM; thence in a southeasterly direction diagonally across sections 10 and 14, township 17 north, range 34 east, NMPM, to the northwest corner of section 24, township 17 north, range 34 east, NMPM; thence east to the northeast corner of section 19, township 17 north, range 35 east, NMPM; thence to the southeast corner of said section 19; thence east to the northwest corner of section 26, township 17 north, range 35 east, NMPM; thence south to the southwest corner of said section 26; thence east to the southeast corner of said section 26 near Kerlin hill; thence south to the southwest corner of section 36, township 17 north, range 35 east, NMPM; thence east along township line to the northwest corner of section 6, township 16 north, range 36 east, NMPM; thence south to the northwest corner of section 7, township 16 north, range 36 east, NMPM; thence east to the northeast corner of said section 7; thence south to the northwest corner of section 29, township 16 north, range 36 east, NMPM; thence east to the northeast corner of said section 29; thence south to the northwest corner of section 4, township 15 north, range 36 east, NMPM; thence east to the northeast corner of said section 4; thence south to the northwest corner of section 15, township 15 north, range 36 east, NMPM; thence in a southeasterly direction diagonally across sections 15 and 23 in township 15 north, range 36 east, NMPM, to the northwest corner of section 25, township 15 north, range 36 east, NMPM; thence south to the northwest corner of section 1, township 14 north, range 36 east, NMPM; thence in a southeasterly direction diagonally across section 1, township 14 north, range 36 east, NMPM, and section 7, township 14 north, range 37 east, NMPM, straight through the northwest corner of section 17, township 14 north, range 37 east, NMPM, to a point on the New Mexico and Texas state line; thence north along said state line to the northeast corner of the state of New Mexico; thence west along the New Mexico and Colorado state line to the eastern topographic drainage boundary of the Canadian river basin

near state line mile corner 68, being a point on the north line of section 21, township 32 north, range 25 east, NMPM, being the point of origin.

[19.27.63.8 NMAC - N/E, 9/23/2005]

19.27.63.9 BOUNDARY DESCRIPTION OF THE EXTENDED AREA OF THE CANADIAN RIVER UNDERGROUND WATER BASIN:

Beginning at the southeast corner of section 3, township 8 north, range 24 east, a point on the existing boundary of the Fort Sumner underground water basin; thence west along section lines to the southwest corner of section 5, township 8 north, range 24 east, NMPM, a point on the existing boundary of the Fort Sumner underground water basin; thence north along section line to the northwest corner of said section 5, a point on the existing boundary of the Fort Sumner underground water basin; thence east along section line to the southwest corner of section 32, township 9 north, range 24 east, NMPM, a point on the existing boundary of the Fort Sumner underground water basin; thence north along section line to the northwest corner of said section 32, a point on the existing boundary of the Fort Sumner underground water basin; thence west along section line to the southwest corner of section 30, township 9 north, range 24 east, NMPM, a point on the existing boundary of the Fort Sumner underground water basin; thence north along range line to the northwest corner of section 19, township 9 north, range 24 east, NMPM, a point on the existing boundary of the Fort Sumner underground water basin; thence west along section line to the southwest corner of section 13, township 9 north, range 23 east, NMPM, a point on the existing boundary of the Fort Sumner underground water basin; thence north along section lines to the northwest corner of projected section 1, township 9 north, range 23 east, NMPM, a point on the existing boundary of the Fort Sumner underground water basin; thence west along projected section lines to the southwest corner of projected section 31, township 10 north, range 23 east, NMPM, a point on the existing boundary of the Fort Sumner underground water basin; thence north along projected range line to the southwest corner of projected section 18, township 10 north, range 23 east, NMPM, a point on the existing boundary of the Fort Sumner underground water basin; thence west along projected section lines to the intersection with longitude 104°35' west, a point on the existing boundary of the Fort Sumner and upper Pecos underground water basins; thence north along longitude 104°35' west to the intersection with the Guadalupe - San Miguel county line, a point on the existing boundary of the upper Pecos underground water basin; thence west along the Guadalupe-San Miguel county line to the intersection with longitude 104°50' west, a point on the existing boundary of the upper Pecos underground water basin; thence north along longitude 104°50' west to the intersection with latitude 35°20' north, a point on the existing boundary of the upper Pecos underground water basin; thence west along latitude 35°20' north to the intersection with longitude 104°53' west, a point on the existing boundary of the upper Pecos underground water basin; thence north along longitude 104°53' west to the intersection with the northern boundary of the Antonio Ortiz grant, a point on the existing boundary of the upper Pecos underground water basin; thence west along the northern boundary of the Antonio Ortiz grant to the intersection with longitude 105°00' west, a

point on the existing boundary of the upper Pecos underground water basin; thence north along longitude 105°00' west to the intersection with latitude 35°40' north, a point on the existing boundary of the upper Pecos and Canadian river underground water basins, thence east along latitude 35°40' north to the intersection with the Mora grant boundary, a point on the existing boundary of the Canadian river underground water basin; thence south along the Mora grant Boundary to the northwest corner of section 5, township 16 north, range 21 east, NMPM, a point on the existing boundary of the Canadian river underground water basin; thence east along township lines to the southwest corner of section 34, township 17 north, range 22 east, NMPM, a point on the existing boundary of the Canadian river underground water basin; thence north along section line to the northwest corner of said section 34, a point on the existing boundary of the Canadian river underground water basin; thence east along section line to the northeast corner of said section 34, a point on the existing boundary of the Canadian river underground water basin; thence north along section line to the northwest corner of section 26, township 17 north, range 22 east, NMPM, a point on the existing boundary of the Canadian river underground water basin; thence east along section lines to the northeast corner of section 25, township 17 north, range 22 east, NMPM, a point on the existing boundary of the Canadian river underground water basin; thence north along range line to the northwest corner of section 19, township 17 north, range 23 east, NMPM, a point on the existing boundary of the Canadian river underground water basin; thence east along section lines to the northeast corner of section 21, township 17 north, range 23 east, NMPM, a point on the existing boundary of the Canadian river underground water basin; thence north along section lines to the northwest corner of section 10, township 17 north, range 23 east, NMPM, a point on the existing boundary of the Canadian river underground water basin; thence east along section lines to the northeast corner of section 12, township 17 north, range 25 east, NMPM, a point on the existing boundary of the Canadian river underground water basin; thence north along range line to the northwest corner of section 31, township 18 north, range 26 east, NMPM, a point on the existing boundary of the Canadian river underground water basin; thence east along section lines to the northeast corner of section 32, township 18 north, range 26 east, NMPM; thence south along section lines to the northeast corner of section 8, township 17 north, range 26 east, NMPM; thence east along section lines to the intersection with longitude 104°09'45" west, a point on the north boundary of section 10, township 17 north, range 26 east, NMPM; thence south along longitude 104°09'45" west to the intersection with latitude 35°28'45" north, a point in the Pablo Montoya grant; thence west along latitude 35°28'45" north to the intersection with longitude 104°10'30" west, a point in the Pablo Montoya grant; thence south along longitude 104°10'30" west to the intersection with latitude 35°21'30" north, a point in the Pablo Montoya grant; thence west along latitude 35°21'30" north to the intersection with longitude 104°12'30" west, a point in the Pablo Montoya grant; thence south along longitude 104°12'30" west to the intersection with the north boundary of section 29, township 12 north, range 26 east, NMPM; thence east along section line to the northeast corner of said section 29; thence south along section lines to the southeast corner of section 17, township 11 north, range 26 east, NMPM; thence west along section line to the southeast corner of section 18, township 11 north, range 26 east, NMPM; thence south along section line to the southeast corner of section 19,

township 11 north, range 26 east, NMPM; thence west along section line to the southeast corner of section 23, township 11 north, range 25 east, NMPM; thence south along section line to the southeast corner of section 26, township 11 north, range 25 east, NMPM; thence west along section line to the southeast corner of section 27, township 11 north, range 25 east, NMPM; , thence south along section line to the southeast corner of section 34, township 11 north, range 25 east, NMPM; thence west along township line to the southeast corner of section 33, township 11 north, range 25 east, NMPM; thence south along section line to the southeast corner of section 4, township 10 north, range 25 east, NMPM; thence west along section line to the southeast corner of section 5, township 10 north, range 25 east, NMPM; thence south along section line to the southeast corner of section 8, township 10 north, range.25 east, NMPM; thence west along section lines to the southeast corner of section 12, township 10 north, range 24 east, NMPM; thence south along range line to the southeast corner of section 24, township 10 north, range 24 east, NMPM; thence west along section line to the southeast corner of section 23, township 10 north, range 24 east, NMPM; thence south along section lines to the southeast corner of section 35, township 10 north, range 24 east, NMPM; thence west along township line to the southeast corner of section 34, township 10 north, range 24 east, NMPM; thence south along section line to the southeast corner of section 3, township 9 north, range 24 east, NMPM; thence west along section line to the southeast corner of section 4, township 9 north, range 24 east, NMPM; thence south along section lines to the southeast corner of section 21, township 9 north, range 24 east, NMPM; thence east along section line to the northeast corner of section 27, township 9 north, range 24 east, NMPM; thence south along section lines to the southeast corner of section 34, township 9 north, range 24 east, NMPM, a point on the existing boundary of the Fort Sumner underground water basin; thence west along township line to the northeast corner of section 3, township 8 north, range 24 east, NMPM, a point on the existing boundary of the Fort Sumner underground water basin; thence south along section line to the southeast corner of said section 3, a point on the existing boundary of the Fort Sumner underground water basin, being the point of origin.

[19.27.63.9 NMAC - N/E, 9/23/2005]

PART 64: EXTENSION OF THE TULAROSA UNDERGROUND WATER BASIN

19.27.64.1 ISSUING AGENCY:

Office of the State Engineer.

[19.27.64.1 NMAC - N/E, 9/23/2005]

19.27.64.2 SCOPE:

The appropriation and use of underground water within the extended area of the Tularosa underground water basin, an area declared by the state engineer to have reasonably ascertainable boundaries.

[19.27.64.2 NMAC - N/E, 9/23/2005]

19.27.64.3 STATUTORY AUTHORITY:

Chapter 72, Article 12, NMSA 1978. Section 72-1-1 NMSA 1978 provides that all natural waters flowing in streams and water courses belong to the public and are subject to appropriation for beneficial use. Section 72-2-1 NMSA 1978 gives the state engineer general supervision of waters of the state and of the measurement, appropriation and distribution thereof and such other duties as required. Section 72-2-8 NMSA 1978 gives the state engineer authority to adopt regulations and codes to implement and enforce any provision of any law administered by him and also provides the state engineer with authority to issue orders necessary to implement his decisions and to aid him in the accomplishment of his duties. Section 72-2-9 NMSA 1978 gives the state engineer authority over and supervision of the apportionment of water in this state according to the licenses issued by him and his predecessors and the adjudications of the courts.

[19.27.64.3 NMAC - N/E, 9/23/2005]

19.27.64.4 DURATION:

Permanent.

[19.27.64.4 NMAC - N/E, 9/23/2005]

19.27.64.5 EFFECTIVE DATE:

September 23, 2005, unless a later date is cited at the end of a section.

[19.27.64.5 NMAC - N/E, 9/23/2005]

19.27.64.6 OBJECTIVE:

To establish administrative control over the appropriation and use of underground water within the extended area of the Tularosa underground water basin, an area declared by the state engineer to have reasonably ascertainable boundaries.

[19.27.64.6 NMAC - N/E, 9/23/2005]

19.27.64.7 DEFINITIONS:

[RESERVED]

19.27.64.8 BOUNDARY DESCRIPTION OF THE EXTENDED AREA OF THE TULAROSA UNDERGROUND WATER BASIN:

Beginning at the southeast corner of section 9, township 3 south, range 9 east, NMPM; thence west along section lines to the southeast corner of section 7, township 3 south, range 8 east, NMPM; thence north along range lines to the northwest corner of section 19, township 2 south, range 8 east, NMPM; thence west along section line to the southwest corner of section 13, township 2 south, range 7 east, NMPM; thence north along section line to the northwest corner of section 1, township 1 south, range 7 east, NMPM; thence east along section line to the southwest corner of section 36, township 1 north, range 7 east, NMPM; thence north along section lines to the northwest corner of section 24, township 1 north, range 7 east, NMPM; thence west along section lines to the southwest corner of section 15, township 1 north, range 7 east, NMPM; thence north along section lines to the northwest corner of section 10, township 1 north, range 7 east, NMPM; thence west along section line to the southwest corner of section 4, township 1 north, range 7 east, NMPM; thence north along section lines to the northwest corner of section 33, township 2 north, range 7 east, NMPM; thence west along section lines to the southwest corner of section 30, township 2 north, range 7 east, NMPM; thence north along range line to the northwest corner of section 6, township 2 north, range 7 east, NMPM; thence east along township line to the northeast corner of section 5, township 2 north, range 7 east, NMPM; thence north along section lines to the northwest corner of section 4, township 3 north, range 7 east, NMPM; thence east along township lines to the northeast corner of section 1, township 3 north, range 8 east, NMPM; thence south along range line to the southeast corner of section 12, township 3 north, range 8 east, NMPM; thence east along section lines to the northeast corner of section 14, township 3 north, range 9 east, NMPM; thence south along section line to the southeast corner of section 14, township 3 north, range 9 east, NMPM; thence east along section line to the northeast corner of section 24 township 3 north, range 9 east, NMPM; thence south along range line to the southeast corner of section 36, township 3 north, range 9 east, NMPM; thence east along township line to the northeast corner of section 5, township 2 north, range 10 east, NMPM; thence south along section lines to the southeast corner of section 8, township 2 north, range 10 east, NMPM; thence east along section lines to the northeast corner of section 14, township 2 north, range 10 east, NMPM; thence south along section lines to the southeast corner of section 23, township 2 north, range 10 east, NMPM; thence east along section lines to the northeast corner of section 30, township 2 north, range 11 east, NMPM; thence south along section lines to the southeast corner of section 31, township 2 north, range 11 east, NMPM; thence east along township line to the northeast corner of section 5, township 1 north, range 11 east, NMPM; thence south along section line to the southeast corner of section 5, township 1 north, range 11 east, NMPM; thence east along section line approximately 0.5 mile to a point in the middle of the northern boundary line of section 9, township 1 north, range 11 east, NMPM; thence due south approximately one mile to a point in the middle of the southern boundary line of section 9, township 1 north, range 11 east, NMPM; thence east along section line to the northeast corner of section 16, township 1 north, range 11 east, NMPM; thence south along section lines to the southeast corner of section 9, township 1 south, range 11 east, NMPM; thence east along section line to the

northeast corner of section 15, township 1 south, range 11 east, NMPM; thence south along section lines to the southeast corner of section 22, township 1 south, range 11 east, NMPM; thence west along section lines to the southwest corner of section 20, township 1 south, range 11 east, NMPM; thence south along section line to the southeast corner of section 30, township 1 south, range 11 east, NMPM; thence west along section lines to the southwest corner of section 25, township 1 south, range 10 east, NMPM; thence south along section line to the southeast corner of 35, township 1 south, range 10 east, NMPM; thence west along township line to the southwest corner of section 34, township 1 south, range 10 east, NMPM; thence south along section line to the southeast corner of section 4, township 2 south, range 10 east, NMPM; thence west along section lines to the southwest corner of section 5, township 2 south, range 10 east, NMPM; thence south along section line to the southeast corner of section 7, township 2 south, range 10 east, NMPM; thence west along section line to the southwest corner of section 7, township 2 south, range 10 east, NMPM; thence south along section line to the southeast corner of section 13, township 2 south, range 9 east, NMPM; thence west along section line to the southwest corner of section 13, township 2 south, range 9 east, NMPM; thence south along section lines to the southeast corner of section 26, township 2 south, range 9 east, NMPM; thence west along section line to the southwest corner of section 26, township 2 south, range 9 east, NMPM; thence south along section lines to the southeast corner of section 3, township 3 south, range 9 east, NMPM; thence west along section line to the southwest corner of section 3, township 3 south, range 9 east, NMPM; thence south along section line to the southeast corner of section 9, township 3 south, range 9 east, NMPM; being the point of origin.

PART 65: DECLARATION OF THE MOUNT RILEY, HATCHITA, CLOVERDALE, AND YAQUI UNDERGROUND WATER BASINS

19.27.65.1 ISSUING AGENCY:

Office of the State Engineer.

[19.27.65.1 NMAC - N/E, 9/23/2005]

19.27.65.2 SCOPE:

The appropriation and use of underground water within the Mount Riley underground water basin, the Hatchita underground water basin, the Cloverdale underground water basin, and the Yaqui underground water basin, areas declared by the state engineer to have reasonably ascertainable boundaries.

[19.27.65.2 NMAC - N/E, 9/23/2005]

19.27.65.3 STATUTORY AUTHORITY:

Chapter 72, Article 12, NMSA 1978. Section 72-1-1 NMSA 1978 provides that all natural waters flowing in streams and water courses belong to the public and are subject to appropriation for beneficial use. Section 72-2-1 NMSA 1978 gives the state engineer general supervision of waters of the state and of the measurement, appropriation and distribution thereof and such other duties as required. Section 72-2-8 NMSA 1978 gives the state engineer authority to adopt regulations and codes to implement and enforce any provision of any law administered by him and also provides the state engineer with authority to issue orders necessary to implement his decisions and to aid him in the accomplishment of his duties. Section 72-2-9 NMSA 1978 gives the state engineer authority over and supervision of the apportionment of water in this state according to the licenses issued by him and his predecessors and the adjudications of the courts.

[19.27.65.3 NMAC - N/E, 9/23/2005]

19.27.65.4 DURATION:

Permanent.

[19.27.65.4 NMAC - N/E, 9/23/2005]

19.27.65.5 EFFECTIVE DATE:

September 23, 2005, unless a later date is cited at the end of a section.

[19.27.65.5 NMAC - N/E, 9/23/2005]

19.27.65.6 OBJECTIVE:

To establish administrative control over the appropriation and use of underground water within the Mount Riley underground water basin, the Hatchita underground water basin, the Cloverdale underground water basin, and the Yaqui underground water basin, areas declared by the state engineer to have reasonably ascertainable boundaries.

[19.27.65.6 NMAC - N/E, 9/23/2005]

19.27.65.7 DEFINITIONS:

[RESERVED]

19.27.65.8 BOUNDARY DESCRIPTION OF THE MOUNT RILEY UNDERGROUND WATER BASIN:

Beginning at the southeast corner of section 13, township 29 south, range 2 west, NMPM, a point on the border between the United States of America and Mexico; thence

west along said international border to the southwest corner of section 18, township 29 south, range 4 west, NMPM; thence north along range line to the northwest corner of section 7, township 29 south, range 4 west, NMPM; thence east along section line to the northeast corner of section 7, township 29 south, range 4 west, NMPM; thence north along section line approximately 0.5 mile to a point in the middle of the western boundary line of section 5, township 29 south, range 4 west, NMPM; thence east approximately 1.0 mile to a point in the middle of the eastern boundary line of section 5, township 29 south, range 4 west, NMPM; thence north along section line to the northeast corner of section 5, township 29 south, range 4 west, NMPM; thence east along township line to the southwest corner of section 35, township 28 south, range 4 west, NMPM; thence north along section lines to the northwest corner of section 14, township 28 south, range 4 west, NMPM; thence east along section line to the northeast corner of section 14, township 28 south, range 4 west, NMPM; thence north along section lines to the northwest corner of section 36, township 27 south, range 4 west, NMPM; thence east along section line to the northeast corner of section 36, township 27 south, range 4 west, NMPM; thence north along range line to the northwest corner of section 30, township 27 south, range 3 west, NMPM; thence east along section lines to the northeast corner of section 27, township 27 south, range 2 west, NMPM; thence south along section lines to the southeast corner of section 10, township 28 south, range 2 west, NMPM; thence east along section line to the northeast corner of section 14, township 28 south, range 2 west, NMPM; thence south along section lines to the southeast corner of section 26, township 28 south, range 2 west, NMPM; thence east along section line to the northeast corner of section 36, township 28 south, range 2 west, NMPM; thence south along range line to the southeast corner of section 13, township 29 south, range 2 west, NMPM, a point on the border between the United States of America and Mexico, being the point of origin.

[19.27.65.8 NMAC - N/E, 9/23/2005]

19.27.65.9 BOUNDARY DESCRIPTION OF THE HATCHITA UNDERGROUND WATER BASIN:

Beginning at the southeast corner of section 15, township 29 south, range 11 west, NMPM, a point on the border between the United States of America and Mexico; thence west along said international border to the southwest corner of section 18, township 29 south, range 13 west, NMPM; thence south along said international border to the southeast corner of section 24, township 34 south, range 14 west, NMPM; thence west along said international border to the southwest corner of section 21, township 34 south, range 16 west, NMPM; thence north along section lines to the northwest corner of section 4, township 34 south, range 16 west, NMPM; thence east along township line to the southwest corner of section 36, township 33 south, range 16 west, NMPM; thence north along section lines to the northwest corner of section 1, township 33 south, range 16 west, NMPM; thence east along section line to the northeast corner of section 1, township 33 south, range 16 west, NMPM; thence north along range lines to the southeast corner of section 36, township 29 south, range 16 west, NMPM; thence west along township line to the southwest corner of section 35, township 29 south, range 16

west, NMPM; thence north along section line to the northwest corner of section 35, township 29 south, range 16 west, NMPM; thence west along section line to the southwest corner of section 27, township 29 south, range 16 west, NMPM; thence north along section lines to the northwest corner of section 22, township 29 south, range 16 west, NMPM; thence west along section line to the southwest corner of section 16, township 29 south, range 16 west, NMPM; thence north along section lines to the northwest corner of section 4, township 29 south, range 16 west, NMPM; thence west along township line to the southwest corner of section 31, township 28 south, range 16 west, NMPM; thence north along range lines to the northwest corner of section 6, township 27 south, range 16 west, NMPM; thence east along township lines to the northeast corner of section 5, township 27 south, range 13 west, NMPM; thence south along section lines to the southeast corner of section 8, township 27 south, range 13 west, NMPM; thence east along section lines to the northeast corner of section 15, township 27 south, range 13 west, NMPM; thence south along section line to the southeast corner of section 15, township 27 south, range 13 west, NMPM; thence east along section lines to the northeast corner of section 24, township 27 south, range 13 west, NMPM; thence south along range line to the southeast corner of section 24, township 27 south, range 13 west, NMPM; thence east along section line to the northeast corner of section 30, township 27 south, range 12 west, NMPM; thence south along section line to the southeast corner of section 30, township 27 south, range 12 west, NMPM; thence east along section line to the northeast corner of section 32, township 27 south, range 12 west, NMPM; thence south along section line to the southeast corner of section 32, township 27 south, range 12 west, NMPM; thence east along township line to the northeast corner of section 3, township 28 south, range 12 west, NMPM; thence south along section lines to the southeast corner of section 22, township 28 south, range 12 west, NMPM; thence east along section line to the northeast corner of section 26, township 28 south, range 12 west, NMPM; thence south along section line to the southeast corner of section 26, township 28 south, range 12 west, NMPM; thence east along section lines to the northeast corner of section 31, township 28 south, range 11 west, NMPM; thence south along section line to the southeast corner of section 31, township 28 south, range 11 west, NMPM; thence east along township line to the northeast corner of section 4, township 29 south, range 11 west, NMPM; thence south along section line to the southeast corner of section 4, township 29 south, range 11 west, NMPM; thence east along section line to the northeast corner of section 10, township 29 south, range 11 west, NMPM; thence south along section line to the southeast corner of section 15, township 29 south, range 11 west, NMPM, a point on the border between the United States of America and Mexico, being the point of origin.

[19.27.65.9 NMAC - N/E, 9/23/2005]

19.27.65.10 BOUNDARY DESCRIPTION OF THE CLOVERDALE UNDERGROUND WATER BASIN:

Beginning at the southern boundary of section 22, township 34 south, range 19 west, NMPM, at the point of the intersection of the of the international border between the

United States and Mexico with the drainage divide between the Playas valley basin and the Animas river stream system; thence west along said international border approximately 13.5 miles to the intersection of the international border with the of drainage divide between the Cloverdale basin and the Yaqui river stream system; thence northerly along the drainage divide between the Cloverdale basin and the Yaqui river stream system to its intersection with the northwest corner of section 32, township 32 south, range 21 west, NMPM; thence due east to the mid-point of the northern boundary of section 32, township 32 south, range 21 west, NMPM; thence south one mile to the mid-point of the southern boundary of section 32, township 32 south, range 21 west, NMPM; thence east to the northeast corner of section 5, township 33 south, range 21 west, NMPM; thence south to the mid-point of the eastern boundary of section 5, township 33 south, range 21 west, NMPM; thence east to the mid-point of the eastern boundary of section 4, township 33 south, range 21 west, NMPM; thence south to the southeast corner of section 4, township 33 south, range 21 west, NMPM; thence east along section line to the northeast corner of section 10, township 33 south, range 21 west, NMPM; thence south along section line to the mid-point of the eastern boundary of section 10, township 33 south, range 21 west, NMPM; thence east to the mid-point of the eastern boundary of section 11, township 33 south, range 21 west, NMPM; thence north along section lines to the mid-point of the western boundary of section 36, township 32 south, range 21 west, NMPM; thence east to the mid-point of the eastern boundary of section 31, township 32 south, range 20 west, NMPM; thence south to the southeast corner of section 31, township 32 south, range 20 west, NMPM; thence east along township line to the northeast corner of section 2, township 33 south, range 20 west, NMPM; thence north along section line to the mid-point of the western boundary of section 36, township 32 south, range 20 west, NMPM; thence east to the mid-point of the eastern boundary of section 31, township 33 south, range 20 west, NMPM; thence south along section line to the southeast corner of section 31, township 32 south, range 19 west, NMPM; thence east along township line to the intersection with the drainage divide between the Playas valley basin and the Animas river stream system, thence southerly along said drainage divide to the intersection of the of the drainage divide with the international border between the United States and Mexico, being the point of origin.

[19.27.65.10 NMAC - N/E, 9/23/2005]

19.27.65.11 BOUNDARY DESCRIPTION OF THE YAQUI UNDERGROUND WATER BASIN:

Beginning at the southern boundary of section 21, township 34 south, range 21 west, NMPM, at the point of the intersection of the of the international border between the United States and Mexico with the drainage divide between the Cloverdale basin and the Yaqui river stream system; thence west along said international border approximately 3.7 miles to the intersection of the of the international border with the of state line between New Mexico and Arizona; thence north on the New Mexico - Arizona state line a distance of approximately 10.7 miles to its intersection with the northern boundary of projected section 35, township 32 south, range 22 west, NMPM; thence due east approximately 1.5 miles along projected section lines to the intersection with

the drainage divide between the Cloverdale basin and the Yaqui river stream system; thence southeasterly along said drainage divide to the intersection with the international border between the United States and Mexico, a point on the southern boundary of section 21, township 34 south, range 21 west, NMPM, being the point of origin

[19.27.65.11 NMAC - N/E, 9/23/2005]

PART 66: EXTENSION OF THE LORDSBURG, NUTT-HOCKETT, ANIMAS, AND PLAYAS UNDERGROUND WATER BASINS

19.27.66.1 ISSUING AGENCY:

Office of the State Engineer.

[19.27.66.1 NMAC - N/E, 9/23/2005]

19.27.66.2 SCOPE:

The appropriation and use of underground water within the extended areas of the Lordsburg underground water basin, the extended areas of the Nutt-Hockett underground water basin, the extended areas of the Animas underground water basin, and the extended area of the Playas underground water basin, areas declared by the state engineer to have reasonably ascertainable boundaries.

[19.27.66.2 NMAC - N/E, 9/23/2005]

19.27.66.3 STATUTORY AUTHORITY:

Chapter 72, Article 12, NMSA 1978. Section 72-1-1 NMSA 1978 provides that all natural waters flowing in streams and water courses belong to the public and are subject to appropriation for beneficial use. Section 72-2-1 NMSA 1978 gives the state engineer general supervision of waters of the state and of the measurement, appropriation and distribution thereof and such other duties as required. Section 72-2-8 NMSA 1978 gives the state engineer authority to adopt regulations and codes to implement and enforce any provision of any law administered by him and also provides the state engineer with authority to issue orders necessary to implement his decisions and to aid him in the accomplishment of his duties. Section 72-2-9 NMSA 1978 gives the state engineer authority over and supervision of the apportionment of water in this state according to the licenses issued by him and his predecessors and the adjudications of the courts.

[19.27.66.3 NMAC - N/E, 9/23/2005]

19.27.66.4 DURATION:

Permanent.

[19.27.66.4 NMAC - N/E, 9/23/2005]

19.27.66.5 EFFECTIVE DATE:

September 23, 2005, unless a later date is cited at the end of a section.

[19.27.66.5 NMAC - N/E, 9/23/2005]

19.27.66.6 OBJECTIVE:

To establish administrative control over the appropriation and use of underground water within the extended areas of the Lordsburg underground water basin, the extended areas of the Nutt-Hockett underground water basin, the extended areas of the Animas underground water basin, and the extended area of the Playas underground water basin, areas declared by the state engineer to have reasonably ascertainable boundaries.

[19.27.66.6 NMAC - N/E, 9/23/2005]

19.27.66.7 DEFINITIONS:

[RESERVED]

19.27.66.8 BOUNDARY DESCRIPTION OF THE EXTENDED AREAS OF THE LORDSBURG UNDERGROUND WATER BASIN:

The following three areas are being added to the Lordsburg underground water basin.

A. Northeastern extension: Beginning at the southeast corner of section 32, township 26 south, range 13 west, NMPM; thence west along township lines to the southwest corner of section 31, township 26 south, range 16 west, NMPM; thence north along range line to the northwest corner of section 6, township 26 south, range 16 west, NMPM; thence east along township line to the southwest corner of section 31, township 25 south, range 15 west, NMPM; thence north along range lines to the northwest corner of section 6, township 23 south, range 15 west, NMPM; thence west along township line to the southwest corner of section 31, township 22 south, range 16 west, NMPM; thence north along range line to the northwest corner of section 19, township 22 south, range 16 west, NMPM; thence west along section lines to the southwest corner of section 18, township 22 south, range 17 west, NMPM; thence north along range line to the northwest corner of section 6, township 22 south, range 17 west, NMPM; thence west along township lines to the southwest corner of section 31, township 21 south, range 19 west, NMPM; thence north along range line to the northwest corner of section 6, township 21 south, range 19 west, NMPM; thence west along township lines to the southwest corner of section 31, township 20 south, range 19 west, NMPM; thence north along range line to the northwest corner of section 19, township 20 south, range 19 west, NMPM; thence east along section line to the northeast corner of section 19,

[illegible]

along section line to the southeast corner of section 4, township 22 south, range 14 west, NMPM; thence east along section lines to the northeast corner of section 10, township 22 south, range 14 west, NMPM; thence south along section line to the southeast corner of section 10, township 22 south, range 14 west, NMPM; thence east along section lines to the northeast corner of section 14, township 22 south, range 14 west, NMPM; thence south along section line to the southeast corner of section 14, township 22 south, range 14 west, NMPM; thence east along section lines to the northeast corner of section 24, township 22 south, range 14 west, NMPM; thence south along range line to the southeast corner of section 36, township 22 south, range 14 west, NMPM; thence east along township line to the northeast corner of section 6, township 23 south, range 13 west, NMPM; thence south along section lines to the southeast corner of section 31, township 25 south, range 13 west, NMPM; thence east along township line to the northeast corner of section 6, township 26 south, range 13 west, NMPM; thence south along section line to the southeast corner of section 6, township 26 south, range 13 west, NMPM; thence east along section lines to the northeast corner of section 8, township 26 south, range 13 west, NMPM; thence south along section lines to the southeast corner of section 32, township 26 south, range 13 west, NMPM, being the point of origin.

B. Southwestern extension: Beginning at the southeast corner of section 36, township 25 south, range 17 west, NMPM; thence west along township lines to the southwest corner of section 33, township 25 south, range 18 west, NMPM; thence north along section lines to the mid-point of the western boundary of section 28, township 25 south, range 18 west, NMPM; thence due west to the center of section 29, township 25 south, range 18 west, NMPM; thence due north to the mid-point of the northern boundary of said section 29, then west along section line to the southwest corner of section 20, township 25 south, range 18 west, NMPM; thence north along section lines to the mid-point of the western boundary of section 17, township 25 south, range 18 west, NMPM; thence due west to the center of section 18, township 25 south, range 18 west, NMPM; thence due north to the mid-point of the northern boundary of said section 18, thence west along section line to the southwest corner of section 7, township 25 south, range 18 west, NMPM; thence north along range line to the northwest corner of said section 7, thence east along section line to the mid-point of the northern boundary of said section 7, thence due north to the center of section 31, township 24 south, range 18 west, NMPM; thence due east to the center of section 32, township 24 south, range 18 west, NMPM; thence due north to the mid-point of the northern boundary of said section 32, thence east along section lines to the northeast corner of section 33, township 24 south, range 18 west, NMPM; thence south along section line to the southeast corner of said section 33, thence east along township line to the northeast corner of section 1, township 25 south, range 18 west, NMPM; thence south along range line to the southeast corner of section 13, township 25 south, range 18 west, NMPM; thence east along section lines to the northeast corner of section 24, township 25 south, range 17 west, NMPM; thence south along range line to the southeast corner of section 36, township 25 south, range 17 west, NMPM, being the point of origin.

C. Western extension: Beginning at the southeast corner of section 21, township 24 south, range 18 west, NMPM; thence west along section line to the mid-point of the southern boundary of said section 21, thence due north to the center point of said section 21, thence west to the mid-point of the western boundary of said section 21, thence north along section lines to the mid-point of the western boundary of section 9, township 24 south, range 18 west, NMPM; thence due west to the center point of section 8, township 24 south, range 18 west, NMPM; thence due north to the center point of section 5, township 24 south, range 18 west, NMPM; thence due west to the mid-point of the western boundary of said section 5, thence north along section line to the northwest corner of said section 5, thence west along township lines to the southwest corner of section 36, township 23 south, range 19 west, NMPM; thence north along section line to the mid-point of the western boundary of said section 36, thence due west to the center point of section 35, township 23 south, range 19 west, NMPM; thence due north to the mid-point of the northern boundary of section 26, township 23 south, range 19 west, NMPM; thence east along section line to the northeast corner of said section 26, thence north along section line to the northwest corner of section 24, township 23 south, range 19 west, NMPM; thence east along section line to the mid-point of the northern boundary of said section 24, thence north to the mid-point of the northern boundary of section 12, township 23 south, range 19 west, NMPM; thence west along section line to the southwest corner of section 1, township 23 south, range 19 west, NMPM; thence north along section line to the northwest corner of said section 1, thence east along township line to the northeast corner of said section 1, thence south along range line to the southeast corner of said section 1, thence east along sections lines to the northeast corner of section 8, township 23 south, range 18 west, NMPM; thence south along section lines to the southeast corner of section 17, township 23 south, range 18 west, NMPM; thence east along section line to the northeast corner of section 21, township 23 south, range 18 west, NMPM; thence south along section line to the southeast corner of section 21, township 24 south, range 18 west, NMPM, being the point of origin.

[19.27.66.8 NMAC - N/E, 9/23/2005; A, 6/30/2006]

19.27.66.9 BOUNDARY DESCRIPTION OF THE EXTENDED AREAS OF THE NUTT-HOCKETT UNDERGROUND WATER BASIN:

The following two areas are being added to the Nutt-Hockett underground water basin.

A. Main extension (south, east, and west): Beginning at the southeast corner of section 35, township 22 south, range 5 west, NMPM; thence west along township lines to the southwest corner of section 36, township 22 south, range 6 west, NMPM; thence north along section lines to the northwest corner of section 12, township 22 south, range 6 west, NMPM; thence west along section line to the southwest corner of section 2, township 22 south, range 6 west, NMPM; thence north along section lines to the northwest corner of section 23, township 21 south, range 6 west, NMPM; thence west along section line to the southwest corner of section 15, township 21 south, range 6 west, NMPM; thence north along section lines to the northwest corner of section 3,

township 21 south, range 6 west, NMPM; thence east along section lines to the northeast corner of section 2, township 21 south, range 6 west, NMPM; thence south along section lines to the southeast corner of section 14, township 21 south, range 6 west, NMPM; thence east along section line to the northeast corner of section 24, township 21 south, range 6 west, NMPM; thence south along section lines to the southeast corner of section 36, township 21 south, range 6 west, NMPM; thence east along section line to the northeast corner of section 6, township 22 south, range 5 west, NMPM; thence south along section lines to the southeast corner of section 18, township 22 south, range 5 west, NMPM; thence east along section lines to the northeast corner of section 23, township 22 south, range 5 west, NMPM; thence north along section line to the northwest corner of section 13, township 22 south, range 5 west, NMPM; thence east along section line to the northeast corner of section 13, township 22 south, range 5 west, NMPM; thence north along section lines to the northwest corner of section 31, township 20 south, range 4 west, NMPM; thence east along section line to the northeast corner of section 31, township 20 south, range 4 west, NMPM; thence north along section line to the northwest corner of section 29, township 20 south, range 4 west, NMPM; thence east along section line to the northeast corner of section 29, township 20 south, range 4 west, NMPM; thence north along section lines to the northwest corner of section 21, township 20 south, range 4 west, NMPM; thence east along section line to the northeast corner of section 21, township 20 south, range 4 west, NMPM; thence north along section line to a point on the east section line of section 15, township 20 south, range 4 west, NMPM; thence south easterly along the drainage divide between the Nutt-Hockett basin and the Rio Grande stream system to its intersection with the northern boundary of section 22, township 21 south, range 3 west, NMPM; thence west along section lines to the southwest corner of section 23, township 21 south, range 4 west, NMPM; thence south along section lines to the northeast corner of section 3, township 22 south, range 4 west, NMPM; thence west along section lines to the northwest corner of section 4, township 22 south, range 4 west, NMPM; thence south along section lines to the southeast corner of section 8, township 22 south, range 4 west, NMPM; thence west along section line to the southwest corner of section 8, township 22 south, range 4 west, NMPM; thence south along section line to the southeast corner of section 18, township 22 south, range 4 west, NMPM; thence west along section line to the southwest corner of section 18, township 22 south, range 4 west, NMPM; thence south along section lines to the southeast corner of section 25, township 22 south, range 5 west, NMPM; thence west along section line to the southwest corner of section 25, township 22 south, range 5 west, NMPM; thence south along section line to the southeast corner of section 35, township 22 south, range 5 west, NMPM, being the point of origin.

B. Northwestern extension of underground basin: Beginning at the southeast corner of section 12, township 20 south, range 6 west, NMPM; thence west along section lines to the southwest corner of section 11, township 20 south, range 6 west, NMPM; thence south along section lines to the southeast corner of section 27, township 20 south, range 6 west, NMPM; thence west along section line to the southwest corner of section 27, township 20 south, range 6 west, NMPM; thence north along section lines to the northwest corner of section 22, township 20 south, range 6 west, NMPM; thence

east along section line approximately one half mile to the middle of the southern boundary line of section 15, township 20 south, range 6 west, NMPM; thence due north one mile to the intersection with the northern boundary of section 15, township 20 south, range 6 west, NMPM; thence east along section line to the southwest corner of section 11, township 20 south, range 6 west, NMPM; thence north along section lines to the northwest corner of section 23, township 19 south, range 6 west, NMPM; thence east along section lines to the northeast corner of section 19, township 19 south, range 5 west, NMPM; thence south along section lines to the southeast corner of section 6, township 20 south, range 5 west, NMPM; thence west along section line to the southwest corner of section 6, township 20 south, range 5 west, NMPM; thence south along section line to the southeast corner of section 12, township 20 south, range 6 west, NMPM, being the point of origin.

[19.27.66.9 NMAC - N/E, 9/23/2005; A, 6/30/2006]

19.27.66.10 BOUNDARY DESCRIPTION OF THE EXTENDED AREA OF THE PLAYAS UNDERGROUND WATER BASIN:

Beginning at the southeast corner of section 20, township 34 south, range 17 west, NMPM, a point on the border between the United States of America and Mexico; thence west along said border a distance of approximately 10.5 miles to the intersection of the of the international border with the of drainage divide between the Playas valley basin and the Animas river stream system; thence northerly along the drainage divide between the Playas valley basin and the Animas river stream system to its intersection with the northern boundary of section 6, township 28 south, range 18 west, NMPM; thence east along township line to the northeast corner of section 3, township 28 south, range 18 west, NMPM; thence south along section lines to the southeast corner of section 34, township 28 south, range 18 west, NMPM; thence east along township line to the northeast corner of section 3, township 29 south, range 18 west, NMPM; thence south along section lines to the southeast corner of section 10, township 29 south, range 18 west, NMPM; thence east along section line to the northeast corner of section 14, township 29 south, range 18 west, NMPM; thence south along section lines to the southeast corner of section 35, township 29 south, range 18 west, NMPM; thence east along township line to the northeast corner of section 1, township 30 south, range 18 west, NMPM; thence south along range lines to the southeast corner of section 24, township 33 south, range 18 west, NMPM; thence east along section lines to the northeast corner of section 29, township 33 south, range 17 west, NMPM; thence south along section lines to the southeast corner of section 20, township 34 south, range 17 west, NMPM, a point on the border between the United States of America and Mexico, being the point of origin.

[19.27.66.10 NMAC - N/E, 9/23/2005]

19.27.66.11 BOUNDARY DESCRIPTION OF THE EXTENDED AREAS OF THE ANIMAS UNDERGROUND WATER BASIN:

The following three areas are being added to the Animas underground water basin.

A. Upper Animas extension: Beginning at the intersection of the southern boundary of section 33, township 32 south, range 19 west, NMPM, with the drainage divide between the Playas valley basin and the Animas river stream system; thence west along township line to the southwest corner of section 32, township 32 south, range 19 west, NMPM; thence north along section line one-half mile to the mid-point of the western boundary of said section 32, thence west to the mid-point of the western boundary of section 36, township 32 south, range 20 west, NMPM; thence south along section line to the southwest corner of section 36, township 32 south, range 20 west, NMPM; thence west along township line to the southwest corner of section 32, township 32 south, range 20 west, NMPM; thence north along section line one-half mile to the mid-point of the western boundary of said section 32, thence due west to the mid-point of the eastern boundary of section 35, township 32 south, range 21 west, NMPM; thence south along section lines to the mid-point of the eastern boundary of section 11, township 33 south, range 21 west, NMPM; thence due west to the mid-point of the western boundary of said section, thence north along section line to the northwest corner of said section, thence west along section line to the southwest corner of section 3, township 33 south, range 21 west, NMPM; thence north along section line one-half mile to the mid-point of the western boundary of section 3, township 33 south, range 21 west, NMPM; thence due west to the mid-point of the western boundary of section 4, township 33 south, range 21 west, NMPM; thence north along section line to the northwest corner of said section 4, thence west along township line one-half mile to the mid-point of the southern boundary of section 32, township 32 south, range 21 west, NMPM; thence due north to the midpoint of the northern boundary of said section 32, then west along section lines and projected section lines to the intersection with the state line between the states of Arizona and New Mexico, thence north along said state line to its intersection with the southwest corner of section 35, township 31 south, range 22 west, NMPM; thence east along township line to the northeast corner of section 4, township 32 south, range 21 west, NMPM; thence north along section lines to the northwest corner of section 22, township 31 south, range 21 west, NMPM; thence west along section line to the southwest corner of section 16, township 31 south, range 21 west, NMPM; thence north along section lines to the northwest corner of section 28, township 30 south, range 21 west, NMPM; thence east along section line to the northeast corner of said section 28, then north along section line to the northwest corner of section 22, township 30 south, range 21 west, NMPM; thence east along section line to the northeast corner of said section 22, thence north along section lines to the northwest corner of section 26, township 29 south, range 21 west, NMPM; thence west along section line to the southwest corner of section 22, township 29 south, range 21 west, NMPM; thence north along section lines to the northwest corner of section 3, township 29 south, range 21 west, NMPM; thence east along township line to the southwest corner of section 36, township 28 south, range 21 west, NMPM; thence north along section lines to the northwest corner of section 24, township 28 south, range 21 west, NMPM; thence east along section lines to the northeast corner of section 19, township 28 south, range 20 west, NMPM; thence north along section lines to the northwest corner of section 8, township 28 south, range 20 west, NMPM; thence east

along section line to the northeast corner of said section 8, then north along section line to the northwest corner of section 4, township 28 south, range 20 west, NMPM; thence east along township line to the northeast corner of section 3, township 28 south, range 20 west, NMPM; thence south along section lines to the southeast corner of section 34, township 28 south, range 20 west, NMPM; thence east along township line to the northeast corner of section 3, township 29 south, range 20 west, NMPM; thence south along section lines to the southeast corner of section 34, township 30 south, range 20 west, NMPM; thence east along township line to the northeast corner of section 1, township 31 south, range 19 west, NMPM; thence north along range line to the northwest corner of section 6, township 29 south, range 18 west, NMPM; thence west along range line to the southwest corner of section 31, township 28 south, range 18 west, NMPM; thence north along township line to the northwest corner of section 6, township 28 south, range 18 west, NMPM; thence east approximately one-half mile along township line to the intersection of the township line with the drainage divide between the Playas valley basin and the Animas river stream system, thence southerly along the drainage divide between the Playas valley basin and the Animas river stream system to its intersection with the southern boundary of section 33, township 32 south, range 19 west, NMPM, being the point of origin.

B. Lower Animas extension: Beginning at the southeast corner of section 32, township 25 south, range 18 west, NMPM; thence west along township line to the southwest corner of section 33, township 25 south, range 19 west, NMPM; thence north along section lines to the northwest corner of section 4, township 24 south, range 19 west, NMPM; thence west along township line to the southwest corner of section 31, township 23 south, range 20 west, NMPM; thence south along range line to the southeast corner of section 36, township 25 south, range 21 west, NMPM; thence west along township line to the northeast corner of section 2, township 26 south, range 21 west, NMPM; thence south along section line to the southeast corner of section 2, township 26 south, range 21 west, NMPM; thence west along section line to the southwest corner of section 2, township 26 south, range 21 west, NMPM; thence north along section line to the northwest corner of section 2, township 26 south, range 21 west, NMPM; thence east along township line to the southwest corner of section 36, township 25 south, range 21 west, NMPM; thence north along section lines to the northwest corner of section 13, township 25 south, range 21 west, NMPM; thence west along section line to the southwest corner of section 11, township 25 south, range 21 west, NMPM; thence north along section lines to the northwest corner of section 11, township 24 south, range 21 west, NMPM; thence west along section line to the southwest corner of section 3, township 24 south, range 21 west, NMPM; thence north along section lines to the northwest corner of section 34, township 23 south, range 21 west, NMPM; thence west along section line to the southwest corner of section 28, township 23 south, range 21 west, NMPM; thence north along section lines to the northwest corner of section 9, township 23 south, range 21 west, NMPM; thence west along section line to the southwest corner of section 6, township 23 south, range 21 west, NMPM; thence north along the New Mexico-Arizona state line to the northwest corner of section 6, township 22 south, range 21 west, NMPM; thence east along township line to the northeast corner of section 6, township 22 south, range 21 west,

NMPM; thence north along section line to the northwest corner of section 32, township 21 south, range 21 west, NMPM; thence east along section line to the northeast corner of section 32, township 21 south, range 21 west, NMPM; thence north along section line to the northwest corner of section 28, township 21 south, range 21 west, NMPM; thence east along section line to the northeast corner of section 28, township 21 south, range 21 west, NMPM; thence north along section line to the northwest corner of section 22, township 21 south, range 21 west, NMPM; thence east along section line to the northeast corner of section 22, township 21 south, range 21 west, NMPM; thence north along section line to the northwest corner of section 14, township 21 south, range 21 west, NMPM; thence east along section lines to the northeast corner of section 13, township 21 south, range 21 west, NMPM; thence north along range line to the northwest corner of section 6, township 21 south, range 20 west, NMPM; thence east along township line to the southwest corner of section 32, township 20 south, range 20 west, NMPM; thence north along section line to the northwest corner of section 32, township 20 south, range 20 west, NMPM; thence east along section line to the northeast corner of section 32, township 20 south, range 20 west, NMPM; thence north along section line to the northwest corner of section 28, township 20 south, range 20 west, NMPM; thence east along section line to the northeast corner of section 28, township 20 south, range 20 west, NMPM; thence north along section line to the northwest corner of section 22, township 20 south, range 20 west, NMPM; thence east along section lines to the northeast corner of section 24, township 20 south, range 20 west, NMPM; thence south along section lines to the southeast corner of section 36, township 20 south, range 20 west, NMPM; thence east along section lines to the northeast corner of section 1, township 21 south, range 20 west, NMPM; thence south along range line to the southeast corner of section 36, township 22 south, range 20 west, NMPM; thence east along township line to the northeast corner of section 2, township 23 south, range 19 west, NMPM; thence south along section line to the southeast corner of said section 2, thence east along section line to the mid-point of the northern boundary of section 12, township 23 south, range 19 west, NMPM; thence due south to the mid-point of the southern boundary of section 13, township 23 south, range 19 west, NMPM; thence west along section line to the southwest corner of said section 13, thence south along section line to the southeast corner of section 23, township 23 south, range 19 west, NMPM; thence west along section line to the mid-point of the southern boundary of section 23, township 23 south, range 19 west, NMPM; thence due south to the center point of section 35, township 23 south, range 19 west, NMPM; thence due east to the mid-point of the eastern boundary of said section 35, thence south along section line to the southeast corner of said section 35, thence east along township line to the northeast corner of section 6, township 24 south, range 18 west, NMPM; thence south along section line to the mid-point of the eastern boundary of said section 6, thence due east to the center point of section 5, township 24 south, range 18 west, NMPM; thence due south to the center point of section 8, township 24 south, range 18 west, NMPM; thence due east to the mid-point of the eastern boundary of said section 8, thence south along section lines to the mid-point of the eastern boundary of section 20, township 24 south, range 18 west, NMPM; thence due east to the center point of section 21, township 24 south, range 18 west, NMPM; thence due south to the mid-point of the southern boundary of said section 21, thence east along section line to

the northeast corner of section 28, township 24 south, range 18 west, NMPM; thence south along section line to the southeast corner of said section 28, thence west along section lines to the mid-point of the southern boundary of section 29, township 24 south, range 18 west, NMPM; thence due south to the center point of section 32, township 24 south, range 18 west, NMPM; thence due west to the center point of section 31, township 24 south, range 18 west, NMPM; thence south to the mid-point of the southern boundary of section 6, township 25 south, range 18 west, NMPM; thence west along section line to the southwest corner of said section 6, thence south along range line to the southeast corner of section 12, township 25 south, range 19 west, NMPM; thence east along section line to the mid-point of the northern boundary of section 18, township 25 south, range 18 west, NMPM; thence due south to the center point of said section 18, thence due east to the mid-point of the eastern boundary of said section 18, thence south along section lines to the southeast corner of section 19, township 25 south, range 18 west, NMPM; thence east along section line to the mid-point of the northern boundary of section 29, township 25 south, range 18 west, NMPM; thence due south to the center point of said section 29, thence due east to the mid-point of the eastern boundary of said section 29, thence south along section lines to the southeast corner of section 32, township 25 south, range 18 west, NMPM, being the point of origin.

C. Lower Animas extension (additional section): The Animas underground water basin is extended to include section 1 of township 27 south, range 21 west, NMPM.

[19.27.66.11 NMAC - N/E, 9/23/2005]

PART 67: DECLARATION OF THE CAUSEY LINGO UNDERGROUND WATER BASIN

19.27.67.1 ISSUING AGENCY:

Office of the State Engineer.

[19.27.67.1 NMAC - N/E, 9/23/2005]

19.27.67.2 SCOPE:

The appropriation and use of underground water within the Causey Lingo underground water basin, an area declared by the state engineer to have a reasonably ascertainable boundary.

[19.27.67.2 NMAC - N/E, 9/23/2005]

19.27.67.3 STATUTORY AUTHORITY:

Chapter 72, Article 12, NMSA 1978. Section 72-1-1 NMSA 1978 provides that all natural waters flowing in streams and water courses belong to the public and are subject to appropriation for beneficial use. Section 72-2-1 NMSA 1978 gives the state engineer

general supervision of waters of the state and of the measurement, appropriation and distribution thereof and such other duties as required. Section 72-2-8 NMSA 1978 gives the state engineer authority to adopt regulations and codes to implement and enforce any provision of any law administered by him and also provides the state engineer with authority to issue orders necessary to implement his decisions and to aid him in the accomplishment of his duties. Section 72-2-9 NMSA 1978 gives the state engineer authority over and supervision of the apportionment of water in this state according to the licenses issued by him and his predecessors and the adjudications of the courts.

[19.27.67.3 NMAC - N/E, 9/23/2005]

19.27.67.4 DURATION:

Permanent.

[19.27.67.4 NMAC - N/E, 9/23/2005]

19.27.67.5 EFFECTIVE DATE:

September 23, 2005, unless a later date is cited at the end of a section.

[19.27.67.5 NMAC - N/E, 9/23/2005]

19.27.67.6 OBJECTIVE:

To establish administrative control over the appropriation and use of underground water within the Causey Lingo underground water basin, an area declared by the state engineer to have a reasonably ascertainable boundary.

[19.27.67.6 NMAC - N/E, 9/23/2005]

19.27.67.7 DEFINITIONS:

[RESERVED]

19.27.67.8 BOUNDARY DESCRIPTION OF THE CAUSEY LINGO UNDERGROUND WATER BASIN:

The area included in the Causey Lingo basin begins at the northeast corner of section 15, township 3 south, range 37 east, NMPM, a point on the New Mexico and Texas state line; thence south along said state line to the southeast corner of section 33, township 8 south, range 38 east, NMPM, being a point on the northern county line for Lea county, New Mexico; thence west along the county line of Lea county to the southwest corner of section 35, township 8 south, range 32 east, NMPM; thence north along section line to the northwest corner of section 2, township 8 south, range 32 east, NMPM; thence west along section line to the southwest corner of section 34, township 7

[illegible]

east, NMPM; thence east along section line to the northeast corner of section 13, township 1 south, range 31 east, NMPM; thence south along range line to the southeast corner of section 13, township 1 south, range 31 east, NMPM; thence east along section lines to the northeast corner of section 21, township 1 south, range 32 east, NMPM; thence south along section lines to the southeast corner of section 21, township 1 south, range 32 east, NMPM; thence east along section line to the northeast corner of section 27, township 2 south, range 32 east, NMPM; thence south along section line to the southeast corner of section 3, township 2 south, range 32 east, NMPM; thence west along section line to the southwest corner of section 3, township 2 south, range 32 east, NMPM; thence south along section lines to the southeast corner of section 16, township 2 south, range 32 east, NMPM; thence west along section line to the southwest corner of section 16, township 2 south, range 32 east, NMPM; thence south along section lines to the southeast corner of section 32, township 2 south, range 32 east, NMPM; thence east along township lines to the northeast corner of township 3 south, range 33 east, NMPM; thence south along range line to the southeast corner of section 12, township 3 south, range 33 east, NMPM; thence east along section lines to the northeast corner of section 15, township 3 south, range 37 east, NMPM, being the point of origin.

[19.27.67.8 NMAC - N/E, 9/23/2005]

PART 68: EXTENSION OF THE LEA COUNTY, FORT SUMNER AND CURRY COUNTY UNDERGROUND WATER BASINS

19.27.68.1 ISSUING AGENCY:

Office of the State Engineer.

[19.27.68.1 NMAC - N/E, 9/23/2005]

19.27.68.2 SCOPE:

The appropriation and use of underground water within the extended area of the Lea county underground water basin, the extended area of the Fort Sumner underground water basin, and the extended area of the Curry county underground water basin, areas declared by the state engineer to have reasonably ascertainable boundaries.

[19.27.68.2 NMAC - N/E, 9/23/2005]

19.27.68.3 STATUTORY AUTHORITY:

Chapter 72, Article 12, NMSA 1978. Section 72-1-1 NMSA 1978 provides that all natural waters flowing in streams and water courses belong to the public and are subject to appropriation for beneficial use. Section 72-2-1 NMSA 1978 gives the state engineer general supervision of waters of the state and of the measurement, appropriation and distribution thereof and such other duties as required. Section 72-2-8 NMSA 1978 gives the state engineer authority to adopt regulations and codes to implement and enforce

any provision of any law administered by him and also provides the state engineer with authority to issue orders necessary to implement his decisions and to aid him in the accomplishment of his duties. Section 72-2-9 NMSA 1978 gives the state engineer authority over and supervision of the apportionment of water in this state according to the licenses issued by him and his predecessors and the adjudications of the courts.

[19.27.68.3 NMAC - N/E, 9/23/2005]

19.27.68.4 DURATION:

Permanent.

[19.27.68.4 NMAC - N/E, 9/23/2005]

19.27.68.5 EFFECTIVE DATE:

September 23, 2005, unless a later date is cited at the end of a section.

[19.27.68.5 NMAC - N/E, 9/23/2005]

19.27.68.6 OBJECTIVE:

To establish administrative control over the appropriation and use of underground water within the extended area of the Lea county underground water basin, the extended area of the Fort Sumner underground water basin, and the extended area of the Curry county underground water basin, areas declared by the state engineer to have reasonably ascertainable boundaries.

[19.27.68.6 NMAC - N/E, 9/23/2005]

19.27.68.7 DEFINITIONS:

[RESERVED]

19.27.68.8 BOUNDARY DESCRIPTION OF THE EXTENDED AREA OF THE LEA COUNTY UNDERGROUND WATER BASIN:

Beginning at the southwest corner of township 10 south, range 32 east, NMPM; thence north along range line to the northwest corner of section 30, township 10 south, range 32 east, NMPM; thence east along section lines to the northeast corner of section 29, township 10 south, range 32 east, NMPM; thence north along section lines to the northwest corner of section 33, township 9 south, range 32 east, NMPM; thence west along section line to the southwest corner of section 29, township 9 south, range 32 east, NMPM; thence north along section lines to the northwest corner of section 5, township 9 south, range 32 east, NMPM; thence east along township lines, and the Lea county line, to the northeast corner of township 9 south, range 38 east, NMPM, a point

on the New Mexico-Texas state line; thence south along said state line to the southeast corner of township 11 south, range 38 east, NMPM; thence west along township lines to the southwest corner of township 11 south, range 35 east, NMPM; thence north along range line to the northwest corner of section 19, township 11 south, range 35 east, NMPM; thence west along section lines to the southwest corner of section 15, township 11 south, range 34 east, NMPM; thence north along section lines to the northwest corner of section 3, township 11 south, range 34 east, NMPM; thence west along township lines to the southwest corner of township 10 south, range 32 east, NMPM, being the point of origin.

[19.27.68.8 NMAC - N/E, 9/23/2005]

19.27.68.9 BOUNDARY DESCRIPTION OF THE EXTENDED AREA OF THE FORT SUMNER UNDERGROUND WATER BASIN:

Beginning at the southwest corner of section 35, township 2 north, range 30 east, NMPM; thence north along section lines to the northwest corner of section 23, township 3 north, range 30 east, NMPM; thence east along section line to the northeast corner of section 23, township 3 north, range 30 east, NMPM; thence north along section line to the northwest corner of section 13, township 3 north, range 30 east, NMPM; thence east along section line to the northeast corner of section 13, township 3 north, range 30 east, NMPM; thence south along range lines to the southeast corner of section 36, township 2 north, range 30 east, NMPM; thence west along township line to the southwest corner of section 35, township 2 north, range 30 east, NMPM, being the point of origin.

[19.27.68.9 NMAC - N/E, 9/23/2005]

19.27.68.10 BOUNDARY DESCRIPTION OF THE EXTENDED AREA OF THE CURRY COUNTY UNDERGROUND WATER BASIN:

Beginning at the southeast corner of section 36, township 8 north, range 34 east, NMPM; thence west along township lines to the southeast corner of section 36, township 8 north, range 33 east, NMPM; thence south along range lines to the southeast corner of section 36, township 7 north, range 33 east, NMPM; thence west along township lines to the southeast corner of section 36, township 7 north, range 32 east, NMPM; thence south along range lines to the southeast corner of section 36, township 6 north, range 32 east, NMPM; thence west along township lines to the southwest corner of section 35, township 6 north, range 31 east, NMPM; thence north along section line to the northwest corner of section 35, township 6 north, range 31 east, NMPM; thence west along section line to the southwest corner of section 27, township 6 north, range 31 east, NMPM; thence north along section line to the northwest corner of section 27, township 6 north, range 31 east, NMPM; thence west along section line to the southwest corner of section 21, township 6 north, range 31 east, NMPM; thence north along section line to the northwest corner of section 21, township 6 north, range 31 east, NMPM; thence west along section lines to the southwest corner of section 18, township 6 north, range 31 east, NMPM; thence north

along range line to the northwest corner of section 18, township 6 north, range 31 east, NMPM; thence west along section lines to the southwest corner of section 11, township 6 north, range 30 east, NMPM; thence north along section line to the northwest corner of section 2, township 6 north, range 30 east, NMPM; thence west along township line to the southwest corner of section 33, township 7 north, range 30 east, NMPM; thence north along section lines to the northwest corner of section 28, township 7 north, range 30 east, NMPM; thence west along section line to the southwest corner of section 20, township 7 north, range 30 east, NMPM; thence north along section lines to the northwest corner of section 17, township 7 north, range 30 east, NMPM; thence east along section lines to the northeast corner of section 15, township 7 north, range 30 east, NMPM; thence north along section lines to the northwest corner of section 11, township 7 north, range 30 east, NMPM; thence east along section lines to the northeast corner of section 9, township 7 north, range 31 east, NMPM; thence north along section lines to the northwest corner of section 3, township 7 north, range 31 east, NMPM; thence east along township lines to the northeast corner of section 4, township 7 north, range 32 east, NMPM; thence north along section line to the northwest corner of section 34, township 8 north, range 32 east, NMPM; thence east along section lines to the northeast corner of section 36, township 8 north, range 32 east, NMPM; thence north along range line to the northwest corner of section 19, township 8 north, range 33 east, NMPM; thence east along section lines to the northeast corner of section 21, township 8 north, range 33 east, NMPM; thence north along section lines to the northwest corner of section 3, township 8 north, range 33 east, NMPM; thence east along township line to the southwest corner of section 34, township 9 north, range 33 east, NMPM; thence north along section line to the northwest corner of section 34, township 9 north, range 33 east, NMPM; thence east along section lines to the northeast corner of section 31, township 9 north, range 35 east, NMPM; thence south along section line to the southeast corner of section 31, township 9 north, range 35 east, NMPM; thence west along township line to the northeast corner of section 1, township 8 north, range 34 east, NMPM; thence south along range line to the southeast corner of section 36, township 8 north, range 34 east, NMPM, being the point of origin.

[19.27.68.10 NMAC - N/E, 9/23/2005]

CHAPTER 28-29: [RESERVED]

CHAPTER 30: WILDLIFE ADMINISTRATION

PART 1: GENERAL PROVISIONS [RESERVED]

PART 2: DEPREDAATION ASSISTANCE

19.30.2.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[1-13-96; 19.30.2.1 NMAC - Rn, 19 NMAC 30.2.1, 7-16-01]

19.30.2.2 SCOPE:

Agricultural producers, property owners and sportsmen. Additional requirements may be found in Chapter 17 NMSA 1978 and Chapters 30, 31, 32 and 33 of Title 19.

[1-13-96; 19.30.2.2 NMAC - Rn, 19 NMAC 30.2.2, 7-16-01]

19.30.2.3 STATUTORY AUTHORITY:

17-1-14, 17-1-26, 17-2-7.2, 17-2-10, 17-2-26, 17-3-13.3, 17-3-13.4, 17-3-31, and 17-5-3 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species.

[9-1-89; 1-13-96; 9-15-97; 19.30.2.3 NMAC - Rn & A, 19 NMAC 30.2.3, 7-16-01]

19.30.2.4 DURATION:

Permanent.

[1-13-96; 19.30.2.4 NMAC - Rn, 19 NMAC 30.2.4, 7-16-01]

19.30.2.5 EFFECTIVE DATE:

January 13, 1996, unless a different date is cited at the end of a section or paragraph.

[1-13-96; 9-15-97; 19.30.2.5 NMAC - Rn, 19 NMAC 30.2.5, 7-16-01]

19.30.2.6 OBJECTIVE:

Establish procedures and limits for the handling of depredation caused by protected wildlife species on privately owned or leasehold interest land. Establish procedures and requirements for the big game depredation damage stamp.

[1-13-96; 19.30.2.6 NMAC - Rn & A, 19 NMAC 30.2.6, 7-16-01]

19.30.2.7 DEFINITIONS:

A. Game animals: This regulation shall apply to only those wildlife species defined as protected under 17-2-3, 17-5-2, 17-2-13, 17-2-14 NMSA 1978 and any other wildlife species managed or regulated by the New Mexico state game commission and New Mexico department of game and fish.

B. "Depredation" is hereby defined as private property damage, including growing crops or harvested and stored crops, caused by game animals on privately owned or leasehold private land, such that the damage caused results in a measurable loss of value. This definition may apply to private property that occurs on other than private land, as reasonable and appropriate, as determined by the department.

C. "Threat to human life" shall mean that death or great bodily harm is likely to occur to a person due to the closeness, aggression or attack of a game animal or quadruped.

D. "Immediate threat to human life" shall mean that an attack is so imminent that nothing, short of destruction, can be done to avert the aggression.

E. "Immediate threat of damage to property or crops" shall mean that game animals exist in such numbers that there is no time for intervention by the department to avert substantial private property damage.

F. "Crops" shall mean any cultivated field or forage, whether sown or natural, which is used chiefly for livestock in that the landowner harvests the product to feed livestock or commercially sell it; or any other feed or commercially sold product that may be stored on properties for future shipping or marketing or any other crop grown to provide human subsistence.

G. "Attractive nuisance" shall mean any crop or other material placed on a landowner's property to intentionally draw in protected wildlife.

H. "Landowner" is any person who personally owns private property legally recognized by the state of New Mexico.

I. "Lessee" is any person who leases private property from another in order to grow crops or produce livestock.

J. "Employee" is any person who is paid by a landowner or lessee for providing services to the landowner or lessee and that the service is related to the depredation.

K. "Take" shall mean to trap, ensnare, or intentionally prevent the natural movement of a game animal or quadruped.

L. "Leasehold interest" shall mean any person who leases or rents private agricultural property, whether or not that person is responsible for the crop or livestock.

M. "Quadruped" shall mean any furbearing animal, as defined in 17-5-2 NMSA 1978, for which the department has jurisdiction (muskrat, mink, nutria, otter, weasel, beaver, masked or black-footed ferret, ringtail cat, raccoon, pine marten, coatimundi, badger, bobcat, and all foxes).

N. "Good cause" as used herein shall mean either or both of the following.

(1) The landowner can document that the intervention offered would cause physical damage to persons or property.

(2) The landowner can document that the intervention offered will not result in a substantial lessening of the depredation it is intended to affect.

(3) In either instance the claim of good cause by the landowner must be made in good faith and supported with facts sufficient reasonably to meet either or both of the above criteria and provided to the department in written form within ten (10) days following the proposed interventions being communicated to the landowner or lessee.

O. "Negligence" shall mean the failure to exercise the standard of care that a reasonably prudent person would have exercised in a similar situation.

P. "Big game depredation damage stamp" shall mean a stamp, check off or other official mark purchased with each big game hunting license as required by 17-3-13.3 and 17-3-13.4 NMSA 1978.

[9-1-89, 9-15-97; 19.30.2.7 NMAC - Rn & A, 19 NMAC 30.2.7, 7-16-01; A, 12-28-01; A, 12-31-08]

19.30.2.8 TECHNIQUES/INTERVENTION:

A. Reporting: A landowner, lessee, or employee, upon recognizing depredation, shall contact the department of game and fish by toll-free phone number available twenty-four (24) hours a day, seven (7) days a week.

(1) Upon being notified by a landowner, lessee, or employee of a wildlife complaint, the appropriate department staff will contact the landowner, lessee, or employee as soon as is reasonably possible. Department staff will arrange an inspection of the property as promptly as possible, and as agreed to by the landowner, lessee, or employee.

(2) Upon completion of inspection and provided the inspection resulted in confirmation of depredation as defined pursuant to this regulation, the department will, within ten (10) days, offer a minimum of three (3) formal interventions, if practical, that are reasonable and effective, for preventing, resolving or correcting the wildlife caused damage.

(3) Within ten (10) days following receipt of interventions, the landowner, lessee, or employee shall notify the department, in writing or on an approved form, of acceptance or rejection of each intervention offered.

(4) The department will initiate interventions accepted by the landowner, lessee, within five (5) days of receipt of acceptance, or such later time as reasonable based on the intervention accepted.

(5) If the landowner, lessee, or employee rejects all interventions offered by the department, the landowner, lessee, or employee must submit written grounds for good cause for rejection. The department shall take no further action until justifications for rejection have been met pursuant to this regulation and been approved by the director. If the grounds for good cause are approved the landowner may continue working with the department to develop alternative interventions or take action pursuant to 17-2-7.2B.

B. Exceptions:

(1) In the case of an immediate threat to human life, or an immediate threat of damage to private property, including crops, by a game animal or other quadruped, game bird, or fowl, a landowner or lessee, or employee of either, may take or kill the game animal, quadruped, game bird or fowl, and must report such killing to the department's toll free phone number within 24 hours. If the taking or killing is not reported within two (2) hours, the landowner or lessee, or employee of either shall field dress the carcass so as to salvage any edible portions and preserve them for disposal by the department in accordance with the law, which may include sale to the highest bidder. In no case shall the landowner or lessee, or employee of either refuse or prevent the department motorized vehicle access to any carcasses taken pursuant to this rule and the department shall not be responsible for removal of any carcass, or parts thereof, if it is determined by the department to be un-fit for human consumption. If game animals are killed pursuant to this Paragraph, the department shall publish at least quarterly, a notice of the incidents. The notice shall describe each incident, the county of the occurrence, landowner, lessee, or employee of either involved, and the number of game animals, quadrupeds, game birds, or fowl taken.

(2) In the case of threat of damage to property or crops, that is not immediate, a landowner may take any non-lethal action to discourage the protected animal or quadruped, and continue such action until the agreed upon intervention method begins. If the department does not resolve the threat within one year, and the property depredation meets the conditions set forth in 17-2-7.2 B (6) NMSA 1978, the landowner, lessee, or employee may take action as prescribed in 17-2-7.2 B (7) NMSA 1978 by taking or killing the offending animals. All reporting, field dressing, and department access requirements identified above shall apply. Nothing in this provision shall be interpreted to limit any protections afforded by the constitution.

(3) Nothing shall prevent the department from taking action to discourage the offending animals during the pendency of the written intervention agreement.

(4) Nothing shall prevent a landowner, lessee, or employee from continuing to work with the department after one year, thereby preventing the destruction of the animals, if agreed by the parties.

(5) Nothing in this regulation shall authorize taking or harassing any animals contrary to the federal Endangered Species Act or Migratory Bird Treaty Act or contrary to any other federal or state law.

(6) Conflicts of interest: to avoid conflict of interest or the harvesting of wildlife for personal gain, the landowner, lessee, employee, all family members and any person involved in the killing of the offending animal are not allowed to take possession or bid on the animals killed.

C. Interventions: Intervention methods offered by the department shall be designed to achieve fiscally responsible, reasonable, effective, and, if practical, long-term solutions to depredation on private lands and shall be incorporated into the written agreements pursuant to this regulation.

D. Causing a nuisance game animal problem: It shall be unlawful for any person, by their action or lack of action, whether intentionally or through negligence, to cause a nuisance game animal or depredation problem by baiting, feeding, or otherwise enticing game animals to an area, and such persons, if convicted, may be punished under 17-2-10 NMSA 1978. The department shall not be required to offer or provide interventions to depredation complaints caused by landowner, lessee, or employee of either violating this prohibition.

19.30.2.9 [RESERVED]

[9-15-97; 19.30.2.9 NMAC - Rn, 19 NMAC 30.2.9, 7-16-01; A, 07-31-02; Repealed, 12-31-08]

19.30.2.10 [RESERVED]

[9-15-97; 19.30.2.10 NMAC - Rn, 19 NMAC 30.2.10, 7-16-01; Repealed, 12-31-08]

19.30.2.11 REPORTS:

A department representative shall make regular reports to the commission regarding recent wildlife complaints, their nature, resolution status and any other pertinent information per commission request.

[9-15-97; 19.30.2.11 NMAC - Rn, 19 NMAC 30.2.11, 7-16-01; A, 12-31-08]

19.30.2.12 BIG GAME DEPREDATION DAMAGE STAMP:

A. Purchase: Each person hunting any big game species in New Mexico must purchase a big game depredation damage stamp at the time of application or purchase of a big game license. Stamp fees shall be in accordance with 19.30.1.9.

B. Availability: Big game depredation damage stamps will be sold with all big game licenses by all hunting and fishing license vendors. The big game depredation damage stamp fee shall be included with every big game license type purchased.

C. Expiration: Each big game hunter shall be required to purchase one stamp or validation per license. Each stamp will expire at the same time as the license it is issued to.

[19.30.2.12 NMAC - N, 7-16-01, A, 12-28-01]

[This amendment is for any application or license purchased for the 2002 hunting license season and beyond]

19.30.2.13 BIG GAME DEPREDATION DAMAGE FUND:

A. Expenditures: Allowable expenditures from the big game depredation damage fund shall be restricted to the procurement of goods and services intended to resolve or mitigate depredation in accordance with 17-3-13.4.B NMSA 1978, 17-2-7.2.B NMSA 1978, and 19.30.2 NMAC. Direct compensation shall not be allowed.

(1) No intervention method shall be approved if funding is not available.

(2) If funding is limited, big game depredation damage agreements will be funded and given a priority based upon the level of verifiable and irreversible financial loss, history of documented depredation reporting by the landowner, lessee or employee, agreement by landowner, lessee or employee to provide in-kind contributions, such as costs or labor, and by availability of funds.

B. Written agreements: All written agreements that result in the expenditure of funds from the big game depredation damage fund shall be signed by both the director of the department, or his designee, and the landowner, and the lessee as to an existing leasehold interest, or an authorized representative of each. Each agreement shall specify the exact location where the intervention method will be implemented, the standard and specifications with which it will be implemented (i.e. fence-height, width, length, gate design, etc.), estimated cost per intervention, life expectancy of intervention, and maintenance and repair responsibilities. Prior to implementation of any intervention method, an owner or their representative, and lessee if applicable, must provide verifiable proof as to the land status and ownership of the property. If any conflict in documentation, map, deed or survey is found to exist, the owner shall have a

survey completed depicting land ownership status and submit the results to the department prior to implementation of any intervention method.

PART 3: GAME AND FISH OPEN MEETINGS

19.30.3.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[8-15-95; 19.30.3.1 NMAC - Rn, 19 NMAC 30.3.1, 2-14-02]

19.30.3.2 SCOPE:

Persons interested in and affected by actions of the state game commission and the department of game and fish.

[8-15-95; 19.30.3.2 NMAC - Rn, 19 NMAC 30.3.2, 2-14-02; A, 09-15-2014]

19.30.3.3 STATUTORY AUTHORITY:

NMSA 1978, Sections 10-15-1 to 4 (as amended through 2012, "Open Meetings Act") and NMSA 1978, Sections 17-1-14 and 17-1-26 that provide the New Mexico state game commission with the authority to establish rules that it may deem necessary to carry out the purpose of Chapter 17, Article 1 and all other acts pertaining to protected species.

[12-17-75, 9-3-82, 1-27-84, 12-3-87, 3-5-91, 8-15-95; 19.30.3.3 NMAC - Rn, 19 NMAC 30.3.3, 2-14-02; A, 09-15-2014]

19.30.3.4 DURATION:

Permanent.

[8-15-95; 19.30.3.4 NMAC - Rn, 19 NMAC 30.3.4, 2-14-02]

19.30.3.5 EFFECTIVE DATE:

August 15, 1995, unless a different date is cited at the end of a section.

[8-15-95; 19.30.3.5 NMAC - Rn, 19 NMAC 30.3.5, 2-14-02]

19.30.3.6 OBJECTIVE:

To establish rules pursuant to the "Open Meetings Act" determining what constitutes reasonable notice of state game commission public meetings.

[8-15-95; 19.30.3.6 NMAC - Rn, 19 NMAC 30.3.6, 2-14-02; A, 09-15-2014]

19.30.3.7 DEFINITIONS:

A. "Department" shall mean the New Mexico department of game and fish.

B. "Department's public website" means: www.wildlife.state.nm.us.

C. "Emergency meeting" is a meeting called to address unforeseen circumstances that, if not addressed immediately by the commission, will likely result in injury or damage to persons or property, or substantial financial loss to the commission.

D. "Publish" shall mean to publish via paid legal advertisement in a newspaper of general circulation.

[8-15-95; 19.30.3.7 NMAC - Rn, 19 NMAC 30.3.7, 2-14-02; A, 09-15-2014; A, 02-27-2015]

19.30.3.8 OPEN MEETINGS:

A. Reasonable notice: Reasonable notice shall be given, as hereinafter provided, of all meetings of a quorum of the state game commission held for the purpose of discussing or adopting any proposed rule or resolution, or taking formal action. At its first meeting each year, the commission will determine what is a reasonable notice for all meetings as required by Section 10-15-1(D) NMSA 1978. At that meeting, the commission shall adopt a resolution to either continue or amend its existing practice as stated below:

(1) Ten day notice for regular meetings: At least 10 days in advance of each regularly scheduled meeting, notice will be posted on the department's public website and social media sites and in addition will be sent to newspapers, radio stations, wire services and television stations in the state that have provided a written request for the notice of meetings per Section 10-15-1(D) NMSA 1978. These notices shall contain the date, time, and place of the meeting and information on how a copy of the agenda may be obtained.

(2) Three day notice for special meeting: At least three days in advance of each special meeting, notice will be posted on the department's public website and social media sites and given by telephone to newspapers, radio stations, wire services and television stations in the state that have provided a written request for the notice of meetings per Section 10-15-1(D) NMSA 1978. These notices shall provide the date, time, and place of the meeting and information on how a copy of the agenda may be obtained.

(3) 24 hour notice for emergency meetings: Notwithstanding any other provision of this rule, the chairman of the state game commission may call an emergency meeting to consider any unforeseen and urgent matter that demands immediate commission action. Notice of an emergency meeting shall be posted on the department's public website and social media sites at least 24 hours in advance unless threat of personal injury or property damage requires less notice, and shall be given by telephone to the associated press and, if time permits, via newsrelease faxed or hand delivered to at least one daily newspaper of general circulation in the state.

(4) Telephone participation: Commissioners may choose to participate in properly noticed meetings of the state game commission by telephone or other similar communications equipment, but only when attendance in person is difficult or impossible. Each commissioner participating by telephone or other similar equipment must be identified when speaking. All commissioners must be able to hear each other at the same time and hear any other speaker, and members of the public attending the meeting must be able to hear any commissioner.

B. Correspondence with interested parties: Prior to each regularly scheduled meeting, correspondence announcing the date, time, and place of the meeting and information on how a copy of the agenda may be obtained shall be sent to agencies, organizations, groups, or individuals who have requested such notice.

C. Agenda availability and changes:

(1) Agenda availability: Except for emergency meetings, the agenda for a regular or special meeting will be made available to the public by posting on the department's public website and social media sites and from the office of the director, New Mexico department of game and fish, one Wildlife Way, Santa Fe, New Mexico 87507 at least 72 hours in advance of each meeting.

(2) The proposed agenda for any meeting is subject to change as deemed necessary by the chairman of the state game commission. However, such changes may not be made less than 72 hours in advance of any meeting and the final agenda incorporating any such changes, will be made available to the public at least 72 hours in advance of the meeting from the office of the director.

[12-17-75, 9-3-82, 12-3-87, 3-5-91, 8-15-95, 3-15-99, 2-14-00; 19.30.3.8 NMAC - Rn & A, 19 NMAC 30.3.8, 2-14-02; A, 09-15-2014; A, 02-27-2015]

PART 4: BOUNDARY DESCRIPTIONS FOR GAME MANAGEMENT UNITS

19.30.4.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.30.4.1 NMAC - Rp, 19.30.4.1 NMAC, 8/25/2020]

19.30.4.2 SCOPE:

Department staff and licensed hunters and trappers.

[19.30.4.2 NMAC - Rp, 19.30.4.2 NMAC, 8/25/2020]

19.30.4.3 STATUTORY AUTHORITY:

17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected mammals, birds and fish.

[19.30.4.3 NMAC - Rp, 19.30.4.3 NMAC, 8/25/2020]

19.30.4.4 DURATION:

Permanent.

[19.30.4.4 NMAC - Rp, 19.30.4.4 NMAC, 8/25/2020]

19.30.4.5 EFFECTIVE DATE:

August 25, 2020, unless a different date is cited at the end of a section.

[19.30.4.5 NMAC - Rp, 19.30.4.5 NMAC, 8/25/2020]

19.30.4.6 OBJECTIVE:

Establishing boundary descriptions for game management units and other designated areas.

[19.30.4.6 NMAC - Rp, 19.30.4.6 NMAC, 8/25/2020]

19.30.4.7 DEFINITIONS:

A. "County road" or "CR" as used herein shall be a numbered road that is designated and managed by New Mexico county governments.

B. "East" or "E" as used herein shall be the cardinal direction east.

C. "Forest road" or "FR" as used herein shall be a numbered road that is under the jurisdiction of and managed by the United States Forest Service.

D. "Forest trail" or "FT" as used herein shall be a numbered trail that is under the jurisdiction of and managed by the United States Forest Service.

E. "Game management unit" or "GMU" as used herein, shall be a geographical subdivision of the state used to manage game species.

F. "Interstate" or "I-" as used herein shall be a numbered controlled access highway that is part of the United States Interstate Highway System.

G. "New Mexico highway" or "NM" as used herein shall be a numbered highway or route that is part of the New Mexico State Highway System managed by the New Mexico Department of Transportation.

H. "North" or "N" as used herein shall be the cardinal direction north.

I. "Range" or "R" as used herein shall be range designations based on the New Mexico Principal Meridian and Base Line of the United States Public Land Survey System. Ranges are numbered in order east and west from the principal meridian (e.g. R10E is the 10th range east of the principle meridian).

J. "South" or "S" as used herein shall be the cardinal direction south.

K. "Township" or "T" as used herein shall be township designations based on the New Mexico Principal Meridian and Base Line of the United States Public Land Survey System. Townships are numbered in order north and south from the base line (e.g. T2N is the second township north of the base line).

L. "United States highway" or "US" as used herein shall be a numbered highway that is part of the United States Numbered Highway System coordinated by the American Association of State Highway and Transportation Officials.

M. "West" or "W" as used herein shall be the cardinal direction west.

[19.30.4.7 NMAC - Rp, 19.30.4.7 NMAC, 8/25/2020]

19.30.4.8 GAME MANAGEMENT UNITS:

A. GMU 1: The Ute Mountain Ute Tribe reservation and all contiguous portions of the Navajo Nation reservation north and west of and including section 31, T 17 N, R 13 W.

B. GMU 2: Beginning at the junction of the east boundary of the Ute Mountain Ute Tribe reservation and the Colorado-New Mexico state line and running east along the state line to the western boundary of the Jicarilla Apache Nation reservation, then south, west and south along the reservation boundary to its intersection with US 550, then northwest along US 550 to its intersection with the San Juan river, then west along the San Juan river to the east boundary of the Navajo Nation reservation, then north along the east boundary of the Navajo reservation to its junction with the south boundary of

the Ute Mountain Ute Tribe reservation, then east and north along the Ute Mountain Ute Tribe reservation boundary to the Colorado-New Mexico state line.

C. GMU 2A: That portion of GMU 2 west of the Los Pinos river (Pine Arm of Navajo reservoir) and north of the San Juan river.

D. GMU 2B: That portion of GMU 2 east and north of the following line: from the junction of the New Mexico-Colorado state line and Pine river, then south along the Pine river to its junction with the San Juan river, then south and west along the San Juan river to its junction with Largo canyon, then south and east along the central wash of Largo canyon to its junction with Carrizo canyon (Cereza canyon), then south and east along the central wash of Carrizo canyon (Cereza canyon) to the Jicarilla Apache Nation reservation boundary.

E. GMU 2C: That portion of GMU 2 south and west of the following line: from the junction of US 550 and the San Juan river at Bloomfield, then east along the San Juan river to its junction with Largo canyon, then south and east along the central wash of Largo canyon to its junction with Carrizo canyon (Cereza canyon), then south and east along the central wash of Carrizo canyon (Cereza canyon) to the Jicarilla Apache Nation reservation boundary.

F. GMU 3: The Jicarilla Apache Nation reservation.

G. GMU 4: Beginning at the junction of the east boundary of the Jicarilla Apache Nation reservation and the Colorado-New Mexico state line and running east along the state line to the eastern boundary of the Tierra Amarilla grant, then south along the east boundary of the Tierra Amarilla grant and west along its south boundary to its junction with the east boundary of the Jicarilla Apache Nation reservation, then north along the east boundary of the reservation to its junction with the Colorado-New Mexico state line.

