"6-10-10.1. LOCAL GOVERNMENT INVESTMENT POOL CREATED--

A. There is created in the state treasury the "local government investment pool". The fund shall consist of all deposits from participating governments, including revenues dedicated to repaying bonds, that are placed in the custody of the state treasurer for investment purposes pursuant to this section. The state treasurer shall maintain one or more separate accounts for each participating government having deposits in the local government investment pool and may divide the fund into two or more subfunds, as the state treasurer deems appropriate, for short-term and medium-term investment purposes, including one or more subfunds for bond proceeds deposited by participating governments.

B. If an eligible governing body is unable to receive payment on public money at the rate of interest as set forth in Section 6-10-36 NMSA 1978 from financial institutions within the geographic boundaries of the eligible governing body, or if the eligible governing body is not bound by the terms of Section 6-10-36 NMSA 1978, the finance officer having control of the money of that eligible governing body not required for current expenditure may, with the consent of the board of finance of the eligible governing body if consent is required by the laws or rules of the eligible governing body, remit some or all of the money to the state treasurer for deposit for the purpose of investment as allowed by this section.

C. Before funds are invested or reinvested pursuant to this section, a finance officer shall notify and make the funds available for investment to banks, savings and loan associations and credit unions located within the geographical boundaries of the participating government or the eligible governing body, subject to the limitation on credit union accounts. To be eligible for deposit of the government funds, the financial institution shall pay to the participating government or eligible governing body the rate established by the state treasurer pursuant to a policy adopted by the state board of finance for the investments.

D. A finance officer shall specify the length of time a deposit shall be in the local government investment pool. The state treasurer through the use of the state fiscal agent shall separately track each deposit and shall make information regarding the deposit available to the public upon written request.

E. The state treasurer shall invest the local government investment pool as provided in Section 6-10-10 NMSA 1978 regarding the investment of state funds in

investments with a maturity at the time of purchase that does not exceed three years. The state treasurer may elect to have the local government investment pool consolidated for investment purposes with the state funds under the control of the state treasurer; provided that accurate and detailed accounting records are maintained for the account of each participating government and that a proportionate amount of interest earned is credited to each of the separate accounts of a participating government. The fund shall be invested to achieve its objective, which is to realize the maximum return consistent with safe and prudent management.

F. At the end of each month, all net investment income or losses from investment of the local government investment pool shall be distributed by the state treasurer to the accounts of participating governments in amounts directly proportionate to the respective amounts deposited by them in the local government investment pool and the length of time the amounts in each account were invested.

G. The state treasurer shall charge participating governments reasonable audit, administrative and investment expenses and shall deduct those expenses directly from the net investment income for the investment and administrative services provided pursuant to this subsection. The amount of the charges, the manner of the use by the state treasurer and the nature of bond-related services to be offered shall be established in rules adopted and promulgated by the state treasurer subject to approval by the state board of finance.

H. Subject to appropriation by the legislature, amounts deducted from the accounts of participating governments for charges permitted pursuant to this section shall be expended by the state treasurer in fiscal year 2008 and in subsequent fiscal years for the administration and management of the local government investment pool, services provided to participating governments related to investment of their money in that fund and other services authorized by this section. Balances remaining at the end of a fiscal year from the amounts deducted pursuant to this section shall revert to the general fund. Balances in the state treasurer's operating account resulting from deductions taken pursuant to this section in excess of the amount required to provide administration, management and related services required by this subsection or other services authorized by this section shall be offset by reductions in the charges made by the state treasurer to the accounts of participating governments in subsequent deductions from participating governments' accounts.

I. Each fiscal year, the state treasurer shall cause to have the short-term investment portion of the local government investment pool rated by a nationally recognized statistical rating organization. If a municipality or county has filed a written objection to the inclusion, the board shall not grant the petition or finally adopt the resolution as to any of the real property to which adequate service is, or will be, available from the municipality or county within a reasonable time and on a comparable basis;

(5) a municipality or county that has filed a written objection to the inclusion and that can provide adequate service to the real property described in the petition within a reasonable time and on a comparable basis may bring an action in the district court for the county in which the area proposed to be included is located, commenced within thirty days after entry of the order of the board, to determine whether the action of the board granting the inclusion was arbitrary, capricious or unreasonable;

A. The department shall adopt criteria and minimum highly objective uniform statewide standards of evaluation for the annual performance evaluation of licensed school employees. The professional development plan for teachers shall include documentation on how a teacher who receives professional development that has been required or offered by the state or a school district or charter school incorporates the results of that professional development in the classroom.

B. The local superintendent shall adopt policies, guidelines and procedures for the performance evaluation process. Evaluation by other school employees shall be one component of the evaluation tool for school administrators. A teacher's use of personal leave and up to ten days of sick leave shall not affect that teacher's annual performance evaluation; provided that the leave is used consistently with the policy of the local school board or the governing body of the charter school that employs that teacher. An annual performance evaluation may reflect the lowest score with respect to teacher attendance for a teacher who is determined by a school district or charter school to be using sick leave days in a manner inconsistent with a local school board policy, charter school governing council policy, administrative regulation or an applicable collective bargaining agreement.

C. As part of the highly objective uniform statewide standard of evaluation for teachers, the school principal shall observe each teacher's classroom practice to determine the teacher's ability to demonstrate state-adopted competencies.

C. Refunding bonds may be issued separately or in combination in one series or more.

D. Refunding bonds shall be authorized by resolution. Bonds that are refunded shall be paid at maturity or on any permitted prior redemption date in the amounts, at the time and places and, if called prior to maturity, in accordance with any applicable notice provisions, all as provided in the proceedings authorizing the issuance of the refunded bonds or otherwise appertaining thereto, except for any such bond that is voluntarily surrendered for exchange or payment by the holder or owner.

E. The principal amount of the refunding bonds may exceed the principal amount of the refunded bonds and may also be less than or the same as the principal amount of the bonds being refunded if provision is duly and sufficiently made for the payment of the refunded bonds.

F. The proceeds of refunding bonds, including accrued interest and premiums appertaining to the sale of refunding bonds, shall be immediately applied to the retirement of the bonds being refunded or placed in escrow in a commercial bank or trust company that possesses and exercises trust powers and that is a member of the federal deposit insurance corporation. The proceeds shall be applied to the principal of, interest on and any prior redemption premium due in connection with the bonds being refunded; provided that the refunding bond proceeds, including accrued interest and premiums appertaining to a sale of refunding bonds, may be applied to the establishment and maintenance of a reserve fund and to the payment of expenses incidental to the refunding and the issuance of the refunding bonds, the interest on those bonds and the principal of those bonds, or both interest and principal as the authority determines. Any such escrow shall not necessarily be limited to proceeds of refunding bonds but may include other money available for its purpose. Proceeds in escrow pending such use may be invested or reinvested in bills, certificates of indebtedness, notes or bonds that are direct obligations of, or the principal and interest of which obligations are unconditionally guaranteed by, the United States or in certificates of deposit of banks that are members of the federal deposit insurance corporation; provided that the par value of the certificates of deposit is collateralized by a pledge of obligations or by a pledge of payment that is unconditionally guaranteed by the United States; and further provided that the par value of those obligations is at least seventy-five percent of the par value of

NURSES WHO ARE REQUESTED TO ENGAGE IN PRACTICES THAT NURSES BELIEVE TO BE IN VIOLATION OF THEIR LEGAL DUTIES; REQUIRING EMPLOYERS TO DEVELOP A PROCESS FOR INVOKING SAFE HARBOR; PREVENTING EMPLOYERS FROM DISCIPLINING NURSES FOR INVOKING SAFE HARBOR.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF NEW MEXICO:

Chapter 52 Section 1 Laws 2019

SECTION 1. SHORT TITLE.--This act may be cited as the "Safe Harbor for Nurses Act".

Chapter 52 Section 2 Laws 2019

SECTION 2. DEFINITIONS.--As used in the Safe Harbor for Nurses Act:

A. "assignment" means the designated responsibility for the provision or supervision of nursing care for a defined work period in a defined work setting, including the specified functions, duties, practitioner orders, supervisory directives and amount of work designated as an individual nurse's responsibility; provided that changes in a nurse's assignment may occur at any time during the work period;

C. "health care facility" means an entity licensed by the department of health that provides health care on its premises and has three or more nurses;

D. "nurse" means a nurse licensed pursuant to the Nursing Practice Act as a registered nurse or a licensed practical nurse; and

(b) immediate assessment of the risk for patient safety or potential violation of the Nursing Practice Act or board of nursing rules; and

(2) provides for further assessment of the situation.

A. A nurse may invoke safe harbor when:

(1) in the nurse's good faith judgment, the nurse lacks the basic knowledge, skills or abilities necessary to deliver nursing care that is safe and that meets the minimum standards of care to such an extent that accepting the assignment would expose one or more patients to an unjustifiable risk of harm or would constitute a violation of the Nursing Practice Act or board of nursing rules; or

(2) the nurse questions the medical reasonableness of another health care provider's order that the nurse is required to execute.

B. A nurse who intends to invoke safe harbor shall invoke it before the nurse engages in conduct or an assignment giving rise to the nurse's request for safe harbor. A health care facility shall develop a process by which a nurse employed or contracted by that facility may invoke safe harbor.

C. A safe harbor process shall include:

(1) notification to all nurses on staff as to how safe harbor may be invoked;

(4) mentoring can also help the student volunteer improve the student volunteer's skills, test scores and success in college and inculcate civic and social engagement in community life.

B. The pilot project shall be administered by the department and shall be conducted with at least three public post-secondary educational institutions around the state, ideally with at least one from the research institutions, at least one from the comprehensive universities or tribal colleges and at least one from the branch and independent community colleges and with at least five hundred tuition scholarship students. The community outreach shall consist of:

- (1) partnering with community-based organizations and assisting with community-based projects;
- (2) mentoring public school students; or
- (3) mentoring first-year college students.

G. The following schedule of community outreach for student volunteers is:

(1) students in their first program semester shall partner with a community-based organization to assist it in community outreach or specific community-based projects;

(2) students in their sophomore and junior years shall mentor students in grades kindergarten through twelve; and

(3) students in their senior year shall mentor freshmen college students.

H. If a tuition scholarship student who wants to participate is unable to perform the community outreach service during the school year because of class load, work requirements or other reasons, the student volunteer may volunteer for an approved community outreach project that will be available for the student to participate in during semester breaks or the summer for a total of at least thirty-two hours.

I. Public schools that choose to participate in the pilot project shall identify willing students who would benefit from participation. The student's teacher or school principal shall work with the nonprofit organization and the student volunteer to determine what activities and types of engagement would benefit the mentee student.

J. The department shall establish reporting and evaluation requirements for all participants in the pilot project. The department shall provide interim and final reports annually to the governor and the legislature.

K. The participating public post-secondary educational institutions, tribal colleges, nonprofit community- and education-oriented organizations and public schools shall actively seek public and private grants and donations for any costs of the pilot project. SECTION 5. FINANCING ORDER--ISSUANCE--TERMS OF BONDS-- REPORTS TO COMMISSION OF DISBURSEMENT OF BOND PROCEEDS--REVIEW AND AUDIT OF RECORDS.--

A. The commission may approve an application for a financing order without a formal hearing if no protest establishing good cause for a formal hearing is filed within thirty days of the date when notice is given of the filing of the application for the financing order. If a hearing is held, the commission shall issue an order granting or

denying the application for the financing order to a qualifying utility that is abandoning a qualifying generating facility and an order on an accompanying application of the qualifying utility for approval to abandon the qualifying generating facility within six months from the date the application for the financing order is filed with the commission. For good cause shown, the commission may extend the time for issuing the order for an additional three months.

B. Failure to issue an order approving the application or advising of the application's noncompliance pursuant to Subsection E of this section within the time prescribed by Subsection A of this section shall be deemed approval of the application for a financing order and approval to abandon the qualifying generating facility, if abandonment approval was requested as part of the application for the financing order pursuant to this subsection. The commission shall issue an order acknowledging the deemed approvals within seven days of the expiration of the time period described in Subsection A of this section.

C. If an application for a financing order is accompanied by a request for approval of new resources, this section provides an alternative time frame to that provided in Subsection C of Section 62-9-1 NMSA 1978, and the time frame specified in this section shall govern, unless the request has been deferred to a separate proceeding pursuant to Subsection D of Section 4 of the Energy Transition Act.