H. GMU 5: Beginning at the intersection of the east boundary of the Jicarilla Apache Nation reservation, the south boundary of the Tierra Amarilla grant and the Rio Chama, running south along the Rio Chama to its intersection with the Piedra Lumbre grant boundary line, then northeast along the Piedra Lumbre grant boundary line to its intersection with US 84, then south along US 84 to its junction with NM 96 northwest of Abiquiu, then west along NM 96 to its junction with NM 595 north of Regina, then west along NM 595 to its intersection with the east boundary of the Jicarilla Apache Nation reservation, then northerly along the east boundary of the reservation to its junction with the south boundary of the Tierra Amarilla grant and the Rio Chama.

I. GMU 5A: That portion of GMU 5 beginning at the junction of the northwest boundary of the Santa Fe national forest administrative boundary with the Jicarilla Apache Nation reservation north of Lindrith and following the forest administrative boundary south towards Lindrith, then northeasterly past Llaves, thence southerly to its intersection with NM 96, then west along NM 96 to its junction with NM 595 north of Regina, then west along NM 595 to its intersection with the east boundary of the

Jicarilla Apache Nation reservation, then following the reservation boundary north to its intersection with the northwest corner of the Santa Fe national forest administrative boundary.

J. GMU 5B: That portion of GMU 5 beginning at the intersection of the east boundary of the Jicarilla Apache Nation reservation, the south boundary of the Tierra Amarilla grant and the Rio Chama, running south along the Rio Chama to its intersection with the Piedra Lumbre grant boundary line, then northeast along the Piedra Lumbre grant boundary line to its intersection with US 84, then south along US 84 to its junction with NM 96 northwest of Abiquiu, then west along NM 96 to its junction with the Santa Fe national forest administrative boundary west of Gallina, then following the forest boundary north then west past Llaves then southwesterly to south of Lindrith, then north along the forest service administrative boundary line to its intersection with the Jicarilla Apache Nation reservation, then east along the reservation boundary to the junction of the reservation, the south boundary of the Tierra Amarilla grant and the Rio Chama.

K. GMU 6: Beginning at the junction of I-25 and US 550 near Bernalillo and running northwest and west along US 550 past San Ysidro to its intersection with the boundary of the Pueblo of Zia reservation, then south, west and north along the Pueblo of Zia reservation boundary to the boundary of the Pueblo of Jemez reservation, then west, north and east along the Pueblo of Jemez reservation boundary to its intersection with US 550 near La Ventana, then north and west along US 550 to its intersection with the south boundary of the Jicarilla Apache Nation reservation, then east along the south boundary of the reservation and north along its east boundary to its intersection with NM 595, then east along NM 595 to its junction with NM 96, then east along NM 96 to its junction with US 84 northwest of Abiquiu, then southeast along US 84 to its junction with I-25 at Santa Fe, then southwest along I-25 to its junction with US 550.

L. GMU 6A: That portion of GMU 6 starting at the junction of I-25 and US 550 at Bernalillo and running northwest and west along US 550 past San Ysidro to its intersection with the boundary of the Pueblo of Zia reservation, then south, west and north along the Pueblo of Zia reservation boundary to the Pueblo of Jemez reservation, then west, north and east along Pueblo of Jemez reservation boundary to its intersection with US 550 near La Ventana, then north and west along US 550 to its intersection with the south boundary of the Jicarilla Apache Nation reservation, then east along the south boundary of the Jicarilla Apache Nation reservation and north along its east boundary to its intersection with NM 595, then east along NM 595 to its junction with NM 96, then east along NM 96 to its junction with Santa Fe FR 103, then south along Santa Fe FR 103 to its junction with Santa Fe FR 117, then south along Santa Fe FR 117 to its junction with Santa Fe FR 527 (Pipeline road), then east along Santa Fe FR 527 to its junction with the west boundary of the Valles Caldera national preserve, then south and east along the boundary of the Valles Caldera national preserve to its junction with Santa Fe FR 280 and NM 4, then south along Santa Fe FR 280 to its junction with Santa Fe FT 140, then south along Santa Fe FT 140 to Peralta creek, then south and east along Peralta creek to its junction with Santa Fe FR 266,

then south and east along Santa Fe FR 266 to its junction with NM 22, then along NM 22 to its junction with NM 16, then southeast along NM 16 to its junction with I-25, then south and west along I-25 to its junction with US 550 at Bernalillo.

M. GMU 6B: That portion of GMU 6 comprised of all lands within the fenced or posted boundary of the Valles Caldera national preserve as fenced or posted by the United States forest service.

N. GMU 6C: That portion of GMU 6 starting at the junction of NM 96 and Santa Fe FR 103 east of Gallina and running south along Santa Fe FR 103 to its junction with Santa Fe FR 117, then south along Santa Fe FR 117 to its junction with Santa Fe FR 527 (Pipeline road), then east along Santa Fe FR 527 to its junction with the west boundary of the Valles Caldera national preserve, then north, east, south and west along the boundary of the Valles Caldera national preserve to its junction with NM 4 and Santa Fe FR 280, then south along Santa Fe FR 280 to its junction with Santa Fe FT 140, then south along Santa Fe FT 140 to Peralta creek, then south and east along Peralta creek to its junction with Santa Fe FR 266, then south and east along Santa Fe FR 266 to its junction with NM 22, then along NM 22 to its junction with NM 16, then south and east along NM 16 to its junction with I-25, then north along I-25 to its junction with US 84 at Santa Fe, then north along US 84 to its junction with NM 96 west of Abiquiu, then west along NM 96 to its junction with Santa Fe FR 103.

O. GMU 7: Beginning at the intersection of the east boundary of the Navajo Nation reservation and Navajo W Route 9 at section 31, T18N, R13W, then running north along the reservation boundary to the northeastern corner immediately west of Farmington, then east along the San Juan river to its intersection with US 550 at Bloomfield, then southeast along US 550 to its intersection with the west boundary of the Jicarilla Apache Nation reservation, then south along the west boundary of the reservation and east along its south boundary to its intersection with US 550, then east and south along US 550 to its intersection with the north boundary of the Pueblo of Jemez reservation south of La Ventana, then west along the north boundary of the reservation and south along its west boundary to its intersection with the San Luis road, then southwest along San Luis road to its intersection with arroyo Chico, then west up arroyo Chico to its junction with Voght draw, then west up Voght draw to its junction with Inditos draw, then west up Inditos draw to its intersection with NM 509, south of Hospah, south along NM 509 to McKinley CR 19-A (Prewitt road), then southwest along McKinley CR 19-A (Prewitt road) to its junction with the continental divide (near Borrego pass), then westerly along the continental divide to its intersection with NM 371, then north along NM 371 to its junction with Navajo W Route 9, then northwest along Navajo W Route 9 to its intersection with the boundary of the Navajo Nation reservation at section 31, T18N, R13W.

P. GMU 8: Beginning at the intersection of I-40 and I-25 at Albuquerque and running northeast along I-25 to its junction with NM 14, then south along NM 14 to Santa Fe CR 42, then southeast along the county road to its junction with NM 41 at

Galisteo, then south along NM 41 to its intersection with I-40 at Moriarty, then west along I-40 to its intersection with I-25.

Q. GMU 9: Beginning at Prewitt at the junction of I-40 and NM 412 and running north along NM 412 to NM 122, then east along NM 122 to its intersection with McKinley CR 19-A (Prewitt road), then north along CR 19-A to its intersection with NM 509, then north along NM 509 to its intersection with Inditos draw, then south and east down Inditos draw to its junction with Voght draw, then east down Voght draw to its junction with arroyo Chico, then east down arroyo Chico to its intersection with the San Luis road, then northeast along the San Luis road to its intersection with the west boundary of the Pueblo of Jemez reservation, then east along the Pueblo of Jemez reservation southern boundary to the boundary of the Pueblo of Zia reservation, then south and east along the Pueblo of Zia reservation boundary to its intersection with US 550 west of San Ysidro, then east and southeast along US 550 to its junction with I-25 at Bernalillo, then south along I-25 to its junction with NM 6 at Los Lunas, then west and northwest along NM 6 to its junction with I-40, then west along I-40 to Prewitt.

R. GMU 10: Beginning at the junction of the north boundary of the Pueblo of Zuni reservation with the Arizona-New Mexico state line and running north along the state line to the boundary of the Navajo Nation reservation at section 35, T17N, R21W, then east along the contiguous southern boundary of the Navajo Nation reservation and north along its east boundary to its intersection with Navajo W Route 9 at section 31, T18N, R13W, then southeast along Navajo W Route 9 to its junction with NM 371, then east and south along NM 371 to its intersection with the continental divide, then east along the continental divide to its junction with McKinley CR 19-A (Prewitt road) near Borrego pass, then south along CR 19-A to NM 122, then west along NM 122 to NM 412, then south along NM 412 to its junction with I-40 at Prewitt, then southeast along I-40 to its junction with NM 53 (Ice Caves road) near Grants, then south and west along NM 53 to its intersection with the east boundary of the Pueblo of Zuni reservation, then north along the east boundary of the Pueblo of Zuni reservation and west along its north boundary to its junction with the Arizona-New Mexico state line.

S. GMU 11: The Pueblo of Zuni reservation.

T. GMU 12: Beginning at the intersection of US 60 and the Arizona-New Mexico state line and running north along the state line to the south boundary of the Pueblo of Zuni reservation, then east along the south boundary of the reservation and north along its east boundary to its intersection with NM 53, then east along NM 53 to its junction with Cibola CR 42, then south along Cibola CR 42 to its junction with NM 117, then east along NM 117 to its junction with Cibola CR 41, then south along Cibola CR 41 to its junction with Catron CR A083, then south along Catron CR A083 to its junction with NM 603, then south along NM 603 to its junction with US 60 at Pie Town, thence west along US 60 to the Arizona-New Mexico state line.

U. GMU 13: Beginning at the junction of NM 53 (Ice Caves road) and I-40 west of Grants and running east along I-40 to its junction with NM 6, then southeast along NM 6

to its junction with I-25 at Los Lunas, then south along I-25 to its junction with US 60 at Socorro, then west along US 60 to its junction with NM 12 at Datil, then southwest along NM 12 to its junction with Catron CR B034, then northwest along Catron CR B034 to its junction with Greens Gap road (Catron CR A130), then west and north along Greens Gap road (Catron CR A130) to its junction with Pie Town road (Catron CR A056), then north along Pie Town road (Catron CR A056) to Pie Town, then north along NM 603 to its junction with York Ranch road (Catron CR A083), then north along York Ranch road (Catron CR A083 and Cibola CR 41) to its junction with NM 117, then west along NM 117 to its junction with Back Country Byway (Cibola CR 42), then north along Back Country Byway (Cibola CR 42) to its junction with NM 53, then east and north along NM 53 to its junction with I-40 west of Grants.

V. GMU 14: Beginning at the junction of US 60 and I-25 at Bernardo and running north along I-25 to its intersection with I-40 at Albuquerque, then east along I-40 to its intersection with NM 41 at Moriarty, then south along NM 41 to its junction with US 60 at Willard, then west along US 60 to its junction with I-25.

W. GMU 15: Beginning at the intersection of the Arizona-New Mexico state line and US 60 and running east along US 60 to its intersection with NM 603 at Pie Town, then south and east along Pie Town road (Catron CR A056) to its junction with Greens Gap road (Catron CR A130), then east along Greens Gap road (Catron CR A130) to its junction with NM 12 south of Datil, then southwest along NM 12 to its junction with US 180 west of Reserve, then northwest along US 180 to its intersection with the Arizona-New Mexico state line, then north along the Arizona-New Mexico state line to its intersection with US 60.

X. GMU 16: Beginning at the junction of NM 12 and US 60 at Datil and running east along US 60 to its intersection with NM 52, then southwest along NM 52 to its intersection with NM 163, then southwest along NM 163 to its intersection with the continental divide, then south and southwest along the continental divide to its intersection with the Grant-Sierra county line at Reed's peak, then south along the Grant-Sierra county line to its intersection with Gila FR 152 at Board Gate saddle, then northwest and southwest along Gila FR 152 to its junction with NM 35, then northwest along NM 35 to its junction with Sapillo creek, then west along Sapillo creek to its junction with the Gila river, then northwest along the Gila river to its intersection with Turkey creek, then northwest along Turkey creek to its intersection with Gila FT 158, then northwest along Gila FT 158 through Woodrow canyon to Mogollon creek, then northwest along Mogollon creek to its junction with the west fork of Mogollon creek and Gila FT 224, then northwest along the west fork of Mogollon creek and Gila FT 224 to its junction with Gila FT 182, then north and west on Gila FT 182 to its junction with Bursum road (NM 159) at Sandy point, then west on Bursum road to its junction with US 180 south of Alma, then north on US 180 to its intersection with NM 12, thence northeast along NM 12 to its junction with US 60 at Datil.

Y. GMU 16A: That portion of GMU 16 beginning at the junction of Bursum road (NM 159) and US 180, then north along US 180 to its junction with NM 12, then northeast

along NM 12 to its junction with NM 435, then south along NM 435 to its junction with Negrito creek south of Reserve, then east along Negrito creek to its junction with the north fork of Negrito creek, then east along the north fork of Negrito creek to its junction with Gila FR 94 at Collins park, then south on Gila FR 94 to its junction with Gila FR 28, then southeasterly on Gila FR 28 to its junction with Gila FR 30, then southeasterly on Gila FR 30 to its junction with Snow Lake road (Catron CR 021), then southwesterly on Snow Lake road to its junction with Gila FR 142C west of Cooney prairie, then south on Gila FR 142C to the Gila wilderness boundary, then west along the Gila wilderness boundary to its junction with Snow creek below Snow lake, then south along Snow creek to its junction with Gilita creek, then west along Gilita creek to its junction with Willow creek, then west along Willow creek to its junction with Gila FT 138, then westerly along Gila FT 138 to its junction with Gila FT 182, then north on Gila FT 182 to its junction with Bursum road (NM 159) at Sandy point, then west along Bursum road (NM 159) to its junction with US 180.

Z. GMU 16B: That portion of GMU 16 beginning at the junction of Gila FR 152 and the Grant-Sierra county line southwest of Board Gate saddle, then north along the Grant-Sierra county line to Reeds peak and the continental divide, thence north along the continental divide to its intersection with Gila FT 42, then west along Gila FT 42 to its junction with Gila FT 40 at Diamond creek, then west along Gila FT 40 and Diamond creek to Gila FR 4069G, then west to Gila FR 225, then southwest along Gila FR 225 to its junction with Gila FR 18, then northwest along Gila FR 18 to its junction with Gila FR 704, then west along Gila FR 704 to Gila FR 4208P, then northwesterly along Gila FR 4208P to Gila FT 772, then northwesterly along Gila FT 772 to Black mountain, then west from Black mountain along Gila FT 23 to Gila FT 812, then north along Gila FT 812 to its intersection with the south fork of Christie canyon and the wilderness boundary, then west along the wilderness boundary to Snow creek, then south along Snow creek to Gilita creek, then west along Gilita creek to Willow creek, then west along Willow creek to Gila FT 138, then westerly along Gila FT 138 to Gila FT 182, then south and east on Gila FT 182 to its junction with Gila FT 224 at west fork saddle, then south along Gila FT 224 and down the west fork of Mogollon creek to its junction with Mogollon creek, then easterly along Mogollon creek to Gila FT 158 at Woodrow canyon, then southeast along Gila FT 158 to Turkey creek, then south along Turkey creek to the Gila river, then east along the Gila river to Sapillo creek, then east along Sapillo creek to NM 35, then east along NM 35 to its intersection with Gila FR 152, then northeast along Gila FR 152 to its junction with the Sierra-Grant county line southwest of Board Gate saddle.

AA. GMU 16C: That portion of GMU 16 beginning at the road junction of O Bar O Canyon road (Catron CR 072) and Gila FR 30 in Railroad canyon, then northeast along O Bar O Canyon road to its junction with NM 163, then northeast along NM 163 to the continental divide, then south along the continental divide to Gila FT 42, then south along Gila FT 42 to Gila FT 40, then west on Gila FT 40 to Gila FR 4069G, then west to Gila FR 225, then southwest along Gila FR 225 to Gila FR 18, then northwest along Gila FR 18 to Gila FR 704, then west along Gila FR 704 to Gila FR 4208P, then northwesterly along Gila FR 4208P to Gila FT 772, then northwest along Gila FT 772 to

Gila FT 23 on Black mountain, then northwest along Gila FT 23 to Gila FT 812, then north along Gila FT 812 to south fork of Christie canyon, then north and west along south fork of Christie canyon to Gila FR 142C, then north along Gila FR 142C to Snow Lake road (Catron CR 021), then northeast along Snow Lake road to its junction with Gila FR 30, then east along Gila FR 30 to its junction with O Bar O Canyon road in Railroad canyon.

BB. GMU 16D: That portion of GMU 16 beginning at Apache creek and continuing south and west along NM 12 to its junction with NM 435 at Reserve, then south along NM 435 to its junction with Negrito creek, then east along Negrito creek to its junction with the north fork of Negrito creek, then east along the north fork of Negrito creek to its junction with Gila FR 94 at Collins park, then south along Gila FR 94 to its junction with Gila FR 28, then east along Gila FR 28 to junction with Gila FR 30, then southeast along Gila FR 30 to its intersection with Coyote Canyon road (Catron CR 016), then north and west along Coyote Canyon road to its junction with Bursum road (Catron CR 019), then north along Bursum road to its intersection with NM 12, then west on NM 12 to Apache creek.

CC. GMU 16E: That portion of GMU 16 beginning at the intersection of Coyote Canyon road (Catron CR 016) and Gila FR 30, then northwesterly along Coyote Canyon road to its intersection with Bursum road (Catron CR 019), then north on Bursum road to its intersection with NM 12, then east on NM 12 to its intersection with NM 60 at Datil, then east on NM 60 to its intersection with NM 52, then south on NM 52 to its intersection with NM 163, then west on NM 163 to its intersection with O Bar O Canyon road (Catron CR 072), then west on O Bar O Canyon road to its intersection with Gila FR 30, then west on Gila FR 30 to its intersection with Coyote Canyon road.

DD. GMU 17: Beginning at the junction of NM 52 and US 60 east of Datil and running east along US 60 to its junction with I-25 at Socorro, then south along I-25 to its junction with NM 181, then north along NM 181 to its junction with NM 52 east of Cuchillo, then west along NM 52 to its junction with NM 142, then northwest along NM 142 to its junction with Alamosa creek at Monticello, then northwest along Alamosa creek through Monticello canyon to its junction with NM 52 south of Dusty, then north along NM 52 to its junction with US 60.

EE. GMU 18: Beginning at the junction of US 380 and I-25 at San Antonio and running north along I-25 to its junction with US 60 at Bernardo, then east along US 60 to NM 55 at Mountainair, then south and southeast along NM 55 to its junction with US 54, then south along US 54 to its intersection with the Lincoln-Otero county line, then west along the county line to the east boundary of White Sands missile range, then north along the east boundary and west along the north boundary of White Sands missile range to the northwest corner of the missile range, then due north to US 380, then west along US 380 to its junction with I-25 at San Antonio.

FF. GMU 19: Beginning at the intersection of US 70 and the west boundary of the White Sands missile range east of Organ and running north along the west boundary,

east along the north boundary, and south along the east boundary of White Sands missile range, then southerly following the eastern boundary of Holloman Air Force base, continuing south along the east boundary of White Sands missile range, then south and east along the eastern boundary of Fort Bliss - Dona Ana Range Camp to its intersection with US 54 south of Orogrande, then south along US 54 to its intersection with the New Mexico-Texas state line, then west along the state line to its intersection with I-10, then northwest along I-10 to its junction with I-25, then north along I-25 to its junction with US 70 at Las Cruces, then east along US 70 to its intersection with the west boundary of the White Sands missile range.

GG. GMU 20: Beginning at the junction of US 70 and I-25 at Las Cruces and running north along I-25 to its junction with US 380 at San Antonio, then east along US 380 to a point due north of the northwestern corner of the White Sands missile range, then due south to the northwest corner of the missile range, then south along the west boundary of the missile range to its intersection with US 70 east of Organ, then west along US 70 to its junction with I-25.

HH. GMU 21: Beginning at the junction of US 180 and NM 26 north of Deming and running northeast along NM 26 to its junction with NM 27 at Nutt, then northwest along NM 27 to its intersection with the Sierra-Luna county line, then west along the south boundary of Sierra county and north along its west boundary to the junction of the county line and the continental divide, then north along the continental divide to its intersection with NM 163, then northeast along NM 163 to its junction with NM 52, then southeast along NM 52 to its intersection with Alamosa creek south of Dusty, then southeast along Alamosa creek through Monticello canyon to its intersection with NM 142 at Monticello, then southeast along NM 142 to its intersection with NM 52, then southeast along NM 52 to its junction with NM 181, then south along NM 181 to its junction with I-25, then south along I-25 to its junction with US 180 at Las Cruces, then west along US 180 to Deming and north along US 180 to its junction with NM 26.

II. GMU 21A: That northwest portion of GMU 21 that lies within the Gila national forest boundary.

JJ. GMU 21B: That portion of GMU 21 that lies outside the Gila national forest boundary.

KK. GMU 22: Beginning at the intersection of the Gila river and US 180 south of Cliff running north along US 180 to its junction with Bursum road (NM 159), then east along Bursum road to its junction with Gila FT_182 at Sandy point, then south along Gila FT 182 to its junction with Gila FT 224 at the west fork saddle, then south on Gila FT 224 down the west fork of Mogollon creek to its junction with the main Mogollon creek, then easterly along Mogollon creek to the junction of Gila FT 158 at Woodrow canyon, then south along Gila FT 158 to main Turkey creek, then south along Turkey creek to its junction at the Gila river, then southwest along the Gila river to its junction with US 180.

LL.GMU 23: Beginning at the intersection of US 180 and the Arizona-New Mexico state line west of Luna, then south along the state line to its intersection with US 70, then southeast along US 70 to its junction with US 180 at Deming, thence northwest along US 180 to its junction with the Arizona-New Mexico state line.

MM. GMU 24: Beginning at the junction of NM 26 and US 180 north of Deming and running northwest along US 180 to its intersection with the Gila river south of Cliff, then northeast along the Gila river to its junction with Sapillo creek, then east along Sapillo creek to NM 35, then east and south on NM 35 to its junction with Gila FR 152, then northeast along Gila FR 152 to its junction with the Grant-Sierra county line southwest of Board Gate saddle, then south along the west boundary of Sierra county and east along its south boundary to its intersection with NM 27, then south along NM 27 to its junction with NM 26, then southwest along NM 26 to its junction with US 180.

NN. GMU 25: Beginning at the junction of the United States-Mexico boundary with the west boundary of Luna county and running north along the county line to its intersection with NM 9, then northwest along NM 9 to its intersection with NM 146 (old NM 81) at Hachita, then north along NM 146 (old NM 81) to its junction with I-10, then east and south along I-10 to its junction with US 70, then east along US 70 to its junction with I-25, then south along I-25 to its junction with I-10, then south along I-10 to its intersection with the Texas-New Mexico state line, then west and south along the Texas state line to the United States-Mexico boundary, then west along the international boundary to the west boundary of Luna county.

OO. GMU 26: Beginning at Paskle gate on the United States-Mexico boundary, near international boundary marker No. 69, then north on the private dirt road from Paskle gate to its intersection with NM 338 approximately 100 yards west of Cloverdale and running north along NM 338 to its intersection with I-10, then north and east along I-10 to its intersection with NM 146 (old NM 81), then south along NM 146 to its intersection with NM 9 at Hachita, then east along NM 9 to its intersection with the west boundary of Luna county, then south along the Luna county line to the United States-Mexico boundary, then south and west along the international boundary to Paskle gate.

PP. GMU 27: Beginning at Paskle gate on the United States-Mexico boundary, near international boundary marker No. 69, then north on the private dirt road from Paskle gate to its intersection with NM 338 approximately 100 yards west of Cloverdale, then north along NM 338 to its intersection with I-10, then east along I-10 to its intersection with US 70 at Lordsburg, then northwest along US 70 to the Arizona-New Mexico state line, then south along the state line to its intersection with the United States-Mexico boundary, then east along the international boundary to Paskle gate.

QQ. GMU 28: The Fort Bliss-McGregor Range Camp military reservation east of US 54, excluding that part of the Sacramento division of the Lincoln national forest lying within the McGregor range co-use area.

RR. GMU 29: Beginning at the junction of the New Mexico-Texas state line and the east boundary of the Fort Bliss military reservation and running northeast along the military reservation boundary to its intersection with NM 506 (Otero CR E038) leading to Pinon, then east, north and east along NM 506 (Otero CR E038) to its intersection with NM 24 at Pinon, then east on NM 24 and Pinon Dunken road approximately three miles to its intersection with Cornucopia Canyon road and NM 506, then running southerly along Cornucopia Canyon road and NM 506 through Cornucopia draw and Crow flats to its intersection with the New Mexico-Texas state line near Dell City, Texas, then west along the state line to the east boundary of the Fort Bliss military reservation.

SS. GMU 30: Beginning at the New Mexico-Texas state line near Dell City, Texas, and its intersection with NM 506, then northerly along NM 506 and Cornucopia Canyon road through Crow flats and Cornucopia draw to its junction with Pinon Dunken road east of Pinon, then northeast along Pinon Dunken to its junction with US 82 north of Dunken, then east along US 82 to its intersection with US 285 at Artesia, then south and southeast along US 285 to its junction with US 180 at Carlsbad, then south along US 180 to its intersection with the New Mexico-Texas state line, then west along the state line to its intersection with NM 506.

TT.GMU 31: Beginning at the intersection of the New Mexico-Texas state line and US 180, southwest of Carlsbad, and running northeast along US 180 to its junction with US 285 at Carlsbad, then north along US 285 to its intersection with US 82 at Artesia, then east along US 82 to its junction with NM 249 at Maljamar, then north along NM 249 to its junction with NM 172, then north along NM 172 (Tower road) to its junction with US 380 west of Caprock, then east along US 380 to its junction with Button Mesa road, then north along Button Mesa road continuing north along Lea CR T-156, continuing north along Reserve road, continuing north along S Roosevelt road AK to its junction at Elida, then north along NM 330 to its junction with NM 267 west of Floyd, then north along NM 267 to its junction with US 60 east of Melrose, then east along US 60 to the New Mexico-Texas state line, then south and west along the state line to its intersection with US 180 southwest of Carlsbad.

UU. GMU 32: Beginning at the intersection of US 380 and the east boundary of Lincoln county and running north along the east boundary of Lincoln county to the west boundary of De Baca county, then north along the west boundary of De Baca county to its intersection with US 60, then east along US 60 to its junction with NM 267 east of Melrose, then south along NM 267 to its junction with NM 330 west of Floyd, then south along NM 330 to its junction with US 70 at Elida, then southwest along US 70 to its intersection with the Pecos river, then south along the Pecos river to its intersection with Aberdeen road (NM 249) at Hagerman, then west along Aberdeen road (NM 249) to its junction with NM 2, then south along NM 2 to its intersection with US 285 north of Artesia, then south on US 285 to its intersection with US 82 at Artesia, then west along US 82 to its junction with Picacho road (Chaves CR C433) near mile marker 60, then north along Picacho road to its intersection with Felix Canyon road near Flying H, then west along Felix Canyon road to its intersection with Picacho road, then

north along Picacho road continuing northerly along Picacho road (Lincoln CR E030 and Lincoln CR E028) to its junction with US 380. about a mile west of Picacho, then east along US 380 to its intersection with the east boundary of Lincoln county.

VV. GMU 33: Beginning at the intersection of US 82 and US 285 at Artesia and running north along US 285 to its junction with NM 2, then north on NM 2 to its intersection with NM 249 at Hagerman, then east along NM 249 to its intersection with the Pecos river, then north along the Pecos river to its intersection with US 70, then northeast along US 70 to S Roosevelt road AK at Elida, then south along S Roosevelt road AK continuing south along Reserve road, Button Mesa road and Lea CR T-156, then northwest along US 380 to NM 172 to US 82, then west along US 82 to US 285 at Artesia.

WW. GMU 34: Beginning at the junction of Tulie Gate road (Otero CR B-006) and the east boundary of the White Sands missile range at Tularosa gate and running east along Tulie Gate road to its junction with Railroad avenue (Otero CR B-009), then north on Railroad avenue to its intersection with US 54, then running south along US 54 to its intersection with US 70 at Tularosa, then running northeast along US 70 to its intersection with the west boundary of the Mescalero Apache Tribe reservation, then south along the west boundary of the reservation, east along its south boundary, and north along its east boundary to the Lincoln-Chaves county line, then east along the county line approximately two miles to its intersection with Picacho road, then southerly along Picacho road to its intersection with Felix Canyon road, then east along Felix Canyon road to its intersection with Picacho road, then south along Picacho road to its intersection with US 82, then west along US 82 to its junction with NM 24 north of Dunken, then south along Pinon Dunken road (NM 24) to its intersection with Owen Prather highway (NM 506) at Pinon, then west, south and west on Owen Prather highway (NM 506) to the east boundary of the Fort Bliss military reservation, then north and west along the boundary of the Fort Bliss-McGregor Range Camp military reservation to its intersection with the Sacramento division of the Lincoln national forest, then west and north along the boundary of the Sacramento division of the Lincoln national forest to its intersection with the north boundary of the Fort Bliss-McGregor Range Camp military reservation, then west and south along the boundary of the Fort Bliss-McGregor Range Camp military reservation to its junction with the east boundary of the Fort Bliss-Dona Ana Range Camp at US 54 south of Orogrande, then north along the east boundary of Fort Bliss-Dona Ana Range Camp, then north along the east boundary of White Sands missile range to Holloman Air Force base, then east and north along the eastern Holloman Air Force base boundary to the east boundary of White Sands missile range, then north along the east boundary of White Sands missile range to its intersection of Tulie Gate road (Otero CR B-006) at Tularosa gate.

XX. GMU 35: The Mescalero Apache Tribe reservation.

YY. GMU 36: Beginning at the junction of Otero CR B-006 and the east boundary of the White Sands missile range at Tularosa gate and running north along the east boundary to its intersection with the Lincoln-Otero county line, then east along

the county line to its intersection with US 54, then north along US 54 to its intersection with US 380 at Carrizozo, then east along US 380 to its junction with Picacho road (Lincoln CR E028), approximately 1 mile west of Picacho, then south along Picacho road (Lincoln CR E028) to its intersection with Picacho road (Lincoln CR E030), then south and west along Picacho road (Lincoln CR E030) to its intersection with the Lincoln-Chaves county line, then west along the county line to the east boundary of the Mescalero Apache Tribe reservation, then north along the east boundary of the reservation, west along its north boundary, and south along its west boundary to its intersection with US 70, then west along US 70 to its junction with US 54 at Tularosa, then north along US 54 to its junction with Otero CR B-009, then south along CR B-009 to its junction with Tulie Gate road (Otero CR B-006), then west along Tulie Gate road (Otero CR B-006) to its junction with the east boundary of White Sands missile range at Tularosa gate.

ZZ.GMU 37: Beginning at the intersection of US 380 and US 54 at Carrizozo and running north along US 54 to its junction with NM 462 west of Ancho, then east along NM 462 to its intersection with the Southern Pacific railroad tracks, then north along the railroad tracks to Hasparos canyon, then east down Hasparos canyon to the east boundary of Lincoln county, then south along the east boundary of Lincoln county to its intersection with US 380, then west along US 380 to its intersection with US 54 at Carrizozo.

AAA. GMU 38: Beginning at the junction of US 54 and NM 55 and running northwesterly along NM 55 to its junction with US 60 at Mountainair, then east along US 60 to the Guadalupe-De Baca county line, then south along the county line and along the east boundary of Lincoln county to its intersection with Hasparos canyon, then west up Hasparos canyon to the Southern Pacific railroad tracks northeast of Ancho, then south along the railroad tracks to their intersection with NM 462 at Ancho, then west along NM 462 to its junction with US 54, then south along US 54 to its junction with NM 55.

BBB. GMU 39: Beginning at the junction of US 60 and NM 41 west of Willard and running north along NM 41 to its intersection with I-40 at Moriarty, then east along I-40 to its junction with US 84 east of Santa Rosa, then southeast along US 84 to its junction with US 60 at Fort Sumner, then west along US 60 to its junction with NM 41 west of Willard.

CCC. GMU 40: Beginning at the junction of US 84 and I-40 east of Santa Rosa and running east along I-40 to the New Mexico-Texas state line, then south along the state line to its intersection with US 84, then west and north along US 84 to its junction with I-40.

DDD. GMU 41: Beginning at the junction of I-40 and NM 469 at San Jon and running north along NM 469 to its junction with US 54 south of Logan, then north along US 54 to its intersection with NM 39 north of Logan, then northwest along NM 39 to its junction with NM 102 east of Mosquero, then east, north and east along NM 102 to its

intersection with NM 402 north of Amistad, then north along NM 402 to its intersection with NM 421 north of Stead, then east along NM 421 to the New Mexico-Texas state line, then south along the state line to its intersection with I-40, then west along I-40 to its intersection with NM 469 at San Jon.

EEE. GMU 42: Beginning at the intersection of I-40 and the Pecos river at Santa Rosa and running northwest up the Pecos river to its intersection with US 84 at Dilia, then northwest along US 84 to its junction with I-25 at Romeroville, then northeast along I-25 to its intersection with the Mora river at Watrous, then east down the Mora river to the Canadian river, then south down the Canadian river to its intersection with NM 419 south of Sabinoso, then northeast along NM 419 to its junction with NM 39 northwest of Mosquero, then southeast along NM 39 to its intersection with US 54, then south along US 54 to its intersection with NM 469, then south along NM 469 to its intersection with I-40 at San Jon, then west along I-40 to its intersection with the Pecos river.

FFF. GMU 43: Beginning at the intersection of I-40 and NM 41 at Moriarty and running north along NM 41 to the junction at Galisteo with Santa Fe CR 42, then west along the county road to the junction with NM 14, then north along NM 14 to its junction with I-25, then northeast along I-25 to Santa Fe and east along I-25 to its junction with US 84 at Romeroville, then southeast along US 84 to its intersection with the Pecos river at Dilia, then east and south along the Pecos river to its intersection with I-40 at Santa Rosa, then west along I-40 to its intersection with NM 41.

GGG. GMU 45: Beginning at Glorieta on US 84, and running west and north along US 84 to its intersection with NM 68 at Espanola, then northeast along NM 68 to its intersection with NM 75 at Embudo, then east along NM 75 to its intersection with NM 518, then east along NM 518 to its intersection with the Santa Fe national forest administrative boundary line near Holman hill, then south along the Santa Fe national forest administrative boundary line to its intersection with the Tecolote land grant boundary line, then south along the Tecolote land grant boundary line to its intersection with US 84/I-25, then west along US 84/I-25 to Glorieta.

HHH. GMU 46: Beginning at the junction of I-25 and NM 120 at Wagon Mound and running northwest along NM 120 to its junction with NM 434, Black lake area, then north on NM 434 to Carson FR 76 to the Carson national forest administrative boundary, then south following the Carson national forest administrative boundary to the Santa Fe national forest administrative boundary at Holman hill, then continue south along the Santa Fe national forest administrative boundary to the Tecolote land grant boundary, then south along the Tecolote land grant boundary to I-25, then north along I-25 to the junction of I-25 and NM 120 at Wagon Mound.

III. GMU 47: Beginning at the intersection of the Mora river and I-25 near Watrous and running northeast along I-25 to its junction with US 56 at Springer, then east along US 56 to its junction with NM 39 at Abbott, then south and southeast along NM 39 to its junction with NM 419 southeast of Solano, then southwest along NM 419 to its

intersection with the Canadian river, then northwest up the Canadian river to the Mora river, then west up the Mora river to its intersection with I-25.

JJJ. GMU 48: Beginning at the intersection of I-25 and NM 120 at Wagon Mound, then northwest along NM 120 to its intersection with the south boundary of the Maxwell grant, then east along the south boundary of the Maxwell grant to its intersection with I-25, then south along I-25 to its intersection with NM 120 at Wagon Mound.

KKK. GMU 49: Beginning on the Rio Grande at Embudo creek and running north along the Rio Grande to its intersection with NM 567 at Taos junction bridge, then east on NM 567 to NM 570, then northeast on NM 570 to its junction with NM 68 immediately south of Ranchos de Taos, then north along NM 68 to the south boundary of the Pueblo of Taos, then east along the Pueblo of Taos's south boundary to the Taos county line, then south along the Taos county line to its intersection with US 64, then east along US 64 to its junction with NM 434 north of Black lake, then south along NM 434 to the Carson national forest administrative boundary at Carson FR 76, then south along Carson national forest administrative boundary to its intersection with NM 518 at Holman hill, then westerly along NM 518 to its junction with NM 75, then west along NM 75 to NM 68, then south on NM 68 to Embudo creek, then west on Embudo creek to the Rio Grande.

LLL. GMU 50: Beginning at the junction of US 84 and NM 554 east of Abiquiu and running north and east along NM 554 to its junction with NM 111, then southeast along NM 111 to its junction with US 285, then north along US 285 to the Colorado-New Mexico state line, then east along the state line to its intersection with the Rio Grande, then south along the Rio Grande to its junction with Embudo creek, then east up Embudo creek to NM 68 at Embudo, then southwest along NM 68 to its junction with US 84 at Espanola, then northwest along US 84 to its junction with NM 554.

MMM. GMU 51: Beginning at the intersection of US 64 and the eastern boundary of the Tierra Amarilla grant, running south then west along the Tierra Amarilla grant boundary line to its intersection with the Rio Chama, then south along the Rio Chama to its intersection with the Piedra Lumbre grant boundary line, then northeast along the Piedra Lumbre grant boundary line to its intersection with US 84 northwest of Abiquiu, then southeast along US 84 to its intersection with NM 554 east of Abiquiu, then north and east along NM 554 to its intersection with NM 111, then south along NM 111 to its intersection with US 285 north of Ojo Caliente, then east and north along US 285 to its intersection with US 64 at Tres Piedras, then west along US 64 to its intersection with the Tierra Amarilla grant boundary.

NNN. GMU 51A: That portion of GMU 51 beginning at the intersection of US 64 and the eastern boundary of the Tierra Amarilla grant, running south then west along the Tierra Amarilla grant boundary line to its junction with US 84, then southeast along US 84 to its intersection with NM 554 east of Abiquiu, then north and east along NM 554 to its intersection with NM 111, then south along NM 111 to its intersection with US 285

north of Ojo Caliente, then east and north along US 285 to its intersection with US 64 at Tres Piedras, then west along US 64 to its intersection with the Tierra Amarilla grant boundary.

OOO. GMU 51B: That portion of GMU 51 beginning at the intersection of the east boundary of the Jicarilla Apache Nation reservation, the south boundary of the Tierra Amarilla grant and the Rio Chama, running south along the Rio Chama to its intersection with the Piedra Lumbre grant boundary line, then northeast along the Piedra Lumbre grant boundary line to its intersection with US 84, then north along US 84 to its junction with the south boundary of the Tierra Amarilla grant, then west along the south boundary of the Tierra Amarilla grant to its junction with the Rio Chama.

PPP. GMU 52: Beginning at the intersection of US 64 and the east boundary of the Tierra Amarilla grant and running north along the eastern boundary of the grant to the Colorado-New Mexico state line, then east along the state line to its intersection with US 285, then south along US 285 to its junction with US 64 at Tres Piedras, then west along US 64 to its intersection with the east boundary of the Tierra Amarilla grant.

QQQ. GMU 53: Beginning at the intersection of NM 567 and the Rio Grande and running north along the Rio Grande to the Colorado-New Mexico state line, then east along the state line to its junction with NM 522, then south along NM 522 to the south boundary of the Sangre de Cristo grant, then east along the grant boundary to the Taos-Colfax county line, then south along the Colfax county line to the south boundary of the Pueblo of Taos, then west along the south boundary of the Pueblo of Taos to NM 68, then south along NM 68 to NM 570 immediately south of Ranchos de Taos, then west along NM 570 to its junction with NM 567, then west along NM 567 to its intersection with the Rio Grande.

RRR. GMU 54: Beginning at the intersection of the south boundary of the Maxwell grant and NM 434 and running north along NM 434 to its junction with US 64, then north and east along US 64 to its junction with NM 21 west of Cimarron, then south and east along NM 21 to its junction with I-25 south of Springer, then south along I-25 to its intersection with the south boundary of the Maxwell grant, then west along the south boundary of the grant to its intersection with NM 434.

SSS. GMU 55: Beginning at the junction of NM 21 and US 64 west of Cimarron and running west and south along US 64 to the Colfax-Taos county line at Palo Flechado pass, then north along the Colfax county line to the south boundary of the Sangre de Cristo grant, then north and west along the Sangre de Cristo grant's south boundary to NM 522, then north along NM 522 to the Colorado-New Mexico state line, then east along the state line to its intersection with I-25, then south along I-25 to its junction with NM 21 at Springer, then west and north along NM 21 to its junction with US 64 west of Cimarron.

TTT. GMU 55A: That portion of GMU 55 beginning at the junction of NM 58 and US 64 at Cimarron and running west and south along US 64 to the Colfax-Taos county

line at Palo Flechado pass, then north along the Colfax county line to the south boundary of the Sangre de Cristo grant, then north and west along the Sangre De Cristo grant's south boundary to NM 522, then north along NM 522 to the Colorado-New Mexico state line, then east along the state line to its intersection with I-25, then south along I-25 to its junction with US 64, thence southwest along US 64 to its junction with NM 58 at Cimarron.

UUU. GMU 55B: That portion of GMU 55 beginning at the junction of I-25 and US 64 south of Raton, then south and west along US 64 to its junction with NM 21 west of Cimarron, then south and east along NM 21 to its junction with I-25 south of Springer, then north along I-25 to its junction with US 64 south of Raton.

VVV. GMU 56: Beginning at the junction of US 56 and I-25 at Springer and running north along I-25 to its junction with US 64 at Raton, then east along US 64 to its junction with US 56 at Clayton, then west along US 56 to its junction with I-25.

WWW. GMU 57: Beginning at the junction of US 64 and I-25 at Raton and running north along I-25 to the Colorado-New Mexico state line, then east along the state line to NM 551, then south along NM 551 to its junction with NM 456, then southwest along NM 456 to its junction with NM 325, then southwest along NM 325 to its junction with US 64, then west along US 64 to its junction with I-25.

XXX. GMU 58: Beginning at the junction of US 64 and NM 325 at Capulin and running northeast along NM 325 to its junction with NM 456, then northeast along NM 456 to its junction with NM 551, then north along NM 551 to the Colorado-New Mexico state line, then east along the state line to the Oklahoma-New Mexico state line, then south along the state line to its intersection with US 64, then west along US 64 to its junction with NM 325.

YYY. GMU 59: Beginning at the intersection of NM 39 and US 56 at Abbott, then east along US 56 to the New Mexico-Texas state line, then south along the New Mexico-Texas state line to NM 421 east of Sedan, then west along NM 421 to its intersection with NM 402 north of Stead, then south along NM 402 to its intersection with NM 102 north of Amistad, then west, south and west along NM 102 to its intersection with NM 39 east of Mosquero, then north along NM 39 to its intersection with US 56 at Abbott.

[19.30.4.8 NMAC - Rp, 19.30.4.8 NMAC, 8/25/2020]

19.30.4.9 OTHER DESIGNATED AREAS:

A. GMU 23 (Burro mountain hunt area): That portion of GMU 23 comprised of the Big Burro mountains portion of the Gila national forest and shall include all private land lying within the national forest boundary.

B. GMU 24 (Fort Bayard management area): That portion of GMU 24 beginning at the NW corner of section 22, T17S, R13W south along the west section line of sections 22, 27 and 34 to the north right-of-way fence of US 180, thence easterly along the north right-of-way fence of US 180 through sections 34 and 35 to the east right-of-way fence of the road entering Fort Bayard medical center, thence northwesterly along this east right-of-way fence through sections 35 and 26 for approximately one and one-quarter miles to the forest boundary fence, thence northeasterly along the forest boundary fence for approximately five-eighths mile, thence easterly along the forest boundary fence through sections 26 and 25 for approximately three-quarters mile, thence southerly along the forest boundary fence for approximately one-half mile, thence easterly along the forest boundary fence for approximately five-eighths mile to the west right-of-way fence of NM 90, thence northeasterly along the right-of-way fence for about one-half mile to the intersection with the forest boundary fence, thence northerly along the forest boundary fence through sections 30, 19, 18 and 7 for about three and three-quarters miles, thence westerly along the forest boundary fence for approximately one-quarter mile to the southeastern corner of the Pear Tree pasture fence, thence northerly along the eastern boundary of the Pear Tree pasture fence for approximately one mile, thence westerly along the northern fenced boundary through sections 1, 2 and 3 of T17S, R13W of the Pear Tree, Castle Knob, Twin Sisters and Enclosure pasture fences for approximately three and a half miles to the corner of west section line of section 3, thence southerly along the west section lines of sections 3, 10 and 15 for approximately two and three-quarters miles to the point of origin.

C. GMU 25 (Florida mountains): That portion of GMU 25 comprised of the main Florida mountain range and Little Floridas, bounded by I-10 on the north, the Luna-Dona Ana county line on the east, the Mexico-New Mexico boundary line on the south, and NM 11 on the west.

D. GMU 32 (Roswell hunt area): That portion of GMU 32 beginning at the intersection of US 285 and NM 557, then east along NM 557 to its junction with NM 2, then north along NM 2 to its junction with NM 249, then east along NM 249 to the Pecos river, then north along the Pecos river to the north section line of section 2 of T9S, R25E, then west along the north township lines of T9S, R25E and T9S, R24E to US 285, then south along US 285 to the northeast corner of section 32 of T9S, R24E, then west along the north section lines of sections 32 and 31 of T9S, R24E, then sections 36, 35, 34, 33, 32 and 31 of T9S, R23E, and then sections 36, 35, 34 and 33 of T9S, R22E, then south along the west section lines of section 33 of T9S, R22E, then sections 4, 9, 16, 21, 28 and 33 of T10S, R22E, then sections 4, 9, 16, 21, 28 and 33 of T11S, R22E, then sections 4, 9, 16, 21, 28 and 33 of T12S, R22E, then east along the south section lines of sections 33 and 34 of T12S, R22E to the northwest corner of section 1 of T13S, R22E, then south along the west section lines of sections 1, 12 and 13 of T13S, R22E, then east along the south section lines of section 13 of T13S, R22E, then sections 18, 17, 16, 15, 14 and 13 of T13S, R23E and then section 18 of T13S, R24E to Old YO Crossing road, then south and west along Old YO Crossing road to its junction with NM 13, then east along NM 13 to its junction with US 285, then south along US 285 to its junction with NM 557.

E. GMU 36 (Fort Stanton hunt area): That portion of GMU 36 comprised of those lands owned and administered by the bureau of land management within the historic Fort Stanton military reservation.

F. GMU 53 (Cerro portion): That portion of GMU 53 beginning at the intersection of NM 522 and NM 378, then north on NM 522 approximately three point one miles to its intersection with Taos CR B-041 (Buena Vista road), then west on Taos CR B-041 1 mile to the dirt road on the boundary of townships T30N and T29N, then west on that dirt road two miles to its intersection with Taos CR B-048 (Sunshine-Jarosa road), then south on Taos CR B-048 approximately one point three miles to its intersection with NM 378, then southeasterly on NM 378 approximately three point five miles to its intersection with NM 522.

[19.30.4.10 NMAC - Rp, 19.30.4.9 NMAC, 8/25/2020]

PART 5: PRIVATE LAND ELK LICENSE ALLOCATION

19.30.5.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.30.5.1 NMAC - Rp, 19.30.5.1 NMAC, 4-1-2019]

19.30.5.2 SCOPE:

To acknowledge landowners who provide meaningful benefit to elk and accept elk on their properties and to provide hunting opportunities on private and public land to all elk hunters who wish to recreate within New Mexico's exterior boundaries. Additional requirements may be found in Chapter 17 NMSA 1978 and Chapters 30, 31, 32 and 33 of Title 19 NMAC.

[19.30.5.2 NMAC - Rp, 19.30.5.2 NMAC, 4-1-2019]

19.30.5.3 STATUTORY AUTHORITY:

Section 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected mammals, birds and fish. Statute 17-3-14.1 NMSA 1978 authorizes the director to issue landowner permits for the lawful taking of elk.

[19.30.5.3 NMAC - Rp, 19.30.5.3 NMAC, 4-1-2019]

19.30.5.4 DURATION:

Permanent.

[19.30.5.4 NMAC - Rp, 19.30.5.4 NMAC, 4-1-2019]

19.30.5.5 EFFECTIVE DATE:

April 1, 2019, unless a later date is cited at the end of a section.

[19.30.5.5 NMAC - Rp, 19.30.5.5 NMAC, 4-1-2019]

19.30.5.6 OBJECTIVE:

Establish an equitable and flexible system that recognizes the contributions of private lands and landowners to the management of elk and their habitats, while providing hunting opportunities on private lands, and to support appropriate, biologically sound, and effective harvest goals set by the department for elk.

[19.30.5.6 NMAC - Rp, 19.30.5.6 NMAC, 4-1-2019]

19.30.5.7 DEFINITIONS:

A. "Annual agreement" or "Agreement" shall mean the document that contains the specific ranch information, sets forth the terms and conditions of the agreement, special instructions, requirements and regulations concerning participation in this program and affirms a signatory understanding of such.

B. "Authorization number" or "Authorization" shall mean a multi-digit number which allows the holder to purchase a private land elk license specifying sex and sporting arm type. May also collectively refer to types and numbers of private land elk hunting opportunities available in a game management unit or assigned to a recipient pool of elk hunting opportunities.

C. "Authorization statement" shall mean the document generated by the department and issued to an authorized ranch contact that contains the authorization numbers, which allows the holder to purchase a specified license to hunt elk.

D. "Authorized Ranch Contact" or "ARC" shall mean the person designated in writing by the landowner(s) to act as the liaison between the ranch and the department. ARC is responsible for acting in the landowner(s) best interest and has the authority to sign an elk private lands use system agreement and receive authorization statements. All persons listed on the recorded deed(s) must sign and notarize an authorization of ranch contact form provided by the department authorizing the same individual as the authorized ranch contact.

E. "Base allocation" shall mean the number and authorization types issued to base ranches through the allocation formula.

F. "Base ranch" shall mean a ranch in the primary management zone able to receive at least one whole authorization through the allocation formula based on weighted acreage and ranch score.

G. "Bonus allocation" shall mean the number and authorization types represented by private lands not participating in the elk private lands use system in the primary management zone, through the allocation formula.

H. "Co-op" shall mean more than one ranch enrolled by separate landowners and combined together to form a single ranch and naming a single ARC.

I. "Deeded acres" shall mean privately owned acres that can be verified by the department.

J. "Department" shall mean the New Mexico department of game and fish.

K. "Director" shall mean the director of the New Mexico department of game and fish.

L. "Elk Contribution Rating" or "ECR" shall mean the rating assigned to a ranch by appropriate department staff based on the following: occasional elk presence shall receive an ECR of 1, frequent elk presence shall receive an ECR of 1.25, continuous elk presence shall receive an ECR of 1.5.

M. "EPLUS" shall mean the elk private lands use system.

N. "Game Management Unit" or "GMU" shall mean those areas as described in 19.30.4 NMAC Boundary Descriptions for Game Management Units.

O. "Inactivation" shall mean the procedure that immediately stops all issuance of authorizations and suspends participation in the program.

P. "In review" shall mean a period of time during which an active ranch may be placed into temporary suspension, stopping agreements and authorization statements from being issued to the ARC, until the department review concludes that all participation requirements have been met.

Q. "Landowner" shall mean the person(s) listed on the most current recorded deed(s) being considered as a ranch for participation, is responsible for signing the initial application, and is responsible for assigning a single authorized ranch contact.

R. "Meaningful benefit" shall mean a variety of elk habitat components that are known to be beneficial to elk throughout at least one season and further determined by state game commission adopted participation guidelines.

S. "Participation guidelines" shall mean the written requirements for enrollment and participation in the program that department staff use to evaluate ranches and approved by the state game commission.

T. "Percent weighted acres" shall mean the quotient of a ranch's weighted acres divided by the total private acres in the primary management zone within a GMU.

U. "Primary management zone" shall mean areas of the state designated by the department upon which elk management goals and subsequent harvest objectives are based.

V. "Public land" shall mean those lands held by state, federal, or public land use agencies.

W. "Ranch" shall mean any deeded acres included in an agreement and treated as a single property.

X. "Ranch-only" shall mean a ranch whose ARC has selected the ranch-only hunting option as defined on their agreement or whose ranch is located in a GMU designated as ranch-only.

Y. "Ranch-only authorization number" shall mean a private land authorization that allows a person to purchase an elk license only valid on the designated ranch except as otherwise allowed by rule.

Z. "Ranch score" shall mean the score resulting from the ranches evaluation as defined in participation guidelines.

AA. "Secondary management zone" shall mean areas of the state that are not part of the primary management zone or special management zone.

AB. "Small Contributing Ranch" or "SCR" shall mean those ranches that meet the minimum qualifications to participate, but are unable to receive at least one whole authorization pursuant to the allocation formula based on weighted acreage alone.

AC. "SCR pool" shall mean the number and authorization types that result from the fractional consolidation of authorizations awarded to small contributing ranches through the allocation formula.

AD. "Special management zone" shall mean areas of the state not within the primary management zone or secondary management zone and where private land authorization issuance includes eligibility requirements or restrictions.

AE. "Two year unconverted" shall mean the number and authorization types initially allocated to participating properties but not converted to licenses averaged over the previous two license years.

AF. "Unit-wide" shall mean a ranch whose ARC has selected the unit-wide hunting option as defined on their agreement and received a unit-wide authorization(s) for the current license year. The unit-wide selection allows hunters who have a unit-wide license from the ranch to hunt any legally accessible public lands, other unit-wide ranches, and other private land with written permission within the GMU as well as allows any other licensed elk hunter with either a public draw license or a unit-wide elk license access to the unit-wide ranch.

AG. "Unit-wide authorization number" shall mean an authorization that allows a person to purchase an elk license valid on any legally accessible public lands, other unit-wide ranches, and other private land with written permission within the GMU.

AH. "Weighted acres" shall mean the product of a ranch's deeded acres multiplied by the elk contribution rating assigned to that ranch.

[19.30.5.7 NMAC - Rp, 19.30.5.7 NMAC, 4-1-2019]

19.30.5.8 PARTICIPATION REQUIREMENTS AND AUTHORIZATION DISTRIBUTION IN THE PRIMARY MANAGEMENT ZONE:

A. Minimum requirements:

- (1) Private lands that lie within the primary management zone.
- (2) Private lands that demonstrate regular elk use and provide meaningful benefits to elk as determined by appropriate department staff and in accordance with commission approved guidelines.
- (3) Only landowners and ARCs who agree in writing to accept elk on their property will be considered for participation in EPLUS.
- (4) Landowner and ARC must agree that participation is voluntary. Number of authorizations may vary annually and are based on GMU harvest objectives found in 19.31.14 NMAC. There is no guarantee of a specific number of authorizations issued each year.
- (5) Any property which is part of a subdivision, village or town that does not allow hunting or restricts the discharge of all sporting arm types will be disqualified from participation in EPLUS. All other properties within a subdivision, village or town will be considered on a case-by-case basis.

(6) The department encourages landowners whose properties do not qualify to cooperate with other landowners to create co-ops to meet minimum participation requirements.

B. Enrollment and initial application:

(1) Landowners who wish to participate in EPLUS must submit a completed application provided by the department. Applications must include all required documentation as determined by the department and name a single ARC. Only the property owner(s) listed on the recorded deed(s) may submit an initial EPLUS application and assign an ARC. If there are multiple owners listed on the property deed(s), all co-owners must sign an affidavit authorizing one of the owners to be responsible for the initial application.

(2) The application must include the most recent recorded property ownership records including property legal descriptions and maps or surveys sufficient to establish the legal landowner(s) and property boundaries.

(3) Application must be submitted to the department, hand delivered or post marked, no later than January 5 of each year. Applications received without all required documentation or hand delivered or postmarked after January 5 shall be rejected. Applications rejected as a result of missing documents may be corrected and resubmitted through February 1 to be included that year if the original application was submitted by the January 5 deadline. Exceptions may be made for extenuating circumstances on a case-by-case basis.

(4) Applications will be reviewed by appropriate department staff so a determination can be made as to the application satisfying the requirements set forth in Subsection A of 19.30.5.8 NMAC.

(5) Ranches meeting the requirements set forth in Subsection A of 19.30.5.8 NMAC will be assigned an elk contribution rating and must meet a minimum ranch score to be eligible for authorizations pursuant to the processes set forth in Subsection D of 19.30.5.8 NMAC.

(6) ARCs with ranches that do not meet the requirements set forth in Subsection A of 19.30.5.8 NMAC will be advised and provided options including the right to request a review of the department's decision as outlined in 19.30.5.12 NMAC.

C. Participating ranches:

(1) All ARCs for participating ranches will receive an agreement annually.

(2) The annual agreement will list the name, address, and phone number of the authorized ranch contact, the number of deeded acres considered, the ranch score and the elk contribution rating assigned. It will provide the opportunity to request a

review of the listed acreage, the ranch score and the assigned elk contribution rating. The agreement will set out the terms for participation and provide the ability to elect the ranch-only option. The annual agreement will require the ARC to notify the department of any changes affecting the ranch's enrollment or participation eligibility. The annual agreement must be signed and initialed by the ARC where designated and returned to the department via hand delivery or post marked no later than January 5 each year. Failure to meet these requirements will result in the agreement not being activated for the current license year. Exceptions may be made for extenuating circumstances on a case-by-case basis.

(3) Any ranch for which rightful ownership or legal representation cannot be determined shall be placed in review until such time as rightful ownership or legal representation is verified. If after one year, adequate documentation of ownership is not provided, the ranch will be inactivated.

(4) Landowners requesting to split their separately deeded properties currently under one ranch into separate ranches shall be required to submit a new application for each property. Ranches whose property is entirely contained on one deed may not be split.

(5) Upon the second consecutive year of non-receipt of the annual agreement, the department will inactivate the respective ranch until a new initial application has been submitted.

(6) Ranches that are sold or transferred to new ownership must apply as required for initial participation. The department may make reasonable accommodations in circumstances where transfer of ownership occurs after the January 5 deadline.

(7) Participating ranches that the department determines no longer qualify for participation shall be sent written notice of inactivation for the following license year.

(8) Appropriate department staff may adjust the elk contribution rating or ranch score for any participating ranch annually. In the case an adjustment is warranted, the ARC will be contacted and notified of the rating change.

(9) Any landowner who requests interventions to eliminate the presence of elk on their participating acreage in accordance with 19.30.2 NMAC shall be placed in review. If the depredation only applies to a portion of the ranch and the remaining acreage continues to provide meaningful benefit to elk, only the acreage where depredation response actions are to occur will be inactivated. Exceptions to this may be considered by appropriate department staff on a case-by-case basis.

(10) Should any landowner or ARC take action pursuant to Section 17-2-7.2 NMSA 1978 the ranch upon which the action occurred shall immediately be inactivated from EPLUS for a period of three years and all unconverted authorizations may be voided.

(11) All participating ranches will be subject to the requirements found in this section on an annual basis. Any change affecting a ranches qualifications for this program will result in that ranch being re-evaluated to determine if the ranch meets the minimum requirements.

D. Determination of authorizations:

(1) In each GMU, the pool of private land elk authorizations shall be comprised of the base allocation, bonus allocation, two year unconverted and SCR pool.

(2) A portion of the bonus allocations or two year unconverted, should they be available, may be distributed to specific ranches in the form of incentive authorizations issued in recognition of significant contributions to elk management.

(3) The base allocation per ranch will be set as follows:

(a) A ranch's deeded acres multiplied by that ranch's elk contribution rating equals ranch weighted acres.

(b) A ranch's weighted acres divided by the total private deeded acres in the GMUs primary management zone equals that ranches percent ranch weighted acres.

(c) Percent ranch weighted acres multiplied by the number of available private land elk authorizations for the GMU equals the number of authorizations per ranch.

(d) All ranches receiving at least one whole authorization through the allocation formula will be considered a base ranch and will receive a base allocation.

(e) When a ranch is unable to receive at least one whole authorization through the allocation formula, the ranch will become a SCR.

(f) The combined fractional authorizations from SCRs will comprise the allocations available in the SCR pool.

(4) Distribution of the SCR pool will be as follows:

(a) SCRs will compete in a yearly, random, drawing weighted on the ranches ranch score for authorizations.

(b) SCRs may receive not more than one authorization through the yearly, random drawing.

(c) Bonus allocations and two year unconverted authorizations remaining after the issuance of incentive authorizations will be added into the pool for the SCR drawing.

(5) Authorizations not distributed in the SCR draw will be redistributed to base ranches pursuant to the allocation formula.

(6) All authorizations issued to a ranch pursuant to this section will be:

(a) Considered unit-wide unless otherwise requested by the ARC, or

(b) In GMUs 4 and 5A, authorizations will be ranch-only but transferrable to other private lands within the specific GMU with written landowner permission.

E. Inactivation:

(1) A landowner or ARC, along with the ranch shall be inactivated for:

(a) providing or permitting misrepresentation of the ranch's participating deeded acreage, ranch ownership or designated ARC;

(b) prohibiting access to other unit-wide license holders or public draw hunting license holders; or

(c) the landowner or ARC violating Chapter 17 NMSA 1978 or state game commission rules involving licenses converted with the ranches' authorization(s), or being an accessory to the same, regardless of whether the violation occurred on or off the ranch, resulting in a violation(s) that accumulates 20 or more revocation points pursuant to 19.31.2 NMAC on any single individual.

(2) A landowner or ARC, along with the ranch may be inactivated for breaching or violating any other condition of the EPLUS agreement.

(3) Upon determination that a violation or breach of Paragraph 1 or Paragraph 2 of this Subsection or any other inactivation provision in 19.30.5.8 NMAC has occurred, the landowner and ARC shall be notified explaining the determination for the inactivation.

(4) Should the landowner or ARC have multiple properties in EPLUS, all properties may be inactivated from EPLUS and disqualified from participation in department sponsored programs.

(5) If a ranch is signed up in a co-op, inactivation action(s) may be taken against the co-op in its entirety or individual properties participating that form the co-op and will be considered on a case-by-case basis.

(6) If the inactivated ranch(s) changes ownership during the disqualification period, the department may consider the ranch for future participation.

(7) Inactivation from EPLUS and disqualification from department sponsored programs may be for a period up to three years.

(8) The landowner may request a review that shall be held in accordance with the processes set forth in 19.30.5.12 NMAC. The standard of proof in cases where no conviction is involved shall be the preponderance of evidence. If a conviction has been rendered, a certified copy or a filed copy of the conviction from any court of competent jurisdiction shall be conclusive evidence of a violation.

[19.30.5.8 NMAC - Rp, 19.30.5.8 NMAC, 4-1-2019]

19.30.5.9 PARTICIPATION REQUIREMENTS AND AUTHORIZATION DISTRIBUTION IN THE SPECIAL MANAGEMENT ZONE:

A. Minimum requirements:

- (1) Private lands that lie within the special management zone.
- (2) Private lands must provide demonstrated occasional elk use to be eligible.
- (3) Only landowners and ARCs who agree in writing to accept elk on their property will be considered for participation in EPLUS.
- (4) Landowner and ARC must agree that participation is voluntary. Number of authorizations may vary annually and are based on elk management objectives found in 19.31.14 NMAC. There is no guarantee of a specific number of authorizations issued each year.
- (5) Any property which is part of a subdivision, village or town that does not allow hunting or restricts the discharge of all sporting arm types will be disqualified from participation in EPLUS. All other properties within a subdivision, village or town will be considered on a case-by-case basis.

B. Enrollment and initial application:

- (1) Landowners who wish to participate in EPLUS must submit a completed application provided by the department. Applications must include all required documentation as determined by the department and name a single ARC. Only the property owner(s) listed on the recorded deed(s) may submit an initial EPLUS application and assign an ARC. If there are multiple owners listed on the property deed(s), all co-owners must sign an affidavit authorizing one of the owners to be responsible for the initial application.

(2) The application must include the most recent recorded property ownership records including property legal descriptions and maps or surveys sufficient to establish the legal landowner(s) and property boundaries.

(3) Applications may be submitted at any time.

(4) Applications will be reviewed by appropriate department staff so a determination can be made as to the application satisfying the requirements set forth in Subsection A of 19.30.5.9 NMAC. Applications received without all required documentation shall be rejected. Rejected applications may be corrected and resubmitted.

C. Participating ranches:

(1) All ARCs for participating ranches will receive an agreement annually.

(2) The annual agreement will list the name, address and phone number of the ARC and the number of deeded acres considered. It will provide the opportunity to request a review of the listed acreage. The agreement will set out the terms for participation. The annual agreement will require the ARC to notify the department of any changes affecting the ranch's enrollment or participation eligibility. The annual agreement must be signed and initialed by the ARC where designated and returned to the department each year. Failure to return the agreement will result in the agreement not being activated for the current license year.

(3) Any ranch for which rightful ownership or legal representation cannot be determined shall be placed in review until such time as rightful ownership or legal representation is verified. If after one year, adequate documentation of ownership is not provided the ranch will be inactivated.

(4) Ranches that are sold or transferred to new ownership must apply as required for initial participation.

(5) Any landowner who requests interventions to eliminate the presence of elk on their participating acreage in accordance with 19.30.2 NMAC shall be placed in review. Should the landowner enter into a depredation agreement with the department, the acreage where depredation response actions are to occur will be inactivated from EPLUS. Exceptions to this may be considered by appropriate department staff on a case-by-case basis.

(6) Should any landowner or ARC take action pursuant to Section 17-2-7.2 NMSA 1978 the ranch upon which the action occurred shall immediately be inactivated from EPLUS for a period of three years and all unconverted authorizations may be voided.

(7) All participating ranches will be subject to the requirements found in this section on an annual basis. Any change affecting a ranches qualifications for this program will result in that ranch being re-evaluated to determine if the ranch meets the minimum requirements.

D. Determination of authorizations:

(1) Authorizations within the special management zone will be determined on a ranch-by-ranch basis and negotiated between the department and the ARC.

(2) Bag limits, sporting arm type, and season dates will follow the provisions found in 19.31.14 NMAC in the special management zone. Season dates requested outside those found in 19.31.14 NMAC shall be considered on a ranch-by-ranch basis and not conflict with department management goals.

(3) All authorizations shall be ranch-only and transferrable to other private lands within the specified GMU with written landowner permission. Written permission requirements for access on private property will follow the provisions found in 19.31.10 NMAC.

E. Inactivation:

(1) A landowner or ARC, along with the ranch shall be inactivated for:

(a) providing or permitting misrepresentation of the ranch's participating deeded acreage, ranch ownership or designated ARC; or

(b) the landowner or ARC violating Chapter 17 NMSA 1978 or state game commission rules involving licenses converted with the ranch's authorization(s), or being an accessory to the same, regardless of whether the violation occurred on or off the ranch, resulting in a violation(s) that accumulates 20 or more revocation points pursuant to 19.31.2 NMAC on any single individual.

(2) A landowner or ARC, along with the ranch may be inactivated for breaching or violating any other condition of the EPLUS agreement.

(3) Upon determination that a violation or breach of Paragraph 1 or Paragraph 2 of this Subsection or any other inactivation provision in 19.30.5.9 NMAC has occurred, the landowner and ARC shall be notified explaining the determination for the inactivation.

(4) Should the landowner or ARC have multiple properties in EPLUS, all properties may be inactivated from EPLUS and disqualified from participation in department sponsored programs.

(5) If a ranch is signed up in a co-op, inactivation action(s) may be taken against the co-op in its entirety or individual properties participating that form the co-op and will be considered on a case-by-case basis.

(6) If the inactivated ranch(s) changes ownership during the disqualification period, the department may consider the ranch for future participation.

(7) Inactivation from EPLUS and disqualification from department sponsored programs may be for a period up to three years.

(8) The landowner may request a review that shall be held in accordance with the processes set forth in 19.30.5.12 NMAC. The standard of proof in cases where no conviction is involved shall be the preponderance of the evidence. If a conviction has been rendered, a certified copy or a filed copy of the conviction from any court of competent jurisdiction shall be conclusive evidence of a violation.

[19.30.5.11 NMAC - Rp, 19.30.5.9 NMAC, 4-1-2019]

19.30.5.10 PARTICIPATION REQUIREMENTS IN THE SECONDARY MANAGEMENT ZONE:

A. Minimum requirements: Private lands that lie within a secondary management zone.

B. Enrollment process:

(1) Land ownership documentation will be required that will verify the ranch lies within a secondary management zone.

(2) Requests for a ranch code may be submitted to the department at any time.

(3) Ranch ownership must be affirmed on an annual basis.

C. Bag limits, sporting arm type, and season dates will follow the provisions found in 19.31.14 NMAC in the secondary management zone. Season dates requested outside those found in 19.31.14 NMAC shall be considered on a ranch-by-ranch basis.

D. Ranches within the secondary management zone will be issued a ranch code annually to identify individual ownership.

E. A ranch code will be required to purchase a private land elk license for a specific ranch.

F. All licenses require written permission and shall be valid only on the specified property and transferrable with written permission to other private lands within the

specified GMU. Written permission requirements for access on private property will follow the provisions found in 19.31.10 NMAC.

[19.30.5.10 NMAC - N, 4-1-2019]

19.30.5.11 SPECIAL MANAGEMENT RANCH:

A. In the primary or special management zones, the department may identify unique ranches of any size as a special management ranch.

B. A department approved conservation plan will be required and developed in conjunction with the landowner and will include habitat improvement, population management, and harvest management goals as a minimum.

(1) Alternative season dates, bag limits, sporting arm types, and additional authorizations may be considered for these ranches.

(2) Authorizations issued pursuant to these management plans:

(a) Shall be ranch only and not transferrable to other private lands;

(b) Will be considered based on documented habitat improvements or maintenance of habitat enhancement projects or existing habitat quality;

(c) May be as a result of working directly with the department on special projects related to population management or research needs in the GMU; and

(d) Shall be allocated to assure elk management goals as stated in 19.31.14 NMAC are sustainable and appropriate within the GMU and on the participating ranch.

(3) The conservation plan must be updated and submitted by January 5 on an annual basis to be approved by the department.

[19.30.5.12 NMAC - Rp, 19.30.5.11 NMAC, 4-1-2019]

19.30.5.12 LANDOWNER RIGHT TO REVIEW:

A. Landowners or ARCs for participating ranches shall have the right to request a review of the following:

(1) The number of deeded acres.

(2) The elk contribution rating assigned to the ranch.

(3) The ranch score.

(4) A decision by the department that a ranch does not meet the minimum requirements to participate.

(5) Other inactivation provisions within 19.30.5 NMAC.

B. Requests to review deeded acres, ranch score, or the elk contribution rating shall be submitted on the annual agreement.

C. ARCs for newly applying ranches or existing ranches that the department determines do not meet the minimum requirements to participate per commission approved guidelines will be given the opportunity to request a review of the department's finding.

D. All review requests will be submitted to the EPLUS manager and handled in accordance below:

(1) All ranches that the department determines do not meet the minimum participation requirements or have been inactivated for other provisions within 19.30.5 NMAC will be sent a letter explaining the determination along with an objection form explaining documentation requirements.

(2) ARCs who wish to request a review of the department's determination must complete and return the objection form along with all requested documentation within 30 days of the date on the department's letter.

(3) Upon receipt of the requested documentation the department will assign staff to re-evaluate the ranch in question. The department shall have 45 days to complete this evaluation.

(4) If the second evaluation shows the ranch meets the minimum participation requirements or if the inactivation was not warranted the ARC will be sent a follow up letter and the ranch will be allowed to participate in the program.

(5) If, after a second evaluation, it is determined that the ranch still does not meet participation requirements the ARC will be sent a follow up letter explaining the determination.

(6) The ARC may submit a letter to the EPLUS manager requesting a division evaluation should they feel the second decision is in error. The ARC may submit any additional documents or a written statement along with the request for the evaluation. This request and any additional documents must be received by the department within 30 days of the date on the department's second evaluation letter.

(7) A division evaluation will be conducted by the division chief of the wildlife management division or his or her designee(s) and will be designed to ensure that commission approved guidelines and the intent of this rule have been appropriately

applied to the ranch in question. A recommendation as to ranch's participation eligibility will be sent to the director.

(8) The ARC will be notified in writing of the determination made by the director within 45 days of the submission of the ARC letter.

(9) The ARC may submit a letter within 30 days of the date on the department's letter regarding the director's decision to the EPLUS manager requesting a commission evaluation should they feel the director's decision is in error.

(10) The commission shall review the director's determination during a scheduled commission meeting. Within 20 days after the commission's decision is rendered and signed by the chairperson of the commission, the department shall provide the ARC with the written determination which will stand as the final decision of the department.

[19.30.5.13 NMAC - Rp, 19.30.5.12 NMAC, 4-1-2019]

19.30.5.13 DEPARTMENT RIGHT TO REQUEST UPDATED DOCUMENTATION AND CONDUCT AUDITS:

A. The department reserves the right to request the submission of complete ownership documentation at any time during the year should an audit determine that documents are missing or participation requirements are in question.

(1) Should necessary documentation be found missing resulting from any audit, the ranch will be placed in review and documents will be requested.

(2) The department request for updated documents may include but is not limited to the most recent recorded property ownership records showing clear ownership and include property legal descriptions and maps or surveys that will establish the legal landowner(s) and property boundaries.

B. Failure to respond to the initial document request shall result in the ranch remaining in review until:

(1) The requested documents are received and verified; and

(2) Authorizations can be issued without affecting the allocation of other participating ranches.

C. If after one year, adequate documentation of ownership is not provided, the ranch will be inactivated.

PART 6: PREDATOR MANAGEMENT [REPEALED]

[This part was repealed on April 1, 2007.]

PART 7: QUALITY HUNT CRITERIA AND AREAS [REPEALED]

[This part was repealed on April 1, 2007.]

PART 8: GUIDE AND OUTFITTER REGISTRATION

19.30.8.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.30.8.1 NMAC - Rp, 19.30.8.1 NMAC, 01/01/2018]

19.30.8.2 SCOPE:

Hunting outfitters, guides, and hunters for New Mexico.

[19.30.8.2 NMAC - Rp, 19.30.8.2 NMAC, 01/01/2018]

19.30.8.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species. Additional authority may be found in Sections 17-2A-1, 17-2A-3 and 17-3-16 NMSA 1978.

[19.30.8.3 NMAC - Rp, 19.30.8.3 NMAC, 01/01/2018]

19.30.8.4 DURATION:

Permanent.

[19.30.8.4 NMAC - Rp, 19.30.8.4 NMAC, 01/01/2018]

19.30.8.5 EFFECTIVE DATE:

January 01, 2018, unless a later date is cited at the end of a section.

[19.30.8.5 NMAC - Rp, 19.30.8.5 NMAC, 01/01/2018]

19.30.8.6 OBJECTIVE:

To register, regulate and set professional standards for guides, outfitters and their operations within New Mexico.

[19.30.8.6 NMAC - Rp, 19.30.8.6 NMAC, 01/01/2018]

19.30.8.7 DEFINITIONS:

A. "Accompanied" shall mean that the outfitter or their registered guide physically escorts the hunter-client in the field during the hunter-client's license hunt dates.

B. "Agent" shall mean a person who is legally authorized by employment or written contract to act on behalf of a private landowner to oversee the landowner's hunting operation on their deeded property.

C. "Conviction" shall mean any adjudication of guilt; plea of guilty or nolo contendere accepted by the court; or payment of a fine, court cost, court order, penalty assessment or forfeiture of collateral; regardless of whether sentencing or imposition of sentencing has been deferred or suspended.

D. "Department" shall mean the New Mexico department of game and fish.

E. "Director" shall mean the director of the department of game and fish.

F. "Guide" shall mean any person contracted, employed or accepting compensation for providing, within the unit where a hunt occurs, equipment or services for hunting activities; provided, however, that "guide" does not include a person who only cooks, cuts wood or performs other comparable or incidental duties not directly related to hunting activities.

G. "History of violation" shall mean any one conviction or multiple convictions from any law enforcement agency for violation(s) of hunting, fishing, trapping, outfitting or guiding rules or land-use regulations, including any conviction as an accessory, during the three-year period immediately preceding the application for registration, provided that the violation committed, if committed in New Mexico, would equal or exceed the 20-point equivalent.

H. "Hunter-client" shall mean an individual who contracts or utilizes the hunting services of a registered outfitter or is taken into the field by a person acting as an outfitter or guide regardless of their registration status.

I. "Landowner permit" shall be a license issued pursuant to a landowner authorization.

J. "License year" shall mean that period beginning April 1 and ending March 31 each year for the purposes of hunting or outfitter and guide registration.

K. "New Mexico outfitter" shall mean an outfitter that is qualified by the department in accordance with 19.30.8.9 NMAC to participate in the special drawing pool by utilizing their outfitter number as established by Section 17-3-16 NMSA 1978.

L. "Outfitter" shall mean any person who advertises or holds themselves out to the public for hire or is employed or accepts compensation for providing, within the unit where a hunt occurs, facilities, equipment or services for hunting activities; provided, however, that "outfitter" does not include a person who only cooks, cuts wood or performs other comparable or incidental duties not directly related to hunting activities. Any person who purchases landowner permits or private land licenses for a hunter-client or pays for access to a landowner's deeded property for a hunter-client in any way, shall be considered an outfitter.

M. "Registered outfitter" shall be an outfitter who has met all the requirements described herein and has been issued a current registration by the department.

N. "Special drawing pool" shall refer to the ten percent allocation of special draw licenses available to the public who have contracted with a qualified New Mexico outfitter to provide professional guide services.

O. "Supervision" shall mean that outfitters are required to ensure all guides employed or contracted by them are informed of all pertinent geographic hunt boundaries, any special restrictions which apply to their hunter-clients license and statutes and rules regarding lawful hunting, guiding and outfitting. Supervision also means that outfitters have provided all the guidance and oversight that a reasonable business person would provide to their employees.

[19.30.8.7 NMAC - Rp, 19.30.8.7 NMAC, 01/01/2018]

19.30.8.8 GENERAL REGISTRATION PROCEDURES AND REQUIREMENTS:

In addition to the requirements set in Sections 17-2A-1, 17-2A-3 and 17-3-16 NMSA 1978 the following requirements apply;

A. Application form: Applications to guide and outfit as defined in Section 17-2A-3 NMSA 1978 and 19.30.8 NMAC shall be made on forms provided by the department as prescribed by the director.

B. Application deadlines: An outfitter or guide may register at any time by completing and submitting the proper application form and fee. No one shall be a registered outfitter or guide until they successfully complete all requirements and are issued a valid registration by the department. Exception:

(1) Deadline date to qualify as a New Mexico outfitter for special drawing pool: All New Mexico outfitter applicants must apply by February 15 to be eligible to

participate in the special drawing pool of resident/nonresident hunter applicants for the next hunting season.

(2) New Mexico outfitter late fee: All New Mexico outfitter applications received after February 15 but before the close of business on March 15 will be subject to an administrative fee of \$100 in addition to the normal application fees.

(3) New Mexico outfitter ineligibility: An applicant for a New Mexico outfitter that fails to successfully complete the department's process by close of business on March 15 will be ineligible to have a hunter-client use their registration number for the special drawing pool established in Section 17-3-16 NMSA 1978.

C. All outfitter and guide applicants shall have successfully completed a certified hunter education course from the state of New Mexico or other similar qualifying hunter education course acceptable to the department prior to making application.

D. Outfitter and guide applicants cannot have a history of violation.

E. No person shall be allowed to register or work as a registered hunting guide or outfitter in New Mexico:

(1) if the person has had a guide or outfitter license, registration, permit or certificate revoked in another state;

(2) if the person has had a guide or outfitter license, registration, permit or certificate suspended in another state and it has not been reinstated;

(3) if the person has been convicted of a felony, no matter when the felony was committed;

(4) An outfitter or guide's registration shall be immediately invalid when any of Paragraph 1 thru 3 of Subsection E of 19.30.8.8 NMAC apply. The outfitter or guide registration may be reinstated if the conviction, revocation or suspension is reversed during the year in which they were originally registered.

F. Outfitter and guide applicants, including renewing applicants, shall not have had their guide or outfitter's license, permit authorization or registration revoked or denied for cause by any controlling government land management agency. The applicant shall not be registered by the state during the term of the revocation or pendency of the denial.

G. Examinations for guiding and outfitting:

(1) Exams will be conducted during posted testing periods at department offices or by appointment, at any location approved by the guide and outfitter registrar.

(2) An applicant shall only be allowed to take the examination once per day.

(3) Applicant must successfully pass a department approved examination with a minimum passing grade of seventy percent.

(4) If an applicant fails to renew their registration for two or more years, all registration requirements must be completed, including successfully passing a department approved exam prior to being registered.

H. Applicants for a guide's registration shall be at least 18 years of age and meet all the qualifications for guides set forth in 19.30.8 NMAC and in Section 17-2A-3 NMSA 1978.

I. Additional outfitter registration requirements:

(1) Applicants for an outfitter registration shall be at least 21 years of age and meet all the qualifications for outfitters set forth in 19.30.8 NMAC, Sections 17-2A-3 and 17-3-16 NMSA 1978.

(2) Applicants for an outfitter registration must have operated as a New Mexico registered guide for three years. Applicant must submit evidence, as approved by and to the satisfaction of the department, of three years of actual guiding experience and substantial knowledge of guiding in New Mexico for a register outfitter. The evidence must be submitted with the application and may consist of federal land use permits, business or employment records from the registered outfitter and a letter from said registered outfitter attesting to the applicants guiding experience.

(3) Applicant shall register with the taxation and revenue department and provide proof of registration and compliance to the department.

J. Each guide or outfitter shall carry proof of registration in the field and provide such proof upon request.

K. Registration exemption: A landowner or their agent who is guiding or outfitting on the landowner's deeded property or pursuant to a landowner permit is exempt from the department's registration process. Nothing in this exemption shall prevent a landowner or their agent from registering, if they choose. Agents may not act independently from the landowner. A landowner or their agent must be in compliance with the registration requirements of any pertinent government land management agency when involved with commercial activities on lands controlled or administered by a government land management agency.

L. All outfitter and guide applicants, including renewing applicants, shall submit to the department any additional documentation requested by the department.

[19.30.8.8 NMAC - Rp, 19.30.8.8 NMAC, 01/01/2018]

19.30.8.9 ADDITIONAL REQUIREMENTS TO BECOME A NEW MEXICO OUTFITTER:

A. To qualify as a New Mexico outfitter as a corporation, LLC or similar status: a New Mexico outfitter is a person who has a business:

- (1) with a valid New Mexico state, county or municipal business registration and a valid outfitter license issued by the department of game and fish;
- (2) that is authorized to do and is doing outfitting business under the laws of this state;
- (3) that has paid property taxes or rent on real property in New Mexico, paid gross receipts taxes and paid at least one other tax administered by the taxation and revenue department in each of the three years immediately preceding the submission of an affidavit to the department of game and fish;
- (4) the majority of which is owned by the person who has resided in New Mexico during the three-year period immediately preceding the submission of an affidavit to the department of game and fish;
- (5) that employs at least eighty percent of the total personnel of the business who are New Mexico residents;
- (6) that has either leased property for ten years or purchased property greater than \$50,000 in value in New Mexico;
- (7) that, if it has changed its name from that of a previously certified business, the business is identical in every way to the previously certified business that meets all criteria;
- (8) that possesses all required federal or state land use permits for the hunt; and
- (9) that operates as a hunting guide service during which at least two days are accompanied with the client in the area where the license is valid.

B. To qualify as a New Mexico outfitter as a sole proprietor business: a New Mexico outfitter is a person who has a business:

- (1) with a valid New Mexico state, county or municipal business registration and a valid outfitter license issued by the department of game and fish;
- (2) that is authorized to do and is doing outfitting business under the laws of this state;

(3) that, if it has changed its name from that of a previously certified business, the business is identical in every way to the previously certified business that meets all criteria;

(4) that possesses all required federal or state land use permits for the hunt; and

(5) that operates as a hunting guide service during which at least two days are accompanied with the client in the area where the license is valid.

[19.30.8.9 NMAC - Rp, 19.30.8.9 NMAC, 01/01/2018]

19.30.8.10 OUTFITTER INSURANCE REQUIREMENTS:

A. An outfitter applicant shall submit with their application a certificate of commercial liability insurance of at least \$500,000 from an insurance company stating they will insure the applicant for the current license year.

B. A copy of the insurance certificate that indicates who is insured, effective dates, policy number and amounts of coverage, must be provided to the department upon issuance by the insurer and prior to engaging in any outfitting activity.

C. Failure to provide proof of coverage during the registration period shall result in suspension of the registration for the period in which such insurance is required to be maintained.

(1) If an outfitter applicant or a registered outfitter fails to submit a copy of a valid insurance certificate before the insurance certificate on file with the department expires, the non-compliance notice will be sent to the outfitter by the department. The outfitter shall be required to submit a copy of a valid insurance certificate and a \$50 administrative fee. No outfitter will be registered until the administrative fee has been paid in full.