D. The issuance of a financing order shall be the only approval required for the authority granted in the financing order.

E. The commission shall issue a financing order approving the application if the commission finds that the qualifying utility's application for the financing order complies with the requirements of Section 4 of the Energy Transition Act. If the commission finds that a qualifying utility's application does not comply with Section 4 of the Energy Transition Act, the commission shall advise the qualifying utility of any changes necessary to comply with that section and provide the applicant an opportunity to amend the application to make such changes. Upon those changes being made, the commission shall issue a financing order approving the application.

F. A financing order shall include the following provisions:

(1) approval for the qualifying utility or assignee to issue energy transition bonds as requested in the application, to use energy transition bonds to finance the maximum amount of the energy transition costs as requested in the application, as may be adjusted pursuant to Paragraph (6) of Subsection B of Section 4 of the Energy Transition Act, and to use the proceeds provided in Subsection A of Section 10 of the Energy Transition Act;

(2) approval for the qualifying utility to recover the energy transition costs, as may be adjusted pursuant to Paragraph (6) of Subsection B of Section 4 of the Energy Transition Act, requested in the application through energy transition charges;

(3) approval of the energy transition charges necessary to recover the authorized energy transition costs, to be imposed through a non-bypassable energy transition charge as a separate line item on the qualifying utility's customer bills, assessed consistent with energy and demand cost allocations within each customer class, subject to update pursuant to the notice filing contemplated by Paragraph (6) of Subsection B of Section 4 of the Energy Transition Act and subject to the application of the adjustment mechanism as provided in Section 6 of the Energy Transition Act, until the energy transition bonds issued pursuant to the financing order and the financing costs related to those bonds are paid in full;

(4) approval of the adjustment mechanism in compliance with Section 6 of the Energy Transition Act;

(5) a description of the energy transition property that is created by the financing order that may be used to pay, and secure the payment of, the energy transition bonds and financing costs authorized to be issued in the financing order;

(6) approval to enter into necessary or appropriate ancillary agreements;

(7) approval of any plans for selling, assigning, transferring or conveying, other than as a security, an interest in energy transition property; and

(8) approval of the proposed ratemaking process and method included in the application pursuant to Paragraphs (10) and (11) of Subsection B of Section 4 of the Energy Transition Act.

G. A financing order shall provide that the creation of energy transition property shall be simultaneous with the sale of the energy transition property to an assignee as provided in the application and the pledge of the energy transition property to secure energy transition bonds.

H. A financing order shall authorize the qualifying utility to issue one or more series of energy transition bonds for a scheduled final maturity of no more than twenty-five years for each series; provided that a rated final maturity may exceed twenty-five years. With such authorization, the qualifying utility shall not subsequently be required to secure a separate financing order prior to each issuance.

I. The commission may require, as a condition of the financing order and in every circumstance subject to the limitations set forth in Subsection A of Section 7 of the Energy Transition Act, that, during any period in which energy transition bonds issued pursuant to the financing order are outstanding, an assignee that is a non-utility affiliate and issues energy transition bonds shall provide in the affiliate's articles of incorporation, partnership agreement or operating agreement, as applicable, that in order for a person to file a voluntary bankruptcy petition on behalf of that assignee, the prior unanimous consent of the directors, partners, managers or members, as applicable, shall be required. Any such provision shall constitute a legal, valid and binding agreement of such shareholders, partners or members of the assignee and is enforceable against such shareholders, partners or members.

J. A financing order may require the qualifying utility to file with the commission a periodic report showing the receipt and disbursement of proceeds of energy transition bonds and any other documents necessary for the qualifying utility to implement the financing order. Upon issuance of the energy transition bonds, the qualifying utility shall file an advice notice with the commission, subject to review by the commission for errors and corrections, that identifies the actual energy transition charges to be included on customers' bills, effective fifteen days from the date the advice notice is filed.

K. A financing order may authorize the commission to review and audit the books and records of the qualifying utility and of an assignee that is a non-utility affiliate and issues energy transition bonds, relating to energy transition property and the receipt and disbursement of proceeds of energy transition bonds.

L. After review and approval by the department of finance and administration with regard to reasonableness of contracts for services, a financing order may authorize the commission to impose a fee on the qualifying utility to pay commission expenses for contract bond counsel accredited by a nationally recognized association of bond lawyers to provide advice and assistance to commission staff in reviewing an application for a financing order and the structure and marketing of the proposed energy transition bonds.

M. The provisions of this section shall not be construed to limit the authority of the commission to:

(1) investigate the practices of or to audit the books and records of a qualifying utility; or

(2) issue such further orders as may be necessary to effectuate the provisions of the Energy Transition Act.

Chapter 65 Section 6 Laws 2019

Energy transition charges shall be assessed consistent with the production cost allocation methodology and the determination of energy and demand costs within each customer class, both of which shall be subject to the adjustment mechanism.

B. The commission shall periodically approve adjustments of the energy transition charges pursuant to the adjustment mechanism approved in the financing order to correct for any over-collection or under-collection of the energy transition charge and to provide for timely payment of scheduled principal of and interest on the energy transition bonds and the payment and recovery of financing costs in accordance with the financing order. Except as provided in Subsection C of this section, the qualifying utility shall file at least semiannually, or more frequently as provided in the financing order:

(1) a calculation estimating whether the existing energy transition charge is sufficient to provide for timely payment of scheduled principal of and interest on the energy transition bonds and the payment and recovery of other financing costs in accordance with the financing order or if either an over-collection or under-collection is projected; and

(2) a calculation showing the adjustment to the energy transition charge to correct for any over-collection or under-collection of energy transition charges.

C. The qualifying utility shall file the calculations described in Subsection B of this section at least quarterly during the two-year period preceding the final maturity date of the energy transition bonds.

D. The adjustment mechanism shall remain in effect until the energy transition bonds and all financing costs have been fully paid and recovered, any under-collection is recovered from customers and any over-collection is returned to customers.

E. On the same day the qualifying utility files with the commission its calculation of the adjustment to the energy transition charge, the qualifying utility shall cause notice of the filing to be given to the parties of record in the case in which the financing order was issued.

F. An adjustment to the energy transition charge filed by the qualifying utility shall be deemed approved without hearing thirty days after filing the adjustment unless:

(1) no later than twenty days from the date the qualifying utility filed the calculation of the adjustment, the commission is notified of a potential mathematical or transcription error in the adjustment; provided that the notice identifies the error with specificity; and

(2) the commission determines that the calculation of the adjustment is unlikely to provide for timely payment, or is likely to result in a material overpayment, of scheduled principal of and interest on the energy transition bonds and the payment and recovery of other financing costs in accordance with the financing order and, based on that determination, suspends operation of the adjustment, pending a hearing limited to the issue of the error in the adjustment; provided that the suspension shall be for a period not to exceed sixty days from the date the qualifying utility filed the calculation of the adjustment.

G. If the commission determines that a hearing is necessary, the commission shall hold a hearing on the proposed adjustment that shall be limited to determining whether there is a mathematical or transcription error in the calculation of the adjustment. If, after a hearing, the commission determines that the calculation of the adjustment contains a mathematical or transcription error, the commission shall issue an order that rejects and corrects the adjustment. The qualifying utility shall adjust the energy transition charge in accordance with the commission's calculation within five days from issuance of the order. If the commission does not issue an order rejecting the adjustment with a determination of the corrected calculation within sixty days from the date the qualifying utility filed the adjustment, the adjustment to the energy transition charge shall be deemed approved.

H. No adjustment pursuant to this section, and no proceeding held pursuant to this section, shall affect the irrevocability of the financing order pursuant to Section 7 of the Energy Transition Act.

Chapter 65 Section 7 Laws 2019

SECTION 7. FINANCING ORDER--IRREVOCABILITY--AMENDMENTS.--

A. A financing order is irrevocable and the commission shall not reduce, impair, postpone or terminate the energy transition charges approved in the financing order, the energy transition property or the collection or recovery of energy transition revenues.

B. Subject to the limitation provided in Subsection A of this section, a financing order may be amended at the request of the qualifying utility to commence a proceeding and issue an amended financing order that:

(1) provides for refinancing, retiring or refunding all or a portion of an outstanding series of energy transition bonds issued pursuant to the original financing order; provided that the commission includes in the amended financing order the findings and requirements specified in Section 5 of the Energy Transition Act; or

(2) adjusts the amount of energy transition costs to be financed by energy transition bonds that have not yet been issued to reflect updated estimated or actual costs that differ from costs estimated at the time of the initial financing order or to correct any errors.

C. The commission shall issue an order granting or denying the proposed amended financing order within thirty days of the filing of the request by the qualifying utility. No change in the credit rating of a qualifying utility from the credit rating at the time of issuance of a financing order shall impair the irrevocability of a financing order.

Chapter 65 Section 8 Laws 2019

SECTION 8. AGGRIEVED PARTIES--REQUEST FOR REHEARING-- JUDICIAL REVIEW.--

A. A financing order shall be issued as a separate order from any other order issued by the commission on a requested approval in the application proceeding and is a final order of the commission. A party aggrieved by the issuance of a financing order may apply to the commission for a rehearing in accordance with Section 62-10-16 NMSA 1978; provided that such application shall be due no later than ten calendar days after issuance of the financing order. An application for rehearing shall be deemed denied if not acted upon by the commission within ten calendar days after the filing of the application.

B. An aggrieved party may file a notice of appeal with the supreme court in accordance with Section 62-11-1 NMSA 1978; provided that such notice shall be due no later than ten calendar days after denial of an application for rehearing or, if rehearing is not applied for, no later than ten calendar days after issuance of the financing order.

The supreme court shall proceed to hear and determine the appeal as expeditiously as practicable.

Chapter 65 Section 9 Laws 2019

SECTION 9. CONDITIONS THAT KEEP FINANCING ORDERS IN EFFECT AND ENERGY TRANSITION CHARGES IMPOSED.--

A. A financing order shall remain in effect until the energy transition bonds issued pursuant to the financing order and any related financing costs have been paid in full.

B. A financing order shall remain in effect and unabated notwithstanding the bankruptcy, reorganization or insolvency of the qualifying utility or any non-utility affiliate or the commencement of any proceeding for bankruptcy or appointment of a receiver.

C. If energy transition bonds issued pursuant to a financing order are outstanding and the related energy transition costs have not been paid in full, the energy transition charges authorized by the financing order shall be collected by the qualifying utility or its successors or assignees, or a collection agent, in full through a non-bypassable charge that is a separate line item on customer bills and not a part of the qualifying utility's base rates. The charge shall be paid by all customers:

(1) receiving electric delivery service from the qualifying utility under commission-approved rate schedules or special contracts; and

(2) who acquire electricity from an alternative or subsequent electricity supplier in the utility service area, to the extent that such acquisition is permitted by New Mexico law.

Chapter 65 Section 10 Laws 2019

SECTION 10. QUALIFYING UTILITY DUTIES.--

A. Except as provided in Section 16 of the Energy Transition Act, a qualifying utility that is abandoning a qualifying generating facility shall use the proceeds of the issuance of energy transition bonds only for purposes related to providing utility service to customers and to pay financing costs.

B. Energy transition revenues shall be applied solely to the repayment of energy transition bonds and the ongoing financing costs.

C. The failure of a qualifying utility to comply with any provision of the Energy Transition Act shall not invalidate, impair or affect a financing order, energy transition property, energy transition charge or energy transition bonds and financing costs. Payments to bondholders or financing parties on the energy transition bonds shall be made on a quarterly or semiannual basis pursuant to the terms of the energy transition bonds.

D. For a qualifying utility that receives approval of a financing order and issues sources of energy transition bonds, the qualifying utility's generation and sources of energy procured pursuant to power purchase agreements with a term of twenty-four months or longer, and that are dedicated to serve the qualifying utility's retail customers, shall not emit, on average, more than four hundred pounds of carbon dioxide per megawatt-hour by January 1, 2023, and not more than two hundred pounds of carbon dioxide per megawatt-hour by January 1, 2032 and thereafter. Compliance shall be measured and verified every three years with the first period commencing on January 1, 2023. The commission shall adopt rules to implement the requirements of this subsection.

Chapter 65 Section 11 Laws 2019

SECTION 11. COMMISSION TREATMENT OF ENERGY TRANSITION BONDS.--

A. If the commission issues a financing order, the commission shall not treat:

(1) energy transition bonds issued pursuant to the financing order as debt of the qualifying utility;

(2) the energy transition charges paid under the financing order as revenue of the qualifying utility; or

(3) the energy transition costs to be financed by energy transition bonds as costs of the qualifying utility.

B. Reasonable actions taken by a qualifying utility to comply with the financing order shall be deemed to be just and reasonable for ratemaking purposes. Nothing in the Energy Transition Act shall:

(1) prevent or preclude the commission from investigating the compliance of a qualifying utility with the terms and conditions of a financing order and requiring compliance therewith;

(2) prevent or preclude the commission from imposing regulatory sanctions against a qualifying utility for failure to comply with the terms and conditions of a financing order or the requirements of the Energy Transition Act;

(3) affect the authority of the commission to apply the adjustment mechanism as provided in Section 6 of the Energy Transition Act; or

(4) prevent or preclude the commission from including the qualifying utility's acquisition of replacement power resources in the qualifying utility's cost of service.

C. The commission shall not order or require a qualifying utility to issue energy transition bonds to finance any costs associated with abandonment of a qualifying generating facility. A utility's decision not to issue energy transition bonds shall not be a basis for the commission to refuse to allow a qualifying utility to recover energy transition costs in an otherwise permissible fashion, or as a basis to refuse or condition authorization to issue securities pursuant to Sections 62-6-6 and 62-6-7 NMSA 1978.

Chapter 65 Section 12 Laws 2019

SECTION 12. ENERGY TRANSITION PROPERTY--ENERGY TRANSITION REVENUES.--

A. Energy transition property that is created in a financing order shall constitute an existing, present property right, notwithstanding that the imposition and collection of energy transition charges depend on the qualifying utility continuing to provide electric energy or continuing to perform its service functions relating to the collection of energy transition charges or on the level of future energy consumption. Energy transition property shall exist whether or not the energy transition revenues have been billed, have accrued or have been collected and notwithstanding that the value or amount of the energy transition property is dependent on the future provision of electric energy or service to customers by the qualifying utility.

B. All energy transition property created in a financing order shall continue to exist until the energy transition bonds issued and all related financing costs pursuant to a financing order are paid in full.

C. All or any portion of energy transition property created in a financing order may be transferred, sold, conveyed or assigned to a non-utility affiliate that is:

(1) wholly owned, directly or indirectly, by the qualifying utility; and

(2) created for the limited purposes of acquiring, owning or administering energy transition property or issuing energy transition bonds under the financing order.

D. All or any portion of energy transition property may be pledged to secure the payment of energy transition bonds and all financing costs.

E. The formation by a qualifying utility of a non-utility affiliate for the purposes of acquiring, owning or administering energy transition property, issuing energy transition bonds pursuant to a financing order and transacting a transfer, sale, conveyance, assignment, grant of a security interest in or pledge of energy transition property by a qualifying utility to a non-utility affiliate, to the extent previously authorized in a financing order, does not require any further approval of the commission and shall not be subject to the rules of the commission regarding Class I transactions and Class II transactions, as defined by Section 62-3-3 NMSA 1978, except that the commission may examine the books and records of the non-utility affiliate.

F. If a qualifying utility defaults on any required payment of energy transition bonds, a court with jurisdiction in the matter, on application by an interested party and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the energy transition revenues for the benefit of bondholders, any assignees or financing parties. The order shall remain in full force and effect notwithstanding any bankruptcy, reorganization or other insolvency or receivership proceedings with respect to the qualifying utility or any non-utility affiliate.

G. Energy transition property, energy transition revenues and the interests of an assignee, bondholder or financing party in energy transition property and energy transition revenues are not subject to set-off, counterclaim, surcharge or defense by the qualifying utility or any other person or in connection with the bankruptcy, reorganization or other insolvency or receivership proceeding of the qualifying utility, non-utility affiliate or any other entity.

H. Any successor to a qualifying utility shall be bound by the requirements of the Energy Transition Act and shall perform and satisfy all obligations of, and have the same rights under a financing order as, the qualifying utility under the financing order in the same manner and to the same extent as the qualifying utility, including the obligation to collect and pay energy transition revenues to persons entitled to receive the revenues.

Chapter 65 Section 13 Laws 2019

SECTION 13. SECURITY INTERESTS--CREATION OF SECURITY INTEREST--PRIORITY OVER OTHER LIENS--ATTACHMENT ON FILING WITH SECRETARY OF STATE.--

A. Except as otherwise provided in this section, the creation, perfection and enforcement of a security interest in energy transition property to secure the repayment of the principal of and interest on energy transition bonds, amounts payable pursuant to an ancillary agreement and other financing costs are governed by this section. This section shall be deemed to supersede the provisions of the Uniform Commercial Code and Chapter 62, Article 13 NMSA 1978, to the extent those provisions are inconsistent with this section.

B. The description or reference to energy transition property in a transfer or security agreement and a financing statement is sufficient only if the description or reference refers to the Energy Transition Act and the financing order creating the energy transition property. This section applies to all purported transfers of, grants of liens on or security interests in, energy transition property.

C. A security interest in energy transition property is created, valid and binding at the latest of when:

- (1) the financing order is issued;
- (2) a security agreement is executed and delivered; or
- (3) value is received for the energy transition bonds.

D. The security interest attaches without any physical delivery of collateral or other act and the lien of the security interest shall be valid, binding and perfected against all parties having claims of any kind against the person granting the security interest, regardless of whether such parties have notice of the lien, on the filing of a financing statement with the secretary of state. The secretary of state shall maintain the financing statement in the same manner and in the same recordkeeping system maintained for financing statements filed pursuant to the Uniform Commercial Code-Secured Transactions. Financing statements filed pursuant to this section shall be effective until a termination statement is filed.

E. A security interest in energy transition property is a continuously perfected security interest and has priority over any other lien that may subsequently attach to the energy transition property unless the holder of the security interest has agreed in writing otherwise.

F. The priority of a security interest in energy transition property is not affected by the commingling of energy transition revenues with other funds. Any pledgee or secured party shall have a perfected security interest in the amount of all energy transition revenues that are deposited in any account of the qualifying utility and any other security interest that may apply to those funds shall be terminated when they are transferred to a segregated account for the assignee or a financing party.

G. No order of the commission amending a financing order and no application of the adjustment mechanism shall affect the validity, perfection or priority of a security interest in or transfer of energy transition property.

Chapter 65 Section 14 Laws 2019

SECTION 14. SALE OF ENERGY TRANSITION PROPERTY--PERFECTING INTERESTS--ABSOLUTE TRANSFER AND TRUE SALE REQUIREMENTS.--

A. Any sale, assignment or transfer of energy transition property to an assignee that is a financing entity that is wholly owned, directly or indirectly, by the utility shall be an absolute transfer and true sale of, and not a pledge of or secured transaction relating to, the seller's right, title and interest in, to and under the energy transition property if the documents governing the transaction expressly state that the transaction is a sale or other absolute transfer. A transfer of an interest in energy transition property shall be created when:

- (1) the financing order creating the energy transition property has become effective;
- (2) the documents evidencing the transfer of energy transition property have been executed and delivered to the assignee; and
- (3) value is received.

B. On the filing of a financing statement with the secretary of state pursuant to Subsection D of Section 13 of the Energy Transition Act, a transfer of an interest in energy transition property shall be perfected against all third persons, except creditors holding a prior security interest, ownership interest or assignment in the energy transition property previously perfected in accordance with Section 13 of that act.

C. The characterization of the sale, assignment or transfer as an absolute transfer and true sale, and the corresponding characterization of the property interest of the purchaser, shall not be affected or impaired by:

- (1) commingling of energy transition revenues with other funds;
- (2) the retention by the seller of:
 - (a) a partial or residual interest, including an equity interest, in the energy transition property, whether direct or indirect, or whether subordinate or otherwise; or
 - (b) the right to recover costs associated with taxes or license fees imposed on the collection of energy transition revenues;
- (3) any recourse that the purchaser may have against the seller;
- (4) any indemnification rights, obligations or repurchase rights made or provided by the seller;
- (5) the obligation of the seller to collect energy transition revenues on behalf of an assignee;
- (6) the treatment of the sale, assignment or transfer of energy transition property for tax, financial reporting or other purposes;
- (7) any subsequent order of the commission amending a financing order pursuant to Subsection B of Section 7 of the Energy Transition Act;
- (8) any use of an adjustment mechanism approved in the financing order; or
- (9) anything else that might affect or impair the characterization of the property.

Chapter 65 Section 15 Laws 2019

SECTION 15. FEE ASSESSMENTS.--The energy transition charge stated as a separate line entry on a customer bill sent by a qualifying utility may be subject to an assessment of a franchise fee imposed by a municipality, county or other political subdivision of the state, pursuant to a utility franchise agreement. The imposition, collection and receipt of an energy transition charge is exempt from inspection and supervision fees assessed pursuant to the Public Utility Act.

B. Any person who issues energy transition bonds is permitted to include the pledge specified in Subsection A of this section in the energy transition bonds, ancillary agreements and documentation related to the issuance and marketing of the energy transition bonds.

Chapter 65 Section 20 Laws 2019

Chapter 65 Section 21 Laws 2019

SECTION 21. CONFLICTS.--In the event of any conflict between the Energy Transition Act and any other law regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any security interest in or transfer of energy transition property, the Energy Transition Act shall govern to the extent of the conflict.

Chapter 65 Section 22 Laws 2019

SECTION 22. VALIDITY ON ACTIONS IF ACT HELD INVALID.--Effective on the date that energy transition bonds are first issued under the Energy Transition Act, if any provision of that act is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect the validity of any action allowed pursuant to that act that is taken by the commission, a qualifying utility, an assignee or any other person, a collection agent, a financing party, a bondholder or a party to an ancillary agreement and, to prevent the impairment of energy transition bonds issued or authorized in a financing order issued pursuant to the Energy Transition Act, any such action shall remain in full force and effect with respect to all energy transition bonds issued or authorized in a financing order pursuant to the Energy Transition Act before the date that such provision is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason.

Chapter 65 Section 24 Laws 2019

SECTION 24. A new section of the Public Utility Act is enacted to read:

"REQUIRING THE HIRING OF APPRENTICES FOR THE CONSTRUCTION OF FACILITIES THAT GENERATE ELECTRICITY.--

A. The construction of New Mexico facilities that generate electricity for New Mexico retail customers, and that are not located on the customer side of an electricity meter, shall be subject to the requirements provided in Subsection B of this section if the facilities are built as a result of competitive solicitations issued after July 1, 2020.

B. Subject to availability of qualified applicants, the construction of facilities that generate electricity for New Mexico retail customers shall employ apprentices from an apprenticeship program during the construction phase of a project at a minimum level of the following percentages of all persons employed for the project:

(1) ten percent for projects for which on-site construction commences beginning January 1, 2020, and prior to January 1, 2024;

Chapter 65 Section 25 Laws 2019

SECTION 25. Section 62-9-1 NMSA 1978 (being Laws 1941, Chapter 84, Section 46, as amended) is amended to read:

"62-9-1. NEW CONSTRUCTION--RATEMAKING PRINCIPLES.--

A. No public utility shall begin the construction or operation of any public utility plant or system or of any extension of any plant or system without first obtaining from the commission a certificate that public convenience and necessity require or will require such construction or operation. This section does not require a public utility to secure a certificate for an extension within any municipality or district within which it lawfully commenced operations before June 13, 1941 or for an extension within or to territory already served by it, necessary in the ordinary course of its business, or for an extension into territory contiguous to that already occupied by it and that is not receiving similar service from another utility. If any public utility or mutual domestic water consumer association in constructing or extending its line, plant or system unreasonably interferes or is about to unreasonably interfere with the service or system of any other public utility or mutual domestic water consumer association rendering the same type of

service, the commission, on complaint of the public utility or mutual domestic water consumer association claiming to be injuriously affected, may, upon and pursuant to the applicable procedure provided in Chapter 62, Article 10 NMSA 1978, and after giving due regard to public convenience and necessity, including reasonable service agreements between the utilities, make an order and prescribe just and reasonable terms and conditions in harmony with the Public Utility Act to provide for the construction, development and extension, without unnecessary duplication and economic waste.