(2) If the outfitter fails to comply with the non-compliance notice; the department shall issue the outfitter a notice of contemplated commission action. The outfitter shall then be required to submit a copy of a valid insurance certificate and a \$250 administrative fee. No outfitter will be registered until the administrative fee has been paid in full.

(3) If the insurance is not in effect, at any time while conducting any outfitting activity as defined herein, the outfitter's registration will be declared void and the outfitter's registration shall be suspended until a valid insurance certificate and administrative fees are satisfied.

[19.30.8.10 NMAC - Rp, 19.30.8.9 NMAC, 01/01/2018]

19.30.8.11 REGISTRATION FEES:

A. The payment of the annual registration fee for an outfitter or guide is required prior to registration, including any reinstatement or administrative fees.

(1) The annual registration fee for a registered guide in New Mexico is \$50 for a resident and \$100 for a nonresident.

(2) The annual registration fee to be a registered outfitter in New Mexico is \$500 for either a resident or a nonresident.

B. All registration fees, except a \$50 administrative fee, may be refunded if an applicant is rejected or fails to complete the registration process. No other refunds shall be permitted.

C. Emergency fee and criteria: In an emergency situation, a temporary guide registration may be issued by the department.

(1) The fee shall be \$10.

(2) A guide registered pursuant to the emergency situation may only be used once in a license year by the registered outfitter requesting the replacement of a registered guide who has become ill, injured or has a bona fide emergency.

(3) The temporary registration is only valid for seven days and may be renewed only once per emergency situation.

(4) The temporary guide registration may not be used to accommodate additional hunter-clients.

[19.30.8.11 NMAC - N, 01/01/2018]

19.30.8.12 CONTRACTS:

A. A New Mexico outfitter shall execute a written contract with each special drawing pool applicant. The contract must be signed and dated by all parties prior to application for any special drawing pool license. New Mexico outfitters who execute a multi-year application contract shall be required to sign an updated contract with the hunter-client every three years from the initial signature date.

B. All outfitters shall execute a written contract with each hunter-client. The contract must be signed and dated by all parties before the hunt begins and shall designate the terms, guide to hunter-client ratio, hunt dates, compensation charged and services to be provided.

C. All outfitters shall have a copy of the contract available for inspection by the department in the field during the hunt or they must submit an electronic copy of the contract to the department's guide and outfitter registrar at least 48 hours prior to the scheduled hunt. A hunter-client who obtains a license through the special drawing pool, and chooses to hunt beyond their contracted hunt dates must carry a copy of the contract while hunting if it had not been submitted electronically to the registrar at least 48 hours prior to the scheduled hunt.

D. All contracts shall be retained by the outfitter for three years from the latest date signed by each party.

E. All outfitters shall provide any contract to the department upon request.

F. A New Mexico outfitter shall ensure that each hunter-client who obtains a license through the special drawing pool is accompanied by the outfitter or their registered guide for at least two days during the contracted dates of the hunt in the area where the hunter-client's license is valid. An outfitter or guide cannot contract with themselves to apply in the special drawing pool. An outfitter or guide who obtains a license through the special drawing pool is not allowed to guide themselves during their hunt.

G. A New Mexico outfitter may release a contracted hunter-client to another New Mexico outfitter provided that the original contract was valid, in place prior to the application deadline and only if it is mutually agreed upon by all parties. The release shall be in writing and shall be signed by all parties. A hunter-client must enter into a new contract with a New Mexico outfitter prior to hunting. Hunter-client licenses obtained through the special drawing pool are not valid unless the hunter-client is accompanied by a New Mexico outfitter or their registered guide.

H. All outfitters shall provide at least one registered guide or outfitter in the field for every four or fewer hunter-clients who are contracted for guided hunting services with the outfitter.

[19.30.8.12 NMAC - Rp, 19.30.8.11 NMAC, 01/01/2018]

19.30.8.13 OUTFITTER OR GUIDE MISCONDUCT:

A. Misrepresentation: An outfitter or guide shall not engage in fraud, deceit, misrepresentation or concealment of any material fact in advertising, soliciting or providing professional services to the hunter-client or the public, as determined by a court of competent jurisdiction.

B. Failure to report illegal activity: An outfitter or guide shall report illegal hunting activities or any violation of local, state or federal law relating to hunting, fishing, trapping, outfitting, guiding or land management that they have witnessed or have been made aware of to any commissioned conservation officer or to the appropriate law enforcement agency as soon as it is feasible to do so.

C. Failure to comply: An outfitter or guide shall comply with all local, state and federal laws and regulations pertaining to hunting, fishing, trapping, outfitting, guiding or land management. Conviction of any local, state and federal laws and regulations pertaining to hunting, fishing, trapping, outfitting, guiding or land management for which points have not already been assessed shall be misconduct.

D. Breach of contract: An outfitter or guide shall not breach a contract, as determined by a court of competent jurisdiction, with any person using outfitting or guiding services of the outfitter.

E. Failure to comply with registration audit or conditions: An outfitter or guide, including a renewing applicant, shall submit to the department any documentation requested by the department within the specified timeframe or deadline set by the department.

F. Failure to disclose: An outfitter or guide applicant shall not submit false or fraudulent documentation or statements or knowingly omit required information in connection with an application for registration or renewal.

G. Failure to supervise guides: Outfitters shall responsibly supervise each registered guide working under the outfitter's direction.

[19.30.8.13 NMAC - Rp, 19.30.8.12 NMAC, 01/01/2018]

19.30.8.14 CRIMINAL VIOLATIONS:

A. It is unlawful to apply for or receive an outfitter or guide registration while on revocation.

B. It is unlawful for a guide to book or service a hunter-client unless employed or contracted to do so by a registered outfitter.

C. It is unlawful to use an outfitter or guide registration issued to another.

D. It is unlawful for an outfitter to allow or use an unregistered person to perform outfitting or guiding services for the outfitter.

E. It is unlawful for any person to guide or outfit in New Mexico without completing all requirements and possessing a current registration from the department. Each guide or outfitter shall carry proof of registration in the field and provide such proof upon request.

F. It is unlawful to apply in the special drawing pool using a New Mexico outfitter number prior to having a valid, signed contract with the same New Mexico outfitter.

G. It is unlawful for a New Mexico outfitter to knowingly allow a hunter-client to apply in the special drawing pool prior to having a valid, signed contract.

H. It is unlawful to hunt with a license obtained through the special drawing pool without being accompanied by, and contracted with, a New Mexico outfitter or their guide for at least two days during the hunt.

I. It is unlawful for any outfitter to not have a valid, signed contract with each hunter-client as prescribed in 19.30.8.12 NMAC.

J. It is unlawful for any outfitter to refuse or fail to produce a contract when requested by the department.

K. It is unlawful for any person to submit an application for any hunt or for any person to counsel, aid or abet any person in submitting an application for any hunt in the special drawing pool with an unregistered or unqualified outfitter number.

L. It is unlawful for an outfitter or guide to have more than four hunter-clients in the field for each registered guide or outfitter.

M. It is unlawful for an outfitter or guide to contract with themselves or to guide themselves using a special drawing pool license.

[19.30.8.14 NMAC - Rp, 19.30.8.17 NMAC, 01/01/2018]

19.30.8.15 REVOCATION POINT SYSTEM:

Any person in violation of this section is subject to revocation and point assessments pursuant to 19.31.2 NMAC.

[19.30.8.15 NMAC - Rp, 19.30.8.16 NMAC, 01/01/2018]

19.30.8.16 CRIMINAL PENALTY PROVIDED:

A violation of any criminal provision of this rule or Sections 17-2A-1 and 17-2A-3 NMSA 1978 that is a criminal violation, is a misdemeanor and shall be punished in accordance with the provisions of Section 17-2-10 NMSA 1978.

[19.30.8.16 NMAC - Rp, 19.30.8.17 NMAC, 01/01/2018]

19.30.8.17 HEARING REQUESTED:

A registration revocation hearing may be requested and will be provided in accordance with 19.31.2 NMAC.

[19.30.8.17 NMAC - Rp, 19.30.8.18 NMAC, 01/01/2018]

PART 9: GAME AND FISH LICENSES/PERMITS

19.30.9.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.30.9.1 NMAC - Rp, 19.30.9.1 NMAC, 4/1/2020]

19.30.9.2 SCOPE:

License vendors and individuals utilizing the special use of wildlife licenses and permits.

[19.30.9.2 NMAC - Rp, 19.30.9.2 NMAC, 4/1/2020]

19.30.9.3 STATUTORY AUTHORITY:

Sections 17-1-14, 17-3-5, 17-3-7, and 17-3-12 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17, NMSA 1978 and all other acts pertaining to protected species.

[19.30.9.3 NMAC - Rp, 19.30.9.3 NMAC, 4/1/2020]

19.30.9.4 DURATION:

Permanent.

[19.30.9.4 NMAC - Rp, 19.30.9.4 NMAC, 4/1/2020]

19.30.9.5 EFFECTIVE DATE:

April 1, 2020, unless a later date is cited at the end of a section.

[19.30.9.5 NMAC - Rp, 19.30.9.5 NMAC, 4/1/2020]

19.30.9.6 OBJECTIVE:

Establishing eligibility and application requirements, procedures and financial obligations of license vendors, and certain licenses, permits, certificates and fees for special uses of wildlife, draw applications and license purchases.

[19.30.9.6 NMAC - Rp, 19.30.9.6 NMAC, 4/1/2020]

19.30.9.7 DEFINITIONS:

A. "Vendor" shall mean any owner(s) of a private or public business concern authorized by the New Mexico department of game and fish to sell license documents.

B. "Carcass tag" shall mean any tag form provided to the vendor by the Department of Game and Fish that authorizes a person to legally possess big-game species or turkey killed in New Mexico.

C. "Financial obligation" shall mean any dollar value owed to the Department, including penalty fees for unreturned carcass tags and payments for cash sales.

D. "License year" shall mean the period of April 1 through March 31.

E. "Hearing officer" shall mean the official designated by the department for the purpose of conducting revocation hearings and providing recommendations to the state game commission, relating to the suspension of hunting and fishing license vendors.

[19.30.9.7 NMAC - Rp, 19.30.9.7 NMAC, 4/1/2020]

19.30.9.8 LICENSE VENDORS:

A. Financial Obligations to the Department of Game and Fish:

(1) The department will consign carcass tags to each vendor prior to the beginning of each license year, and will conduct an audit at the end of the license year to account for all carcass tags not issued to customers. All carcass tags designated unusable in any month during the license year must be returned to the department no later than the 10th day of the next month, and all blank, unused carcass tags must be returned to the department at the end of the license year no later than May 10.

(2) A fee of \$100 per missing carcass tag shall be levied upon the license vendor for failure to return any carcass tag designated unusable or any blank, unused carcass tag as required.

(3) Each vendor accepting cash payments, must submit payment for cash sales to the department every two weeks or when the total amount due (including license and vendor fees) reaches \$5,000, whichever comes first.

(4) If a vendor is more than five days delinquent in its payment for cash sales, the privilege to accept cash for department licenses and permits shall be immediately suspended, and the department shall only reactivate the vendor's full license sale privilege once payment is received in full.

(5) A vendor that is delinquent more than three times in a license year shall be evaluated by the director, who shall determine whether to suspend, restrict or place conditions on the vendor's privileges pursuant to Subsection C of 19.30.9.8 NMAC.

(6) Any vendor that has their privileges suspended, restricted, or conditioned may request a hearing before a hearing officer to appeal the director's determination. Any vendor that does not request a hearing agrees to pay to the department the appropriate amount as specified in Paragraphs 1-3 of Subsection A of 19.30.9.8 NMAC within ten (10) working days and to comply with the director's determination. If a vendor requests a hearing as provided by this rule, the department, within 20 days of receipt of such request, shall notify the vendor of the time and place of the hearing and the name or names of the person or persons who shall conduct the hearing for the commission. The hearing shall be held not more than 90 or less than 30 days from the date of service of such notice unless a continuance is granted to either party by the hearing officer.

(7) In the case of unusual mitigating or extraordinary circumstances, the state game commission may determine, and the hearing officer may recommend, financial obligation in an amount other than the amounts described in Paragraphs 1-3 of Subsection A of 19.30.9.8 NMAC. The decision of the state game commission shall be final.

(8) Vendors, whether active or inactive, shall meet all financial obligations due to the department. Costs to collect overdue financial obligations may be added to the total obligation.

B. Vendor eligibility, application and procedures:

(1) Each vendor must sign a current license vendor agreement with the department on a form approved by the department annually.

(2) Each vendor shall participate in the department's web-based sales system and follow the procedures set forth in the most current New Mexico department of game and fish license vendor manual and vendor agreement.

(3) Each new vendor, or any vendor who has been inactive for one year or more, shall submit a vendor application form, a current credit score (provided by a credit reporting company), and shall be subject to a background check conducted by the department.

(4) A vendor applicant's ability to meet the financial obligations herein shall be evaluated and their privileges may be subject to restrictions or conditions pursuant to Subsection C of 19.30.9.8 NMAC.

(5) A vendor applicant who has a felony conviction may be subject to restrictions or conditions placed on their vendor privileges pursuant to Subsection C of 19.30.9.8 NMAC.

(6) A vendor applicant who has their hunting, fishing or trapping license privileges currently revoked or suspended or who has an outstanding civil assessment owed to the department shall be ineligible to be a vendor.

(7) A vendor applicant who wishes to challenge any eligibility determination under this rule, may appeal to the director whose determination will be final and not subject to further appeal.

C. Director's authority: The director may suspend, restrict or place conditions, including requiring a surety bond, on a license vendor's privileges if the vendor is found to be in violation of their vendor agreement or delinquent in their financial obligation to the department. If such a determination is made, a notice of the suspension, restriction(s), or condition(s) shall be sent to the vendor within 10 days of the director's determination. A vendor may request a hearing pursuant to this rule to challenge the determination.

D. Vendor fee:

(1) The department will pay the vendor fees earned by the vendor for the previous month license sales, no later the 10th business day of the next month, to the vendor,

(2) The vendor shall be required to be registered in the state of New Mexico's central accounting system.

[19.30.9.8 NMAC - Rp, 19.30.9.8 NMAC, 4/1/2020]

19.30.9.9 ESTABLISHING CERTAIN LICENSES, PERMITS, CERTIFICATES AND FEES:

Type	Further description	Fee
Certificate of application	NM resident draw application fee	\$7.00
	Non-resident draw application fee	\$13.00
Wildlife conservation stamp	Share with wildlife	\$10.00
Duplicate license		\$6.00
Landowner authorization certificate		\$9.00
Migratory bird permit	Harvest information program (HIP)	\$0.00
Big game depredation damage stamp	NM resident	\$3.00
	Non-resident	\$10.00
Public land user stamp	Habitat stamp	\$5.00
Bait dealers		\$21.00

Commercial fishing		\$25.00
Importation fish	Annual application processing fee	\$25.00
	Additional stocking and shipment fee	\$6.00
Retention		\$1.25
Transportation		\$0.00
Triploid grass carp		\$25.00
Airborne hunting		\$10.00
Class A lake aquaculture/recirculating water system	Up to 75 fish or 750 gallons	\$20.00
	76 to 150 fish or 751 to 1500 gallons	\$40.00
	Over 150 fish or over 1500 gallons	\$100.00
Call pen		\$15.00
Class A lake		\$101.00
Class A lake	Additional lake	\$26.00
Class A park		\$501.00
Commercial collecting	Reptiles and amphibians	\$50.00
Educational use of wildlife	Application, renewal or amendment	\$15.00
Falconry	Application or renewal for 3 years	\$25.00
Field trial/importation		\$15.00
Game bird propagation		\$10.00
Protected mammal		\$10.00
Scientific use of wildlife	Application	\$15.00
	Renewal or amendment	\$15.00
Shooting preserve		\$200.00
Zoo	No fee	\$0.00
Importation non-domesticated animals per calendar year (1/1 to 12/31) except protected ungulates, game birds, fish or other	Class 1 importation of 1 to 5 animals	\$25.00
	Class 2 importation of 6 to 99 animals	\$75.00
	Class 3 importation of greater than 100 animals	\$300.00
Importation other	One time import (i.e., temporary importation, exhibition, game birds, restoration/recovery, etc.)	\$20.00
Importation protected ungulate	Initial application/source & up to 2 animals (valid 6 months)	\$500.00

	For additional animals, not to exceed 30 ungulates from the same source property/owner (if no acquisitions to source herd during 6 month period of validity)	\$50.00 per animal
	For greater than 30 ungulates from the same source property/owner (if no acquisitions to source herd during 6 months period of validity).	\$5.00 per animal

[19.30.9.9 NMAC - Rp, 19.30.9.9 NMAC, 4/1/2020]

PART 10: NEW MEXICO HUNTER-TRAPPER REPORTING SYSTEM

19.30.10.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.30.10.1 NMAC - Rp, 19.30.10.1 NMAC, 7-15-13]

19.30.10.2 SCOPE:

New Mexico hunters and furbearer hunters and trappers.

[19.30.10.2 NMAC - Rp, 19.30.10.2 NMAC, 7-15-13]

19.30.10.3 STATUTORY AUTHORITY:

17-1-14, 17-3-5, 17-3-7, and 17-3-12 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species.

[19.30.10.3 NMAC - Rp, 19.30.10.3 NMAC, 7-15-13]

19.30.10.4 DURATION:

Permanent.

[19.30.10.4 NMAC - Rp, 19.30.10.4 NMAC, 7-15-13]

19.30.10.5 EFFECTIVE DATE:

July 15, 2013, unless a later date is cited at the end of a section.

[19.30.10.5 NMAC - Rp, 19.30.10.5 NMAC, 7-15-13]

19.30.10.6 OBJECTIVE:

Establishing a system to collect hunting and trapping information from persons buying certain hunting and trapping licenses in New Mexico.

[19.30.10.6 NMAC - Rp, 19.30.10.6 NMAC, 7-15-13]

19.30.10.7 DEFINITIONS:

A. "Confirmation code" shall mean a unique alpha-numeric code that identifies a specific transaction of information.

B. "Department" shall mean the New Mexico department of game and fish.

C. "Hunting or trapping report" shall mean the provision of required information, as determined by the department, by any person licensed or permitted to hunt deer, elk, pronghorn antelope, javelina, Barbary sheep, oryx, Persian ibex and turkey or hunt and trap furbearers in New Mexico, regarding their hunting or trapping activities.

D. "Landowner authorization" shall mean the document generated by the department and issued to a private landowner that authorizes the holder to purchase a specified license.

E. "Private land only deer hunters" shall mean persons that hunt deer during designated private land only hunts.

F. "Special entry hunt" shall mean hunts where hunter numbers are limited by rule and application for license or permit is required.

G. "Application" shall mean any form, approved by the department that requires an individual to supply information that may result in the issuance of a hunting or trapping license or permit.

I. "Application rejected" shall mean that applications for hunting licenses or permits may be rejected by the department pursuant to Subsection H of 19.31.3.8 NMAC, including hunting and trapping activity reporting requirements established herein.

J. "Customer identification number" or "CIN" shall mean that number permanently assigned by the department to uniquely identify a person purchasing a permit or license from the department.

[19.30.10.7 NMAC - Rp, 19.30.10.7 NMAC, 7-15-13]

19.30.10.8 REPORTING REQUIREMENTS FOR CERTAIN LICENSED OR PERMITTED HUNTERS AND FURBEARER HUNTERS AND TRAPPERS:

A. Individuals licensed or permitted to hunt deer, elk, pronghorn antelope, javelina, Barbary sheep, oryx, Persian ibex and turkey or hunt or trap furbearers in the same license year must submit a report for each species using procedures specified by the department. These licensed or permitted hunters and trappers must provide their customer identification number or their first name, last name, date of birth and the last four digits of their social security number at the start of the reporting procedure.

B. Individuals licensed or permitted to hunt deer, elk, pronghorn antelope, javelina, Barbary sheep, oryx, Persian ibex and turkey or hunt or trap furbearers but not engaging in any hunting or trapping activity must still submit a report.

C. The department shall make available to each hunter or trapper a toll-free telephone number and a website address that can be accessed to provide reports of hunting activities.

D. February 15 reporting deadline: All licensed or permitted deer, elk, pronghorn antelope, and turkey hunters must report the results of their hunting activities, including harvest outcome, no later than February 15th annually for licenses or permits held in that license year. For hunters of pronghorn antelope and turkey, this annual reporting requirement shall not commence until the license year beginning April 1, 2013. Licensed or permitted hunters who fail to report the results of their hunting activities by February 15 for deer, elk, pronghorn antelope, and turkey will incur a late fee pursuant to Subsection F of 19.30.10.8 NMAC.

E. April 7 reporting deadline: All licensed and permitted javelina, Barbary sheep, oryx, and Persian ibex hunters and furbearer hunters and trappers must report the results of their hunting or trapping activities, including harvest outcome, no later than April 7 annually for licenses or permits held in the previous license year. For hunters of javelina, Barbary sheep, oryx, and Persian ibex hunters, this annual reporting requirement shall not commence until the license year beginning April 1, 2013. Licensed or permitted hunters or trappers who fail to report the results of their hunting or trapping activities by April 7 for javelina, Barbary sheep, oryx, and Persian ibex hunters and furbearer hunters and trappers will incur a late fee pursuant to Subsection F of 19.30.10.8 NMAC.

F. Individuals licensed or permitted to hunt deer, elk, pronghorn antelope, javelina, Barbary sheep, oryx, Persian ibex and turkey or hunt or trap furbearers, who fail to report the results of their hunting or trapping activities by specified deadlines may submit their hunting or trapping report late with payment of a fee specified by the department not to exceed \$20 for each late report. Licensed or permitted hunters or trappers who fail to report the results of their hunting or trapping activities prior to the annual specified deadlines for any trapping license, special entry hunt application(s),

population management authorization(s) or private land authorization(s), submitted for the following license year, will have their purchase or applications rejected.

G. Upon submission of a hunting or trapping report for each species, the department shall issue the hunter or trapper a confirmation code validating a fulfillment of the reporting requirement for each species.

[19.30.10.8 NMAC - N, 7-15-13; A, 9-15-15]

19.30.10.9 TRUTH IN REPORTING:

Licensed or permitted deer, elk, pronghorn antelope, javelina, Barbary sheep, oryx, Persian ibex and turkey hunters and licensed trappers or furbearer hunters who provide false or fraudulent information regarding the results of hunting or trapping activities shall be assessed revocation points pursuant to 19.31.2 NMAC.

[19.30.10.9 NMAC - Rp, 19.30.10.11 NMAC, 7-15-13]

PART 11: CIVIL LIABILITY

19.30.11.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.30.11.1 NMAC - N, 10/16/2006]

19.30.11.2 SCOPE:

Establishing civil liability as allowed in Chapter 17, NMSA 1978 and its accompanying rules.

[19.30.11.2 NMAC - N, 10/16/2006]

19.30.11.3 STATUTORY AUTHORITY:

17-1-14, 17-1-26 and 17-2-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and establish civil liability.

[19.30.11.3 NMAC - N, 10/16/2006]

19.30.11.4 DURATION:

Permanent.

[19.30.11.4 NMAC - N, 10/16/2006]

19.30.11.5 EFFECTIVE DATE:

October 16, 2006, unless a later date is cited at the end of individual sections.

[19.30.11.5 NMAC - N, 10/16/2006]

19.30.11.6 OBJECTIVE:

Establishing civil liability value and basic regulation, rules and procedures governing the civil action by the department pertaining to civil damages recoverable by judgment.

[19.30.11.6 NMAC - N, 10/16/2006]

19.30.11.7 DEFINITIONS:

A. "Antlered points" shall mean the total number of points counted on a continuous antler beam. To constitute a countable point, it must be distinct. A burr at the base does not constitute an antlered point.

B. "Scoring" shall mean the method of measure adopted and utilized by Safari club international that determines the size of antlers, heads or horns of a game animal that has two antlers or two horns. If a dispute in the scoring arises, then a certified or trained scorer of the Safari club international will score the game animal in question and document their findings for the defendant and department.

[19.30.11.7 NMAC - N, 10/16/2006]

19.30.11.8 CIVIL LIABILITY ABOVE TEN THOUSAND DOLLAR (\$10,000.00) VALUE:

The director is authorized to pursue civil liability for greater than ten thousand dollars (\$10,000.00) for any bighorn sheep, elk or mule deer that scores higher than the criteria established below.

[19.30.11.8 NMAC - N, 10/16/2006]

19.30.11.9 CIVIL LIABILITY CIRCUMSTANCES:

A. Game animal and game bird: The director or any officer may file a civil action in any court of jurisdiction for the trophy value of a game animal or bird providing that evidence and information indicate that the game was killed or possessed out of season, taken with the aid of artificial light, taken without a proper license, exceeded the bag limit or resulted in waste of game.

B. Game fish: The director or any officer may file a civil action in any court of jurisdiction for the trophy value of a game fish providing that evidence and information indicate that the game fish was killed, taken or possessed exceeding the bag limit

[19.30.11.9 NMAC - N, 10/16/2006]

19.30.11.10 TROPHY DESIGNATION AND VALUE:

A. Antelope (pronghorn):

(1) Any 1 buck with at least one of two horns that is 14.0 inches in length is valued at two thousand dollars (\$2,000.00).

(2) Any 1 buck that has a total scoring of 70.0 points - 75.9 points is valued at four thousand dollars (\$4,000.00).

(3) Any 1 buck that has a total scoring of 76.0 points - 79.9 points is valued at six thousand dollars (\$6,000.00).

(4) Any 1 buck that has a total scoring of 80.0 points or greater is valued at eight thousand dollars (\$8,000.00).

B. Barbary sheep:

(1) Any 1 ram with at least one of two horns that is 25.0 inches to 26.99 inches in length is valued at two thousand dollars (\$2,000.00).

(2) Any 1 ram with at least one of two horns that is 27.0 inches to 28.99 inches in length is valued at four thousand dollars (\$4,000.00).

(3) Any 1 ram with a least one of two horns that is 29.0 inches or greater in length is valued at six thousand dollars (\$6,000.00).

C. Bighorn or mountain sheep:

(1) Any 1 ram, below the scoring of 150 points is valued at five thousand dollars (\$5,000.00).

(2) Any 1 ram that has a total scoring of 150 points - 180 points is valued at ten thousand dollars (\$10,000.00).

D. Deer:

(1) Any 1 mule deer buck with an inside antler spread that measures at least 20 inches is valued at two thousand dollars (\$2,000.00).

(2) Any 1 mule deer buck that has a total scoring of 150.0 points - 174.9 points is valued at four thousand dollars (\$4,000.00).

(3) Any 1 mule deer buck that has a total scoring of 175.0 points - 199.9 points is valued at six thousand dollars (\$6,000.00).

(4) Any 1 mule deer buck that has a total scoring of 200.0 points - 214.9 points is valued at ten thousand dollars (\$10,000.00).

(5) Any 1 Texas white-tailed deer buck (not Coues spp.) with an inside antler spread that measures at least 16 inches is valued at two thousand dollars (\$2,000.00).

(6) Any 1 Texas white-tailed deer buck (not Coues spp.) that has a total scoring of 125.0 points - 144.9 points is valued at four thousand dollars (\$4,000.00).

(7) Any 1 Texas white-tailed deer buck (not Coues spp.) that has a total scoring of 145.0 points - 164.9 points is valued at six thousand dollars (\$6,000.00).

(8) Any 1 Texas white-tailed deer buck (not Coues spp.) that has a total scoring of 165.0 points - 199.9 points is valued at ten thousand dollars (\$10,000.00).

(9) Any 1 Coues white-tailed deer buck with an inside antler spread that measures at least 10 inches is valued at two thousand dollars (\$2,000.00).

(10) Any 1 Coues white-tailed deer buck that has a total scoring of 85.0 points - 99.9 points is valued at four thousand dollars (\$4,000.00).

(11) Any 1 Coues white-tailed deer buck that has a total scoring of 100.0 points - 114.9 points is valued at six thousand dollars (\$6,000.00).

(12) Any 1 Coues white-tailed deer buck that has a total scoring of 115.0 points - 129.9 points is valued at ten thousand dollars (\$10,000.00).

E. Elk:

(1) Any 1 bull with at least 6 antlered points on one of two sides is valued at two thousand dollars (\$2,000.00).

(2) Any 1 bull that has a total scoring of 280.0 points - 299.9 points is valued at four thousand dollars (\$4,000.00).

(3) Any 1 bull that has a total scoring of 300.0 points - 319.9 points is valued at six thousand dollars (\$6,000.00).

(4) Any 1 bull that has a total scoring of 320.0 points - 349.9 points is valued at eight thousand dollars (\$8,000.00).

(5) Any 1 bull that has a total scoring of 350.0 points - 399.9 points is valued at ten thousand dollars (\$10,000.00).

F. Ibex:

(1) Any 1 buck or billy with at least one of two horns that is 35.0 inches in length is valued at two thousand dollars (\$2,000.00).

(2) Any 1 buck or billy that has a total scoring of 70.0 points - 79.9 points is valued at four thousand dollars (\$4,000.00).

(3) Any 1 buck or billy that has a total scoring of 80.0 points - 89.9 points is valued at six thousand dollars (\$6,000.00).

(4) Any 1 buck or billy that has a total scoring of 90.0 points - 99.9 points is valued at eight thousand dollars (\$8,000.00).

(5) Any 1 buck or billy that has a total scoring of 100.0 points or more is valued at ten thousand dollars (\$10,000.00).

G. Oryx:

(1) Any 1 oryx with one of two horns at least 34 inches in length is valued at two thousand dollars (\$2,000.00).

(2) Any 1 oryx that has a total scoring of 84.0 points - 89.9 points is valued at four thousand dollars (\$4,000.00).

(3) Any 1 oryx that has a total scoring of 90.0 points - 100.9 points is valued at six thousand dollars (\$6,000.00).

(4) Any 1 oryx that has a total scoring of 101.0 or greater is valued at ten thousand dollars (\$10,000.00).

H. Headless game animal: Any 1 game animal designated in 19.30.11.10 shall be valued at their minimum trophy amount as set forth above.

I. Turkey:

(1) Any 1 tom that has at least a 10 inch or longer beard is valued at five hundred dollars (\$500.00).

(2) Any 1 tom that has at least one foot-spur that is 1 inch or greater in length is valued at five hundred dollars (\$500.00).

J. Wild Salmonidae: Any 1 trout or salmon that has a total length of at least 20 inches is valued at one hundred fifty dollars (\$150.00).

[19.30.11.10 NMAC - N, 10/16/2006]

PART 12: PRONGHORN LICENSE ALLOCATION SYSTEM [REPEALED]

(This rule was repealed effective 4/1/2019)

PART 13: ARTIFICIAL LIGHT PERMIT SYSTEM

19.30.13.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.30.13.1 NMAC - N, 11/30/07]

19.30.13.2 SCOPE:

Issue permit for the use of artificial light as provided in 17-2-31.D NMSA 1978.

[19.30.13.2 NMAC - N, 11/30/07; A, 1/31/13]

19.30.13.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species.

[19.30.13.3 NMAC - N, 11/30/07]

19.30.13.4 DURATION:

Permanent.

[19.30.13.4 NMAC - N, 11/30/07]

19.30.13.5 EFFECTIVE DATE:

November 30, 2007, unless a later date is cited at the end of a section.

[19.30.13.5 NMAC - N, 11/30/07]

19.30.13.6 OBJECTIVE:

To permit, authorize and regulate any person requesting a permit for or using artificial light within New Mexico as exempted by 17-2-31.D NMSA 1978.

[19.30.13.6 NMAC - N, 11/30/07; A, 1/31/13]

19.30.13.7 DEFINITIONS:

A. "History of violation" means any one court conviction or multiple convictions totaling up to 20 administrative points against a person violating any federal or state hunting law or regulation during the three-year period immediately preceding the application for permitting, provided that the violation committed, if committed in New Mexico, would equal or exceed revocation requirements as found in 19.31.2 NMAC. It shall also include any conviction for any felony, no matter when the felony was committed. It shall include any convictions as an accessory for the described crimes.

B. "Director" shall mean the director of the department of game and fish.

C. "Division" shall mean the New Mexico department of game and fish, law enforcement division.

D. "Landowner" shall be a person who owns or controls private land in New Mexico.

E. "Permit" shall mean an official document issued by the department for purposes exempted by 17-2-31.D NMSA 1978.

F. "Department authorization" shall mean approval by the department of game and fish to use artificial light while hunting or taking a protected species as specified in this rule.

[19.30.13.7 NMAC - N, 11/30/07; A, 1/31/13]

19.30.13.8 PERMIT PROCEDURES AND REQUIREMENTS:

A. Application form and permit: Permits to use artificial light as defined in Section 17-2-31 NMSA 1978 and Title 19 Chapter 30 Part 13, shall be made only on forms provided by the department as prescribed and approved by the director.

B. Application deadlines: All applications must be received at least 5 working days before the requested period. All materials will be forwarded to the division for further background checking and processing.

C. Signature: Applications shall be signed by the applicant.

D. Provide verifiable written permission from a landowner(s).

E. Permit fee:

- (1) All permit fees shall be submitted with the application.
- (2) All permit fees are non refundable.
- (3) Each permit fee shall be \$15.00.

F. Applicant must be at least 21 years of age.

G. Applicant cannot have a history of violation of any related federal or state game and fish laws or regulations and applicant must give appropriate proof that no conviction exists.

H. A permit shall only be valid for the specified dates and area(s) listed on the permit and only valid on the private land with accompanying written permission. When participating in exemption activities, the permittee must possess a valid permit and valid written, landowner permission and produce both when requested by a conservation officer.

I. A permit shall be valid for maximum of 14 consecutive days. Permits may be extended only once and extensions are limited to 30 days. Extensions must be based on emergency or exigent circumstances and must be approved by the director.

J. A person may hold more than 1 permit provided that all of the application and permitting process is followed and approved.

[19.30.13.8 NMAC - N, 11/30/07; A, 1/31/13]

19.30.13.9 PROHIBITIONS:

A. It is unlawful to cast the ray of any artificial light in any location or area other than the area(s) specified on the permit.

B. It is unlawful for any person to attempt to take, pursue, or take protected game (17-2-3 NMSA 1978) with the use of artificial light.

[19.30.13.9 NMAC - N, 11/30/07]

19.30.13.10 PERMIT CANCELLATION:

If a landowner officially withdraws their permission in writing to the division for their property, the permit will be cancelled and the division shall contact the permittee informing them of the withdrawn permission by the landowner and cancellation of the permit.

[19.30.13.10 NMAC - N, 11/30/07]

19.30.13.11 DEPARTMENT AUTHORIZATION - RACCOON HUNTING:

A validly licensed furbearer hunter is authorized by the department to hunt for and take raccoons by use of artificial light while hunting at night with a rim-fire rifle or handgun no greater in size than a .22 caliber, shotgun, bow or crossbow during open season. The artificial light used for raccoon hunting must be a headlamp or hand held flashlight. It is unlawful for any artificial light to be cast from a vehicle while raccoon hunting.

[19.30.13.10 NMAC - N, 1/31/13]

PART 14: AQUATIC INVASIVE SPECIES

19.30.14.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.30.14.1 NMAC - Rp, 19.30.14.1 NMAC, 7-11-2017]

19.30.14.2 SCOPE:

Providing for the control and prevention of the spread of aquatic invasive species in New Mexico.

[19.30.14.2 NMAC - Rp, 19.30.14.2 NMAC, 7-11-2017]

19.30.14.3 STATUTORY AUTHORITY:

Chapter 17, including 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to aquatic invasive species.

[19.30.14.3 NMAC - Rp, 19.30.14.3 NMAC, 7-11-2017]

19.30.14.4 DURATION:

Permanent.

[19.30.14.4 NMAC - Rp, 19.30.14.4 NMAC, 7-11-2017]

19.30.14.5 EFFECTIVE DATE:

July 11, 2017, unless a later date is cited at the end of a section.

[19.30.14.5 NMAC - Rp, 19.30.14.5 NMAC, 7-11-2017]

19.30.14.6 OBJECTIVE:

To establish and define the procedures and restrictions for controlling or preventing aquatic invasive species.

[19.30.14.6 NMAC - Rp, 19.30.14.6 NMAC, 7-11-2017]

19.30.14.7 DEFINITIONS:

- A. "Department"** shall mean the New Mexico department of game and fish.
- B. "Director"** shall mean the director of the New Mexico department of game and fish.
- C. "Warning tag"** as used herein, shall mean a document or tag issued by the department or other state or federal agency and affixed to a conveyance or equipment that prohibits a conveyance or equipment from entering into a water body until being properly decontaminated or otherwise approved for re-entry.
- D. "Impound"** shall mean to detain or subject to temporary control of the state other than detention for purposes of inspection a conveyance or equipment until the owner or person in control thereof shall meet all conditions for release of such conveyance or equipment.
- E. "Decontaminate"** shall mean to clean, drain, dry or otherwise treat a conveyance in accordance with guidelines established by the director, including minimum standards as described in the uniform minimum protocols and standards for watercraft inspection program for dreissenid mussels in the western United States (2012) or versions thereafter in order to remove or destroy an aquatic invasive species.
- F. "Proof of decontamination"** shall mean verifiable documentary proof, official marking or tag affixed to the conveyance or equipment, or otherwise provided to the owner or person in control of a conveyance or equipment trained personnel to effect decontamination of the conveyance or equipment, or otherwise demonstrate compliance with the decontamination requirement established by the director; such certification shall be valid only until the conveyance or equipment re-enters a water body.
- G. "Trained personnel"** means individuals who have successfully completed the United States fish and wildlife service's aquatic invasive species watercraft inspection and decontamination training, level I, level II or an equivalent training recognized by the director.
- H. "Watercraft inspection and decontamination seal"** shall mean a device issued by trained personnel that attaches the conveyance or equipment to the trailer to

indicate that the conveyance or equipment has not been launched since it was last inspected or decontaminated, and is accompanied by a receipt.

[19.30.14.7 NMAC - Rp, 19.30.14.7 NMAC, 7-11-2017]

19.30.14.8 WARNING TAG:

The director shall prescribe and procure the printing of warning tags to be used for the state to identify any conveyance or equipment known or believed to contain an aquatic invasive species or a conveyance or equipment leaving an infested water body without being decontaminated.

A. Trained personnel may affix a warning tag to any conveyance or equipment known or believed to contain aquatic invasive species, based upon its point of origin or exposure to infested water, unless the person in control of such equipment or conveyance has proof of decontamination, or can otherwise demonstrate that the equipment or conveyance is not infested.

B. Trained personnel may affix a warning tag to a conveyance or equipment if they have reason to believe aquatic invasive species may be present and the person operating or in control of such conveyance or equipment refuses inspection.

C. Each warning tag shall be affixed on boats and other similar vessels within 12 inches of the boat number on the port (left) side, to the windshield of the conveyance or equipment, or in the case where a transport company is transferring the conveyance or equipment, via United States mail, electronic mail or hand delivery to both owner and transport company. In cases where no boat number is found the warning tag shall still be affixed in the same general location.

D. Each warning tag shall be individually affixed to all other conveyances and equipment in the most visible manner possible.

E. No warning tag may be removed except by trained personnel or a person or entity certified by the director and only if the respective personnel, person or entity is acting in their official capacity and has inspected the conveyance or equipment, satisfied that proper decontamination or elimination of aquatic invasive species has occurred.

[19.30.14.8 NMAC - Rp, 19.30.14.8 NMAC, 7-11-2017]

19.30.14.9 IMPOUNDMENT OF CONVEYANCE OR EQUIPMENT:

A. Any law enforcement officer may impound any conveyance or equipment if warning tagged and the conveyance or equipment is currently in or entering a water body.

B. Any law enforcement officer may impound any conveyance or equipment known or believed to contain aquatic invasive species if such conveyance or equipment is currently in a water body or the person operating or in control of such conveyance or equipment fails to follow the enforcement officer's command to immediately prevent such from entering or remaining in a water body.

C. A warning tag shall be immediately affixed to any conveyance or equipment impounded pursuant to Subsection B above.

D. Any impounded conveyance or equipment shall only be released from impoundment:

(1) upon receipt of satisfactory proof that decontamination requirements as prescribed by the director have been met; or

(2) upon receipt of a conditional release from the director wherein the owner or person responsible for the conveyance or equipment agrees to the specific terms and conditions that require immediate decontamination followed by an inspection to verify decontamination has occurred.

E. It shall be the responsibility of the owner of any impounded conveyance or equipment to pay all costs, including storage fees, decontamination charges and towing associated with the impoundment and to reimburse any agency that incurs expenditures for the impoundment.

[19.30.14.9 NMAC - Rp, 19.30.14.9 NMAC, 7-11-2017]

19.30.14.10 LIMITED TRANSPORT:

The department's employees, agents or designees, or employees of other state or federal agencies while acting in their official capacity may authorize an owner or person in control of a warning tagged conveyance or equipment to transport the conveyance or equipment to a location approved by the department or their designee.

[19.30.14.10 NMAC - Rp, 19.30.14.10 NMAC, 7-11-2017]

19.30.14.11 WAIVER AND RELEASE OF LIABILITY:

Prior to being eligible for decontamination by the state or its designee the owner or person in control of a warning tagged conveyance or equipment shall sign and deliver to the department a release of liability in a form approved by the director.

[19.30.14.11 NMAC - Rp, 19.30.14.11 NMAC, 7-11-2017]

19.30.14.12 INSPECTION AND DECONTAMINATION PROGRAM:

A. Trained personnel may establish check stations to inspect all conveyances or equipment prior to entering, being launched onto or being directly exposed to any water body of the state. It shall be unlawful for an owner or person in control of a conveyance(s) or equipment to knowingly avoid an established check station.

B. It shall be unlawful for an owner or person in control of conveyances or equipment transported into New Mexico or registered in a state other than New Mexico to knowingly introduce, launch or directly expose a conveyance(s) or equipment to any water body of the state without first receiving an inspection and/or decontamination by trained personnel. Proof of decontamination may be used in lieu of an inspection at the discretion of trained personnel.

C. The owner of a conveyance or equipment that is greater than or equal to 26 feet in length and will be transported into or within New Mexico shall notify the department aquatic invasive species program coordinator at least 14 days prior to the anticipated date of transport.

D. Upon completion of any conveyance or equipment inspection, trained personnel may require decontamination, re-inspection and additional drying time prior to the conveyance or equipment entering any water body of the state.

E. Trained personnel may affix a watercraft inspection and decontamination seal to a conveyance or equipment to serve as proof of decontamination or inspection. Conveyances or equipment with an intact watercraft inspection and decontamination seal with accompanying receipt may be allowed to enter a water body of the state without further inspection or decontamination upon verification by trained personnel.

F. It shall be unlawful for the owner or person in control of a conveyance(s) or equipment transported on a public road in New Mexico to have any plug or other barrier in place that prevents water drainage from bilge lines, ballast tanks, motor cooling systems, live wells, compartments and equipment.

G. It shall be unlawful for the owner or person in control of a conveyance(s) or equipment to fail to take reasonable measures upon exiting a waterbody to decontaminate all equipment, compartments or spaces that are wet, hold water or could transfer AIS, including aquatic vegetation.

H. Trained personnel may not self-inspect, decontaminate or attach a seal to their own conveyance or equipment.

[19.30.14.12 NMAC – Rp, 19.30.14.12 NMAC, 7-11-2017]

PART 15: WILDLIFE CONSERVATION VOLUNTEERS

19.30.15.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.30.15.1 NMAC - N, 07-15-2016]

19.30.15.2 SCOPE:

Providing for the use of volunteers by the New Mexico Department of Game and Fish.

[19.30.15.2 NMAC - N, 07-15-2016]

19.30.15.3 STATUTORY AUTHORITY:

Section 17-1-14B NMSA 1978, provides that the New Mexico state game commission has the authority to establish rules and regulations for volunteer service as it may deem necessary to carry out the department's statutory requirements and other acts pertaining to the department's programs.

[19.30.15.3 NMAC - N, 07-15-2016]

19.30.15.4 DURATION:

Permanent.

[19.30.15.4 NMAC - N, 07-15-2016]

19.30.15.5 EFFECTIVE DATE:

July 15, 2016, unless a later date is cited at the end of a section.

[19.30.15.5 NMAC - N, 07-15-2016]

19.30.15.6 OBJECTIVE:

Establish rule to implement a process for New Mexico department of game and fish to use volunteers to help support and promote its programs.

[19.30.15.6 NMAC - N, 07-15-2016]

19.30.15.7 DEFINITIONS:

- A. **"Commission"** means the state game commission.
- B. **"Department"** means the New Mexico department of game and fish.
- C. **"Director"** means the director of the New Mexico department of game and fish.

D. "Motorized equipment" means any machine that uses or is activated by a motor, engine, or other power source. This includes, but is not limited to, chainsaws, power drills, generators, motor boats, off highway vehicles, dirt bikes, snowmobiles, lawn mowers, and leaf blowers.

E. "Public employee" as defined in 1.6.5 NMAC, means individuals as defined in, Section 41-4-3 (F) NMSA 1978 of the Tort Claims Act.

F. "Registered volunteer" means an individual that has been officially placed into one or more of the department's volunteer positions after successfully completing all application, training and certification requirements.

G. "Special-use vehicles" means state vehicles designated as such by the director or designee, including but not limited to buses, tractors, boats, trailers, snow cats, vehicles of special design or construction that effectively limits their use for a particular purpose, and all other vehicles that are not passenger vehicles.

H. "State vehicle" as defined in 1.5.3 NMAC, means an automobile, van, sport-utility truck, pickup truck, or other vehicle with a declared gross vehicle weight of less than 10,000 pounds that is used by a state agency to transport passengers or property.

[19.30.15.7 NMAC - N, 07-15-2016]

19.30.15.8 WILDLIFE CONSERVATION VOLUNTEERS:

A. The New Mexico department of game and fish may develop a program to recruit, train, equip and accept the services of the registered volunteers that help support the programs administered by the department.

B. Registered volunteers shall comply with all the department's rules, policies and directives as prescribed by the director.

C. A registered volunteer shall not be deemed to be a state employee and shall not be subject to the provisions of law relating to state employment, including those relating to hours of work, rates of compensation, leave, unemployment compensation and state employee benefits.

D. A registered volunteer traveling under the authorization and direction of the New Mexico department of game and fish may receive per diem and mileage at a rate defined by the Per Diem and Mileage Act, 10-8-1 through 10-8-8 NMSA 1978 and the Travel and Per Diem Rule, 2.42.2 NMAC and reimbursement of expenses associated with the volunteers service for items such as supplies and equipment for the department's programs. Reimbursement is allowed provided that: the expense is directly related to and facilitates the implementation of the department's program(s), the incurring of the expense has been pre-approved by department staff, and the department does not authorize reimbursements in excess of the value of services

rendered to the department by the registered volunteer. Per diem, mileage and reimbursements are subject to the availability of funds, the review and pre-approval by the department, must adhere to all aspects of the Per Diem and Mileage Act, 10-8-1 through 10-8-8 NMSA 1978 and the Travel and Per Diem Rule, 2.42.2 NMAC, and all department rules, policies and procedures governing such expenses and reimbursements.

E. A registered volunteer may be authorized to use state vehicles in the performance of department assigned duties, subject to those rules, policies and directives governing the use of state vehicles by department employees. A registered volunteer that operates a state vehicle under the terms of this section shall be treated for the purposes of insurability and tort claims liability as a public employee of the state as described in the Tort Claims Act, 41-4-1 through 41-4-30 NMSA 1978 and the General Governmental Administration Risk Management Certificate of Coverage Rule, 1.6.5 NMAC.

F. A registered volunteer may be authorized to use state computers and related technology in the performance of department-assigned duties. Registered volunteers are subject to those rules, policies and directives governing the use of state computers and associated technology. Use of department computers and associated technology must be reviewed and pre-approved by the department and registered volunteers must adhere to all aspects of the Information Technology Internet, Intranet, Email, and Digital Network Usage Rule 1.12.10 NMAC, the Information Technology Enterprise Architecture Rule, 1.12.11 NMAC, and the department's information technology use policy, GP-015.

G. A registered volunteer may be authorized to use special-use vehicles and motorized equipment in the performance of department-assigned duties, subject to the department's rules, policies and directives as prescribed by the director.

[19.30.15.8 NMAC - N, 07-15-2016]

19.30.15.9 GENERAL REQUIREMENTS:

A. Background checks: Applicants must consent to and pass a formal background investigation as prescribed by the director to be eligible for consideration for placement into a registered volunteer position with the department.

B. Training and certifications: Applicants must successfully complete all training and certification requirements for each position they have applied for prior to the performance of the positions duties.

[19.30.15.9 NMAC - N, 07-15-2016]

19.30.15.10 REVIEW AND REPORTING:

A. The department shall provide to the commission an annual accounting of the wildlife conservation volunteers program.

B. The wildlife conservation volunteers program shall be included in the annual independent audit of the department and must adhere to the Audit Act, 12-6-12 NMSA 1978.

[19.30.15.10 NMAC - N, 07-15-2016]

PART 16: [RESERVED]

PART 17: PROCEDURAL RULE FOR PUBLIC RULE HEARINGS

19.30.17.1 ISSUING DEPARTMENT:

New Mexico Department of Game and Fish.

[19.30.17.1 NMAC - N, 01/30/2018]

19.30.17.2 SCOPE:

The state game commission and the department of game and fish.

[19.30.17.2 NMAC - N, 01/30/2018]

19.30.17.3 STATUTORY AUTHORITY:

Section 14-4-5.8 NMSA 1978, Sections 17-1-14 and 17-1-26 NMSA 1978.

[19.30.17.3 NMAC - N, 01/30/2018]

19.30.17.4 DURATION:

Permanent.

[19.30.17.4 NMAC - N, 01/30/2018]

19.30.17.5 EFFECTIVE DATE:

January 30, 2018, unless a later date is cited in the history note at the end of a section.

[19.30.17.5 NMAC - N, 01/30/2018]

19.30.17.6 OBJECTIVE:

To provide procedural rules for public rule hearings for use by the state game commission and the department of game and fish consistent with the State Rules Act, and to facilitate public engagement with the administrative rulemaking process in a transparent, organized, and fair manner.

[19.30.17.6 NMAC - N, 01/30/2018]

19.30.17.7 DEFINITIONS:

This rule adopts the definitions found in Section 14-4-2 NMSA 1978 and the listing in this section.

A. "Commission" shall mean the New Mexico state game commission.

B. "Department" shall mean the New Mexico department of game and fish.

[19.30.17.7 NMAC - N, 01/30/2018]

19.30.17.8 INITIATION OF THE RULEMAKING PROCESS:

The rulemaking process for purposes of this rule is initiated when the department publicly posts a notice for a rule hearing pursuant to Section 14-4-5.2 NMSA 1978.

[19.30.17.8 NMAC - N, 01/30/2018]

19.30.17.9 RULEMAKING NOTICE:

A. The department shall provide to the public notice of the proposed rulemaking as required by Section 14-4-5.2 NMSA 1978.

B. If the commission changes the date of the public rule hearing or shortens the deadline for submitting comments as stated in the notice, the department shall provide notice to the public of the change as provided above.

[19.30.17.9 NMAC - N, 01/30/2018]

19.30.17.10 WRITTEN COMMENT PERIOD:

A. The commission shall allow for public comment on the proposed rule as defined by Section 14-4-5.3 NMSA 1978.

B. The commission may decide before, during, or after the public rule hearing to extend the comment period by providing public notice, to include:

- (1)** posting on the department website;

(2) making it available by posting notice in a publicly visible location in department's headquarters and regional offices;

(3) sending notice by electronic mail to persons who have participated in the rulemaking proceeding or made a written request for notice of rulemaking proceedings and provided an electronic mail address to the department; and

(4) sending notice by regular mail to persons who have participated in the rulemaking proceeding or made a written request for notice of rulemaking proceeding and provided a postal address and specifically requested notice by regular mail.

[19.30.17.10 NMAC - N, 01/30/2018]

19.30.17.11 PUBLIC HEARING:

A. Prior to adopting a proposed rule, the commission must hold a public rule hearing. The purpose of the public rule hearing is to provide all interested persons a reasonable opportunity to submit data, views or arguments orally or in writing on the proposed rule. The commission, at its sole discretion, may determine whether more than one hearing is necessary.

B. The chair of the commission may act as the hearing officer or designate a representative or hearing officer to preside over its public rule hearing. The hearing officer may ask questions and provide comments for clarification purposes only.

C. At the start of the hearing, any pre-filed exhibits should be introduced and admitted into the rulemaking record. Pre-filed exhibits should include: copies of the public notices of the rulemaking, including any lists of individuals to whom notice was mailed or sent electronically; copies of the proposed rule in underline and strikethrough format; and copies of any written comment submitted during the comment period prior to the rule hearing. Any written comments or other documents introduced during the hearing should be admitted into the record after being marked as an exhibit.

D. Individuals from the public wishing to provide comment or submit information at the rule hearing must state their name and any relevant affiliation for the record and be recognized before presenting by the individual presiding over the hearing. Any individual who provides information or public comment at the hearing may be questioned by the hearing officer, or other members of the commission.

E. The rule hearing shall be conducted in a fair and equitable manner. The hearing officer may determine the manner in which the hearing is conducted, but the hearing should be conducted in a simple and organized manner that facilitates public comment and a clear rulemaking record. The rules of evidence do not apply to public rule hearings and the hearing officer may, in the interest of efficiency, exclude or limit comment that is deemed irrelevant, redundant, or unduly repetitious.

F. The commission must hold the hearing in a venue that reasonably accommodates all interested persons who wish to participate or observe, and appropriate audio equipment should be secured to ensure all persons in attendance can hear the proceeding and be heard when presenting comment. Reasonable efforts shall be made to accommodate the use of audio and video recording devices.

[19.30.17.11 NMAC - N, 01/30/2018]

19.30.17.12 RULEMAKING RECORD AND ADOPTION OF RULE:

A. Once the rulemaking process has been initiated, the department shall maintain a record of the rulemaking proceeding as required in Section 14-4-5.4 NMSA 1978, and any written comment, document, or other exhibit entered into the record during the rule hearing shall be labeled clearly.

B. The adoption of the proposed rule shall occur during a public meeting. The adoption date of the proposed rule shall be the date of the public meeting at which the vote occurred, unless the commission directs that a written order be issued, in which case the adoption date shall be the date the written order is signed. The commission may provide reasoning for the adopted rule through comments or discussion during its meeting, or by providing a statement of reasons in a written order.

C. The commission, through the department, shall provide a concise explanatory statement per Section 14-4-5.5 within 15 days after the date of adoption.

[19.30.17.12 NMAC - N, 01/30/2018]

19.30.17.13 FILING AND PUBLICATION; EFFECTIVE DATE:

Once the commission has adopted a rule(s), the department shall follow the procedures for final adoption as defined in Section 14-4-5 NMSA 1978.

[19.30.17.13 NMAC - N, 01/30/2018]

19.30.17.14 EMERGENCY RULES:

The commission and department shall comply with the rulemaking procedures herein and the State Rules Act unless the commission or department finds that an emergency situation exists. The commission and the department shall adhere to Section 14-4-5.6 NMSA 1978, if the need for an emergency rule is determined.

[19.30.17.14 NMAC - N, 01/30/2018]

PART 18: FAIR CHASE

19.30.18.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.30.18.1 NMAC – N, 2/11/2020]

19.30.18.2 SCOPE:

Distribution and use of wildlife location data collected by the department of game and fish or its contractors.

[19.30.18.2 NMAC – N, 2/11/2020]

19.30.18.3 STATUTORY AUTHORITY:

Section 17-2-1 NMSA 1978 provides that the New Mexico state game commission may prescribe rules that embody the principles of fair chase, including prohibitions on the use of specific wildlife location data. Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species.

[19.30.18.3 NMAC – N, 2/11/2020]

19.30.18.4 DURATION:

Permanent

[19.30.18.4 NMAC – N, 2/11/2020]

19.30.18.5 EFFECTIVE DATE:

February 11, 2020, unless a later date is cited in the history note at the end of a section.

[19.30.18.5 NMAC – N, 2/11/2020]

19.30.18.6 OBJECTIVE:

To prevent the inappropriate distribution and use of wildlife location data collected by the department or its contractors that could be used to locate or assist in locating an individual animal or population.

[19.30.18.6 NMAC – N, 2/11/2020]

19.30.18.7 DEFINITIONS:

A. "Department" shall mean the New Mexico department of game and fish.

B. "Director" shall mean the director of the New Mexico department of game and fish.

C. "Fair chase" shall mean the ethical, sportsmanlike, and lawful pursuit and taking of any free-ranging wildlife species in a manner that does not give an individual an improper advantage over such animals.

D. "Location information" shall mean any data or information derived from methods including but not limited to Global Positioning System (GPS), radio telemetry, photographs, aerial and ground surveys, and visual or aural observation. Such data includes, but is not limited to, coordinates, location description, and similar information.

[19.30.18.7 NMAC – N, 2/11/2020]

19.30.18.8 LOCATION INFORMATION TO BE WITHHELD:

A. The department shall withhold location information:

- (1)** that could be used to locate an animal(s) or be used contrary to the principles of fair chase;
- (2)** as long as a transmitter is active;
- (3)** until the transmitted animal is known, or can be reasonably be assumed, to be dead;
- (4)** during an ongoing study;
- (5)** if it could compromise the viability of a population where there is a known demand to visit, take, or disturb the species;
- (6)** if it could encourage illegal take;
- (7)** if the species has a limited distribution either continuously or at specific times;
- (8)** that has been provided to the department from other agencies, universities, or other researchers; and
- (9)** as provided in 19.33.4 NMAC.

B. The department shall withhold individual active radio frequencies.

[19.30.18.8 NMAC – N, 2/11/2020]

19.30.18.9 EXEMPTIONS FROM WITHHOLDING LOCATION INFORMATION:

The department may release location information and radio frequencies if:

A. entering into agreements for scientific, management, conservation, or educational purposes.

B. determined that the individual or population is not at risk of being compromised by releasing the location data.

C. buffered such that the location information would not compromise the individual or population.

[19.30.18.9 NMAC – N, 2/11/2020]

CHAPTER 31: HUNTING AND FISHING

PART 1: GENERAL PROVISIONS [RESERVED]

PART 2: HUNTING AND FISHING LICENSE REVOCATION

19.31.2.1 ISSUING AGENCY:

New Mexico department of game and fish.

[19.31.2.1 NMAC - Rp, 19.31.2.1 NMAC, 4/1/2022]

19.31.2.2 SCOPE:

Anyone who violates the provisions of Chapter 17 NMSA 1978, Section 30-14-1 NMSA 1978, the Interstate Wildlife Violator Compact (Chapter 11 NMSA 1978) and the Parental Responsibility Act (Chapter 40 NMSA 1978).

[19.31.2.2 NMAC - Rp, 19.31.2.2 NMAC, 4/1/2022]

19.31.2.3 STATUTORY AUTHORITY:

Sections 11-16-5, 11-16-6, 17-1-14, 17-2-10.3, 17-3-34, 30-14-1, 40-5A-3, and 40-5A-6 NMSA 1978.

[19.31.2.3 NMAC - Rp, 19.31.2.3 NMAC, 4/1/2022]

19.31.2.4 DURATION:

Permanent.

[19.31.2.4 NMAC - Rp, 19.31.2.4 NMAC, 4/1/2022]

19.31.2.5 EFFECTIVE DATE:

April 1, 2022 unless a later date is cited at the end of a section or paragraph.

[19.31.2.5 NMAC - Rp, 19.31.2.5 NMAC, 4/1/2022]

19.31.2.6 OBJECTIVE:

To revoke, suspend or deny the privileges of any person who persistently, flagrantly or knowingly violates any of the provisions of Chapter 17 NMSA 1978, any rule adopted by the state game commission, the conditions of their agreement, license, permit or privileges, or Section 30-14-1 NMSA 1978; whose name appears on a HSD certified list of obligors not in compliance with the Parental Responsibility Act, Section 40-5A-1 NMSA 1978; who fails to pay a penalty assessment levied pursuant to Section 17-2-10.1 NMSA 1978; who fails to appear, after proper notice, for hearings as required by law or regulation pursuant to Section 17-2-10.3 NMSA 1978; who has a civil judgment assessed against them pursuant to Section 17-2-26 NMSA 1978 until those damages have been paid in full; whose privileges have been revoked by a wildlife violator compact member state or of any resident that fails to meet the terms of a citation issued from a compact member state pursuant to the Interstate Wildlife Violator Compact, Section 11-16-1 NMSA 1978; or, who does not comply with a department sponsored private lands agreement.

[19.31.2.6 NMAC - Rp, 19.31.2.6 NMAC, 4/1/2022]

19.31.2.7 DEFINITIONS:

A. "Commission" means the New Mexico state game commission.

B. "Conviction" means any adjudication of guilt; plea of guilty or nolo contendere accepted by the court; or payment of a fine, court cost, court order or penalty assessment; or forfeiture of collateral; regardless of whether sentencing or imposition of sentencing has been deferred or suspended.

C. "Department" means New Mexico department of game and fish.

D. "Director" means the director of the department of game and fish.

E. "HSD" means the New Mexico human services department.

F. "Notice of contemplated action" or "NCA" means a written notice that the commission is considering revoking a respondent's privileges, the basis for the action and the manner in which they can request a hearing.

G. "Notice of suspension" or "NOS" means a written notice that the department has suspended a respondent's privileges until they come into compliance with parental

responsibility obligations to HSD, compliance with criminal obligations to a court, compliance with criminal or civil obligations to the department or that the department has suspended or revoked the respondent's privileges in accordance with the Interstate Wildlife Violators Compact.

H. "Obligor" means a person who has been ordered to pay child or spousal support pursuant to a judgment and order for support.

I. "Privilege(s)" means the ability to purchase, receive, obtain or possess any license, permit, certificate, registration, authorization or agreement issued by the department, including but not limited to, hunting, fishing, trapping, private land hunting authorizations or permits, guiding and outfitting.

J. "Respondent" means any person who is subject to revocation or suspension.

K. "Revocation" means when a person's privileges are withheld by the commission or department, after notice and opportunity for a hearing, for a definite period of time.

L. "Suspension" means a person's privileges are withheld by the commission or department until the person comes into compliance.

[19.31.2.7 NMAC - Rp, 19.31.2.7 NMAC, 4/1/2022]

19.31.2.8 CRIMINAL REVOCATION CATEGORIES AND POINTS:

Each conviction or penalty assessment for a violation of Chapter 17 NMSA 1978, Section 30-14-1 NMSA 1978 or commission rule will result in the assessment of points. Any person with 20 or more points accumulated within any consecutive three-year period shall have all of his or her privileges subject to revocation or suspension. The tolling of time for the three consecutive years shall begin from the date of conviction or the date a penalty assessment was accepted.

A. 40-point criminal violations:

(1) hunting with the aid of an artificial light or spotlight, in violation of Section 17-2-31 NMSA 1978;

(2) felony waste of game in violation of Section 17-2-8 NMSA 1978;

(3) selling, offering for sale, offering to purchase or purchasing any game animal, game bird or game fish or parts thereof in violation of Section 17-2-7 NMSA 1978;

(4) any violation of Section 17-3-45 NMSA 1978 related to shooting from an aircraft involving any game animal, game bird or any state listed threatened or endangered animal;

- (5) applying for or receiving an outfitter or guide registration while revoked;
- (6) any violation of Section 17-3-48 NMSA 1978;
- (7) any violation of Section 17-3-49 NMSA 1978;
- (8) except as otherwise provided by Sections 17-2-37 to 17-2-46, taking, possessing, transporting, exporting, processing, selling or offering for sale, or shipping any species or subspecies of wildlife listed on the state list of endangered or threatened species or the United States' list of endangered native and foreign fish and wildlife;
- (9) knowingly or willfully introducing an aquatic invasive species, in violation of Section 17-4-35 NMSA 1978; or
- (10) accessory to any of the above violations.

B. 20-point criminal violations:

- (1) illegally taking, attempting to take, killing, capturing or possessing any big game species outside of hunting season in violation of Section 17-2-7 or 17-3-33 NMSA 1978, except for possession of head, antlers or horns found in the field penalty assessment violations;
- (2) hunting big game without a license in violation of Section 17-3-1 NMSA 1978;
- (3) misdemeanor waste of game in violation of Section 17-2-8 NMSA 1978;
- (4) hunting on public land (lands owned by the U.S. government, state of New Mexico, state land office or New Mexico game commission) with a license which was valid only on private land;
- (5) hunting in a closed area or hunting big game outside the ranch boundaries for which a ranch only license is issued or hunting big game in the wrong game management unit;
- (6) any violation of Section 17-3-45 NMSA 1978 related to shooting from an aircraft involving species other than game animals, game birds or state listed threatened or endangered animals;
- (7) exceeding the bag limit of big game;
- (8) criminal trespass, in violation of Section 30-14-1 NMSA 1978, when in connection with hunting, fishing or trapping activity; revocation to be for no less than three years;

- (9) any violation of Section 17-3-6 NMSA 1978;
- (10) any violation of Section 17-2-7.1 NMSA 1978 relating to interference with hunting, fishing or trapping;
- (11) any violation of Section 17-2-29 NMSA 1978; revocation for a period of one year as prescribed by Section 17-2-30 NMSA 1978;
- (12) outfitter allowing or using an unregistered person to perform outfitting or guiding services;
- (13) guiding or outfitting without being registered in violation of Section 17-2A-3 NMSA 1978;
- (14) using an outfitter or guide license issued to another;
- (15) hunting with a license obtained through the special drawing pool without being contracted with a New Mexico outfitter;
- (16) any violation of the provisions of any special use of wildlife permit issued by the department pursuant to Chapter 17 NMSA 1978 and its implementing rules;
- (17) procurement, possession or use of any additional big game or turkey license or tag, except as provided by rule;
- (18) any violation of Section 17-2-4.2 NMSA 1978;
- (19) selling or offering for sale any license issued to a person.
- (20) importation or possession of any species listed as group II, III or IV on the director's "species importation list" in violation of Section 17-3-32 NMSA 1978 or 19.31.10 NMAC;
- (21) any person who obtains any license, permit or stamp by falsely claiming a military discount; or
- (22) accessory to any of the above violations.

C. 10-point criminal violations:

- (1) illegally taking, attempting to take, killing, capturing or possession of any big game species during hunting season;
- (2) illegally taking, attempting to take, killing, capturing or possessing any turkey or small game in violation of Section 17-2-7 or 17-3-33 NMSA 1978;

(3) hunting, taking or attempting to take any protected game animal, game bird, game fish or furbearer on private land without written permission, in violation of 19.31.10 NMAC;

(4) harassing a game animal;

(5) use of an aircraft or drone to locate, harass, drive or rally a game animal;

(6) fail to properly tag big game species or turkey as prescribed;

(7) using an invalid or voided tag or using a tag of any other person;

(8) fishing without a license or hunting small game or turkey without a license;

(9) exceeding the bag limit of small game or turkey;

(10) retention of live game animal or game bird;

(11) refusing or failing to produce an outfitter contract or not having a signed contract prior to hunting;

(12) applying or allowing someone to apply in the special drawing pool without a contract;

(13) hunting or collecting non-game without a license or permit;

(14) applying or aiding any person in applying in the special drawing pool with an unregistered or unqualified outfitter number;

(15) hunting with a license obtained through the special drawing pool without being accompanied by a New Mexico outfitter or their guide; or

(16) accessory to any of the above violations.

D. five-point criminal violations:

(1) illegal possession of any head, horns or antlers of a game animal found in the field;

or

(2) any provision of Chapter 17 NMSA 1978 and its implementing rules not specifically

listed herein.

E. three-point criminal violations:

- (1) hunting, fishing or trapping without proper stamp(s); or
- (2) using any department issued permit without possessing the proper stamp(s).

[19.31.2.8 NMAC - Rp, 19.31.2.8 NMAC, 4/1/2022]

19.31.2.9 ADMINISTRATIVE REVOCATION CATEGORIES AND POINTS:

Any person may be assessed administrative revocation points for violations as provided below. Any person with 20 or more points accumulated within any consecutive three-year period shall have all of his or her privileges subject to revocation or suspension. An outfitter, guide or applicant's administrative revocation points shall only be against their outfitting or guiding registration unless they have accumulated 20 or more criminal revocation points. Administrative revocation points for landowners or their authorized ranch contact shall only be for the revocation or suspension of their private land program participation privileges unless they have accumulated 20 or more criminal revocation points.

A. 20 points:

- (1) outfitter or guide failure to comply with registration audit or conditions;
- (2) outfitter or guide misrepresentation;
- (3) outfitter or guide failure to disclose;
- (4) landowner's or authorized ranch contact's misrepresentation or violation of the conditions of a contract, application or agreement with the department;
- (5) any person submitting, or allowing to be submitted for them, false or fraudulent harvest reporting or pelt tagging information as required by rule; or
- (6) any person purchasing a license, permit, certificate or registration without sufficient funds to pay or who stops payment for same.

B. 10 points:

- (1) outfitting on state or federal lands without a proper permit or authorization;
- (2) outfitter breach of contract; or
- (3) outfitter, guide, landowner or authorized ranch contact failure to report illegal activity.

C. five points:

- (1) outfitter or guide violation of any conditions of a state or federal permit or authorization;
- (2) outfitter or guide failure to comply with any local, state or federal laws other than outfitting on state or federal lands without a proper permit or authorization;
- (3) outfitter failure to supervise guides; or
- (4) any outfitter or guide misconduct not otherwise specifically listed herein.

D. outfitters, guides and landowners or their authorized ranch contact shall be notified when points are assessed.

[19.31.2.9 NMAC - Rp, 19.31.2.9 NMAC, 4/1/2022]

19.31.2.10 TIMEFRAMES:

Any person found to have accumulated 20 or more points within any consecutive three-year period in violation of Chapter 17 NMSA 1978, Section 30-14-1 NMSA 1978 or commission rule, after notice and opportunity to be heard by a hearing officer, shall have their privileges revoked for a definite period of time in accordance with Section 17-1-14 NMSA 1978.

A. First revocation: Any person subject to revocation for the first time may be revoked for up to three years or as provided for in statute. Stipulated agreements may only be used for first time revocations and any stipulated agreement shall be considered a first revocation for the purpose of calculating second or subsequent revocation timeframes.

B. Second revocation: Any person, who is subject to a second revocation may be revoked for up to five years.

C. Third revocation: Any person, who is subject to a third revocation, shall be revoked for no less than ten years.

D. Felony conviction: Any person convicted of a felony waste of game violation for the first time shall have their privileges revoked for no less than seven years and no more than ten years. Any person convicted of a felony waste of game violation for a second or subsequent time shall have their privileges revoked for no less than 10 years and no more than 99 years.

E. Enhancement: The department may recommend any period of revocation longer than those set in Sections A through C of this section to a hearing officer during a hearing requested by a respondent or to the commission, if no hearing was requested

by the respondent, when a respondent has accrued 40 or more revocation points within a three year period or when a respondent has accrued 20 or more revocation points and is subject to civil restitution for any animal designated as a trophy animal under 19.30.11 NMAC in connection with these points or for any person who accrues additional violation points while on revocation for a separate offense. Any such recommendation shall be supported with written justification detailing the recommendation and the egregious circumstances. Neither the hearing officer nor the commission shall be bound by the department's recommendation but shall consider it in determining the appropriate time period for a respondent's revocation.

F. Mitigation: The department may recommend any period of revocation shorter than those set in Sections A through C of this section to a hearing officer during a hearing requested by a respondent or to the commission, if no hearing was requested by the respondent, when the department believes mitigating circumstances exist. Any such recommendation shall be supported with written justification detailing the recommendation and the mitigating circumstances. Neither the hearing officer nor the commission shall be bound by the department's recommendation but shall consider it in determining the appropriate time period for a respondent's revocation.

G. Private land program violations: Any person, corporation or management authority found not complying with a department sponsored private lands agreement shall have all of their private lands program privileges revoked for up to three years for a first offense, no less than five years for a second offense and no less than 10 years for a third or subsequent offense. Such a revocation shall attach to the property associated with the violations and no change of ownership, change of authorized ranch contact nor any other change in management shall not reinstate a property which was associated with this type of revocation. The property shall remain inactive and the department shall not issue any private land authorizations for any species to any property or any portion of any property involved in a private land program revocation for the duration of the revocation time period even if the property is sold, changes management, is subdivided or otherwise altered.

H. PRA, IWVC violators and penalty assessments: Any person not in compliance with the Parental Responsibility Act (PRA) Section 40-5A-1 NMSA 1978, the Interstate Wildlife Violator Compact (IWVC) Section 11-16-1 NMSA 1978 or who has failed to pay a penalty assessment citation to the department within the amount of time allowed shall have their privileges revoked or suspended until in compliance (PRA) or for the time period designated by the original revoking state (IWVC) or until the penalty assessment citation has been paid in full.

I. Revocations shall be consecutive: All revocations shall commence consecutively to any current revocation or suspension.

J. Timeline to begin revocation process: If the department fails to initiate (initiation shall be calculated based on the post mark on the NCA or NOS letter) a revocation or suspension action against an individual within one year of the date that

the individual is either convicted of an act or accepts a penalty assessment misdemeanor, or a person is issued an administrative citation and assessed administrative points, which results in the accumulation of 20 or more points, the department shall not bring a revocation or suspension action against that individual unless and until that individual is either convicted of an additional violation or accepts an additional penalty assessment misdemeanor of any point value within three years of the most recent point accrual originally equaling or exceeding 20 points.

[19.31.2.10 NMAC - Rp, 19.31.2.10 NMAC, 4/1/2022]

19.31.2.11 REVOCATION AND SUSPENSION PROCEDURES:

A. Revocation: The department shall mail out a NCA when it determines that a person has accumulated 20 or more points, or when the commission is contemplating revoking a landowner's or authorized ranch contact's private land program privileges to participate in any department sponsored private land program or when the department determines that there has been a violation of the terms of a permit, license or authorization. An NCA shall clearly describe the proposed action and shall contain the following:

(1) Accrual of points: That the respondent has accrued 20 or more violation points within a three-year period and they are subject to having their privileges revoked.

(2) Hearing may be requested: That the respondent may secure a hearing before a hearing officer designated by the commission by mailing a request for a hearing letter to the department at 1 Wildlife Way, Santa Fe, NM 87507 and that a request for hearing shall only be deemed timely if it is postmarked within 20 calendar days after service of the department's NCA to the respondent.

(3) Rights of respondent: A person entitled to be heard under this rule shall have the right to be represented by counsel or may appear on their own behalf; to present all relevant evidence by means of witnesses, papers, documents and other evidence; to examine all opposing witnesses who appear on any matter relevant to the issues.

(4) Written request: Upon written request to another party, any party is entitled to:

(a) Obtain the names and addresses of witnesses who will or may be called by the other party to testify at the hearing; and

(b) Inspect and copy any documents or items which the other party will or may introduce in evidence at the hearing.

(c) The party to whom such a request is made shall comply with the request within 20 calendar days after the delivery of the request. No such request shall be made less than 20 calendar days before the hearing.

B. Suspension: The department shall mail out a NOS when it determines that there is sufficient evidence that a person is named on the wildlife violator compact, has failed to appear in court, has failed to pay a penalty assessment citation in full within the timeframe allowed, has failed to pay a civil judgement in full, or has entered into a voluntary suspension pursuant to a civil assessment. The NOS shall clearly describe the suspension of privileges and shall contain the remedy for the suspension.

C. Deadlines: If any deadline falls on a Saturday, Sunday, or state-recognized holiday, the deadline shall be extended to the next business day.

D. Department may initiate process: The commission grants approval to the department, through the director, to initiate the NCA or NOS process without commission consideration and to carry out suspensions associated with any NOS. The commission retains all authority for final revocation decisions.

[19.31.2.11 NMAC - Rp, 19.31.2.11 NMAC 4/1/2022]

19.31.2.12 NO HEARING REQUESTED:

If a respondent does not mail a request for a hearing within the time frame and in the manner required by this rule, or the notice mailed by the department is returned as undeliverable or unclaimed at the address the department has on file, the commission may take the action contemplated in the notice and such action shall be final and not subject to judicial review.

A. The commission shall consider the department's submission of names of respondents who have not requested a hearing at a properly scheduled commission meeting and the respondent's privileges shall be automatically revoked or suspended pursuant to this rule.

B. Within 20 days after the commission's decision is rendered and signed by the chairperson of the commission, the department shall serve upon the respondent a copy of the written decision.

[19.31.2.12 NMAC - Rp, 19.31.2.12 NMAC 4/1/2022]

19.31.2.13 HEARING REQUESTED:

If a respondent requests a hearing as provided by this rule, the department, within 20 calendar days of receipt of such request, shall notify the respondent of the time and place of the hearing, the name or names of the person or persons who shall conduct the hearing for the commission, and the statutes and rules authorizing the commission to

take the contemplated action. The hearing shall be held not more than 90 or less than 30 days from the date of service of such notice unless a continuance is granted to either party by the hearing officer. If a continuance has been requested by the department and granted by the hearing officer the hearing shall be rescheduled within 60 days from the original hearing date. If a continuance has been requested by the violator and granted by the hearing officer all timelines are waived for the hearing. Continuances may only be granted for good cause. The decision to grant or deny a continuance is at the sole discretion of the hearing officer.

[19.31.2.13 NMAC - Rp, 19.31.2.13 NMAC, 4/1/2022]

19.31.2.14 STIPULATED AGREEMENTS:

At the department's discretion, a person entitled to be heard under this rule for a first-time revocation may enter into a written stipulated agreement with the department. Signing such an agreement shall waive the person's right to a hearing and the filing of a written exception. The agreement shall be presented to the commission as the department's recommendation and the commission retains authority for the final decision.

[19.31.2.14 NMAC - Rp, 19.31.2.14 NMAC, 4/1/2022]

19.31.2.15 METHOD OF SERVICE:

A. Any NCA, notice of hearing or written decision by the commission shall be served by certified mail, return receipt requested, directed to the respondent, at their last known address as shown by the records of the department of game and fish. Notice by certified mail shall be deemed to have been served on the date born by the return receipt showing delivery or the last attempted delivery of the notice or decision to the respondent or refusal to accept delivery of the notice or decision.

B. Any NOS shall be given either by personal delivery to the person to be notified or by deposit in the United States mail, addressed to the person at the address as shown by the records of the department of game and fish. The giving of notice by mail is complete upon the expiration of seven days after deposit of the notice in the mail. Proof of the giving of notice in either manner may be made by the certificate of any officer or employee of the department, naming the person to whom the notice was given and specifying the time, place and manner of the giving of the notice. Notice is given when a person refuses to accept notice.

[19.31.2.15 NMAC - Rp, 19.31.2.15 NMAC, 4/1/2022]

19.31.2.16 VENUE:

Hearings held under this rule shall be conducted in Santa Fe county or Bernalillo county, New Mexico. Under exigent circumstances, and at the discretion of the hearing

officer, the hearing may be held in another county in New Mexico. Hearings may be conducted in person, via video conference, telephone or other equivalent electronic method with the approval of the hearing officer. Witnesses may appear in person, via video conference, telephone or other equivalent electronic method.

[19.31.2.17 NMAC - Rp, 19.31.2.17 NMAC, 4/1/2022]

19.31.2.17 HEARING OFFICER:

All hearings under this rule shall be conducted by a hearing officer who is designated by the commission. The hearing officer may be disqualified as provided for under the rules of civil procedure by filing an affidavit of disqualification with the department.

[19.31.2.18 NMAC - Rp, 19.31.2.18 NMAC, 4/1/2022]

19.31.2.18 RULES OF EVIDENCE:

The hearing officer shall consider a certified copy or a filed copy of a conviction from any court of competent jurisdiction as conclusive evidence of a violation of Chapter 17 NMSA 1978, Section 30-14-1 NMSA 1978 or commission rule. In cases where court records associated with a conviction are not available, the official form of the records maintained by either the court or the department of game and fish shall be admissible. These records shall also stand as conclusive evidence of a violation of Chapter 17 NMSA 1978, Section 30-14-1 NMSA 1978 or commission rule. In the case of hearings in which a criminal conviction is not germane, the standard of proof shall be a preponderance of the evidence.

A. Admission of evidence: In proceedings held under this regulation, the hearing officer may admit any evidence and may give probative effect to evidence that is of a kind commonly relied on by reasonably prudent people in the conduct of serious affairs. The hearing officer may, at their discretion, exclude incompetent, irrelevant, immaterial and unduly repetitious evidence. Documentary evidence may be received in the form of copies or excerpts. All parties appearing via telephone, videoconference, or other electronic method shall provide the department with a working email address or facsimile number for the exchange of all documentary evidence before or during the hearing.

B. Judicial notice: The hearing officer may take notice of judicially cognizable facts.

C. Rules of privilege: The rules of privilege shall be effective to the extent that they are required to be recognized in civil actions in district courts of the state of New Mexico.

D. Mitigating or aggravating circumstances: The hearing officer may consider mitigating, extenuating and aggravating circumstances surrounding the violations of

game and fish laws and rules to determine the recommended period of the revocation or suspension.

[19.31.2.22 NMAC - Rp, 19.31.2.22 NMAC, 4/1/2022]

19.31.2.19 HEARING AND POST-HEARING PROCEDURES:

A. Hearing closed to the public: All hearings conducted under this rule shall be closed to the public.

B. Hearing interpreter provided: The department shall provide technology or an interpreter for individuals requesting a hearing who provide proof of hearing impairment to the extent that they cannot understand voice communications. The respondent must give written notice of this need to the department at the time they request a hearing or no less than 30 calendar days prior to their hearing.

C. Language interpreter: A party needing language interpreter services for translation of one language into another is responsible for arranging such service for the hearing. While the person serving as an interpreter need not be a court-certified interpreter in order to provide interpretation at a hearing, any person serving as an interpreter must affirm the interpreter's oath applicable in courts across this state. Any respondent who intends to bring a language interpreter shall notify the department of this at the time they request a hearing or no less than 30 calendar days prior to their hearing.

D. Record of hearing: In all hearings conducted under this rule, the hearing officer shall cause a complete record to be made by audio recording and shall preserve all evidence received. The hearing officer shall observe any standards pertaining to audio recordings established for the district courts of this state.

E. Post-hearing briefs: The hearing officer may require post-hearing briefs, proposed findings of fact and conclusions of law, or both.

F. Hearing officer's report: Within 20 calendar days of any hearing, the hearing officer shall make and submit to the department a report setting forth his or her findings of fact, conclusions of law and recommended decision.

G. Report copies to parties: The department shall serve a copy of the recommended decision on the parties by email or if specifically requested by the respondent, by certified mail with return receipt requested.

H. Filing of exceptions to hearing officer's report: The parties to the proceeding may file exceptions, or supporting briefs, to a hearing officer's recommended decision within a time period set by the hearing officer or within 30 calendar days of the hearing if not otherwise specified by the hearing officer. Exceptions shall not contain matters unrelated to or outside the scope of the hearing.

[19.31.2.23 NMAC - Rp, 19.31.2.23 NMAC, 4/1/2022]

19.31.2.20 FINAL DECISION OF THE COMMISSION:

A. Review and consideration of hearing officer's report and filed exceptions and briefs: After a hearing has been completed, the commission shall review and consider the hearing officer's report and any filed exceptions or briefs to the recommended decision.

B. No oral arguments; no new evidence: The commission shall not permit any oral arguments. The commission shall not consider any evidence outside of the hearing officer's report and filed exceptions or briefs.

C. Final decision: The commission's final decision shall be made by a quorum of the commission at a properly scheduled commission meeting.

D. Written decision served: Within 20 calendar days after the commission's decision is rendered and signed by the chairperson of the commission, the department shall serve upon the respondent a copy of the written decision.

[19.31.2.24 NMAC - Rp, 19.31.2.24 NMAC, 4/1/2022]

19.31.2.21 JUDICIAL REVIEW:

In accordance with Section 17-3-34 NMSA 1978, any person whose privileges have been revoked by the commission or department, and who has requested and received a hearing, may appeal to the district court for further relief. Upon appeal, the district court shall set aside, reverse or remand the decision only if it determines:

A. the agency, commission or hearing officer acted fraudulently, arbitrarily or capriciously;

B. the final decision was not supported by substantial evidence; or

C. the agency did not act in accordance with law.

[19.31.2.25 NMAC - Rp, 19.31.2.25 NMAC, 4/1/2022]

19.31.2.22 INTERSTATE WILDLIFE VIOLATOR COMPACT SUSPENSION AND REVOCATION:

Any person whose name appears on the Interstate Wildlife Violator Compact (IWVC) list and whose privileges have been suspended or revoked in another state and whose convictions have been verified by the department as constituting 20 or more points if committed in New Mexico shall be reciprocally suspended or revoked immediately for the time frame indicated by the originating state. Any resident who fails to comply with

the terms of a citation including failure to appear, from a member state shall have his or her privileges suspended immediately until they have complied with the court appearance or citation requirements in the other state.

A. Notice procedures: The information provided by the board of wildlife violator compact administrators or their designee shall be deemed sufficient to allow the department by and through its director to suspend the violator and send the same violator a NOS in which the department will notify the violator of their right to contest the suspension or revocation.

B. Contesting procedures: A person wishing to contest their IWVC reciprocal suspension or revocation in New Mexico must provide evidence to the department which shows:

- (1) the violation(s) leading to a revocation or suspension in another state, if committed in New Mexico, would not have accrued 20 or more points; or
- (2) the respondent is not the person whose name appears on the wildlife violator compact list as being revoked by another wildlife violator compact member state; or
- (3) the revocation or suspension in the other wildlife violator compact member state ended or has been rescinded.
- (4) If a suspension or revocation is contested and the department determines that the person suspended or revoked should be reinstated, they will do so immediately. Any person who is not satisfied with the department's determination after contesting their IWVC suspension or revocation may appeal the department's decision in writing to the director within 20 calendar days of the department's decision. The director shall consider all evidence presented by both the department and the suspended or revoked person and shall have the final decision on whether a contested IWVC reciprocal suspension or revocation will be upheld or rescinded.

C. Notification to the commission: The department shall notify the commission of the number of individuals reciprocally revoked or suspended pursuant to this subsection at a properly scheduled commission meeting.

[19.31.2.22 NMAC - Rp, 19.31.2.22 NMAC, 4/1/2022]

19.31.2.23 PARENTAL RESPONSIBILITY ACT:

Any person listed as in violation of the PRA by HSD shall have their privileges suspended until they are in compliance with the PRA and have paid the reinstatement fee to the department. In cases where the person can show the department that they were incorrectly placed on that month's list they shall not be required to pay the reinstatement fee and shall be reinstated immediately.

A. Notice procedures: When the department receives a HSD certified list of obligors not in compliance with the PRA, the department shall send a NOS to any named obligor in the department's database. The NOS shall inform the obligor that their privileges have been suspended until they are in compliance with the PRA and have paid the department reinstatement fee.

B. Notification to the commission: The department shall notify the commission of the number of individuals suspended pursuant to this section at a properly scheduled commission meeting after the director has acted to suspend such individuals.

C. Reinstatement fee: Any person whose privileges have been suspended in accordance with the PRA shall be reinstated after demonstrating proof of compliance from the HSD, and having paid the department of game and fish a reinstatement fee of \$25. The director has the authority to waive this fee in the case of unusual circumstances or clerical errors.

[19.31.2.23 NMAC - Rp, 19.31.2.23 NMAC, 4/1/2022]

19.31.2.24 FAILURE TO APPEAR, FAILURE TO PAY PENALTY ASSESSMENT OR CIVIL JUDGEMENT:

In accordance with Section 17-2-10.3 NMSA 1978 the privileges of a person who fails to comply with the terms of a citation including failure to appear in court after proper notice for a hearing as required by law, a person who fails to pay a penalty assessment levied pursuant to Section 17-2-10.1 NMSA 1978, or a person who has a civil judgment assessed against them or who has entered into a voluntary civil assessment payment plan pursuant to Section 17-2-26 NMSA 1978, shall be suspended until in compliance or the amount owed to the department has been paid in full.

A. Notice procedures: The department shall send a NOS to any person who meets the criteria listed in this section. The NOS shall inform the respondent that their privileges have been suspended until they come into compliance with the law or pays the amount owed in full.

B. Notification to the commission: The department shall notify the commission of the number of individuals suspended pursuant to this section at a properly scheduled commission meeting after the director has acted to suspend such individuals.

C. Reinstatement: Any person whose privileges have been suspended in accordance with this section shall be reinstated after paying their outstanding penalty assessment(s) or civil judgement(s) in full or upon coming into compliance with any court order to appear and having any warrant issued resolved.

[19.31.2.24 NMAC - Rp, 19.31.2.24 NMAC, 4/1/2022]

19.31.2.25 JUDICIAL REVIEW:

In accordance with Section 17-3-34 NMSA 1978, any person whose privileges have been revoked or suspended by the commission or department, and who has requested and received a hearing, may appeal to the district court for further relief. Upon appeal, the district court shall set aside the decision only if it is found to be:

- A.** arbitrary, capricious or an abuse of discretion;
- B.** not supported by substantial evidence in the record; or
- C.** otherwise not in accordance with law.

[19.31.2.25 NMAC - Rp, 19.31.2.25 NMAC, 4-1-2019]

19.31.2.26 WILDLIFE VIOLATOR COMPACT SUSPENSION AND REVOCATION:

Any person whose name appears on the wildlife violator compact list or who has been revoked by another wildlife violator compact member state and is in accordance with Subsection B of Section 17-2-10.3 NMSA 1978 shall have his or her privileges revoked or suspended. Any resident who fails to comply with the terms of a citation including failure to appear, from a member state shall have his or her privileges suspended until they have complied with the court appearance or citation requirements in the other state.

A. Notice procedures: The information provided by the board of wildlife violator compact administrators or their designee shall be deemed sufficient to allow the department by and through its director to send the same violator a NOI and an opportunity to request a hearing.

B. Hearing procedures: If a hearing is requested, it shall be conducted in accordance with this rule with the following limitations:

(1) The issues to be decided at the hearing, if requested, are limited to whether:

(a) the violation(s) leading to a revocation or suspension in another state, if committed in New Mexico, would have accrued 20 or more points;

(b) the respondent is the person whose name appears on the wildlife violator compact list as being revoked by another wildlife violator compact member state;

(c) the revocation or suspension in the other wildlife violator compact member state ended or has been rescinded.

(2) In any hearing under this section, relevant evidence shall be limited to documentary evidence that refutes the issues listed in this subsection.

C. Default orders for failure to request a hearing: In the event a respondent does not request a hearing within 20 days of the date that notice was served, the director may administer the suspension or revocation under 19.31.2.26 NMAC without further commission consideration.

D. Notification to the commission: The department shall notify the commission of the number of individuals revoked or suspended pursuant to Subsection C of Section 19.31.2.26 NMAC at a properly scheduled commission meeting after the director has taken action to revoke or suspend such individuals.

[19.31.2.26 NMAC - Rp, 19.31.2.26 NMAC, 4-1-2019]

19.31.2.27 SUSPENSION:

The Parental Responsibility Act (PRA), Section 40-5A-1 NMSA 1978, provides that the commission shall suspend the privileges of any person not in compliance with the PRA, and allows the reinstatement of such privileges at any time that the obligor comes into compliance and pays the reinstatement fee. Chapter 17 NMSA 1978 provides that the commission shall suspend the privileges of any person who fails to pay a penalty assessment or a civil judgment, until the assessment or judgment is paid in full or who fails to appear, after proper notice, for hearings as required by law or regulation until they have made an appearance in the court.

[19.31.2.27 NMAC - Rp, 19.31.2.27 NMAC, 4-1-2019]

19.31.2.28 PARENTAL RESPONSIBILITY ACT:

Any person found to be in violation of the PRA, after notice and an opportunity to request a hearing, shall have his or her privileges suspended until he or she provides a certificate of compliance from the HSD and has paid the reinstatement fee.

A. Notice procedures: When the department receives a HSD certified list of obligors not in compliance with the PRA, the director shall send a NOI to any named obligor in the department's database. The NOI shall inform the obligor that the obligor's privileges will be suspended unless the obligor:

(1) files a written request for a hearing within 30 days from the date that the notice is mailed; or

(2) provides the department, within 30 days from the date the notice is mailed, a valid certificate of compliance from the HSD.

B. Hearing procedures: Hearings shall be in accordance with this rule.

(1) The issues to be decided at the hearing, if requested, are limited to whether the respondent is:

(a) in compliance with a judgment and order for support;

(b) in compliance with a subpoena or warrant relating to paternity or child support proceedings; and

(c) the person whose name appears on the certified list sent to the department from the HSD.

(2) In any hearing under this section, relevant evidence shall be limited to documentary evidence that refutes the issues listed in this subsection.

C. Default orders for failure to request a hearing: In the event an obligor does not request a hearing, or provide proof of compliance within 30 days of the date the notice was mailed, the director may administer the suspensions without further commission consideration.

D. Notification to the commission: The department shall notify the commission of the number of individuals suspended pursuant to Subsection C of 19.31.2.28 NMAC at a properly scheduled commission meeting after the director has taken action to suspend such individuals.

E. Reinstatement fee: Any person whose privileges have been suspended in accordance with the PRA shall be reinstated after demonstrating proof of compliance from the HSD, and having paid the department of game and fish a reinstatement fee of \$25.00 and all costs associated with his or her hearing. The director has the authority to waive this fee in the case of unusual circumstances or clerical errors.

[19.31.2.28 NMAC - Rp, 19.31.2.28 NMAC, 4-1-2019]

19.31.2.29 FAILURE TO APPEAR, FAILURE TO PAY PENALTY ASSESSMENT OR CIVIL JUDGEMENT:

In accordance with Section 17-2-10.3 NMSA 1978 the privileges of a person who fails to comply with the terms of a citation including failure to appear in court after proper notice for a hearing as required by law, a person who fails to pay a penalty assessment levied pursuant to Section 17-2-10.1 NMSA 1978, or a person who has a civil judgment assessed against them pursuant to Section 17-2-26 NMSA 1978, shall be suspended until in compliance.

A. Notice procedures: Pursuant to Section 17-2-10.3 NMSA 1978, a person who has failed to appear in court for a hearing as required by law, has failed to pay a penalty assessment pursuant to Section 17-2-10.2 NMSA 1978, or a person who owes damages pursuant to a civil judgment in accordance with Section 17-2-26 NMSA 1978, the director shall send a NOI. The NOI shall inform the respondent that the respondent's privileges will be suspended unless the respondent:

(1) files a written request for a hearing within 30 days from the date that the notice is mailed; or

(2) pays the penalty assessment or civil judgement in full within 30 days from the date the notice is mailed.

B. Hearing procedures: Hearings shall be conducted in accordance with this rule with the following limitations:

(1) The issues to be decided at the hearing are limited to whether the respondent:

(a) owes an outstanding penalty assessment or civil judgement; or

(b) failed to appear for a court hearing as required by law.

(2) In any hearing under this section, relevant evidence shall be limited to documentary evidence that refutes the issues listed in this subsection.

C. Default orders for failure to request a hearing: In the event a respondent does not request a hearing, or pay their outstanding penalty assessment or civil judgement in full within 30 days of the date that notice was mailed, the commission grants approval to the department through the director to administer the suspension without further commission consideration or notice.

D. Notification to the commission: The department shall notify the commission of the number of individuals suspended pursuant to Subsection C of 19.31.2.29 NMAC at a properly scheduled commission meeting after the director has taken action to suspend such individuals.

E. Reinstatement: Any person whose privileges have been suspended in accordance with this section shall be reinstated after paying their outstanding penalty assessment(s) or civil judgement(s) in full.

PART 3: HUNTING AND FISHING LICENSE APPLICATION

19.31.3.1 ISSUING AGENCY:

New Mexico department of game and fish.

[19.31.3.1 NMAC - Rp, 19.31.3.1 NMAC, 1/1/2023]

19.31.3.2 SCOPE:

Sportspersons interested in fishing, hunting and trapping and management of big game and furbearers in New Mexico. Additional requirements may be found in Chapter 17 NMSA 1978 and other Parts of Title 19, Chapter 31 NMAC.

[19.31.3.2 NMAC - Rp, 19.31.3.2 NMAC, 1/1/2023]

19.31.3.3 STATUTORY AUTHORITY:

Sections 17-1-14, 17-1-26, 17-3-2, 17-3-5, 17-3-7, 17-3-13, 17-3-14, and 17-3-14.1 NMSA 1978, which pertain to the types of licenses and permits available and grant the state game commission authority to create regulations setting the license fees and application procedure.

[19.31.3.3 NMAC - Rp, 19.31.3.3 NMAC, 1/1/2023]

19.31.3.4 DURATION:

Permanent.

[19.31.3.4 NMAC - Rp, 19.31.3.4 NMAC, 1/1/2023]

19.31.3.5 EFFECTIVE DATE:

January 1, 2023, unless a later date is cited at the end of a section.

[19.31.3.5 NMAC - Rp, 19.31.3.5 NMAC, 1/1/2023]

19.31.3.6 OBJECTIVE:

Basic regulation, rules and procedures governing the issuance of licenses, permits and stamps, as well as special draw permits and licenses issued by the department pertaining to deer, elk, pronghorn, bighorn sheep, Barbary sheep, bear, turkey, oryx, ibex, javelina, furbearers, small game and other species determined by the state game commission.

[19.31.3.6 NMAC - Rp, 19.31.3.6 NMAC, 1/1/2023]

19.31.3.7 DEFINITIONS:

[RESERVED]

19.31.3.8 PUBLIC DRAW LICENSES AND PERMITS - APPLICATION FOR:

A. Application form: Application for all public licenses and permits shall be submitted via the department website.

B. Application deadline(s): Applications for all public licenses and permits, including population management hunts, Sandhill crane, pheasant, turkey, pronghorn, elk, Barbary sheep, bighorn sheep, bear, deer, oryx, javelina, and ibex hunts must be received by 5:00 p.m. on dates set by the state game commission. If any licenses or permits are available after the drawing is completed, those licenses or permits may be sold online via secondary sale.

C. One applicant per application: No more than one person may apply under each application number for bighorn sheep, bear, and GMU 5A private land deer.

D. Two applicants per application: No more than two persons may apply under the same application number for youth-only Sandhill crane, youth-only pheasant, turkey, ibex and oryx.

E. Four applicants per application: No more than four persons may apply under the same application number for Sandhill crane, pheasant, deer, elk, pronghorn, Barbary sheep and javelina.

F. Resident and non-resident application combination: Any mixture or combination of residents and non-residents may make application for special drawing providing the number of applicants does not exceed the restriction of this section (Subsection D or E).

G. Applications rejected: Applications for licenses may be rejected by the department if an applicant did not:

- (1) apply on the proper online form as designated by the director;
- (2) submit the correct or required information;
- (3) submit the correct license or application fee, and any other required fee;
- (4) meet the deadline date; or
- (5) comply with a current statute or rule.

H. More applications than permits: If more applications for public licenses or permits are received than there are licenses or permits available, the available licenses or permits shall be allotted by means of a public drawing.

I. Increase in licenses or permits: The number of licenses or permits available may be increased to accommodate corrections or errors by the department which results in the addition of names to the successful list.

J. Additional choices: Applicants for public permits or licenses may designate additional choices for hunt periods.

K. Application categories: Applications for special drawing hunts will be placed into the appropriate categories, as specified in Section 17-3-16 NMSA 1978 by department personnel or their designee. Special drawings shall continue to draw applicants from the appropriate drawing pool progressively for each respective hunt code, starting with first choice applicants, then proceeding to second and subsequent choice applicants until the quota has been met or the pool of applicants has been exhausted.

L. Resident and non-resident applications:

(1) To be placed in the separate pool designated for guided hunts, an applicant must have a valid registration number issued to a New Mexico outfitter as prescribed in Subsection H of Section 17-3-6 NMSA 1978, on their application.

(2) For an application to be successfully drawn, there must be a sufficient number of licenses or permits available for that hunt code to accommodate all applicants from their respective drawing pools.

(3) Any licenses left over from the appropriate drawing pool will be allocated as prescribed in Subsection C of Section 17-3-16 NMSA 1978.

M. New Mexico department of game and fish customer identification number: All persons purchasing licenses, making application to the department for hunt drawings for public licenses and permits, and converting private landowner authorizations to licenses must have a "New Mexico department of game and fish (NMDGF) customer identification number."

(1) "NMDGF customer identification number" shall be obtained only from the department and must be obtained prior to the submission of any application or private landowner authorization.

(2) Each person making application for public drawing license, permit or private landowner authorization must use their own valid NMDGF customer identification number on his or her application.

(3) Any application received without a valid NMDGF customer identification number or false NMDGF customer number will be rejected.

N. Trapper license restriction: No nonresident who resides in a state that does not permit New Mexico residents to procure nonresident trapper licenses may purchase a New Mexico nonresident trapper license.

O. Director's authority to adjust licenses and permits: The director may adjust licenses or permit numbers for special drawings, by no more than one per hunt code, to comply with Chapter 17 NMSA 1978 and its corresponding rules.

[19.31.3.8 NMAC - Rp, 19.31.3.8 NMAC, 1/1/2023]

19.31.3.9 PRIVATE LAND - ELK LICENSES:

A. Private land licenses for elk will not be issued through the public draw.

B. The amount due for a private land elk license in the primary and special management zones as defined in 19.31.14 NMAC shall be composed of the "landowner authorization certificate" fee and the appropriate "certificate of application" fee as defined in 19.30.9 NMAC, and the appropriate license fees as defined in Sections 17-3-13 and 17-3-7 NMSA 1978.

C. Licenses for primary and special management zones will be issued only up to the number of authorizations allotted for each ranch and only to persons who provide a valid authorization and ranch number and pay the appropriate fees.

D. Ranch codes allowing purchase of private-land elk licenses in the secondary management zone, as defined in 19.31.14 NMAC, will be issued to landowners in accordance with 19.30.5 NMAC.

[19.31.3.9 NMAC - Rp, 19.31.3.9 NMAC, 1/1/2023]

19.31.3.10 NEW MEXICO RESIDENT MILITARY AND VETERAN DISCOUNT:

A. A New Mexico resident, as defined in Section 17-3-4 NMSA 1978, who is active duty military or a veteran of the United States military as defined by the New Mexico department of veterans' services is eligible for a fifty percent discount on all licenses, permits and stamps as defined in 19.30.9 NMAC and in Section 17-3-13 NMSA 1978. Exceptions: No discount shall apply to the resident, disabled veteran game hunting and fishing combination license, or to any administrative fee, including the "landowner authorization certificate" fee, the "certificate of application" fee, and the license vendor fee.

B. Nonresident military personnel stationed on Fort Bliss who qualify for resident prices on big-game hunts that occur on Fort Bliss are not eligible for the resident military and veteran discount.

C. The department shall conduct audits to determine eligibility for benefits as defined under 19.31.3.10 NMAC. Failure to provide requested documentation within the timeframe specified by the department shall result in the removal of the discount and suspension of any future discounts until such time as the requested documents are received and verified.

D. Any license, permit or stamp obtained by falsely claiming this discount is unlawful.

19.31.3.11 RESTRICTIONS/REQUIREMENTS:

A. One license per big game species per year: It shall be unlawful for anyone to hold more than one permit or license for any one big game species during the current license year unless otherwise allowed by rule.

B. Improper license and permit: Any person who attempts to capture or shoot, hunts, kills, injures or takes, in any manner any big-game, small game or fur-bearing animal, turkey or game fish other than in accordance with the specified hunt code or dates, legal sporting arm, bag limit allowance or area designated on a license or permit issued by the department to that person is deemed to be hunting, fishing or trapping without a proper license as required by Section 17-3-1 NMSA 1978 unless otherwise exempted by a valid commission rule.

C. Transfer of permits or licenses: The director may grant the transfer of a hunting license or permit once it has been determined that prior to the hunt start date, a licensee or their official representative provides written, verifiable information indicating the licensee has died, sustained an injury or life-threatening illness, or has been subject to deployment by the United States military that prohibits the licensee from hunting. Transfer requests must be submitted in writing prior to the hunt start date. When a transfer of a license results in a higher license fee due to differences between the original licensee and the new licensee (age, residency, etc.), the difference shall be paid prior to issuance of a license or permit.

D. Refunds: The director may grant the refund of a hunting license once it has been determined that a licensee or their official representative provides written, verifiable information indicating the licensee has died, sustained an injury or life-threatening illness, or has been subject to deployment by the United States military that prohibits the licensee from hunting. Refund requests must be submitted in writing prior to the hunt start date.

E. Donation of permits or licenses: Upon written request from a licensee or their official representative, the director may grant the donation of a hunting license for transfer to a youth 17 years of age or younger, a New Mexico resident veteran of the United States military as approved by the New Mexico department of veterans' services, or a "first responder" who is a resident of the state of New Mexico as defined by Subsection B of Section 12-10D-2 NMSA 1978 who has been qualified through an approved nonprofit organization that promotes hunting, fishing and trapping activities. The donor of the license shall not be eligible for a refund of license or application fees. When a transfer of a license results in a higher license fee due to differences between the original licensee and the new licensee (age, residency, etc.), the difference shall be paid prior to issuance of a license or permit. The state game commission must approve any nonprofit organizations prior to their participation in receiving, identifying or submitting recipients for donated licenses or permits. In order to be an approved

nonprofit organization, the organization must demonstrate to the state game commission their history and ability to promote hunting, fishing, and trapping activities. A once-in-a-lifetime licensee may be reinstated as eligible to participate in future drawings for the same species and hunt type if the licensee donated his or her license to an individual qualified by an approved nonprofit organization. Donation of a once-in-a-lifetime license will not prohibit the donor from applying for and receiving another license for the same species and restrictions in the future.

F. More than one application: It shall be unlawful to submit more than one application per species for any license or permit issued through a special drawing, unless otherwise permitted by regulation.

G. Handicapped fishing or handicapped game hunting license qualifications: To hold a handicapped fishing or handicapped game hunting license, the individual must be a resident of New Mexico and must attest to having a severe physical or developmental disability that substantially limits one or more major life activities. Reasonable accommodation may be made, relating to these licenses, upon request.

H. Mobility-impaired (MI) deer, elk, oryx, or pronghorn license qualifications: To hold a mobility impaired deer, elk, oryx, or pronghorn license, a person must submit verifiable documentation on the proper department form that is attested to by a certified medical physician that the individual has a permanent mobility restriction which limits their activity to a walker, wheelchair, or crutches; or one or more permanent disabilities or conditions which substantially limit the individual's ability to walk; and then obtain department approval for MI hunt eligibility. Every person qualified as MI shall have their card/eligibility expire 48 months from the issuance date, and must resubmit their application and obtain department approval as required above prior to being eligible to apply for any MI hunt.

I. Youth-only hunts: Only applicants who are 17 years of age or younger on the opening day of the hunt are eligible to apply for or participate in any youth-only hunt, including federal youth waterfowl hunt days. Applicants must have a valid hunter education certificate number, or mentor youth number for appropriate species.

J. Required information: An individual making license application shall supply the department on the appropriate form with all required personal information including, but not limited to name, address, date-of-birth, last four digits of his/her social security number prior to an application form being processed or a license being awarded.

K. Military-only hunts: Applicants must be full time active military and proof of military status must be received by the department prior to applying for any military only hunt.

L. Veteran oryx hunts: Only New Mexico resident veterans who served a minimum of 90 days active duty service in the U.S. Military, or six continuous years in the National Guard or Military Reserve Component, or who were commissioned officers

of the U.S. Public Health or National Oceanic and Atmospheric Administration are eligible to apply for Veteran oryx licenses. Applicants must have been honorably discharged from the U.S. military, and must provide a valid DD-214 prior to applying for any Veteran oryx hunt.

M. NMDGF customer identification number: It shall be unlawful for an applicant to use another person's NMDGF customer identification number or to provide false information to obtain a NMDGF customer identification number.

N. Application fee: Prior to the drawing, all applicants for special hunt drawings for public draw licenses shall pay the applicable species license fees including depredation damage stamp, the required game hunting license fee and the non-refundable draw application fee as defined by 19.30.9.9 NMAC. Disabled American veterans certified as holders of lifetime general hunting and fishing licenses are exempt from paying the application fee when applying for deer hunt drawings.

O. License, permit and stamp requirements: A game hunting or game hunting and fishing license is required to hunt any small game species, and an annual game hunting or game hunting and fishing license is required to apply for or purchase any big-game or turkey license (exception: disabled veteran card holders). A habitat management and access validation is required in conjunction with any hunting, fishing, or trapping license (exceptions: persons under age 18, free fishing license holders over age 70, and disabled veteran card holders). A habitat stamp is required in conjunction with any hunting, fishing, or trapping license on forest service or bureau of land management (BLM) properties (exceptions: anglers and trappers under age 12, free fishing license holders over age 70, and disabled veteran card holders). Migratory bird hunters must possess a Harvest Information Program (HIP) number. Waterfowl hunters must also possess a federal duck stamp. Nonresidents must have a nongame hunting license or any valid hunting license to hunt unprotected or nongame species. Draw permits must be accompanied by the appropriate hunting license(s) and stamp(s). Additional permits may be required for specific hunting and fishing activities pursuant to 19.31.6.9 NMAC, 19.31.5.8 NMAC and 19.31.4.13 NMAC.

P. Penalty assessments: When a person is issued a penalty assessment citation for fishing without a license, hunting small game without a license, or failing to possess an applicable habitat management and access validation, habitat stamp or second rod validation; the citation will serve as a license for that specific activity for 15 calendar days. The person must remit the prescribed penalty amount indicated on the face of the citation within 30 days of the date of citation issuance.

Q. Foster family fishing license: To qualify for a free fishing license pursuant to Subsection A of 32A-3A-12 NMSA 1978, proof of eligibility must be provided to the Department in person. Proof of eligibility includes documentation of New Mexico residency and status as a foster parent; a child in the custody of a foster parent, the children, youth and family department (CYFD) or tribal custody; or a young adult enrolled in the fostering connections program.

[19.31.3.11 NMAC – Rp, 19.31.3.11 NMAC, 1/1/2023; A, 4/1/2024]

19.31.3.12 DENIAL OR REVOCATION:

Any applicant for any license, permit, certificate or registration will be automatically rejected if their name and other identifying factors appears on the department's revocation list or a list of provided by the wildlife violator compact.

[19.31.3.12 NMAC - Rp, 19.31.3.12 NMAC, 1/1/2023]

PART 4: FISHERIES

19.31.4.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.31.4.1 NMAC - N, 4/1/2022]

19.31.4.2 SCOPE:

Sportfishing. Additional requirements may be found in Chapter 17 NMSA 1978 and Chapters 30 through 34 of Title 19 NMAC.

[19.31.4.2 NMAC - N, 4/1/2022]

19.31.4.3 STATUTORY AUTHORITY:

17-1-14 and 17-1-26, and 17-2-1 NMSA 1978, provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species.

[19.31.4.3 NMAC - N, 4/1/2022]

19.31.4.4 DURATION:

April 1, 2022 through March 31, 2026.

[19.31.4.4 NMAC - N, 4/1/2022]

19.31.4.5 EFFECTIVE DATE:

April 1, 2022, unless a later date is cited at the end of a section.

[19.31.4.5 NMAC - N, 4/1/2022]

19.31.4.6 OBJECTIVE:

Establishing open seasons, bag limits, and other rules pertaining to management and harvest of the fisheries resources of New Mexico.

[19.31.4.6 NMAC - N, 4/1/2022]

19.31.4.7 DEFINITIONS:

Specific terms as used in this regulation are defined.

A. "Angling" shall mean taking or attempting to take fish by hook and line, with the line held in the hand or attached to a pole or rod or other device that is held in the hand or closely attended. "Fishing" shall be synonymous to "angling".

B. "Bait fish" is defined as those nongame fish which are not otherwise protected by statute or regulation.

C. "Barbless lure or fly" shall mean an artificial lure made of wood, metal, or hard plastic or an artificial fly made from fur, feathers, other animal or man-made materials tied onto a hook to resemble or simulate insects, bait fish, or other foods. A fly or lure may only bear a single hook, from which any or all barbs must be removed or bent completely closed, or which are manufactured without barbs. Living or dead arthropods and annelids, or rubber or plastic moldings of these or other foods are not included.

D. Boundary descriptions:

(1) "U.S.", as used in boundary descriptions herein, shall mean United States highway.

(2) "N.M.", as used in boundary descriptions herein, shall mean New Mexico state road.

(3) "I", as used in boundary descriptions herein, shall mean interstate highway.

E. "Chum" as used herein, is organic material that is not injurious to aquatic life and is used to attract fish.

F. "Daily bag limit" shall mean the number of fish that can be legally harvested within a calendar day.

G. "Daylight hours" shall mean from one-half hour before sunrise to sunset.

H. "Snagging" as used herein, is the intentional taking of fish with hooks, gang hooks, or similar devices where the fish is hooked in a part of the body other than the mouth.

[19.31.4.7 NMAC - N, 4/1/2022]

19.31.4.8 [RESERVED]

[19.31.4.8 NMAC - N, 4/1/2022]

19.31.4.9 SEASON DATES:

A. General seasons: All waters in New Mexico shall be open for the taking of game fish from April 1 through March 31 of the effective years, with the following exceptions:

(1) Special waters

(a) The following waters shall be open between 12 noon March 1 through 12 noon October 31: upper and lower Charette lakes, Maxwell lakes 13 and 14, and Clayton lake.

(b) All waters in the Valle Vidal (Vermejo tract of the Carson national forest) shall be open from July 1 through December 31.

(c) Laguna del Campo at Los Ojos state fish hatchery shall be open from May 1 through October 31.

(d) Red River city ponds shall be open from March 1 through November 15.

(e) Black Canyon creek from the forest road 150 (North Star Mesa road) crossing upstream to its headwaters and Mogollon creek in Grant and Catron counties upstream from waterfall barrier near intersection of FS trail 153 to confluence of Trail canyon shall be open from July 1 through October 31.

(f) All waters on the Valles Caldera national preserve shall be open from May 1 to October 15.

(2) Waters on national wildlife refuges waters on U.S. national wildlife refuges shall be open for the taking of game fish in accordance with regulations of the U.S. fish and wildlife service; provided that season dates shall be from April 1 through March 31, on those national refuges for which the fish and wildlife service has not regulated season dates.

B. Special Kokanee salmon seasons, dates, and location:

(1) The following waters shall be open October 1 through December 31 for the special Kokanee salmon season: Chama river from El Vado lake upstream to the west boundary of the Rio Chama wildlife and fishing area, Eagle Nest lake, El Vado lake, and Navajo lake including the Pine river except as otherwise specified in Paragraph (3) of Subsection B of 19.31.4.9 NMAC.

(2) Heron lake shall be open for the special Kokanee salmon season from November 11 through December 31.

(3) Heron lake, including the Willow creek tributary shall be closed to Kokanee salmon fishing between October 1 and November 10. The buoyed "no wake" areas, as posted by New Mexico State Parks, at the Pine boat ramp and Sims mesa boat ramp at Navajo lake, including the shoreline within the "no wake" areas, shall be closed to Kokanee salmon fishing October 1 through December 31. It shall be unlawful to fish for, snag, or possess Kokanee salmon in these areas during the closure period.

[19.31.4.9 NMAC - N, 4/1/2022]

19.31.4.10 HOURS OF FISHING:

Day and night fishing for all species of game fish shall be permitted in all waters during the open season, except it shall be unlawful to fish in any water outside of hours and dates posted by any local, state, or federal agency.

[19.31.4.10 NMAC - N, 4/1/2022]

19.31.4.11 DAILY BAG, POSSESSION LIMITS AND REQUIREMENTS OR CONDITIONS:

A. Trout:

(1) Waters with reduced bag limit: No person shall fish waters regulated for reduced limits while having in excess of that limit in possession.

(2) Brown, rainbow, cutthroat, Gila, lake, brook trout and Kokanee salmon:

(a) The daily bag limit shall be five trout and no more than 10 trout shall be in possession, unless otherwise specified in Paragraph (4) of Subsection A of 19.31.4.11 NMAC.

(b) The daily bag limit for cutthroat trout shall be two trout and no more than two cutthroat trout may in possession. Cutthroat trout are included in the bag and possession limits for trout explained in Subparagraph (a) of Paragraph (2) of Subsection A of 19.31.4.11 NMAC.

(c) The daily bag limit for lake trout shall be two trout and no more than four lake trout shall be in possession. Lake trout are included in the bag and possession limits for trout explained in Subparagraph (a) of Paragraph (2) of Subsection A of 19.31.4.11 NMAC.

(3) Special Kokanee salmon season: During the special Kokanee salmon season, the daily bag limit shall be 12 Kokanee salmon in addition to the daily bag limit for trout, and no more than 24 Kokanee salmon may be possessed in addition to the possession limit for trout. It shall be unlawful to possess Kokanee salmon at Heron lake during the closed Kokanee salmon season.

(4) On certain waters the following exceptions shall apply:

(a) Special trout waters - waters, hereafter referred to as "Special Trout Waters", the following exceptions shall apply:

(i) No fish may be kept or held in possession while fishing in the portions of the following waters:

Water name	Portion	County	Exception
Tingley beach south pond	Within the Albuquerque conservancy park	Bernalillo	
Mogollon creek	Upstream from waterfall barrier near intersection of FS trail 153 to confluence of Trail canyon	Catron and Grant	
Cimarron river	From the lower end of Tolby campground downstream approximately 1.4 miles to the first bridge of N.M. 64	Colfax	
Leandro creek	Within the Valle Vidal (Vermejo tract-Carson national forest	Colfax	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited

Any stream on the Valle Vidal	Vermejo tract-Carson national forest	Colfax and Taos	
Black canyon	From the forest road 150 (North Star Mesa road) crossing upstream to its headwaters	Grant	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited
Pecos river	In the Pecos wilderness, above Pecos falls	Mora	
Rio Valdez	In the Pecos wilderness from the waterfall barrier 0.8 miles below FS trail 239 upstream to its headwaters	Mora	
Rito del Padre	From fish migration barrier located about 0.3 miles upstream of the confluence with the Rito Sebadilloses upstream to its headwaters including Rito de los Chimayosos	Mora	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited
West fork Luna creek	From the Carson national forest property boundary upstream to its headwaters	Mora	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited
Jack 's creek	From the water falls located 0.25 mile downstream of NM highway 63 crossing upstream to its headwaters	Mora and San Miguel	
Canada Tio Grande	Within the Carson national forest excluding private land	Rio Arriba	bag and possession limits for rainbow trout, brown trout, and

			brook trout are unlimited
Nabor creek and Nabor lake	Within the Edward Sargent wildlife area	Rio Arriba	
Rio Chama	From the United States geological survey gaging station located 1.3 miles downstream of El Vado lake dam downstream approximately 3 miles to its confluence with the Rio Nutrias	Rio Arriba	
Rio de Las Vacas	From fish migration barrier located about 0.2 miles upstream of FS road 70 crossing to its headwaters	Rio Arriba	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited
Tanques creek	From FS road 93 crossing upstream to its headwaters	Rio Arriba	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited
Rio Cebolla	From the Seven Springs day use area upstream to the headwaters including McKinney pond	Rio Arriba and Sandoval	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited
Rio Santa Barbara	From the west fork and middle fork confluence upstream to its headwaters including the east fork	Rio Arriba and Taos	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited
San Juan river	From Navajo dam downstream approximately 3.75 miles to the	San Juan	

	Crusher Hole day use are (east side of section 16)		
Capulin creek	From its confluence with the Rio Grande to its headwaters	Sandoval	
Rio las Animas	Within the Gila national forest, Black range ranger district excluding private land	Sierra	
Cabresto creek	From Cabresto canyon upstream to its headwaters not including lake fork and Cabresto lake	Taos	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited
Columbine creek	From its confluence with the Red river upstream to its headwaters	Taos	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited
Frijoles creek	From its confluence with Rito de la Olla upstream to its headwaters	Taos	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited
Gavilan creek	From its confluence with the Rio Hondo upstream to its headwaters	Taos	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited
Italianos creek	From its confluence with the Rio Hondo upstream its headwaters	Taos	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited

Palociento creek	From its confluence with Rito de la Olla upstream to its headwaters	Taos	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited
Rio Costilla	From its confluence with Latir creek upstream approximately 2.4 miles to the Valle Vidal tract of the Carson national forest	Taos	
South fork Rio Hondo	From its confluence with the Rio Hondo upstream to its headwaters	Taos	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited
Yerba creek	From the its confluence with the Rio Hondo upstream to its headwaters	Taos	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited
Water name	Portion	County	Exception
Tingley beach south pond	Within the Albuquerque conservancy park	Bernalillo	
Mogollon creek	Upstream from waterfall barrier near intersection of FS trail 153 to confluence of Trail canyon	Catron and Grant	
Cimarron river	From the lower end of Tolby campground downstream approximately 1.4 miles to the first bridge of N.M. 64	Colfax	
Leandro creek	Within the Valle Vidal (Vermejo tract-Carson national forest	Colfax	bag and possession limits for rainbow trout, brown trout, and brook trout are unlimited

Rio Grande	From the New Mexico/Colorado state line downstream to the Taos junction bridge at NM highway 567	Taos	

(b) In Sandoval county; brood pond at Seven Springs state fish hatchery, the daily bag limit shall be five cutthroat trout and no more than 10 cutthroat may be in possession.

(c) On the following waters the daily bag limit shall be three trout and no more than three trout shall be in possession; In Rio Arriba county: Laguna del Campo at Los Ojos state fish hatchery.

B. Warm-water fishes: The daily bag limit for game fish other than trout shall be as listed below and the possession limit shall be twice the daily bag limit.

- (1) striped bass one fish;
- (2) largemouth, smallmouth, and spotted bass five fish;
- (3) walleye five fish;
- (4) crappie 20 fish;

- (5) white bass and white bass x striped bass hybrid 25 fish;
- (6) northern pike 10 fish;
- (7) catfish (all species, except bullheads) 15 fish;
- (8) yellow perch 30 fish;
- (9) tiger muskie (*Esox lucius* x *E. masquinongy*) one fish
- (10) all other warm-water game species 20 fish.

C. The following exception shall apply:

(1) At Alto lake (Lincoln county); Alumni pond (Dona Ana county); Bataan lake (Eddy county); Blue Hole park pond (Guadalupe county); Bosque Redondo (De Baca county); Burn lake (Dona Ana county); Carrizozo lake (Lincoln county); Chaparral lake (Lea county); Conoco lake (Lea county); Conservancy park/Tingley beach (Bernalillo county); Corona lake (Lincoln county); Dennis Chavez pond (Curry county); Escondida lake (Socorro county); Estancia Park lake (Torrance county); Eunice lake (Lea county); Grants city pond (Cibola county); Green Meadow lake (Lea county); Greene Acres lake (Curry county); Harris Pond (San Miguel county); Jal lake (Lea county); lake Van (Chaves county); Liam Knight pond (Sandoval county); McGaffey lake (McKinley county); Ned Houk lakes (Curry county); Oasis state park (Roosevelt county); Pecos River within the Villanueva state park (San Miguel county); Perch lake (Guadalupe county); Rancho Grande ponds (Catron county); Roswell kids pond (Chavez county); Timberon ponds (Otero county); Trees lake (Luna county); and Young pond (Dona Ana county): the daily bag limit for channel catfish will be two fish and the possession limit shall be twice the daily bag limit.

(2) In San Juan county, in the San Juan and Animas rivers, not including Navajo lake, there is no daily bag limit or possession limit for channel catfish and striped bass.

(3) In Colfax county, Eagle Nest lake there is no bag or possession limit for northern pike. All northern pike caught at Eagle Nest lake must be kept in possession. No northern pike shall be intentionally returned to Eagle Nest lake.

(4) In Union county: Clayton Lake; In Grant county: Bill Evans lake; In Grant county: lake Roberts the daily bag limit for largemouth bass shall be two fish and no more than two shall be in possession.

[19.31.4.11 NMAC - N, 4/1/2022]

19.31.4.12 SIZE LIMITS:

A. Black basses:

(1) Any largemouth or spotted bass taken which is less than 14 inches long shall be immediately returned to the water.

(2) Any smallmouth bass taken which is less than 12 inches long shall be immediately returned to the water with the following exceptions:

(a) In San Miguel and Quay counties: Ute and Conchas reservoirs, any smallmouth bass taken which is less than 14 inches long shall be immediately returned to the water.

(b) In Rio Arriba and Taos counties: Rio Grande, there shall be no size limit on smallmouth bass.

B. Tiger muskie (*Esox lucius x E. masquinongy*): Any tiger muskie taken which is less than 40 inches long shall be immediately returned to the water.

[19.31.4.12 NMAC - N, 4/1/2022]

19.31.4.13 GILA TROUT PERMIT REQUIRED:

Every person angling for fish on those sections of the following waters must be in possession of a Gila trout permit, issued in their name by the department or its designee. In Grant county: Black canyon upstream of its confluence with the East fork Gila River and Sapillo creek; In Catron county: West fork Gila river, Whitewater creek from Catwalk National Recreation Trail parking area upstream to headwaters including all tributaries, Mineral creek including all tributaries, and waters upstream from the confluence of Gilita creek and Snow creek including Gilita, Willow and Little Turkey creeks; In Grant and Catron counties: the area from the Middle fork Gila river and West fork Gila river confluence downstream to the East fork Gila river confluence and Mogollon creek upstream from the waterfall barrier near intersection of FS trail 153 to confluence of Trail canyon. A photocopy, duplicate copy or computer printout of this permit will suffice as evidence of receiving such permit.

[19.31.4.13 NMAC - N, 4/1/2022]

19.31.4.14 WATERS WITH AGE OR INDIVIDUALS WITH DISABILITIES USE RESTRICTIONS:

A. Only persons 11 years of age and younger may fish in the following waters: Harris Pond; brood pond at Seven Springs state fish hatchery; Shuree kids ' pond on Valle Vidal (Vermejo tract-Carson national forest); Spring river park pond in Roswell; Conservancy park/Tingley beach kids ' pond; hatchery settling ponds located at the Rock Lake state fish hatchery; and Alto Kids ' Pond.

B. Only persons 11 years of age and younger, those 65 years and older, and individuals with disabilities may fish in the following waters: Blue Hole park pond; posted small pond at Cowles; Harry McAdams park ponds; Red River city middle kids ' pond; and Red River hatchery pond located at the Red River state fish hatchery.

C. Laguna del Campo: Only persons 14 years of age and younger, those 65 years and older, individuals with disabilities, or up to two parents/guardians in direct supervision of a child or children 14 years of age and under who are fishing, may fish in Laguna del Campo located near Los Ojos trout hatchery.

[19.31.4.14 NMAC - N, 4/1/2022]

19.31.4.15 CLOSED WATERS:

A. Waters closed to fishing:

(1) In Catron county: Big Dry creek from Golden link cabin upstream through its headwaters.

(2) In Catron county: Little creek from the "barrier" upstream through all tributaries.

(3) In Catron county: Spruce creek.

(4) In Catron and Sierra counties: Main Diamond creek above the point of confluence with south Diamond creek.

(5) In Catron and Sierra counties: South Diamond creek drainage.

(6) In Colfax county: a posted area lying within 300 feet of Eagle Nest dam, which is closed to entry.

(7) In Colfax county: a posted area of Stubblefield and Laguna Madre lakes lying within 150 feet of the outlet structures.

(8) In Grant county: east fork of Mogollon creek upstream of Trail canyon including Woodrow canyon.

(9) In Grant county: Sheep Corral creek.

(10) In Lincoln county: posted areas of Alto reservoir and Bonito lake near the outlets.

(11) In Catron county: All tributaries of the West fork of the Gila river above waterfalls between FS Trail No. 151 crossing of the West fork of the Gila river near

White creek cabin and FS Trail No. 151 crossing of the West fork of the Gila river near Liley canyon. Mainstem of the West fork of the Gila river will be open to fishing.

(12) In Catron county: Iron creek in the Gila wilderness upstream of the constructed waterfall barrier located in T12SR17WSec16NE.

B. Taking fish from hatchery waters: It is unlawful to take or attempt to take fish from the waters of any fish hatchery or rearing ponds owned and operated by state or federal agencies. During open season, however, angling for trout shall be permitted in the Glenwood pond at the Glenwood state fish hatchery, Red River hatchery pond at the Red River state fish hatchery, Brood pond at Seven Springs state fish hatchery, and Laguna del Campo at Los Ojos state fish hatchery, and settling ponds at Rock Lake state fish hatchery. Additionally, the director may expressly authorize other limited fishing at the state's fish hatcheries based on management needs.

C. Taking fish from or through the ice: Fish may be taken from or through the ice except it is unlawful to take fish from or through the ice on the following waters: Santa Cruz lake, Monastery lake, Bonito lake, and Springer lake.

[19.31.4.15 NMAC - N, 4/1/2022]

19.31.4.16 ESTABLISHING FREE FISHING WEEKENDS:

The first consecutive Saturday and Sunday in June and the last consecutive Saturday and Sunday in September during the effective dates of this regulation, are established as free fishing weekends whereby anglers may fish public waters in New Mexico as otherwise provided by regulation without a fishing license, stamps or paying any license fees. Anglers must abide by all other fishing laws including but not limited to bag limits, tackle restrictions, age restrictions and hours during each free fishing weekend.

[19.31.4.16 NMAC - N, 4/1/2022; A, 9/12/2023]

PART 5: UPLAND GAME

19.31.5.1 ISSUING AGENCY:

New Mexico department of game and fish.

[19.31.5.1 NMAC - Rp, 19.31.5.1 NMAC, 4/1/2022]

19.31.5.2 SCOPE:

Sportspersons interested in upland game management and hunting. Additional requirements may be found in Chapter 17 NMSA 1978 and Title 19 NMAC.

[19.31.5.2 NMAC - Rp, 19.31.5.2 NMAC, 4/1/2022]

19.31.5.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected mammals, birds and fish.

[19.31.5.3 NMAC - Rp, 19.31.5.3 NMAC, 4/1/2022]

19.31.5.4 DURATION:

April 1, 2022 through March 31, 2026.

[19.31.5.4 NMAC - Rp, 19.31.5.4 NMAC, 4/1/2022]

19.31.5.5 EFFECTIVE DATE:

April 1, 2022 unless a later date is cited at the end of a section.

[19.31.5.5 NMAC - Rp, 19.31.5.5 NMAC, 4/1/2022]

19.31.5.6 OBJECTIVE:

Establishing seasons on dusky grouse, Eurasian collared-dove, pheasant, Gambel's quail, Montezuma quail, northern bobwhite, scaled quail, tree squirrels, and setting falconry seasons.

[19.31.5.6 NMAC - Rp, 19.31.5.6 NMAC, 4/1/2022]

19.31.5.7 DEFINITIONS:

A. "Department" shall mean the New Mexico department of game and fish.

B. "Falconry" shall mean hunting game mammals or game birds using raptors.

C. "Possession limit" shall mean the number of game mammals or game birds in a person 's possession regardless of the location stored.

D. "Tree squirrels" shall mean squirrels in the genera *Sciurus* and *Tamiasciurus*, including Abert's squirrel, red squirrel, Arizona gray squirrel, fox squirrel and eastern gray squirrel.

E. "Wildlife management areas" or "WMAs" shall mean those areas as described in 19.34.5 NMAC, Wildlife Management Areas.

[19.31.5.7 NMAC - Rp, 19.31.5.7 NMAC, 4/1/2022]

19.31.5.8 MANNER AND METHODS FOR UPLAND GAME:

A. Season and hours: Upland game may be hunted or taken only during open seasons and only during the period from one-half hour before sunrise to one-half hour after sunset, unless otherwise allowed or restricted by rule.

(1) On Bernardo, Casa Colorada, La Joya, and W.S. Huey WMAs, hunting hours shall be from one-half hour before sunrise to 1:00 p.m.

(2) For the special permit pheasant hunts on W.S. Huey WMA, hunting hours shall be from one-half hour before sunrise to one-half hour after sunset.

B. State WMAs open, species that can be hunted, and days open for hunting:

(1) The W.S. Huey WMA shall be open for quail hunting on Mondays, Wednesdays, and Saturdays during established quail seasons.

(2) Bernardo, Casa Colorada, La Joya, and W.S. Huey WMAs shall be open to pheasant hunting by special draw permit only.

(3) The Edward Sargent, W. A. Humphries, Rio Chama, Urraca, Colin Neblett, and Elliot S. Barker WMAs shall be open for upland game hunting during established tree squirrel and dusky grouse seasons.

(4) The Water canyon, Marquez, prairie-chicken areas, and Socorro-Escondida WMAs shall be open for upland game hunting during established quail seasons.

(5) Eurasian collared-dove hunting shall be open during established mourning and white-winged dove seasons as defined in 19.31.6 NMAC Migratory Game Bird, and during established quail, tree squirrel, and dusky grouse seasons.

C. All Eurasian collared-dove must have an identifiable feathered wing attached until the bird has arrived at the person's residence, processor, or place of final storage.

[19.31.5.8 NMAC - Rp, 19.31.5.9 NMAC, 4/1/2022]

19.31.5.9 UPLAND GAME HUNTING SEASONS:

Hunting seasons shall be as indicated below.

SPECIES	OPEN AREAS	DATES	DAILY BAG (POSSESSION) LIMITS
Eurasian collared-dove	Statewide	April 1 - March 31	no bag or possession limit

dusky grouse	Statewide	Sept. 1 - Dec. 31 annually	3 (6 in possession)
pheasant	Statewide	Dec. 8-11, 2022 Dec. 7-10, 2023 Dec. 12-15, 2024 Dec. 11-14, 2025	3 males (6 in possession)
quail	Statewide	Nov. 15 - Feb. 15 annually	15, singly or in aggregate; no more than 5 shall be Montezuma quail (possession shall be 30 singly or in aggregate - no more than 10 shall be Montezuma quail)
tree squirrel	Statewide	Sept. 1 - Dec. 31 annually	8, singly or in aggregate (possession shall be 16 singly or in aggregate)

[19.31.5.9 NMAC - Rp, 19.31.5.10 NMAC, 4/1/2022]

**19.31.5.10 HUNT CODES AND PERMIT NUMBERS FOR SPECIAL DRAW
PHEASANT HUNTS:**

HUNT LOCATION	2022 SEASON	2023 SEASON	2024 SEASON	2025 SEASON	HUNT CODE	NO. OF PERMITS	BAG LIMIT
youth-only Bernardo, Casa Colorada, and La Joya WMAs	Oct. 15	Oct. 21	Oct. 19	Oct. 18	PHE-0-001	20	3 males
youth-only W.S. Huey WMA	Dec. 3	Dec. 2	Dec. 7	Dec. 6	PHE-0-002	40	3 males
W.S. Huey WMA	Dec. 10	Dec. 9	Dec. 14	Dec. 13	PHE-0-003	40	3 males

[19.31.5.10 NMAC - Rp, 19.31.5.12 NMAC, 4/1/2022]

19.31.5.11 FALCONRY SEASONS:

A. Open areas and season dates: The season for dusky grouse, pheasants, quail and tree squirrels shall be statewide and shall be open September 1 through February 28 annually. For Eurasian collared-dove, all areas statewide are open year round, except as prohibited by rule.

B. Daily bag and possession limits: Daily bag limits for dusky grouse, pheasant, and quail shall be three birds (in the aggregate) and three tree squirrels (in the aggregate). Possession limits shall be: dusky grouse-six; pheasant-six; quail-30 (singly or in the aggregate); tree squirrels-16 (singly or in the aggregate). There is no bag or possession limit for Eurasian collared-dove.

[19.31.5.11 NMAC - Rp, 19.31.5.13 NMAC, 4/1/2022]

PART 6: MIGRATORY GAME BIRD

19.31.6.1 ISSUING AGENCY:

New Mexico department of game and fish.

[19.31.6.1 NMAC - Rp, 19.31.6.1 NMAC, 9/1/2024]

19.31.6.2 SCOPE:

Sportspersons interested in migratory game bird management and hunting. Additional requirements may be found in Chapter 17 NMSA 1978 and Title 19 NMAC.

[19.31.6.2 NMAC - Rp, 19.31.6.2 NMAC, 9/1/2024]

19.31.6.3 STATUTORY AUTHORITY:

Section 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected mammals, birds and fish.

[19.31.6.3 NMAC - Rp, 19.31.6.3 NMAC, 9/1/2024]

19.31.6.4 DURATION:

September 1, 2024 - March 31, 2025.

[19.31.6.4 NMAC - Rp, 19.31.6.4 NMAC, 9/1/2024]

19.31.6.5 EFFECTIVE DATE:

September 1, 2024, unless a later date is cited at the end of a section.

[19.31.6.5 NMAC - Rp, 19.31.6.5 NMAC, 9/1/2024]

19.31.6.6 OBJECTIVE:

Establishing open hunting seasons, regulations, rules and procedures governing the issuance of migratory game bird licenses and permits by the department.

[19.31.6.6 NMAC - Rp, 19.31.6.6 NMAC, 9/1/2024]

19.31.6.7 DEFINITIONS:

A. "Bernardo pond unit" shall mean that portion of Bernardo wildlife management area extending approximately 3,500 feet south of U.S. 60 and 2,200 feet west of the Unit 7 drain.

B. "Bernardo youth unit" shall mean that portion of Bernardo wildlife management area immediately south of the Quagmire, west of the San Francisco ditch, and east of the unit 7 drain.

C. "Central flyway" shall mean that portion of New Mexico east of the continental divide.

D. "Dark goose" shall mean Canada goose or white-fronted goose.

E. "Department" shall mean the New Mexico department of game and fish.

F. "Director" shall mean the director of the New Mexico department of game and fish.

G. "Dove north zone" or "north zone" shall mean that portion of New Mexico north of Interstate 40 from the Arizona-New Mexico border to Tucumcari and U.S. 54 at its junction with Interstate 40 at Tucumcari to the New Mexico-Texas border.

H. "Dove south zone" or "south zone" shall mean that portion of New Mexico south of Interstate 40 from the Arizona-New Mexico border to Tucumcari and U.S. 54 at its junction with Interstate 40 at Tucumcari to the New Mexico-Texas border.

I. "Eastern New Mexico sandhill crane hunt area" or "eastern" shall mean the following counties: Chaves, Curry, De Baca, Eddy, Lea, Quay and Roosevelt.

J. "Estancia valley sandhill crane hunt area" or "EV" shall mean that area beginning at Mountainair bounded on the west by N.M. 55 north to N.M. 337, north to N.M. 14, and north to Interstate 25; on the north by Interstate 25 east to U.S. 285; on

the east by U.S. 285 south to U.S. 60; and on the south by U.S. 60 from U.S. 285 west to N.M. 55 in Mountainair.

K. "Falconry" shall mean hunting migratory game birds using raptors.

L. "Federal youth waterfowl hunting days" shall mean the special seasons where only those 17 years of age and younger may hunt ducks, coots and gallinules in the Pacific flyway or ducks and coots in the central flyway. A supervising adult at least 18 years of age must accompany the youth hunter. The adult may not hunt ducks, coots or gallinules, but may participate in other seasons that are open on the special youth days.

M. "Light geese" shall mean snow geese, blue phase snow geese and Ross's geese.

N. "Light goose conservation order" shall mean those methods, bag and possession limits and dates approved by the U.S. fish and wildlife service towards reducing over-abundant light goose populations.

O. "Middle Rio Grande valley (MRGV) dark goose hunt area" shall mean Sierra, Socorro and Valencia counties.

P. "Middle Rio Grande valley (MRGV) sandhill crane hunt area" shall mean Valencia and Socorro counties.

Q. "Migratory game bird" shall mean band-tailed pigeon, mourning dove, white-winged dove, sandhill crane, American coot, gallinule, snipe, ducks, geese, sora and Virginia rail.

R. "North zone" shall mean that portion of the Pacific flyway north of Interstate 40, and that portion of the central flyway north of Interstate 40 from the continental divide to Tucumcari and U.S. 54 at its junction with Interstate 40 at Tucumcari to the New Mexico-Texas border.

S. "Pacific flyway" shall mean that portion of New Mexico west of the continental divide.

T. "Possession limit" shall mean the number of birds in a person's possession regardless of the location stored.

U. "Quagmire" shall mean that portion of Bernardo wildlife management area south of U.S. 60, west of the San Francisco ditch, and east of the unit 7 drain, excluding the Bernardo youth unit at the southern tip.

V. "South zone" shall mean that portion of the Pacific flyway south of Interstate 40, and that portion of the central flyway south of Interstate 40 from the continental divide to

Tucumcari and U.S. 54 at its junction with Interstate 40 at Tucumcari to the New Mexico-Texas border.

W. "Southwest band-tailed pigeon hunting area" or "southwest BPHA" shall mean that portion of New Mexico both south of U.S. 60 and west of Interstate 25.

X. "Southwest New Mexico sandhill crane hunt area" or "SW" shall mean that area bounded on the south by the New Mexico-Mexico border; on the west by the New Mexico-Arizona border north to Interstate 10; on the north by Interstate 10 east to U.S. 180, north to N.M. 26, east to N.M. 27, north to N.M. 152, and east to Interstate 25; on the east by Interstate 25 south to Interstate 10, west to the Luna county line, and south to the New Mexico-Mexico border.

Y. "Unit D" shall mean only the ephemeral pond or wetland portion of Bernardo WMA contained within the area extending approximately 1,700 feet north of U.S. 60, east of the railroad tracks, and west of the unit 7 drain.

Z. "Wildlife management areas" or "WMAs" shall mean those areas as described in 19.34.5 NMAC Wildlife Management Areas.

[19.31.6.7 NMAC - Rp, 19.31.6.7 NMAC, 9/1/2024]

19.31.6.8 ADJUSTMENT OF SANDHILL CRANE PERMITS:

The director, with verbal concurrence of the chairperson or their designee, may adjust the number of permits to address significant changes in harvest levels. This adjustment may be applied to any or all of the entry hunt codes.

[19.31.6.8 NMAC - Rp, 19.31.6.8 NMAC, 9/1/2024]

19.31.6.9 LICENSE AND APPLICATION REQUIREMENTS:

A. License: A Harvest Information Program (HIP) number shall be required. Waterfowl hunters 16 years of age and older are required to have in their possession a federal migratory bird hunting and conservation stamp (duck stamp). It shall be unlawful to take or attempt to take migratory birds without a HIP number, or duck stamp if required.

(1) Any person taking or attempting to take sandhill cranes in the eastern hunt area must have a valid license and a free sandhill crane hunting permit obtained from department offices or website.

(2) For EV sandhill crane, MRGV sandhill crane, MRGV youth-only sandhill crane and SW sandhill crane: in addition to a valid license, a special permit obtained by drawing shall be required.

(3) For the light goose conservation order: in addition to a valid license, a free light goose conservation order permit obtained from department offices or website shall be required.

(4) For band-tailed pigeon hunting: in addition to a valid license, a free band-tailed pigeon permit obtained from department offices or website shall be required.

B. Valid dates of license or permit: All permits and licenses shall be valid only for the dates, legal sporting arms, bag limit and area printed on the permit or license.

[19.31.6.9 NMAC - Rp, 19.31.6.9 NMAC, 9/1/2024]

19.31.6.10 MANNER AND METHODS FOR MIGRATORY GAME BIRDS:

A. Hours: Migratory game birds may be hunted or taken only during the period from one-half hour before sunrise to sunset, unless otherwise stated in rule.

(1) Migratory bird hunting hours on the Bottomless lakes overflow, and Bernardo, Casa Colorada, Jackson lake, La Joya and W.S. Huey WMAs shall be from one-half hour before sunrise to 1:00 p.m. unless otherwise stated in rule.

(2) September teal hunting hours on Bernardo and La Joya WMAs are from one-half hour before sunrise to sunset.

(3) Light goose conservation order hunting hours, including Bernardo pond unit and Unit D, shall be from one-half hour before sunrise to one-half hour after sunset. Exceptions: Bottomless lakes overflow, Bernardo Quagmire, and Casa Colorada, Jackson lake, La Joya and W.S. Huey WMAs hunting hours shall be from one-half hour before sunrise to 1:00 p.m.

B. Lands and waters owned, administered, controlled or managed by the state game commission:

(1) State wildlife management areas open, species that can be hunted and days open for hunting:

(a) Bernardo WMA:

(i) That portion of the Bernardo WMA south of U.S. 60 is open to teal hunting each day of the September teal season and the federal youth waterfowl hunting days. That portion of the Bernardo WMA north of U.S. 60 is closed unless otherwise stated in rule.

(ii) The Quagmire shall be open only on Tuesday, Thursday and Sunday to hunt ducks, geese, Virginia rail, sora, gallinule, American coot and snipe during established seasons, unless otherwise specifically allowed by rule.

(iii) The Bernardo pond unit shall be open for general waterfowl hunting and during the light goose conservation order on Monday, Wednesday and Saturday to hunt ducks, geese, Virginia rail, sora, gallinule, American coot and snipe during established seasons, unless otherwise specifically allowed by rule.

(iv) The Bernardo youth unit shall be open for youth waterfowl hunting on Monday, Wednesday and Saturday to hunt ducks, geese, Virginia rail, sora, gallinule, American coot and snipe during established seasons, unless otherwise specifically allowed by rule.

(v) Unit D shall be open for general waterfowl hunting and during the light goose conservation order on Monday, Wednesday and Saturday to hunt ducks, geese, Virginia rail, sora, gallinule, American coot and snipe during established seasons, unless otherwise specifically allowed by rule.

(b) The Edward Sargent, W. A. Humphries, Rio Chama, Urraca, Colin Neblett, Water canyon, Marquez/LBar and Elliot S. Barker WMAs shall be open for hunting dove and band-tailed pigeon during established seasons.

(c) The portion of Jackson lake WMA west of N.M. 170 shall be open on Mondays, Wednesdays and Saturdays to hunt ducks, geese, Virginia rail, sora, gallinule, American coot and snipe. The portion of Jackson lake WMA east of N.M. 170 shall be open to falconry-only migratory game bird hunting during established seasons.

(d) The lesser prairie-chicken management areas, Double E and River Ranch WMAs shall be open to hunt dove during established seasons.

(e) La Joya WMA:

(i) The entire La Joya WMA shall be open to teal hunting each day of the September teal season and each day of the federal youth waterfowl hunting days.

(ii) That portion of La Joya WMA north of the main east/west entrance road and west of the railroad tracks shall be open on Saturdays, Mondays and Wednesdays to hunt ducks, geese, Virginia rail, sora, gallinule, American coot and snipe during established seasons, unless otherwise specifically allowed by rule.

(iii) That portion of La Joya WMA south of the main east/west entrance road and west of the railroad tracks shall be open on Sunday, Tuesday and Thursday to hunt ducks, geese, Virginia rail, sora, gallinule, American coot and snipe during established seasons, unless otherwise specifically allowed by rule.

(iv) That portion of La Joya WMA east of the railroad tracks shall be open to hunt dove, ducks, geese, Virginia rail, sora, gallinule, American coot and snipe during established seasons.

(f) The Charette lake, McAllister lake, Wagon Mound, Tucumcari, Socorro-Escondida, Hammond tract and Retherford tract WMAs shall be open for all migratory game bird hunting during established seasons.

(g) The W.S. Huey WMA shall be open for dove hunting on Monday, Wednesday and Saturday during established seasons.

(2) All WMAs shall be open to falconry waterfowl hunting each day of the established falconry season, unless otherwise restricted by rule.

[19.31.6.10 NMAC - Rp, 19.31.6.10 NMAC, 9/1/2024]

19.31.6.11 SPECIES, OPEN AREAS, SEASON DATES AND DAILY BAG LIMITS:

2024-2025 season, all dates are 2024 unless otherwise specified. Possession limits are three times the daily bag limit unless otherwise specified.

species	open areas	season dates	daily bag limit
mourning and white-winged dove	north zone	Sept. 1 - Nov. 29	15 (singly or in aggregate)
	south zone	Sept. 1 - Oct. 28 and Dec. 1 - Jan. 1, 2025	
band-tailed pigeon	southwest BPHA	Oct. 1 - 14	2
	statewide except southwest BPHA	Sept. 1 - 14	
regular season sandhill crane (free permit required)	eastern	Oct. 26 - Jan. 23, 2025	3 (6 in possession)
CENTRAL FLYWAY: possession limits are three times the daily bag limit unless otherwise specified.			
species	season dates		daily bag limit
September teal: blue-winged teal, green-winged teal and cinnamon teal	Sept. 14 - 22		6 (singly or in the aggregate)
ducks	north zone: Oct. 12 - Jan. 15, 2025	south zone: Oct. 28 - Jan. 31, 2025	6 (singly or in the aggregate) that consists of no more than 5 mallard of which only 2 may be female mallard, (Mexican ducks are included towards the mallard bag limit), 3 wood duck, 1 scaup, 2 redhead, 2 hooded merganser, 1 pintail and 2 canvasback

youth waterfowl days	north zone: Oct. 5 - 6	Ducks: 6 (singly or in the aggregate) that consists of no more than 5 mallard of which only 2 may be female mallard, (Mexican ducks are included towards the mallard bag limit), 3 wood duck, 1 scaup, 2 redhead, 2 hooded merganser, 1 pintail and 2 canvasback Coots: 15
	south zone: Oct. 26 – Oct. 27	
American coot	north zone: Oct. 12 - Jan. 15, 2025	15
	south zone: Oct. 28 - Jan. 31, 2025	
gallinule	Sept. 14 - Nov. 22	1
snipe	Oct. 12 - Jan. 26, 2025	8
Virginia rail & sora	Sept. 14 - Nov. 22	10 (singly or in the aggregate; 20 in possession)
dark goose: regular season closed in Sierra, Socorro and Valencia counties	Oct. 17 - Jan. 31, 2025	5
dark goose: special MRGV season	Dec. 19 - Jan. 31, 2025	2 (2 per season)
light goose	Oct. 17 - Jan. 31, 2025	50 (no possession limit)
light goose conservation order	Feb. 1 - Mar. 10, 2025	no bag or possession limit
PACIFIC FLYWAY: possession limits are three times the daily bag limit unless otherwise specified.		
Species	season dates	daily bag limit
youth waterfowl days	Oct. 12 - 13	Ducks: 7 (singly or in the aggregate) that consists of no more than 2 female mallard, 2 redhead, 1 pintail and 2 canvasback; Coots and gallinules: 25 (singly or in the aggregate)
Ducks	Oct. 19 - Jan. 31, 2025	7 (singly or in the aggregate); that consists of no more than 2 female mallard, 2 redhead, 1 pintail and 2 canvasback
Scaup	Oct. 19 - Jan. 12, 2025	2 (as part of the aggregate duck bag)
American coot and gallinule	Oct. 19 - Jan. 31, 2025	25 (singly or in the aggregate)

Snipe	Oct. 17 - Jan. 31, 2025	8
Virginia rail & sora	Sept. 14 - Nov. 22	25 (singly or in the aggregate)
Goose	north zone: Sept. 21 - Oct. 6 and Nov. 2 - Jan. 31, 2025	5 Canada geese, 10 white-fronted geese and 20 light geese
	south zone: Oct. 17 - Jan. 31, 2025

[19.31.6.12 NMAC - Rp, 19.31.6.12 NMAC, 9/1/2024]

19.31.6.13 RESERVED:

[19.31.6.13 NMAC - Rp, 19.31.6.13 NMAC, 9/1/2022; Repealed, 9/1/2024]

19.31.6.14 REQUIREMENTS FOR THE SPECIAL BERNARDO YOUTH WATERFOWL UNIT:

Blind selection will be available on a first-come, first-serve basis from one-half hour before sunrise to 1:00 p.m. Youth hunters must be accompanied by a supervising adult who may not hunt. A maximum of four people, at least half of which must be youth hunters, is allowed per blind.

[19.31.6.14 NMAC - Rp, 19.31.6.14 NMAC, 9/1/2024]

19.31.6.15 SEASON DATES, OPEN AREAS, BAG LIMITS, HUNT CODES AND PERMIT NUMBERS FOR THE SPECIAL ESTANCIA VALLEY, MIDDLE RIO GRANDE VALLEY AND SOUTHWEST NEW MEXICO SANDHILL CRANE SEASONS:

A. The daily bag limit is 3. The possession limit is twice the daily bag limit, except for the MRGV youth-only hunt where the daily bag and possession limit is 3. The hunting seasons for 2024-2025 are:

hunt location	hunt dates	hunt code	permits
EV	Nov. 2 - Nov. 5	SCR-0-101	65

	and Nov. 7 - Nov. 10		
MRGV	Nov. 16 - 17	SCR-0-102	85
MRGV	Nov. 30 - Dec. 1	SCR-0-103	85
MRGV	Dec. 14 - 15	SCR-0-104	85
MRGV	Jan. 4 - 5, 2025	SCR-0-105	85
MRGV	Jan. 11 - 12, 2025	SCR-0-106	85
MRGV, youth-only	Nov. 23	SCR-0-107	24
SW	Nov. 2 - Nov. 10	SCR-0-108	75
SW	Jan. 4 - 5, 2025	SCR-0-109	75

B. Hunters who participate in the MRGV season shall be required to check-out at designated check stations when they harvest any sandhill cranes.

C. The department may cancel one or more EV, MRGV or SW sandhill crane hunts if harvest is expected to exceed our federal allocation of greater sandhill cranes.

PART 7: BIG GAME ENHANCEMENT [REPEALED]

[This part was repealed on April 1, 2007.]

PART 8: BIG GAME AND TURKEY [REPEALED]

[This duration of the part expired on March 31, 2007.]

PART 9: COMMERCIAL USE OF FISH

19.31.9.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.31.9.1 NMAC – Rp, 19.31.9.1 NMAC, 11/9/2021]

19.31.9.2 SCOPE:

Those members of the public interested in the business of selling nongame fish. License fees can be found in 19.30.9 NMAC.

[19.31.9.2 NMAC – Rp, 19.31.9.2 NMAC, 11/9/2021]

19.31.9.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and Sections 17-3-26 through 17-3-28 regarding minnows and non-game fish as bait.

[19.31.9.3 NMAC – Rp, 19.31.9.3 NMAC, 11/9/2021]

19.31.9.4 DURATION:

Permanent.

[19.31.9.4 NMAC – Rp, 19.31.9.4 NMAC, 11/9/2021]

19.31.9.5 EFFECTIVE DATE:

February 15, 1996.

[19.31.9.5 NMAC – Rp, 19.31.9.5 NMAC, 11/9/2021]

19.31.9.6 OBJECTIVE:

To establish rules pertaining to management and harvest of commercial fish resources of New Mexico.

[19.31.9.6 NMAC – Rp, 19.31.9.6 NMAC, 11/9/2021]

19.31.9.7 DEFINITIONS:

A. "Commercial fish" shall mean gizzard shad, whitesucker, carpsucker, flannemouth sucker, smallmouth buffalo, carp, gar, yellow perch and all species of bullheads.

B. "Commercial fisherman" shall mean a person who makes or intends to make income by taking and selling commercial fish.

C. "Commercial fishing permit" shall mean a permit issued by the director of the department of game and fish to authorize a commercial fisherman and their named employees to take commercial fish from specified waters by specified means.

D. "Commercial fishing water" shall mean a water that the director of the department of game and fish has designated as one for which commercial fishing permits will be available.

E. "Minnow" shall mean all non-game fish sold as bait, regardless of taxonomic classification.

F. "Bait dealers license" shall mean a license issued by the director of the department of game and fish to authorize a vendor and their named employees to sell minnows, amphibians, and crayfish for use as bait.

[19.31.9.7 NMAC – Rp, 19.31.9.7 NMAC, 11/9/2021]

19.31.9.8 AVAILABILITY OF COMMERCIAL FISHING PERMITS:

A. The director may designate the commercial waters for the following calendar year during December.

B. When the director designates commercial fishing waters, they may also designate the numbers of permits available for each water.

C. The director may also designate the number of employees that each commercial fisherman may include in the activities authorized by their commercial fishing permit.

[19.31.9.8 NMAC – Rp, 19.31.9.8 NMAC, 11/9/2021]

19.31.9.9 ISSUANCE OF COMMERCIAL PERMITS:

A. Individuals desiring commercial fishing permits shall apply on the application form provided by the department of game and fish.

B. If more applications are received than there are permits available for any water, the available permits will be allotted by public drawing.

C. No one may hold more than one commercial fishing permit during any one calendar year.

D. Applicants must include payment in accordance with 19.30.9 NMAC with completed application. License fee is nonrefundable.

[19.31.9.9 NMAC – Rp, 19.31.9.9 NMAC, 11/9/2021]

19.31.9.10 CONDITIONS OF COMMERCIAL FISHING PERMITS:

A. Each commercial fishing permit shall be valid from the date of issue to December 31 of the year in which it was issued.

B. Each permit shall state the name and address of the permittee and of all employees who may assist the permittee.

C. Each permit shall authorize the taking of commercial fish from only two waters.

D. Each permit shall specify the methods by which commercial fish may be taken.

E. A commercial fishing permittee shall report each month 's catch to the department of game and fish, no later than the 20th of the following month, on forms provided by the department.

F. A commercial fishing permittee and their employees shall permit inspection of their catch upon request by any commissioned department of game and fish officer.

[19.31.9.10 NMAC – Rp, 19.31.9.10 NMAC, 11/9/2021]

19.31.9.11 DISPOSITION OF GAME FISH:

A. The commercial fishing permittee shall immediately return to the water any game fish caught, if such fish are still alive.

B. Dead game fish which are edible shall be processed and given to the district wildlife officer for lawful disposition.

C. Dead and spoiled game fish shall be cut in half and returned to the water.

[19.31.9.11 NMAC – Rp, 19.31.9.11 NMAC, 11/9/2021]

19.31.9.12 REVOCATION OF COMMERCIAL FISHING PERMIT:

The director may, at any time, revoke in writing, a commercial permit for any of the following:

A. Violation of this or any other regulation of the state game commission;

B. Failure to abide by the conditions of the commercial fishing permit;

C. Conflicts between permitted methods for taking commercial fish and proper management of game fish;

D. Occurrence of low water levels or other natural phenomena in a commercial fishing water that would render inadvisable continued commercial fishing in that water;

E. Requests from state or federal agencies for discontinuance of commercial fishing because of conflicts with other designated uses of the water.

[19.31.9.12 NMAC – Rp, 19.31.9.12 NMAC, 11/9/2021]

19.31.9.13 ISSUANCE OF BAIT DEALERS LICENSE:

A. Individuals desiring a bait dealers license shall apply on the application form provided by the department of game and fish.

B. Applicants must include payment in accordance with 19.30.9 NMAC with completed application.

C. Application must include all sources the bait dealer will use to obtain minnows.

[19.31.9.13 NMAC – Rp, 19.31.9.13 NMAC, 11/9/2021]

19.31.9.14 PERMISSABLE SPECIES FOR SALE AS BAIT:

A. Fish: Only fathead minnow (*pimephales promelas*), red shiner (*cyprinella lutrensis*), golden shiner (*notemigonus crysoleucas*), gizzard shad (*dorosoma cepedianum*), and threadfin shad (*dorosoma petenense*) may be sold as bait fish.

B. Amphibians: Only tiger salamander larvae (*ambystoma tigrinum*), or "waterdogs", may be sold as bait.

C. Crayfish: Only native species (*orconectes deaneam*, *orconectes virilis*, *orconectes causeyi* and *procambarus simulans*) may be sold as bait.

[19.31.9.14 NMAC – Rp, 19.31.9.14 NMAC, 11/9/2021]

19.31.9.15 CONDITIONS OF BAIT DEALER LICENSES:

A. Each bait dealers license shall be valid from April 1 of the year in which it was issued until March 31 of the following year.

B. Each permit shall state the name and address of the permittee and of all employees who may assist the permittee.

C. Each permit shall authorize the taking of bait fish using only those methods specified in 19.31.10 NMAC.

(1) It shall be unlawful to collect bait fish from the mainstem Pecos river, with the exceptions of Santa Rosa, Sumner, and Brantley lakes.

(2) It shall be unlawful to collect bait fish from the mainstem Rio Grande with the exceptions of Abiquiu, Cochiti, Elephant Butte, and Caballo lakes.

(3) It shall be unlawful to collect bait fish from the mainstem Canadian river with the exceptions of Conchas and Ute lakes.

(4) It shall be unlawful to collect bait fish west of the continental divide, with the exception of Navajo lake.

E. A licensed bait dealer must comply with 19.35.7 NMAC when purchasing live bait obtained from an out-of-state source.

F. A licensed bait dealer and his employees shall permit inspection of their inventory upon request by any commissioned department of game and fish officer.

G. It is unlawful to release live fish or bait into the waters of New Mexico without first obtaining a permit from the department of game and fish (19.35.7 NMAC).

[19.31.9.15 NMAC – Rp, 19.31.9.15 NMAC, 11/9/2021]

PART 10: HUNTING AND FISHING - MANNER AND METHOD OF TAKING

19.31.10.1 ISSUING AGENCY:

New Mexico department of game and fish.

[19.31.10.1 NMAC - Rp, 19.31.10.1 NMAC, 4/1/2023]

19.31.10.2 SCOPE:

Hunters, anglers, trappers and the general public. Additional requirements may be found in Chapter 17 NMSA 1978 and Title 19 NMAC.

[19.31.10.2 NMAC - Rp, 19.31.10.2 NMAC, 4/1/2023]

19.31.10.3 STATUTORY AUTHORITY:

Sections 17-1-14, 17-1-26, 17-2-1, 17-2-2, 17-2-2.1, 17-2-4.2, 17-2-6, 17-2-10.1, 17-2-13, 17-2-14, 17-2-20, 17-2-32, 17-2-43, 17-3-2, 17-3-29, 17-3-31, 17-2A-3, 17-3-32, 17-3-33, 17-3-42, 17-4-33, 17-5-4, 17-5-5 and 17-6-3 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species.

[19.31.10.3 NMAC - Rp, 19.31.10.3 NMAC, 4/1/2023]

19.31.10.4 DURATION:

Permanent.

[19.31.10.4 NMAC - Rp, 19.31.10.4 NMAC, 4/1/2023]

19.31.10.5 EFFECTIVE DATE:

April 1, 2023, unless a later date is cited at the end of a section.

[19.31.10.5 NMAC - Rp, 19.31.10.5 NMAC, 4/1/2023]

19.31.10.6 OBJECTIVE:

To establish general rules, restrictions, requirements, definitions, and regulations governing lawful hunting, fishing, or trapping and the lawful taking or killing of game animals, furbearers, game birds, and game fish, water pollution, possession of wildlife, permits and licenses issued, importation, intrastate transportation, release of wildlife, manner and methods of hunting and fishing and use of department lands.

[19.31.10.6 NMAC - Rp, 19.31.10.6 NMAC, 4/1/2023]

19.31.10.7 DEFINITIONS:

A. "Angling" shall mean taking or attempting to take fish by angling hook and line, with the line held in the hand or attached to a pole or rod or other device that is held in the hand or closely attended.

B. "Angling hook" shall mean a single, double, or treble (triple) point attached to a single shank.

C. "Any sporting arm" shall mean any firearm, muzzle-loader, compressed air gun, shotgun, bow or crossbow. All firearms, except handguns, must be designed to be fired from the shoulder.

D. "Arrow" or "Bolt" shall mean only those arrows or bolts having broadheads with cutting edges except that "judo", "blunt" or similar small game points may be used for upland game and migratory game bird hunting and arrows for bow fishing must have barbs to prevent the loss of fish.

E. "Bag limit" shall mean the protected species, qualified by species, number, sex, age, antler/horn requirement, or size allowed by state game commission rule that a legally licensed person may attempt to take or take.

F. "Bait" as used in 19.31.10.15 NMAC shall mean the flesh, hide, fur or viscera of any animal. Bones free of flesh are not considered bait.

G. "Bait" as used in 19.31.10.12 NMAC and 19.31.10.13 NMAC shall mean any salt, mineral, grain, feed, commercially produced game attractant or any other organic material which is attractive to wildlife.

H. "Baiting" shall mean the placing, exposing, depositing, distributing, or scattering of any bait on or over areas where any person is attempting to take protected game mammals or game birds as defined in Section 17-2-3 NMSA 1978.

I. "Bait fish" is defined as those nongame fish which are not otherwise protected by statute or regulation.

J. "Barbless lure or fly" shall mean an artificial lure made of wood, metal, or plastic or an artificial fly made from fur, feathers, other animal or man-made materials to resemble or simulate insects, bait fish, or other foods. A barbless fly or lure may only bear a single hook, from which any or all barbs must be removed or bent completely closed, or which are manufactured without barbs. Living or dead arthropods and annelids or other foods are not considered barbless lures or flies.

K. "Big-game species" shall mean Barbary sheep, bear, bighorn sheep, cougar, deer, elk, javelina, oryx Persian ibex, and pronghorn.

L. "Big-game sporting arms" shall mean any centerfire firearm at least .22 caliber or larger, any muzzle-loading firearm at least .45 caliber or larger, any shotgun .410 caliber or larger firing a single slug (including muzzle-loading shotguns), any bow or any crossbow. All firearms, except handguns, must be designed to be fired from the shoulder.

M. "Body-grip trap" shall mean a rotating jaw trap designed to capture a furbearer by the body.

N. "Bow" shall mean compound, recurve, or long bow, which is not equipped with a mechanical device (draw lock) which locks the bow string at full draw. Sights on bows shall not project light, however, illuminated pins/reticles and scopes of any magnification are allowed.

O. "Bow fishing" shall mean taking or attempting to take game fish with arrows/bolts that are discharged above the surface of the water by a bow or crossbow. Arrows/bolts must be attached by string, line, or rope to facilitate fish retrieval.

P. "Bullet" shall mean a single projectile fired from a firearm which is designed to expand or fragment upon impact. Tracer or full metal jacket ammunition is not legal for the take or attempted take of any big game species.

Q. "Cellular", "Wi-Fi" or "satellite camera" shall mean any remote camera which transmits or is capable of transmitting images or video wirelessly via a cellular, Wi-Fi or satellite connection.

R. "Chumming" is defined as a means of attracting fish by placing organic materials, non-injurious to aquatic life, into the water.

S. "Compressed air gun" shall mean any kind of gun that launches a single non-spherical projectile, pneumatically with compressed air or other gases that are pressurized mechanically without involving any chemical reaction.

T. "Crossbow" shall mean a device with a bow limb or band of flexible material that is attached horizontally to a stock and has a mechanism to hold the string in a cocked position. Sights on crossbows shall not project light, however, illuminated pins/reticles and scopes of any magnification are allowed.

U. "Department" shall mean the New Mexico department of game and fish.

V. "Director" shall mean the director of the New Mexico department of game and fish.

W. "Drainage" shall mean all waters within a watershed including tributaries, headwaters, lakes, ponds, and other water bodies.

X. "Drone" is defined as any device used or designed for navigation or flight in the air that is unmanned and guided remotely or by an onboard computer or onboard control system. Drones may also be referred to as "unmanned aerial vehicle (UAV)" or "unmanned aerial vehicle systems (UAVS)".

Y. "Established road" is defined as follows:

(1) a road, built or maintained by equipment, which shows no evidence of ever being closed to vehicular traffic by such means as berms, ripping, scarification, reseeding, fencing, gates, barricades or posted closures; or

(2) a two-track road which shows use prior to hunting seasons for other purposes such as recreation, mining, logging, and ranching and which shows no evidence of ever being closed to vehicular traffic by such means as berms, ripping, scarification, reseeding, fencing, gates, barricades or posted closures.

Z. "Foothold trap" shall mean a trap designed to capture a furbearer by the foot, but does not include foot encapsulating traps.

AA. "Foot encapsulating trap" shall mean any trap with a push or pull-activated trigger located inside an enclosure recessed from an opening of no more than two inches in diameter, as measured across the opening from side to side, not corner to corner. Foot encapsulating traps include "dog proof" and "egg" traps.

BB. "Furbearer" shall mean any quadruped defined as a fur-bearing animal in Section 17-5-2 NMSA 1978.

CC. "Game management unit" or "GMU" shall mean those areas as described in 19.30.4 NMAC, Boundary Descriptions for Game Management Units.

DD. "Jaw spread" shall mean the distance between the jaws when measured across the center of the trap and perpendicular to a line drawn through the pivot points of the jaws when the trap is set.

EE. "Laminated" shall mean any modification to the jaw thickness of a foothold trap by fastening a strip of metal (rod or flat stock) to the trap jaw, or a trap that is manufactured with cast jaws, which increases the contact surface area of the jaw.

FF. "Land set" shall mean any foothold trap or snare set on land.

GG. "License year" shall mean the period from April 1 through March 31.

HH. "Locate" shall mean any act or activity, in which any person is searching for, spotting or otherwise finding a protected species from or with the aid of any aircraft or drone.

II. "Migratory game bird" shall mean band-tailed pigeon, mourning dove, white-winged dove, sandhill crane, American coot, common moorhen, common snipe, ducks, geese, sora and Virginia rail.

JJ. "Muzzle-loader" or "muzzle-loading firearms" shall mean those sporting arms in which the charge and projectile(s) are loaded through the muzzle. Only blackpowder or equivalent blackpowder substitute may be used. Use of smokeless powder is prohibited.

KK. "Nets" shall mean cast nets, dip nets, and seines which shall not be longer than 20 feet and shall not have a mesh larger than three-eighths of an inch.

LL. "Non-toxic shot" shall mean that non-toxic shot approved for use by the U. S. fish and wildlife service.

MM. "Protected species" shall mean any of the following animals:

(1) all animals defined as protected wildlife species and game fish under Section 17-2-3 NMSA 1978;

(2) all animals defined as furbearing animals under Section 17-5-2 NMSA 1978;

(3) all animals listed as endangered or threatened species or subspecies as stated in 19.33.6 NMAC: and

(4) all animals listed under Sections 17-2-13, 17-2-14 or 17-2-4.2 NMSA 1978.

NN. "Retention" or "retain" shall mean the holding of live protected species in captivity.

OO. "Restricted muzzle-loading rifle" shall mean any muzzle-loading rifle using open sights, black powder or equivalent propellant and firing a full bore diameter

bullet or patched round ball. The use of in-line ignition, scopes and smokeless powder are prohibited.

PP. "Shotgun" shall mean any centerfire shotgun or muzzle-loading shotgun not larger than 10 gauge.

QQ. "Snagging" is the repeated or exaggerated jerking or pulling of the fishing line or angling hooks in any attempt to impale fish, whether or not it results in physically snagging a fish.

RR. "Snare" shall mean a wire or cable with a single closing device designed to capture a furbearer.