B. If a certificate of public convenience and necessity is required pursuant to this section for the construction or extension of a generating plant or transmission lines and associated facilities, a public utility may include in the application for the certificate a request that the commission determine the ratemaking principles and treatment that will be applicable for the facilities that are the subject of the application for the certificate. If such a request is made, the commission shall, in the order granting the certificate, set forth the ratemaking principles and treatment that will be applicable to the public utility's stake in the certified facilities in all ratemaking proceedings on and after such time as the facilities are placed in service. The commission shall use the ratemaking principles and treatment specified in the order in all proceedings in which the cost of the public utility's stake in the certified facilities is considered. If the commission later decertifies the facilities, the commission shall apply the ratemaking principles and treatment specified in the original certification order to the costs associated with the facilities that were incurred by the public utility prior to decertification.

C. The commission may approve the application for the certificate without a formal hearing if no protest is filed within sixty days of the date that notice is given, pursuant to commission order, that the application has been filed. The commission shall issue its order granting or denying the application within nine months from the date the application is filed with the commission. Failure to issue its order within nine months is deemed to be approval and final disposition of the application; provided, however, that the commission may extend the time for granting approval for an additional six months for good cause shown.

D. In an application for a certificate of public convenience and necessity for an energy storage system, the commission shall approve energy storage systems that:

(1) reduce costs to ratepayers by avoiding or deferring the need for investment in new generation and for upgrades to systems for the transmission and distribution of energy;

(2) reduce the use of fossil fuels for meeting demand during peak load periods and for providing ancillary services;

(3) assist with ensuring grid reliability, including transmission and distribution system stability, while integrating sources of renewable energy into the grid;

(4) support diversification of energy resources and enhance grid security;

Chapter 65 Section 26 Laws 2019

SECTION 26. Section 62-15-34 NMSA 1978 (being Laws 2007, Chapter 4, Section 1, as amended by Laws 2014, Chapter 24, Section 1, and by Laws 2014, Chapter 25, Section 1) is amended to read:

"62-15-34. RENEWABLE PORTFOLIO STANDARD.--

A. Except as provided in Subsection E of this section, each distribution cooperative organized under the Rural Electric Cooperative Act shall meet the renewable portfolio standard requirements, as provided in this section, to include

renewable energy in its electric energy supply portfolio as demonstrated by its retirement of renewable energy certificates. Requirements and targets of the renewable portfolio standard are as follows:

(1) no later than January 1, 2015, renewable energy shall comprise no less than five percent of each distribution cooperative's total retail sales to New Mexico customers;

(2) the renewable portfolio standard shall increase by one percent per year thereafter until January 1, 2020, at which time the renewable portfolio standard shall be ten percent of the distribution cooperative's total retail sales to New Mexico customers;

(3) a distribution cooperative shall have the following targets and requirements for renewable energy and zero carbon resources as a percentage of the distribution cooperative's total retail sales in New Mexico:

(a) a requirement of forty percent renewable energy by January 1, 2025;

(b) a requirement of fifty percent renewable energy by January 1, 2030; and

(c) a target of achieving the zero carbon resource standard by January 1, 2050, composed of at least eighty percent renewable energy; provided that: 1) achieving the target is technically feasible; 2) the rural electric cooperative is able to provide reliable electric service while implementing the target; and 3) implementing the target shall not cause electric service to become unaffordable; and

(4) renewable energy resources that are in a distribution cooperative's energy supply portfolio on January 1, 2008 shall be counted in determining compliance with this section.

B. By April 30 of each year, a distribution cooperative shall file with the public regulation commission a report on its purchases and generation of renewable energy during the preceding calendar year. The report shall include the cost of the renewable energy resources purchased and generated by the distribution cooperative to meet the renewable portfolio standard, an explanation of steps taken to minimize those costs, including competitive procurement and comparison of the price of electricity from renewable energy resources in the bids received by the distribution cooperative to recent prices for such electricity elsewhere in the southwestern United States, and an

annual compliance plan for meeting the renewable portfolio standard for the following three years.

C. If, in any given year, a distribution cooperative determines that the average annual levelized cost of renewable energy that would need to be procured or generated for purposes of compliance with the renewable portfolio standard would be greater than sixty dollars (\$60.00) per megawatt-hour at the point of interconnection of the renewable energy resource with the transmission system, adjusted for inflation after 2020, the distribution cooperative shall not be required to incur that excess cost; provided that the existence of this condition excusing performance in any given year shall not operate to delay compliance with the renewable portfolio standard in subsequent years. The provisions of this subsection do not preclude a distribution cooperative from accepting a project with a cost that would exceed sixty dollars (\$60.00) per megawatt-hour.

D. A distribution cooperative shall report to its membership a summary of its purchases and generation of renewable energy during the preceding calendar year.

E. A distribution cooperative organized pursuant to the Rural Electric Cooperative Act shall meet the requirements and targets of the renewable portfolio standard pursuant to Subsection A of this section as demonstrated by the cooperative's retirement of renewable energy certificates associated with energy assigned to the cooperative; provided that a generation and transmission cooperative referred to in Section 62-6-4 NMSA 1978 shall be responsible for meeting the requirements and targets for all energy supplied to the distribution cooperatives in New Mexico. Energy from renewable energy and zero carbon resources that a generation and transmission cooperative supplies in compliance with the requirements and targets shall be verified at the point where the generation and transmission cooperative produces or takes delivery of the energy on behalf of the distribution cooperatives that the generation and transmission cooperative is serving."

Chapter 65 Section 29 Laws 2019

SECTION 29. Section 62-16-4 NMSA 1978 (being Laws 2004, Chapter 65, Section 4, as amended) is amended to read:

"62-16-4. RENEWABLE PORTFOLIO STANDARD.--

A. A public utility shall meet the renewable portfolio standard requirements, as provided in this section, to include renewable energy in its electric energy supply portfolio as demonstrated by its retirement of renewable energy certificates; provided that the associated renewable energy is delivered to the public utility and assigned to the public utility's New Mexico customers. For public utilities other than rural electric cooperatives and municipalities, requirements of the renewable portfolio standard are:

(1) no later than January 1, 2015, renewable energy shall comprise no less than fifteen percent of each public utility's total retail sales to New Mexico customers;

(2) no later than January 1, 2020, renewable energy shall comprise no less than twenty percent of each public utility's total retail sales to New Mexico customers;

(3) no later than January 1, 2025, renewable energy shall comprise no less than forty percent of each public utility's total retail sales of electricity to New Mexico customers;

(4) no later than January 1, 2030, renewable energy shall comprise no less than fifty percent of each public utility's total retail sales of electricity to

New Mexico customers;

(5) no later than January 1, 2040, renewable energy resources shall supply no less than eighty percent of all retail sales of electricity in New Mexico; provided that compliance with this standard until December 31, 2047 shall not require the public utility to displace zero carbon resources in the utility's generation portfolio on the effective date of this 2019 act; and

(6) no later than January 1, 2045, zero carbon resources shall supply one hundred percent of all retail sales of electricity in New Mexico. Reasonable and consistent progress shall be made over time toward this requirement.

B. In administering the standards required by Paragraphs (5) and (6) of Subsection A of this section, the commission shall:

(1) not jeopardize the operation of a sewage treatment facility that captures and combusts methane gas in the facility's operations;

(2) maintain and protect the safety, reliable operation and balancing of loads and resources on the electric system;

(3) prevent unreasonable impacts to customer electricity bills, taking into consideration the economic and environmental costs and benefits of renewable energy resources and zero carbon resources;

(4) prevent carbon dioxide emitting electricity-generating resources from being reassigned, redesignated or sold as a means of complying with the standard;

(5) in consultation with the energy, minerals and natural resources department, undertake programs not prohibited by law to achieve the standard;

(6) in consultation with the department of environment, ensure that the standard does not result in material increases to greenhouse gas emissions from entities not subject to commission oversight and regulation; and

(7) in consultation with electricity transmission system operators responsible for balancing New Mexico electricity loads and resources, issue a report to the legislature by July 1, 2020, and each July 1 every four years thereafter. The report shall include:

(a) review of the standard, with a focus on technologies, forecasts, existing transmission, environmental protection, public safety, affordability and electricity transmission and distribution system reliability;

(b) evaluation of the anticipated financial costs and benefits to electric utilities in implementing the standard, including the impacts and benefits to customer electricity bills; and

(c) identification of the barriers to, and benefits of, achieving the standard.

C. Any customer that is a political subdivision of the state, or any educational institution designated in Article 12, Section 11 of the constitution of New Mexico with an enrollment of twenty thousand students or more during the fall semester on its main campus, with consumption exceeding twenty thousand megawatt-hours per year at any single location or facility and that owns facilities that produce renewable energy or hosts such facilities through a renewable purchased power agreement, shall not be charged

by the utility for power purchases of one year or less or fuel on the amount of electricity purchased from the utility equal to the amount of renewable energy produced or hosted by the customer. The customer shall annually certify to the state auditor and notify the commission and the customer's serving electric utility of the amount of renewable energy produced at the customer-owned or customer-hosted facilities that generate renewable energy. The customer shall also certify to the state auditor and notify the commission that the customer will retire all renewable energy certificates associated with the renewable energy produced by those facilities. Any financial benefits as a result of the provisions of this subsection shall accrue to the customer immediately upon the effective date of this 2019 act and shall be reflected in customer bills each month, subject to annual true-up and reconciliation. The provisions of this subsection shall not prevent the utility from recovering all of its reasonable and prudent fuel and purchased power costs.

D. Upon a motion or application by a public utility the commission shall, or upon a motion or application by any other person the commission may, open a docket to develop and provide financial or other incentives to encourage public utilities to produce or acquire renewable energy that exceeds the applicable annual renewable portfolio standard set forth in this section; results in reductions in carbon dioxide emissions earlier than required by Subsection A of this section; or causes a reduction in the generation of electricity by coal-fired generating facilities, including coal-fired generating facilities located outside of New Mexico. The incentives may include additional earnings and capital investment opportunities for resources used in furtherance of the outcomes described in this subsection.

E. If, in any given year, a public utility determines that the average annual levelized cost of renewable energy that would need to be procured or generated for purposes of compliance with the renewable portfolio standard would be greater than the reasonable cost threshold, the public utility shall not be required to incur that excess cost; provided that the existence of this condition excusing performance in any given year shall not operate to delay compliance with the renewable portfolio standard in subsequent years. The provisions of this subsection do not preclude a public utility from accepting a project with a cost that would exceed the reasonable cost threshold. When a public utility can generate or procure renewable energy at or below the reasonable cost threshold, it shall be required to do so to the extent necessary to meet the applicable renewable portfolio standard and shall not be precluded from exceeding the standard.

F. By September 1, 2007 and until June 30, 2019, a public utility shall file a report to the commission on its procurement and generation of renewable energy during the prior calendar year and a procurement plan that includes:

(1) the cost of procurement for any new renewable energy resource in the next calendar year required to comply with the renewable portfolio standard; and

(2) testimony and exhibits that demonstrate that the proposed procurement is reasonable as to its terms and conditions considering price, availability, reliability, any renewable energy certificate values and diversity of the renewable energy resource; or

(3) demonstration that the plan is otherwise in the public interest.

G. By July 1, 2020, and each July 1 thereafter, a public utility shall file a report to the commission on the public utility's procurement and generation of renewable energy since the last report and a procurement plan that includes:

(1) the cost of procurement for new renewable energy required to comply with the renewable portfolio standard;

(2) the capital, operating and fuel costs on a per-megawatt-hour basis during the preceding calendar year of each nonrenewable generation resource rate-based by the utility, or dedicated to the utility through a power purchase agreement of one year or longer, and the nonrenewable generation resources' carbon dioxide emissions on a per-megawatt-hour basis during that same year;

(3) information, including exhibits, as applicable, that demonstrates that the proposed procurement:

(a) was the result of competitive procurement that included opportunities for bidders to propose purchased power, facility self-build or facility build-transfer options;

(b) has a cost that is reasonable as evidenced by a comparison of the price of electricity from renewable energy resources in the bids received by the public utility to recent prices for comparable energy resources elsewhere in the southwestern United States; and

(c) is in the public interest, considering factors such as overall cost and economic development opportunities; and

(4) strategies used to minimize costs of renewable energy integration, including location, diversity, balancing area activity, demand-side management and load management.