SS. "Spear fishing" shall mean taking or attempting to take game fish with spears, gigs and arrows with barbs.

TT. "Sporting-arm types" shall be designated in the hunt code as follows unless further restricted or allowed by state game commission rule:

(1) all hunt codes denoted with -0- shall authorize use of any shotgun firing shot (ex. SCR-0-XXX);

(2) all hunt codes denoted with -1- shall authorize use of any big game sporting arm (ex. ELK-1-XXX);

(3) all hunt codes denoted with -2- shall authorize use of bows only (ex. ELK-2-XXX);

(4) all hunt codes denoted with -3- shall authorize use of bows, crossbows and muzzle-loading firearms with open or "iron" sights only (ex. ELK-3-XXX).

UU. "Take" shall mean to hunt, fish, kill or capture any protected species or parts thereof.

VV. "Trap" shall mean any foothold trap, foot encapsulating trap, cage trap or body-grip trap set to capture a furbearer.

WW. "Trotline" shall be synonymous with "**set line**" or "**throw line**" or "**jug**", "**Yo-Yo line**" or "**limb line**", and shall mean a fishing line that is used without rod or reel and that need not be held in the hand or closely attended.

XX. "Upland game" shall mean dusky grouse, Eurasian collared-dove, all protected squirrel species, all quail species, chukar and pheasant.

YY. "Water set" shall mean any trap or snare set fully in water.

ZZ. "Wildlife management area" or "WMA" shall mean those areas as described in 19.34.5 NMAC.

AAA. "Written permission" shall mean a document (which may include a valid hunting, trapping or fishing license) that asserts the holder has permission from the private land owner or their designee to hunt, fish, trap or drive off road on the landowner's property. The information on the document must be verifiable and include the name of the person(s) receiving permission, activity permitted, property's location and name (if applicable), name of person granting permission, date and length of time the permission is granted, and phone number or e-mail of the person granting the permission. Licenses issued for private land which have the ranch name printed on them constitute written permission for that property and no other permission is required except for private land elk licenses in the secondary management zone pursuant to 19.30.5 NMAC and 19.31.14 NMAC.

BBB. "Zone" shall mean those bear or cougar hunt areas, consisting of one or more GMUs, as described in 19.31.11 NMAC.

[19.31.10.7 NMAC - Rp, 19.31.10.7 NMAC, 4/1/2023]

19.31.10.8 UNLAWFUL SUBSTANCE IN PUBLIC WATERS:

It is unlawful for any person, firm, corporation or municipality to introduce, directly or indirectly, into any public water of this state any substance that may stupefy, injure, destroy or drive away from such water any protected species or may be detrimental to the growth and reproduction of those protected species except as exempted in Section 17-2-20 NMSA 1978.

[19.31.10.8 NMAC - Rp, 19.31.10.8 NMAC, 4/1/2023]

19.31.10.9 POSSESSION OR SALE OF PROTECTED SPECIES:

It is unlawful to possess, sell or offer for sale all or part of any protected species except as provided below:

A. License or permit: A person may possess protected species or parts thereof that they have lawfully taken under a license or permit, in any jurisdiction, or for which they possess a valid possession certificate, permit or invoice from the department or department permitted facility.

B. Game taken by another "Possession certificate": It is unlawful for any person to possess any protected species, or parts thereof, taken by another person except as follows: Any person may have in their possession or under their control any protected species or parts thereof that have been lawfully taken by another person, if they possess a possession certificate which shall be provided by the lawful possessor of the

protected species, or parts thereof, to the person receiving the animal or parts and which shall contain the following:

- (1) the first and last name of the person receiving the protected species or parts;
- (2) the kind and number of game or furbearer parts donated or provided to a taxidermist, meat processor or any other similar business;
- (3) the date and GMU where the game or furbearer was lawfully taken;
- (4) the lawful possessor's name, phone number, address, and the hunting, fishing or trapping license number, or the permit, certificate or invoice number under which the protected species was lawfully taken;
- (5) the date and place of the donation or transaction;
- (6) the reason the lawful possessor transferred the animal or parts to the receiver (i.e., donation, transportation, taxidermy, meat processing etc). Any possession certificate which only authorizes temporary possession (ie. taxidermist or meat processor) shall have a date of estimated return to the original lawful possessor; and
- (7) the signature of both the person receiving and the person transferring the animal or parts.

C. Retention of live animals: It is unlawful to retain protected species in a live condition except under permit or license issued by the director. It is unlawful to sell, attempt to sell or possess live protected species in New Mexico, including captive raised animals, except as allowed by permit issued by the director or while in transit through New Mexico when the transporter can demonstrate proof of legal possession of the protected animal being transported.

D. Sale of protected species parts: Only skins, heads, antlers, horns, rendered fat, teeth or claws of legally taken or possessed protected species, all parts of furbearers, and feathers from non-migratory game birds may be bartered or sold (internal organs of big game species may not be sold). The disposer must supply to the recipient a written statement which shall contain the following:

- (1) the first and last name of the person receiving the protected species or parts;
- (2) description of the parts involved;
- (3) the date and GMU where the game was taken;

(4) the disposer's name, phone number, address, and the number of either the hunting license, permit, certificate or invoice under which the game was taken;

(5) the date and place of the transaction or sale; and

(6) the signature of both the person selling and the person purchasing the parts.

E. Possession of game animal parts found in the field: It is unlawful to possess heads, horns, antlers, or other parts of protected species found in the field without an invoice or permit from the department, with the exception of obviously shed antlers. All shed antlers collected in violation of any state or federal land closure, in violation of criminal trespass, in violation of the habitat protection act, while driving off road on public land or on a closed road on public land remain property of the State of New Mexico and shall be seized.

[19.31.10.9 NMAC - Rp, 19.31.10.9 NMAC, 4/1/2023]

19.31.10.10 PERMITS AND LICENSES ISSUED:

A. Proof of license: Each licensee or permittee must have a copy of their hunting, fishing or trapping license or their department issued collection permit in their possession while hunting, fishing, trapping or collecting protected species in New Mexico. Licenses or permits may be in electronic or paper format. The authorization number for fishing or game hunting is also valid pursuant to Subsection C of Section 17-3-5 NMSA 1978. The license, authorization or permit must be produced upon request by any law enforcement officer authorized to enforce Chapter 17 NMSA 1978.

B. Permits and licenses, other than hunting, fishing or trapping licenses, which authorize the holder to import, collect, handle, purchase, possess, barter, transfer, transport, sell or offer to sell species listed as group II, III or IV on the directors "species importation list" or any protected species may only be issued by the director or their designee as authorized by Chapter 17 NMSA 1978 and 19.35 NMAC.

C. Permit or license provisions: Specific provisions for applications, conditions, reporting and other stipulations for permits or licenses will be provided by the department with each permit and license.

D. Violation of permit or license provisions or importation/possession of un-permitted wildlife:

(1) It is unlawful for any person receiving any permit or license pursuant to state game commission rule to violate any provision of state game commission rule or any provision listed on the permit or license.

(2) Any violation of Chapter 17 NMSA 1978, state game commission rule or any permit provision shall render that permit or license invalid. If such an invalidated permit or license authorized possession of any species listed as group II, III or IV on the directors "species importation list" or any protected species, the animals shall be subject to seizure by any officer authorized to enforce the provisions of Chapter 17 NMSA 1978.

(3) It is unlawful to import, collect, handle, purchase, possess, barter, transfer, transport, sell or offer to sell any live animal listed as group II, III or IV on the directors "species importation list" or any protected species without a department issued permit or license or contrary to the provisions of Chapter 17 NMSA 1978, state game commission rule or any department issued permit.

(4) Any animal possessed contrary to this section shall be subject to seizure by any officer authorized to enforce the provisions of Chapter 17 NMSA 1978. Any dangerous, venomous, invasive species or any diseased animals may be destroyed to protect human safety, native wildlife populations or livestock.

(5) Any person who has had an animal seized from them shall have no more than 30 days to arrange for the illegal animal to be transported out of New Mexico and pay for the care and transportation rendered. Failure to make these arrangements within 30 days will result in the animal being considered abandoned. Abandoned animals will be disposed of at the discretion of the department.

E. Release of wildlife: It is unlawful for any person or persons to release, intentionally or otherwise; or cause to be released in this state any mammal, bird, fish, reptile or amphibian, except domestic mammals, domestic fowl, or fish from government hatcheries, without first obtaining a permit from the department except department employees while performing their official duties or those individuals working on behalf of the department when directed by a department employee.

[19.31.10.10 NMAC - Rp, 19.31.10.10 NMAC, 4/1/2023]

19.31.10.11 USE OF VEHICLES, BOATS, AIRCRAFT AND ROADS IN HUNTING:

A. Shooting from the road: It is unlawful to shoot at, wound, take or attempt to take any protected species on, from, across or from within the right-of-way fences of any graded, paved or maintained public road. In the absence of a right-of-way fence it is unlawful to shoot at, wound, take or attempt to take any protected species from any part of the graded, paved or maintained surface of the public road. "Public road" as used herein shall mean any road, street or thoroughfare which is open to the public or which the public has a right of access and which has been paved, graded, maintained or any road, street or thoroughfare which has been paved, graded or maintained using public funds.

B. Shooting at artificial wildlife from the road: It is unlawful to shoot at artificial wildlife on, from, across or from within the right-of-way fences of any graded, paved or

maintained public road. In the absence of a right-of-way fence it is unlawful to shoot at any artificial wildlife from any part of the graded, paved or maintained surface of the public road. "Public road" as used herein shall mean any road, street or thoroughfare which is open to the public or which the public has a right of access and which has been paved, graded, maintained or any road, street or thoroughfare which has been paved, graded or maintained using public funds.

C. Shooting from within or upon a vehicle, boat or aircraft: It is unlawful to shoot at any protected species from within or upon a motor vehicle, motor-driven boat, sailboat or aircraft except as allowed by a department issued permit. A person may shoot from any motor-driven boat when, the motor has been completely shut off and its progress therefrom has ceased.

D. Harassing protected species: It is unlawful, at any time, to pursue, harass, harry, drive or rally any protected species by any means except as allowed while legally hunting, or as otherwise allowed by Chapter 17 NMSA or state game commission rule.

E. Hunting after air travel: It shall be unlawful for anyone to hunt for or take any protected species until after the start of legal hunting hours on the day following any air travel except by regularly scheduled commercial airline flights or legitimate direct flight to the final destination.

F. Use of aircraft for spotting game: It shall be unlawful to use aircraft or drone to spot or locate and relay the location of any protected species to anyone on the ground by any means of communication or signaling device or action.

G. Using information gained from air flight:

(1) It shall be unlawful to hunt for or to take, or assist in the hunting for or taking of, any protected species with the use of information regarding location of any protected species gained from the use of any aircraft until 48 hours after such aircraft use.

(2) It shall be unlawful to hunt for or to take, or assist in the hunting for or taking of, any protected species with the use of information regarding location of any protected species gained from the use of any drone at any time.

H. Aircraft, drone and vehicle exemptions to this rule: The Director may exempt a person from the prohibition of utilizing an aircraft, drone or vehicle for management purposes.

I. Vehicle off of established road or driving on a closed road:

(1) During the seasons established for any protected species, it is unlawful to drive or ride in a motor vehicle which is driven off an established road on public land or

to drive or ride in a motor vehicle on a closed road on public land, when the vehicle bears a licensed hunter, angler or trapper.

(2) During the seasons established for any protected species, it is unlawful to drive or ride in a motor vehicle which is driven off an established road on private land without written permission, when the vehicle bears a licensed hunter, angler or trapper.

(3) It is unlawful to drive or ride in a motor vehicle which is being driven off an established road when gathering or searching for shed antlers on public land or to drive or ride in a motor vehicle on a closed road when gathering or searching for shed antlers on public land.

(4) Exception: Snowmobiles and to retrieve lawfully taken game in an area not closed to vehicular traffic.

(5) Public land as used in this section shall mean any federally owned or managed property, any state owned or managed property, any private property which is part of a unitization hunting agreement, ranch wide agreement or unit wide agreement for the species being hunted, any private property which the department has paid for public access for the species being hunted or any New Mexico state game commission owned or managed property.

J. Mobility-Impaired (MI) hunters:

(1) Shooting from a vehicle: The holder of a MI card is authorized to shoot at, take or attempt to take protected species during their respective open seasons, with the appropriate license, from a stationary motor-driven vehicle only if the vehicle has been parked completely off of the established road's surface and only when the established road has no right-of-way fence. The holder of a MI card may not shoot at, take or attempt to take any protected species from within the right-of-way fence on any established road.

(2) Crossbow use: The holder of a MI card may use a crossbow during any bow hunt.

(3) Assistance for MI hunters: The holder of a MI card may be accompanied by another person, who is designated in writing, to assist in taking or attempting to take any big game animal which has clearly been wounded by the licensed MI hunter. The person so designated must carry that written authorization from the MI hunter at all times while in the field in order to act as their assistant. A MI hunter may only designate one person at a time to assist them. Any person assisting a MI hunter must follow the sporting arm type designated for that hunt and all other laws and rules which apply to a licensed hunter.

19.31.10.12 BIG GAME AND TURKEY:

A. Legal hunting hours: A person may only take or attempt to take any big game species or turkey during the period from one-half hour before sunrise to one-half hour after sunset. It is unlawful to take or attempt to take big game or turkey outside of legal hunting hours.

B. Killing out of season: It is unlawful to take or attempt to take any big game species or turkey outside of the established hunting season.

C. Bag limit: It is unlawful for any person to take any big game species or turkey other than the legal bag limit as specified on their big game or turkey license or as indicated by the hunt code, or for any bear hunter to take a sow with cub(s), or any cub less than one year old, or for any cougar hunter to take a spotted cougar kitten or any female accompanied by spotted kitten(s).

D. Exceeding the bag limit on big game:

(1) It is unlawful for any person to hunt for or take more than one animal of any big game species per year unless otherwise allowed by state game commission rule.

(2) It is unlawful for any person to hunt for or take more than two cougars per year unless otherwise allowed by state game commission rule.

E. Exceeding the bag limit on turkey: It is unlawful for any person to hunt for or take more than two bearded turkeys during the spring turkey season or more than one turkey during the fall turkey season unless otherwise specifically allowed by 19.31.16 NMAC.

F. Proof of sex or bag limit: It is unlawful for anyone to transport or possess the carcass of any big game species or turkey without proof of sex or bag limit (except donated parts when accompanied by a proper possession certificate). Proof of sex or bag limit shall be:

(1) Bear and cougar – External genitalia of any bear or cougar killed shall remain naturally attached to the pelt and be readily visible until the pelt has been inspected and pelt-tagged by a department official.

(2) Barbary sheep. The horns of any Barbary sheep taken shall remain naturally attached to the skull or skull plate. If the horns of any female Barbary sheep are 18 inches or longer the external genitalia shall remain naturally attached to the hide/carcass, and be visible until arriving at a residence, taxidermist, meat processing facility or place of final storage.

(3) Deer – The antlers of any buck deer taken shall remain naturally attached to the skull or skull plate until arriving at a residence, taxidermist, meat processing facility or place of final storage. The scalp and both ears of any antlerless deer or the naturally attached female genitalia shall accompany the carcass in the same manner.

(4) Elk – The antlers of any bull elk taken shall remain naturally attached to the skull or skull plate until arriving at a residence, taxidermist, meat processing facility or place of final storage. The scalp and both ears of any antlerless elk or the naturally attached female genitalia shall accompany the carcass in the same manner.

(5) Pronghorn - The horns, scalp and both ears of any pronghorn taken shall remain naturally attached to the skull or skull plate and must accompany the carcass until arriving at a residence, taxidermist, meat processing facility or place of final storage. If the horns of a female pronghorn are longer than its ears, and the bag limit is F/IM, the external genitalia must remain naturally attached to the hide/carcass, as appropriate, and be visible to provide proof of legal bag limit until arriving at a residence, taxidermist, meat processing facility or place of final storage.

(6) Bighorn sheep - The horns of any ram shall remain naturally attached to the skull or skull plate and the external genitalia of any ewe taken shall remain naturally attached to the hide/carcass, and be visible until arriving at a residence, taxidermist, meat processing facility or place of final storage.

(7) Persian ibex - The horns of any ibex shall remain naturally attached to the skull or skull plate. If the horns of any female ibex are 20 inches or longer the external genitalia shall remain naturally attached to the hide/carcass, and be visible until arriving at a residence, taxidermist, meat processing facility or place of final storage.

(8) Turkey – When the bag limit is a bearded turkey, the beard and a small patch of feathers surrounding the beard shall remain with the carcass, and be visible until arriving at a residence, taxidermist, meat processing facility or place of final storage.

(9) Javelina – The skull of each javelina shall be proof of bag limit and must be retained until arriving at a residence, taxidermist, meat processing facility or place of final storage.

(10) Oryx - The horns of any oryx taken shall remain naturally attached to the skull or skull plate until arriving at a residence, taxidermist, meat processing facility or place of final storage.

G. Tagging of harvested game:

(1) Physical Tagging of harvested game: Licensed hunters of any big game species or turkey, who have chosen to receive a department issued tag at application or purchase, upon harvesting an animal, shall immediately and completely notch out the

appropriate month and day on the carcass tag. Prior to moving any part of the carcass from the kill site, the licensed hunter shall remove the entire backing material from the carcass tag and adhere it to the appropriate location on the carcass leaving the entire face of the tag visible. If the species or sex harvested requires the use of an antler or horn tag the licensed hunter shall, prior to moving any part of the carcass from the kill site, remove the entire backing material from the antler/horn tag and adhere it to the appropriate location on the antler or horn leaving the entire face of the tag visible. All tags shall remain attached to the carcass, antlers or horns until it is delivered to a meat processing facility, taxidermist, placed in final cold storage or if required, is inspected and documented or pelt tagged by a department official. The antler/horn tag is not required to be attached or used on antlerless/hornless animals.

(2) Electronic Tagging of harvested game: Licensed hunters of any big game species or turkey, who have chosen to electronically tag their game at application or purchase, upon harvesting an animal, shall immediately access the department's electronic tagging (e-tag) application to receive an e-tag number specific to the license. The licensed hunter will legibly write the e-tag number, customer identification number, and the date of harvest on any durable material using permanent ink and shall attach one piece to the big game species or turkey on the appropriate location on the carcass and another piece to the antler or horns as required prior to moving any part of the carcass from the kill site. All e-tag pieces shall remain attached to the carcass, antlers or horns until it is delivered to a meat processing facility, taxidermist, placed in final cold storage or if required, is inspected and documented or pelt tagged by a department official. An antler/horn e-tag is not required to be attached or used on antlerless/hornless animals.

(3) The proper location to attach all carcass tags and e-tags:

(a) The proper location to attach the carcass tag or e-tag on any game species is to attach it conspicuously on the hock tendon on either hind leg.

(b) The proper location to attach the carcass tag or e-tag on javelina is to adhere it to the head/skull around the nose.

(c) The proper location to attach the carcass tag or e-tag on a turkey is to adhere it around the leg above the foot and below the feathers on the thigh.

(d) The proper location to attach the carcass tag or e-tag on a bear or cougar is to adhere it around the ankle area of the hide above the foot. Bear and cougar carcass tags authorize possession of those animals until pelt tagged in accordance with state game commission rule or for five days from date of kill, whichever comes first.

(i) Any bear or cougar killed shall be tagged with a pelt tag furnished free of charge by the department.

(ii) The hunter who kills the bear or cougar or the hunter's designee must present the unfrozen skull and pelt to a department official for tooth removal and pelt tagging within five calendar days from the date of harvest, before the pelt can be frozen, processed, tanned or salted by a taxidermist, or before taking the pelt out of New Mexico, whichever comes first.

(iii) Any hunter who appoints a designee to present the skull and pelt for pelt tagging is required to contact a conservation officer prior to having the pelt inspected and tagged.

(iv) The pelt tag shall remain attached until the pelt is tanned.

(v) Skulls with mouths closed may not be accepted until the mouth is opened by the hunter or designee.

(vi) Licensed bear or cougar hunters or their designees who provide false or fraudulent information regarding the required information including, but not limited to, sex, date or location of harvest shall be assessed 20 revocation points pursuant to 19.31.2 NMAC.

(e) The proper location to attach an antler tag or e-tag is to adhere the tag around the main beam of the antler between any of the points or tines as close to the base as possible to prevent the tag from coming off.

(f) The proper location to attach a horn tag or e-tag is to adhere the tag around the horn as close to the base as possible to prevent the tag from coming off.

H. It is unlawful:

(1) for any licensed hunter to fail to properly tag their big game species or turkey with the carcass and antler tag or e-tag as prescribed;

(2) to possess any portion of a big game or turkey carcass that does not have a properly notched carcass tag attached to it or a completed e-tag attached to it, except lawfully taken game that is accompanied by a proper possession certificate or department invoice;

(3) to possess any bear or cougar or parts thereof which has not been pelt tagged within five days of kill, has been taken out of state prior to pelt tagging or has not otherwise been pelt tagged in accordance with state game commission rule;

(4) for any person to transport or possess the carcass of any big game species or turkey without proof of sex naturally attached or proof of legal bag limit until the carcass arrives at a residence, taxidermist, meat processing facility, place of final storage or if required, is inspected and documented or pelt tagged by a department

official, except lawfully taken game that is accompanied by a proper possession certificate or department invoice;

(5) to use a carcass or antler tag that is cut, torn, notched or mutilated. Cut, torn, notched or mutilated tags are no longer valid for the take of a big game species or turkey; or

(6) to use a previously issued carcass or antler tag once a duplicate has been obtained or to use the carcass, antler tag or e-tag of any other person. Any previous carcass or antler tag assigned to a license which is replaced by a duplicate is void and no longer valid for the take of a big game species or turkey.

I. Once-in-a lifetime hunts: It is unlawful for any person to apply for, receive or use any once-in-a lifetime license if they have ever held a once-in-a lifetime license for that species which has the same bag limit or eligibility requirements.

J. Youth-only (YO), mobility-impaired (MI), veteran and military-only (MO) hunts or military discounted licenses: It is unlawful for anyone to apply for or receive or use any YO, MI, veteran or MO license or any military discounted license except as allowed by state game commission rule.

K. License sale: It is unlawful for anyone to sell or offer for sale any hunting, fishing or trapping license, permit or tag which has been issued by the department, or to sell or offer for sale any commercial collection permit or scientific collection permit.

L. Use of dogs in hunting:

(1) It is unlawful to use dogs to hunt or pursue big game species or turkey, except for bear and cougar.

(2) Dogs may be used only to hunt bear and cougar during open seasons unless otherwise restricted. It is unlawful to:

(a) hunt for or pursue bear or cougar with dog(s) on the Valle Vidal except holders of bear entry permits for the hunting of bear only;

(b) hunt for or pursue bear or cougar with dog(s) during any September big game bow season statewide except as otherwise allowed by state game commission rule;

(c) release dog(s) to pursue or hold bear or cougar outside of legal hunting hours or during closed season or in a closed area or zone;

(d) to pursue bear or cougar with dog(s) without the licensed hunter, who intends to kill or who kills the bear or cougar, present continuously from the initial release of any dog(s).

(3) It is unlawful to use dog(s) to assist in the recovery of wounded or dead big game or turkey except as follows:

(a) Dog(s) may be used to assist in the recovery of wounded game provided that no more than two dogs may be used at any one time to locate a wounded or dead deer, elk, pronghorn, bighorn sheep, Barbary sheep, oryx, Persian ibex, javelina or turkey.

(b) Dog(s) used to assist in the recovery of deer, elk, pronghorn, bighorn sheep, Barbary sheep, oryx, Persian ibex, javelina or turkey shall be leashed and under the control of the handler at all times and cannot be used to pursue or harass wildlife. No person assisting in the recovery of a wounded animal may shoot or kill the animal being tracked unless they are a licensed hunter for that species, season and area and they intend to tag the animal as their own.

M. Use of bait: It is unlawful for any person to take or attempt to take any big game species or turkey by use of baiting or for any person to take or attempt to take big game or turkey from an area which has not been completely free of bait (including in feeders) for at least 10 days. Preexisting legitimate livestock salt and mineral and natural attractants such as cultivated fields, water, orchards, natural kills, carrion or offal are not considered bait unless they have been moved or placed there from another location. It is unlawful to create, maintain or use any bait station in hunting bear or cougar. It is unlawful to use any scent attractant in hunting bears.

N. Live animals: It is unlawful to use live protected species as a decoy in taking or attempting to take any big game species or turkey.

O. Hunting captive big game species: It is unlawful to take or attempt to take any big game species within any fence or enclosure, or by use of any fence or enclosure, which significantly restricts or limits the free ingress or egress of that big game species except as allowed by permit from the department. Any fence which is 7.5 feet tall or taller shall be considered game proof and hunting within any such enclosure, even if there are open gate(s), is unlawful. Exception: Net wire fencing commonly used as sheep or goat fencing which is not taller than four feet is not considered to significantly restrict or limit the free ingress or egress of any protected species.

P. Use of calling devices: It is unlawful to use any electronically or mechanically recorded calling device in taking or attempting to take any big game species or turkey, except javelina, bear and cougar.

Q. Automatic firearms: It is unlawful to take or attempt to take any big game species or turkey with a fully automatic firearm.

R. Bullets: It is unlawful to take or attempt to take any big game species or turkey by the use of a prohibited bullet.

S. Drugs and explosives: It is unlawful to use any form of drug to capture, take or attempt to take any big game species or turkey unless specifically authorized by the department, or to use arrows driven by explosives, gunpowder or compressed air.

T. Legal sporting arm types:

(1) It is unlawful to use any sporting arm type for big game species other than those defined under big game sporting arms except for cougar and javelina which may be taken with those defined under any sporting arm. For cougar and javelina, compressed air guns must be .22 caliber or larger and shotguns must fire a single slug or #4 buckshot or larger.

(2) It is unlawful to use any sporting arm type for a big game species which does not correspond with the hunt code authorized sporting arm type.

(3) It is unlawful to use sporting arms for turkey other than a shotgun firing shot, bow or crossbow.

U. Hunting on the wrong ranch, in the wrong area or in the wrong GMU: It is unlawful for any person to hunt in any location, GMU or ranch other than that area specified on their license or permit unless otherwise allowed by state game commission rule.

(1) A landowner whose contiguous deeded property extends into an adjacent GMU(s) may enter into a written agreement with the department to hunt big game on the contiguous deeded property of the ranch. This permission shall be requested annually, at the local department office, in person or in writing by the landowner at least one week prior to the desired hunt dates. The landowner must show proof of ownership and property location. The season dates, bag limit and sporting arm type will be determined by the GMU where the majority of the deeded property lies. Landowners who enter into this agreement may not hunt the GMU where the minority of the contiguous property lies during that minority GMU's season dates if different from the majority dates. Unit-wide and ranch-wide properties are not eligible for this agreement for those species for which the unit-wide or ranch-wide agreement applies.

(2) A licensed big game hunter may hunt a landowner's contiguous private property which extends into an adjoining GMU(s) only when a department agreement exists and must adhere to the department issued agreement unless otherwise restricted by state game commission rule.

V. Restricted areas on White Sands missile range:

(1) It is unlawful to drive or ride in a motor vehicle into an area signed "no hunting" or otherwise restricting hunting or as documented on a map or as presented during the hunt's briefing, except if the hunter or driver is escorted by official personnel;

(2) It is unlawful for a licensed hunter to enter an area signed "no hunting" or otherwise restricting hunting except if the hunter is escorted by official personnel; and

(3) It is unlawful for a licensed security badged hunter to hunt or take any oryx in an area other than their "to be assigned" area.

W. Validity of licenses and unitizations: All big game and turkey licenses shall be valid only for the specified dates, eligibility requirements or restrictions, legal sporting arms, bag limit, and area specified by the hunt code printed on the license including those areas designated as public or private land per a current unitization agreement between the department and U. S. bureau of land management, state land office or other public land holding entity.

X. Hunting on public land with a private land only license: It is unlawful to hunt big game on any public land with a private land only license. Public land as used in this section shall mean any federally owned or managed property, any state owned or managed property, or any private property which is part of a unitization hunting agreement, ranch wide agreement or unit wide agreement for the species being hunted, any private property which the department has paid for public access for the species being hunted or any New Mexico state game commission owned or managed property.

Y. Collars or tracking devices: It is unlawful to attach any collar or electronic tracking device to any big game species or turkey except as specifically authorized by the department.

Z. License purchase: Bear or cougar hunters must purchase their bear or cougar license at least two calendar days prior to taking or attempting to take any bear or cougar. It is unlawful for any bear or cougar hunter to take or attempt to take a bear or cougar within two calendar days of purchasing their license.

AA. Zones: It is unlawful to pursue, take or attempt to take a bear or cougar in a closed zone. Zones will close pursuant to 19.31.11 NMAC.

BB. Valle Vidal: It is unlawful to hunt bear or cougar on the Valle Vidal except for properly licensed bear or cougar hunters that also possess a Valle Vidal elk hunting license (only during the dates and with the sporting arm type specified on their elk license) and holders of a Valle Vidal bear entry permit (only during their entry permit hunt dates).

CC. Cougar ID: It is unlawful for any person to hunt for cougar without having completed the department's cougar ID course and having the verification code printed on their license.

DD. Use of cellular, Wi-Fi or satellite cameras: It is unlawful for any person to use any cellular, Wi-Fi or satellite camera for the purpose of hunting or scouting for any big game animal. Exception: This section does not apply to cellular or satellite

phones which are kept on one's person and not used remotely or department employees and their designees while performing their official duties.

EE. It shall be illegal to shoot any turkey on a roost.

[19.31.10.12 NMAC - Rp, 19.31.10.12 NMAC, 4/1/2023]

19.31.10.13 UPLAND GAME AND MIGRATORY GAME BIRDS:

A. Upland game hunting hours: Upland game species may be hunted or taken only during the period from one-half hour before sunrise to one-half hour after sunset. It is unlawful to take or attempt to take upland game outside of legal hunting hours.

B. Killing out of season: It is unlawful to kill any migratory game bird or upland game out of season.

C. Exceeding the bag limit: It is unlawful for any person to take or attempt to take more than one daily bag limit of any migratory game bird species or upland game species allowed by state game commission rule. There shall be no daily bag or possession limit for light geese during the light goose conservation order hunt dates.

D. Possession limit: It is unlawful for any person to possess more than one possession limit of any migratory game bird or upland game species.

E. Proof of species or sex: It is unlawful for any person to possess any migratory bird or upland game without proof of species or sex as required below:

(1) One foot shall remain attached to each quail taken until the bird has arrived at a residence, taxidermist, meat processing facility or place of final cold storage.

(2) The head or one leg of each pheasant taken must remain attached to the bird until the bird arrived at a residence, taxidermist, meat processing facility or place of final cold storage.

(3) One fully feathered wing must remain attached to all migratory game birds, except dove and band-tailed pigeon, until the bird has arrived at a residence, taxidermist, meat processing facility or place of final cold storage.

F. Youth-only (YO), mobility-impaired (MI) and military-only (MO) hunts or military discounted licenses: It is unlawful for anyone to apply for or receive or use any YO, MI, or MO license or any military discounted license except as allowed by state game commission rule.

G. License sale: It is unlawful for anyone to sell or offer for sale any hunting, fishing or trapping license, permit or tag which has been issued by the department, or to sell or offer for sale any commercial collection permit or scientific collection permit.

H. Use of dogs in hunting: Dog(s) may be used to hunt migratory game bird species and upland game. It is unlawful to pursue migratory game birds or upland game with dog(s) outside of the hunting seasons established except in conjunction with a permitted event.

I. Use of bait: It is unlawful for any person to take or attempt to take any migratory game bird species or upland game by use of baiting or for any person to take or attempt to take migratory game birds or upland game from an area which has not been completely free of bait (including in feeders) for at least 10 days. Preexisting legitimate livestock salt and mineral and natural attractants such as cultivated fields, water, orchards, carrion or offal are not considered bait unless they have been moved there from another location.

J. Live animals: It is unlawful to use live protected species as a decoy in taking or attempting to take any migratory game bird species or upland game species.

K. Use of calling devices: It is unlawful to use any electrically or mechanically recorded calling device in taking or attempting to take any migratory game bird or upland game species. During the light goose conservation order hunt dates, electronic calling devices are allowed for the take of light geese.

L. Automatic firearms: It is unlawful to take or attempt to take any migratory game bird or upland game species with a fully automatic firearm.

M. Non-toxic shot: It is unlawful for any person to use or possess any shotgun shell loaded with anything other than non-toxic shot or for any person using a muzzle-loading shotgun to possess anything other than non-toxic shot while hunting for any migratory game bird species, except when hunting dove, band-tailed pigeon or eastern sandhill crane. Non-toxic shot is required for all migratory game birds and upland game species on Bernardo WMA, La Joya WMA, and Huey WMA.

N. Drugs and explosives: It is unlawful to use any form of drug to capture, take or attempt to take any migratory game bird or upland game species unless specifically authorized by the department, or to use arrows driven by explosives, gunpowder or compressed air.

O. Legal sporting arms and ammunition: It is unlawful to use sporting arms other than those listed below to take or attempt to take of any migratory game bird or upland game species.

- (1) The following are legal sporting arms for pheasants and quail:

(a) shotguns firing shot;

(b) bows; and

(c) crossbows.

(2) The following are legal sporting arms for dusky grouse, chukar, Eurasian collared-dove, Abert's squirrels, Arizona gray squirrels, fox squirrels, eastern gray squirrels and red squirrels:

(a) shotguns firing shot;

(b) rimfire firearms;

(c) muzzle-loading firearms;

(d) bows;

(e) crossbows; and

(f) compressed air guns, .177 caliber or larger.

(3) The following are legal sporting arms for migratory game birds:

(a) shotguns firing shot, shotguns shall not be capable of holding more than three shells except while hunting light geese during the light goose conservation order hunt dates, as defined in 19.31.6 NMAC;

(b) bows; and

(c) crossbows.

P. Areas closed to migratory game bird hunting: It shall be unlawful to hunt migratory game birds in that portion of the stilling basin below Navajo dam lying within a line starting from N.M. 511 at the crest of the bluff west of the Navajo dam spillway and running west along the fence approximately one-quarter mile downstream, southwest along the fence to N.M. 511 to the Navajo dam spillway, across the spillway, and to the crest of the bluff.

Q. Collars or tracking devices: It is unlawful for any person to attach any collar or electronic tracking device to any migratory game bird or upland game except as specifically authorized by the department.

R. Use of traps and snares: It is unlawful for any person to intentionally set any trap, snare, cage, box or other device to capture or attempt to capture any migratory game bird or upland game or for any person to intentionally capture or attempt to

capture any migratory game bird or upland game unless specifically allowed by license or permit.

[19.31.10.13 NMAC - Rp, 19.31.10.13 NMAC, 4/1/2023]

19.31.10.14 FISHING:

A. Angling: Game fish may be taken by angling in all waters that are open for fishing.

B. Season and hours: It is unlawful to fish in any water during a closed season or to fish in any water outside of the legal fishing hours as prescribed in 19.31.4 NMAC.

C. Closed waters: It is unlawful to fish in any water closed by state game commission rule.

D. Ice fishing: It is unlawful to take fish from or through the ice on the following waters: Santa Cruz lake, Bonito lake, and Springer lake. Ice fishing is legal on all other waters unless otherwise prohibited.

E. Hatchery waters: It is unlawful to take or attempt to take fish from the waters of any fish hatchery or rearing ponds owned or operated by state or federal agencies. Exception: During open season, angling shall be permitted in the Glenwood pond at the Glenwood state fish hatchery, Red River hatchery pond at the Red River state fish hatchery, Brood pond at Seven Springs state fish hatchery, Laguna del Campo at Los Ojos state fish hatchery, and settling ponds at Rock Lake state fish hatchery. Additionally, the director may expressly authorize other limited fishing at the state's fish hatcheries based on management needs.

F. Trotlines: Game fish may be taken by use of trotlines in any water except those listed below, however:

- (1) It is unlawful for any person to set more than one trotline at a time.
- (2) It is unlawful to tie or join together trotlines belonging to two or more persons.
- (3) It is unlawful for any trotline to have more than 25 angling hooks.
- (4) It is unlawful for a person who has set or maintained a trotline to not personally visit and inspect it at least once every calendar day and remove or release all game fish which are caught.
- (5) It is unlawful for anyone to check, pull up or otherwise tamper with another's trotline.

(6) It is unlawful for anyone to set, check or maintain a trotline which is not tagged or marked as follows:

(a) A person fishing with a trotline shall attach to it an identification tag that is visible above the water line. The identification tag shall bear the angler's department issued customer identification number (CIN).

(b) An unlicensed angler 11 years of age and younger shall list their department issued customer identification number (CIN) or their name and date of birth.

(7) It is unlawful to set or use a trotline in any public water with the following exceptions:

Drainage:	Rivers:	Lakes:
Rio Grande drainage	Rio Grande mainstem from its confluence with the Chama river downstream to New Mexico/Texas state line and Chama river mainstem from the northern boundary of the Monastery of Christ in the Desert downstream to Abiquiu lake	Abiquiu lake, Cochiti lake, Elephant Butte lake, and Caballo lake
Pecos river drainage	Pecos river mainstem downstream of I-25 (excluding Villanueva state park) to the New Mexico/Texas state line and all tributaries within Chavez, De Baca, Eddy, Guadalupe, and San Miguel (downstream of I-25) counties	Santa Rosa lake, Sumner lake, lake Avalon, Brantley lake, Six Mile lake, Ten Mile reservoir, and Red Bluff reservoir
Canadian river drainage	Canadian river mainstem and all tributaries downstream and east of I-25 to the New Mexico/Texas state line	Stubblefield lake, Laguna Madre, Maxwell lake 14, Springer lake, Conchas lake, and Ute lake
San Juan river drainage	San Juan river mainstem from U.S. 64 bridge at Blanco downstream to the Navajo Nation boundary at the Hogback canal diversion	Navajo lake

Gila river and San Francisco river drainage	Gila river mainstem from its confluence with the east fork downstream to the New Mexico/Arizona state line and San Francisco river mainstem from U.S. 180 bridge at Alma downstream to the New Mexico/Arizona state line	None
Statewide	As described above	Class A lakes and lakes, ponds, and ranch tanks not fed by public waters and not open to public fishing

(8) Any officer authorized to enforce Chapter 17 NMSA 1978 and state game commission rules may seize and destroy any trotlines not set or checked in accordance with this subsection.

G. Spearfishing and bow fishing:

(1) Game fish may be taken by spearfishing and bow fishing only in lakes and reservoirs open to fishing. It is unlawful to spearfish or bow fish in any special trout water as designated in 19.31.4 NMAC or in any river or stream.

(2) It is unlawful to take any largemouth bass by spearfishing or bow fishing in the following waters: Bill Evans lake, Clayton lake, and lake Roberts.

H. Noodling or hand fishing: It is unlawful to catch any game fish by hand without the use of angling equipment.

I. Use of nets: It is unlawful to use cast nets, dip nets, seines or gill nets to capture and retain any protected species of fish from any water unless specifically allowed by permit or state game commission rule. Dip nets may be used to assist in landing fish taken by legal angling methods.

J. Illegal device or substance: It is unlawful to use any device or substance capable of catching, stupefying or killing fish except as permitted by state game commission rule.

K. Bait:

(1) It is unlawful to use protected game fish or the parts thereof as live or dead bait, except the genus *Lepomis* (sunfish), taken by legal means may be used as

live or dead bait in the water from which they were taken, and the roe, viscera and eyes of any legally taken game fish may be used.

(2) It is unlawful to use bullfrogs or bullfrog tadpoles as bait, or to possess any live bullfrogs or live bullfrog tadpoles while fishing.

L. Use of bait fish: It is unlawful to use or possess any baitfish while angling except as follows:

(1) The following baitfish species can be used live or dead unless otherwise prohibited:

Water:	Approved bait fish species:
Rio Grande drainage	Fathead minnow, red shiner and shad
Elephant Butte and Caballo reservoirs	Fathead minnow, red shiner, shad and golden shiner
Pecos river drainage except for Bitter lake national wildlife refuge and Bottomless lakes state park	Fathead minnow red shiner, and shad
Canadian river drainage	Fathead minnow, red shiner, white sucker and shad
San Juan river drainage	Fathead minnow and red shiner
Gila river and San Francisco river drainages	Fathead minnow

(2) The following bait fish species can only be used as dead bait unless otherwise prohibited:

Water:	Approved dead baitfish species:
Statewide	Common carp

Heron reservoir	White sucker
-----------------	--------------

(3) Commercially packaged and processed species of fish which are dead or products thereof are not considered bait fish and are legal in all regular waters.

M. Methods for taking bait fish for personal use: Licensed anglers and children 11 years of age and younger may take bait fish for personal use only in waters containing game fish by angling, nets, traps, spears, arrows and seines. All protected species of fish taken in seines, nets and traps shall be immediately returned to the water.

N. Illegal taking of bait fish:

(1) It is unlawful for any person, except children 11 years of age and younger, to take bait fish from any water without having a valid fishing license.

(2) It is unlawful for any person to take bait fish from any water for commercial use without a permit issued from the department.

(3) It is unlawful for licensed minnow dealers to violate any of the provisions of their license or permit.

O. Permits for taking bait fish: The director may issue permits for the use of nets, seines, traps or cast nets in taking bait fish in waters containing protected species of fish. The permit shall specify methods of taking, places for taking and duration of the permit. The permittee shall report monthly, to the department, the species, numbers and poundage of bait fish taken during the preceding month.

P. Limit on angling hooks: It is unlawful to angle with more than two barbless lures or flies with single point angling hooks on a single line when fishing the special trout water on the San Juan river designated in Subsection A of 19.31.4.11 NMAC.

Q. Eradication of fish: In waters where fish are being eradicated or where water shortage warrants reduction of fish numbers the director may permit licensed anglers and children 11 years of age and younger to take and possess game fish in numbers exceeding current bag and possession limits. In granting such permission the director may specify bag and possession limits and manner and method of taking for such waters.

R. Possession and release of live game fish:

(1) It is unlawful to release any live game fish into any water in the state, except for fish which were legally caught from that water, without a permit issued by the department.

(2) It is unlawful to possess or transport any live game fish away from the water from which they were caught without a permit issued by the department.

(3) Exception: Department employees or federal employees while performing their official duties or those individuals working on behalf of the department when directed by a department employee.

S. Possession of undersized fish: It is unlawful for any person to have game fish in their possession which do not meet the minimum length requirements as specified in 19.31.4 NMAC.

T. Number of fishing poles or lines: It is unlawful to angle with more than one pole or line without having purchased a current two rod validation during the current license year. It is unlawful under any circumstance to angle with more than two poles or lines. A trotline shall not count toward an anglers limit on fishing poles or lines.

U. Exceeding daily bag limit: It is unlawful to exceed the daily bag limit of any protected fish species, as specified in 19.31.4 NMAC.

V. Exceeding possession limit: It is unlawful to exceed the possession limit of any protected fish species, as specified in 19.31.4 NMAC.

W. Exceeding daily bag limit or possession limit - Penalty Assessment: Any person exceeding the daily bag limit or the possession limit by two fish or less shall be offered a penalty assessment.

X. Snagging game fish: It is unlawful to snag game fish or to keep any snagged game fish except Kokanee salmon during the special Kokanee salmon season as specified in 19.31.4 NMAC.

Y. Special trout waters: Only barbless lures or flies may be used in the special trout waters designated in 19.31.4 NMAC, except in the following waters any legal angling gear and legal bait may be used: the Vermejo river system within Vermejo Park ranch boundaries, Gilita, Little Turkey, and Willow creeks, Mineral creek, Red River from its confluence with the Rio Grande upstream to the lower walking bridge at Red River state fish hatchery, Rio Chama from the river crossing bridge on U.S. 84 at Abiquiu upstream 7.0 miles to the base of Abiquiu dam, Rio Grande, Rio Ruidoso, and Whitewater creek from Catwalk National Recreation Trail parking area upstream to headwaters. It is unlawful to use tackle which does not meet these restrictions in the designated special trout waters.

Z. Attracting or concentrating fish:

(1) Artificial lights: Use of artificial lights is permitted for attracting game fish.

(2) Disturbing the bottom: It is unlawful in all special trout waters defined in Subsection A of 19.31.4.11 NMAC, to disturb or dislodge aquatic plant growth, sediment, or rocks for the purpose of attracting or concentrating fish. It shall also be unlawful to angle in the immediate vicinity where such disturbance has occurred.

(3) Chumming: Chumming is legal in all waters which have no tackle restrictions.

AA. Violation of age or disability restrictions: It is unlawful for any person to fish in any water with age or disability restrictions when that person does not meet the requirements as specified in 19.31.4 NMAC.

[19.31.10.14 NMAC - Rp, 19.31.10.14 NMAC, 4/1/2023]

19.31.10.15 FURBEARERS:

A. Shooting hours:

(1) Hunting and falconry – Restricted to the period one-half hour before sunrise to one-half hour after sunset except that a licensed furbearer hunter is authorized by the department to hunt for and take raccoons by use of artificial light while hunting at night with a rim-fire rifle or handgun no greater in size than a .22 caliber, shotgun, bow or crossbow during open season. The artificial light used for raccoon hunting must be a headlamp or hand-held flashlight. It is unlawful for any artificial light to be cast from a vehicle while raccoon hunting.

(2) Trapping – There are no restrictions on shooting hours for trapping.

B. Legal methods of taking furbearers shall include any sporting arm, falconry, traps and snares.

C. Dogs are allowed for hunting all furbearers during open season.

D. It is unlawful to kill any mink, otter, black-footed ferret, coatimundi or Pacific (pine) marten.

E. It is unlawful to kill any furbearer outside of the seasons established for that species, except as authorized by state statute or otherwise allowed by game commission rule.

F. Raccoon may be hunted or trapped during the extended season with a current trapper license. Only cage traps and foot encapsulating traps are allowed for raccoon trapping during this period. It is unlawful to hunt or trap raccoon during the extended season contrary to this section.

G. All land sets must be visually checked every calendar day. Water sets must be checked at least once every other calendar day. A licensed trapper may designate an agent to check their set traps and snares on alternating check days, but the licensed trapper must personally check the traps every other check day. Any person may be designated as an agent for any licensed trapper, but the agent must possess written permission from the trapper and a valid trapper license. The permission must include the licensed trapper's full name, contact information, and the agent must know the location of traps.

H. It is unlawful for any person to trap for any furbearer without having successfully completed a department approved trapper education course.

I. It is unlawful for any person to hunt for any furbearer without having successfully completed either the New Mexico trapper education course or a New Mexico law and species identification course.

J. No person may hunt furbearers or nongame, or set any trap or snare on any wildlife management area (WMA), except prairie-chicken wildlife management areas (PCWMA), without a trapper license, habitat management access validation (HMAV) stamp and written permission from the department. Restrictions may be placed on this permission, and this permission may be rescinded at any time for violations of the restrictions. All PCWMA are open to furbearer, coyote and skunk hunting and trapping from November 1 to March 15 annually, without written permission, provided that every person hunting or trapping for any furbearer, coyote or skunk on a PCWMA must have a trapper license and HMAV stamp. It is unlawful to take or attempt to take any furbearer, coyote or skunk on any WMA contrary to this section, contrary to the restrictions written on any department issued permission or without a current trapper license and HMAV stamp.

K. It is unlawful to place or use restricted-use pesticides for the take of any furbearer.

L. The following restrictions shall apply to traps that could reasonably be expected to catch a furbearer:

(1) Each trap or snare must be either permanently marked with, or have a tag securely attached with, a department issued user-identification number or the name and address of the trapper using the trap or snare.

(2) No foothold trap with an outside jaw spread larger than six and one-half inches, or seven inches maximum if laminated above the jaw surfaces, or tooth-jawed trap may be used in making a land set.

(3) No body-grip trap with an inside jaw spread greater than seven inches may be set on land. Body-grip traps with inside jaw spreads of between six and seven inches set on land must be recessed in a cubby at least eight inches from the entrance.

(4) All foothold traps with an inside jaw spread equal to or greater than five and one-half inches used in making a land set shall be off-set a minimum of three-sixteenths of an inch between the contact surfaces of the closed jaws, unless they have been constructed or modified so that a portion of the jaw is padded with a soft material such as rubber or canvas.

(5) No land set shall be placed on public land within one-half mile of:

(a) an established and maintained public campground or boat-launching area;

(b) a designated and signed roadside rest area, public picnic area or trailhead. "Trailhead" as used herein shall mean an officially designated, mapped, maintained and marked terminus of any trail closed to all vehicles having three or more wheels, and is published on the most current map issued by the state or federal land management agency responsible for that property;

(c) an occupied dwelling without written permission of the occupant of the dwelling.

(6) It shall be unlawful to make a land set within 75 feet of the edge of any public road or trail (including any culvert or structure located beneath it) if no right of way fence is present, except on private land. No land set shall be made within any right of way fence on any public road. "Public road" as used herein shall mean any road, street or thoroughfare open to motorized vehicle travel which was constructed and is maintained with public funds and is open to the public; or any road, street or thoroughfare open to motorized vehicle travel that is officially numbered or named on the most current published map issued by a municipal, state or federal agency and is open to the public. "Trail" as used herein shall mean any officially designated, mapped, maintained, and marked path open for public use and published on the most current map issued by a state or federal land management agency.

(7) No land set may be placed within 150 feet of any man-made livestock or wildlife catchment, pond or tank containing water, except on private land.

(8) It is unlawful to place, set or maintain any land set within 30 feet of any bait over two ounces in weight which is visible to airborne raptors. Bones that are entirely free of bait are legal.

(9) No foothold trap with an inside jaw spread larger than seven and one-half inches or body-grip trap with a jaw spread greater than 12 inches shall be used in making a water set.

(10) Body-grip traps used in water sets with a jaw spread of eight inches or more must be submerged in water to their jaw pivot or deeper.

(11) Any snare set on land must have a lock or break-away device which is designed to release or fail when a maximum of 350 pounds of pressure is applied to it. Locks or break-away devices must be attached in a way which leaves no part of the snare attached to an animal when it releases or fails. All snares must be securely anchored and cannot be attached to a drag. Exception: foot snares.

(12) Each foothold trap set on land must have at least two separate swivel points in the anchor chain. At least one of these swivel points must be within six inches of the trap.

M. A release device or catchpole shall be carried by trappers, and all captured animals must be removed or released from any trap or snare at the time of check. In cases where assistance is required for safe release of the animal, or when biological data is sought by the department, the department must be notified as soon as possible.

N. It is unlawful to set any trap or snare on land without stakes, chains, drags or other anchoring such that any furbearer, coyote or wolf caught will be prevented from escaping with the trap.

O. No person may kill any species listed in 19.33.6 NMAC - LIST OF THREATENED AND ENDANGERED SPECIES, including by the use of any body-grip trap or snare.

P. As long as the Mexican wolf is listed as a federally threatened or endangered species in the United States, any trapper who captures a Mexican wolf must report the capture to the U.S. fish and wildlife interagency field team:

(1) as soon as possible to arrange for radio-collaring and release of the wolf;
or

(2) within 24 hours if the wolf is released or has pulled out of the trap.

Q. Tagging:

(1) Every person who takes a bobcat in New Mexico shall present the pelt for tagging in New Mexico prior to transporting the pelt out of the state, prior to selling the pelt, or no later than April 14, annually; whichever occurs first.

(2) Every person who presents a bobcat for tagging shall display a current New Mexico trapper license except residents 11 years of age or younger. Tags may be obtained from any conservation officer or any department office. In addition, pelts may be tagged by New Mexico licensed fur dealers following policies set forth by the department.

(3) It is unlawful for any person to transport across state lines, sell, barter, otherwise dispose of, or possess any bobcat pelt taken in New Mexico that has not been tagged in accordance with this rule.

(4) It is unlawful to present for tagging, or to have tagged with a New Mexico tag, any pelt from a bobcat taken outside of New Mexico.

(5) It is unlawful for any licensed fur dealer to charge a fee for tagging any bobcat. It is unlawful for a licensed fur dealer to refuse to tag a bobcat unless the licensed fur dealer has cause to believe the bobcat was taken in another state or jurisdiction, or the bobcat was unlawfully taken in New Mexico. Licensed fur dealers who believe a bobcat has been taken illegally, or has been presented for pelt tagging in New Mexico when it was taken in another state or jurisdiction, shall report the event to their local conservation officer immediately.

(6) It is unlawful for licensed fur dealers to tag any bobcat contrary to this rule, purchase any bobcat pelt which has not been tagged, or is not immediately pelt tagged at the time of purchase.

R. Tampering with traps: It is unlawful to destroy, damage, disturb, steal or remove any trap, snare or trapped wildlife without permission of the owner of the trap or snare. Nothing in this subsection shall prohibit a person from releasing any domestic animal from a trap or snare.

S. Exemptions: The provisions of this section shall not apply to personnel of the department of game and fish or designated agents who are acting in their official capacity in the control of depredating animals, for law enforcement purposes, to protect human health and safety, or for research or management purposes.

[19.31.10.15 NMAC - Rp, 19.31.10.15 NMAC, 4/1/2023]

19.31.10.16 LANDS AND WATERS OWNED, ADMINISTERED, CONTROLLED, OR MANAGED BY THE STATE GAME COMMISSION:

A. Posting of signs: The state game commission may prohibit, modify, condition or otherwise control the use of areas under its control by posting of signs as may be required in any particular area.

B. Violating provisions of posted signs: It is unlawful to violate the provisions of posted signs on areas under the control of, leased by or managed by the state game commission.

C. Trespass on state game commission owned lands: It is unlawful to enter upon state game commission owned lands unless licensed or as otherwise allowed by state game commission rule or as posted by the department.

[19.31.10.16 NMAC - Rp, 19.31.10.16 NMAC, 4/1/2023]

19.31.10.17 BOATS, OTHER FLOATING DEVICES, AND MOTORS:

It is unlawful to operate, control or ride in any boat or other floating device contrary to sections A-D below.

A. Electric or gas motors allowed: On the following lakes controlled by the department, boats and other floating devices with electric or gas motors shall be permitted only during the season and hours when fishing is permitted. Boats or floating devices on these lakes shall not be operated at greater than normal trolling speed: Clayton lake WMA, and McAllister lake WMA.

B. Electric motors only: On the following lakes controlled by the department, only boats and other floating devices using electric motors or with gas motors that are not in use shall be permitted: Bear canyon lake WMA, Bill Evans lake WMA, Green Meadow, Fenton lake WMA, Hopewell, Lake Roberts WMA, Morphy, Quemado, Snow, Conoco lakes and Tucumcari lake WMA.

C. No motors allowed: On the following lakes controlled by the department, only boats and other floating devices using no motors shall be permitted: Bernardo WMA, La Joya WMA, Jackson lake WMA, McGaffey, San Gregorio, Shuree ponds and Wagon Mound WMA.

D. No boats or floating devices allowed: On the following lakes controlled by the department, no boats or other floating devices shall be permitted: Bonito lake, Monastery lake, and Red River hatchery pond.

E. Department personnel or persons authorized by the director may use gasoline powered motors on all waters in the state while performing official duties.

[19.31.10.17 NMAC - Rp, 19.31.10.17 NMAC, 4/1/2023]

19.31.10.18 HUNTING ON PRIVATE LAND WITHOUT WRITTEN PERMISSION AND SEIZURE OF GAME ANIMALS, FURBEARERS, GAME BIRDS, OR SHED ANTLERS:

A. It is unlawful to knowingly enter upon any private property to take or attempt to take any game animal, furbearer, game bird or game fish without possessing written permission from the landowner or person in control of the land or trespass rights unless otherwise permitted in rule or statute.

B. Any game animal, furbearer or game bird taken in violation of this section or Section 30-14-1 NMSA 1978 is unlawfully taken and shall be subject to seizure.

C. All shed antlers collected in violation of any New Mexico state game commission, state or federal land closure, in violation of Section 30-14-1 NMSA 1978 or in violation of any of the provisions of Chapter 17 NMSA 1978 or state game commission rule remain property of the State of New Mexico and shall be seized.

D. Exception: Written permission is not required on any property which is participating in a unitization, receives compensation for allowing public access, receives unit-wide authorizations or has agreed to a ranch-wide agreement when species being harvested is part of any of these agreements.

[19.31.10.18 NMAC - Rp, 19.31.10.18 NMAC, 4/1/2023]

19.31.10.19 MANNER AND METHOD PENALTY ASSESSMENTS:

Individuals who commit the following violations shall be offered penalty assessments:

A. No habitat management and access validation stamp (HMAV), contrary to Section 17-4-34 NMSA 1978;

B. No habitat stamp (Sikes Act), contrary to 19.31.10 NMAC;

C. Size limit violations on fish, contrary to 19.31.10 NMAC;

D. Trotline violations, contrary to 19.31.10 NMAC;

E. Use of bait or prohibited lure or fly in a special trout water or noodling, contrary to 19.31.10 NMAC;

F. Disturbing the bottom "shuffling" in a special trout water, contrary to 19.31.10 NMAC;

G. Use of bait fish, contrary to 19.31.10 NMAC;

H. Release of bait fish, contrary to Section 17-3-28 NMSA 1978;

I. More than two lines or two lines without stamp, contrary to 19.31.10 NMAC;

J. Exceeding the daily bag limit or the possession limit of fish by two fish or less, contrary to 19.31.10 NMAC;

K. Snagging or keeping snagged game fish, contrary to 19.31.10 NMAC;

L. Spearfishing and bow fishing violations, contrary to 19.31.10 NMAC;

M. Unlawfully fishing in waters with age or individuals with disabilities use restrictions, contrary to 19.31.10 NMAC;

- N.** Boat or other floating device violation, contrary to 19.31.10 NMAC;
- O.** Use of live protected species as a decoy, contrary to 19.31.10 NMAC;
- P.** Use of an electronic calling device, contrary to 19.31.10 NMAC;
- Q.** Use of unapproved shot or shotgun capable of holding more than three shells while hunting migratory game birds, contrary to 19.31.10 NMAC;
- R.** Unlawful ammunition/ bullet/ shot or unlawful caliber, contrary to 19.31.10 NMAC;
- S.** Hunting hours violations, contrary to 19.31.10 NMAC;
- T.** Possession of game animal parts found in field, contrary to 19.31.10 NMAC;
- U.** Shooting at artificial wildlife from the road, contrary to 19.31.10 NMAC;
- V.** Harassing protected species, contrary to 19.31.10 NMAC;
- W.** Driving off road or on a closed road, contrary to 19.31.10 NMAC;
- X.** Violation of posted signs, contrary to 19.31.10 NMAC;
- Y.** Unlawful use of dogs, contrary to 19.31.10 NMAC;
- Z.** Unlawful use of cellular, Wi-Fi or satellite camera, contrary to 19.31.10 NMAC;
- AA.** Angling with more than two flies in the San Juan, contrary to 19.31.10 NMAC: or
- BB.** Any violation of section 15 of 19.31.10 NMAC.

[19.31.10.19 NMAC - Rp, 19.31.10.19 NMAC, 4/1/2023]

19.31.10.20 SEIZURE:

Any officer authorized to enforce Chapter 17 NMSA 1978 and state game commission rules shall seize unlawfully possessed or imported species, or any protected species or the carcass or parts of any protected species that is taken or possessed contrary to Chapter 17 NMSA 1978 or state game commission rule.

[19.31.10.20 NMAC - Rp, 19.31.10.20 NMAC, 4/1/2023]

19.31.10.21 DIRECTOR'S AUTHORITY TO ACCOMMODATE DISABILITY OR MEDICAL IMPAIRMENT:

The director may authorize reasonable modifications to the manner and method of take for any licensee who has a verifiable medical condition that, in the director's sole discretion, necessitates such accommodation. This includes allowing the use of a scope of not greater than 1X magnification on muzzle-loading firearms by a person with a visual disability which substantially limits a major life activity and cannot be corrected by glasses or contact lenses. In order to apply for such accommodation, the licensee shall complete and submit any form, information and records required by the director. Any licensee granted an accommodation must adhere to all other state game commission rules as to manner and method of take that are not specifically waived by such accommodation; and shall adhere to any restrictions imposed by the director and shall carry a copy of any director granted accommodations on their person while hunting, fishing or trapping.

[19.31.11.1 NMAC - Rp, 19.31.11.1 NMAC, 4/1/2024]

19.31.11.2 SCOPE:

Sportspersons interested in bear and cougar management and hunting. Additional requirements may be found in Chapter 17 NMSA 1978 and Title 19 NMAC.

[19.31.11.2 NMAC - Rp, 19.31.11.2 NMAC, 4/1/2024]

19.31.11.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected mammals, birds and fish.

[19.31.11.3 NMAC - Rp, 19.31.11.3 NMAC, 4/1/2024]

19.31.11.4 DURATION:

April 1, 2024 through March 31, 2028.

[19.31.11.4 NMAC - Rp, 19.31.11.4 NMAC, 4/1/2024]

19.31.11.5 EFFECTIVE DATE:

April 1, 2024, unless a later date is cited at the end of a section.

[19.31.11.5 NMAC - Rp, 19.31.11.5 NMAC, 4/1/2024]

19.31.11.6 OBJECTIVE:

Establishing open hunting seasons and regulations, rules and procedures governing the distribution and issuance of bear and cougar licenses and permits by the department.

[19.31.11.6 NMAC - Rp, 19.31.11.6 NMAC, 4/1/2024]

19.31.11.7 DEFINITIONS:

A. "Bear entry permit" shall mean a permit awarded through a public drawing which entitles the holder of an over-the-counter bear license to hunt in a limited entry area during season dates established in rule.

B. "Bear zones" shall mean hunt areas consisting of one or more game management units as described in 19.30.4 NMAC.

C. "Cougar zones" shall mean hunt areas consisting of one or more game management units as described in 19.30.4 NMAC.

D. "Department" shall mean the New Mexico department of game and fish.

E. "Director" shall mean the director of the New Mexico department of game and fish.

F. "Game management unit" or "GMU" shall mean those areas as described in 19.30.4 NMAC.

G. "Wildlife management areas" or "WMAs" shall mean those areas as described in 19.34.5 NMAC.

[19.31.11.7 NMAC - Rp, 19.31.11.7 NMAC, 4/1/2024]

19.31.11.8 ADJUSTMENT OF LICENSES, PERMITS AND HARVEST LIMITS:

A. The director, with verbal concurrence of the chairperson or their designee, may adjust the number of licenses, permits or harvest limits, up or down by no more than twenty percent within a bear zone or cougar zone, to address critical department management needs, significant changes in population levels or habitat availability. This adjustment may be applied within the specified zones to any or all of: the specific hunt codes; total harvest limits; or female harvest sub-limits.

B. The director, with verbal concurrence of the chairperson or their designee, may take management actions independent of seasons and restrictions, harvest limits or female sub-limits for population management, or to address critical situations including ungulate population protection, depredation, human health and safety or other wildlife management issues. The decision to take management actions pursuant to this subsection shall be reported to the commission.

[19.31.11.8 NMAC - Rp, 19.31.11.8 NMAC, 4/1/2024]

19.31.11.9 [RESERVED]

[19.31.11.9 NMAC - Repealed, 4/1/2024]

19.31.11.10 BEAR AND COUGAR ZONE CLOSURES, BAG LIMITS AND RESTRICTIONS:

A. Zone closures: Bear and cougar may be hunted or taken only in zones designated as open on the department hotline or website. Zones will close within 72 hours of when the reported number of bears or cougars harvested is within ten percent of the total limit or female sub-limit for that zone, whichever occurs first.

B. Bag limit: The bag limit for bear is one; the bag limit for cougar is two. It is unlawful to kill a bear sow with cub(s) or any bear cub less than one year old, or to kill a spotted cougar kitten or any female cougar accompanied by spotted kitten(s).

C. Limited entry hunt areas: It shall be unlawful to hunt bear or cougar in designated WMAs or other specifically designated special entry hunt areas with the following exceptions:

(1) Legally licensed bear hunters possessing a valid bear entry hunt permit may hunt bears in the area(s) specified on the permit, or as otherwise allowed by rule. Bear entry hunters shall be allowed to hunt in any other open bear zone provided they have a valid bear license.

(2) Legally licensed deer and elk hunters whose license is valid on a WMA or the Valle Vidal and are in possession of a valid over-the-counter bear or cougar license, may hunt bear or cougar in the WMA or the Valle Vidal as specified on their deer or elk license. Deer or elk hunters choosing to hunt bear or cougar under this provision may not use dogs, may hunt only in open bear or cougar zones, and must adhere to the weapon type restriction and season dates as specified by their deer or elk licenses.

D. Cougar hunting requirements and restrictions:

(1) All persons shall complete the mandatory cougar identification course offered on the department's website prior to purchasing a cougar license.

(2) Cougar hunting is closed in the Florida mountains hunt area during any open Persian ibex season, except by legally licensed Persian ibex hunters in possession of a valid cougar license. Persian ibex hunters may hunt cougar only if the cougar zone is open, and must adhere to the weapon type restrictions and season dates as specified by their Persian ibex license.

[19.31.11.10 NMAC - Rp, 19.31.11.10 NMAC, 4/1/2024]

19.31.11.11 BEAR HUNTING SEASONS:

A. Over-the-counter bear hunts for the 2024-25 through 2027-28 seasons: The following table lists bear zones, open GMUs, sporting arm restrictions, season dates, total harvest limits and female harvest sub-limits.

Bear zone	open GMUs	bow only	any big game sporting arms	2024-25 total limit (female)	2025-26 total limit (female)	2026-27 total limit (female)	2027-28 total limit (female)

[19.31.11.12 NMAC - Rp, 19.31.11.12 NMAC, 4/1/2024]

PART 12: BARBARY SHEEP, ORYX, AND PERSIAN IBEX

19.31.12.1 ISSUING AGENCY:

New Mexico department of game and fish.

[19.31.12.1 NMAC - Rp, 19.31.12.1 NMAC, 4/1/2023]

19.31.12.2 SCOPE:

Sportspersons interested in Barbary sheep, oryx and Persian ibex management and hunting. Additional requirements may be found in Chapter 17 NMSA 1978, and Title 19 NMAC.

[19.31.12.2 NMAC - Rp, 19.31.12.2 NMAC, 4/1/2023]

19.31.12.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected mammals, birds and fish.

[19.31.12.3 NMAC - Rp, 19.31.12.3 NMAC, 4/1/2023]

19.31.12.4 DURATION:

April 1, 2023 through March 31, 2027.

[19.31.12.4 NMAC - Rp, 19.31.12.4 NMAC, 4/1/2023]

19.31.12.5 EFFECTIVE DATE:

April 1, 2023, unless a later date is cited at the end of an individual section.

[19.31.12.5 NMAC - Rp, 19.31.12.5 NMAC, 4/1/2023]

19.31.12.6 OBJECTIVE:

Establishing open hunting seasons and regulations, rules and procedures governing the distribution and issuance of Barbary sheep, oryx and Persian ibex licenses by the department.

[19.31.12.6 NMAC - Rp, 19.31.12.6 NMAC, 4/1/2023]

19.31.12.7 DEFINITIONS:

A. "Broken-horned oryx" or "BHO" shall mean an oryx of either sex that possesses at least one horn missing at least twenty-five percent of its normal growth. This may be determined by comparing the broken horn's length to the remaining horn or where it is readily apparent the terminal end would not taper to a point for another twenty-five percent of growth.

B. "Department" shall mean the New Mexico department of game and fish.

C. "Director" shall mean the director of the New Mexico department of game and fish.

D. "Either sex" or "ES" shall mean any one animal of the species.

E. "Female or immature Barbary sheep" or "F-IM" shall mean any female Barbary sheep, or a male Barbary sheep with horns less than 18 inches long.

F. "Female or immature Persian ibex" or "F-IM" shall mean any female Persian ibex, or a male Persian ibex with horns less than 20 inches long.

G. "Game management units" or "GMUs" shall mean those areas as described in state game commission rule 19.30.4 NMAC, Boundary Descriptions for Game Management Units.

H. "McGregor Range" shall mean all areas within GMU 28.

I. "Off-range" shall mean those areas outside of White Sands Missile Range, Holloman Air Force Base, Fort Bliss/McGregor Range areas in GMUs 19, 28, and other lands closed to hunting.

J. "Veteran" shall refer to New Mexico resident veteran as described in 19.31.3 NMAC.

K. "White Sands missile range" or "WSMR" shall mean that portion of GMU 19 controlled by the department of defense.

L. "Wildlife management areas" or "WMAs" shall mean those areas as described in state game commission rule 19.34.5 NMAC Wildlife Management Areas.

[19.31.12.7 NMAC - Rp, 19.31.12.7 NMAC, 4/1/2023]

19.31.12.8 ADJUSTMENT OF LICENSES:

The director, with the verbal concurrence of the chairperson of the New Mexico state game commission or their designee, may adjust the number of licenses for oryx, Barbary sheep or Persian ibex up or down to address significant changes in population levels or to address critical department management needs. The director may change or cancel all hunts on military lands to accommodate closures on those lands; if changed, the season length and bag limit shall remain the same as assigned on the original hunt code.

[19.31.12.8 NMAC - Rp, 19.31.12.8 NMAC, 4/1/2023]

19.31.12.9 BARBARY SHEEP, ORYX, AND PERSIAN IBEX LICENSE APPLICATION REQUIREMENTS AND RESTRICTIONS:

A. Veteran hunts: It shall be unlawful for anyone who is not qualified for the veteran oryx hunt to apply for or hold a veteran oryx license.

B. Persian ibex once-in-a-lifetime: It shall be unlawful for anyone to apply for a once-in-a-lifetime Persian ibex license if he or she has held a once-in-a-lifetime license to hunt Persian ibex. Persian ibex hunts for population management, incentive hunts, once-in-a-youth, muzzle-loading rifles, bows, year-round off-mountain hunts, and hunts for female or immature Persian ibex are not considered once-in-a-lifetime and anyone may apply for these hunts or hold these licenses even if they have held a once-in-a-lifetime Persian ibex license.

C. Persian ibex once-in-a-youth: It shall be unlawful for any youth (under age 18) to apply for a once-in-a-youth Persian ibex license if he or she has ever held a Persian ibex youth license.

D. Oryx once-in-a-lifetime: It shall be unlawful, beginning April 1, 1993, for anyone to apply for a once-in-a-lifetime oryx license if he or she has held a once-in-a-lifetime license to hunt oryx. Oryx hunts for population management, broken-horned, once-in-a-youth and incentive hunts are not considered once-in-a-lifetime and anyone may apply for these hunts or hold these licenses even if they have held a once-in-a-lifetime license.

E. Oryx once-in-a-youth: It shall be unlawful for any youth (under age 18) to apply for a once-in-a-youth GMU 19 WSMR ES oryx license if he or she has held a once-in-a-youth license.

[19.31.12.9 NMAC - Rp, 19.31.12.9 NMAC, 4/1/2023]

19.31.12.10 POPULATION MANAGEMENT HUNTS:

A. The director or their designee may authorize population management hunts for oryx, Barbary sheep or Persian ibex when justified in writing by department personnel.

B. The director or their designee shall designate the sporting arms, season dates, season lengths, bag limits, hunt boundaries, specific requirements or restrictions, and number of licenses to be issued.

C. In those instances where a population management hunt is warranted on deeded private lands, the landowner may suggest eligible hunters of their choice by submitting a list of prospective hunters' names to the department for licensing consideration. No more than one-half of the total number of licenses authorized shall be available to landowner identified hunters. The balance of prospective hunters shall be identified by the department.

[19.31.12.10 NMAC - Rp, 19.31.12.11 NMAC, 4/1/2023]

19.31.12.11 BARBARY SHEEP HUNTING SEASONS:

Barbary sheep hunts shall be as indicated below, listing the open GMUs or areas, eligibility requirements or restrictions, hunt dates, hunt codes, sporting arms, number of licenses, and bag limit. Public draw Barbary sheep licenses for GMUs 29, 30, 32, 36, and 37 are available only through application in the special entry draw. Private land-only licenses for GMUs 29, 30, 32, 36, and 37 shall be issued over-the-counter and shall be valid only on deeded private lands. All Barbary sheep licenses listed in Subsections A and B of Section 19.31.12.11 NMAC (with the exception of hunts on McGregor range when the license holder claimed residency as allowed by 17-3-4.A.5 NMSA 1978) shall also be valid for over-the-counter hunt areas with any legal sporting arm. The department shall issue military-only Barbary sheep hunting licenses for McGregor range to full time military personnel providing a valid access authorization issued by Fort Bliss.

B. Private land-only hunts: Private land-only Barbary sheep licenses shall be restricted to the hunt dates, eligibility requirements or restrictions, sporting arms type, and bag limit that corresponds to the draw hunt code listed in Subsection A of Section 19.31.12.11 NMAC for the GMU where the private landowner's property lies. Private land-only Barbary sheep licenses shall be unlimited and available from any license vendor and the department's web site. Private land-only Barbary sheep licenses are valid only on deeded private property where the licensee has written permission to hunt.

C. Over-the-counter hunts: The hunt area shall be statewide except on WMAs during closures, WSMR, Fort Bliss portions of GMU 19 and the draw areas of GMUs 28, 29, 30, 32, 36 and 37.

open GMUs or areas	2023-2024 hunt dates	2024-2025 hunt dates	2025-2026 hunt dates	2026-2027 hunt dates	hunt code	licenses	bag limit

D. Private land-only oryx hunts: Private land-only oryx licenses shall be valid only on deeded private land and restricted to the season dates, eligibility requirements or restrictions, sporting arms type, and bag limit that corresponds to the statewide public draw hunt codes listed in Subsection C of Section 19.31.12.12 NMAC above. Hunts on private land for April and May are restricted to the season dates, eligibility requirements or restrictions, sporting arms type, and bag limit that corresponds to the hunt codes listed below. The number of private land-only oryx licenses shall be unlimited.

E. Oryx incentive authorizations: The director may annually allow up to two oryx authorizations to be issued by drawing for deer and elk hunters submitting their legally harvested animal for CWD testing. Authorizations to purchase the license may be used either by the applicant or any individual of the selected applicant's choice and may be transferred through sale, barter, or gift. Oryx incentive hunts shall be any one hunt selected from Subsection A of Section 19.31.12.12 NMAC. Bag limit shall be either sex with any legal sporting arms and hunt area of the selected hunt.

F. Oryx hunt for injured service men and women: The department shall annually issue up to 10 authorizations for hunting by injured service men and women on White Sands missile range. The director shall determine the procedures for issuing the authorizations, and the dates for each hunt.

19.31.12.13 PERSIAN IBEX HUNTING SEASONS:

Persian ibex hunts shall be as indicated below, listing the open GMUs or areas, eligibility requirements or restrictions, hunt dates, hunt codes, number of licenses and bag limit. Holders of the off-mountain license (IBX-1-528) may apply for any Florida mountains ibex hunt unless otherwise restricted by rule. Any valid Persian ibex license shall be valid during the off-mountain (IBX-1-528) hunts. Holders of a valid ibex license may take an unlimited number of ibex for the year-long off-mountain hunt. The Florida mountain hunt area is that portion of GMU 25 bounded by interstate 10 on the north, U.S.-Mexico border on the south, NM 11 on the west and the Dona Ana-Luna county line on the east. The year-long off-mountain hunt area is any public land open for hunting and private lands with written permission outside the Florida mountain hunt area.

PART 13: DEER

19.31.13.1 ISSUING AGENCY:

New Mexico department of game and fish.

[19.31.13.1 NMAC - Rp, 19.31.13.1 NMAC, 4/1/2023]

19.31.13.2 SCOPE:

Sportspersons interested in deer management and deer hunting. Additional requirements may be found in Chapter 17 NMSA 1978, and Chapters 30, 31, 32 and 33 of Title 19 NMAC.

[19.31.13.2 NMAC - Rp, 19.31.13.2 NMAC, 4/1/2023]

19.31.13.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected mammals, birds and fish.

[19.31.13.3 NMAC - Rp, 19.31.13.3 NMAC, 4/1/2023]

19.31.13.4 DURATION:

April 1, 2023 through March 31, 2027.

[19.31.13.4 NMAC - Rp, 19.31.13.4 NMAC, 4/1/2023]

19.31.13.5 EFFECTIVE DATE:

April 1, 2023, unless a later date is cited at the end of an individual section.

[19.31.13.5 NMAC - Rp, 19.31.13.5 NMAC, 4/1/2023]

19.31.13.6 OBJECTIVE:

Establishing open hunting seasons and regulations, rules and procedures governing the distribution and issuance of deer licenses by the department.

[19.31.13.6 NMAC - Rp, 19.31.13.6 NMAC, 4/1/2023]

19.31.13.7 DEFINITIONS:

A. "Antlerless deer" or "A" shall mean a deer without antlers.

B. "Deer" as used herein, shall mean any wild cervid of the genus *Odocoileus*.

C. "Deer enhancement program" as used herein, shall mean the department activity that allows the issuance of not more than two authorizations for the taking of one fork-antlered deer per license, with the purpose of raising funds for programs and projects to benefit deer.

D. "Department" shall mean the New Mexico department of game and fish.

E. "Director" shall mean the director of the New Mexico department of game and fish.

F. "Either sex" or "ES" shall mean any one deer.

G. "Either sex white-tailed deer" or "ESWTD" shall mean any one white-tailed deer (*Odocoileus virginianus*).

H. "Fork-antlered deer" or "FAD" shall mean a deer possessing antlers, one of which shall have a definite fork showing two or more distinct points. A burr at the base does not constitute a point or fork.

I. "Fork-antlered mule deer" or "FAMD" shall mean a mule deer (*Odocoileus hemionus*) possessing antlers, one of which shall have a definite fork showing two or more distinct points. A burr at the base does not constitute a point or fork.

J. "Fork-antlered white-tailed deer" or "FAWTD" shall mean a white-tailed deer (*Odocoileus virginianus*) possessing antlers, one of which shall have a definite fork showing two or more distinct points. A burr at the base does not constitute a point or fork.

K. "Game management unit", "GMU", "hunt area" or "management area" shall mean those areas as described in 19.30.4 NMAC Boundary Descriptions for Game Management Units.

L. "High demand hunt" shall mean a special draw hunt where the total number of non-resident applicants for a deer hunt exceeds twenty-two percent of the total applicants based on data for the two immediately preceding years.

M. "Quality hunt" shall mean a hunt designed to provide a hunter with an opportunity to achieve one or more of the following: an enhanced experience based on timing and length of hunt season; lower hunter density; or an increased opportunity for success.

N. "Wildlife management areas" or "WMAs" shall mean those areas as described in 19.34.5 NMAC Wildlife Management Areas.

[19.31.13.7 NMAC - Rp, 19.31.13.7 NMAC, 4/1/2023]

19.31.13.8 ADJUSTMENT OF LICENSES:

The director, with the verbal concurrence of the chairperson of the New Mexico state game commission or their designee, may adjust the number of licenses for deer up or down by no more than twenty percent of the total licenses available in the GMU to address significant changes in population levels or to address critical department management needs. This adjustment may be applied to any or all of the specific hunt codes for deer. The director may change or cancel all hunts on military lands to accommodate closures on those lands; if changed, the season length and bag limit shall remain the same as assigned on the original hunt code.

[19.31.13.8 NMAC - Rp, 19.31.13.8 NMAC, 4/1/2023]

19.31.13.9 GMUs 2A, 2B, 2C, 4 AND 5A PRIVATE LAND-ONLY HUNTS:

A. Persons applying for private-land only deer licenses in GMUs 2A, 2B, 2C, 4 and 5A must obtain an authorization number from participating landowners in these GMUs.

B. Participating landowners in GMUs 2A, 2B, 2C, 4 and 5A are required to provide proof of land ownership to obtain authorization numbers from the department.

[19.31.13.9 NMAC - Rp, 19.31.13.9 NMAC, 4/1/2023]

19.31.13.10 CHRONIC WASTING DISEASE (CWD):

The director has the authority to designate possession criteria to any deer hunter where CWD is a concern. It is unlawful to transport dead deer, or their parts, taken from any GMU or area identified by the director in which the presence of, or possibility of,

exposure to CWD has been identified to any location outside that GMU except for the following:

- A.** meat that is cut and wrapped (either commercially or privately);
- B.** quarters or other portions of meat with no part of the spinal column or head attached;
- C.** meat that has been boned out;
- D.** hides with no heads attached;
- E.** clean skull plates with antlers attached; clean is defined as having been immersed in a bath of at least one part chlorine bleach and two parts water with no meat or tissue attached;
- F.** antlers with no meat or tissue attached;
- G.** finished taxidermied heads; or
- H.** by prior arrangement to a department office.

[19.31.13.10 NMAC - Rp, 19.31.13.10 NMAC, 4/1/2023]

19.31.13.11 QUALITY DEER HUNTS:

Quality hunts for deer are as follows:

- A.** Hunt codes DER-1-115, DER-1-116, DER-2-121, DER-2-122, DER-2-123, DER-2-420.
- B.** All hunts in GMUs 2C, 5B, 8, 17, 23-Burro mountains hunt area, 27, 33, 41, the Valle Vidal, all private land deer incentive program hunts and all hunts on the Humphries/Rio Chama/Sargent WMAs.

[19.31.13.11 NMAC - Rp, 19.31.13.11 NMAC, 4/1/2023]

19.31.13.12 SPECIAL DEER HUNTING OPPORTUNITIES:

A. Deer enhancement program:

(1) Program description: The director shall collect all proceeds generated through the auction and lottery of special deer authorizations, and such monies shall be deposited in the game protection fund. These monies shall be made available for expenditure by the department solely for programs and projects to benefit deer and for direct costs incurred in carrying out these programs. These monies shall be used to

augment, and not replace, monies appropriated from existing funds available to the department for the conservation, restoration, utilization and management of deer.

(2) Requirements for issuance of special deer authorizations:

(a) The state game commission shall authorize the director to issue not more than two special deer authorizations in any one license year to take one fork-antlered deer per license. The director shall allow the sale of one authorization through auction to the highest bidder and one authorization to a person selected through a random drawing of a lottery ticket by the department or an incorporated, nonprofit organization dedicated to the conservation of deer.

(b) Unless their hunting privileges have been revoked pursuant to law, any person is eligible to submit a bid for the special deer auction authorization or purchase lottery tickets in an attempt to be selected for the special deer lottery authorization.

(c) The special deer authorizations issued through auction and lottery may be transferred through sale, barter or gift by the successful individuals only to other individuals qualified to hunt.

(3) Enhancement hunts: Deer enhancement licenses shall be valid from September 1 through January 31 for any big-game sporting arms. These licenses shall be valid statewide where hunting is allowed. The bag limit shall be one fork-antlered deer. The authorization to obtain a deer enhancement license may be used either by the applicant or any individual.

B. Deer incentive programs:

(1) CWD reporting incentive: The director may annually allow up to two deer authorizations to be issued through a random drawing for deer and elk hunters submitting their legally harvested animal for CWD testing. Authorizations awarded pursuant to this rule may be transferred through sale, barter or gift. Deer incentive hunts shall be valid only for the dates, big-game sporting arms, bag limit and area specified by the director.

(2) Private-land deer incentive program: Private landowners who are conducting and maintaining substantial habitat improvements or land management practices on their deeded lands that directly and significantly benefit deer may be considered for special recognition. Only those projects as determined by the department to be relevant and beneficial to deer will be considered. Landowners must develop a deer conservation and management plan and submit an application including a map delineating the legal property boundary to the department. Upon completion of approved habitat improvement projects the landowner may be granted authorizations for alternative season dates as approved by the department. Licenses obtained using the authorizations will be valid only on deeded property for the ranch to which they were awarded. Landowners receiving incentive authorizations are required to continue

habitat improvement projects and submit an update as directed by the department to be considered for continued participation.

C. Premium hunt opportunity: One premium deer draw hunt will be issued each license year through the draw. The hunt area will be statewide on any public land open to hunting, including WMAs, and private land with written permission.

[19.31.13.12 NMAC - Rp, 19.31.13.12 NMAC 4/1/2023]

19.31.13.13 POPULATION MANAGEMENT HUNTS:

A. The director or their designee may authorize population management hunts for deer when justified in writing by department personnel.

B. The director or their designee shall designate the big-game sporting arms, season dates, season lengths, bag limits, hunt boundaries, specific requirements or restrictions, and number of licenses to be issued.

C. In the event that an applicant is not able to hunt on the dates specified, the applicant's name shall be moved to the bottom of the list and another applicant may be contacted for the hunt.

D. In those instances where a population management hunt is warranted on deeded private lands, the landowner may suggest eligible hunters of their choice by submitting a list of prospective hunters' names to the department for licensing consideration. No more than one-half of the total number of licenses authorized shall be available to landowner identified hunters. The balance of prospective hunters shall be identified by the department.

[19.31.13.13 NMAC - Rp, 19.31.13.13 NMAC, 4/1/2023]

19.31.13.14 DEER HUNTS:

A. Public draw (and private lands in GMUs 2A, 2B, 2C, 4 and 5A) deer hunts, listing the open GMUs or areas, eligibility requirements or restrictions, hunt dates, hunt codes, big-game sporting arms, number of licenses and bag limit shall be as indicated below. The state game commission owned Double E WMA, Navajo WMA, Pine River WMA, prairie-chicken areas, River Ranch WMA and Water Canyon WMA shall be open to licensed public draw deer hunters during established seasons. Hunters holding a valid

bow deer license for GMUs 23 or 24 who do not harvest a deer during their hunt will be allowed to obtain permission from the department to hunt antlerless deer from January 16 through February 5 within the Silver City deer management area as delineated by the department.