H. The commission shall approve or modify a public utility's procurement plan within ninety days and may approve the plan without a hearing, unless a protest is filed that demonstrates to the commission's reasonable satisfaction that a hearing is necessary. The commission may modify a plan after notice and hearing. The commission may, for good cause, extend the time to approve a procurement plan for an additional ninety days. If the commission does not act within the ninety-day period, the procurement plan is deemed approved.

I. The commission may reject a procurement plan if, within forty days of filing, the commission finds that the plan does not contain the required information and, upon the rejection, shall provide the public utility the time necessary to file a revised plan; provided that the total amount of renewable energy required to be procured by the public utility shall not change."

Chapter 65 Section 30 Laws 2019

SECTION 30. Section 62-16-5 NMSA 1978 (being Laws 2004, Chapter 65, Section 5, as amended) is amended to read:

"62-16-5. RENEWABLE ENERGY CERTIFICATES--COMMISSION DUTIES.--

A. The commission shall establish:

(1) a system of renewable energy certificates that can be used by a public utility to establish compliance with the renewable portfolio standard and that may include certificates that are monitored, accounted for or transferred by or through a regional system or trading program for any region in which a public utility is located; and

(2) requirements and procedures concerning requirements for renewable energy certificates pursuant to Subsections B and C of this section.

B. Renewable energy certificates:

(1) are owned by the generator of the renewable energy unless:

(a) the renewable energy certificates are transferred to the purchaser of the electricity through specific agreement with the generator;

(b) the generator is a qualifying facility, as defined by the federal Public Utility Regulatory Policies Act of 1978, in which case the renewable energy certificates are owned by the public utility purchaser of the renewable energy; or

(c) a contract for the purchase of renewable energy is in effect prior to July 1, 2019, in which case the renewable energy certificates are owned by the purchaser of the electricity for the term of such contract, unless otherwise agreed to in a contract approved by the commission;

(2) may be traded, sold or otherwise transferred by their owner, unless the certificates are from a rate-based public utility plant, in which case the entirety of the renewable energy certificates from that plant shall be retired by the utility on behalf of itself or its customers. Any contract to purchase renewable energy entered into by a public utility on or after July 1, 2019 shall include conveyance to the purchasing utility of all renewable energy certificates, and the entirety of those certificates shall be retired by that utility on behalf of itself or its customers or subsequently transferred to a retail customer for retirement under a voluntary program for purchasing renewable energy approved by the commission. A utility shall not claim that it is providing renewable energy from generation resources for which it has traded, sold or transferred the associated renewable energy certificates. The commission shall not disallow the recovery of the cost associated with any expired renewable energy certificate. The public utility shall annually file a report with the commission discussing:

(a) its use, sale, trading or transfer of renewable energy certificates; and

(b) whether and how its public claims of renewable energy generation account for renewable energy certificates that it has traded, sold or transferred;

(3) that are used for the purpose of meeting the renewable portfolio standard shall be registered with a renewable energy generation information system that is designed to create and track ownership of renewable energy certificates and that, through the use of independently audited generation data, verifies the generation and delivery of electricity associated with each renewable energy certificate and protects against multiple counting of the same renewable energy certificate; and

(4) may be carried forward for up to four years from the date of issuance to establish compliance with the renewable portfolio standard, after which they shall be deemed retired by the public utility.

C. A public utility shall be responsible for demonstrating that a renewable energy certificate used for compliance with the renewable portfolio standard is derived from eligible renewable energy resources."

Chapter 65 Section 31 Laws 2019

SECTION 31. Section 62-16-6 NMSA 1978 (being Laws 2004, Chapter 65, Section 6, as amended) is amended to read:

"62-16-6. COST RECOVERY FOR RENEWABLE ENERGY AND EMISSIONS REDUCTION.--

A. A public utility that procures or generates renewable energy shall recover, through the rate-making process, the reasonable costs of complying with the renewable portfolio standard. Costs that are consistent with commission approval of procurement plans or transitional procurement plans shall be deemed to be reasonable.

B. The commission shall not exclude from such cost recovery reasonable interconnection and transmission costs and costs to comply with electric industry reliability standards incurred by the public utility in order to deliver renewable energy to retail New Mexico customers.

C. If a public utility has been granted a certificate of public convenience and necessity prior to January 1, 2015 to construct or operate an electric generation facility and the investment in that facility has been allowed recovery as part of the utility's rate-base, the commission may require the facility to discontinue serving customers within New Mexico if the replacement has less or zero carbon dioxide emissions into the atmosphere; provided that no order of the commission shall disallow recovery of any undepreciated investments or decommissioning costs associated with the facility."

Chapter 65 Section 32 Laws 2019

SECTION 32. Section 62-16-7 NMSA 1978 (being Laws 2004, Chapter 65, Section 7) is amended to read:

(1) shall adopt rules regarding the renewable portfolio standard, including a provision for public utility records and reports; and

(2) may require that a public utility offer its retail customers a voluntary program for purchasing renewable energy that is in addition to electricity provided by the public utility pursuant to the renewable portfolio standard, under rates and terms that are approved by the commission.

B. All renewable energy purchased by a retail customer through an approved voluntary program shall:

(1) have all associated renewable energy certificates retired by the retail customer, or on that customer's behalf, by the public utility, and the certificates shall not be used to meet the public utility's renewable portfolio standard requirements pursuant to Subsection A of Section 62-16-4 NMSA 1978;

(2) be excluded from the total retail sales to New Mexico customers used to determine the renewable portfolio standard requirements pursuant to Subsection A of Section 62-16-4 NMSA 1978; and

(3) not be subject to charges by the public utility to recover costs of complying with the renewable portfolio standard requirements pursuant to Subsection A of Section 62-16-4 NMSA 1978."

A. The division shall certify a film production company's budget for direct production expenditures and postproduction expenditures during a preproduction meeting with the division; provided that the division is prohibited from certifying a film production company's budget if the total expected claims in excess of the aggregate amount of claims that may be authorized for payment pursuant to Subsection B of this section would exceed one hundred million dollars (\$100,000,000) in any fiscal year; and provided further that the limitation in this subsection shall not apply to certification of a budget for a New Mexico film partner.

B. Except as provided in Section 10 of this 2019 act, the aggregate amount of claims for a credit provided by the Film Production Tax Credit Act that may be authorized for payment in any fiscal year is one hundred ten million dollars (\$110,000,000) with respect to the direct production expenditures or postproduction expenditures made on film or commercial audiovisual products; provided that direct production expenditures and postproduction expenditures made by a New Mexico film partner shall not be subject to the aggregate amount of claims provided by this subsection.

C. If a film production company submits a claim for a credit pursuant to the Film Production Tax Credit Act and the aggregate amount of claims pursuant to Subsection B of this section has been met for the fiscal year, the claim shall be placed at the front of a queue for payment in a subsequent fiscal year. Claims shall be placed in order of the

date on which the completed return in which the credit is claimed is filed. Claims authorized for payment shall be paid pursuant to the Tax Administration Act.

D. If, in fiscal years 2020 through 2022, the aggregate amount of claims authorized for payment is less than one hundred ten million dollars (\$110,000,000), excluding claims by a New Mexico film partner, then the difference in that fiscal year or twenty million dollars (\$20,000,000), whichever is less, shall be added to the aggregate amount of claims that may be authorized for payment pursuant to Subsection B of this section in the immediately following fiscal year.

E. To provide guidance to film production companies regarding the amount of credit capacity remaining in the fiscal year, the taxation and revenue department shall post monthly on that department's website the aggregate amount of credits claimed and paid for the fiscal year. Chapter 87 Section 7 Laws 2019

SECTION 7. A new section of the Film Production Tax Credit Act is enacted to read:

"NEW FILM PRODUCTION TAX CREDIT.--

A. The tax credit created by this section may be referred to as the "new film production tax credit".

B. A film production company that meets the requirements of the Film Production Tax Credit Act may apply for, and the taxation and revenue department may allow, a tax credit in an amount equal to twenty-five percent of:

(1) direct production expenditures made in New Mexico that:

(a) are directly attributable to the production in New Mexico of a film or commercial audiovisual product;

(b) are subject to taxation by the state of New Mexico;

(c) exclude direct production expenditures for which another taxpayer claims the new film production tax credit; and

(d) do not exceed the usual and customary cost of the goods or services acquired when purchased by unrelated parties. The secretary of taxation and revenue may determine the value of the goods or services for purposes of this section when the buyer and seller are affiliated persons or the sale or purchase is not an arm's length transaction; and

(2) postproduction expenditures made in New Mexico that:

(a) are directly attributable to the production of a commercial film or audiovisual product;

(b) are for services performed in New Mexico;

(c) are subject to taxation by the state of New Mexico;

(d) exclude postproduction expenditures for which another taxpayer claims the new film production tax credit; and

(e) do not exceed the usual and customary cost of the goods or services acquired when purchased by unrelated parties. The secretary of taxation and revenue may determine the value of the goods or services for purposes of this section when the buyer and seller are affiliated persons or the sale or purchase is not an arm's length transaction.

C. With respect to expenditures attributable to a production for which the film production company receives a tax credit pursuant to the federal new markets tax credit program, the percentage to be applied in calculating the amount of credit allowed pursuant to the Film Production Tax Credit Act is twenty percent.

D. A claim for new film production tax credits shall be filed as part of a return filed pursuant to the Income Tax Act or the Corporate Income and Franchise Tax Act or an information return filed by an entity assigned payment of an authorized credit pursuant to Section 7-2F-5 NMSA 1978. The date a complete credit claim is received by the taxation and revenue department shall determine the order that a credit claim is authorized for payment by the department. The film production company may apply all or a portion of the new film production tax credit granted against personal income tax liability or corporate income tax liability. If the amount of the credit claimed exceeds the film production company's tax liability for the taxable year in which the credit is being claimed, the excess shall be refunded.

E. A credit claim shall only be considered received by the taxation and revenue department if the credit claim is made on a complete return filed after the close of the taxable year. All direct production expenditures and postproduction expenditures incurred during the taxable year by a film production company shall be submitted as part of the same income tax return and paid pursuant to this section. A credit claim shall not be divided and submitted with multiple returns or in multiple years.

F. For purposes of determining the payment of credit claims pursuant to this section, the secretary of taxation and revenue may require that credit claims of affiliated persons be combined into one claim if necessary to accurately reflect closely integrated activities of affiliated persons.

G. The new film production tax credit shall not be claimed with respect to direct production expenditures or postproduction expenditures for which the film production company has delivered a nontaxable transaction certificate pursuant to Section 7-9-86 NMSA 1978 or alternative evidence pursuant to Section 7-9-43 NMSA 1978.

H. A production for which the new film production tax credit is claimed pursuant to Paragraph (1) of Subsection B of this section shall contain an acknowledgment to the state of New Mexico. Unless otherwise agreed upon in writing by the film production company and the division, the acknowledgment shall be in the end screen credits that the production was filmed in New Mexico and a three-second static or animated state logo provided by the division shall be included and embedded in the following:

(1) end screen credits before the below-the-line crew crawl for the life of the project of long-form narrative film productions; and

(2) body of the program for the life of television episodes, the placement of which shall be:

(a) in the opening sequence;

(b) as a bumper into or out of a commercial break; or

(c) in a prominent position in each single project's end credits with no less than a half screen exposure, but not covering content.

I. To be eligible for the new film production tax credit, a film production company shall submit to the division information required by the division to demonstrate conformity with the requirements of the Film Production Tax Credit Act, including production data deemed necessary by the division and the economic development department to determine the effectiveness of the credit, and a projection of the new film

production tax credit claim the film production company plans to submit. In addition, the film production company shall agree in writing:

(1) to pay all obligations the film production company has incurred in New Mexico;

(2) to post a notice at completion of principal photography on the website of the division that:

(a) contains production company information, including the name of the production and contact information that includes a working phone number and email address for both the local production office and the permanent production office to notify the public of the need to file creditor claims against the film production company; and

(b) remains posted on the website until all financial obligations incurred in the state by the film production company have been paid;

(3) that outstanding obligations are not waived should a creditor fail to file;

(4) to delay filing of a claim for the new film production tax credit until the division delivers written notification to the taxation and revenue department that the film production company has fulfilled all requirements for the credit; and

(5) to submit a completed application for the new film production tax credit and supporting documentation to the division within one year of making the final expenditures in New Mexico that were incurred for the registered project and that are included in the credit claim.

J. The division, in consultation with the taxation and revenue department, shall determine the eligibility of the film production company and shall report this information to the taxation and revenue department in a manner and at times the economic development department and the taxation and revenue department shall agree upon. The division shall also post on its website all information provided by the film production company that does not reveal revenue, income or other information that may jeopardize the confidentiality of income tax returns.

K. To receive a new film production tax credit, a film production company shall apply to the taxation and revenue department on forms and in the manner the department may prescribe. The application shall include a certification of the amount of direct production expenditures or postproduction expenditures made in New Mexico

with respect to the film production for which the film production company is seeking the credit; provided that for the credit, the application shall be submitted within one year of the date of the last direct production expenditure in New Mexico or the last postproduction expenditure in New Mexico. If the amount of the requested tax credit exceeds five million dollars (\$5,000,000), the application shall also include the results of an audit, conducted by a certified public accountant licensed to practice in New Mexico, verifying that the expenditures have been made in compliance with the requirements of this section. If the requirements of this section have been complied with, the taxation and revenue department shall approve the credit and issue a document granting the credit.

L. That amount of a new film production tax credit for total payments as applied to direct production expenditures for the services of performing artists shall not exceed five million dollars (\$5,000,000) for services rendered by nonresident performing artists and resident principal performing artists in a production. This limitation shall not apply to the services of background artists."

B. The state engineer shall require notice of the application and shall thereafter proceed to consider the application in accordance with existing administrative law and procedure governing the appropriation of surface or ground water.

In order to approve an application under this act, the state engineer must find that the applicant's withdrawal and transportation of water for use outside the state would not impair existing water rights, is not contrary to the conservation of water within the state and is not otherwise detrimental to the public welfare of the citizens of New Mexico.

D. In acting upon an application under this act, the state engineer shall consider, but not be limited to, the following factors:

- (1) the supply of water available to the state of New Mexico;
- (2) water demands of the state of New Mexico;
- (3) whether there are water shortages within the state of New Mexico;

(6) the demands placed on the applicant's supply in the state where the applicant intends to use the water.

E. By filing an application to withdraw and transport waters for use outside the state, the applicant shall submit to and comply with the laws of the state of New Mexico governing the appropriation and use of water.

F. The state engineer is empowered to condition the permit to insure that the use of water in another state is subject to the same regulations and restrictions that may be imposed upon water use in the state of New Mexico.

RELATING TO RURAL ELECTRIC COOPERATIVES; ALLOWING MAIL-IN BALLOTS TO COUNT TOWARD ESTABLISHING A QUORUM.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF NEW MEXICO:

Chapter 131 Section 1 Laws 2019

SECTION 1. Section 62-15-8 NMSA 1978 (being Laws 1939, Chapter 47, Section 8, as amended) is amended to read:

"62-15-8. MEMBERS.--

A. No person who is not an incorporator shall become a member of a cooperative unless the person agrees to use electric energy furnished by the cooperative when electric energy is available through its facilities. The bylaws of a cooperative may provide that any person, including an incorporator, shall cease to be a member of a cooperative if the person fails or refuses to use electric energy made available by the cooperative or if the electric energy is not made available to that person by the cooperative within a specified time after the person becomes a member of the cooperative. Membership in the cooperative shall not be transferable except as

provided in the bylaws. The bylaws may prescribe additional qualifications and limitations in respect of membership.

B. An annual meeting of the members shall be held at such time as shall be provided in the bylaws or, if not contrary to the bylaws, by the board of trustees.

C. Special meetings of the members may be called by the board of trustees, by any three trustees, by petition signed by not less than ten percent of the members or by the president.

D. Annual and special meetings of members, whether general or by voting districts established pursuant to the Rural Electric Cooperative Act, shall be held at such place as may be provided in the bylaws. In the absence of any such provision, all general meetings shall be held in the city or town in which the principal office of the cooperative is located, and all meetings by voting districts shall be held at a location set by the board of trustees within the boundaries of each district.

E. Except as otherwise provided in the Rural Electric Cooperative Act, written or printed notice stating the time and place of each meeting of members and, in the case of a special meeting, the purpose for which the meeting is called, shall be given to each member by the board of trustees or the secretary, or their legal representatives, either personally or by mail not less than ten or more than twenty-five days before the date of the meeting. Failure to receive notice deposited in the mail addressed to a member at the member's address shown on the cooperative's books and records shall not affect the validity of any business conducted at a meeting.

F. Five percent of all members present in person constitutes a quorum for the transaction of business at all meetings of the members, unless the bylaws prescribe a different number of members for determining a quorum. The bylaws may allow for ballots submitted by mail to be considered in establishing a quorum for the sole purpose of voting on an issue or question, the language of which is stated exactly in the notices and on the ballots provided to all members. If less than a quorum is present at any meeting, the majority of those present in person may adjourn the meeting from time to time without further notice. The failure to hold a meeting of members due to the absence of a quorum shall not affect the validity of any business conducted by the board of trustees.

G. Each member shall be entitled to one vote on each matter submitted to a vote at a meeting. Voting shall be in person; provided that if the bylaws provide for voting by proxy or by mail, the bylaws shall prescribe the conditions under which proxy or mail voting shall be exercised. No person shall vote as proxy for more than three members at any meeting of the members.

H. All actions required by the Rural Electric Cooperative Act to be adopted or approved by a simple majority or greater number of members voting on the action at an annual or special meeting may be acted upon by voting at a general meeting or, to the extent and in the manner that the board of trustees may authorize, by voting by the voting districts established pursuant to that act, so long as the requisite majority of members voting on the action is obtained regardless of whether such a majority is obtained in any particular voting district. Action by voting by the voting districts shall be valid if a quorum exists as a result of a series of voting district meetings regardless of whether a quorum is present in any particular voting district."

(1) a designated number of trustees shall be elected by the members residing in that district;

(2) a designated number of delegates shall be elected by the members residing in that district; or

(3) both trustees and delegates shall be elected by the members residing in that district.

B. The bylaws shall prescribe the manner in which voting districts, and the members, delegates and trustees thereof, if any, elected therefrom, shall function. The bylaws shall also set forth the powers of the delegates, which may include the power to elect trustees. No delegate who has voted by proxy or by mail on an issue or question shall vote in person on the same issue or question.

SECTION 4. Section 31-27-4.1 NMSA 1978 (being Laws 2015, Chapter 152, Section 5) is amended to read:

B. Within five business days of the seizure, the law enforcement officer shall provide notice by personal service or first class mail to all owners of record of the seized property.

C. Following the seizure of property, the defendant in the related criminal matter or another person who claims an interest in the seized property may, at any time before the one-hundred-twentieth day following the filing of the forfeiture action in court, claim an interest in the seized property by a motion requesting the court to issue a writ of replevin. D. A person who makes a timely motion pursuant to this section shall have a right to a hearing on the motion before the resolution of any related criminal matter or forfeiture proceeding and within sixty days of the date on which the motion is filed.

E. At least ten days before a hearing on a motion filed pursuant to this section, the state shall file an answer or responsive motion that shows probable cause for the seizure.

F. A court shall grant a claimant's motion if the court finds that:

(1) it is likely that the final judgment will require the state to return the property to the claimant;

(2) the property is not reasonably required to be held for investigatory reasons; or

(3) the property is the only reasonable means for a defendant to pay for legal representation in a related criminal or forfeiture proceeding and the law enforcement agency did not make a prima facie showing that the property was stolen or proceeds from or is an instrumentality of a crime.

G. In its discretion, the court may order the return of funds or property sufficient for a defendant to obtain legal counsel but less than the total amount seized. If the court makes such an order, it shall require an accounting. An accounting report of reasonable legal fees held before the resolution of the relevant criminal and forfeiture proceedings shall be held in camera. If the court finds in favor of the state in both the criminal and forfeiture proceedings, the court shall:

(1) hear arguments by the parties as to what portion of the funds or property should be paid to the defendant's counsel and what portion should be forfeited; and

(2) issue an order on how the funds or property shall be distributed.

H. In lieu of ordering the issuance of a writ of replevin, a court may order:

(1) the state to give security or written assurance for satisfaction of any judgment, including damages, that may be rendered in a related forfeiture action; or

(2) any other relief the court deems to be just; provided that the relief does not prejudice an innocent owner, including a secured lienholder."

Chapter 133 Section 5 Laws 2019

SECTION 5. Section 31-27-5 NMSA 1978 (being Laws 2002, Chapter 4, Section 5, as amended) is amended to read:

(6) in the notice, the names of persons known to the state who may claim an interest in the property and the basis for each person's alleged interest.

B. The notice shall be served upon the person from whom the property was seized, the person's attorney of record and all persons known or reasonably believed by the state to claim an interest in the property. A copy of the notice shall also be published on the sunshine portal until the forfeiture proceeding is resolved."

Chapter 133 Section 6 Laws 2019

SECTION 6. Section 31-27-6 NMSA 1978 (being Laws 2002, Chapter 4, Section 6, as amended) is amended to read:

"31-27-6. FORFEITURE PROCEEDINGS--DETERMINATION--SUBSTITUTION OF PROPERTY--CONSTITUTIONALITY--APPEAL.--

A. A person who claims an interest in seized property shall file a response within thirty days of the date of service of the notice of intent to forfeit. The response shall include facts to support the claimant's alleged interest in the property.

B. The district courts have jurisdiction over forfeiture proceedings, and venue for a forfeiture proceeding is in the same court in which venue lies for the criminal matter related to the seized property.

C. The forfeiture proceeding shall begin after the conclusion of the trial for the related criminal matter in an ancillary proceeding that relates to a defendant's property before the same judge and jury, if applicable, and the court, and the jury, if applicable, may consider the forfeiture of property seized from other persons at the same time or in a later proceeding. If the criminal defendant in the related criminal matter is represented by the public defender department, the chief public defender or the district public defender may authorize department representation of the defendant in the forfeiture proceeding.

D. Discovery conducted in an ancillary forfeiture proceeding is subject to the rules of criminal procedure.

E. An ancillary forfeiture proceeding that relates to the forfeiture of property valued at less than twenty thousand dollars (\$20,000) shall be held before a judge only.

F. If the state fails to prove, by clear and convincing evidence, that a person whose property is alleged to be subject to forfeiture is an owner of the property:

(1) the forfeiture proceeding shall be dismissed and the property shall be delivered to the owner, unless the owner's possession of the property is illegal; and

(2) the owner shall not be subject to any charges by the state for storage of the property or expenses incurred in the preservation of the property.

G. The court shall enter a judgment of forfeiture and the seized property shall be forfeited to the state if the state proves by clear and convincing evidence that:

- (1) the seized property is subject to forfeiture;
- (2) the criminal prosecution of the owner of the seized property resulted in a conviction; and
- (3) the value of the property to be forfeited does not unreasonably exceed:
 - (a) the pecuniary gain derived or sought to be derived by the crime;
 - (b) the pecuniary loss caused or sought to be caused by the crime; or
 - (c) the value of the convicted owner's interest in the property.

H. A court shall not accept a plea agreement or other arrangement by which a defendant contributes or donates property to a person, charity or other organization in full or partial fulfillment of responsibility established in the court's proceeding.

I. Following a person's conviction, the state may make a motion for forfeiture of substitute property owned by the person that is equal to but does not exceed the value of the property that is subject to forfeiture but that the state is unable to seize. The court shall order the forfeiture of substitute property only if the state proves by a preponderance of the evidence that the person intentionally transferred, sold or deposited property with a third party to avoid the court's jurisdiction and the forfeiture of the property.

J. A person is not jointly and severally liable for orders for forfeiture of another person's property. When ownership of property is unclear, a court may order each person to forfeit the person's property on a pro rata basis or by another means the court deems equitable.

K. Within the time period for filing an appeal following the conclusion of a forfeiture proceeding, the person whose property was forfeited may petition the court to determine whether the forfeiture was unconstitutionally excessive pursuant to the state or federal constitution.