B. Private-land only deer hunts: Private-land only deer licenses shall only be valid on deeded private land and are restricted to the hunt dates, eligibility requirements, big-game sporting arms and bag limit that corresponds to the draw hunt code listed in Subsection A of 19.31.13.14 NMAC for the GMU where the private landowner's property lies. Private-land only deer licenses shall be unlimited and available from any license vendor and the department's web site. Private-land only hunts in GMUs 8, 46, 54 and 55 shall be as indicated below:

[19.31.13.14 NMAC - Rp, 19.31.13.14 NMAC, 4/1/2023]

PART 14: ELK

19.31.14.1 ISSUING AGENCY:

New Mexico department of game and fish.

[19.31.14.1 NMAC - Rp, 19.31.14.1 NMAC, 4/1/2023]

19.31.14.2 SCOPE:

Sportspersons interested in elk management and hunting. Additional requirements may be found in Chapter 17 NMSA 1978, and Chapters 30, 31, 32 and 33 of Title 19 NMAC.

[19.31.14.2 NMAC - Rp, 19.31.14.2 NMAC, 4/1/2023]

19.31.14.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected mammals, birds and fish.

[19.31.14.3 NMAC - Rp, 19.31.14.3 NMAC, 4/1/2023]

19.31.14.4 DURATION:

April 1, 2023 through March 31, 2027.

[19.31.14.4 NMAC - Rp, 19.31.14.4 NMAC, 4/1/2023]

19.31.14.5 EFFECTIVE DATE:

April 1, 2023, unless a later date is cited at the end of a section.

[19.31.14.5 NMAC - Rp, 19.31.14.5 NMAC, 4/1/2023]

19.31.14.6 OBJECTIVE:

Establishing open hunting seasons and regulations, rules and procedures governing the issuance of elk licenses by the department.

[19.31.14.6 NMAC - Rp, 19.31.14.6 NMAC, 4/1/2023]

19.31.14.7 DEFINITIONS:

- A. "Antlerless elk" or "A"** shall mean any one elk without antlers.
- B. "Antler point restricted elk" or "APRE/6"** shall mean any bull elk with a minimum of six antler points on one side. A brow tine or eye guard constitutes a point; a burr at the base does not.
- C. "Department"** shall mean the New Mexico department of game and fish.
- D. "Director"** shall mean the director of the New Mexico department of game and fish.
- E. "Elk"** shall mean any wild cervid of the genus Cervus.
- F. "Elk enhancement program"** shall mean the department activity that allows the issuance of not more than two authorizations for the taking of one bull elk per license, with the purpose of raising funds for programs and projects to benefit elk.
- G. "Elk region"** shall mean a portion of the state designated by the department to administer elk management activities. An elk region describes an assemblage of one or more herd units and encompasses one or more GMUs.
- H. "Either sex" or "ES"** shall mean any one elk.
- I. "Game management unit", "GMU", "hunt area", "Cerro portion" or "management area"** shall mean those areas as described in 19.30.4 NMAC Boundary Descriptions for Game Management Units.
- J. "High-demand hunt"** shall mean a special draw hunt where the total number of non-resident applicants for an elk hunt exceeds twenty-two percent of the total applicants based on data for the two immediately preceding years.
- K. "Mature bull" or "MB"** shall mean a male elk with at least one brow tine extending six or more inches from the main beam or at least one forked antler with both branches six or more inches long.
- L. "Primary management zone"** shall mean designated areas of the state upon which elk management goals and subsequent harvest objectives are based.

M. "Private land authorization" shall mean the document generated by the department and issued to a private landowner that authorizes the holder to purchase a specified license to hunt elk.

N. "Quality hunt" shall mean a hunt designed to provide a hunter with an opportunity to achieve one or more of the following: an enhanced experience based on timing and length of hunt season; lower hunter density; or an increased opportunity for success.

O. "Secondary management zone" shall mean areas of the state that are not part of the primary management zone or special management zone.

P. "Special management zone" shall mean areas of the state not within the primary management zone or secondary management zone and where private land authorization issuance includes eligibility requirements or restrictions.

Q. "Wildlife management area" or "WMA" shall mean those areas as described in 19.34.5 NMAC Wildlife Management Areas.

[19.31.14.7 NMAC - Rp, 19.31.14.7 NMAC, 4/1/2023]

19.31.14.8 ADJUSTMENT OF LICENSES AND AUTHORIZATIONS:

The director, with the verbal concurrence of the chairperson of the New Mexico state game commission or their designee, may adjust the number of licenses or authorizations up or down by no more than twenty percent to address significant changes in population levels or to address critical department management needs. GMU 34 elk licenses and authorizations may be adjusted beyond this amount as necessary to meet management objectives. These adjustments may be applied to any or all authorizations or licenses for elk in a specific GMU or designated area.

[19.31.14.8 NMAC - Rp, 19.31.14.8 NMAC, 4/1/2023]

19.31.14.9 ELK LICENSE APPLICATION REQUIREMENTS AND RESTRICTIONS:

A. Validity of license: In the primary management zones, except GMUs 4 and 5A, private-land ranch-only (as defined in 19.30.5 NMAC) elk licenses shall not be valid on any other private lands. In GMUs 4, 5A, and secondary and special management zones, private-land licenses are valid on any other private lands within the GMU and the same zone designation only if accompanied by written permission; unless otherwise restricted in a department issued agreement.

B. Valle Vidal elk once-in-a-lifetime hunts: No person shall apply for a license to hunt bull elk on the Valle Vidal if he or she has held a license since 1983 allowing them to take a bull elk on the Valle Vidal. Persons that have held a youth-only license may apply for non-youth-only licenses as long as they are eligible. No person shall apply for

a license to hunt antlerless elk on the Valle Vidal if he or she has held a license since 1983 allowing them to take an antlerless elk on the Valle Vidal. Persons that have held a youth-only antlerless license may apply for non-youth-only antlerless licenses as long as they are eligible. Either sex or mature bull/antlerless shall be considered as a "bull elk" license, and shall not be considered as an "antlerless" license for this restriction. Persons who have held a Valle Vidal elk license through any incentive program are exempt from this restriction.

[19.31.14.9 NMAC - Rp, 19.31.14.9 NMAC, 4/1/2023]

19.31.14.10 CHRONIC WASTING DISEASE (CWD):

The director has the authority to designate possession criteria to any elk hunter where CWD is a concern. It is unlawful to transport dead elk, or their parts, taken from any GMU or area identified by the director in which the presence of, or possibility of, exposure to CWD has been identified, to any location outside that GMU, except for the following:

- A.** meat that is cut and wrapped (either commercially or privately);
- B.** quarters or other portions of meat with no part of the spinal column or head attached;
- C.** meat that has been boned out;
- D.** hides with no heads attached;
- E.** clean skull plates with antlers attached; clean is defined as having been immersed in a bath of at least one part chlorine bleach and two parts water with no meat or tissue attached;
- F.** antlers with no meat or tissue attached;
- G.** upper canine teeth, also known as "ivories";
- H.** finished taxidermied heads; or
- I.** by prior arrangement to a department office.

[19.31.14.10 NMAC - Rp, 19.31.14.10 NMAC, 4/1/2023]

19.31.14.11 QUALITY ELK HUNTS:

Quality hunts for elk are as follows:

- A.** all Valle Vidal hunts;

B. the first three mature bull hunts and both bow hunts on the Sargent WMA as follows: ELK-1-165, ELK-1-166, ELK-1-167, ELK-2-163 and ELK-2-164;

C. elk hunts in GMUs 13, 15, 16A, 16B/22, 16C, 16D, 16E and 17 as follows: ELK-2-257, ELK-3-259, ELK-2-265, ELK-3-267, ELK-2-273, ELK-1-274, ELK-1-275, ELK-2-280, ELK-1-281, ELK-1-282, ELK-2-285, ELK-1-287, ELK-2-292, ELK-1-293, ELK-1-294, ELK-2-299, ELK-3-301, ELK-2-306, and ELK-3-308;

D. all GMU 6B hunts that allow the hunter to take a bull;

E. quality hunt fees for licenses listed in Subsection C above shall also apply to the conversion of any mature bull or either-sex private-land authorization (excluding youth-only) for private lands that lie within the primary management zone. This includes any hunt dates from September 15 through October 15.

[19.31.14.11 NMAC - Rp, 19.31.14.11 NMAC, 4/1/2023]

19.31.14.12 SPECIAL ELK HUNTING OPPORTUNITIES:

A. Elk enhancement program:

(1) Program description: The director shall collect all proceeds generated through the auction and lottery of special bull elk authorizations, and such monies shall be deposited in the game protection fund. These monies shall be made available for expenditure by the department solely for programs and projects to benefit elk and for direct costs incurred in carrying out these programs. These monies shall be used to augment, and not replace, monies appropriated from existing funds available to the department for the conservation, restoration, utilization, and management of elk.

(2) Requirements for issuance of special elk authorizations:

(a) The state game commission shall authorize the director to issue not more than two special elk authorizations in any one license year to take one mature bull elk per license. The director shall allow the sale of one authorization through auction to the highest bidder and one authorization to a person selected through a random drawing of a lottery ticket by the department or an incorporated, non-profit organization dedicated to the conservation of elk.

(b) Unless their hunting privileges have been revoked pursuant to law, any person is eligible to submit a bid for the special elk auction authorization or purchase lottery tickets in an attempt to be selected for the special elk lottery authorization.

(c) The special elk authorizations issued through auction and lottery may be transferred, through sale, barter or gift by the successful individuals only to other individuals qualified to hunt.

(d) Special elk licenses granted through auction or lottery, as described above, shall not be considered 'once-in-a-lifetime'.

(3) Enhancement hunts: Elk enhancement licenses shall be valid from September 1 through January 31 for any big-game sporting arms. These licenses shall be valid statewide where hunting is allowed; bag limit shall be one mature bull elk. The elk enhancement authorizations may be used by the recipient or transferred through sale, barter or gift by the successful individuals to other individuals qualified to hunt.

B. Elk incentive programs: The director may annually allow up to two elk authorizations to be issued for deer and elk hunters submitting their legally harvested animal for CWD testing. Authorizations to purchase an incentive license may be used either by the applicant or transferred through sale, barter or gift by the successful individuals to any individual qualified to hunt. Elk incentive hunts shall be valid only for the dates, big-game sporting arms, bag limit and area specified by the director.

C. Encouragement hunts:

(1) Only resident youth hunters as defined by 19.31.3 NMAC who have submitted a valid application for a draw hunt for deer, elk, pronghorn, ibex, oryx, Barbary sheep or bighorn sheep in the current license year and were unsuccessful in drawing any license will be eligible to purchase a license for these hunts for the first 14 days of availability on the department website. Licenses remaining after 14 days shall be available to any youth hunter eligible to purchase an elk license.

(2) The director, with concurrence of the chairperson of the state game commission, may adjust the number of licenses available in all encouragement hunts listed below based on management objectives.

(3) These hunts will be administered by the department through a web sale. The open GMUs, hunt dates, hunt codes, big-game sporting arms, number of licenses and bag limits shall be as indicated below:

19.31.14.13 POPULATION MANAGEMENT HUNTS:

A. The director or their designee may authorize population management hunts for elk when justified in writing by department personnel.

B. The director or their designee shall designate the big-game sporting arms, season dates, season lengths, bag limits, hunt boundaries, specific requirements or restrictions, and number of licenses to be issued.

C. In the event that an applicant is not able to hunt on the dates specified, the applicant's name shall be moved to the bottom of the list and another applicant may be contacted for the hunt.

D. In those instances where a population management hunt is warranted on deeded private lands, the landowner may suggest eligible hunters of their choice by submitting a list of prospective hunters' names to the department for licensing consideration. No more than one-half of the total number of licenses authorized shall be available to landowner identified hunters. The balance of prospective hunters shall be identified by the department.

[19.31.14.13 NMAC - Rp, 19.31.14.13 NMAC, 4/1/2023]

19.31.14.14 ELK HUNTS IN PRIMARY MANAGEMENT ZONES:

This section lists elk management information and subsequent hunting opportunities for GMUs in elk regions where a primary management zone has been established. The listed information includes regional elk population information, management goals, harvest objectives, total number of hunting opportunities, GMUs or areas open for hunting, season dates, hunt codes, bag limits, big-game sporting arms, number of licenses available in the public draw and the number and type of authorizations available for private lands within the primary management zone of each GMU.

A. Elk management goals:

(1) Quality hunt management (QHM):

(a) Elk harvest in regional populations, herd units or GMUs within a region results in the trend of annual bull mortality rates to be below thirty-five percent.

(b) Seasons should be designed to ensure timing and length of hunts are desirable.

(c) At least two-thirds of all hunters are "satisfied" with the experience.

(2) Optimal opportunity management (OOM):

(a) Elk harvest in regional populations, herd units or GMUs within a region results in the trend of annual bull mortality rates to be below forty-five percent and harvest near optimal sustainable yield.

(b) Season structure should be designed to ensure timing and length of hunts provides significant opportunity.

(c) At least one-third of all hunters are "satisfied" with the experience.

B. Northwest region: primary management zones in GMUs 2, 5A, 9 and 10.

(1) Optimal opportunity management within primary management zones in GMUs 2, 5A, 9 and 10.

(2) Foundational resource information for the northwest region is indicated below:

northwest region population information			sustainable harvest pursuant to goals	
herd unit	population estimate (rounded to nearest 100)	bull:cow:calf ratio	bulls	cows
San Juan (GMU 2)	2300-2900	35:100:32	140-200	180-220
Lindrith (GMU 5A)	2200-2500	35:100:32	140-180	170-200
Mt. Taylor (GMU 9)	1000-2100	26:100:28	40-100	0
Zuni (GMU 10)	1500-1800	35:100:32	110-150	140-160

9	OOM	228	0	281	509
10	OOM	206	324	368	898
Total		943	897	996	2836

(3) Public draw elk hunts listing the eligibility requirements or restrictions, GMUs or areas, hunt dates, hunt codes, number of licenses, bag limits and big-game sporting arms shall be as indicated below. The state game commissioned owned Water

Canyon WMA shall be open to licensed public draw elk hunters during established seasons.

B. Private-land only elk hunting: For private lands within secondary management zones, unlimited private-land licenses are available over-the-counter. Bow-only either-sex hunts will be limited to 9/1 – 9/24 each year. Any big-game sporting arms hunts that are antlerless or either-sex will be limited to five consecutive days from 10/1 – 12/31 each year, except as allowed by 19.30.5 NMAC.

[19.31.14.15 NMAC - Rp, 19.31.14.15 NMAC, 4/1/2023]

19.31.14.16 ELK HUNTS IN SPECIAL MANAGEMENT ZONES:

This section includes eligibility requirements or restrictions, GMUs or areas open for hunting, season dates, hunt codes, big-game sporting arms, number of available licenses and bag limits.

A. Public draw elk hunts:

B. Private-land only elk hunting: For private lands that lie within GMUs designated as special management zones (GMUs 54 west of NM 199 and 55A), the department may work with landowners to develop bag limits, big-game sporting arms, season dates and authorization numbers for private-land hunting on participating ranches. Bow-only either-sex hunts will be limited to 9/1 – 9/24 each year. Any big-game sporting arms hunts that are antlerless, mature bull, or either-sex will be limited to five consecutive days from 10/1 – 12/31 each year, except as allowed by 19.30.5 NMAC.

[19.31.14.16 NMAC - Rp, 19.31.14.16 NMAC, 4/1/2023]

PART 15: PRONGHORN ANTELOPE

19.31.15.1 ISSUING AGENCY:

New Mexico department of game and fish.

[19.31.15.1 NMAC - Rp, 19.31.15.1 NMAC, 4/1/2023]

19.31.15.2 SCOPE:

Sportspersons interested in pronghorn antelope hunting and management. Additional requirements may be found in Chapter 17, NMSA 1978, and Chapters 30, 31, 32 and 33 of Title 19 NMAC.

[19.31.15.2 NMAC - Rp, 19.31.15.2 NMAC, 4/1/2023]

19.31.15.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17, NMSA 1978 and all other acts pertaining to protected mammals, birds and fish.

[19.31.15.3 NMAC - Rp, 19.31.15.3 NMAC, 4/1/2023]

19.31.15.4 DURATION:

April 1, 2023 through March 31, 2027.

[19.31.15.4 NMAC - Rp, 19.31.15.4 NMAC, 4/1/2023]

19.31.15.5 EFFECTIVE DATE:

April 1, 2023, unless a later date is cited at the end of a section.

[19.31.15.5 NMAC - Rp, 19.31.15.5 NMAC, 4/1/2023]

19.31.15.6 OBJECTIVE:

Establishing open hunting seasons and regulations, rules, and procedures governing the distribution and issuance of pronghorn licenses by the department.

[19.31.15.6 NMAC - Rp, 19.31.15.6 NMAC, 4/1/2023]

19.31.15.7 DEFINITIONS:

- A. **"Department"** shall mean the New Mexico department of game and fish.
- B. **"Director"** shall mean the director of the New Mexico department of game and fish.
- C. **"Either sex" or "ES"** shall mean any one pronghorn.
- D. **"Female or immature pronghorn" or "F-IM"** shall mean any female pronghorn or any pronghorn with both horns shorter than its ears.
- E. **"Game management unit" or "GMU"** shall mean those areas as described in 19.30.4 NMAC Game Management Units.

F. "Mature buck pronghorn" or "MB" shall mean a pronghorn with at least one horn longer than its ears.

G. "Wildlife management areas" or "WMAs" shall mean those areas as described in 19.34.5 NMAC Wildlife Management Areas.

[19.31.15.7 NMAC - Rp, 19.31.15.7 NMAC, 4/1/2023]

19.31.15.8 ADJUSTMENT OF LICENSES, PERMITS, AUTHORIZATIONS AND HARVEST LIMITS:

The director, with the verbal concurrence of the chairperson of the New Mexico state game commission or their designee, may adjust the number of licenses, or authorizations for pronghorn up or down to address significant changes in population levels or to address critical department management needs. This adjustment may be applied to any or all of the specific hunt codes for pronghorn, and may include a limit to the number of private land-only licenses by hunt code. The director may change or cancel all hunts on military lands to accommodate closures on those lands; if changed, the season length and bag limit shall remain the same as assigned on the original hunt code.

[19.31.15.8 NMAC - Rp, 19.31.15.8 NMAC, 4/1/2023]

19.31.15.9 PRONGHORN POPULATION MANAGEMENT HUNTS:

A. The director or their designee may authorize population management hunts for pronghorn when justified in writing by department personnel.

B. The director or their designee shall designate the sporting arms, season dates, season lengths, bag limits, hunt boundaries, specific requirements or restrictions, and number of licenses or permits to be issued.

C. In the event that an applicant is not able to hunt on the dates specified, the applicant's name shall be moved to the bottom of the list and another applicant may be contacted for the hunt.

D. In those instances where a population management hunt is warranted on deeded private lands, the landowner may suggest eligible hunters of their choice by submitting a list of prospective hunter's names to the department for licensing consideration. No more than one-half of the total number of licenses authorized shall be available to landowner identified hunters. The balance of prospective hunters shall be identified by the department.

[19.31.15.9 NMAC - Rp, 19.31.15.11 NMAC, 4/1/2023]

19.31.15.10 SPECIAL PRONGHORN HUNTING OPPORTUNITIES:

A. Pronghorn conservation recognition program: Private landowners who are conducting and maintaining substantial habitat improvements and/or land management practices on their deeded lands that directly and significantly benefit pronghorn may be considered for special recognition. Only those projects as determined by the department to be relevant and beneficial to pronghorn will be considered. Landowners must submit an application and once approved, develop a pronghorn conservation and management plan in cooperation with the department. Upon approval of the plan the landowner may be granted alternative season dates as approved by the department. Landowners receiving special recognition are required to submit an update as directed by the department to be considered for continued participation. The hunt code for any unique hunt season approved pursuant to this program shall be ANT-1-600.

B. Ranch-wide agreements: Properties consisting of deeded and leased public lands deemed by the department to have pronghorn hunting opportunities may enter into an agreement with the department to create a pronghorn hunting ranch. The boundaries would include both the deeded and leased public lands. The department will negotiate with the landowner the number of private licenses to be issued to landowners with ranch-wide agreements. These private licenses shall have access to the deeded and leased public land within the hunting ranch boundary during the respective pronghorn hunt. The landowner shall allow access to the deeded and leased public land to all legally licensed public draw hunters pursuant to Subsection A of Section 19.31.15.11 NMAC for the respective game management unit. Any ranch entered into such an agreement shall be issued one authorization valid for a free pronghorn license pursuant to 17-3-14 NMSA 1978.

[19.31.15.10 NMAC - N, 4/1/2023]

19.31.15.11 PRONGHORN HUNTS:

Numbers of licenses are evaluated annually based upon population dynamics, weather conditions, sustainable harvest, and department management objectives.

A. Public land pronghorn hunts: Pronghorn draw hunts, listing the open GMUs or areas, eligibility requirements or restrictions, hunt dates, hunt codes, sporting arms type, number of licenses and bag limit shall be as indicated below. Pronghorn draw hunt licenses are valid on all open public lands and any private land the licensee has written permission to hunt within the GMU or area. All WMAs are open to pronghorn hunts in respective GMUs listed in this section unless specifically closed by rule.

B. Private land-only pronghorn hunts: Private land-only pronghorn licenses shall be restricted to the hunt dates, eligibility requirements or restrictions, sporting arms type, and bag limit that corresponds to the draw hunt code listed in Subsection A of Section 19.31.15.11 NMAC for the GMU where the private landowner's property lies. Private land-only pronghorn licenses shall be unlimited, except the any legal sporting arms hunt in GMUs 4, 50 and 52 shall be limited to 15 licenses, or as otherwise provided in 19.31.15.8 NMAC, and available from any license vendor and the department's web site. These licenses are not valid for ranch-wide agreement properties as described in Subsection B of Section 19.31.15.10 NMAC. Private land-only pronghorn licenses are valid only on deeded private property where the licensee has written permission to hunt, and within the GMU or area allowed by hunt code, except ranch-wide agreement properties. Private land-only pronghorn licenses are not restricted to only one ranch or property. In those GMUs where there is no pronghorn draw hunt (GMUs 4, 14, 46, 48, 54, and 55), hunt dates, eligibility requirements or restrictions, sporting arms type, and bag limit will be:

----	-----------	-----------	-----------	-----------	-----------	-----------	----

C. Private land-only F-IM pronghorn hunts: The department will work with interested landowners with sufficient pronghorn populations to authorize F-IM hunts on private deeded land. Sporting arms type, hunt dates, eligibility requirements or restrictions and authorization numbers for private deeded land F-IM hunts will be negotiated to maintain appropriate harvest within the exterior boundaries of participating ranches.

D. Pronghorn hunt for injured service men and women: The department may annually issue up to 15 authorizations for hunting by injured service men and women on Melrose Air Force Range. The director shall determine the procedures for issuing the authorizations, and the dates for each hunt.

PART 16: TURKEY

19.31.16.1 ISSUING AGENCY:

New Mexico department of game and fish.

[19.31.16.1 NMAC - Rp, 19.31.16.1 NMAC, 4/1/2023]

19.31.16.2 SCOPE:

Sportspersons interested in turkey management and hunting. Additional requirements may be found in Chapter 17 NMSA 1978, and Title 19 NMAC.

[19.31.16.2 NMAC - Rp, 19.31.16.2 NMAC, 4/1/2023]

19.31.16.3 STATUTORY AUTHORITY:

Sections 17-1-14, 17-1-26, 17-3-16.4 and 17-3-16.5 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected mammals, birds and fish.

[19.31.16.3 NMAC - Rp, 19.31.16.3 NMAC, 4/1/2023]

19.31.16.4 DURATION:

April 1, 2023 through March 31, 2027.

[19.31.16.4 NMAC - Rp, 19.31.16.4 NMAC, 4/1/2023]

19.31.16.5 EFFECTIVE DATE:

April 1, 2023, unless a later date is cited at the end of a section.

[19.31.16.5 NMAC - Rp, 19.31.16.5 NMAC, 4/1/2023]

19.31.16.6 OBJECTIVE:

Establishing open hunting seasons, rules and procedures governing the distribution and issuance of turkey permits and licenses by the department.

[19.31.16.6 NMAC - Rp, 19.31.16.6 NMAC, 4/1/2023]

19.31.16.7 DEFINITIONS:

A. "Bearded turkey" shall mean a turkey with a visible beard.

B. "Department" shall mean the New Mexico department of game and fish.

C. "Director" shall mean the director of the New Mexico department of game and fish.

D. "Entry permit" shall entitle the holder of a valid turkey license to hunt areas otherwise closed to turkey hunting.

E. "Game management unit" or "GMU" shall mean those areas described 19.30.4 NMAC Boundary Descriptions for Game Management Units.

F. "Wildlife management areas" or "WMAs" shall mean those areas described in 19.34.5 NMAC Wildlife Management Areas.

[19.31.16.7 NMAC - Rp, 19.31.16.7 NMAC, 4/1/2023]

19.31.16.8 ADJUSTMENT OF LICENSES, PERMITS AND AUTHORIZATIONS:

The director, with the verbal concurrence of the chairperson or their designee, may adjust the number of licenses, permits or authorizations for turkey up or down by no more than twenty percent to address significant changes in population levels or habitat availability. This adjustment may be applied to any or all entry hunt codes for turkey.

[19.31.16.8 NMAC - Rp, 19.31.16.8 NMAC, 4/1/2023]

19.31.16.9 TURKEY ONCE-IN-A-LIFETIME-HUNTS:

It shall be unlawful for anyone to apply for or hold a once-in-a-lifetime turkey entry permit if he or she has held a once-in-a-lifetime entry permit to hunt turkey.

[19.31.16.9 NMAC - Rp, 19.31.16.9 NMAC, 4/1/2023]

19.31.16.10 TURKEY HUNTING SEASONS:

The 2023-24 through 2026-27 hunting seasons shall be as indicated below, listing the GMUs or areas open, eligibility requirements or restrictions, hunt dates, hunt codes, legal sporting arms, number of permits and bag limits. All WMAs, except as listed in Subsection A of 19.31.16.10 NMAC, are open to over-the-counter turkey hunting if the GMU where they are located is open to turkey hunting or are restricted to entry permit holders as listed in Subsection B of 19.31.16.10 NMAC.

A. Over-the-counter hunts: All over-the-counter turkey licenses shall be valid for any legal sporting arms, except turkey hunting in the Sandia ranger district portion of GMU 14 and Sugarite canyon state park in GMU 57 are restricted to bow and crossbow only. The number of licenses for these hunts shall be unlimited.

(1) Spring seasons:

Open GMUs or areas	hunt dates	bag limit
Statewide except the following GMUs or areas are closed to over-the-counter turkey hunting: GMU: 2A areas east of US 550 and north of NM 173, 2B areas in the Carson national forest, 2C areas in the Carson national forest, 6B, 8, 19, 25, 26, 27, 28, 30, 31 Bernardo WMA, Jackson lake WMA, La Joya WMA, Marquez/LBar WMA, Prairie Chicken WMAs, Red Rock WMA, Valle Vidal, W.S. Huey WMA	4/15-5/15	2 turkeys with visible beards
Statewide except as listed above, youth only	4/7-9/2023 4/12-14/2024 4/11-13/2025	2 turkeys with visible beards

	4/10-12/2026	
--	--------------	--

(2) Fall seasons:

Open GMUs or areas	hunt dates	bag limit
Statewide except the following GMUs or areas are closed to over the counter turkey hunting:	bow only: 9/1-30	any 1 turkey
GMU: 2A areas east of US 550 and north of NM 173, 2B areas in the Carson national forest, 2C areas in the Carson national forest, 6B, 8, 14, 18, 19, 25, 26, 27, 28, 30, 31, 33, 38, 49, 50, 53 Bernardo WMA, Bill Evans WMA, Edward Sargent WMA, Jackson lake WMA, La Joya WMA, Lake Roberts WMA, Marquez/LBar WMA, Prairie Chicken WMAs, Red Rock WMA, Rio Chama WMA, Sugarite canyon state park, Valle Vidal, W.S. Huey WMA	any legal sporting arms: 11/1-30	

B. Entry permit hunts: All entry permits shall be valid for any legal sporting arms except turkey hunting in the Sandia ranger district portion of GMU 8. An entry permit authorizes the holder to hunt in the area, for the bag limit, and for the season dates listed on the permit. In addition, holders of a turkey entry permit may hunt in any open over-the-counter area during the spring season for a second turkey (if applicable) or if unsuccessful in their entry hunt area. In no circumstance may any turkey hunter take or attempt to take more than two bearded turkeys during the spring season. Holders of an entry hunt permit must also purchase a turkey hunting license prior to hunting.

19.31.16.11 TURKEY POPULATION MANAGEMENT HUNTS:

A. The director or their designee may authorize population management hunts for turkey when justified in writing by department personnel.

B. The director or their designee shall designate the sporting arms, season dates, season lengths, bag limits, hunt boundaries, specific requirements or restrictions and number of licenses to be issued.

C. In the event that an applicant is not able to hunt on the dates specified, the applicant's name shall be moved to the bottom of the list and another applicant may be contacted for the hunt.

D. In those instances where a population management hunt is warranted on deeded private lands, the landowner may suggest eligible hunters of their choice by submitting a list of prospective hunters' names to the department for licensing consideration. No more than one-half of the total number of licenses authorized shall be available to landowner-identified hunters. The balance of prospective hunters shall be identified by the department.

[19.31.16.11 NMAC - Rp, 19.31.16.10 NMAC, 4/1/2023]

19.31.16.12 GOULD'S TURKEY ENHANCEMENT PROGRAM:

A. The director shall collect all proceeds generated through the auction or lottery or both, of not more than two special Gould's turkey enhancement entry permits annually, and such monies shall be deposited into the game protection fund. These monies shall

be available for expenditure by the department to be used exclusively for activities, projects and programs aimed at benefitting Gould's turkeys and Gould's turkey habitat, and for costs incurred in carrying out these programs.

B. Requirements for issuance, sale and use of Gould's turkey enhancement permits:

(1) Issuance: The director may issue up to two Gould's turkey enhancement entry permits annually.

(2) Sale: The auction or lottery or both shall be conducted by an incorporated non-profit organization dedicated to the conservation of wildlife, in cooperation with and overseen by the department.

(3) Use:

(a) The successful recipient(s) shall be allotted an authorization for a Gould's turkey enhancement entry permit, which may be transferred through sale, barter, donation or gift to other individuals qualified to obtain a license and hunt. Once an authorization is converted to a permit, the permit will be non-transferable.

(b) Individuals hunting pursuant to a Gould's turkey enhancement entry permit must obtain and have in their possession a valid turkey hunting license and any other stamps, tags or permits required by rule.

(c) Unless their hunting privileges have been revoked pursuant to law, any person is eligible to bid on and purchase a Gould's turkey enhancement entry permit.

(d) Individuals holding a Gould's turkey enhancement entry permit shall not be prohibited from hunting other subspecies of turkeys in New Mexico as allowed in 19.31.16 NMAC.

(e) The entry permit shall be valid for any legal sporting arms, and the bag limit shall be one bearded Gould's turkey.

(f) The season dates for each entry permit shall be no more than 30 consecutive days between April 1 and May 31 as specified by the entry permit each license year.

(g) The harvest of one bearded Gould's turkey shall count against the license holder's spring turkey bag limit.

(h) The hunt area for each entry permit shall be any legally accessible public lands in GMUs 26 and 27 where hunting is allowed, and private land with written permission.

(i) Gould's turkey enhancement entry permits granted through auction or lottery, as described above, shall not be considered 'once-in-a-lifetime' permits.

April 1, 2025 through March 31, 2027.

[19.31.17.4 NMAC - Rp, 19.31.17.4 NMAC, 4/1/2025]

19.31.17.5 EFFECTIVE DATE:

April 1, 2025 unless a later date is cited at the end of a section.

[19.31.17.5 NMAC - Rp, 19.31.17.5 NMAC, 4/1/2025]

19.31.17.6 OBJECTIVE:

Establishing open hunting seasons and regulations, rules, and procedures governing the distribution and issuance of bighorn sheep licenses by the department.

[19.31.17.6 NMAC - Rp, 19.31.17.6 NMAC, 4/1/2025]

19.31.17.7 DEFINITIONS:

- A. **"Department"** shall mean the New Mexico department of game and fish.
- B. **"Director"** shall mean the director of the New Mexico department of game and fish.
- C. **"Either sex"** or **"ES"** shall mean any one animal of the species.
- D. **"Ewe"** shall mean any female bighorn sheep.
- E. **"Game management unit"** or **"GMU"** shall mean those areas as described in 19.30.4 NMAC Boundary Descriptions for Game Management Units.
- F. **"Ram"** shall mean any male bighorn sheep.
- G. **"Wildlife management areas"** or **"WMAs"** shall mean those areas as described in 19.34.5 NMAC Wildlife Management Areas.

[19.31.17.7 NMAC - Rp, 19.31.17.7 NMAC, 4/1/2025]

19.31.17.8 ADJUSTMENT OF LICENSES:

The director, with the verbal concurrence of the New Mexico state game commission chairperson or their designee, may adjust the number of bighorn licenses to address significant changes in population levels or to address critical department management needs. The director may change or cancel any or all hunts on military lands to accommodate closures on those lands; if changed, the season length and bag limit shall remain the same as assigned on the original hunt code.

[19.31.17.8 NMAC - Rp, 19.31.17.8 NMAC, 4/1/2025]

19.31.17.9 BIGHORN SHEEP LICENSE APPLICATION REQUIREMENTS AND RESTRICTIONS:

A. **Rocky mountain bighorn sheep ram once-in-a-lifetime hunts:** It shall be unlawful for anyone to apply for a Rocky mountain bighorn sheep ram license if one has previously held a license to hunt a Rocky mountain bighorn sheep ram in New Mexico, except those who have held a youth-only, private land-only (not obtained through the public draw), population management license for ram or ES that the director, with verbal concurrence of the chairperson or their designee, has decided does not qualify as once-in-a-lifetime, auction, and/or raffle bighorn ram license(s). A person that has received the youth-only ram license is eligible for this hunt only once as a youth (under age 18),

but may apply for the other Rocky mountain and desert bighorn once-in-a lifetime hunts as long as they are eligible.

B. Desert bighorn sheep ram once-in-a-lifetime hunts: It shall be unlawful for anyone to apply for a desert bighorn sheep ram license if one has previously held a license to hunt a desert bighorn sheep ram in New Mexico, except those who have held a youth-only, private land-only (not obtained through the public draw), population management license for ram or ES that the director, with verbal concurrence of the chairperson or their designee, has decided does not qualify as once-in-a-lifetime, auction, and/or raffle bighorn ram license(s). A person that has received the youth-only ram license is eligible for this hunt only once as a youth (under age 18), but may apply for the other Rocky mountain and desert bighorn once-in-a lifetime hunts as long as they are eligible.

C. Rocky mountain bighorn sheep ewe hunts: This hunt is not a once-in-a-lifetime hunt. A person that has previously held a license to hunt Rocky mountain bighorn rams or ewes is eligible to apply for this hunt.

[19.31.17.9 NMAC - Rp, 19.31.17.9 NMAC, 4/1/2025]

19.31.17.10 SEALING OF RAM HORNS:

A seal shall be affixed to a horn of every bighorn sheep ram head taken in New Mexico, imported into New Mexico, or found in the field in New Mexico subsequent to August 17, 1973. Bighorn sheep heads found in the field within New Mexico shall remain the property of the state until disposed of by permit from the director. The seal shall authorize possession and transportation of the head within New Mexico.

A. Such sealing shall be done within ten days after the bighorn sheep ram head is taken, imported, or found in the field and before the bighorn sheep head is exported from New Mexico. Bighorn sheep ram heads not so declared shall be seized. Only legally taken and possessed bighorn sheep ram heads from New Mexico shall be sealed.

B. Bighorn sheep ram heads legally sealed in other countries, states, tribal entities, provinces, and territories, and possessing a valid visible seal attached, are exempted.

C. It shall be unlawful to possess any bighorn sheep ram head which has not been sealed as described in this section.

[19.31.17.10 NMAC - Rp, 19.31.17.10 NMAC, 4/1/2025]

19.31.17.11 BIGHORN SHEEP HUNTING SEASONS:

The 2023-24 through 2026-27 hunting seasons shall be as indicated below, listing the GMUs or areas open, eligibility requirements or restrictions, hunt dates, hunt codes,

sporting arms, number of licenses, and bag limit. Additional eligibility requirements and restrictions are defined in Section 9 of 19.31.17 NMAC above.

A. Rocky mountain bighorn ram hunt for any big game sporting arms (BHS-1-201). Hunters applying for BHS-1-201 will be allowed to select and rank up to three open areas/hunt dates. The number of licenses available for BHS-1-201 will be up to 60 with a bag limit of one ram.

19.31.17.12 SPECIAL BIGHORN SHEEP HUNTING OPPORTUNITIES:

Bighorn sheep enhancement program:

A. Program description: The director shall collect all proceeds generated through the auction and lottery of special bighorn sheep permits, and such monies shall be deposited in the game protection fund. These monies shall be made available for expenditure by the department solely for programs and projects to benefit bighorn sheep and for costs incurred in carrying out these programs. These monies shall be used to augment, and not replace, monies appropriated from existing funds available to the department for the conservation, restoration, utilization, and management of bighorn sheep.

B. Requirements for issuance of special bighorn sheep licenses:

(1) The state game commission authorizes the director to issue not more than four special bighorn sheep licenses in any one license year to take one ram per license. The director shall allow the sale of one Rocky Mountain bighorn sheep authorization and one desert bighorn sheep authorization through auction to the highest bidder, and one Rocky Mountain bighorn sheep authorization and one desert bighorn sheep authorization to a person selected through a random drawing of a lottery ticket. The drawing will be conducted by the department or an incorporated, non-profit organization dedicated to the conservation of bighorn sheep.

(2) Unless their hunting privileges have been revoked pursuant to law, any person is eligible to submit a bid for the special bighorn sheep auction authorization or purchase lottery tickets in an attempt to be selected for the special bighorn sheep lottery authorization.

(3) The special bighorn sheep authorizations issued through auction and lottery may be transferred, through sale, barter or gift by the successful individuals only to other individuals qualified to hunt.

(4) Special bighorn sheep licenses granted through auction or lottery, as described above, shall not be considered 'once-in-a-lifetime' licenses.

C. Enhancement hunts: These licenses shall be valid for any big game sporting arms statewide where hunting is allowed. The bag limit shall be one ram.

(1) Holders of the auction licenses must declare their exclusive hunt area by June 30 annually to hunt the designated subspecies in one of the open hunt areas. Each holder of the raffle license must declare their exclusive hunt area by July 20 annually to hunt the designated subspecies in one of the open hunt areas not declared by the auction hunter.

(2) The remaining hunt units open to bighorn hunting not declared by the auction or raffle hunter as their exclusive hunt area, may be hunted by either the auction or raffle hunter.

(3) The hunt dates for the auction and raffle licenses shall be 8/1-12/31 annually, except GMU 53 south of NM 38 and east of NM 522 is closed 8/16 to 8/31 annually to all bighorn sheep hunters.

[19.31.17.12 NMAC - Rp, 19.31.17.12 NMAC, 4/1/2025]

19.31.17.13 BIGHORN SHEEP POPULATION MANAGEMENT HUNTS:

A. The director, with verbal concurrence of the chairperson of the New Mexico state game commission or their designee, may authorize population management hunts for bighorn sheep when justified in writing by department personnel and must be based on biological information or a potential to compromise population viability.

B. The director shall designate the sporting arms, season dates, season lengths, bag limits, hunt boundaries, specific requirements or restrictions, and number of licenses to be issued.

C. In the event that an applicant is not able to hunt on the dates specified, the applicant's name shall be moved to the bottom of the list and another applicant may be contacted for the hunt.

D. In those instances where a population management hunt is warranted on deeded private lands, the landowner may suggest eligible hunters of their choice by submitting a list of prospective hunters' names to the department for licensing consideration. No more than one-half of the total number of licenses authorized shall be available to landowner identified hunters. The balance of prospective hunters shall be identified by the department.

E. The director, with verbal concurrence of the chairperson of the New Mexico state game commission or their designee, may deem some ram or either sex population management licenses not once-in-a-lifetime; a person that has held a once-in-a-lifetime ram license(s) is not disqualified from this hunt.

[19.31.17.13 NMAC - Rp, 19.31.17.13 NMAC, 4/1/2025]

PART 18: BIG GAME ENHANCEMENT AUTHORIZATION PACKAGES

19.31.18.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.31.18.1 NMAC - N, 9-28-2007]

19.31.18.2 SCOPE:

Big game hunters. Additional requirements may be found in Chapter 17, NMSA 1978, and Chapters 30, 31, 32 and 33 of Title 19.

[19.31.18.2 NMAC - N, 9-28-2007]

19.31.18.3 STATUTORY AUTHORITY:

17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected mammals, birds, and fish.

[19.31.18.3 NMAC - N, 9-28-2007]

19.31.18.4 DURATION:

Permanent.

[19.31.18.4 NMAC - N, 9-28-2007]

19.31.18.5 EFFECTIVE DATE:

September 28, 2007, unless later date is cited at the end of individual sections.

[19.31.18.5 NMAC - N, 9-28-2007]

19.31.18.6 OBJECTIVE:

To establish and define the procedures and restrictions for the sale, issuance, and use of not more than two big game enhancement authorization packages which will allow for the taking of one each; deer, elk, oryx, ibex, and pronghorn.

[19.31.18.6 NMAC - N, 9-28-2007]

19.31.18.7 DEFINITIONS:

A. "Department" shall mean the New Mexico department of game and fish.

B. "Director" shall mean the director of the New Mexico department of game and fish.

C. "Big game enhancement authorization package," as used herein, shall mean a package of 5 authorizations, 1 deer, 1 elk, 1 oryx, 1 ibex, and 1 pronghorn antelope that allows for the holder of each authorization to purchase a license to hunt for and take the species listed on each authorization.

D. "MB or mature bull" shall mean a male elk with at least one brow tine extending six or more inches from the main beam or at least one forked antler with both branches six or more inches long.

E. "MB or mature buck pronghorn antelope" shall mean a pronghorn antelope with at least one horn longer than its ears.

F. "FAD or forked antlered deer" shall mean a deer possessing antlers, one of which shall have a definite fork showing two or more distinct points. A burr at the base does not constitute a point or fork.

G. "ES or either sex" shall mean any one animal of the species.

H. "Authorization certificate" shall mean a document issued by the department that authorizes the holder to purchase a license or permit, or participate in the activity as specified on the certificate.

[19.31.18.7 NMAC - N, 9-28-2007]

19.31.18.8 BIG GAME HABITAT ENHANCEMENT PROGRAM:

The director of the department shall collect all proceeds generated through the auction of not more than 2 enhancement authorization packages annually. Money collected shall be deposited into the game protection fund and shall be used exclusively for big game habitat enhancement, conservation, and protection.

[19.31.18.8 NMAC - N, 9-28-2007]

19.31.18.9 REQUIREMENTS FOR ISSUANCE, SALE, AND USE:

A. Issuance: The state game commission shall authorize the director of the department to issue not more than 2 big game enhancement authorization packages in any one license year. Each authorization package shall consist of 1 authorization certificate for each of the following species; deer, elk, ibex, oryx, and pronghorn. Each authorization certificate will allow the holder to purchase a license for the species, bag limit, weapon type, season dates, and hunt area defined on the authorization.

B. Sale:

(1) The director shall allow the sale of the two big game enhancement authorization packages through auction to the highest bidder. The auction may be conducted by the department or by an incorporated, nonprofit organization dedicated to the conservation of wildlife.

(2) Selection of an organization to administer the auction of the wildlife enhancement authorization packages shall be pursuant to 1.4.1 NMAC, Sections 31-44 Procurement Code Regulations described in New Mexico Administrative Code (NMAC).

C. Use:

(1) Each authorization issued with a package may be transferred through sale, barter, donation, or gift by the successful purchaser of the package to other individuals qualified to purchase a license and hunt.

(2) Hunting licenses that result from the conversion of any big game enhancement authorization pursuant to this rule shall not be considered "once-in-a-lifetime".

(3) Unless his/her hunting privileges have been revoked pursuant to law, any resident of New Mexico, nonresident, or alien is eligible to submit bids for the big game enhancement authorization packages.

(4) The bag limit for authorizations contained in each package shall be as follows:

(a) deer - FAD or forked antler deer

- (b) elk - MB or mature bull
- (c) oryx - ES or either sex
- (d) ibex - ES or either sex
- (e) pronghorn - MB or mature buck

(5) The season dates for authorizations contained in each package shall be as follows:

- (a) deer - September 1 through January 31 each license year.
- (b) elk - September 1 through January 31 each license year.
- (c) oryx - April 1 through March 31 each license year.
- (d) ibex - April 1 through March 31 each license year.
- (e) pronghorn - August 1 through November 1 each license year.

(6) The hunt area for authorizations contained in each package shall be as follows:

(a) deer - any legally accessible public lands where hunting is allowed and private land with written permission.

(b) elk - any legally accessible public lands where hunting is allowed and private land with written permission.

(c) oryx - any legally accessible public lands where hunting is allowed and private land with written permission. The holder of an oryx authorization or license must contact the department 2 weeks in advance of proposed hunt start date to schedule access to WSMR and must be accompanied by a badged department employee or a WSMR escort when on WSMR lands.

(d) ibex - any legally accessible public lands where hunting is allowed and private land with written permission.

(e) pronghorn - any legally accessible public lands where hunting is allowed and private land with written permission.

(7) The weapon type for all authorizations in each package shall be "any legal weapon" unless specific weapon restrictions exist pursuant to public land management agency regulations.

(8) The hunt code for authorizations in each package shall be as follows:

- (a) deer - DER-1-501
- (b) elk - ELK-1-501
- (c) oryx - ORX-1-501
- (d) ibex - IBX-1-501
- (e) pronghorn - ANT-1-501

[19.31.18.9 NMAC - N, 9-28-2007]

PART 19: GOVERNOR'S SPECIAL EVENTS AUTHORIZATIONS

19.31.19.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.31.19.1 NMAC - N, 9-28-2007]

19.31.19.2 SCOPE:

Big game hunters, game bird hunters, and fishermen. Additional requirements may be found in Chapter 17, NMSA 1978, and Chapters 30, 31, 32 and 33 of Title 19.

[19.31.19.2 NMAC - N, 9-28-2007]

19.31.19.3 STATUTORY AUTHORITY:

17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected mammals, birds, and fish.

[19.31.19.3 NMAC - N, 9-28-2007]

19.31.19.4 DURATION:

Permanent.

[19.31.19.4 NMAC - N, 9-28-2007]

19.31.19.5 EFFECTIVE DATE:

September 28, 2007, unless later date is cited at the end of individual sections.

[19.31.19.5 NMAC - N, 9-28-2007]

19.31.19.6 OBJECTIVE:

To establish procedures and restrictions for the provision, sale, issuance, and use of no more than 12 big game special authorizations and 12 game bird or trophy fish special authorizations available to the governor each license year in conjunction with special events to raise money for fish and wildlife conservation in New Mexico.

[19.31.19.6 NMAC - N, 9-28-2007]

19.31.19.7 DEFINITIONS:

A. "Department" shall mean the New Mexico department of game and fish.

B. "Director," shall mean the director of the New Mexico department of game and fish.

C. "Special authorization certificate" shall mean a document issued by the department that authorizes the holder to purchase a license or permit, or participate in the activity as specified on the certificate.

D. "Big game" shall mean deer, bear, cougar, elk, antelope (American pronghorn), Barbary sheep, bighorn sheep, javelina, oryx, and Persian ibex.

E. "Small game" shall mean blue grouse, dove, pheasant, quail, band-tailed pigeon, sandhill crane, teal, ducks, geese, coots, moorhen, sora, rails, snipe, and squirrel.

F. "Trophy fish" shall mean an enhanced angling opportunity as defined on a special authorization certificate issued by the department.

[19.31.19.7 NMAC - N, 9-28-2007]

19.31.19.8 GOVERNOR'S HUNTING AND FISHING AUTHORIZATION PROGRAM:

The director of the department shall collect all proceeds generated through the auction of not more than 12 big game special authorizations and 12 game bird or trophy fish special authorizations annually. All authorizations shall be auctioned in conjunction with special events called by the governor and all money collected shall be deposited into the game protection fund to be used exclusively for fish and wildlife conservation activities or projects in New Mexico.

[19.31.19.8 NMAC - N, 9-28-2007]

19.31.19.9 REQUIREMENTS AND RESTRICTIONS:

A. Requirements for the provision of governor's hunting and fishing authorizations:

(1) The director shall, upon notification from the governor, ensure that the requested hunting or fishing opportunity complies with rules adopted by the state game commission. Upon confirmation the director shall initiate the development of a special authorization certificate that designates the allowable season dates, bag limits, weapon types, hunting or fishing areas and any other manner or method restrictions as may be appropriate to the species noted on the authorization. Each special authorization certificate auctioned will allow the holder to purchase a license for the species and allowances listed on the authorization certificate, and will allow the holder to participate in the activity as listed or allowed on the authorization certificate.

(2) Upon ensuring that the requested hunting or fishing opportunity is in compliance with rules adopted by the state game commission and establishing the specific allowances and restrictions for each special authorization certificate, the director may issue the special authorization certificate(s) to the special event coordinator as designated by the governor or may hold the authorization certificate(s) for delivery to the successful high bidder(s).

(3) No more than 3 special authorization certificates shall be issued for any one big game species each license year.

B. Requirements for sale of governor's hunting and fishing authorizations:

(1) The sale of all special authorization certificates issued pursuant to this rule shall be through auction to the highest bidder and only in association with special events called by the governor to raise money for fish and wildlife conservation.

(2) Each special authorization certificate shall have an associated minimum bid, determined by the director with concurrence of the chairman of the state game commission. In no case shall the special authorization certificate be sold for less than this established minimum.

(3) In no case shall any auction-associated administration or other costs become the responsibility of the department of game and fish.

(4) All proceeds collected pursuant to the sale at auction of special authorization certificates shall be forwarded to the department within 30 days of sale as well as the auction purchaser's name and contact information.

C. Restrictions for the use of governor's hunting and fishing authorizations:

(1) Each special authorization certificate auctioned may be transferred through sale, barter, donation, or gift by the successful auction purchaser of the special authorization certificate to other individuals qualified to purchase a license and hunt or fish. If a special authorization certificate is transferred via sale, the sale price may not exceed the original purchase price paid at auction.

(2) Big game hunting licenses that result from the conversion of any big game special authorization certificate pursuant to this rule shall not be considered "once-in-a-lifetime".

(3) Unless his/her hunting privileges have been revoked pursuant to law, any resident of New Mexico, nonresident, or alien is eligible to submit bids for special authorization certificates pursuant to this rule.

(4) All big game special authorizations provided for auction shall allow for hunt specifics exactly as listed, by hunt code, in the associated species rule for the applicable license year. (NoValles Caldera national preserve or private land only hunts will be available to auction unless arrangements with the Valles Caldera national preserve or specific private landowners are made prior to issuance of authorization.)

(5) Requests for extended hunt dates, alternative hunt dates, or expanded hunt areas may be allowed pursuant to evaluation by the director and concurrence by the chairman of the state game commission.

(6) The provision of extended hunt dates, alternative hunt dates, or expanded hunt areas should minimize the allowance of hunting during the rut or critical breeding period of the species involved except as is consistent with public hunt periods specified in rule for that license year or as approved by the director with concurrence of the chairman. The provision of extended hunt dates, alternative hunt dates, or expanded hunt areas for migratory birds shall not exceed or violate federal frameworks established by the United States fish and wildlife service annually.

(7) The provision of extended hunt dates, alternative hunt dates, or expanded hunt areas should not result in conflict with the quality of opportunities intended for the holder of any "big game enhancement authorization package", "lieutenant governor's deer enhancement permits", "elk enhancement permits", "Gould's turkey enhancement permits", or "bighorn sheep enhancement permits", as allowed for in statute.

(8) Any individual who hunts or fishes pursuant to this rule must adhere to all manner and method and licensing restrictions and requirements established by commission rule, including any specifications or limitations printed on the special authorization certificate or associated license.

(9) No special authorization certificates for bighorn sheep or ibex shall be made available for auction until such time as the department determines that

populations can sustain additional harvest that will not conflict with current level of available hunting opportunities.

(10) The director, with concurrence of the chairman of the state game commission, may consider any governor's requests for specific game bird or trophy fishing opportunities, and provide authorization listing specifics that are consistent with sound and appropriate fish and wildlife management.

[19.31.19.9 NMAC - N, 9-28-2007]

PART 20: GOULD'S TURKEY ENHANCEMENT PERMITS [REPEALED]

[This Part was repealed effective 4/1/2015. See, 19.31.16.14 NMAC -- GOULD'S TURKEY ENHANCEMENT PERMITS.]

PART 21: JAVELINA

19.31.21.1 ISSUING AGENCY:

New Mexico department of game and fish.

[19.31.21.1 NMAC - Rp, 19.31.21.1 NMAC, 4/1/2023]

19.31.21.2 SCOPE:

Sportspersons interested in javelina hunting and management. Additional requirements may be found in Chapter 17, NMSA 1978, and Chapters 30, 31, 32 and 33 of Title 19 NMAC.

[19.31.21.2 NMAC - Rp, 19.31.21.2 NMAC, 4/1/2023]

19.31.21.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected mammals, birds and fish.

[19.31.21.3 NMAC - Rp, 19.31.21.3 NMAC, 4/1/2023]

19.31.21.4 DURATION:

April 1, 2023 through March 31, 2027.

[19.31.21.4 NMAC - Rp, 19.31.21.4 NMAC, 4/1/2023]

19.31.21.5 EFFECTIVE DATE:

April 1, 2023, unless a later date is cited at the end of a section.

[19.31.21.5 NMAC - Rp, 19.31.21.5 NMAC, 4/1/2023]

19.31.21.6 OBJECTIVE:

Establishing open hunting seasons and regulations, rules and procedures governing the distribution and issuance of javelina licenses by the department.

[19.31.21.6 NMAC - Rp, 19.31.21.6 NMAC, 4/1/2023]

19.31.21.7 DEFINITIONS:

A. "Department" shall mean the New Mexico department of game and fish.

B. "Director" shall mean the director of the New Mexico department of game and fish.

C. "Either sex" or "ES" shall mean any one javelina.

D. "Game management unit" or "GMU" shall mean those areas as described in 19.30.4 NMAC Boundary Descriptions for Game Management Units.

E. "Wildlife management areas" or "WMAs" shall mean those areas as described in 19.34.5 NMAC, Wildlife Management Areas.

[19.31.21.7 NMAC - Rp, 19.31.21.7 NMAC, 4/1/2023]

19.31.21.8 ADJUSTMENT OF LICENSES, AUTHORIZATIONS AND HARVEST LIMITS:

The director, with the verbal concurrence of the chairperson of the New Mexico state game commission or their designee, may adjust the number of licenses for javelina up or down by no more than twenty percent of the total licenses available in the area or GMU to address significant changes in population levels or habitat availability. The director may change or cancel all hunts on military lands to accommodate closures on those lands; if changed, the season length and bag limit shall remain the same as assigned on the original hunt code.

[19.31.21.8 NMAC - Rp, 19.31.21.8 NMAC, 4/1/2023]

19.31.21.9 JAVELINA HUNTING SEASONS:

Javelina hunts for the 2023-24 through 2026-27 hunt seasons shall be as indicated below, listing the open GMUs or areas, eligibility requirements or restrictions, hunt dates, hunt codes, sporting arms, number of licenses, and bag limit. All WMAs shall remain closed to javelina hunting, except the prairie-chicken areas, Heart Bar, Double E, River Ranch, Red Rock (outside of the high-fence bighorn sheep enclosure only), and Socorro-Escondida WMAs are open to javelina hunting.

A. Draw hunts:

19.31.21.10 POPULATION MANAGEMENT HUNTS:

A. The director or their designee may authorize population management hunts for javelina when justified in writing by department personnel.

B. The director or their designee shall designate the legal sporting arms, season dates, season lengths, bag limits, hunt boundaries, specific requirements or restrictions, and number of licenses to be issued.

C. In the event that an applicant is not able to hunt on the dates specified, the applicant's name shall be moved to the bottom of the list and another applicant may be contacted for the hunt.

D. In those instances where a population management hunt is warranted on deeded private lands, the landowner may suggest eligible hunters of their choice by submitting a list of prospective hunter's names to the department for licensing consideration. No more than one-half of the total number of licenses authorized shall be available to landowner identified hunters. The balance of prospective hunters shall be identified by the department.

[19.31.21.10 NMAC - N, 4/1/2023]

PART 22: LAND OWNER CERTIFICATION OF NON-NAVIGABLE WATER [REPEALED]

[19.31.22 NMAC, filed 1/2/2018 was repealed. Landowner Certification of Non-Navigable Water, repealed due to the N.M. Supreme Court decision in *Adobe Whitewater Club v. N.M. State Game Comm'n*, (S-1-SC-38195), effective 3/2/2022. Permanently repealed by the State Game Commission, effective 8/19/2022.]

CHAPTER 32: TRAPPING AND FURBEARERS

PART 1: [RESERVED]

PART 2: FURBEARERS

19.32.2.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.32.2.1 NMAC - Rp, 19.32.1.1 NMAC, 4/1/2024]

19.32.2.2 SCOPE:

Sportspersons interested in furbearer hunting and management. Additional requirements may be found in Chapter 17 NMSA 1978 and Title 19 NMAC.

[19.32.2.2 NMAC - Rp, 19.32.1.2 NMAC, 4/1/2024]

19.32.2.3 STATUTORY AUTHORITY:

Sections 17-1-14, 17-1-26, 17-5-3, 17-5-4, and 17-5-5 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species.

[19.32.2.3 NMAC - Rp, 19.32.1.3 NMAC, 4/1/2024]

19.32.2.4 DURATION:

Permanent.

[19.32.2.4 NMAC - Rp, 19.32.1.4 NMAC, 4/1/2024]

19.32.2.5 EFFECTIVE DATE:

April 1, 2024, unless a later date is cited at the end of a section.

[19.32.2.5 NMAC - Rp, 19.32.1.5 NMAC, 4/1/2024]

19.32.2.6 OBJECTIVE:

Establishing open hunting seasons and regulation, rules and procedures governing the distribution and issuance of trapping licenses by the department.

[19.32.2.6 NMAC - Rp, 19.32.1.6 NMAC, 4/1/2024]

19.32.2.7 DEFINITIONS:

A. "Department" shall mean the New Mexico department of game and fish.

B. "Foothold trap" shall mean a trap designed to capture a furbearer by the foot, but does not include foot encapsulating traps.

C. "Foot encapsulating trap" shall mean any trap with a push or pull-activated trigger located inside an enclosure recessed from an opening of no more than two inches in diameter, as measured across the opening from side to side, not corner to corner. Foot encapsulating traps include "dog proof" and "egg" traps.

D. "Furbearer" shall mean any quadruped defined as a fur-bearing animal in 17-5-2 NMSA 1978.

E. "Land set" shall mean any foothold trap or snare set on land.

F. "Public land" means state-owned land, state-leased land, lands held in trust by the state, lands administered by the United States fish and wildlife service, the United States forest service, the federal bureau of land management, the national park service, the United States department of defense, state parks and any county or municipality, but does not include the interior of physical structures or land belonging to or held in trust for an Indian nation, tribe or pueblo.

G. "Snare" shall mean a wire or cable with a single closing device designed to capture a furbearer.

H. "Trap" shall mean any foothold trap, foot encapsulating trap, cage trap or body-grip trap set to capture a furbearer.

[19.32.2.7 NMAC - Rp, 19.32.1.7 NMAC, 4/1/2024]

19.32.2.8 OPEN SEASONS:

A. Badger, weasel, fox, ringtail and bobcat: November 1-March 15 statewide.

B. Raccoon:

(1) April 1-May 15 and September 1-March 31, statewide.

(2) Extended season: May 16-August 31 statewide, method restrictions per 19.31.10 NMAC.

C. Beaver and muskrat: April 1-April 30 and November 1-March 31, statewide.

D. Nutria: April 1-March 31 statewide.

[19.32.2.8 NMAC - Rp, 19.32.1.8 NMAC, 4/1/2024]

19.32.2.9 CLOSED AREAS:

All public lands in New Mexico are closed to the use of traps and snares except as allowed by 17-11-4 NMSA 1978.

[19.32.2.9 NMAC - Rp, 19.32.1.9 NMAC, 4/1/2024]

19.32.2.10 MANDATORY FURBEARER EDUCATION:

A. Every person must successfully complete a department approved trapper education course before setting any trap or snare in New Mexico. Proof of successful completion of a trapper education course in any other state will also be accepted, but the person must pass a New Mexico law and species identification course.

B. Every person hunting furbearers must successfully complete either the New Mexico trapper education course, or a New Mexico law and species identification course.

C. Trapper education shall be offered free of charge to all residents. The department may charge a fee of not more than \$35 for each non-resident who takes a New Mexico trapper education course. The New Mexico law and species identification course shall be free for everyone.

[19.32.2.10 NMAC - Rp, 19.32.1.10 NMAC, 4/1/2024]

19.32.2.11 BAG LIMIT:

Annual bag limits may be set by the director, with the verbal concurrence of the chairperson of the game commission or their designee, for any furbearer species to address significant changes in statewide populations or to address critical department management needs. Annual bag limits, if set, shall expire March 31st annually.

[19.32.2.11 NMAC - Rp, 19.32.1.11 NMAC, 4/1/2024]

19.32.2.12 EXEMPTIONS:

The provisions of this rule shall not apply to department of game and fish personnel or designated agents who are acting in their official capacity in the control of depredating animals, for law enforcement purposes, to protect human health and safety, or for research or management purposes, unless otherwise restricted by 17-11-1 to 17-11-5 NMSA 1978.

[19.32.2.12 NMAC - Rp, 19.32.1.12 NMAC, 4/1/2024]

CHAPTER 33: ENDANGERED AND PROTECTED SPECIES

PART 1: [RESERVED]

PART 2: REMOVAL, CAPTURE OR DESTRUCTION OF ENDANGERED SPECIES

19.33.2.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[1-13-96; Recompiled 12/31/01]

19.33.2.2 SCOPE:

All persons who may remove, capture or destroy an endangered species, without a specific permit.

[1-13-96; Recompiled 12/31/01]

19.33.2.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26, 17-2-3, 17-2-13, 17-2-14, 17-2-15, 17-2-16, 17-2-42, 17-3-1, 17-3-29 and 17-5-2 NMSA provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species.

[1-13-96; Recompiled 12/31/01]

19.33.2.4 DURATION:

Permanent.

[1-13-96; Recompiled 12/31/01]

19.33.2.5 EFFECTIVE DATE:

January 13, 1996 [unless a later date is cited at the end of a section]

[1-13-96; Recompiled 12/31/01]

19.33.2.6 OBJECTIVE:

To provide for, and require, reporting of the removal, capture or destruction of threatened or endangered species; including when these species are removed, captured, or destroyed in emergency situations involving immediate threat to human life or private property.

[2-13-75, 1-13-96; Recompiled 12/31/01]

19.33.2.7 DEFINITIONS:

A. "Remove" means to take out of natural habitat.

B. **[RESERVED]**

[1-13-96; Recompiled 12/31/01]

19.33.2.8 REPORTING REQUIREMENTS:

Whenever any person removes, captures or destroys without permit as authorized by Section 17-2-42 NMSA, any species classified as threatened or endangered by the state game commission regulation (Title 19, Chapter 33, Part 1), other than those species listed as threatened or endangered in 50 CFR Part 17; that person shall, within 30 days, report such removal, capture or destruction to the New Mexico department of game and fish, stating the species involved and the date, location and circumstances of the removal, capture or destruction.

[2-13-75, 1-13-96; Recompiled 12/31/01]

PART 3: PROCEDURES FOR ACTIONS ON THE BIENNIAL REVIEW: CONTINUING LISTING, UPGRADING, DOWNGRADING SPECIES

19.33.3.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[1/31/96; Recompiled 12/31/01]

19.33.3.2 SCOPE:

The New Mexico state game commission, regarding certain procedures for maintaining a list of wildlife indigenous to New Mexico that are determined to be threatened or endangered within the state. Additional requirements may be found in 19 NMAC 33.1 [now 19.33.6 NMAC], 19 NMAC 33.2 [now 19.33.2 NMAC], and 19 NMAC 33.4 [now 19.33.4 NMAC].

[1/31/96; Recompiled 12/31/01]

19.33.3.3 STATUTORY AUTHORITY:

Section 17-2-41(B) NMSA, 1978 Comp., directs the state game commission to adopt procedures for this purpose.

[1/31/96; Recompiled 12/31/01]

19.33.3.4 DURATION:

Permanent.

[1/31/96; Recompiled 12/31/01]

19.33.3.5 EFFECTIVE DATE:

January 31, 1996 [unless a later date is cited at the end of a section]

[1/31/96; Recompiled 12/31/01]

19.33.3.6 OBJECTIVE:

To provide procedures for commission actions on recommendations from the director to continue listing species as threatened or endangered, or to upgrade or downgrade species between the threatened and endangered categories. (Commission actions to delist a species is not required in this act, as specified by 17-2-40(K-L) NMSA 1978 Compilation.)

[1/31/96; Recompiled 12/31/01]

19.33.3.7 DEFINITIONS:

A. "Endangered" means any species listed as endangered in 19 NMAC 33.1 [now 19.33.6 NMAC].

B. "Threatened" means any species listed as threatened in 19 NMAC 33.1 [now 19.33.6 NMAC].

C. "Commission" means the New Mexico state game commission.

D. "Director" means the director of the New Mexico department of game and fish.

[1/31/96; Recompiled 12/31/01]

19.33.3.8 PROCEDURES:

A. In order to provide for an extended public comment period, the director shall, at least 90 days prior to the initial formal commission hearing on his recommendations, announce his intention to conduct the biennial review of New Mexico threatened and endangered species (Section 17-2-41B, NMSA 1978 Compilation). The announcement shall include the means by which interested persons may obtain draft copies of his recommendations to threatened and endangered species; the opening of a repository for public comment on the biological and ecological evidence and the economic and social impacts pertaining to the recommendations; the location of the repository; and the means by which comment may be submitted. The recommendations, including any revisions to the draft, shall be presented to the state game commission for an initial, formal hearing during which public comments shall be limited to the biological and ecological evidence pertaining to the recommendations (Section 17-2-40, Paragraphs G and L and Section 17-2-38, Paragraphs D and M, NMSA 1978 Compilation).

B. Upon receipt of the director's recommendations, the commission shall announce that written comments regarding the biological and ecological evidence and the economic and social impacts, pertaining to the director's recommendations may be submitted and will be included in the public repository established under the Wildlife

Conservation Act (Section 17-2-40(G) NMSA 1978 Compilation). Written comments pertaining to the biological and ecological evidence, submitted within 14 days of the announcement shall be considered by the commission in taking action on the director's recommendations. Written comments pertaining to the economic and social impacts of a listing decision shall be preserved in the repository for consideration in the development, if practicable, of any recovery plans (Section 17-2-40(G) NMSA 1978 Compilation).

C. Based upon the relevant and reliable (17-2-40(L) NMSA 1978 Compilation) biological and ecological evidence, the commission shall act on the director's recommendations to continue to list a species, or to upgrade or downgrade a species, at its next regularly scheduled meeting following receipt of the recommendations (Section 17-2-41(B) NMSA 1978 Compilation).

(1) The commission may accept the director's recommendations, in whole or part.

(2) When the commission believes there is documented, relevant and reliable evidence, in public comments or in the repository, regarding the biological or ecological status of a species, the commission may instruct the director to conduct further study of one or more species.

D. The commission's decision to continue to list, to upgrade or downgrade a species shall be announced by a news release to the major newspapers of the state and published in a newspaper in circulation in the area most affected by the decision.

E. If at any time other than the biennial review of the New Mexico threatened and endangered species, the director recommends upgrading or downgrading a species on the state list of threatened and endangered species, the commission shall follow these procedures.

[1/31/96, 7/15/96; Recompiled 12/31/01]

PART 4: CONFIDENTIAL DATA REGARDING ENDANGERED SPECIES

19.33.4.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[1-31-96; 19.33.4.1 NMAC - Rn, 19 NMAC 33.4.1, 4/14/00]

19.33.4.2 SCOPE:

All persons or entities who may seek to obtain information from the Department of Game and Fish on the distribution and location of species of wildlife listed as threatened or endangered, or being investigated for possible listing as threatened or endangered.

Other requirements may be found in 19.33.1 NMAC, 19.33.2 NMAC, and 19.33.3 NMAC.

[1-31-96; 19.33.4.2 NMAC – Rn & A, 19 NMAC 33.4.2, 4/14/00]

19.33.4.3 STATUTORY AUTHORITY:

Section 17-2-40(H) provides the Commission with authority to create regulations protecting the confidentiality of data from an investigation. Section 17-2-45 (B) NMSA 1978 provides criminal penalties for the taking of an endangered species. Section 17-2-42 (B) NMSA 1978 provides the Director with the authority to enter into agreements. 17-2-40-H NMSA 1978 requires the State Game Commission to adopt regulations governing the confidentiality of data. 17-2-43 authorizes the commission to enact regulations necessary to carry out all the provisions and purposes of the Wildlife Conservation Act.

[1-31-96; 19.33.4.3 NMAC – Rn & A, 19 NMAC 33.4.3, 4/14/00]

19.33.4.4 DURATION:

Permanent.

[1-31-96; 19.33.4.4 NMAC – Rn, 19 NMAC 33.4.4, 4/14/00]

19.33.4.5 EFFECTIVE DATE:

January 31, 1996, unless a later date is cited at the end of a Section.

[1-31-96; 19.33.4.5 NMAC - Rn, 19 NMAC 33.4.5, 4/14/00]

19.33.4.6 OBJECTIVE:

To prevent the inappropriate distribution of data on threatened or endangered species, or data generated by a study or investigation of species that may be listed as threatened or endangered; to clarify which data in possession of the Department are confidential, and to specify procedures and conditions for the dissemination of confidential data.

[1-31-96; 19.33.4.6 NMAC - Rn, 19 NMAC 33.4.6, 4/14/00]

19.33.4.7 DEFINITIONS:

A. "Data," as used herein, means facts or information generated by a study or investigation of species that may be considered for listing or delisting and/or facts or information concerning a listed species.

B. "Confidential Data," as used herein, means:

(1) Data on the distribution and location of listed or proposed species, received or obtained by the Department of Game and Fish, from individuals or agencies, under a written agreement of confidentiality.

(2) Data on the distribution and location of species, identified by the Director as data which, if publicly disseminated, may result in the taking of, or otherwise harm, a species being investigated for listing as threatened or endangered, and/or a listed species.

(3) "Confidential data regarding private property," as used herein, means distribution and location of listed or proposed species on private property received or generated by the Department during a listing study or investigation as defined in 17-2-40 NMSA 1978. This shall include listed or proposed species distribution and locations recorded as map coordinates, maps, GPS coordinates, property owner names, property/ranch names, or other data that may identify, or lead to the identification of specific locations on private property. Stipulations in this section will apply to data collected after the section modification becomes effective.

(4) "Coded confidential data regarding private property", as used herein means Confidential Data, as described in 19.33.4.7.B3 that is coded in a manner that allows a description of location and distribution by county or other appropriate geographic unit which does not represent a single parcel of private land. This county-wide, or other unit-wide, information may be included in reports or documents as necessary to meet reporting requirements or for management of the species.

C. "Investigation", as used herein, means a process pursuant to Subsections B through L of Section 17-2-40 NMSA 1978.

D. "Listed Species", as used herein, means any species listed as threatened or endangered pursuant to 17-2-41 (A) NMSA 1978.

E. "Proposed Species" as used herein, means any species for which a listing investigation has been formally initiated under the Wildlife Conservation Act as described in 17.2.40 Section A, NMSA 1978.

F. "Department" as used herein means, the New Mexico Department of Game and Fish.

G. "Director" as used herein means, the Director of the New Mexico Department of Game and Fish.

[1-31-96; 19.33.4.7 NMAC – Rn & A, 19 NMAC 33.4.7, 4/14/00]

19.33.4.8 RELEASE OF CONFIDENTIAL DATA:

A. Subject to the restrictions applicable to private property, confidential data may only be released to persons, organizations or agencies upon submission to the Director of a written application describing a legitimate need for scientific or management purposes consistent with the objectives of the Wildlife Conservation Act.

B. Confidential data will not be submitted to any public repository established under the Wildlife Conservation Act, except as coded in 19.33.4.7.B4.

C. Confidential data regarding private property, or which would identify or lead to the identification of any private property, will not be released under any circumstances without specific written agreement from the private property owner or their designee.

D. The Department may use confidential data for the purpose of species management and species management planning.

E. Coded Confidential Data regarding private land as described in 19.33.4.7.B4 as county-wide, or other unit-wide, information may be included in reports, public repository or documents as necessary to meet reporting requirements from funding sources or for management of the listed or proposed species.

F. Any confidential data, which is contained in any Department documents which would otherwise be released pursuant to a request for inspection of public records, shall be redacted from those documents prior to release of those documents.

G. If the Department is involved with an assessment of a project proposed on private property that indicates potential impacts to a listed or proposed species covered under this regulation the Director may release that confidential data necessary to address the potential impact.

H. Pursuant to the New Mexico Mining Act (Chapter 69 NMSA 1978 and 19 NMAC 10.2) and Surface Coal Mining Regulations (19 NMAC 18.2) the Department may use confidential data to assess potential impacts of mining operations on private land and the Director may release that confidential data necessary to address potential impacts to listed or proposed species covered under this regulation.

I. The classification of data as "confidential" shall not prevent the release of data to appropriate law enforcement officials if there is reason to believe that violations of laws or regulations regarding listed species protected under this confidentiality regulation are occurring or have recently occurred. The Director or his designee will make a determination of whether to release information on a case by case basis.

[1-31-96; 19.33.4.8 NMAC – Rn & A, 19 NMAC 33.4.8, 4/14/00]

PART 5: ADDING A SPECIES TO THE STATE LIST OF THREATENED AND ENDANGERED SPECIES BY ADOPTING A SPECIES ON THE FEDERAL LIST

19.33.5.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[8/15/96; Recompiled 12/31/01]

19.33.5.2 SCOPE:

The director of the department of game and fish, and the New Mexico state game commission regarding procedures for adding a species to the state list of threatened and endangered species through adoption of species on the United States list of endangered fish and wildlife as set forth in the Endangered Species Act of 1973.

[8/15/96; Recompiled 12/31/01]

19.33.5.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species, and Sections 17-2-37 through 17-2-46, the "Wildlife Conservation Act."

[8/15/96; Recompiled 12/31/01]

19.33.5.4 DURATION:

Permanent.

[8/15/96; Recompiled 12/31/01]

19.33.5.5 EFFECTIVE DATE:

August 15, 1996, unless a later date is cited at the end of a Section or a Paragraph.

[8/15/96; Recompiled 12/31/01]

[Compiler's note: The words *or paragraph*, above, are no longer applicable. Later dates are now cited only at the end of sections, in the history notes appearing in brackets.]

19.33.5.6 OBJECTIVE:

To provide procedures for the director and commission for developing and acting upon a recommendation to add a species to the state list of threatened and endangered species through adoption of a species from the United States list set forth under the federal Endangered Species Act.

[8/15/96; Recompiled 12/31/01]

19.33.5.7 DEFINITIONS:

A. "Endangered" means any species listed as endangered in 19 NMAC 33.1 [now 19.33.6 NMAC].

B. "Threatened" means any species listed as threatened in 19 NMAC 33.1 [now 19.33.6 NMAC].

C. "Commission" means New Mexico state game commission.

D. "Director" means the director of the New Mexico department of game and fish.

[8/15/96; Recompiled 12/31/01]

19.33.5.8 PROCEDURES:

A. The director shall present, in writing, any recommendation to add a species to the New Mexico list of threatened and endangered species, through adoption of a species on the United States list of endangered fish and wildlife as set forth in the Endangered Species Act of 1973 (Section 17-2-40 NMSA 1978), at a properly scheduled meeting. Upon receipt of the recommendation, the commission shall establish a date and location, within six months, for a public hearing on the recommendation (Section 17-2-40 L NMSA 1978).

B. At least 90 days before the public hearing, notice of the hearing shall be mailed to federal and state agencies, local and tribal governments, and individuals and organizations that have requested notification of department actions regarding threatened and endangered species; and a legal notice shall be published in a newspaper of general circulation in the area affected by the recommendation (Section 17-2-40 K NMSA 1978).

C. Notice of the public hearing shall:

(1) include the date, time and location of the hearing (Section 17-2-40 K1 NMSA 1978);

(2) include a statement of the recommendation (Section 17-2-40 K2 NMSA 1978);

(3) indicate the location and availability of the public repository for the recommendation, and for the hearing record (Section 17-2-40 K3 NMSA 1978);

(4) indicate where and by what date written comments and written testimony may be filed for inclusion in the hearing record (Section 17-2-40 K4 NMSA 1978);

(5) indicate that written comments and testimony may address biological and ecological evidence and any economic and social impacts of the recommendation (Section 17-2-40 E 5 6 NMSA 1978);

(6) indicate that written comments pertaining to any economic and social impacts of the listing decision shall be preserved in the repository for consideration in developing, if practicable, any recovery plan (Section 17-2-40 G NMSA 1978);

(7) indicate that views, data and comments pertaining to the biological and ecological evidence in the recommendation may be presented orally or in writing at the hearing (Section 17-2-40 G L NMSA 1978);

(8) specify that notice of intent to present technical and scientific testimony on the biological and ecological evidence, and a written copy of the testimony to be presented, shall be submitted to the commission not less than 30 days prior to the hearing (Section 17-2-40 K6 NMSA 1978);

(9) and specify that the public record shall remain open for written comments for 30 days after the date of the hearing (Section 17-2-40 K7 NMSA 1978).

D. The commission shall make its decision and take action, based on the relevant and reliable evidence, to add or not to add a species to the New Mexico list of threatened and endangered species at its next regularly scheduled meeting within no more than 30 days after the close of the hearing record (Section 17-2-40 L NMSA 1978). The commission shall:

(1) list a species as endangered in New Mexico if it finds that the species prospects for survival or recruitment within the state are in jeopardy based upon the biological and ecological evidence in the public repository and based upon biological and ecological evidence received in the public hearing (Section 17-2-40 L1 NMSA 1978); or

(2) list a species as threatened in New Mexico if it finds that the species' prospects for survival or recruitment within the state are likely within the foreseeable future to be in jeopardy based upon the biological and ecological evidence in the public repository and biological and ecological evidence received in the public hearing (Section 17-2-40 L2 NMSA 1978); or

(3) find that there is sufficient documented, relevant and reliable, contrary evidence, in the public repository, or received in the public hearing, regarding the biological and ecological status of the species; and instruct the director to conduct further study of the species.

E. The commission's decision on the director's recommendation to add a species to the New Mexico list of threatened and endangered species, through adoption of a species on the United States list of endangered fish and wildlife as set forth in the

Endangered Species Act of 1973, shall be announced by a news release to the major newspapers of the state.

[8/15/96; Recompiled 12/31/01]

PART 6: LIST OF THREATENED AND ENDANGERED SPECIES

19.33.6.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[1-31-96; 19.33.1.1 NMAC - Rn, 19 NMAC 33.1.1, 4/14/00; 19.33.6.1 NMAC - Rn, 19.33.1.1 NMAC, 11/30/00]

19.33.6.2 SCOPE:

The department of game and fish and all persons who may affect wildlife in New Mexico. The department collects biological information for managing threatened and endangered species. Except as otherwise provided in the Wildlife Conservation Act (17-2-37 to 17-2-46 NMSA 1978), it is unlawful for any person to take, possess, transport, export, sell or offer for sale or ship any threatened or endangered species or subspecies. The department may authorize such activities, by permit, for scientific or educational purposes, for propagation in captivity, or to protect private property.

[1-31-96; 19.33.1.2 NMAC - Rn, 19 NMAC 33.1.2, 4/14/00; 19.33.6.2 NMAC - Rn, 19.33.1.2 NMAC, 11/30/00; A, 12/31/12]

19.33.6.3 STATUTORY AUTHORITY:

17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species. 17-2-38 and 17-2-40 NMSA 1978 provide that the commission may list threatened and endangered, native and foreign wildlife.

[1-11-91, 1-31-96; 19.33.1.3 NMAC - Rn, 19 NMAC 33.1.3, 4/14/00; 19.33.6.3 NMAC - Rn, 19.33.1.3 NMAC, 11/30/00]

19.33.6.4 DURATION:

Permanent.

[1-31-96; 19.33.1.4 NMAC - Rn, 19 NMAC 33.1.4, 4/14/00; 19.33.6.4 NMAC - Rn, 19.33.1.4 NMAC, 11/30/00]

19.33.6.5 EFFECTIVE DATE:

January 31, 1996, unless a later date is cited at end of a section.

[1-31-96, 12-31-96; 19.33.1.5 NMAC - Rn, 19 NMAC 33.1.5, 4/14/00; 19.33.6.5 NMAC - Rn, 19.33.1.5 NMAC, 11/30/00]

19.33.6.6 OBJECTIVE:

To provide a list of the threatened or endangered wildlife of New Mexico.

[1-11-91, 1-31-96; 19.33.1.6 NMAC - Rn, 19 NMAC 33.1.6, 4/14/00; 19.33.6.6 NMAC - Rn, 19.33.1.6 NMAC, 11/30/00; A, 12/31/12]

19.33.6.7 DEFINITIONS:

A. "Endangered", as used herein, means any species or subspecies whose prospects of survival or recruitment in New Mexico are in jeopardy.

B. "Threatened", as used herein, means any species or subspecies that is likely to become endangered within the foreseeable future throughout all or a significant portion of its range in New Mexico.

C. "Identification format", Where both threatened or endangered, and non-endangered, subspecies occur in the state, the former are identified by being listed by common name (in parentheses) and trinomial.

[1-11-91, 1-31-96; 19.33.1.7 NMAC - Rn, 19 NMAC 33.1.7, 4/14/00; 19.33.6.7 NMAC - Rn, 19.33.1.7 NMAC, 11/30/00; A, 12/31/12]

19.33.6.8 THREATENED AND ENDANGERED SPECIES OF NEW MEXICO:

A. MAMMALS

(1) Endangered:

- (a) Arizona shrew, *Sorex arizonae*
- (b) Mexican long-nosed bat, *Leptonycteris nivalis*
- (c) (Penasco) least chipmunk, *Neotamias minimus atristriatus*
- (d) meadow jumping mouse, *Zapus hudsonius*
- (e) (Arizona) montane vole, *Microtus montanus arizonensis*
- (f) gray wolf, *Canis lupus*

(2) Threatened:

- (a) North American least shrew, *Cryptotis parva*
- (b) lesser long-nosed bat, *Leptonycteris yerbabuenae*
- (c) spotted bat, *Euderma maculatum*
- (d) western yellow bat, *Lasiurus xanthius*
- (e) white-sided jackrabbit, *Lepus callotis*
- (f) (Organ mountains) Colorado chipmunk, *Neotamias quadrivittatus australis*
- (g) southern pocket gopher, *Thomomys umbrinus*
- (h) American marten, *Martes Americana*

B. BIRDS

(1) Endangered:

- (a) brown pelican, *Pelecanus occidentalis*
- (b) aplomado falcon, *Falco femoralis*
- (c) white-tailed ptarmigan, *Lagopus leucura*
- (d) whooping crane, *Grus americana*
- (e) least tern, *Sterna antillarum*
- (f) common ground-dove, *Columbina passerina*
- (g) buff-collared nightjar, *Caprimulgus ridgway*
- (h) elegant trogon, *Trogon elegans*
- (i) northern beardless-tyrannulet, *Camptostoma imberbe*
- (j) (southwestern) willow flycatcher, *Empidonax traillii extimus*
- (k) thick-billed kingbird, *Tyrannus crassirostris*
- (l) (Arizona) grasshopper sparrow, *Ammodramus savannarum ammoregus*

(2) Threatened:

- (a) neotropic cormorant, *Phalacrocorax brasilianus*
- (b) bald eagle, *Haliaeetus leucocephalus*
- (c) common black-hawk, *Buteogallus anthracinus*
- (d) peregrine falcon, *Falco peregrinus*
- (e) (Gould's) wild turkey, *Meleagris gallopavo mexicana*
- (f) piping plover, *Charadrius melodus*
- (g) whiskered screech-owl, *Megascops trichopsis*
- (h) boreal owl, *Aegolius funereus*
- (i) broad-billed hummingbird, *Cynanthus latirostris*
- (j) white-eared hummingbird, *Hylocharis leucotis*
- (k) violet-crowned hummingbird, *Amazilia violiceps*
- (l) lucifer hummingbird, *Calothorax lucifer*
- (m) Costa's hummingbird, *Calypte costae*
- (n) Gila woodpecker, *Melanerpes uropygialis*
- (o) Bell's vireo, *Vireo bellii*
- (p) gray vireo, *vireo vicinior*
- (q) Abert's towhee, *Melezone aberti*
- (r) Baird's sparrow, *Ammodramus bairdii*
- (s) yellow-eyed junco, *Junco phaeonotus*
- (t) varied bunting, *Passerina versicolor*

C. REPTILES

(1) Endangered:

- (a) Gila monster, *Heloderma suspectum*
- (b) sand dune lizard, *Sceloporus arenicolus*
- (c) gray-checkered whiptail *Aspidoscelis dixonii*
- (d) gray-banded kingsnake, *Lampropeltis alterna*
- (e) Mexican gartersnake, *Thamnophis eques*
- (f) plain-bellied water snake, *Nerodia erythrogaster*
- (g) (New Mexico) ridgenosed rattlesnake, *Crotalus willardi obscurus*

(2) Threatened:

- (a) western river cooter, *Pseudemys gorzugi*
- (b) Slevin's bunch grass lizard, *Sceloporus slevini*
- (c) canyon spotted whiptail, *Aspidoscelis burti*
- (d) mountain skink, *Plestiodon callicephalus*
- (e) green ratsnake, *Senticolis triaspis*
- (f) narrow-headed gartersnake, *Thamnophis rufipunctatus*
- (g) western ribbonsnake, *Thamnophis proximus*
- (h) (mottled) rock rattlesnake, *Crotalus lepidus lepidus*

D. AMPHIBIANS

(1) Endangered:

- (a) Jemez mountains salamander, *Plethodon neomexicanus*
- (b) lowland leopard frog, *Lithobates yavapaiensis*
- (c) boreal toad, *Anaxyrus boreas*
- (d) Great Plains narrow-mouthed toad, *Gastrophryne olivacea*

(2) Threatened:

- (a) Sacramento mountain salamander, *Aneides hardii*
- (b) Sonoran desert toad, *Ollotis alvaria*

E. FISHES

(1) Endangered:

- (a) Gila chub, *Gila intermedia*
- (b) Headwater chub, *Gila nigra*
- (c) Chihuahua chub, *Gila nigrescens*
- (d) roundtail chub, *Gila robusta*
- (e) Rio Grande silvery minnow, *Hybognathus amarus*
- (f) spikedace *Meda fulgia*
- (g) Arkansas river shiner, *Notropis girard*
- (h) (Pecos) bluntnose shiner, *Notropis simus pecosensis*
- (i) southern redbelly dace, *Phoxinus erythrogaster*
- (j) Colorado pikeminnow, *Ptychocheilus lucius*
- (k) loach minnow, *Tiaroga cobitis*
- (l) (Zuni) bluehead sucker, *Catostomus discobolus yarrowi*
- (m) blue sucker, *Cycleptus elongates*
- (n) gray redhorse, *Moxostoma congestum*
- (o) Pecos gambusia, *Gambusia nobilis*

(2) Threatened:

- (a) Gila trout, *Oncorhynchus gilae*
- (b) Mexican tetra, *Astyanax mexicanus*
- (c) peppered chub, *Macrhybopsis tetranema*

- (d) suckermouth minnow, *Phenacobius mirabilis*
- (e) Pecos pupfish, *Cyprinodon pecosensis*
- (f) White Sands pupfish, *Cyprinodon Tularosa*
- (g) Gila topminnow, *Poeciliopsis occidentalis*
- (h) greenthroat darter, *Etheostoma lepidum*
- (i) bigscale logperch, *Percina macrolepida*

(3) Listing exceptions: Gila trout-excludes the population in McKnight creek, Grant county; Arkansas river shiner- excludes the population in the Pecos river drainage; bigscale logperch- excludes the population in the Canadian river drainage

F. CRUSTACEANS:

(1) Endangered:

- (a) Socorro isopod, *Thermosphaeroma thermophilum*
- (b) Noel's amphipod, *Gammarmarus desperatus*

G. MOLLUSKS

(1) Endangered:

- (a) paper pondshell, *Utterbackia imbecillis*
- (b) Texas hornshell, *Popenaias popeii*
- (c) Koster's springsnail, *Juturnia kosteri*
- (d) Alamosa springsnail, *Pseudotryonia alamosae*
- (e) Chupadera springsnail, *Pyrgulopsis chupaderae*
- (f) Socorro springsnail, *Pyrgulopsis neomexicana*
- (g) Roswell springsnail, *Pyrgulopsis roswellensis*
- (h) Pecos assiminea, *Assiminea pecos*,
- (i) wrinkled marshsnail, *Stagnicola caperata*

(j) Florida mountainsnail, *Oreohelix florida*

(2) Threatened:

(a) lake fingernailclam, *Musculium lacustre*

(b) swamp fingernailclam, *Musculium partumeium*

(c) long fingernailclam, *Musculium transversum*

(d) Lilljeborg's peaclam, *Pisidium lilljeborgi*

(e) Sangre de Cristo peaclam, *Pisidium sanguinichristi*

(f) Gila springsnail, *Pyrgulopsis gilae*

(g) Pecos springsnail, *Pyrgulopsis pecosensis*

(h) New Mexico springsnail, *Pyrgulopsis thermalis*

(i) star gyro, *Gyraulus crista*

(j) shortneck snaggletooth, *Gastrocopta dalliana dalliana*

(k) ovate vertigo, *Vertigo ovata*

(l) Hacheta Grande woodlandsnail, *Ashmunella hebardi*

(m) Cooke's peak woodlandsnail, *Ashmunella macromphala*

(n) Mineral creek mountainsnail, *Oreohelix pilsbryi*

(o) Doña Ana talussnail, *Sonorella todseni*

[1-11-91, 11-15-95, 12-31-96, 8-15-98; 19.33.1.8 NMAC - Rn & A, 19 NMAC 33.1.8, 4/14/00; 19.33.6.8 NMAC - Rn, 19.33.1.8 NMAC & A, 11/30/00; A, 11/14/02; A, 1/31/05; A, 9/15/05; A, 10/16/06; A, 12/29/06; A, 1/15/10; A, 1/31/12; A, 2/15/12; A, 12/31/12]

19.33.6.9 [RESERVED]

19.33.6.10 SPECIES FORMERLY LISTED:

These species have been removed from the above list since 1997; because they have been determined to be not indigenous to New Mexico, or they have been extirpated from New Mexico, or they have recovered and are no longer threatened or endangered.

- A. spotted chorus frog, *Pseudacris clarkii*
- B. phantom shiner, *Notropis orca*
- C. (Rio Grande) bluntnose shiner, *Notropis simus simus*
- D. brook stickleback, *Culaea inconstans*
- E. (desert) bighorn sheep, *Orvis canadensis mexicana*

CHAPTER 34: WILDLIFE HABITAT AND LANDS

PART 1: [RESERVED]

PART 2: HABITAT PROTECTION

19.34.2.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[1-31-96; 19.34.2.1 NMAC - Rn, 19 NMAC 34.2.1, 7-31-12]

19.34.2.2 SCOPE:

The department of game and fish and all persons who may hunt, fish and/or trap on U.S. forest service and bureau of land management lands.

[1-31-96; 19.34.2.2 NMAC - Rn, 19 NMAC 34.2.2, 7-31-12]

19.34.2.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species.

[6-4-87, 1-31-96; 19.34.2.3 NMAC - Rn, 19 NMAC 34.2.3, 7-31-12]

19.34.2.4 DURATION:

Permanent.

[1-31-96; 19.34.2.4 NMAC - Rn, 19 NMAC 34.2.4, 7-31-12]

19.34.2.5 EFFECTIVE DATE:

January 31, 1996

[1-31-96; 19.34.2.5 NMAC - Rn, 19 NMAC 34.2.5, 7-31-12]

19.34.2.6 OBJECTIVE:

To provide a description of lands closed to vehicle travel under the Habitat Protection Act and to describe prohibited activities on said lands.

[1-31-96; 19.34.2.6 NMAC - Rn, 19 NMAC 34.2.6, 7-31-12]

19.34.2.7 DEFINITIONS:

A. "Road", as used herein, means any maintained or unmaintained right-of-way that has been utilized by the public and includes roads, streets, highways and state scenic recreational or historical trails.

B. "Vehicle", as used herein, means any motor-powered mechanical device used for conveyance.

[1-31-96; 19.34.2.7 NMAC - Rn, 19 NMAC 34.2.7, 7-31-12]

19.34.2.8 VEHICLE USE CLOSURE:

A. Restrictions.

(1) No vehicle shall be operated on the Carson national forest areas described in Paragraphs (1) through (4) of Subsection A of 19.34.2.9 NMAC, Paragraphs (6) through (10) of Subsection A of 19.34.2.9 NMAC, and San Simon canyon recreation area as described in Subsection C of 19.34.2.9 NMAC except on those roads therein that have been posted with arrows as open.

(2) No vehicle shall be operated on the Carson national forest area described in Paragraph (5) of Subsection A of 19.34.2.9 NMAC below between the dates of January 1 and August 15 of each year except on those roads therein that have been posted with arrows as open.

(3) No vehicle shall be operated on the Cibola national forest area described in Subsection B of 19.34.2.9 NMAC below between the dates of December 15 of each year and March 31 of the following year except on those roads therein that have been posted with arrows as open.

B. Exceptions.

(1) For the purposes of camping and parking, motor vehicles shall be allowed up to 300 feet on each side of those roads that are posted with arrows as open.

(2) The restrictions imposed by this regulation shall not apply to private land nor landowner access thereto within the prescribed areas.

(3) Restrictions and prohibitions imposed by this regulation shall not apply to public employees acting in the scope of their employment nor to grazing permittees, mineral claimants, special use permittees, or their assignees or designees, when traveling in the restricted areas for the specific purpose for which their permits or leases were issued or granted.

(4) The restrictions and prohibitions imposed by this regulation shall not apply in emergency situations such as fire or other disasters or where necessary to protect life or property.

(5) Snowmobiles only may be used in Carson national forest area described in Paragraph (9) of Subsection A of 19.34.2.9 NMAC and in portions of those areas described in Paragraphs (2), (3) and (4) of Subsection A of 19.34.2.9 NMAC that are marked as open to snowmobiles use by signs.

(6) In the Valle Vidal area described in Paragraph (10) of Subsection A of 19.34.2.9 NMAC below, unattended motor vehicle parking shall be allowed only during the day and within twenty feet of the roadway along roads that are posted with arrows as open. Unattended motor vehicle parking shall be allowed overnight and during the day on designated parking areas and vehicular camping shall be allowed only in designated campgrounds.

[3-5-85, 6-4-87, 1-31-96; 19.34.2.8 NMAC - Rn, 19 NMAC 34.2.8, 7-31-12]

19.34.2.9 ROAD CLOSURE AREAS:

A. Carson national forest.

(1) That portion of the Jicarilla division of the Carson national forest beginning at the northwest corner of the Jicarilla division at its junction with the New-Mexico-Colorado-Jicarilla Indian reservation boundaries, thence south along the Jicarilla division-Jicarilla Indian reservation boundary for approximately 9.25 miles to the section line separating Sections 25 and 36 in township 31 north, range 4 west, thence west

along this section line to its junction with forest service road 310, thence west along forest service road 310 to its junction with forest service road 309, thence west along forest service road 309 to its junction with the west boundary to the Jicarilla division, thence north along the west boundary of the Jicarilla division for approximately 9.75 miles to its junction with the New Mexico-Colorado boundary, thence east along the New Mexico-Colorado boundary for approximately 10 miles to the beginning.

(2) That portion of the Tres Piedras division of the Carson national forest beginning at the northeast corner of the Tres Piedras division at its junction with the New Mexico-Colorado boundary, thence south and east along the eastern boundary of the Tres Piedras division to its junction with U.S. Highway 64 at the Village Tres Piedras, New Mexico, thence west along U.S. Highway 64 to its junction with the Tres Piedras division-Tierra Amarilla land grant boundary, thence north and west along the Tres Piedras division-Tierra Amarilla land grant boundary to its junction with the New Mexico-Colorado boundary, thence east along the New Mexico-Colorado boundary for approximately 18 miles to the beginning.

(3) Those portions of the Camino Real division of the Carson national forest beginning at the northeast corner of the Camino Real division at its junction with the Taos Indian reservation, thence south and east along the eastern boundary of the Camino Real division to its junction with the Colfax-Mora county lines, thence west along the Colfax-Mora county lines for approximately 2 miles to its junction with Forest Service Road 76, thence southwest along service road 76 for approximately 3 miles to its junction with forest service trail 124, thence due south from this point for approximately 4 miles to the Camino Real division-Mora land grant boundary, thence south along the Camino Real division-Mora land grant boundary for approximately 5.5 miles to the section line separating sections 23 and 26 in township 22 north, range 14 east, thence west along this section line to its junction with New Mexico highway 518, thence southeast for approximately 1 mile to the village of Angostura, New Mexico, thence south from Angostura for approximately 4.75 miles to the Taos-Mora county line thence southwest along the Taos-Mora county line to their junction with the Pecos wilderness boundary, thence north, west and south along the Pecos wilderness boundary to its junction with the Carson-Santa Fe forest boundary, thence northwest along the Carson-Santa Fe Forest boundary, thence along the Carson-Santa Fe forest boundary to the section line separating sections 29 and 30 in township 20 north, range 12 east, thence northeast from this point in a straight line to the common corner of sections 25, 26, 35 and 36 in township 22 north, range 12 east, thence due east from this point to the common corner of sections 27, 28, 33 and 34 in township 22 north, range 13 east, thence due north from this point for approximately 3 miles to the common corner of sections 9, 10, 14 and 16 in township 22 north, range 13 east, thence northwest for approximately 1 mile to state highway 518, thence due north from this point for approximately 2 miles to forest service trail 4, thence west along forest service trail 4 to New Mexico highway 518, thence northwest from this point to the common corners of sections 22, 23, 26 and 27 in township 23 north, range 12 east, thence northeast from this point to the junction of forest service road 114 and the Cristobal de la Serna land Grant boundary, thence north and northeast along the east boundary of

the Cristobal de la Serna land grant to its junction with the Taos Indian reservation boundary, thence east and north along the south boundary of the Taos Indian reservation to the beginning.

(4) That portion of the Questa division of the Carson national forest beginning at the northeast corner of the Questa division at its junction with the Sangre de Cristo Land Grant boundary, thence south and east along the Questa division-Sangre de Cristo land grant boundary to the common corner of sections 9, 10, 15 and 16 in township 29 north, range 15 east, thence due west for approximately 3.5 miles to the common corner of sections 12 and 13, township 29 north, range 14 east and section 7 and 18 township 29 north, range 15 east thence due north for approximately 1 mile to forest service road 134, thence southwest along forest service road 134 to its junction with the west boundary of the Questa division, thence north along the west boundary of the Questa division for approximately 9 miles to the beginning.

(5) That portion of the Questa division of the Carson national forest beginning at the junction of the west boundary of the Questa division with New Mexico highway 38, thence south and east along New Mexico highway 38 to its junction with the Columbine-Hondo proposed wilderness area, thence south and west along the boundary of the Columbine-Hondo proposed wilderness area to its junction with the common corner of Sections 17, 18, 19 and 20 in township 28 north, range 13 east, thence north along the boundary of the Questa division for approximately 5 miles to the common corner of sections 7, 8, 17 and 18 in township 28 north, range 13 east, thence due south for 1 mile to the section line separating sections 16 and 17 in township 28 north, range 13 east, thence north along this section line to its junction with Largo canyon, thence northwest along Largo canyon to its junction with the west boundary of the Questa division, thence northeast along the west boundary of the Questa division to the beginning.

(6) That portion of the Questa division of the Carson national forest beginning at the junction of forest service road 109 and the New Mexico highway 38, thence east along New Mexico 38 to its junction with forest service road 58, thence south along forest service road 58 to the junction of the Red river and the east fork of the Red river, thence southeast along the east fork of the Red river for approximately 1 mile to its junction with the section line separating section 31 in township 28 north, range 15 east, and section 1 in township 27 north, range 15 east, thence east along this section line for approximately .5 miles to its junction with the Wheeler peak wilderness boundary, thence north, east, south and west along the Wheeler peak wilderness boundary to its junction with the Taos Pueblo grant and state highway 150, thence north along state highway 150 for approximately .5 miles to its junction with the boundary of the Columbine-Hondo proposed wilderness, thence north, west and east along the boundary of the Columbine-Hondo proposed wilderness to the beginning.

(7) That portion of the Tres Piedras division of the Carson national forest beginning at the common corner of section 14, 15, 22 and 23 in township 24 north, range 6 east, thence east for approximately 2 miles to the common corner of sections

13 and 24 in township 24 north, range 6 east, and sections 18 and 19 in township 24 north, range 7 east, thence south and west from this point for approximately 2 miles along an unnamed creek to the middle of section 25 in township 24 north, range 6 east, thence northeast to Arroyo del Perro, thence along Arroyo del Perro to Alamitos springs, thence due east to the common corner of sections 33 and 34 in township 24 north, range 7 east, and sections 3 and 4 in township 23 north, range 7 east, thence due south for approximately 1.5 miles to the Tres Piedras division-Lobato grant boundary, thence west and south along the Lobato grant boundary to its junction with state highway 554, thence southwest along state highway 554 for approximately .5 miles to its junction with the south boundary of the Tres Piedras division, thence west along the south boundary of the Tres Piedras division to its junction with the east boundary of the Plaza Blanca grant, thence north along the east boundary of the Plaza Blanca Grant to the beginning.

(8) That portion of the Tres Piedras division of the Carson national forest beginning at the northeast corner of the Piedra Lumbre grant, thence west along the north boundary of the Piedra Lumbre grant to the common corner of sections 2, 3, 9 and 10 in township 24 north, range 4 east, thence due north for approximately 1 mile to the common corner of sections 34 and 35 in township 25 north, range 4 east, and sections 2 and 3 in township 24 north, range 4 east, thence northeast in a straight line to the common corner of sections 25, 26, 35 and 36 in township 25 north, range 4 east, thence due east for approximately 3 miles to the common corner of sections 28, 29, 32 and 33 in township 25 north, range 5 east, thence due south approximately 1 mile to the common corner of sections 32 and 33 in township 25 north, range 5 east, and sections 4 and 5 in township 24 north, range 5 east, thence due east for approximately 1 mile to the common corner of sections 33 and 34 in township 25 north, range 5 east, and sections 3 and 4 in township 24 north, range 5 east, thence due north for approximately 1 mile to the common corner of sections 27, 28, 33 and 34 in township 25 north, range 5 east, thence due east for approximately 3 miles to the common corner of sections 25 and 36 in township 25 north, range 5 east, and sections 30 and 31 in township 25 north, range 6 east, thence due south along the section line for approximately .5 miles, thence east, south and west encompassing the SW 1/4 of section 31 of township 25 north, range 6 east, thence west-southwest in a straight line until this line intersects Comanche canyon, thence southwest along Comanche canyon for approximately 1 mile to the common corner of sections 2, 3, 10 and 11 in township 24 north, range 5 east, thence south-southwest in a straight-line for approximately 1.5 miles to marker post 5 on the east boundary of the Piedra Lumbre grant, thence north along the east boundary of the Piedra Lumbre grant to the beginning.

(9) That portion of the Tres Piedras division of the Carson national forest beginning at the junction of the Tierra Amarilla grant, Jarosita canyon and the Tres Piedras division boundary, thence southeast for approximately 2 miles along Jarosita canyon to the common corner of sections 2, 3, 10 and 11 in township 27 north, range 6 east, thence due south in a straight line to the common corner of sections 10, 11, 14 and 15 in township 27 north, range 6 east, thence southwest in a straight line for approximately 2 miles to the common corner of sections 24 and 25 in township 27 north, range 6 east, and sections 19 and 30 in township 27 north, range 7 east, thence

southwest from this point in a straight line to its intersection with Salvador canyon, thence southeast along Salvador canyon to its junction with El Rito creek, thence north along El Rito creek to its junction with canyon de Chacon, thence west along canyon de Chacon to its junction with forest service road 274, thence northwest from this point in a straight line to the common corner of sections 17, 18, 19 and 20 in township 27 north, range 6 east, thence due west for approximately 1.5 miles to the common corner of sections 13, 14, 23 and 24 in township 27 north, range 5 east, thence north-northeast in a straight line to the common corner of sections 1 and 12 in township 27 north, range 5 east, and sections 6 and 7 in township 27 north, range 6 east, thence southwest to the common corner of sections 11, 12, 13 and 14 in township 27 north, range 5 east, thence due west for approximately 1 mile to the common corner of sections 10, 11, 14 and 15 in township 27 north, range 5 east, thence northwest in a straight line for approximately 1.25 miles to its intersection with forest service road 125, thence north and east along forest service road 125 to its end at Trout lakes, thence northwest in a straight line to its intersection with the Tres Piedras division-Tierra Amarilla Grant boundary, thence east along the Tres Piedras division-Tierra Amarilla grant boundary to the beginning.

(10) That portion of the Questa division of the Carson national forest known as the Valle Vidal addition.

B. Cibola national forest. That portion of the Mount Taylor district of the Cibola national forest lying within the boundary line starting at the junction of state highway 400 and the Cibola national forest boundary in section 9, township 14 north, range 16 west, and running west and thence north along the forest boundary to the southern boundary of the Fort Wingate army depot, thence southwest, south and west along the southern boundary of the Fort Wingate army depot to its intersection with Hogback ridge in section 2, township 13 north, range 17 west, thence south along Hogback ridge to its intersection with forest service road 191, thence east along forest service road 191 to its intersection with state highway 400, thence east along the section line between sections 3 and 10 and 2 and 11 in township 13 north, range 16 west to its intersection with forest service road 50, thence south and east along forest service road 50 to its junction with forest service road 166, thence north on forest service road 166 to its junction with forest service road 418, thence northeast along forest service road 418 to its intersection with the forest boundary in section 20, township 13 north, range 14 west, thence north and west along the forest boundary to the beginning.

C. Simon Canyon recreation area. Those portions of sections 9, 10 and 15 in township 30 north, range 8 west lying north of the San Juan river but below the Simon canyon rim (6,200 feet elevation) and within that area designated and administered by the bureau of land management as the Simon canyon recreation area.

[12-15-82, 6-5-85, 6-4-87, 1-31-96; 19.34.2.9 NMAC - Rn, 19 NMAC 34.2.9, 7-31-12]

19.34.2.10 CLOSURE TO ENTRY:

A. Summer closure.

(1) The elk calving area described in Paragraph (2) of Subsection A of 19.34.2.10 NMAC, below will be closed to public entry during the period of May 1 through June 30 of each year except on those roads therein that have been posted with arrows as open or as allowed by rule.

(2) Beginning at the west boundary of the Valle Vidal addition of the Questa district of the Carson national forest at the Costilla river, thence north along the Valle Vidal boundary to the north boundary of the Valle Vidal, thence east along the Valle Vidal boundary to the Taos-Colfax county line, thence south and west along the county line to its intersection with the south boundary of Valle Vidal, thence west and north along the Vidal boundary to the beginning.

B. Winter closure.

(1) The elk wintering area described in Paragraph (2) of Subsection B of 19.34.2.10 NMAC below will be closed to public entry during the period January 1 through March 31 of each year except on those roads therein that have been posted with arrows as open.

(2) Beginning on the north boundary of the Valle Vidal addition of the Questa district of the Carson national forest at its intersection with the Taos-Colfax county line, thence east, south, west and north along the Valle Vidal boundary to its intersection with the Taos-Colfax county line, thence east and north along the county line to the beginning.

[3-5-85, 6-5-85, 1-31-96; 19.34.2.10 NMAC - Rn & A, 19 NMAC 34.2.10, 7-31-12]

PART 3: USE OF STATE GAME COMMISSION LANDS

19.34.3.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.34.3.1 NMAC - Rp, 19.34.3.1 NMAC, 6-30-2016]

19.34.3.2 SCOPE:

Department staff; licensed hunters, anglers, and trappers; and habitat management and access validation (HMAV) holders.

[19.34.3.2 NMAC - Rp, 19.34.3.2 NMAC, 6-30-2016]

19.34.3.3 STATUTORY AUTHORITY:

Sections 17-1-1, 17-1-14, 17-1-26, 17-4-1, and 17-4-33 NMSA 1978, provide the New Mexico state game commission with the authority to acquire lands, to provide for use of

game and fish for use and development for public recreation, and to establish rules that it may deem necessary to carry out the purposes of Chapter 17, NMSA 1978.

[19.34.3.3 NMAC - Rp, 19.34.3.3 NMAC, 6-30-2016]

19.34.3.4 DURATION:

Permanent.

[19.34.3.4 NMAC - Rp, 19.34.3.4 NMAC, 6-30-2016]

19.34.3.5 EFFECTIVE DATE:

June 30, 2016, unless a later date is cited at the end of a section.

[19.34.3.5 NMAC - Rp, 19.34.3.5 NMAC, 6-30-2016]

19.34.3.6 OBJECTIVE:

To establish terms and conditions for use of land owned, controlled or operated by the commission.

[19.34.3.6 NMAC - Rp, 19.34.3.6 NMAC, 6/30/16]

19.34.3.7 DEFINITIONS:

A. "Access" shall mean consent for an individual to enter upon and use designated lands for hunting, fishing, trapping, or gaining access into nature activities. Access excludes commercial activity.

B. "Access rules" shall mean restrictions or prohibitions on access applicable to designated land pursuant to 19.34.3.10 NMAC.

C. "Big game" shall mean deer, elk, pronghorn antelope, bighorn sheep, ibex, Barbary sheep, oryx, turkey, javelina, bear, and cougar.

D. "Commercial activity" means any activity conducted within land for which a fee is charged or compensation or anything else of value is received by the person or business conducting the activity, except for hunting activities conducted by an outfitter registered with the department.

E. "Commission" shall mean the New Mexico state game commission.

F. "Director" shall mean the director of the New Mexico department of game and fish.

G. "Department" shall mean the New Mexico department of game and fish.

H. "Designated area(s)" shall mean those areas within designated land where access is either allowed or restricted.

I. "Designated land(s)" shall mean land on which access is allowed for hunting, fishing, trapping, gaining access into nature activities, or activities authorized by the director pursuant to 19.34.3.9 NMAC

J. "Gaining access into nature" or " GAIN" shall mean a program to provide broadly based wildlife-associated recreation opportunity, not to include hunting, trapping, or fishing, pursuant to 17-4-33 NMSA 1978.

K. "GAIN activities" shall mean activities that provide broadly based wildlife-associated recreation, not to include hunting, trapping, or fishing..

L. "Group" shall mean at least one (1) individual in possession of a hunting license, fishing license, trapping license, or habitat management and access validation (HMAV) valid for the current license year and up to three (3) accompanying individuals. Youth under the age of 18 are exempt from this definition.

M. "Land(s)" shall mean property owned, operated, or controlled by the commission except property upon which state parks are located and operated by the state parks division of the energy, minerals, and natural resources department. Activities on commission-owned land within state parks operated by the state parks division of the energy, minerals and natural resources department shall be subject to state parks division rules.

N. "License year" shall mean the period of April 1 through March 31.

O. "Operator" shall mean any person or entity that conducts commercial activity on land pursuant to a commercial permit issued by the department and that person's or entity's agents.

[19.34.3.7 NMAC - Rp, 19.34.3.7 NMAC, 6-30-2016]

19.34.3.8 PROHIBITION OF DISCRIMINATION:

No one shall be denied use of lands on the basis of race, color, religion, sex, disability, family status or national origin.

[19.34.3.8 NMAC - Rp, 19.34.3.10 NMAC, 6-30-2016]

19.34.3.9 AUTHORITY OF DIRECTOR:

The director shall have the authority to specify designated lands, specify access rules, and to close, in whole or in part, or otherwise restrict the use of land when in the opinion of the director such closure or restriction is reasonably necessary for the protection of such land, wildlife, habitat, the public or otherwise, to respond to circumstances concerning such land. The director shall have the authority to authorize an activity prohibited or restricted by access rules or not otherwise specified on land when in the opinion of the director such activity is not detrimental to the land, wildlife or purpose(s) for which the land is managed and will not result in any expenditure from the game protection fund that is inconsistent with Sections 17-1-28 and 17-1-29 NMSA 1978.

[19.34.3.9 NMAC - Rp, 19.34.3.12 NMAC, 6-30-2016]

19.34.3.10 ACCESS RULES:

A. It shall be unlawful for any individual to enter upon land not designated for access.

B. It shall be unlawful to operate any vehicle off of established roads or on closed roads within land, except as allowed by the director through permit or commission rule, or any county, state or federal law enforcement officer in the discharge of his/her official duties.

C. It shall be unlawful for an individual or group to enter upon designated land without possessing at least one (1) hunting license, fishing license, trapping license, or habitat management and access validation (HMAV) valid for the current license year. Youth under the age of 18 are exempt from this access rule.

D. It shall be unlawful to deface or remove rocks, minerals, plants (including fruits, nuts, and berries), animals, firewood, or man made feature from any land unless specifically allowed by commission rule.

E. It shall be unlawful for any person to excavate, injure, destroy, or remove any cultural resource or artifact from any land.

F. It shall be unlawful for any individual to access designated land, outside designated areas, during published big game and waterfowl hunting seasons for the respective designated land.

G. It shall be unlawful to camp in excess of fourteen (14) consecutive days, except by licensed hunters and their guests concurrent with their licensed hunt and scouting period.

H. It shall be unlawful to have an open fire unless safely contained.

I. It shall be unlawful to use or possess any hay or feed for domestic livestock use on land other than pelleted or grain feed, or hay certified as weed free.

J. It shall be unlawful to conduct a commercial activity on land without first obtaining a commercial permit as described in 19.34.3.12 NMAC.

K. Nothing in this rule shall prevent state employees or contract workers from performing administrative duties on land.

L. It shall be unlawful to possess unleashed dogs or other pets on land. Exceptions: dogs may be unleashed for permitted field trial or hunting purposes during established seasons only and only on land where use of dogs for hunting purposes is allowed by rule; dogs may be unleashed when allowed for authorized department personnel; and dogs may be unleashed for authorized wildlife management activities.

M. Properly-licensed big game hunters and up to three (3) guests are exempt from closures during a seven (7) day scouting period prior to the start of the licensed hunt period on the respective designated land.

N. It shall be unlawful to violate any access rule specified by the director for specific designated land and disseminated by posting or notice provision by the department (e.g. posted signs, New Mexico fishing and hunting rules and information, or the department website).

[19.34.3.10 NMAC - N, 6-30-2016]

19.34.3.11 USE OF LAND:

Designated land for hunting, fishing, or trapping access shall be specified by the department and shall be disseminated through the annual publication of New Mexico hunting and fishing rules and information. Designated land for GAIN activities shall be specified by the director and shall be posted on the department website (www.wildlife.state.nm.us). Access to designated land is allowed unless otherwise restricted or prohibited by access rules pursuant to 19.34.3.10 NMAC. Land not designated for access shall remain closed. Applications for the Jamie Koch community shelter shall be accepted only at the department office in Santa Fe. Reservations are made on a first come first serve basis. The fee shall cover the day use shelter for a 24 hour period up to four (4) consecutive days. The permit fee shall be established by the director.

[19.34.3.11 NMAC - Rp, 19.34.3.13 NMAC, 6-30-2016]

19.34.3.12 COMMERCIAL PERMITS:

A. A commercial permit is required for any person or business to conduct a commercial activity on designated land and must be in the possession of the permittee while the permittee is on designated land.

B. Requests for commercial permits may be submitted to the department office in Santa Fe for review.

C. Each commercial permit shall specify the number of employees or agents authorized to conduct activities on behalf of the permittee pursuant to said permit. A copy of the commercial permit must be in the possession of the operator and every employee or agent while on designated land.

D. No commercial permit shall be issued until the applicant has provided proof of insurance or bond in the amount of not less than \$1,000,000 naming the department, the commission and state of New Mexico as additional insureds.

E. Operators and their clients are subject to all applicable state and federal regulations.

F. Commercial permits are not transferable. A commercial permit cannot be sold or transferred for any reason. The department will not refund any portion of the commercial permit fee for any reason.

G. The director may limit the number and type of commercial permits in order to protect resources. The director may prescribe special requirements and conditions for commercial permits when, in his sole discretion, it is in the best interests of the state to do so. Special requirements may include, but are not limited to: limitations on use of designated land, grounds and facilities; designation of a specific area within the designated land in which an operator is allowed to operate; designation of specific days or hours during which an operator is allowed to operate; number of participants, requirements for submission of use and price data; and training requirements.

H. No operator shall violate any condition of the commercial permit or restriction of the designated land. Violation of the commercial permit or a restriction may result in the immediate revocation of the commercial permit. Operators shall be subject to the procedural provisions of Section 17-3-34 NMSA 1978 and Subsection C of 19.31.2.10 NMAC, and 19.31.2.11 NMAC through 19.31.2.24 NMAC.

I. The director may deny any application for a commercial permit.

J. The department shall establish the fee for each individual commercial permit it issues.

K. The department reserves the right to cancel or modify any commercial permit in emergency circumstances as determined by the director.

[19.34.3.12 NMAC - Rp, 19.34.3.14 NMAC, 6-30-2016]

PART 4: PROTECTION OF DEPARTMENT OF GAME AND FISH LANDS

19.34.4.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[1/13/96; Recompiled 12/31/01]

19.34.4.2 SCOPE:

General public.

[1/13/96; Recompiled 12/31/01]

19.34.4.3 STATUTORY AUTHORITY:

Sections 17-1-14, 17-1-26, and 17-4-1, NMSA 1978, provide the New Mexico state game commission with the authority to acquire land and to establish rules and regulations that it may deem necessary to carry out the purposes of Chapter 17, NMSA 1978.

[1/13/96; Recompiled 12/31/01]

19.34.4.4 DURATION:

Permanent.

[1/13/96; Recompiled 12/31/01]

19.34.4.5 EFFECTIVE DATE:

January 13, 1996 [unless a later date is cited at the end of a section]

[1/13/96; Recompiled 12/31/01]

19.34.4.6 OBJECTIVE:

To establish rules to prevent damage to wildlife and wildlife habitat on lands owned or controlled by the department of game and fish.

[1/13/96; Recompiled 12/31/01]

19.34.4.7 DEFINITIONS:

A. "Established road" means any maintained or unmaintained right-of-way that has been utilized by the public and includes roads, streets, and highways.

B. "Motorized vehicle" means any motor-powered mechanical device used for conveyance.

[1/13/96; Recompiled 12/31/01]

19.34.4.8 PROHIBITED ACTIVITIES:

It shall be unlawful for any person or persons to operate any motorized vehicle off of established roads on lands owned or controlled by the department of game and fish.

[1/13/96; Recompiled 12/31/01]

19.34.4.9 EXCEPTIONS:

A. Any county, state or federal law enforcement officer may drive off of established roads on these lands in the discharge of his official duties.

B. The director of the department of game and fish may permit other designated personnel to drive off of established roads when it is deemed necessary to provide proper maintenance and service upon these lands.

[8/16/72, 1/13/96; Recompiled 12/31/01]

PART 5: WILDLIFE MANAGEMENT AREAS

19.34.5.1 ISSUING AGENCY:

New Mexico department of game and fish.

[19.34.5.1 NMAC - Rp, 19.34.5.1 NMAC, 4/1/2023]

19.34.5.2 SCOPE:

Department staff, licensed hunters, anglers and trappers and other users as allowed by rule.

[19.34.5.2 NMAC - Rp, 19.34.5.2 NMAC, 4/1/2023]

19.34.5.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to identify game refuges and to establish rules and regulations that it may deem necessary to carry out the purposes of Chapter 17 NMSA 1978.

[19.34.5.3 NMAC - Rp, 19.34.5.3 NMAC, 4/1/2023]

19.34.5.4 DURATION:

Permanent.

[19.34.5.4 NMAC - Rp, 19.34.5.4 NMAC, 4/1/2023]

19.34.5.5 EFFECTIVE DATE:

April 1, 2023, unless a different date is cited at the end of a section.

[19.34.5.5 NMAC - Rp, 19.34.5.5 NMAC, 4/1/2023]

19.34.5.6 OBJECTIVE:

To identify wildlife management areas created by the state game commission.

[19.34.5.6 NMAC - Rp, 19.34.5.6 NMAC, 4/1/2023]

19.34.5.7 DEFINITION:

A. "Department" shall mean the New Mexico department of game and fish.

B. "Wildlife management area" shall mean an area of land owned or controlled by the state game commission and designated by the commission or department as a wildlife management area.

[19.34.5.7 NMAC - Rp, 19.34.5.7 NMAC, 4/1/2023]

19.34.5.8 WILDLIFE MANAGEMENT AREAS:

A. Bear Canyon lake wildlife management area is located approximately 2 miles north of Mimbres and is more fully described in deeds on file in Grant county and with the department.

B. Belen wildlife management area is part of the Ladd S. Gordon complex and is located approximately 2 miles south of Belen and is more fully described in deeds on file in Valencia county and with the department.

C. Bernardo wildlife management area, part of the Ladd S. Gordon complex, is located approximately 15 miles south of Belen and is more fully described in deeds on file in Socorro county and with the department.

D. Bernardo wildlife management area, Simms donation, part of the Ladd S. Gordon complex, is located approximately 16 miles south of Belen and is more fully described in deeds on file in Socorro county and with the department.

E. Bert Clancy wildlife management area is located between Pecos and Cowles and is more fully described in deeds on file in San Miguel county and with the department.

F. Bill Evans lake wildlife management area is located approximately 8 miles south of Cliff and is more fully described in deeds on file in Grant county and with the department.

G. Bluebird wildlife management area is located approximately 6 miles southeast of Cuba on state road 126 and is more fully described in deeds on file in Sandoval county and with the department.

H. Casa Colorada wildlife management area, part of the Ladd S. Gordon complex, is located approximately 7 miles southeast of Belen on the east side of the Rio Grande and is more fully described in deeds on file in Valencia county and with the department.

I. Charette lakes wildlife management area is located approximately 23 miles southwest of Springer and is more fully described in deeds on file in Mora county and with the department.

J. Clayton lake wildlife management area is located approximately 15 miles north of Clayton and is more fully described in deeds on file in Union county and with the department.

K. Colin Neblett wildlife management area is located immediately east of the village of Eagle Nest and Eagle Nest lake and is more fully described in deeds on file in Colfax county and with the department.

L. Double E wildlife management area is located approximately 6 miles northeast of Gila and is more fully described in deeds on file in Grant county and with the department.

M. Eagle Nest lake wildlife management area is located immediately south of the village of Eagle Nest and is more fully described in deeds on file in Colfax county and with the department.

N. Edward Sargent wildlife management area is located immediately north of Chama and is more fully described in deeds on file in Rio Arriba county and with the department.

O. Elliott Barker wildlife management area is located approximately 15 miles northwest of Cimarron and is more fully described in deeds on file in Colfax county and with the department.

P. Fenton lake wildlife management area is located approximately 9 miles north of Jemez Springs and is more fully described in deeds on file in Sandoval county and with the department.

Q. Glenwood Allred wildlife management area is located immediately south of Glenwood and is more fully described in deeds on file in Catron county and with the department.

R. Hammond Tract wildlife management area is located approximately 2 miles east of Blanco and is more fully described in deeds on file in San Juan county and with the department.

S. Heart Bar wildlife management area is located approximately 36 miles north of Silver City and is more fully described in deeds on file in Grant and Catron counties, and with the department.

T. Jackson lake wildlife management area is located approximately 8 miles northwest of Farmington along the La Plata river and includes management of state land office section 16 and bureau of land management section 21 and is more fully described in deeds on file in San Juan county and with the department.

U. La Joya wildlife management area, part of the Ladd S. Gordon complex, is located approximately 20 miles south of Belen and is more fully described in deeds on file in Socorro county and with the department.

V. Lake Roberts wildlife management area is located approximately 20 miles north of Silver City and is more fully described in deeds on file in Grant county and with the department.

W. Marquez wildlife management area is located approximately 25 miles north of Laguna and is more fully described in deeds on file in McKinley and Sandoval counties and with the department.

X. McAllister lake wildlife management area is located approximately 7 miles southeast of Las Vegas and is more fully described in deeds on file in San Miguel county and with the department.

Y. Marquez/LBar wildlife management area is located approximately 25 miles north of Laguna and is more fully described in deeds on file in Cibola, McKinley and Sandoval counties and with the department.

Z. Mimbres Tract wildlife management area is located approximately 1 mile southeast of Mimbres, and is more fully described in deeds on file in Grant county and with the department.

AA. Navajo wildlife management areas are located approximately 10 miles northeast of Navajo Lake and are more fully described in deeds on file in San Juan county, Rio Arriba county and with the department.

BB. Pine river wildlife management area is located approximately 1 mile south of the Colorado border off state road 511 and is more fully described in deeds on file in San Juan county and with the department.

CC. Prairie-chicken wildlife management areas are located throughout Chaves, DeBaca, Lea and Roosevelt counties and are more fully described in deeds on file in said counties and with the department.

DD. Red Rock wildlife management area is approximately 26 miles north of Lordsburg and is more fully described in deeds on file in Grant county and with the department.

EE. Retherford wildlife management area is located approximately 3 miles southeast of Bloomfield and is more fully described in deeds on file in San Juan county and with the department.

FF. Rio Chama wildlife management area is located approximately 14 miles south of Chama, bordering El Vado reservoir and the Chama river, and is more fully described in deeds on file in Rio Arriba county and with the department.

GG. Rio de los Pinos wildlife management area is located approximately 10 miles southwest of Antonito, Colorado and is more fully described in deeds on file in Rio Arriba county and with the department.

HH. River Ranch wildlife management area is located approximately 24 miles northwest of Deming and is more fully described in deeds on file in Grant county, Luna county, and with the department.

II. San Simon Cienega wildlife management area is located approximately 16 miles northwest of Animas and is more fully described in deeds on file in Hidalgo county and with the department.

JJ. Socorro-Escondida wildlife management area is located approximately 3 miles northeast of Socorro and is more fully described in deeds on file in Socorro county and with the department.

KK. Tres Piedras wildlife management area is located approximately 5 miles southeast of Tres Piedras and is more fully described in deeds on file in Taos county and with the department.

LL. Tucumcari lake wildlife management area is located immediately east of Tucumcari and is more fully described in deeds on file in Quay county and with the department.

MM. Urraca wildlife management area is located approximately 12 miles north of Questa and is more fully described in deeds on file in Taos county and with the department.

NN. Wagon Mound wildlife management area is located approximately 1 mile north of Wagon Mound and is more fully described in deeds on file in Mora county and with the department.

OO. Water canyon wildlife management area is located approximately 18 miles northeast of Grants by Mount Taylor and is more fully described in deeds on file in Cibola county and with the department.

PP. William A. Humphries wildlife management area is located approximately 10 miles west of Chama, south of US highway 64/84 and is more fully described in deeds on file in Rio Arriba county and with the department.

QQ. William S. Huey wildlife management area is located approximately 2 miles north of Artesia and is more fully described in deeds on file in Eddy county and with the department.

PART 6: PUBLIC LAND USER STAMP (SIKES ACT)

19.34.6.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.34.6.1 NMAC - Rp 19.34.6.1 NMAC, 4/1/2021]

19.34.6.2 SCOPE:

The department of game and fish and all persons who hunt, fish or trap on land administered by the U.S. forest service or the U.S. bureau of land management in the state.

[19.34.6.2 NMAC - Rp 19.34.6.2 NMAC, 4/1/2021]

19.34.6.3 STATUTORY AUTHORITY:

17-1-14 and 17-1-26 NMSA 1978 provide the state game commission the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species. Public Law 93-452 (Sikes Act) permits the state, secretary of agriculture and secretary of interior to enter into agreements for the issuance of public land management stamps.

[19.34.6.3 NMAC - Rp 19.34.6.3 NMAC, 4/1/2021]

19.34.6.4 DURATION:

March 31, 2031.

[19.34.6.4 NMAC - Rp 19.34.6.4 NMAC, 4/1/2021]

19.34.6.5 EFFECTIVE DATE:

April 1, 2021.

[19.34.6.5 NMAC - Rp 19.34.6.5 NMAC, 4/1/2021]

19.34.6.6 OBJECTIVE:

To provide for a public land management stamp for hunting, fishing or trapping on certain public lands in New Mexico, requires purchase of stamp, creates a citizen advisory committee, and provides for expenditure of funds from stamp revenues.

[19.34.6.6 NMAC - Rp 19.34.6.6 NMAC, 4/1/2021]

19.34.6.7 DEFINITIONS:

A. "Public land" means those lands which surface areas are under the management authority of the United States forest service or the United States bureau of land management, except those lands under the management authority of the United States bureau of land management in game management unit 28.

B. "Public land management stamp" or "habitat stamp" means a stamp or validation that is affixed to or printed on a hunting, trapping, or fishing license to demonstrate compliance with this regulation.

[19.34.6.7 NMAC - Rp 19.34.6.7 NMAC, 4/1/2021]

19.34.6.8 PURCHASE:

A. Each person hunting on any public land, must purchase a public land management stamp.

B. Resident trappers twelve years of age and older trapping for protected furbearers, and non-resident trappers trapping on any public land, must purchase a public land management stamp.

C. Anglers twelve years of age and older, except resident anglers 70 years of age and older, fishing on any public land, must purchase a public land management stamp.

D. Only one public land management stamp is required for each individual to hunt, trap, or fish on public land during any license year.

E. Purchase price for each public land management stamp shall be ten dollars (\$10.00). Starting in 2022 the purchase price will be adjusted annually based on the consumer price index from the United States department of labor, bureau of labor statistics, and may be rounded. The state game commission may defer annual adjustments; deferral of annual adjustments may not exceed five consecutive years.

[19.34.6.8 NMAC - Rp 19.34.6.8 NMAC, 4/1/2021]

19.34.6.9 EXPENDITURE OF FUNDS COLLECTED:

A. The expenditure of funds collected under this regulation shall be consistent with the most current management plans developed by the United States forest service, the United States bureau of land management and the New Mexico department of game and fish.

B. A minimum of fifty percent of the funds over a five-year period will be spent on projects that benefit fish, excluding administrative fees.

[19.34.6.9 NMAC - Rp 19.34.6.11 NMAC, 4/1/2021]

19.34.6.10 CITIZEN ADVISORY COMMITTEE:

A citizen advisory committee shall be created. The committee will be comprised of nine members, seven of which shall follow the district and representation requirements as defined in 17-1-2 NMSA 1978. All members shall be selected and appointed by the state game commission from a list of applicants provided by the department. The committee will provide citizen advice to the agencies and will prioritize eligible projects.

[19.34.6.10 NMAC - Rp 19.34.6.12 NMAC, 4/1/2021]

PART 7: OPEN GATE: HUNTING AND FISHING ACCESS PROGRAM

19.34.7.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.34.7.1 NMAC - N, 10-31-2005]

19.34.7.2 SCOPE:

General public.

[19.34.7.2 NMAC - N, 10-31-2005]

19.34.7.3 STATUTORY AUTHORITY:

Sections 17-1-1, 17-1-2, 17-1-5.1, 17-1-14, 17-1-26, 17-2-6 and 17-4-1 NMSA 1978, provide the New Mexico state game commission with the authority to lease lands for game management and wildlife habitat as well as acquire properties for hunting grounds. Also, to provide for use of game and fish for use and development for public recreation, and to establish rules and regulations that it may deem necessary to carry out the purposes of Chapter 17, NMSA 1978.

[19.34.7.3 NMAC -N, 10-31-2005; A, 9-30-2010]

19.34.7.4 DURATION:

Permanent.

[19.34.7.4 NMAC - N, 10-31-2005]

19.34.7.5 EFFECTIVE DATE:

October 31, 2005, unless a later date is cited at the end of a section.

[19.34.7.5 NMAC - N, 10-31-2005]

19.34.7.6 OBJECTIVE:

To establish fees, and other rules for accessing private lands, state lands (including lands of counties and other instrumentalities of the state), tribal lands and federal lands for recreational uses like hunting, fishing, trapping and other endeavors.

[19.34.7.6 NMAC - N, 10-31-2005; A, 9-28-2007; A, 9-30-2010]

19.34.7.7 DEFINITIONS:

A. "Commission" shall mean the New Mexico state game commission.

B. "Director" shall mean the director of the New Mexico department of game and fish.

C. "Department" shall mean the New Mexico department of game and fish.

D. "Open gate" shall mean a program of the department to provide hunters, anglers, and trappers with wildlife associated activities as determined by the department with the purpose to increase access on private lands, state lands (including lands of counties and other instrumentalities of the state), federal lands or tribal lands.

E. "Landowner" shall mean a private landowner, lessee, tribal entity, or local, state, or federal entity authorized to manage property with whom the department enters into an open gate access agreement.

F. "Open gate property" shall mean lands enrolled in the open gate program recognized as a game and fish management area for the purposes designated.

[19.34.7.7 NMAC - N, 10-31-2005; A, 9-28-2007; A, 9-30-2010; A, 7-31-2012]

19.34.7.8 HABITAT MANAGEMENT AND ACCESS VALIDATION FEE:

On or after April 1, 2006 no resident or nonresident license or permit shall be considered to be a proper and valid license unless the licensee can demonstrate, by a stamp, check-off or other official mark, that a \$4.00 fee for habitat management and access validation has been paid, provided that an individual purchaser shall be required to pay for only one habitat management and access validation fee each license year, regardless of the number of licenses or permits purchased by the licensee. Exceptions: no person under the age of 18, no resident angler age 70 and older and no person designated by the department as a 100% disabled resident veteran is required to purchase the habitat management and access validation.

[19.34.7.8 NMAC - N, 10-31-2005; A, 3-31-2006; A, 10-31-2006; A, 9-28-2007; A, 9-30-2010; A, 7-31-2012]

19.34.7.9 PROHIBITION OF DISCRIMINATION:

If otherwise qualified as stated above, no one shall be denied use of leased private lands, state lands (including lands of counties and other instrumentalities of the state), tribal lands and federal lands on the basis of race, color, religion, gender, sexual orientation or national origin.

[19.34.7.9 NMAC - N, 10-31-2005; A, 9-28-2007; A, 9-30-2010]

19.34.7.10 ACCESS AGREEMENTS FOR THE OPEN GATE PROGRAM:

A. The director may enter into open gate access agreements for hunting, fishing, trapping or other recreational endeavors to take place on private land with suitable habitat to support the recreational uses, or to provide a right-of-way corridor through private land or tribal land to large, inaccessible blocks of public lands meeting the conditions of 19.34.7.11 NMAC.

(1) Such access agreements shall include the name of the landowner, map of the property, the permitted uses, property rules, responsibilities of the landowner and department, term, amount of compensation, the liability clauses for the department and landowner, with signatures of the director and landowner.

(2) Landowners shall agree participation is voluntary and enrollment is contingent on the annual availability of funds.

(3) All renewals of open gate access agreements shall be subject to annual review per the requirements found in 19.34.7.11 NMAC.

B. Subject to consideration for access rights granted by the landowner, the landowner shall be paid a fee pursuant to commission approved fee schedule or as otherwise approved by the director for unique circumstances.

C. To enhance wildlife habitat and provide a more quality hunting, fishing and trapping experience on participating properties, the department may provide additional financial and technical incentives for wildlife habitat improvements undertaken by the landowner. The terms and conditions of such improvements and incentives shall be negotiated between the landowner, the department and local, state, or federal partners as appropriate.

D. Amendments of an existing open gate access agreement may only be done by mutual consent of the department and landowner, in writing.

E. False representation of a property's rightful ownership is grounds for legal action and will result in immediate termination of the access agreement.

[19.34.7.10 NMAC - N, 10-31-2005; A, 9-28-2007; A, 9-30-2010; A, 7-31-2012]

19.34.7.11 PARTICIPATION REQUIREMENTS:

A. Minimum qualifications: Lands or waters eligible for enrollment in the open gate program must provide suitable fish or wildlife habitat or access to said habitat to support the recreational uses designated through an open gate agreement, and meet, at minimum, one of the following conditions:

(1) enrollment will result in increased hunting, fishing or trapping access on private land; or

(2) enrollment will provide a meaningful access corridor to large or exceptional, inaccessible blocks of state lands, federal lands or tribal lands for hunting, fishing or trapping; or

(3) enrollment may improve regional wildlife or fisheries management goals of the department which may include, but are not limited to, supplying quality or extraordinary hunting, fishing or trapping opportunities and enhancing fish or wildlife habitat conditions.

B. Enrollment process:

(1) Persons interested in enrolling in the open gate program must submit a completed application and provide proof of ownership, or if leasing the property, a copy

of the lease with a notarized and signed statement from the landowner authorizing program participation.

(2) All applications are subject to a department evaluation to determine if the lands or waters proposed for enrollment satisfy the requirements found in 19.34.7.11 NMAC.

(3) If the lands or waters do not meet the requirements, the applicant will be notified that the application does not qualify for participation in the open gate program.

(4) If the department determines the lands or waters meet the requirements, the department and landowner may negotiate an open gate access agreement.

[19.34.7.11 NMAC - N, 9-30-2010; A, 7-31-2012]

19.34.7.12 USE OF OPEN GATE AREAS:

A. Any person accessing land enrolled in the open gate program to hunt, fish or trap must:

(1) obtain and possess a valid hunting, fishing or trappers license when required unless otherwise provided in the access agreement; and

(2) comply with enrolled property rules as described on the access agreement and as posted at access points or parking areas to include manner and method of take or other special use restrictions as posted.

B. It shall be unlawful for any person to violate any provisions posted on an open gate property.

[19.34.7.12 NMAC - N, 9-30-2010; A, 7-31-2012]

CHAPTER 35: CAPTIVE WILDLIFE USES

PART 1: [RESERVED]

PART 2: CALL PEN AND RETRIEVER TRIALS

19.35.2.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[12/30/95; Recompiled 12/31/01]

19.35.2.2 SCOPE:

People interested in training bird dogs and holding field trials or field tests for dogs.

[12/30/95; Recompiled 12/31/01]

19.35.2.3 STATUTORY AUTHORITY:

Sections 17-1-14, 17-1-26, and 17-15-4 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species.

[7/8/92, 12/30/95; Recompiled 12/31/01]

19.35.2.4 DURATION:

Permanent.

[12/30/95; Recompiled 12/31/01]

19.35.2.5 EFFECTIVE DATE:

December 30, 1995 [unless a later date is cited at the end of a section]

[12/30/95; Recompiled 12/31/01]

19.35.2.6 OBJECTIVE:

Establish the use of legally propagated game birds in training bird dogs, with or without the use of call pens, and establishing the use of game birds and raccoons in field trials and field tests.

[7/8/92, 12/30/95; Recompiled 12/31/01]

19.35.2.7 DEFINITIONS:

A. "Legally propagated game birds for use in training bird dogs" shall mean pen-raised pheasants, bobwhite quail, and chukar.

B. "Game birds for use in field trials and tests" shall mean legally propagated pen-raised pheasants, quail, chukars, and mallards.

C. "Field trial" shall mean the activity of releasing, killing and possessing game birds for the purpose of competence testing and competition in dog training.

D. "Field test" shall mean the activity of using legally propagated and possessed game birds or [raccoon held under a retention permit for dog] competence testing and competition. No wildlife shall be intentionally killed during a field test.

[7/8/92; Recompiled 12/31/01]

19.35.2.8 USE OF LEGALLY PROPAGATED GAME BIRDS IN TRAINING BIRD DOGS; CALL PENS:

A. In conjunction with bird dog training, a person may daily possess, liberate and kill up to ten (10) legally propagated game birds raised or obtained in accordance with New Mexico laws and regulations.

B. While engaged in this activity, a person must have in possession a proper propagator's receipt for the birds being used. If a person is using birds he has raised, he must have in possession a copy of his propagation permit.

C. This regulation does not address or affect activities associated with protected wildlife for purposes other than those herein described.

D. If a call pen is to be used in association with this activity, a call pen permit is required. Application must be submitted to the department, stating the name of the person and the location of the call pen. The call pen shall be permanently marked with the permittee's name, address, and permit number.

[7/8/92, 12/30/95; Recompiled 12/31/01]

19.35.2.9 USE OF GAME BIRDS AND RACCOONS IN FIELD TRIALS AND FIELD TESTS:

A. It shall be unlawful to conduct a field trial or field test without first submitting an application to the director of the department of game and fish.

B. The application and fee for a field trial or field test must be received by the department of game and fish at least 15 days prior to the start of the trial. The application shall include dates of the trial, location, source of game birds and copies of pertinent documents authorizing possession of protected wildlife to be used. A copy of the application must be maintained by the sponsor and in his/her possession during the trial/test. The application shall be considered approved unless notified in writing by the department.

C. A receipt or retention permit for all wildlife held during the trial or test shall be in the possession of the sponsor.

D. Raccoons may be released during a field test provided the application states the dates of the release and that an authorization for the release is granted by the director of the department of game and fish.

E. Posting: Notices of the field trial/field test will be posted at each corner and entrance to the field trial/test area.

F. Any person registered with the sponsor may take, hunt or pursue game birds during the trial.

G. Game birds taken at bona fide field trials may be sold or donated. The sponsor shall provide to all persons receiving such birds, an invoice stating the name of the club or organization, the date the bird or birds were taken, the species and number of birds covered by the invoice.

[7/8/92, 12/30/95; Recompiled 12/31/01]

PART 3: SHOOTING PRESERVES

19.35.3.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[12-/30/95; Recompiled 12/31/01]

19.35.3.2 SCOPE:

Landowners or managers who wish to establish, maintain, and operate a regulated shooting preserve on deeded land. License fee is designated in 19 NMAC 30.1[now 19.30.9 NMAC].

[12/30/95; Recompiled 12/31/01]

19.35.3.3 STATUTORY AUTHORITY:

Sections 17-1-14, 17-1-26, and 17-3-36 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species.

[7/8/92, 12/30/95; Recompiled 12/31/01]

19.35.3.4 DURATION:

Permanent.

[12/30/95; Recompiled 12/31/01]

19.35.3.5 EFFECTIVE DATE:

December 30, 1995 [unless a later date is cited at the end of a section]

[12/30/95; Recompiled 12/31/01]

19.35.3.6 OBJECTIVE:

To govern the establishment, maintenance and operation of regulated shooting preserves.

[7/8/92, 12/30/95; Recompiled 12/31/01]

19.35.3.7 DEFINITIONS:

A. "Legally propagated game birds" shall mean all pheasants, quail, chukars and mallards within a regulated preserve.

B. **[RESERVED]**

[7/8/92, 12/30/95; Recompiled 12/31/01]

19.35.3.8 MAXIMUM AND MINIMUM SIZE OF REGULATED SHOOTING PRESERVES:

A regulated shooting preserve shall contain not less than 30 acres and not more than the number of contiguous deeded acres owned or controlled by the applicant. If the owner, operator, or manager of a preserve desires to increase the area of the preserve, he/she shall submit to the department of game and fish a new plat or map indicating the proposed addition. The addition shall not be made without written approval from the director.

[7/8/92; Recompiled 12/31/01]

19.35.3.9 FENCES AND SIGNS:

A. Posting: The shooting preserve shall be posted by placing signs at every primary entrance to the preserve and along each boundary where the preserve adjoins public land. Signs shall be posted after the state game commission has approved the application and before the permit can be issued. Signs are to be maintained to ensure conformity with this regulation.

B. Signs: The signs posted on a licenses shooting preserve shall state the following:

"Regulated Shooting Preserve"

(Name of shooting preserve, if any)

(Shooting preserve license number)

"Hunting by Permission Only"

(Owner's name and address)

C. Fences: Where possible and reasonable, regulated shooting preserves should be fenced. Fences, if present, may be of any type and need not be constructed to confine birds.

[7/8/92; Recompiled 12/31/01]

19.35.3.10 METHOD OF HUNTING ON REGULATED SHOOTING PRESERVE:

A. Legally propagated game birds may be taken only with the following methods: shotguns fired from the shoulder; any longbow and arrow; any legally held raptor used for falconry purposes.

B. Legally propagated game birds may be taken, hunted, or pursued by the use of dogs, artificial decoys, blinds and manually or mouth-operated bird calls.

C. Legally propagated game birds may not be killed, shot at, pursued or unnecessarily harried, driven, or rallied by use of or from a motor-driven vehicle, powerboat or sailboat.

[7/8/92; Recompiled 12/31/01]

19.35.3.11 OPEN SEASONS ON REGULATED SHOOTING PRESERVES:

A. The shooting preserve season shall be in the period September 1 through March 31 of the following year. Within this period, the preserve operator may specify dates for taking legally propagated game birds.

B. Hunting hours shall be from one-half hour before sunrise to sunset.

C. Except for legally propagated game birds, all protected game found on shooting preserves may be harvested only in accordance with the regulations of the state game commission concerning seasons and bag and possession limits.

[7/8/92; Recompiled 12/31/01]

19.35.3.12 RELEASE, POSSESSION AND USE OF LEGALLY PROPAGATED GAME BIRDS:

A. Legally propagated game birds may be released on a regulated shooting preserve in any quantity. Birds may be released but not hunted prior to the shooting preserve season.

B. Possession of game birds on the shooting preserve will be accompanied by an invoice in accordance with Section 17-3-33 NMSA 1978 or will be tagged in accordance with Section 13 [now 19.35.3.13 NMAC], when appropriate.

[7/8/92 ,12/30/95; Recompiled 12/31/01]

19.35.3.13 TAGS, RECORDS, REPORTS AND INSPECTION:

A. Shooting preserve bird tags, issued by the department of game and fish, shall be numbered and issued to shooting preserve owners, operators or managers for a fee of 10 cents per tag. Tags will be affixed to each bird taken on the preserve.

B. Records and Reports:

(1) The preserve operator will keep a record of all tags used on the preserve and of the total number of birds released.

(2) Within 15 days after the close of the shooting preserve season, the preserve operator shall submit to the department a year-end report stating the tag numbers used; the number of birds, by species, released; and copies of invoices for birds purchased or received from licensed propagators.

C. Inspection: The shooting preserve, all birds (live and dead) possessed in association with the preserve, and all records associated with the preserve shall be made available to officers of the department of game and fish for administrative inspection at any reasonable time.

[7/8/92; Recompiled 12/31/01]

PART 4: [RESERVED]

PART 5: WILDLIFE REHABILITATION PERMITS

19.35.5.1 ISSUING AUTHORITY:

New Mexico Department of Game and Fish.

[10/19/94; Recompiled 12/31/01]

19.35.5.2 SCOPE:

People involved with the rehabilitation of wildlife.

[10/19/94; Recompiled 12/31/01]

19.35.5.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the NM state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected mammal, birds and fish.

[10/19/94; Recompiled 12/31/01]

19.35.5.4 DURATION:

Permanent.

[10/19/94; Recompiled 12/31/01]

19.35.5.5 EFFECTIVE DATE:

September 15, 1994 [unless a later date is cited at the end of a section]

[10/19/94; Recompiled 12/31/01]

19.35.5.6 OBJECTIVE:

Establish and implement a system for the issuance and use of permits for the rehabilitation of sick, injured, orphaned or otherwise incapacitated wildlife for return to the wild or other authorized disposition in New Mexico.

[10/19/94; Recompiled 12/31/01]

19.35.5.7 DEFINITIONS:

A. "Agent": A person authorized to assist a permittee in performing rehabilitation functions, including transport or rehabilitation of wildlife, provided there is an employment or direct supervisory relationship between the permittee and the agent.

B. "Apprentice": A person in training who assists in all rehabilitation functions including, but not limited to, maintenance, transport and record keeping under the direct supervision of the permittee or co-permittee.

C. "Captive releases": Release of wildlife to an enclosed area from which the animal is not likely to be able to leave at will.

D. "Co-Permittee (sub-permittee)": A person holding all rights and responsibilities under a permit with another person.

E. "Department": The New Mexico department of game and fish.

F. "Director": The chief administrator for the department of game and fish.

G. "Endangered species": Any species listed or described by the department pursuant to the New Mexico department of game and fish statutes or regulations.

H. "Holding": Retaining in captivity.

I. "Human imprinting or human bonding": An abnormal dependency or fixation upon humans as parent substitutes or as companions resulting from too much association with humans at an early age.

J. "Migratory birds": A bird listed under or pursuant to the Migratory Bird Treaty Act (16 United States Code 703-712).

K. "Non-releasable animal": An injured animal, which after rehabilitation is determined to be unlikely to survive in the wild if released.

L. "Permit": The document issued under this regulation for a person(s) to conduct activities as authorized by the department of game and fish.

M. "Permitted rehabilitator": The person who holds a valid current permit from any state and a federal permit.

N. "Permittee responsibility": The responsibility that a permit holder or co-permit holder has to direct the actions of an individual under his or her control, and for which that supervisor accepted legal responsibility.

O. "Protected wildlife": A species, the possession or taking of which is controlled, regulated or prohibited by state or federal law or regulation. Specifically excluded from this definition are rock doves, European starlings, house sparrows, and domestic animals occurring in the wild.

P. "Rehabilitation": The temporary caring for injured, orphaned, sick or otherwise incapacitated wildlife until such animals can be released to the wild.

Q. "Release to the wild": Release of wildlife to an area where it is capable of leaving at will.

R. "Taking": The act of hooking, netting, snaring, trapping, pursuing, shooting, killing or capturing by any means or device and includes the attempt to take by the use of any method.

S. "Transportation": The transfer of captive protected wildlife by an individual(s) to a permit holder.

[10/19/94; Recompiled 12/31/01]

19.35.5.8 APPLICATIONS AND PERMITS:

A. Applications shall be filed on forms supplied by the department.

B. Applications shall contain a verified or sworn statement by the applicant attesting to the truth of the facts stated in the application.

C. Applications shall be made in the name of an adult person (18 years and older).

D. Permits shall be issued under the authority of the director or his/her designee.

E. Applications for permits, renewals and amendments shall provide the following information:

(1) Personal information which allows the identification of the applicant including full name, date of birth, home address and facility address;

(2) Each new application shall be supported by references from two verifiable, acknowledged, and permitted animal rehabilitation authorities who have known the applicant for at least 2 years and who attest to the applicant's ability to handle and care for protected wildlife in a humane and effective manner;

(3) A verified or sworn statement attesting to the truth of the facts stated in the application;

(4) Any other information determined by the department to be necessary to review the application.

F. Permits may not be issued until the applicant's facilities have satisfactorily passed an inspection conducted by a representative of the director.

G. Any person holding a permit which authorizes holding of live protected wildlife shall provide for appropriate humanitarian care.

H. Permits for the taking or holding of migratory bird species shall not be valid unless the permit holder also simultaneously applies for, obtains and maintains a valid federal permit.

I. Permits will only be issued to applicants that have demonstrated the ability and intent to correctly identify, properly record and humanely and knowledgeably care for and treat wildlife for the purpose of returning it to the wild or properly disposing of non-releasable animals. The applicant must demonstrate formal education, training and/or actual experience in wildlife rehabilitation for which permit authority is sought. A written or practical exam will be given to applicants in addition to requirements for references as one method of determining abilities.

J. All protected wildlife, their offspring and their parts taken or held under the authority of a permit remain the property of the state of New Mexico. The department retains the authority to seize or direct the disposition of such specimens.

K. Protected wildlife held under the authority of a rehabilitation permit may not be sold, bartered or exchanged. They may only be disposed of or released as prescribed by permit provision. Disposition or release shall be reported to the department in a manner prescribed by this regulation or by permit.

L. An initial permit shall be issued for one (1) year. Renewal of permit may be issued for any period of time not exceeding three (3) years from date of issuance.

M. Permits will be authorized to handle specific classes of wild animals for rehabilitation purposes. Handling any class of wildlife not authorized by the permit for longer than 48 hours while searching for appropriate placement is a violation.

[10/19/94; Recompiled 12/31/01]

19.35.5.9 PERMIT RENEWALS:

A. Permits shall be renewed in accordance with this regulation subject to its requirements unless issued as non-renewable permits.

B. Renewal applications shall be filed in writing on an application form provided by the department.

C. All terms of the permit, including the filing of complete annual reports, must be fully complied with before a renewal will be considered.

D. Applications for rehabilitating migratory birds shall contain a current corresponding federal permit number.

E. Denial and/or revocation of a permit may occur if the permit holder fails to meet any of the requirements for holding the permit.

F. Applications for renewal will not be considered while unresolved criminal charges are pending for alleged violation of state or federal wildlife laws or animal cruelty laws.

[10/19/94; Recompiled 12/31/01]

19.35.5.10 VIOLATIONS AND ENFORCEMENT:

A. Any violation of the New Mexico department of game and fish statutes, rules and regulations of the commission, or any provision in the permit, including amendments, may result in suspension, probation or revocation of a permit in addition to any applicable civil, criminal or administrative penalties.

B. Any misrepresentation of material fact in an application or annual report is a violation of this regulation.

[10/19/94; Recompiled 12/31/01]

19.35.5.11 HEARINGS:

A. An opportunity for hearing may be provided to any applicant or permit holder for any denial of a permit, probationary terms of a permit, denial of a permit renewal, or issuance of a permit where the terms of issuance are materially different from those requested by the applicant and adversely affect the applicant's interests.

B. Such procedures shall be consistent with state game commission Regulation 677.

[10/19/94; Recompiled 12/31/01]

19.35.5.12 PERMIT REQUIREMENTS:

A. A permit holder shall carry out all rehabilitation in a manner consistent with the goal of returning wildlife to its native range and habitat and in conformity with its seasonal occurrence in New Mexico.

B. A permit holder may designate an agent to transport wildlife associated with rehabilitation efforts.

C. A permit holder shall carry out all rehabilitation in a humane manner and plan activities to return the injured animals to a condition which will allow them to survive in the wild.

D. Apprentices shall handle wildlife only under supervision of the permittee or co-permittee.

E. A permit holder shall conduct rehabilitation in an environment which minimizes human contact and prevents human and domestic animal imprinting.

F. Animals in rehabilitation shall not be used for display or public programs. One way windows or video observation is permissible.

G. Non-releasable protected wildlife may only be retained for approved fostering or socialization purposes incident to wildlife rehabilitation or transferred to other permitted rehabilitators, zoo permit holders, licensed falconers and licensed raptor breeders or educational permit holders in accordance with requirements of this regulation and only after a written request for such retention or transfer has been made to and approved in writing by the department.

H. Permittee's facilities shall be subject to unannounced inspections by authorized representatives of the director at reasonable times.

I. Permittees shall maintain detailed and complete records on each animal received under the permit.

J. Releases of Rehabilitated Wildlife:

(1) A permit holder shall not release wildlife in such a manner or at such a location so that the released animals are likely to become a nuisance or threat to humans or their property.

(2) Wildlife releases which are made to fenced or enclosed areas without a reasonable expectation that the individuals will be able to leave at will may be considered as captive releases.

(3) Captive releases may subject the landowner or person in control of the premises to additional licensing requirements for holding protected wildlife in captivity or stocking protected wildlife.

(4) Protected wildlife shall be released only to place and habitat by seasonal occurrence appropriate for the species.

(5) Terrestrial animals shall only be released in the county where they were acquired or found, or in an adjacent county unless specific written permission for release elsewhere is granted by the department. Release locations should consider gene pools and population dynamics including availability of appropriate food base. Release locations shall be included in annual report.

(6) Protected wildlife may not be imported from another state or another country without meeting importation permit provision allowing such activity.

(7) Rehabilitated wildlife shall be released into species appropriate habitat at a suitable time (with considerations for the season, weather conditions and time of day) which shall enhance the animal's continued survival.

K. The department may make special conditions in individual permits which are consistent with this regulation and which are necessary to carry out the intent of this regulation or New Mexico statutes.

L. A copy of the approved permit or written authorization by the permittee shall accompany any shipment or transport of wildlife and shall be available for inspection at each of the premises authorized by the permit.

M. Wildlife shall not be possessed for longer than 180 days. Any request to hold wildlife in excess of this period shall be submitted to the department in writing.

[10/19/94; Recompiled 12/31/01]

19.35.5.13 RECORD KEEPING REQUIREMENTS:

A. Permit holders shall file annual reports by January 30 of each permit year unless permission is granted for a later filing.

B. Annual reports shall be completed and submitted on a form provided by or approved by the department. Rehabilitation records on each animal shall be maintained concurrent with its treatment and should include unique identification (case number), species name, sex (if known), place and date of origin, source (person or agency), probable reason for incapacitation, condition on receipt, treatment and disposition (date and location). All records shall be available for department review upon request.

[10/19/94; Recompiled 12/31/01]

19.35.5.14 GENERAL FACILITIES STANDARDS:

A. Rehabilitation permit holders shall comply with the applicable facilities standards of this regulation in addition to any specific requirements placed in their permits.

B. Permit holders shall provide confinement areas and cages for rehabilitation purposes appropriately sized, constructed and maintained so as to provide a humane and safe environment for animals held under the authority of a permit issued pursuant to this regulation and should conform to accepted national standards.

C. The department may specify individual caging requirements in each permit on a case-by-case basis depending upon the species, number, size, type and length of care required. In imposing individual standards, the department may be guided by similar requirements imposed by state and federal agencies regulating comparable activities.

E. Treatment records shall be maintained on currently held wildlife at the facility.

[10/19/94; Recompiled 12/31/01]

PART 6: AUTHORIZED USES OF WILDLIFE FOR EDUCATION, LAW ENFORCEMENT, RESEARCH AND SCIENTIFIC PURPOSES

19.35.6.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.35.6.1 NMAC - Rp, 19 NMAC 35.6.1 & 19 NMAC 36.2.1, 12/30/2013]

19.35.6.2 SCOPE:

The department of game and fish and persons seeking authorization for the taking of protected wildlife for educational, law enforcement, scientific or research purposes.

[19.35.6.2 NMAC - Rp, 19 NMAC 35.6.2 & 19 NMAC 36.2.2, 12/30/2013]

19.35.6.3 STATUTORY AUTHORITY:

Sections 17-1-14, 17-1-26, NMSA 1978 and 17-2-37 through 17-2-46, and 17-3-1, NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17, NMSA 1978 and all other acts pertaining to protected species.

[19.35.6.3 NMAC - Rp, 19 NMAC 35.6.3 & 19 NMAC 36.2.3, 12/30/2013]

19.35.6.4 DURATION:

Permanent.

[19.35.6.4 NMAC - Rp, 19 NMAC 35.6.4 & 19 NMAC 36.2.4, 12/30/2013]

19.35.6.5 EFFECTIVE DATE:

December 30, 2013, unless a later date is cited at the end of a section.

[19.35.6.5 NMAC - Rp, 19 NMAC 35.6.5 & 19 NMAC 36.2.5, 12/30/2013]

19.35.6.6 OBJECTIVE:

To provide consistent criteria for application and permit issuance for the take, possession and use of protected wildlife for educational, law enforcement, research or scientific purposes.

[19.35.6.6 NMAC - Rp, 19 NMAC 35.6.6 & 19 NMAC 36.2.6, 12/30/2013]

19.35.6.7 DEFINITIONS:

A. "Applicant": A person who has submitted an application for a permit pursuant to this rule.

B. "Apprentice": A person who is over the age of 14 and is in training under the direct supervision of a permittee or sub-permittee, who assists in the use of wildlife for scientific and educational purposes.

C. "Carnivore": Any animal within the order carnivora

D. "Department": The New Mexico department of game and fish.

E. "Director": Shall mean the director of the department of game and fish.

F. "Designated cooperator": Shall mean a person designated in writing by the director of the department of game and fish, as an official cooperator of the agency.

G. "Educational purposes": Shall mean the possession or take of protected wildlife as specimens for educational programs and instructional display as approved by the department.

H. "Permit": A document issued pursuant to this rule that authorizes a person to conduct specific activities involving protected wildlife.

I. "Protected wildlife": Shall mean those taxonomic groups listed in Chapter 17, NMSA 1978, including any species that are listed as either state or federally threatened or endangered.

J. "Scientific purposes": Shall mean the possession or take of protected wildlife for conducting research or monitoring for management purposes, as approved by the department.

K. "Sub-permittee": Shall mean a person authorized by a permit to conduct specified activities in the absence of a permit holder.

L. "Take": Shall mean the act of killing, capturing, pursuing, harassing, salvaging, retaining, or sacrificing protected wildlife by any means or device including attempting to take by the use of any method.

[19.35.6.7 NMAC - Rp, 19 NMAC 35.6.7 & 19 NMAC 36.2.7, 12/30/2013; A, 12/15/2014]

19.35.6.8 APPLICATION REQUIREMENTS:

A. The following requirements must be met for an application to be considered:

(1) A completed application form and the non-refundable application fee must be submitted to the department.

(2) Applicant must be 18 years of age or older and provide their full name, date of birth, home address and facility address; unless they are an apprentice who must be at least 14 years of age.

(3) Applicant must provide two references able to verify the applicant's ability to conduct activities relevant to the species and purpose requested.

(4) Application must include a containment or confinement plan describing where and how permitted species will be maintained, if applicable.

(5) Application must include copies of all applicable municipal, state or federal permits.

(6) Supplemental information must be supplied as requested by the department.

(7) Each application must include the applicant's signature as well as signatures of all sub-permittees being requested on the permit.

B. Additional requirements for educational use applications:

(1) Applicant must provide verifiable experience of at least 240 hours in handling, caring for and training live non-releasable wildlife of the same or similar species as those identified in the application. If this requirement cannot be met, an apprenticeship with a permitted individual or approved organization is required.

(2) Letters must be supplied from at least five separate and legitimate organizations or entities requesting wildlife related educational programs.

(3) Wildlife proposed for educational use must be obtained from a department approved source.

(4) Applicant must provide a detailed educational class or program curriculum or lesson plan which is subject to department approval prior to permit issuance.

C. Additional requirements for scientific use applications:

(1) Applicant must identify the specific wildlife being requested and provide details for disposition.

(2) Applicant must provide detailed justification for all activities, methods and locations.

(3) Applicant must provide requested take amounts, locations and specific take time frame.

(4) Applicant must provide detailed explanation of the scientific benefits to the species and the state of New Mexico. Scientific benefits will be subject to department review and approval.

(5) Applicant must provide evidence of education or experience supporting qualifications to conduct wildlife related research or monitoring activities.

[19.35.6.8 NMAC - Rp, 19 NMAC 35.6.8 & 19 NMAC 36.2.8, 12/30/2013]

19.35.6.9 PERMIT ISSUANCE:

A. Permits may be issued or denied under the authority of the director or his/her designee.

B. Authorizations and permits shall only be issued to individuals and not to parties or organizations.

C. Only those individuals that the applicant intends to utilize to take or possess protected wildlife when outside the immediate oversight and supervision of the permittee will be listed as sub-permittees.

D. A permit shall not be issued to applicants who cannot demonstrate sufficient wildlife handling qualifications and containment and confinement facilities to ensure the humane care of captive wildlife.

E. Applicant must obtain a permit prior to conducting requested activities.

F. Upon issuance of a permit, containment and confinement facilities shall be subject to random inspection by department employees.

G. Initial permits shall be issued for one year. Permit renewals may be approved for up to three years subject to director approval.

H. Each permit shall specify the number and species of protected wildlife the permittee shall be authorized to collect, possess, or handle for scientific or educational purposes.

I. Applications for permits or permit renewals shall not be considered if the applicant is subject to pending criminal charges or violations of any municipal, state or federal law relating to wildlife or other animal violations.

J. The state game commission must review any permit application for the possession or use of any carnivore that is held, possessed or released on private property for the purpose of recovery, reintroduction, conditioning, establishment or reestablishment in New Mexico. The director shall only issue a department permit in

accordance with commission direction following their review of an application submitted under this section of rule.

[19.35.6.9 NMAC - Rp, 19.35.6.8 NMAC, 12/30/2013; A, 12/15/2014]

19.35.6.10 PERMIT PROVISIONS:

A. General permit provisions:

(1) All protected wildlife, their offspring, and any parts held under the authority of a permit shall remain property of the state of New Mexico. The director shall have the authority to require that any permitted wildlife be returned to the department or to direct the disposition of such wildlife.

(2) A permit issued pursuant to this rule does not authorize propagation of wildlife unless specifically allowed in writing by the director.

(3) Protected wildlife held under the authority of a permit may not be sold, bartered, or exchanged unless specially allowed in writing by the director.

(4) Protected wildlife may not be disposed of, released as prescribed by permit provisions, or transferred to another permittee, unless specially allowed in writing by the director.

(5) Protected wildlife may not be imported from another state or another country without first obtaining an importation permit from the department.

(6) The director may apply specific provisions on individual permits to carry out the intent of this rule and applicable statutes.

(7) A copy of a valid permit must be in the possession of permittees and sub-permittees at all times when conducting permitted activities and must be available upon request by department officials.

(8) A permit holder shall carry out all educational activities in a humane manner.

B. Amendment and renewal requirements:

(1) Amendments to permits must be requested in writing, include justification, and be signed by permittee and any proposed additional sub-permittees;

(2) Payment of a fee approved by the director shall be required for each permit amendment.

(3) Annual reports must be filed and received by the department prior to renewal or reissuance of any permit.

(4) Permits must be amended prior to any changes in activities, including the addition of sub-permittees, type and numbers of wildlife to be collected, and collection locations and time frames.

C. Education permit requirements:

(1) Only a permit holder shall be permitted to possess wildlife specimens and no sharing of permitted wildlife shall be allowed between other permit holders.

(2) A permit holder must conduct a minimum of 12 educational programs per year or have the permitted animals available on static display to the public a minimum of 100 days per year.

(3) A permit holder shall carry out all educational activities in a manner which will benefit the species represented and wildlife in general.

(4) A permit holder shall not allow public contact with permitted wildlife. Applicants may request a waiver to this restriction. Waiver requests must be submitted to the department in writing and include justification for the request, and a signed waiver of liability and indemnification shall be required from the permit holder.

(5) All protected wildlife displayed must be controlled at all times and be presented in a professional manner.

(6) The loss or escape of any permitted wildlife shall be reported to the department within five business days.

(7) Health records shall be maintained at the housing facility approved for the permitted wildlife.

D. Scientific permit provisions:

(1) Specimens may not be donated, sold, exchanged, or otherwise processed except as allowed by permit provisions and in accordance with municipal, state or federal law.

(2) The disposition of progeny of wildlife taken or possessed shall be defined by permit provisions.

[19.35.6.10 NMAC - Rp, 19 NMAC 35.6.12 & 19 NMAC 36.2.8 & 10, 12/30/2013]

19.35.6.11 ANNUAL REPORTS:

A. A permit holder must submit an annual report by the deadline specified by the director.

B. Annual reports must be submitted, received, and approved by the department prior to renewal or reissuance of any permit.

C. The annual report shall include the disposition of all wildlife taken pursuant to the permit and any additional information required by the permit.

D. Annual reports shall be completed in a format as determined by the department. All data submitted shall become property of the department.

E. Educational permit annual reports shall include:

- (1)** dates of all presentations;
- (2)** names of organizations and schools at which presentations were given;
- (3)** number and age group of attendees;
- (4)** subject matter covered;
- (5)** specific wildlife or wildlife parts used in each program; and
- (6)** number of persons viewing wildlife on permanent display.

[19.35.6.11 NMAC - Rp, 19 NMAC 35.6.13 & 19 NMAC 36.2.11, 12/30/2013]

19.35.6.12 FACILITY STANDARDS:

A. Permit holders shall adhere to department guidelines for reasonable and humane care of captive wildlife. Requests for variations on facility guidelines must be submitted to the department in writing and include justification. All facility variation requests are subject to department review and approval prior to making any facility changes.

B. Permit holders must comply with all provisions, guidelines and specific requirements listed on their permit.

C. Permitted wildlife must be housed separately from human living areas and domestic pets.

D. Permit holders shall utilize travel containers that are appropriately sized, constructed, and maintained to ensure a humane and safe environment for wildlife in transit.

E. All permittee and sub-permittee facilities shall be subject to random inspections by department personnel.

[19.35.6.12 NMAC - Rp, 19.35.6.14 NMAC, 12/30/2013]

19.35.6.13 DIRECTOR'S AUTHORITY:

A. The director shall have the authority to:

(1) establish and approve any forms, applications and documents necessary to carry out the provisions of this rule;

(2) establish and approve all notice and posting provisions for public displays of wildlife;

(3) impose corrective measures to ensure the safety and welfare of humans and wildlife;

(4) require an applicant to purchase the appropriate hunting, fishing or trapping license when applicable;

(5) establish collection limits for protected wildlife;

(6) deny any application if it is determined that the applicant has provided false or incomplete information;

(7) deny any application that conflicts with current conservation measures, negatively affects local or regional species numbers, or is contrary to angling, hunting or trapping objectives;

(8) deny any application that does not represent a valid scientific or educational benefit; and

(9) declare any applicant or permittee who fails to comply with all of the application requirements, director's conditions, permit provisions, or rule requirements as non-compliant; upon a declaration of non-compliance, the director may deny any subsequent application and requests for amendments until all permit violations are corrected and the appropriate certificate of compliance is issued and fees are paid in full.

B. Certificate of compliance fee: The director shall determine the appropriate certificate of compliance fee per violation, not to exceed \$500.00 based on the following criteria:

(1) department expenses including staff time and travel costs associated with inspection and compliance monitoring;

- (2) department office expenses including mailing, shipping, and certificate issuance;
- (3) animal care, treatment, housing and feeding; and
- (4) other miscellaneous expenses.