L. At a non-jury hearing on the petition, the petitioner has the burden of establishing by a preponderance of the evidence that the forfeiture was grossly disproportional to the seriousness of the criminal offense for which the person was convicted.

M. In determining whether the forfeiture is unconstitutionally excessive, the court may consider all relevant factors, including:

- (1) the seriousness of the criminal offense and its impact on the community, the duration of the criminal activity and the harm caused by the defendant;
- (2) the extent to which the defendant participated in the offense;
- (3) the extent to which the property was used in committing the offense;
- (4) the sentence imposed for the commission of the crime that relates to the property that is subject to forfeiture; and
- (5) whether the criminal offense was completed or attempted.

N. In determining the value of the property subject to forfeiture, the court may consider relevant factors, including the fair market value of the property and the hardship from the loss of a primary residence, motor vehicle or other property to the defendant's family members or others if the property is forfeited, in addition to any non-monetary intrinsic value of property that would cause the defendant to suffer if the forfeiture is realized.

O. The court shall not consider the value of the property to the state when it determines whether the forfeiture of the property is constitutionally excessive.

P. A party to a forfeiture proceeding may appeal a district court's decision regarding the seizure, forfeiture and distribution of property."

Chapter 133 Section 7 Laws 2019

D. A law enforcement agency or public body that receives reimbursement pursuant to Subsection B of this section shall inform the state auditor of that fact at the time of the agency's or body's annual audit.

E. A forfeited property interest is subject to the interest of a secured party unless, in the forfeiture proceeding, the state proves by clear and convincing evidence that the secured party had actual knowledge of the crime that relates to the seizure of the property.

F. Abandoned property shall be disposed of in the same manner as provided in Subsection B of this section.

G. Property subject to forfeiture that is in a law enforcement agency's possession becomes abandoned property and may be disposed of as such without a conviction if:

D. If a person establishes that the person is an innocent owner pursuant to Subsection B of this section and the state pursues a forfeiture proceeding with respect to that person's property, other than property described in Subsection D of Section 31-27-7 NMSA 1978, to successfully forfeit the property, the state shall prove by clear and convincing evidence that the innocent owner had actual knowledge of the underlying crime giving rise to the forfeiture.

E. A person who acquired an ownership interest in property subject to forfeiture after the commission of a crime that gave rise to the forfeiture and who claims to be an innocent owner has the burden of production to show that the person has legal right, title or interest in the property seized under this section.

F. If a person establishes that the person is an innocent owner as provided in Subsection B of this section and the state pursues a forfeiture proceeding against the person's property, to successfully forfeit the property, the state shall prove by clear and convincing evidence that at the time the person acquired the property or an interest in the property, the person:

(1) had actual knowledge that the property was subject to forfeiture; or

(2) was not a bona fide purchaser who was without notice of any defect in title and who gave valuable consideration.

G. If the state fails to meet its burdens as provided in Subsections C and D of this section, the court shall find that the person is an innocent owner and shall order the state to relinquish all claims of title to the innocent owner's property without delay and the property shall be released without assessment of fees or costs.

H. Seized property that is firearms, ammunition or explosives subject to forfeiture under the protections of this section and that is not returned to an innocent owner shall be destroyed upon a motion by the law enforcement agency and an order of the court."

The department shall establish a multilevel response system to evaluate and provide services to a child or the family, relatives, caretakers or guardians of a child with respect to whom a report alleging neglect or abuse has been made. The multilevel response system may include an alternative to investigation upon completion of an evaluation that may be completed at intake by the department, the results of which indicate that there is no immediate concern for the child's safety; provided, however, that an investigation shall be conducted for any report:

(1) alleging sexual abuse of a child or serious or imminent harm to a child;

(2) indicating a child fatality;

(3) requiring law enforcement involvement, as identified pursuant to rules promulgated by the department; or

B. The department may remove a case from the multilevel response system and conduct an investigation if imminent danger of serious harm to the child becomes evident. The department may reassign a case from investigation to the multilevel response system at the discretion of the department.

C. For each family, including the child who is the subject of a report to the department and that child's relatives, caretakers or guardians, that receives services under the multilevel response system, the department shall conduct a family assessment. Based on the results of the family assessment, the department may offer or provide referrals for counseling, training or other services aimed at addressing the underlying causative factors jeopardizing the safety or well-being of the child who is the subject of a report to the department. A family member, relative, caretaker or guardian

may choose to accept or decline any services or programs offered under the multilevel response system; provided, however, that if a family member, relative, caretaker or guardian declines services, the department may choose to proceed with an investigation.

D. The department shall employ licensed social workers to provide services to families, relatives, caretakers or guardians participating in the multilevel response system to the extent that licensed social workers are available for employment.

E. The department may pilot the multilevel response system prior to statewide implementation.

F. The department may limit implementation of the multilevel response system to areas of the state where appropriate services are available and operate the system within available state and federal resources.

G. The department shall:

(1) provide an annual report of system implementation and outcomes to the legislative finance committee and the department of finance and administration as part of the department's budget submission;

(2) arrange for an independent evaluation of the multilevel response system, including examining outcomes for child safety and well-being and cost-effectiveness;

(3) incorporate the multilevel response system into the department's quality assurance review process;

(4) develop performance measures, as provided in the Accountability in Government Act, for the multilevel response system; and

(5) no later than July 1, 2022, if the department pilots or otherwise geographically limits the multilevel response system, submit a plan to the legislative finance committee and the department of finance and administration setting forth how the system could be expanded statewide, including a plan to address service availability, and identifying costs that would be incurred by the department.

H. The department shall promulgate rules to implement the provisions of this section.

I. As used in this section, "family assessment" means a comprehensive, evidence-based assessment tool used by the department to determine the needs of a child and the child's family, relatives, caretakers or guardians at the time the department receives a report of child abuse and neglect, including an assessment of the likelihood of:

- (1) imminent danger to a child's well-being;
- (2) the child becoming an abused child or a neglected child; and
- (3) the strengths and needs of the child's family members, relatives, caretakers or guardians with respect to providing for the health and safety of the child."

Chapter 137 Section 3 Laws 2019

SECTION 3. Section 32A-4-18 NMSA 1978 (being Laws 1993, Chapter 77, Section 112, as amended) is amended to read:

"32A-4-18. CUSTODY HEARINGS--TIME LIMITATIONS--NOTICE--PROBABLE CAUSE.--

A. When a child alleged to be neglected or abused has been placed in the legal custody of the department or the department has petitioned the court for temporary custody, a custody hearing shall be held within ten days from the date the petition is filed to determine if the child should remain in or be placed in the department's custody pending adjudication. Upon written request of the respondent, the hearing may be held earlier, but in no event shall the hearing be held sooner than two days after the date the petition was filed.

B. The parent, guardian or custodian of the child alleged to be abused or neglected shall be given reasonable notice of the time and place of the custody hearing.

C. At the custody hearing, the court shall return legal custody of the child to the child's parent, guardian or custodian unless probable cause exists to believe that:

- (1) the child is suffering from an illness or injury, and the parent, guardian or custodian is not providing adequate care for the child;
- (2) the child is in immediate danger from the child's surroundings and removal from those surroundings is necessary for the child's safety or well-being;

(3) the child will be subject to injury by others if not placed in the custody of the department;

(4) there has been an abandonment of the child by the child's parent, guardian or custodian; or

(5) the parent, guardian or custodian is not able or willing to provide adequate supervision and care for the child.

D. At the conclusion of the custody hearing, if the court determines that probable cause exists pursuant to Subsection C of this section, the court may:

(1) return legal custody of the child to the child's parent, guardian or custodian upon such conditions as will reasonably ensure the safety and well-being of the child, including protective supervision or maintenance at home by the department or participation in programs or services aimed at addressing the underlying causative factors that impact the safety or well-being of the child; or

(2) award legal custody of the child to the department.

E. Reasonable efforts shall be made to preserve and reunify the family, with the paramount concern being the child's health and safety. When the department determines that the home of an adult relative of the child meets all relevant child protection and licensing standards and placement in the home would be in the best interest of the child, the department shall give a preference to placement of the child in that home. The department shall make reasonable efforts to conduct home studies on appropriate relatives who express an interest in providing placement for the child.

F. At the conclusion of the custody hearing, if the court determines that probable cause does not exist pursuant to Subsection C of this section, the court shall:

(1) retain jurisdiction and, unless the court permits otherwise, order that the respondent and child remain in the jurisdiction of the court pending the adjudication;

(2) return legal custody of the child to the child's parent, guardian or custodian with conditions to provide for the safety and well-being of the child; and

(3) order that the child's parent, guardian or custodian allow the child necessary contact with the child's guardian ad litem or attorney.

G. At the conclusion of the custody hearing, the court may order the respondent or the child alleged to be neglected or abused, or both, to undergo appropriate

diagnostic examinations or evaluations. If the court determines that probable cause does not exist, the court may order the respondent or the child alleged to be neglected or abused, or both, to undergo appropriate diagnostic examinations or evaluations as necessary to protect the child's best interests, based upon the allegations in the petition and the evidence presented at the custody hearing. Copies of any diagnostic or evaluation reports ordered by the court shall be provided to the parties at least five days before the adjudicatory hearing is scheduled. The reports shall not be sent to the court.

H. The Rules of Evidence shall not apply to custody hearings.

I. Notwithstanding any other provision of law, a party aggrieved by an order entered pursuant to this section shall be permitted to file an immediate appeal as a matter of right. If the order appealed from grants the legal custody of the child to or withholds it from one or more of the parties to the appeal, the appeal shall be expedited and shall be heard at the earliest practicable time. While an appeal pursuant to this section is pending, the court shall have jurisdiction to take further action in the case pursuant to Subsection B of Section 32A-1-17 NMSA 1978.

J. Nothing in this section shall be construed to abridge the rights of Indian children pursuant to the federal Indian Child Welfare Act of 1978."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF NEW MEXICO:

Chapter 140 Section 1 Laws 2019

SECTION 1. Section 7-36-21.3 NMSA 1978 (being Laws 2000, Chapter 21, Section 1, as amended) is amended to read:

"7-36-21.3. LIMITATION ON INCREASE IN VALUE FOR SINGLE-FAMILY DWELLINGS OCCUPIED BY LOW-INCOME OWNERS WHO ARE SIXTY-FIVE YEARS OF AGE OR OLDER OR DISABLED--REQUIREMENTS--PENALTIES.--

A. The valuation for property taxation purposes of a single-family dwelling owned and occupied by a person who is sixty-five years of age or older or disabled and whose modified gross income for the prior taxable year did not exceed the greater of thirty-five thousand dollars (\$35,000) or the amount calculated pursuant to Subsection F of this section shall not be greater than the valuation of the property for property taxation purposes in the:

(1) tax year in which the owner's sixty-fifth birthday occurs, if the owner owns and occupies that property; or

(2) tax year following the tax year in which an owner who is sixty-five years of age or older first owns and occupies the property.

B. The limitation provided by this section may be claimed by filing proof of eligibility with the county assessor on an application form furnished by the assessor. The application form shall be designed by the department and shall provide for proof of age or disability, occupancy and income eligibility. An owner who applies for the limitation of value specified in this section and files proof of income eligibility for the three consecutive years immediately prior to the tax year for which the application is made need not claim the limitation for subsequent tax years if there is no change in eligibility. The county assessor shall apply the limitation automatically in subsequent tax years until a change in eligibility occurs.

C. An owner who has claimed and been allowed the limitation of value specified in this section for the three consecutive tax years immediately prior to the 2020 tax year is not required to claim the limitation for subsequent tax years if there is no change in eligibility, unless the county assessor requests updated information on the owner's modified gross income. The county assessor shall apply the limitation automatically in subsequent tax years until a change in eligibility occurs.

D. A person who has had a limitation applied to a tax year and subsequently becomes ineligible for the limitation because of a change in the person's status or income or a change in the ownership of the property against which the limitation was

applied shall notify the county assessor of the loss of eligibility for the limitation by the last day of February of the tax year immediately following the year in which loss of eligibility occurs.