[19.35.6.13 NMAC - N, 12/30/2013]

19.35.6.14 VIOLATIONS AND ENFORCEMENT:

A. Any violation of state statutes, rules, or permit provisions, including amendments, may result in cooperative compliance or denial or of a permit in addition to any applicable civil, criminal or administrative remedies and penalties.

B. The signature of an applicant, permittee, or sub-permittee on any application, annual report, permit, or any other department document, shall obligate the signatory to adhere to all applicable statutes, rules, and permit provisions. Violations of this rule shall include but not be limited to:

- (1) providing false or fraudulent information on any application or annual report;
- (2) late submission of an annual report;
- (3) exceeding authorized take limits of wildlife;
- (4) take of protected wildlife in an unauthorized locality or manner;
- (5) take of protected wildlife during an unauthorized time frame; or
- (6) take or possession of any wildlife not authorized by the permit.

C. The director may declare any permittee who fails to comply with all requirements or provisions as ineligible for future permits until all violations are corrected and the appropriate certificate of compliance fees are paid in full.

(1) The director may impose additional corrective measures in those instances where violations of this provision have been identified.

(2) The director may deny any subsequent applications or amendments submitted by a permittee or sub-permittee that has failed to implement corrective measures or has committed repeated violations.

[19.35.6.14 NMAC - Rp, 19 NMAC 35.6.10 & 19 NMAC 36.2.12, 12/30/2013]

19.35.6.15 APPEAL PROCESS:

A permit applicant may appeal a denial by the director in accordance with the following procedures:

A. Commission appeal:

(1) The applicant must submit, by certified mail, a written appeal to the chairman of the state game commission within 20 days of denial by the director.

(2) The written appeal must include the reason for the objection.

B. Commission decision: The commission may reverse the director's decision if:

(1) the commission determines that the decision of the director was arbitrary or capricious;

(2) the decision of the director was not based on law or regulation; or

(3) the appellant provides additional data or evidence that contradicts the data or evidence used by the department to deny the permit.

(4) The decision of the commission shall be final.

C. Schedule of appeal: Appeals filed with the commission will be heard at the next scheduled commission meeting subject to agenda item availability and related time constraints.

[19.35.6.15 NMAC - Rp, 19 NMAC 35.6.11, 12/30/2013]

19.35.6.16 EXEMPTIONS:

The following are exempt from applying for or holding permits for conducting activities under this rule:

A. employees of the New Mexico department of game and fish and other government agencies acting in the course of their official duties as determined by the director;

B. persons that salvage or aid in salvaging dead, injured or otherwise incapacitated wildlife at the direction of the department or others authorized for such possession; and

C. designated cooperators and department contractors provided the activities are consistent with their contractual or cooperative duties.

[19.35.6.16 NMAC - Rp, 19 NMAC 36.2.9, 12/30/2013]

19.35.6.17 COMPLIANCE AND ENFORCEMENT ALLOWANCE:

A law enforcement officer operating in a director approved covert operation may take protected wildlife pursuant to a license issued to a covert identity or pursuant to a permit or written authorization issued by the director or his designee.

[19.35.6.17 NMAC - N, 12/30/2013]

PART 7: IMPORTATION OF LIVE NON-DOMESTIC ANIMALS, BIRDS AND FISH

19.35.7.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.35.7.1 NMAC - Rp, 19.35.7.1 NMAC, 1-31-14]

19.35.7.2 SCOPE:

Persons who desire to bring wildlife species into the state of New Mexico. It may include the general public, pet importers, holders of Class "A" park licenses, department permittees and others.

[19.35.7.2 NMAC - Rp, 19.35.7.2 NMAC, 1/31/2014; A, 2/9/2021]

19.35.7.3 STATUTORY AUTHORITY:

17-1-14, 17-1-26 and 17-3-32.

[19.35.7.3 NMAC - Rp, 19.35.7.3 NMAC, 1-31-14]

19.35.7.4 DURATION:

Permanent.

[19.35.7.4 NMAC - Rp, 19.35.7.4 NMAC, 1-31-14]

19.35.7.5 EFFECTIVE DATE:

January 31, 2014, unless a later date is cited at the end of a section.

[19.35.7.5 NMAC - Rp, 19.35.7.5 NMAC, 1-31-14]

19.35.7.6 OBJECTIVE:

To provide consistent criteria for the importation of live non-domesticated animals into New Mexico and to protect native wildlife against the introduction of contagious or infectious diseases, undesirable species and address human health and safety issues.

19.35.7.7 DEFINITIONS:

A. "Accredited laboratory" A lab recognized for CWD testing by the New Mexico department of game and fish.

B. "Animal health emergency" A situation in which people or animals are at risk of exposure to infectious or contagious diseases as determined by the director.

C. "APHIS" Animal and plant health inspection service, United States department of agriculture.

D. "Applicant" Any person or entity that causes or submits a department application for importation.

E. "Certificate of compliance" An official department document declaring an applicant's ability to resume importation application eligibility.

F. "Certified Herd" A herd that has attained certified status as defined in the current USDA chronic wasting disease program standards.

G. "Closed herd sales" Sales of animals from a herd directly to the buyer in a manner that allows the buyer to transport the animals from the producer's premises directly to the buyer's premises without contact with animals from another herd, and without contact with other pens or transport facilities used by any other herd.

H. "Chronic Wasting Disease" or "CWD" is a transmissible spongiform encephalopathy of cervids.

I. "CWD-Exposed Animal" is an animal that is part of a CWD-positive herd, or that has been exposed to a CWD-positive animal or contaminated premises within the previous 60 months.

J. "CWD-Exposed herd" is a herd in which a CWD-positive animal resided within 60 months prior to that animal's diagnosis as CWD-positive.

K. "CWD-Positive herd" is a herd in which a CWD-positive animal resided at the time it was diagnosed and which has not been released from quarantine.

L. "CWD-Suspect animal" is an animal for which unofficial CWD test results, laboratory evidence, or clinical signs suggest a diagnosis of CWD, but for which laboratory results have been inconclusive or not yet conducted.

M. "CWD-Suspect herd" is a herd for which laboratory evidence or clinical signs suggest a diagnosis of CWD, but for which laboratory results have been inconclusive or not yet conducted.

N. "CWD-Trace-Back herd" is an exposed herd in which a CWD-positive animal has resided during the 60 months prior to the diagnosis.

O. "CWD-Trace-Forward herd" is a CWD-exposed herd that has received CWD-exposed animals from a CWD-positive herd during the 60 months prior to the diagnosis of CWD in the CWD-positive herd.

P. "Dangerous animal" An animal that due to its nature, biology or its behavior, including predatory or venomous animals, that may present a risk to the health, safety or well-being of the public or other animals including native wildlife, domestic pets or livestock.

Q. "Department" Shall mean New Mexico department of game and fish.

R. "Director" Shall mean the director of the department of game and fish.

S. "Importer" Any person or entity that causes an animal to be brought, transported or shipped into New Mexico with the exception of common mail carriers and delivery service providers during the course of their regular duties.

T. "Invasive animal" Any non-native animal, except protected wildlife, including any aquatic invasive species (AIS), whose introduction into New Mexico may cause or is likely to cause harm to the economy, environment, protected wildlife, human health or safety.

U. "Isolation" A period of time imported animals are separated and observed. The observation pen must have fences at least eight feet high. The isolation pen must prevent nose-to-nose contact with all wild ungulates during the observation period.

V. "Mixed herd" A herd comprised of animals from different sources and held to allow contact or commingling.

W. "Mixed herd sales" Sales from sale barns, auctions, private arrangements, or other facilities that allow joint penning or adjacent penning of animals from more than one closed herd, or otherwise facilitate or permit commingling, direct contact, or holding, boarding, or sharing the premises by more than one herd simultaneous or successively in time.

X. "Non-domesticated animal" For the purposes of this rule, any animal species that is wild by nature not listed as semi-domesticated or protected under chapter 17 NMSA, 1978.

Y. "NPIP" National poultry improvement program.

Z. "Official Animal Identification" A device or means of animal identification approved by USDA to uniquely identify individual animals nationally. The animal identification must include a nationally unique identification number that adheres to one of the following:

- (1) national uniform ear tagging system;
- (2) animal identification number (AIN);
- (3) premises-based number system using a premises identification number (PIN) in conjunction with a livestock production numbering system; or
- (4) any other numbering system approved by USDA for the identification of animals in commerce.

AA. "Protected wildlife" Shall mean those taxonomic groups of mammals, birds and fish listed in Chapter 17 NMSA, 1978, including any species that are listed as either state or federally threatened or endangered.

BB. "Release from captivity" For the purpose of this rule, the act of removing from confinement, letting go, liberating or setting free any imported, live non-domesticated animal into the wild.

CC. "Semi-domesticated animal" For the purpose of this rule, the director may designate an animal species as semi-domesticated in those instances where individual members of such species are commonly tamed, raised, bred or sold in captivity.

DD. "Species importation list" A list containing protected, non-game and semi-domesticated animal species established, maintained, updated or amended by the director of the New Mexico department of game and fish. The species importation list may contain importation requirements, restrictions and conditions for each animal species listed.

EE. "Qualified expert" Only a person officially designated by the director to import a specific non-domesticated animal.

FF. "Undesirable animal" An animal that may have adverse impacts to health, management or safety.

GG. "USDA" United States department of agriculture.

[19.35.7.7 NMAC - Rp, 19.35.7.7 NMAC, 1/31/2014; A, 12/15/2014; A, 2/9/2021]

19.35.7.8 IMPORTATION OF LIVE NON-DOMESTICATED ANIMALS:

It shall be unlawful to import any live non-domesticated animal into New Mexico without first obtaining appropriate permit(s) issued by the director except those animals identified within the species importation list group I. Permits will only be issued when all application requirements and provisions have been met. Failure to adhere to or violation of permit provisions may result in the applicant/importer becoming ineligible for importation(s). The pendency or determination of any administrative action or the pendency or determination of a criminal prosecution for the same is not a bar to the other.

[19.35.7.8 NMAC – Rp, 19.35.7.8 NMAC, 1/31/2014; A, 12/15/2014; A, 2/9/2021]

19.35.7.9 [RESERVED]

19.35.7.10 DIRECTOR'S AUTHORITY:

A. Species importation list: The director of the New Mexico department of game and fish shall develop a species importation list. The species importation list shall be established, maintained, updated or amended by the director as species information and concerns become available and are identified. The species importation list shall be grouped into the following minimum importation "groups" based on the following criteria.

(1) Species importation list group I are designated semi-domesticated animals and do not require an importation permit.

(2) Species importation list group II may be for live non-domesticated animals that are not known to be either invasive or dangerous and do not present a known risk to the health, safety or well-being of the public, domestic livestock or to native wildlife and their habitats.

(3) Species importation list group III may be for live non-domesticated animals that present minimal or manageable concerns that will require specific provisions that must be met prior to issuing an importation permit to address health, safety or well-being of the public, domestic livestock or to native wildlife and their habitats.

(4) Species importation list group IV may be for live non-domesticated animals that are considered dangerous, invasive, undesirable, state or federal listed threatened, endangered, a furbearer or any other species of concern as identified by the director. The importation of these species are prohibited for the general public but may be allowed for, scientific study, department approved restoration and recovery plans, zoological display, temporary events/entertainment, use as service animal or by a qualified expert.

(5) Any species of live non-domesticated animal not currently on the species importation list will be designated group IV until such time as another determination is made by the director.

B. Non-domesticated animal importation: The director may, in times of animal health emergency, suspend all importation activities or suspend importation of selected taxa for indefinite periods of time to protect wild and domestic animals from infectious disease epidemics and to protect the people of New Mexico from zoonoses.

C. Non-domesticated animal intrastate movement: the director may suspend intrastate movement in an animal health emergency.

D. Eligibility requirements for importation (cooperative compliance): The director may declare any applicant or importer who fails to comply with any importation conditions or provisions as ineligible for future importation permits or ability to supply animals into New Mexico until all permit violations are corrected and the appropriate certificate of compliance fees are paid in full.

(1) The director may require an applicant to obtain a certificate of compliance prior to becoming eligible to import any live non-domesticated animals and may impose additional corrective measures in those instances where violations of this provision have been identified.

(2) The director may impose a cease-and-desist order that makes an applicant ineligible to apply for an importation permit for up to a year in those instances where corrective measures have not been implemented or repeated violations have occurred.

E. Certificate of compliance fee: The director shall determine the appropriate certificate of compliance fee per violation not to exceed \$500.00 based on the following criteria:

(1) department expenses including manpower, travel, inspection and compliance monitoring;

(2) department office expenses including mailing, shipping, certificate issuance;

(3) animal care, treatment, housing and feeding;

(4) other miscellaneous expenses.

F. Qualified expert: the director shall determine the process and the requirements for a person to be designated a qualified expert for each applicable species.

(1) The director may require an applicant to provide specific qualifications including, but not limited to the following: professional references, experience, training, education and facility specifications.

(2) The determination to approve or deny a qualified expert designation by the director is final and is not subject to appeal.

G. Application notices and documents.

(1) The director shall determine required forms, applications and documents to carry out the provisions of this rule.

(2) The director shall determine noticing and posting provisions to carry out the provisions of this rule.

(3) The director shall determine the permit and application conditions and requirements to carry out the provisions of this rule.

H. The director shall determine the process and requirements for re-entry into the state.

I. The director shall determine the process for expediting applications and permits including an additional application fee of \$25.00.

[19.35.7.10 NMAC - Rp, 19.35.7.10 NMAC, 1-31-14]

19.35.7.11 [RESERVED]

19.35.7.12 APPLICATION FOR IMPORTATION:

A. Any applicant requesting an importation permit for non-domesticated animals must submit the following information with the application:

(1) a containment or confinement plan indicating where and how the species will be maintained;

(2) a current and valid certificate from an accredited veterinarian certifying that each animal or rearing facility of origin has been inspected and is in good general health, disease free or that each animal or rearing facility of origin tests disease free for any specific disease(s) following the testing requirements and procedures as identified by the department during the application process, except;

(a) the department may approve an animal supplier that is currently enrolled in an accredited animal breeding program or facility health monitoring standards such as NPIP, AZA, or other government sanctioned program;

(b) the department may approve detailed and verifiable facility of origin health monitoring plans and records to be submitted by an organization(s) in lieu of a health or rearing facility inspection certificate from an accredited veterinarian;

(3) proof from the county and city into which the animal will be imported and held that possession of the animal is allowed;

(4) proof that all necessary federal permits have been obtained;

(5) proof that the requested species does not possess or have the immediate potential to carry infectious or contagious diseases; and

(6) confirmation by the applicant or person in authority representing the applicant agreeing to any conditions and provisions listed on the respective permit; and

(7) any importing person or entity must notify the department of game and fish within 24 hours of any disease indications or symptoms that manifest themselves among the imported animals.

B. Additional conditions for the importation of a dangerous animal; applicant shall agree to the following provisions before an importation permit is approved:

(1) enter into a department approved written agreement releasing the department from liability;

(2) agree to meet all department approved posted warning requirements;

(3) agree to provide a department approved written warning to any person receiving such animal;

(4) government agencies or other entities as designated by the director may be exempted from the liability or warning requirements in this subsection.

C. All application fees are non-refundable.

[19.35.7.12 NMAC - Rp, 19.35.7.12 NMAC, 1-31-14]

19.35.7.13 TEMPORARY IMPORTATION:

Importation into the state for exhibition, advertising, movies etc. may be approved on an expedited basis provided that the animal will not be in the state for a period of more than 30 days. Specific requirements for the animals will be listed on the application and permit. Specific requirements for importation may be listed on the application. The department will have the final authority to list all conditions on the permit that will be required prior to final approval.

[19.35.7.13 NMAC - Rp, 19.35.7.13 NMAC, 1-31-14]

19.35.7.14 IMPORTATION OF CERTAIN FISH OR FISH EGGS INTO NEW MEXICO:

All fish species or eggs of the families salmonidae, esocidae, moronidae, ictaluridae, centrarchidae, percidae, and the genus oreochromis may be imported into the state provided that all conditions stated on the application and permit are met, including the following:

- A.** the name of department approved supplier pursuant to this regulation;
- B.** description of water into which fish will be released is provided; description must include: legal owner of water; legal description of location (township, range, section); county; name of water; size of water (surface acres-lake; miles-stream); source and discharge of water; major use of water; a map of sufficient size and detail to allow the water to be located by someone unfamiliar with the area shall be included;
- C.** species, size, pounds, and number of fish to be imported will be specified;
- D.** purpose of importation will be specified;
- E.** full description of person or persons requesting importation, to include: name, address, telephone number, name of contact person;
- F.** GPS coordinates (latitude and longitude in degree decimal minutes (DDM) using WGS 84 datum for each location where fish are stocked.
- G.** Oreochromis niloticus and oreochromis mossambicus may be imported into the state provided that:
 - (1)** All requirements set forth in the application and on the permit are met.
 - (2)** All other regulatory requirements, including those set forth herein, are met.

[19.35.7.14 NMAC - Rp, 19.35.7.14 NMAC, 1/31/2014; A, 10/15/2015; A, 2/9/2021]

19.35.7.15 APPROVED SUPPLIERS OF FISH OR FISH EGGS FOR IMPORTATION INTO NEW MEXICO:

- A.** The department will maintain a listing of approved fish suppliers.
- B.** All approved fish suppliers or their agent must carry a department-issued copy of the importation permit while transporting fish to the approved release site in New Mexico.

C. Approved supplier or their agent must notify the department of intended port of entry for importation of fish or fish eggs into New Mexico.

D. Approved supplier may be required to provide a presence/absence disease history (e.g., furunculosis bacterium, enteric redmouth bacterium, proliferative kidney disease, ceratomyxosis of salmonids, etc.) of the hatchery facility if requested by the New Mexico department of game and fish.

E. Approved suppliers shall meet the criteria and provide pathogen-free certification as specified herein.

F. Salmonids:

(1) For the infectious hematopoietic necrosis virus (IHNV), infectious pancreatic necrosis virus (IPNV), viral hemorrhagic septicemia (VHS), and bacterial kidney disease (BKD).

(a) Disease testing will be conducted by another state wildlife agency, United States fish and wildlife service; USDA certified source or other source approved by the New Mexico department of game and fish.

(b) Disease testing of fish must use American fisheries society (AFS) blue book or meet OIE (office international des epizooties) standards.

(c) Disease testing will be conducted on an annual basis; annual inspection must have occurred within the previous 12 months of application date.

(d) Sixty fish per lot will be sampled.

(e) For all lots of fish not originating on facility, supplier must provide a historical account documenting fish were reared only at New Mexico department of game and fish approved aquaculture facilities.

(2) For the whirling disease pathogen.

(a) Disease testing will be conducted by another state wildlife agency, United States fish and wildlife service; USDA certified source or other source approved by the New Mexico department of game and fish.

(b) Sixty fish per lot will be sampled.

(c) Inspection will include at least one lot of susceptible salmonids (rainbow trout, cutthroat trout, rainbow-cutthroat hybrids) which has been on the hatchery's water source for at least 10 months. If no lot of susceptible salmonids has been on the hatchery's water source for at least 10 months, then inspection shall include at least one lot of susceptible salmonid at least six months of age or older.

(d) Disease testing will be conducted on an annual basis. Annual inspection must have occurred within the previous 12 months of application date.

(e) Positive findings of whirling disease by pepsin-trypsin digestion shall be considered presumptive; positive findings of whirling disease by histology shall be considered confirmatory.

(f) For all lots of fish not originating on facility, supplier must provide a historical account documenting fish were reared only at New Mexico department of game and fish approved aquaculture facilities.

(g) Supplier may be required to provide a whirling disease history of the hatchery facility if requested by the New Mexico department of game and fish.

(h) Presumptive findings: Any presumptive findings of disease with no confirmatory testing shall be deemed a positive finding of the disease.

(i) Positive findings of disease: Any facility deemed to have tested positive, by confirmatory findings or presumptive findings without confirmatory testing, under this rule shall be barred from importation into the state of New Mexico until the facility is shown to be pathogen free for a minimum of two consecutive years and has met all other requirements.

(j) Renovated facilities: A facility that has been deemed positive under this rule and has undergone complete renovation may apply for importation privileges as a new facility once it has had at least one annual inspection and has met all other requirements. Complete renovation for the purposes of this rule shall be defined as a facility that has:

(i) closed, secured, and sanitized all water sources;

(ii) confined all water conveyance to closed sealed pipes; and

(iii) constructed all rearing spaces out of hard surfaced materials. Proof of renovation must be provided with the application for importation privileges. On-site inspection of the facility after renovation may be required prior to authorization to import.

G. Warm water fish:

(1) Disease testing will be conducted by another state wildlife agency, United States fish and wildlife service; USDA certified source or other source approved by the New Mexico department of game and fish.

(2) Disease testing of fish must use American Fisheries Society (AFS) blue book procedures or meet OIE standards.

(3) Disease testing will be conducted on an annual basis. Annual inspection must have occurred within the previous 12 months of application date.

(4) Sixty warm water fish per lot shall be tested for viruses and bacteria.

(5) Approved supplier will document whether fish on the facility have ever been diagnosed with channel catfish virus.

H. *Oreochromis niloticus* and *oreochromis mossambicus* shall be certified as to species and as either all male or otherwise sterile by a qualified independent laboratory or by other means approved by the director. *Oreochromis niloticus* and *oreochromis mossambicus* capable of reproduction and certified as to species by a qualified, independent laboratory or by other means approved by the director may be approved for import only to a qualified expert.

I. Triploid grass carp: A notarized certificate of triploidy issued by another state wildlife agency, United States fish and wildlife service, USDA certified source or other source approved by the New Mexico department of game and fish must be provided for all grass carp imported into New Mexico.

J. Approved suppliers shall provide signed written assurance to the department that the fish rearing facilities are free of aquatic nuisance species (ANS) and aquatic invasive species (AIS). Failure to provide this assurance shall be reason to deny importation privileges. Approved suppliers shall be liable for any introduction of ANS or AIS caused by their actions.

[19.35.7.15 NMAC - Rp, 19.35.7.15 NMAC, 1/31/2014; A, 10/15/2015; A, 2/9/2021]

19.35.7.16 [RESERVED]

19.35.7.17 IMPORTATION CONDITIONS FOR THE FAMILIES BOVIDAE, ANTILOCAPRIDAE AND CERVIDAE:

All live protected wildlife species of the families bovidae, antilocapridae, and cervidae imported in the state of New Mexico shall meet the following criteria.

A. Be permanently identified with any 2 of the following devices, one of which must be an official animal identification. All identification data shall be registered with the department:

(1) implanted electronic identification device.

(2) ear tag with park identification number.

(3) tamper-proof ear tag with imprinted national identification number.

(4) USDA metal ear tags.

B. Be examined by an accredited veterinarian prior to importation. Each animal shall be accompanied by a pre-approved health certificate, certifying a disease-free status.

C. Test negative for brucellosis. Serum testing shall be done not more than 30 days prior to importation. All serum samples shall be tested by a cooperative state federal brucellosis laboratory.

D. Test negative for bovine tuberculosis not more than 90 days prior to importation. Animals to be imported must originate from a herd that had a negative whole-herd tuberculosis test not more than 12 months prior to importation or have a current "tuberculosis free herd" certificate issued from the state of origin through a USDA accreditation program. Bovine tuberculosis testing must be performed with the current USDA approved method and be conducted by a federally accredited veterinarian. Exception: Wild sheep are exempt from this testing requirement.

E. Only cervids enrolled and in the state CWD herd certification program and from a herd that has achieved certified status, and that does not show clinical signs associated with CWD may be imported into New Mexico.

(1) No cervid shall be allowed to enter the state if it has had any contact with a CWD suspect, exposed, positive, trace-forward or trace-back animal within 60 months prior to time of importation.

(2) No cervid coming through mixed herd sales or auctions shall be allowed to enter the state. Only animals from closed sales may be imported.

(3) No cervid shall enter the state in a conveyance that has held CWD suspect, exposed, positive, trace-forward or trace-back animals.

F. All elk to be imported into the state of New Mexico shall be tested for genetic purity. Only Rocky Mountain elk (*Cervus elaphus nelsoni*) will be allowed to be imported into the state of New Mexico. Any elk showing red deer hybridization or hybridization of other elk subspecies will not be allowed into the state. All testing shall be done ONLY by a New Mexico department of game and fish approved laboratory.

G. All progeny from female elk impregnated prior to importation into New Mexico shall be tested for hybridization of red deer and other elk subspecies.

H. White-tailed deer subspecies to be imported into the state of New Mexico must have originated and must exist west of the 100th meridian and test negative for meningeal worm.

I. Be permitted in compliance with Subsection A of 19.31.1.10 NMAC.

(1) Cost of testing: All testing will be at owner's expense.

(2) After entering the state, all animals shall be held in a separate facility by the owner and/or importer. All imported animals, prior to release, may be inspected at any time by a department of game and fish official or designee.

(3) Owners/importers must notify the department of game and fish within 24 hours of any disease indications or symptoms that manifest themselves among the imported animals prior to final inspection.

(4) Animals shall be held in isolation in the event of an animal health emergency as declared by the director.

(5) Final inspection / permit validation: No animals may be released from the separate facility into the class A park or other enclosure until the owner has received a release approval signed by a department of game and fish official.

[19.35.7.17 NMAC - Rp, 19.35.7.17 NMAC, 1-31-14]

19.35.7.18 INTRASTATE TRANSPORTATION FOR THE FAMILIES BOVIDAE, ANTILOCAPRIDAE AND CERVIDAE:

A. Transporting requirements: All live cervids transported within the state of New Mexico shall be legally possessed and permanently identified with any 2 of the following devices, one of which must be an official animal identification. All identification data shall be registered with the department:

(1) implanted electronic identification device.

(2) ear tag with park identification number.

(3) tamper-proof ear tag with imprinted national identification number.

(4) USDA metal ear tags.

B. The director may suspend intrastate movement in an animal health emergency.

[19.35.7.18 NMAC- Rp, 19.35.7.18 NMAC, 1-31-14]

19.35.7.19 RELEASE FROM CAPTIVITY FOR IMPORTED ANIMALS:

No person shall release from captivity an imported animal into New Mexico except by obtaining a release permit from the director. The transfer of an imported animal from one person to another person does not constitute a release from captivity.

A. Prior to approval by the director an applicant must:

(1) submit a plat of the release area;

(2) submit verification that landowners, tribal officials, state officials, federal officials and county officials that may be directly affected by the release have been notified of the potential release in writing and have been given 20 days to respond to the release; responses must be submitted with the application; it is the responsibility of the applicant to notify the above and submit responses to the department; failure to notify as indicated herein or to submit responses will result in the application being rejected until this condition is met and any compliance fees are paid;

(3) demonstrate that the intended release is provided for in state or federal resource or species management plans or strategies (CWCS).

B. Any individual or group of isolated animals in which signs of infectious or contagious disease is evident will not be released, will remain in isolation, and, at the recommendation of the state veterinarian:

(1) the animals shall be treated and restored to health until they no longer pose a threat of infection to wild, free ranging wildlife or to other captive animals in the facility; or

(2) the isolated animals shall be destroyed and remains will be disposed in a manner conforming to state, federal or local rules and regulations.

C. The director shall not approve any release permit that conflicts with current conservation management.

[19.35.7.19 NMAC - Rp, 19.35.7.19 NMAC, 1/31/2014; A, 12/15/2014; A, 2/9/2021]

19.35.7.20 [RESERVED]

19.35.7.21 DENIAL OF PERMIT APPLICATION:

The appropriate department division chief shall notify the applicant of a denial to import non-domesticated animals in writing. A denied application will not be further considered unless the applicant is granted an allowance through the director's review or the commission appeal process.

[19.35.7.21 NMAC - Rp, 19.35.7.21 NMAC, 1-31-14]

19.35.7.22 IMPORTATION PERMIT APPEAL PROCESS:

The denial of an importation permit may only be set aside if each step in the application and appeal process is adhered to sequentially and the appeal is conducted in accordance with the following procedures.

A. Director's review: any applicant whose importation permit application has been denied may request a review by the director in accordance with the following procedures.

(1) The applicant must submit by certified mail a written request to the director within 30 days of denial.

(2) A request for the director's review must contain the reason for the objection.

(3) The director will consider any additional evidence and information that was not previously considered in the initial denial.

(4) The director will consider any conflicts with native wildlife, threats to human health, domestic animals or livestock and qualified expert designation when making a determination.

(5) The designation within a specified group on the director's species importation list cannot be used as the basis for review or appeal.

(6) The director shall make a determination and send the applicant his decision within 45 days.

(7) The determination to approve or deny a qualified expert designation by the director is final and is not subject to appeal.

B. Commission appeal: any applicant may appeal the decision by the director in accordance with the following procedures.

(1) The applicant must submit by certified mail a written appeal to the chairman of the state game commission within 20 days of denial by the director.

(2) The appeal to the chairman must contain the reason for the objection.

C. Basis for decision: The commission may set aside the decision of the director only if;

(1) the commission determines that the decision of the director was arbitrary or capricious;

(2) the decision of the director was not based on law or regulation;

(3) the appellant provides additional data or proves significant evidence that contradicts the data of the department;

(4) the decision of the commission shall be final.

D. An appeal filed with the commission will be heard at the next scheduled commission meeting subject to agenda item availability and related time constraints.

[19.35.7.22 NMAC- Rp, 19.35.7.22 NMAC, 1-31-14]

19.35.7.23 EXCEPTIONS:

Employees of the New Mexico department of game and fish and other state agencies acting in the course of their official duties are not required to have an importation permit. However, all disease testing requirements specified in this rule must be met prior to importation.

[19.35.7.23 NMAC- Rp, 19.35.7.23 NMAC, 1-31-14]

PART 8: FALCONRY

19.35.8.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.35.8.1 NMAC - Rp, 19 NMAC 35.1.1, 01/01/2012]

19.35.8.2 SCOPE:

Members of the public interested in the participating in the sport of falconry. Seasons for protected species which may be taken through falconry are found in Chapter 31 Part 5 and Part 6, and the license fee is found in Chapter 30 Part 1.

[19.35.8.2 NMAC - Rp, 19 NMAC 35.1.2, 01/01/2012]

19.35.8.3 STATUTORY AUTHORITY:

Sections 17-1-14 and 17-1-26 NMSA 1978 provide that the New Mexico state game commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978 and all other acts pertaining to protected species.

[19.35.8.3 NMAC - Rp, 19 NMAC 35.1.3, 01/01/2012]

19.35.8.4 DURATION:

Permanent.

[19.35.8.4 NMAC - Rp, 19 NMAC 35.1.4, 01/01/2012]

19.35.8.5 EFFECTIVE DATE:

January 1, 2012, unless a later date is cited at the end of a section.

[19.35.8.5 NMAC - Rp, 19 NMAC 35.1.5, 01/01/2012]

19.35.8.6 OBJECTIVE:

Establish rules for the use of protected raptors used in falconry activities.

[19.35.8.6 NMAC - Rp, 19 NMAC 35.1.6, 01/01/2012]

19.35.8.7 DEFINITIONS:

A. "Band" shall mean a permanent, nonreusable, numbered federal raptor leg band supplied by the department or by the USFWS.

B. "Department" shall mean the New Mexico department of game and fish.

C. "Eyass" shall mean a young raptor not yet capable of flight.

D. "Falconry" shall mean the ownership, caring for, and training of raptors for the pursuit of wild game, and hunting wild game with raptors. Falconry includes the taking, or possession of captive bred or wild raptors to use in the sport; and includes the transfer, and transporting of raptors.

E. "Hack" or "hacking" shall mean the temporary release of a raptor held for falconry to the wild so that it may survive on its own.

F. "Hybrid" means offspring of any one species in Section 10.13 of Subchapter B of Title 50 of the Code of Federal Regulations and any other species, or of any two species in Section 10.13 of Subchapter B of this chapter, and any progeny of those birds.

G. "Imping" to graft or repair (a wing, tail, or feather) with a feather to improve a falcon's flying capacity.

H. "Imprint" shall mean a raptor that is hand-raised in isolation from two weeks of age until it has fledged, and has identified itself with humans rather than its own species. An imprinted raptor is considered to be so for its entire lifetime.

I. "Microchip" shall mean an ISO (international organization for standardization) compliant (134.2 khz) microchip purchased and supplied by the falconer permit holder.

J. "Passage bird" shall mean a raptor in its first year.

K. "Raptors" shall mean a migratory bird of the Order Accipitriformes, the Order Falconiformes or the Order Strigiformes listed in Section 10.13 of Title 50 of the Code of

Federal Regulations, including the bald eagle (*Haliaeetus leucocephalus*), and the golden eagle (*Aquila chrysaetos*).

L. "Raptor-taking permits" shall mean permits to take raptors from the wild for falconry purposes.

M. "Temporary foreign visitor" shall mean a foreign national, not an alien residing permanently in the United States, who qualifies as a general or master class falconer.

N. "USFWS" shall mean the United States fish and wildlife service.

[19.35.8.7 NMAC - Rp, 19 NMAC 35.1.7, 01/01/2012]

19.35.8.8 FALCONER PERMITS:

A. Permit requirement to practice falconry in New Mexico: A New Mexico falconer permit, a New Mexico temporary foreign visitor falconer permit or, for nonresidents, a valid state permit or a nonresident temporary foreign visitor falconer permit from another state is required.

B. Duration of falconer permits: All falconer permits shall be issued for a period not to exceed five years and shall expire March 31. All falconer permits may be renewed if the permittee has not violated relevant state or federal laws or regulations.

[19.35.8.8 NMAC - Rp, 19 NMAC 35.1.9, 01/01/2012]

19.35.8.9 REQUIREMENTS FOR ISSUANCE OF FALCONER PERMITS:

The director of the department may issue a falconer permit to an applicant who meets the following requirements.

A. The applicant must qualify as a resident of New Mexico, as prescribed by Chapter 17-3-4 NMSA 1978 Compilation.

B. Falconer permits may not be transferred to other persons.

C. Age, experience, sponsorship:

(1) Apprentice permit:

(a) The applicant for an apprentice permit must be at least 12 years of age and must have the written consent of a parent or legal guardian to assume responsibility for the apprentice's activities if under 18 years of age.

(b) A sponsor who holds a New Mexico general permit with two years experience, or a master permit, is required until the apprentice advances to general falconer.

(c) The applicant for an apprentice permit shall name the sponsor in the application submitted and shall include a letter from the sponsor indicating his or her willingness to sponsor the apprentice.

(d) The applicant for an apprentice permit must successfully pass the state falconry examination before he or she will be granted an apprentice permit.

(2) General permit:

(a) The applicant for a general permit must be at least 16 years of age. If the applicant for a general permit is under 18 years of age, a parent or legal guardian must sign the general permit application to assume responsibility for the applicant's activities.

(b) The general permit applicant shall submit a letter from a general or master falconer (preferably the applicant's sponsor) that the applicant shall have had at least two years experience in the practice of falconry at the apprentice level or its equivalent, including maintaining, training, flying and hunting raptor(s) for at least four months in each year. That practice may include capture and release of falconry raptors.

(c) An applicant for a general falconer permit may not substitute any falconry school program or education to shorten the period of two years at the apprentice level.

(3) Master permit: The applicant for a master permit shall have had at least five years experience in the practice of falconry at the general class level or equivalent experience.

(4) Temporary foreign visitor permit:

(a) A temporary foreign visitor may not apply for a permit at the apprentice class level.

(b) The applicant shall present evidence by letters of recommendation and experience, written in the English language, by other falconers or officials who have personal knowledge of the applicant's falconry experience, including the species of raptors previously flown and the number of years practicing falconry.

(c) The applicant for a temporary foreign visitor permit must pass the state falconry examination.

(d) Based on the evidence provided, the department shall determine the class level for the applicant as general or master class.

(e) A temporary foreign visitor applicant must present proof of legal temporary status in the United States by the immigration and naturalization service.

(f) A temporary foreign visitor applicant must be sponsored by a New Mexico resident general or master class falconer. The applicant shall present a letter with the application from the resident sponsor which shall confirm that the applicant may house and care for the applicant's raptors at the sponsor's falconry facilities. A New Mexico temporary foreign visitor permittee's sponsor may fly, house and care for the permittee's raptors, when provided a 3-186A form and letter of authorization, if the permittee intends to return to New Mexico regularly to practice falconry. Proof of the length of stay may be provided by a copy of the applicant's foreign passport or other immigration and naturalization service documentation.

(g) A permanent resident alien who resides permanently in New Mexico may not apply for a temporary foreign visitor permit, but may apply for a resident falconer permit.

D. Examination:

(1) The applicant for an apprentice or temporary foreign visitor permit shall answer correctly at least 80 percent of the questions on the examination relating to basic biology, care and handling of raptors, laws and regulations, disease, literature and other appropriate subject matter.

(2) The examination shall be conducted under supervised conditions by a department employee or a permitted master falconer representing the department.

(3) An applicant who fails to pass an examination must wait three months to retake it.

E. Fees:

(1) The applicant shall submit payment with the original application.

(2) Prior to examination, the applicant shall submit a nonrefundable examination fee of \$10.00. A person who fails to pass the examination shall not be required to pay additional examination fees when retaking the examination.

[19.35.8.9 NMAC - Rp, 19 NMAC 35.1.9, 01/01/2012]

19.35.8.10 CLASSES OF FALCONER PERMITS AND AUTHORIZED POSSESSION:

A. Apprentice permit:

(1) An apprentice falconer permittee may possess one American kestrel (*Falco sparverius*) or one red-tailed hawk (*Buteo jamaicensis*).

(2) An apprentice falconer may conduct abatement activities only as a subpermittee of a master falconer who holds an abatement permit.

(3) An apprentice falconer may present a conservation education program when accompanied by a master or general permit holder. A conservation education program shall provide information on raptor biology, ecological roles and conservation needs, and the permit holder may charge a fee to cover costs.

B. General permit:

(1) A general falconer permittee may possess not more than three raptors (including hybrids). The permittee may possess any wild-caught or captive-bred raptor except for eagle species and any other species restricted by the department.

(2) A general falconer may conduct abatement activities only as a subpermittee of a master falconer who holds an abatement permit.

(3) A general falconer may use a bird held under a falconer permit for conservation education programs presented in a public venue. A conservation education program shall provide information on raptor biology, ecological roles and conservation needs and the permit holder may charge a fee to cover costs.

(4) A general falconer with two or more years of experience at the general falconer level may sponsor up to two apprentice falconers.

C. Master permit:

(1) The master falconer permit shall authorize the permittee to possess not more than five wild-caught raptors and unlimited captive-bred raptors (including hybrids) if used for falconry, not to include any species listed as endangered in Title 50, Code of Federal Regulations, Part 17, except captive-bred endangered species per Title 50 Code of Federal Regulations, Part 17.

(2) The five wild-caught raptors authorized may include no more than a total of three golden eagles, white-tailed eagles, or Steller's sea eagle, and may include not more than three raptors listed as threatened in Title 50, Code of Federal Regulations, and then only in accordance with the provisions of Part 17.

(3) To possess a golden eagle, white-tailed eagle, or Stellar's sea eagle, a master falconer shall submit to the department a written request to possess individuals of the listed species. The written request must contain a description of the applicant's experience in handling large raptors, including information about the species handled and the type and duration of the activity in which the applicant has engaged. The written

request required by this subsection must be accompanied by at least two letters of reference from people with experience handling or flying large raptors such as eagles, ferruginous hawks (*Buteo regalis*), goshawks (*Accipiter gentilis*), or great horned owls. Each letter of reference must contain a concise history of the applicant's experience with large raptors, and must attest to the applicant's ability to care for eagles and fly them in falconry. A master falconer may take up to two golden eagles within a calendar year where it is permitted under a depredation permit.

(4) A master falconer may conduct abatement activities with raptors possessed under his or her falconry permit, provided the raptors are captive-bred and the permittee has obtained a federal abatement permit for that purpose. No person other than the master falconer to whom an abatement permit has been issued and their subpermittee falconers may use a raptor possessed under a falconry permit to conduct abatement activities.

(5) A master falconer may receive payment, and may pay a general or apprentice falconer for providing abatement services under a federal permit for that purpose.

(6) A master falconer may use a raptor held under a falconer permit for conservation education programs presented in a public venue. A conservation education program shall provide information on raptors' biology, ecological roles and conservation needs, and the permit holder may charge a fee to cover costs.

(7) A master falconer may sponsor up to three apprentices.

D. Temporary foreign visitor permit:

(1) The temporary foreign visitor falconer permit shall authorize the permittee to possess no more than three captive-bred raptors or hybrids if the permittee is determined to be a general class falconer or five captive-bred raptors or hybrids if the permittee is determined to be a master class falconer.

(2) A temporary foreign visitor falconer may conduct abatement activities only as a subpermittee of a master falconer who holds an abatement permit.

(3) A temporary foreign visitor falconer may not act as a sponsor for an apprentice falconer.

E. Nonresident reciprocity:

(1) The department shall grant reciprocity and accept a permit issued to a nonresident falconer temporarily in New Mexico.

(2) The department shall accept a permit issued to a non-resident falconer permanently moving to New Mexico for the period required to establish residency and to meet all other requirements to qualify for a New Mexico resident falconer permit.

[19.35.8.10 NMAC - Rp, 19 NMAC 35.1.9, 01/01/2012]

19.35.8.11 DIRECTORS AUTHORITY AND TAKING OF RAPTORS:

The director of the department may develop a policy to permit raptor take.

A. A raptor may be taken by a resident falconer who holds a valid falconer permit.

(1) The holder of a valid falconer permit, may, at any time of the year, recapture by means of traps or nets any escaped raptor that was legally possessed.

(2) The holder of a New Mexico general or master falconer permit may, take an eyass or passage raptor as permitted herein.

(3) Any raptor taken shall be reported to the department within 10 days. The notification shall be filed through the USFWS 3186-A electronic reporting system unless otherwise required or approved by the department.

(4) No falconer shall possess a species raptor not authorized by his or her permit

(5) No falconer shall exceed the number of raptors authorized by his or her permit..

B. Withholding of raptor-taking permits: The taking of any species whose wild populations in New Mexico that are significantly or adversely affected by such take may be withheld through the director's raptor take policy.

C. Raptor-taking seasons:

(1) Eyasses may be taken from April 1 through January 15 of the subsequent year, and only by holders of general or master falconer permits. No more than two eyasses may be taken by a permittee during the raptor-taking season.

(2) Passage raptors may be taken from April 1 through January 15 of the subsequent year.

D. Age restrictions of raptors to be taken:

(1) No raptor older than one year of age may be taken other than the American kestrel (*Falco sparverius*) or the great horned owl (*Bubo virginianus*).

(2) A holder of a general or master falconer permit may acquire a raptor older than one year of age if it was taken from the wild for the purpose of controlling depredation or for its rehabilitation and if the permittee may legally possess it.

E. Limits on taking of raptors:

(1) A falconer may take no more than two raptors from the wild during any calendar year.

(2) A general or master falconer may take one raptor of a federally-listed threatened species of raptor during any calendar year, if he or she has an endangered species permit issued by the USFWS.

F. Valid area: Raptors shall be taken only in areas specified by the department in the director's raptor take policy.

G. Eligibility for and species authorized for nonresident raptor-taking permits; reports:

(1) A raptor-taking permit may be issued only to a person who holds a valid falconer permit from a state that allows a nonresident take of raptors.

(2) Nonresidents may take only those species as defined in the director's raptor take policy and each raptor take permit shall be issued only for those species authorized for resident falconers of equivalent class.

(3) A raptor taken by a nonresident must be reported on the USFWS 3186-A electronic reporting system within 10 days of capture.

H. Means of taking: Raptors shall not be taken with steel-jawed traps, chains, jump traps, or pole traps, but may be taken as authorized by the director.

[19.35.8.11 NMAC - Rp, 19 NMAC 35.1.8, 01/01/2012]

19.35.8.12 FACILITIES AND EQUIPMENT:

A. Inspection of facilities. An inspection is required for all new applicants and at the time of renewal if the permitted falconer is an apprentice falconer, or if the facilities have been moved. If a department officer or a master falconer representing the department has inspected the applicant's falconry facilities and equipment and found that they meet or exceed the standards below, the inspecting department officer or master falconer must submit a signed certification of the facility, the equipment and the inspection to the Santa Fe office of the department before the permit is issued or renewed.

B. Indoor facilities must be large enough to allow easy access for care of raptors. Each raptor must have an area large enough to allow it to fly if it is untethered or if

tethered, to fully extend its wings or bate (attempt to fly while tethered) without damaging its feathers or contacting other raptors.

(1) If more than one raptor is to be kept in a single facility, the raptors must be separated by partitions or tethered, or raptors may be housed untethered together if they are compatible with each other.

(2) If raptors housed in this indoor facility are not tethered, all walls that are not solid must be protected on the inside. Suitable materials may include vertical bars spaced narrower than the width of the body of the smallest raptor to be housed in the enclosure. However, heavy-duty netting or other such materials may be used to cover the walls or roof of the enclosure.

(3) Each raptor must have a pan of clean water available unless weather conditions, perch type, or some other factor makes access to water unsafe for the raptor. There shall be at least one window for sunlight, and must provide a healthy environment for raptors inside, and a secure door that can be easily closed. The floor shall permit easy cleaning and shall be well drained. Acceptable indoor facilities include shelf perch enclosures where raptors are tethered side by side.

(4) Other innovative housing systems are acceptable if they provide the enclosed raptors with protection and maintain healthy feathers. Falconry raptors may be kept inside a residence, raptors must be tethered and each raptor must have a suitable perch. The residence windows or other openings do not need to be modified.

C. Outdoor facilities: If the applicant also provides outdoor facilities, they shall meet the following standards:

(1) An outdoor facility must be totally enclosed, and may be made of heavy gauge wire, heavy-duty plastic mesh, slats, pipe, wood, or other suitable material.

(2) The facility must be covered and have at least a covered perch to protect a raptor held in it from predators and weather. The facility must be large enough to insure that the raptors cannot strike the enclosure when flying from the perch.

(3) New types of housing facilities or husbandry practices may be used if they satisfy the requirements above.

D. Equipment: The following items shall be in the applicant's possession before issuance of a falconer permit.

(1) Jesses. At least one pair of Aylmeri or Aylmeri type jesses, constructed of pliable, high-quality leather or suitable synthetic material, for use when the raptor is flown free.

(2) Leash and swivel. At least one flexible, weather-resistant leash and one strong swivel of acceptable falconry design.

(3) Bath. At least one water container, two to six inches deep, and wider than the length of the raptor, for each raptor.

(4) Outdoor perch. At least one weathering area perch for each raptor, of acceptable design for the species of raptor.

(5) Weighing device. A reliable scale or balance suitable for weighing the species of raptor(s).

(6) Feathers: A permittee may retain molted feathers and feathers from raptors that die in captivity but may use them only for imping, or may donate feathers, except golden eagles feathers, to any person or institution with a valid permit to have them.

E. Facilities for temporary holding or transportation of raptors: Any temporary facility for transporting or holding a raptor shall have an appropriate perch and be protected from extreme temperatures and excessive disturbance. No raptor shall be held in such a temporary facility for more than 120 days unless authorized by the department for extenuating circumstances.

F. Bands and transmitters:

(1) Species requiring a band: A nonreusable numbered band must be attached to every wild goshawk, gyrfalcon (*Falco rusticolus*), Harris's hawk, and peregrine falcon (*Falco peregrinus*) held for falconry. Bands for additional species may be required by the department.

(2) It shall be illegal to alter, counterfeit or deface a band. However, a falconer permittee may remove the rear tab from the nonreusable bands and may smooth any imperfect surface, if doing so does not affect the integrity of the band or its number.

(3) Return of band: The permittee shall remove and return the band to the department from any raptor that dies or is released with the exception of released captive bred raptors.

(4) Transmitters: When flown for falconry, a hybrid raptor must have two attached radio transmitters that will allow the permittee to locate it in the event of loss or failure of a single transmitter.

G. Maintenance; revocation and renewal of permits:

(1) Facilities and equipment: Each falconer permittee must, maintain his or her falconry facilities and equipment at or above the standards met to qualify for the

permit. An officer of the department may inspect the falconer's facilities and equipment at any reasonable hour only in the presence of the falconer permittee; except under exigent circumstances.

(2) Revocation and renewal: Falconer permits may be revoked or renewals denied for failure to maintain facilities or equipment or for violation of the provisions of this regulation or of Chapter 17-2-14 NMSA 1978 Compilation.

H. Reports:

(1) Department report: Upon request from the department, a permittee must report on operations conducted under the authority of his or her permit. A report from an apprentice falconer must be co-signed by the sponsor.

(2) Federal report: A permittee who takes, purchases, receives or otherwise acquires, sells, barter, transfers or otherwise disposes of a raptor shall be reported to the department within 10 days. The notification shall be filed through the USFWS 3186-A electronic reporting in accordance with appropriate state and federal regulations.

[19.35.8.12 NMAC - Rp, 19 NMAC 35.1.9, 01/01/2012]

19.35.8.13 IMPORTATION, TRANSPORT AND TEMPORARY HOLDING:

A. Importation: A copy of a valid falconer permit shall suffice as an importation permit for raptors brought into the state.

(1) A permitted falconer may import any raptor from another state, provided that the permittee does not exceed the number and species of raptors that can be held under his or her permit.

(2) The holder of a New Mexico temporary foreign visitor falconer permit may only import captive-bred raptor(s) from another state, provided the falconer does not exceed the number and species of raptors that he or she may possess.

B. Temporary importation: an importation permit is not required by nonresident falconers temporarily importing and possessing a raptor while in transit or for the purpose of falconry.

C. Relocation importation: a permitted falconer shall notify the department prior to relocating to New Mexico with a legally possessed raptor. Within 10 days of the arrival, notification shall be filed through USFWS 3-186A electronic reporting system unless otherwise required or approved by the department. The permittee shall document that the raptor was legally obtained, with such certificates, permits to take, federal form 3-186A submitted by the raptor propagator, etc.

D. Transportation of raptors:

(1) A New Mexico falconer may transport within New Mexico a raptor held under his or her permit and raptor(s) held for another falconer while in temporary care.

(2) A permittee may remove the raptor from New Mexico for meets, trials, and hunting in other states and return the raptor to New Mexico without obtaining New Mexico importation permit, provided the falconer permittee obtains any permit or license required for this activity by the state into which the raptor is taken.

(3) A nonresident falconer does not need an importation permit to bring a falconry raptor(s) into New Mexico for hunting or attending a falconry meet as provided in Chapter 17-3-32.1 NMSA 1978 Compilation.

E. Temporary holding of raptors: Raptors possessed under authority of a New Mexico falconry permit may be temporarily held or flown by another person (caretaker) at a location different than the falconer's.

(1) The permittee shall provide such caretaker with a signed statement authorizing the temporary transfer of the raptor to the caretaker and the temporary holding facility, as well as a copy of the federal 3186A form showing the permittee legally acquired the raptor.

(2) If the period of care will exceed 120 days, the permittee shall send written notification of such extended temporary care to the department no later than five days prior to the temporary care.

(3) The care of a permittee's raptor may be extended indefinitely by the department in extenuating circumstances such as illness, military service, or family emergency. Notification shall include the name and location of the caretaker, the reason for the extended temporary care, whether the raptor(s) may be exercised and flown, and approximately how many days the caretaker will be responsible for the raptor(s).

[19.35.8.13 NMAC - Rp, 19 NMAC 35.1.9, 01/01/2012]

19.35.8.14 RELEASE OF RAPTORS:

A permittee who wishes to release a raptor must notify the department 10 days before the intended release date.

A. The department will respond to the request within the 10 day period, and the raptor may be released back into the wild in accordance with approval and instruction from the department.

B. The department may require a period of hacking the raptor back to the wild at an appropriate time of year and an appropriate location.

C. The intentional permanent release of hybrid raptors is prohibited.

[19.35.8.14 NMAC - Rp, 19 NMAC 35.1.9, 01/01/2012]

19.35.8.15 RAPTOR PROPAGATION:

A federal permit is required for raptor propagation and activities associated with it are permitted in accordance with Title 50, Code of Federal Regulations, Section 21.30. No additional state permit is required.

A. A falconry raptor may be temporarily used for propagation without notice of transfer by individuals permitted to conduct raptor propagation.

B. A permittee may transfer a wild-caught falconry raptor to a raptor propagation permit after the raptor has been used in falconry for at least two years (one year for a sharp-shinned hawk (*Accipiter striatus*), a Cooper's hawk (*Accipiter cooperii*), a merlin (*Falco columbarius*), or an American kestrel).

C. When transferred to a propagation permit the acquisition of the raptor by the propagator shall be reported to the department within 10 days. The notification shall be filed through the USFWS 3186-A electronic reporting in accordance with appropriate state and federal regulations.

D. Raptors possessed for propagation, including all progeny produced pursuant to the permitted activity, must be identified with a band issued by the department. A falconer may purchase and implant an ISO microchip in addition to the band.

[19.35.9.4 NMAC - Rp, 19.35.9.4 NMAC, 3-14-14]

19.35.9.5 EFFECTIVE DATE:

March 14, 2014, unless a later date is cited at the end of a section.

[19.35.9.5 NMAC - Rp, 19.35.9.5 NMAC, 3-14-14]

19.35.9.6 OBJECTIVE:

To provide consistent criteria for the possession and sale of privately owned wildlife held in New Mexico. To provide disease testing and general requirements to protect native wildlife and address human health and safety issues.

[19.35.9.6 NMAC - Rp, 19.35.9.6 NMAC, 3-14-14]

19.35.9.7 DEFINITIONS:

A. "Animal health emergency" A situation in which people or animals are at risk of exposure to infectious or contagious diseases.

B. "Aquaculture/recirculating water systems" is a facility designed for the culture, rearing, and propagation of protected species of fish.

C. "Chronic wasting disease" or "CWD" is a transmissible spongiform encephalopathy of cervids.

D. "CWD-exposed animal" is an animal that is part of a CWD-positive herd, or that has been exposed to a CWD positive animal or contaminated premise within the previous 60 months.

E. "CWD-exposed herd" is a herd in which a CWD-positive animal resided within 60 months prior to that animal's diagnosis as CWD-positive.

F. "CWD-positive herd" is a herd in which a CWD-positive animal resided at the time it was diagnosed and which has not been released from quarantine.

G. "CWD profile" is a deer or elk at least 12 months of age that is emaciated and exhibits some combination of clinical signs associated with CWD including increased salivation, tremors, stumbling, incoordination, difficulty swallowing, excessive thirst, and excessive urination.

H. "CWD-response committee" is the group of persons who will develop a herd plan for any facility in which CWD is confirmed or in which is identified a trace-back or a trace-forward herd. This group will be comprised of at least the owner or designee of the facility, a representative from the department, from USDA veterinary services, and from the New Mexico livestock board. The committee must contain a qualified epidemiologist designated for the event.

I. "CWD-suspect animal" is an animal for which unofficial CWD test results, laboratory evidence, or clinical signs suggest a diagnosis of CWD, but for which laboratory results have been inconclusive or not yet conducted.

J. "CWD-suspect herd" is a herd for which laboratory evidence or clinical signs suggest a diagnosis of CWD, but for which laboratory results have been inconclusive or not yet conducted.

K. "CWD-trace-back herd" is an exposed herd in which a CWD-positive animal has resided during the 60 months prior to the diagnosis.

L. "CWD-trace-forward herd" is a CWD-exposed herd that has received CWD-exposed animals from a CWD-positive herd during the 60 months prior to the diagnosis of CWD in the CWD-positive herd.

M. "Department" shall mean the New Mexico department of game and fish.

N. "Director" is the director of the New Mexico department of game and fish.

O. "Double fenced" means a park surrounded by two (2) fences, each continuous, with one fence surrounding the other and a separation of at least 30 feet between the fences.

P. "Facility" is the area of a class A park surrounded by a fence meeting specifications defined herein, and all buildings, isolation pens, loading chutes, gates, waters, and other structures and equipment used in the class A park operation.

Q. "Feed" is all forage grown outside the facility and transported in, all forages compounded and packaged for commercial distribution, and all dietary supplements.

R. "Herd plan" is a written facility management agreement that sets forth the steps to be taken to eradicate CWD from a CWD-positive herd, to control the risk of CWD in a CWD-exposed or CWD-suspect herd, or to prevent introduction of CWD into that herd or any other herd.

S. "Official animal identification" is a device or means of animal identification approved by USDA to uniquely identify individual animals nationally. The animal identification must include a nationally unique identification number that adheres to one of the following:

- (1) national uniform ear tagging system;
- (2) animal identification number (AIN);
- (3) premises-based number system using a premises identification number (PIN) in conjunction with a livestock production numbering system; or
- (4) any other numbering system approved by USDA for the identification of animals in commerce.

T. "Permit owner" is that person or persons to whom the class A park or lake permit is issued. This person(s) may be a lessee on the land designated for the class A park or lake.

U. "Quarantine" is an order issued to any class A park or lake prohibiting all animal ingress or egress. The director shall declare the end of the quarantine.

V. "Quarantine fence" is a fence, inside a facility, constructed to ensure isolation within the facility.

W. "Record" shall mean all vital documents and electronic data kept for each animal. These documents include, but are not limited to, breed registries, importation permits, bills of sale, health certificates, veterinary diagnoses, etc.

X. "Single fenced" is a park surrounded by one (1) continuous fence.

Y. "Shooter animals" are animals designated by a permit owner or his designee for hunting or harvesting in the facility.

Z. "Water" is the system for delivering water to animals in a facility including but not limited to wells, streams, ponds, troughs, and water catchments.

AA. "USDA" is the United States department of agriculture.

[19.35.9.7 NMAC - Rp, 19.35.9.7 NMAC, 3-14-14; A, 10-15-2015]

19.35.9.8 POSSESSION AND RETENTION OF PROTECTED SPECIES LIVE ANIMALS, BIRDS AND FISH:

It shall be unlawful to possess protected species of live animals, birds or fish, as defined in 17-2-3 NMSA 1978, in New Mexico without first obtaining appropriate permits issued

by the director. Such permits will be issued only for those purposes named in Subsection A of 19.31.10.10 NMAC as described herein. New permits will not be issued until all conditions and appeal processes, if any, listed herein have been satisfied. A violation of the provisions herein shall subject the permittee or licensee to denial or revocation as described under authority of 17-1-14, 17-3-34 NMSA 1978 and 19.31.2 NMAC.

A. Only members of the following families of fish will be considered for retention in New Mexico class A lakes or class A - aquaculture/recirculating water systems:

- (1) salmonidae;
- (2) esocidae;
- (3) percichthyidae;
- (4) ictaluridae;
- (5) centrarchidae; and
- (6) percidae

B. Live oreochromis niloticus and oreochromis mossambicus capable of reproducing and/or propagation may be considered for retention in New Mexico only by a department approved qualified expert as defined in 19.35.7 NMAC.

C. Live oreochromis niloticus and oreochromis mossambicus incapable of reproducing (hybrid and sterile or triploid of the same sex) shall be considered for retention in New Mexico for the purposes of aquaculture.

D. Only members of the following families of mammals and birds will be considered for retention in New Mexico class A parks: Protected mammals and birds under 17-2-3 NMSA 1978.

E. Permission may be granted by the state game commission to retain prohibited species into New Mexico upon demonstration by the applicant that no possible conflict with native animals, human health or livestock will occur, upon showing of good cause, or upon requiring that certain additional conditions are met by the applicant, and does not conflict with any other law, rule or ordinance.

[19.35.9.8 NMAC - Rp, 19.35.9.8 NMAC, 3-14-14; A, 10-15-2015]

19.35.9.9 POSSESSION CONDITIONS AND HEALTH CERTIFICATION:

All live protected species of the families' bovidae, antilocapridae, and cervidae retained in the state of New Mexico shall meet the following criteria:

A. All class A parks with cervids must develop and follow a herd plan if any animal is identified to come from a CWD-positive herd, CWD-suspect herd, CWD-exposed herd, CWD-trace-back or CWD-trace-forward herd. The herd plan will be developed by the CWD response committee:

(1) tissues from all CWD-exposed or CWD-suspect animals that die or are depopulated or otherwise killed must be collected and tested for CWD as specified in the herd plan. Carcasses and tissues of such animals should be disposed of as specified in the herd plan.

(2) CWD testing specified by the herd plan must be done at the expense of the class A park;

(3) CWD testing shall be done only at a laboratory approved by USDA and the department;

(4) laboratory results must be retained by the class A park and presented to the department with the annual inventory inspection; and

(5) the director may require CWD testing of cervids from class A parks not enrolled in the CWD herd certification program.

B. Any live cervid leaving a park must be accompanied by a health certificate by an accredited veterinarian.

C. Any protected wildlife leaving a park or lake must also be accompanied by a bill of sale or invoice.

D. All class A game parks must maintain herd records that include at least:

(1) bills of sale or donation receipts, that is, the source of all animals moved into the herd from an outside source;

(2) importation permit if the animal was imported into New Mexico from a source outside of the state;

(3) all health certificates associated with importation or other activities;

(4) age or date of birth, species, gender; and location of birth, that is, born at the facility or introduced from a location outside of the facility;

(5) registration documents if applicable;

(6) all health and medical records including details of veterinary care and consultation;

(7) all laboratory results and reports from disease testing and any necropsies performed;

(8) all documents associated with movement of live animals from the facility including movement to slaughter, and final destination of all movements; and

(9) all individual animal identification data.

E. Feed containing animal products or by-products shall not be administered to cervids.

F. Any positive test for CWD shall constitute an animal health emergency. The department must be notified within 24 hours of the diagnosis by the class A park owner or owner's designee. This notification requirement will only be considered met if the owner or designee talks directly or by telephone to the department or sends a verifiable email to appropriate representatives of the department:

(1) the park shall be under immediate indefinite quarantine. All gates shall remain closed, and all existing fences shall remain standing and maintained at the owner's expense

(2) the director shall assemble the CWD response committee to determine immediate actions to:

(a) contain, control, and prevent further transmission

(b) develop and write a herd plan. If the CWD-positive herd is enrolled or certified in the CWD herd certification program, the herd plan will follow the guidelines contained in the publication, *USDA Chronic Wasting Disease Program Standards*; and

(c) determine all trace-back and all trace-forward facilities;

(3) class A park owners or designees shall notify all owners of trace-forward and trace-back herds of the positive CWD diagnosis within 96 hours of the diagnosis.

G. Domestic sheep shall not be kept within the boundaries of the park unless the domestic sheep herd is enrolled and participating in the USDA scrapie program.

H. All live protected species of fish retained in an aquaculture/recirculating water system operated by a qualified expert or live protected species for sale outside of the class A lake shall meet the following criteria:

(1) test annually meeting the same requirements as specified as 19.35.7 NMAC;

(2) any positive test for any of the pathogens listed in 19.35.7 NMAC shall constitute an animal health emergency. The department must be notified within 24 hours of the diagnosis. This notification requirement will only be considered met if the owner or designee talks directly to a department person either by phone or in-person:

(a) the lake or aquaculture/recirculating water system shall be under immediate indefinite quarantine; and

(b) owners shall submit factual copies of all records to the department within 72 hours of the diagnosis, and notify all owners of trace-forward and trace-back lots of fish of the positive diagnosis within 72 hours of the diagnosis.

[19.35.9.9 NMAC - Rp, 19.35.9.9 NMAC, 3-14-14; A, 10-15-2015]

19.35.9.10 ANIMAL HEALTH EMERGENCIES:

Upon identification of an animal health emergency, the department shall determine immediate actions to contain, control, and prevent spread of the animal health emergency giving due consideration for public safety. The department will plan for quarantine, isolation, treatment, disinfection, including destruction and disposal. The director will notify and update appropriate public and private entities as needed.

A. Escaped animals: if, in the opinion of the director, any escaped animal poses an animal health emergency or a risk to animal or public health, the director may employ any and all available means to capture and return or to destroy the escaped animals.

B. Reportable diseases and conditions: the following diseases are considered to be of significant economic and biological risk to humans, wildlife, and domestic animals that, if detected and confirmed in wildlife species, are to be immediately reported to the department:

- (1) anthrax
- (2) arboviruses
- (3) brucellosis
- (4) chronic wasting disease
- (5) epizootic hemorrhagic disease/bluetongue virus
- (6) foot and mouth disease
- (7) malignant catarrhal fever
- (8) mange

(9) plague

(10) rabies

(11) tuberculosis

(12) tularemia

(13) vesicular stomatitis

(14) any other disease outbreak of significant threat to wildlife populations, livestock health, or human public health.

[19.35.9.10 NMAC - Rp, 19.35.9.10 NMAC, 3-14-14]

19.35.9.11 INTRASTATE TRANSPORTATION:

A. All live captive ungulates transported within the state of New Mexico shall:

(1) be legally possessed;

(2) can be transferred only to other class A park facilities or to processor for slaughter, or sold for immediate consumption;

(3) be shipped following all applicable laws;

(4) all live ungulates including cervids must be permanently identified with any two of the following devices, one of which must be an official animal identification. All identification data shall be registered with the department:

(a) implanted electronic identification device;

(b) ear tag with park identification number;

(c) tamper-proof ear tag with imprinted national identification number; or

(d) USDA metal ear tags.

B. Any individual(s) transporting live fish from a class A lake or aquaculture/recirculating water system shall:

(1) be required to obtain importation and release permits through the process outlined in 19.35.7 NMAC;

(2) legally possess the fish;

(3) only transfer or ship to another individual with a valid permit or by means or to destinations previously approved in the permit issued by the department; and

(4) ship following all applicable laws.

[19.35.9.11 NMAC - Rp, 19.35.9.11 NMAC, 3-14-14; A, 10-15-2015]

**19.35.9.12 CLASS A PARK AND LAKE AND CLASS A -
AQUACULTURE/RECIRCULATING WATER SYSTEM APPLICATION AND
PERMITTING OF NEW PARKS:**

New class A park and lake applications will be accepted anytime during the license year. All park and lake licenses will expire March 31 and must be renewed. Applicants or designee shall provide completely factual information on all application and supplemental material requested, included but not limited to:

A. Name of owner, address, telephone number, name of contact person;

B. Complete legal description of park or lake, including location (township, range, section); county; size of park or lake (surface acres-lake or water; major use of water; a map of sufficient size and detail to allow the park or water to be located by someone unfamiliar with the area shall be included;

C. Species, size, pounds, and number of wildlife to be retained will be specified;

D. Purpose of park or lake will be specified;

E. Each park or lake facility shall meet all the specifications listed on the application prior to final approval and no permit will be approved until all conditions and inspections have been completed by a department designee; and

F. Inclusion of annual fee for processing of application as per 19.30.9 NMAC.

[19.35.9.12 NMAC - Rp, 19.35.9.12 NMAC, 3-14-14; A, 10-15-2015]

**19.35.9.13 RENEWAL OF CLASS A PARKS AND LAKES AND CLASS A -
AQUACULTURE/RECIRCULATING WATER SYSTEMS:**

All applicants renewing their class A license shall apply to the department by May 1 of each year and must be received by the close of the business day. Any renewal application received after May 1 will be assessed an administrative fee of \$250.00 in addition to the normal application fee. Any class A park or lake or class A - aquaculture/recirculating water system failing to send in or renew their application by June 1 will be deemed delinquent and revocation action may commence following 19.31.2 NMAC.

[19.35.9.13 NMAC - Rp, 19.35.9.13 NMAC, 3-14-14; A, 10-15-2015]

**19.35.9.14 CLASS A PARK AND LAKE AND CLASS A -
AQUACULTURE/RECIRCULATING WATER SYSTEM FACILITY DESIGN,
INSPECTION AND RECORDS:**

A. Park enclosure: each class A park facility shall, at a minimum, conform to all rules listed below and on the application:

- (1)** no park shall exceed 3200 acres. Any additional acres will result in another class A park and will be considered as a separate park. All conditions of application and renewal shall be adhered to;
- (2)** fence height shall be at least eight feet (8') from ground level to the top wire or fence top for all new class A parks and for all parks participating in the state herd certification program. Fence shall be continuous from bottom to top, even if multiple layers must be used. Current class A parks with seven and one half foot (7.5') fences will not have to meet this requirement unless they apply for certification;
- (3)** fence wire must be a woven wire mesh, consisting of a top and bottom wire at least 12 gauge or its equivalent. Mesh measures shall not exceed six inch by seven inch (6"X7") openings;
- (4)** fence wire shall be taught enough to not allow bottom or top wire mesh to be pushed or maneuvered up or out of the way by force. If this occurs wire must either be re-stretched or bolstered in some other permanent fashion;
- (5)** fence wire must be maintained securely four inches (4") or less to the ground. Any fencing that is found to be greater than four inches (4") above the ground shall not constitute a proper fence and shall be aproned with permanent material;
- (6)** all fences must be securely fastened to the posts;
- (7)** barbed wire may be used on the bottom or top horizontal wires at the owner's discretion;
- (8)** posts shall be metal "T" posts, pipe or wooden (at least three and one half inches (3.5") in diameter; and must be pressure treated with a preservative);
- (9)** posts shall be set firmly in the ground and not subject to dislodging;
- (10)** posts shall be spaced at intervals not to exceed 18 feet (18') with T-posts or wood; or not to exceed 20 feet (20') on metal pipe;
- (11)** perimeter gates shall be constructed to at least the same specification as fence; mesh and height with no more than four inches (4") from ground to gate bottom;

(12) all water gaps and arroyos shall be constructed to withstand normal flooding and maintain enclosure;

(13) all fence right-of-ways shall be cleared for a distance of eight feet (8') on each side of the fence and all dead timber with a height greater than the distance to the fence shall be felled;

(14) class A park fences shall be constantly maintained as described above, if found out of compliance, the owner or his designee shall immediately repair any substandard material or specifications. It is the intent of this section that all fences shall be maintained in a game-proof condition at all times and prevent the passing of the game held therein;

(15) all working pens, corrals and holding pens used for processing or temporarily holding animals shall be located inside the park; and

(16) if the park fence is to border any other property (private or public) then a signed affidavit must be executed by the park owner to ensure correct placement of fence and verify ownership of property.

B. Park design:

(1) all feeding or baiting sources shall be at least 100 feet from any exterior fence, except holding pens or working facilities;

(2) no placement of feed or bait shall be allowed until the park license has been completely issued and the gates to park closed; and

(3) gates shall remain open until the final inspection and approval by a department designee.

C. Lake enclosure: each class A lake facility shall conform to all rules listed below and on the application:

(1) all bodies of water and channels connecting a series or group of lakes under one license shall be identified upon each application;

(2) list and describe all screens or other appliances that prevent ingress and egress of fish into and out the bodies of water; and

(3) a map of the lake facility and surrounding watershed shall be provided by the applicant upon application.

D. Aquaculture/recirculating water systems rearing fish capable of reproduction operated by a qualified expert:

(1) shall provide the department with a comprehensive biosecurity plan detailing preventative actions for disease, safety, escape and expected final disposition of fish. Permit issuance will not be considered until the biosecurity plan is complete and approved by the department;

(2) shall submit an annual report with detailed records regarding the operations, preventative measures utilized to maintain healthy fish and any biosecurity plan modifications or updates;

(3) shall be designed and operated to have no effluent discharge or potential to discharge effluent into any waters in New Mexico;

(4) shall be covered to prevent loss of fish through predation, theft, or other means;

(5) no fish shall be removed from the facility alive unless it is being exported outside of New Mexico according to lawful procedures or is moving within the state according to lawful procedures and cannot reproduce.

(6) shall annually certify compliance with all other applicable state, municipal, federal, or other required permits.

E. All other aquaculture/recirculating systems:

(1) shall be designed and operated to have no effluent discharge or potential to discharge effluent into any waters in New Mexico;

(2) shall be covered to prevent loss of fish through predation, theft, or other means;

(3) shall maintain detailed records and submit annual reports regarding the operations;

(4) shall annually certify compliance with all other applicable state, municipal, federal, or other required permits; and

(5) live fish shall not be removed from the aquaculture/recirculating system unless they are being transferred to another department permitted individual within the permit provisions.

F. Facility inspections of parks and lakes: once application is made to the department, the proposed site shall be subject to inspections by a department representative at any reasonable time. Inspections shall also occur at least once per year, upon receipt of renewal of application to inspect the facility and fence integrity. All inspections will be limited to the facility and the animals held therein.

G. Natural disasters: every owner or his designee shall immediately notify the department of any natural disasters that threaten or compromise the integrity of the facility. The owner or designee must make every effort to maintain animal(s) inside the facility. It shall be unlawful for any owner or designee to intentionally release animals endangered by a natural disaster.

H. Animal escapes: every owner or his designee shall immediately notify the department of any escapes from a park or lake. Species and all identification data shall be reported with time, location, number or quantity, and sex of escaped animals. Owner or designee shall immediately attempt to recapture escaped animals and make every reasonable effort to return the animals to their facility.

I. Park and lake closure or termination: any park or lake failing to renew by May 1 of each license year will be considered as failing to properly renew and subject its license to revocation according to 19.31.2 NMAC if this should be necessary. Any park, enclosure or lake maintained after May 1 without a license shall be considered in violation of 17-4-9 NMSA 1978. No animal shall be released into the wild, but held until certified with disease free status by that testing required by the director. Nothing in this section shall prevent the owner from legally disposing of his property provided that the number of game animals or fish shall not be lessened by disposition from his or her initial application survey or information filed with the department. However disposition must occur immediately as required by all applicable laws.

J. Records:

(1) any animal disposed or sold from a park or lake must be accompanied by an invoice signed by the owner or his designee and state the following:

(a) park or lake name and license number;

(b) date of disposition or sale, and;

(c) species, quantity, sex and identification data of game animals included in disposition or sale; or, if fish, the approximate weight and number;

(2) each owner shall submit a year-end report to the director by May 1 and state the following: species, quantity, sex, and identification data of game animals disposed, sold, or removed in any way; or, if fish, the approximate weight and number for the previous license year;

(3) owner or designee shall maintain all inventory and health records obtained or created for each animal as designated in 19.35.9.9 NMAC herein;

(4) final disposition, if known, shall be documented of every class A park or lake animal; and

(5) all such records listed in this section shall be made available for immediate inspection upon request by the director. Any owner or designee that knowingly provides inaccurate or false records will be deemed in violation of this section and subject to revocation proceedings pursuant to 19.31.2 NMAC.

K. Existing parks: parks and lakes permitted prior to January 1, 2014 of this regulation will have five (5) years to bring their facility into compliance with this regulation. However, all possession conditions and health certification requirements are mandatory and must begin immediately, even for existing class A parks and lakes.

[19.35.9.14 NMAC - Rp, 19.35.9.14 NMAC, 3-14-14; A, 10-15-2015]

19.35.9.15 DENIAL AND REVOCATION:

Each class A park and lake shall be subject to permit denial or revocation if found to be in violation of this rule or Chapter 17 NMSA 1978. No park or lake application will be approved if fencing or other barrier materials were purchased or installed by the department until all costs associated with the fencing have been reimbursed back to the department through the appropriate fund.

[19.35.9.15 NMAC - Rp, 19.35.9.15 NMAC, 3-14-14]

PART 10: PROTECTION OF AMPHIBIANS AND REPTILES

19.35.10.1 ISSUING AGENCY:

New Mexico Department of Game and Fish.

[19.35.10.1 NMAC - N, 10-31-01]

19.35.10.2 SCOPE:

To prohibit, permit and regulate commercial collecting of free-ranging, native amphibians and reptiles.

[19.35.10.2 NMAC - N, 10-31-01]

19.35.10.3 STATUTORY AUTHORITY:

17-1-14, 17-2-4.1, and 17-3-1 NMSA 1978 provide that the New Mexico State Game Commission has the authority to establish rules and regulations that it may deem necessary to carry out the purpose of Chapter 17 NMSA 1978.

[19.35.10.3 NMAC - N, 10-31-01]

19.35.10.4 DURATION:

Permanent.

[19.35.10.4 NMAC - N, 10-31-01]

19.35.10.5 EFFECTIVE DATE:

October 31, 2001.

[19.35.10.5 NMAC - N, 10-31-01]

19.35.10.6 OBJECTIVE:

Establish procedures and requirements for the take of free-ranging, native amphibians and reptiles for commercial purposes.

[19.35.10.6 NMAC - N, 10-31-01]

19.35.10.7 DEFINITIONS:

A. "Free Ranging, Native Amphibians and Reptiles" are those species and subspecies of amphibians and reptiles naturally occurring in New Mexico.

B. "Commercial purpose" shall mean for the purpose of sale, barter, or profit. For this regulation, any person in possession of the annual bag limit or more than the annual bag limit of wild-caught amphibians and reptiles shall be deemed to possess these individuals for commercial purposes. In addition, any person in possession of more than 50 individuals with unlimited take, shall be deemed to possess these individuals for commercial purposes.

C. "Take" shall mean the act of seizing, capturing, trapping, killing of free-ranging, native amphibians and reptiles.

D. "Annual bag limit" shall mean the allowed number of individual, wild-caught amphibians and reptiles taken in a license year by a licensed collector.

E. "Fish Bait" shall mean the aquatic larval stage of the tiger salamander, *Ambystoma tigrinum*, used for baiting fish.

F. "Lizard races" shall mean the organized, competitive racing of any lizard not listed as threatened or endangered.

G. "Rattlesnake Roundup" shall mean an organized public event where the purpose is to display, buy, sell, and trade rattlesnakes of the genus *Crotalus*.

H. "Captive-bred" shall mean amphibians and reptiles that are hatched or born in captivity as a result of captive breeding.

[19.35.10.7 NMAC - N, 10-31-01]

19.35.10.8 TAKE:

A. It is unlawful for any person to take free-ranging, native amphibians and reptiles in New Mexico for commercial purposes without purchasing and having in possession a valid commercial collecting permit. In addition, nonresidents must purchase and also have in their possession a nonresident hunting license listed in Section 17-3-13 NMSA 1978 required by law for the year in which the taking is done.

B. It is unlawful to take all free-ranging, native amphibians and reptiles species that are Federal or State listed as threatened or endangered.

C. Exceptions:

(1) When there is an emergency situation involving an immediate threat to human life or private property, rattlesnakes may be captured, removed, or destroyed without a permit.

(2) No permit is necessary for take of free-ranging, native amphibians and reptiles for the purpose of rattlesnake roundups, fish bait, or lizard races. A commercial collecting permit is required when these species are taken for a commercial purpose.

(3) All other species of snake (other than rattlesnakes) collected and displayed for rattlesnake roundups shall not be bought, sold, or traded unless the person collecting such snakes is in possession of a commercial take permit.

(4) Amphibians and reptiles held in captivity prior to July 1, 2001 and their progeny are not subject to these regulations.

[19.35.10.8 NMAC - N, 10-31-01]

19.35.10.9 METHODS OF LEGAL TAKE:

Only the following methods shall be used for the legal, commercial take of free-ranging, native amphibians and reptiles.

A. Field collection, including the use of hand-held flashlights or spotlights, provided the collector is not in possession of a firearm or other implement whereby any big game animal or domestic animal could be killed.

B. Collection from road surfaces.

C. Lizard nooses, snake grabbers, and snake hooks.

D. Seines, cast nets, and dip nets.

[19.35.10.9 NMAC - N, 10-31-01]

19.35.10.10 ANNUAL BAG LIMITS:

A. A list of native, free-ranging amphibians and reptiles known to occur in the state of New Mexico wherein take is allowed, with the annual bag limit for each, shall be established and maintained by the Director of New Mexico Department of Game and Fish (Director's Amphibian and Reptile List).

B. It shall be unlawful to exceed the annual bag limit of any species of amphibian or reptile listed on the Director's Amphibian and Reptile List for the current license year.

[19.35.10.10 NMAC - N, 10-31-01]

19.35.10.11 PERMIT:

A. Commercial Collecting Permit: This permit is herein established and required to be purchased and in the possession of any person prior to their attempt to take any amphibian or reptile for commercial purposes.

B. Availability and expiration: Commercial Collecting Permits will be available for purchase through the New Mexico Department of Game and Fish. Commercial Collecting Permits are valid only during the current license year for which it was purchased. License years runs from April 1 through March 31 of the following calendar year. All commercial Collecting Permits expire on March 31 of each year.

C. Nonresidents are required to purchase and have in their possession a nonresident hunting license listed in Section 17-3-13 NMSA 1978 required by law for the year in which the taking is done, in addition to the Commercial Collecting Permit.

D. FEE: Each person must pay \$50.00 to receive a Commercial Collecting Permit.

[19.35.10.11 NMAC - N, 10-31-01]

19.35.10.12 YEAR-END REPORTS:

Each person who purchases a Commercial Collecting Permit is required to file a year-end report on a standardized form approved by the New Mexico Department of Game and Fish.

[19.35.10.12 NMAC - N, 10-31-01]

CHAPTER 36: WILDLIFE EDUCATION AND TRAINING

PART 1: [RESERVED]

PART 2: [RESERVED]

PART 3: HUNTER EDUCATION

19.36.3.1 ISSUING AGENCY:

New Mexico department of game and fish.

[19.36.3.1 NMAC – Rp, 19.36.3.1 NMAC, 4/1/2024]

19.36.3.2 SCOPE:

Hunters under the age of eighteen years.

[19.36.3.2 NMAC – Rp, 19.36.3.2 NMAC, 4/1/2024]

19.36.3.3 STATUTORY AUTHORITY:

Sections 17-2-33 through 17-2-35 NMSA 1978 create the Hunter Training Act and give the department of game and fish the authority to promulgate rules to implement the provisions of the act.

[19.36.3.3 NMAC – Rp, 19.36.3.3 NMAC, 4/1/2024]

19.36.3.4 DURATION:

April 1, 2024 through December 31, 2028.

[19.36.3.4 NMAC – Rp, 19.36.3.4 NMAC, 4/1/2024]

19.36.3.5 EFFECTIVE DATE:

April 1, 2024, unless a later date is cited at the end of a section.

[19.36.3.5 NMAC – Rp, 19.36.3.5 NMAC, 4/1/2024]

19.36.3.6 OBJECTIVE:

Regulation designed to carry the provisions of the Hunter Training Act.

[19.36.3.6 NMAC – Rp, 19.36.3.6 NMAC, 4/1/2024]

19.36.3.7 DEFINITIONS:

[RESERVED]

[19.36.3.7 NMAC – Rp, 19.36.3.7 NMAC, 4/1/2024]

19.36.3.8 HUNTER TRAINING COURSE REQUIRED:

It shall be unlawful for any person under the age of eighteen years to purchase or apply for any type of firearm hunting license unless that person has first successfully completed the New Mexico hunter training course or a hunter training course of another state which is approved by the New Mexico department of game and fish. Effective April 1, 2025, an approved hunter training course of another state may only be utilized by persons age nine (9) years and older.

[19.36.3.8 NMAC – Rp, 19.36.3.8 NMAC, 4/1/2024]

19.36.3.9 TYPES OF COURSES:

A. A person under the age of eighteen years who satisfies the requirements of either of the following training courses shall be issued a certificate following successful completion of a hunter training course:

(1) Completion of an approved hunter training course comprised of class work and firearms proficiency training and testing; or

(2) completion of an approved hunter training course comprised of a written lesson and testing and current registration in the department's mentored-youth program.

B. Registration in the department's mentored-youth program is limited to first-time youth hunters, 8 to 17 years of age, for a period of two consecutive license years and a person shall register in the program only once.

C. Mentored-youth program hunters may hunt with a firearm only after successful completion of the written lesson and testing portion of the course and while supervised by a licensed and mentor certified or hunter education certified parent, guardian or another licensed adult with consent of the parent or guardian who is within unaided voice and sight distance.

(1) Mentors shall possess a mentor certification number obtained after completion of a hunter training course comprised of a written lesson and testing and current registration in the department's mentored-youth program; or

(2) shall possess a hunter education certification number obtained through a New Mexico hunter training course or a hunter training course of another state which is approved by the New Mexico department of game and fish.

D. Mentored-youth program hunters shall be limited by age to hunt as follows:

(1) Mentored-youth under the age of ten years shall be limited to hunting small-game; or

(2) mentored-youth ten to seventeen years of age shall be limited to hunting small-game, turkey, deer, pronghorn antelope and javelina.

[19.36.3.9 NMAC – Rp, 19.36.3.9 NMAC, 4/1/2024]

19.36.3.10 PENALTY:

Any person violating the provisions of 19.36.3.8 NMAC is guilty of a petty misdemeanor and will be subject to penalties provided in Section 31-19-1 New Mexico Statutes Annotated, 1978 Compilation.

[19.36.3.10 NMAC – Rp, 19.36.3.10 NMAC, 4/1/2024]

19.36.3.11 REVOCATION OF HUNTER TRAINING CARD:

A. Hunter training certification will be revoked in accordance with 19.31.2 NMAC.

B. Hunter training certification may also be revoked for negligent use of a firearm.

[19.36.3.11 NMAC – Rp, 19.36.3.11 NMAC, 4/1/2024]

19.36.3.12 LIVE-FIRING COURSES:

A. Live-firing courses may be taught in conjunction with hunter education classes, in accordance with policies and procedures developed by the agency and distributed to certified instructors.

B. Live-firing courses may be taught only by hunter education instructors certified in live-firing instruction.

[19.36.3.12 NMAC – Rp, 19.36.3.12 NMAC, 4/1/2024]