E. A person who knowingly violates the provisions of this section by intentionally claiming and receiving the benefit of a limitation to which the person is not entitled or who fails to comply with the provisions of Subsection D of this section shall be liable for all taxes due, interest and a civil penalty of one thousand dollars (\$1,000).

F. For the 2020 tax year and each subsequent tax year, the maximum amount of modified gross income in Subsection A of this section shall be adjusted to account for inflation. The department shall make the adjustment by multiplying thirty-five thousand dollars (\$35,000) by a fraction, the numerator of which is the consumer price index ending during the prior tax year and the denominator of which is the consumer price index ending in tax year 2019. The result of the multiplication shall be rounded down to the nearest one hundred dollars (\$100), except that if the result would be an amount less than the corresponding amount for the preceding tax year, then no adjustment shall be made.

G. The department shall publish annually the amount determined by the calculation made pursuant to Subsection F of this section and provide the calculated amount to each county assessor no later than December 1 of each tax year.

H. The limitation of value specified in Subsection A of this section does not apply to:

(1) a change in valuation resulting from any physical improvements made to the property during the year immediately prior to the tax year or a change in the permitted use or zoning of the property during the year immediately prior to the tax year; or

(2) a residential property in the first tax year that is valued for property taxation purposes.

I. As used in this section:

(1) "consumer price index" means the consumer price index for all urban consumers published by the United States department of labor for the month ending September 30;

(2) "disabled" means a person who has been determined to be blind or permanently disabled with medical improvement not expected pursuant to 42 USCA

(6) conduct any business covered by the New Mexico Mortgage Loan Originator Licensing Act without holding a valid license as required pursuant to that act,

No money in the fund shall be used by the department to administer any program, and except as provided in Subsection E of this section, no entity receiving a distribution pursuant to a program requiring matching funds shall use another distribution made pursuant to this section to meet the match required.

B. The department may use up to five hundred thousand dollars (\$500,000) annually from the local governments road fund, to purchase at fair market value, for municipalities, counties and land grants-mercedes that can demonstrate financial hardship as determined by the department, automotive, major road and miscellaneous equipment that would otherwise be sold at auction by the department as unusable for department purposes. The department shall adopt rules setting the procedure to carry out the purposes of this subsection.

C. Except for the amounts in Subsections B and E of this section, money in the local governments road fund shall be distributed in the following amounts for the specified purposes:

(1) forty-two percent for the cooperative agreements program, to be used solely for the cooperative agreements entered into pursuant to Section 67-3-28 NMSA 1978 and in accordance with the match authorized pursuant to Section 67-3-32 NMSA 1978; provided, however, that distribution amounts made pursuant to this paragraph in each year shall be based on the following allocations:

- (a) thirty-three percent for agreements entered into with counties;
- (b) forty-nine percent for agreements entered into with municipalities;
- (c) fourteen percent for agreements entered into with school districts; and
- (d) four percent for agreements entered into with other entities;

(2) sixteen percent for the municipal arterial program, to be used solely for the necessary project development, construction, reconstruction, improvement,

maintenance, repair and right-of-way and material acquisition of and for those streets that are principal extensions of rural state highways and of other streets not on the state highway system but that qualify under the designated criteria established by the department. In entering into agreements with municipalities to provide funds for any project qualifying for the municipal arterial program, the department shall give preference to municipalities that contribute an amount equal to at least twenty-five percent of the project cost, including a contribution made through funding received pursuant to Subsection E of this section;

(3) sixteen percent for school bus routes, to be used solely for cooperative agreements entered into pursuant to Section 67-3-28 NMSA 1978 and in accordance with the match authorized pursuant to Section 67-3-32 NMSA 1978 for acquiring rights of way and constructing, maintaining, repairing, improving and paving school bus routes and public school parking lots; and

(4) twenty-six percent for the county arterial program, to be used for project development, construction, reconstruction, improvement, maintenance, repair and right-of-way and material acquisition of and for county roads for which individual counties have prioritized road projects. Prior to entering into any agreements for projects with the counties for the following fiscal year, in June of each year the department shall determine and certify the amount to which each county is entitled pursuant to the following schedule:

Road Mileage Category Based on

Number of Miles Maintained

by a County:	Entitlement to County:
400 miles or under	\$250 for each mile
401 to 800 miles	\$100,000 plus \$200 for each mile over 400 miles
801 to 1,200 miles	\$180,000 plus \$150 for each mile over 800 miles
1,201 to 1,600 miles	\$240,000 plus \$100 for each mile over 1,200 miles
Over 1,600 miles	\$300,000 plus \$50 for each mile over 1,600 miles.

If in any year there is an insufficient amount in the fund of the county arterial program to certify the total amount to which all counties are entitled, the department shall decrease the entitlement amount due to each county in the same proportion as the

insufficiency is to the total entitlements to all counties. Distribution of an entitlement amount and an agreement entered into with a county for any of the purposes for which the money may be spent requires an amount from the county equal to at least twenty-five percent of the entitlement. The county contribution may be made through funds received pursuant to Subsection E of this section. Any uncommitted or unencumbered balance remaining in the county arterial program fund at the end of a fiscal year shall be transferred to the cooperative agreements program specified in Paragraph (1) of this subsection for additional funding of that program in the next fiscal year.

D. The department may transfer funds from the state road fund to the local governments road fund to facilitate cash flow for the funding of these local governments road projects. The administrator of the local governments road fund shall reimburse the state road fund in a timely manner for any such transfers.

E. The department may distribute up to one million dollars (\$1,000,000) per calendar year of the money in the local governments road fund to municipalities and counties that can demonstrate financial hardship, for use as all or a portion of the municipality's or county's matching fund requirements pursuant to this section. In order to qualify for matching funds under this subsection, a county or municipality shall provide the department with a financial hardship qualification certificate issued by the department of finance and administration."

H. If, as a result of an audit by the department or a managed audit covering multiple periods, an overpayment of tax is found in any period under the audit and if the taxpayer files a claim for refund for the overpayments identified in the audit, that overpayment may be credited against an underpayment of the same tax found in another period under audit pursuant to Section 7-1-29 NMSA 1978.

Chapter 157 Section 8 Laws 2019

SECTION 8. Section 7-1B-8 NMSA 1978 (being Laws 2015, Chapter 73, Section 8) is amended to read:

"7-1B-8. TAX PROTESTS--PROCEDURES.--

A. Upon timely receipt of a tax protest filed in accordance with the provisions of Section 7-1-24 NMSA 1978, the taxation and revenue department shall promptly acknowledge the protest by letter to the protesting taxpayer or the taxpayer's representative. If the department determines that the protest has not been filed in accordance with that section, the department shall, within twenty-one days of receipt of the protest, inform the taxpayer of the deficiency and provide the taxpayer, within twenty-one days of the taxpayer being informed, one opportunity to correct it. If the taxpayer corrects the deficiency, the protest shall be considered timely if the initial protest was filed within ninety days in accordance with Subsection D of Section 7-1-24 NMSA 1978. A determination by the department that a protest has not been filed in accordance with that section may be protested by the taxpayer.

B. Within one hundred eighty days, but no earlier than sixty days after the date of the protest, the taxation and revenue department shall request a hearing with the administrative hearings office. A taxpayer may request in writing an informal conference with the department within sixty days after the date of the protest, and the department shall conduct the requested informal conference within thirty days of the receipt of the request. Whether or not a taxpayer requests an informal conference with the department, a taxpayer may request a hearing with the administrative hearings office no earlier than sixty days from the date of the protest.

C. The taxation and revenue department shall include with its request for a hearing an answer to the protest describing the legal and factual bases supporting the department's position beyond an assertion of the presumption of correctness and articulating the remaining protested issues.

D. In the event the taxpayer first requests a hearing with the administrative hearings office, the taxation and revenue department shall, within thirty days of service of the taxpayer's request for a hearing, file its answer to the protest describing the legal and factual bases supporting the department's position beyond an assertion of the

presumption of correctness. The department may amend its answer to the protest up until ten days before the scheduled hearing or other deadline specified in a controlling scheduling order; provided that if the administrative hearings office determines that the department's amended answer unfairly prejudices the taxpayer, the administrative hearings office may disallow the amended answer. The hearing shall be limited to the grounds provided in the taxpayer's protest letter and in the department's answer to the protest.

E. If the hearing officer finds that the taxation and revenue department failed to comply with the deadlines set forth in Subsections A and B of this section, the hearing officer may order that no further interest may accrue on the protested liability.

F. If the taxpayer files the request for a hearing, the chief hearing officer shall set a hearing to take place within ninety days of the taxation and revenue department's answer to the protest, but in no case later than one hundred twenty days after the taxpayer's request for a hearing. If the department files the request for hearing with the answer to the protest, the chief hearing officer shall set a hearing to take place within ninety days of that request. Absent a conflict of interest requiring the assigned hearing officer to recuse from the case pursuant to the administrative hearings office code of conduct or an unforeseen emergency circumstance such as an accident, unexpected medical condition or illness, or vacancy of the position of the assigned hearing officer, the chief hearing officer shall not reassign a hearing officer to a case without giving the department and the taxpayer notice of that reassignment at least fourteen days before the hearing. Either party may, within ten days of notice of hearing assigning a hearing officer or notice of reassignment of a hearing officer, exercise one time the peremptory right to excuse the hearing officer designated to conduct the hearing; provided that the party has not moved for a discretionary ruling from the assigned hearing officer, nor previously exercised its right of peremptory excusal. Once a hearing officer has been peremptorily excused, that hearing officer shall not be assigned to the case again.

G. The administrative hearings office shall rule on a dispositive motion, including a motion for summary judgment, a motion for partial summary judgment or a motion to dismiss, filed by the taxation and revenue department or the taxpayer at least thirty days before the hearing unless the parties consent to a different deadline in a scheduling order.

H. A taxpayer may appear at the hearing on the taxpayer's own behalf, may appear through a bona fide employee or may be represented by an attorney, a certified public accountant, an employee of a New Mexico licensed certified public accounting firm whose authorization by the firm and by the taxpayer to appear is evidenced in writing or an enrolled agent. An attorney, a certified public accountant, an employee of a New Mexico licensed certified public accounting firm or an enrolled agent shall abide

by their respective controlling professional or ethical standards of conduct at all stages of the administrative proceeding before the administrative hearings office. If the taxation and revenue department and the taxpayer agree, the hearing may be conducted via videoconference. At the beginning of the hearing, the hearing officer shall inform the taxpayer of the taxpayer's right to representation. A hearing shall be closed to the public except upon request of the taxpayer. A hearing officer may postpone or continue a hearing at the hearing officer's discretion. As used in this subsection, "enrolled agent" means a federally licensed tax practitioner with unlimited rights to represent taxpayers before the internal revenue service.

I. Within thirty days after the hearing, the hearing officer shall inform the taxation and revenue department and the taxpayer in writing of the decision and, in accordance with Section 7-1-25 NMSA 1978, of the aggrieved party's right to, and the requirements for perfection of, an appeal from the decision to the court of appeals and of the consequences of a failure to appeal. The written decision shall embody:

(1) an order granting or denying the relief requested or granting or denying a part of the relief requested, as appropriate; and

(2) findings of fact and law and a thorough discussion of the reasoning used to support the order with citations to the record and applicable law.

J. A taxpayer with two or more protests containing related issues may request that the protests be combined and heard jointly. The hearing officer shall grant the request to combine protests unless it would create an unreasonable burden on the administrative hearings office or the taxation and revenue department.

K. Nothing in this section shall be construed to authorize a criminal proceeding or to authorize an administrative protest of the issuance of a subpoena or summons."

A person applying for or renewing a REAL ID-compliant driver's license shall provide documentation required by the federal government of the applicant's identity; date of birth; social security number, if applicable; address of current residence; and lawful status. G. A person with lawful status may apply for a REAL ID-compliant driver's license or a standard driver's license.

J. An application for a standard driver's license shall include proof of the applicant's identity and age.

K. An applicant shall indicate whether the applicant has been convicted of driving while under the influence of intoxicating liquor or drugs in this state or in any other jurisdiction. Failure to disclose any such conviction prevents the issuance of a license for a period of one year if the failure to disclose is discovered by the department prior to issuance. If the nondisclosure is discovered by the department subsequent to issuance, the department shall revoke the license for a period of one year. Intentional and willful failure to disclose, as required in this subsection, is a misdemeanor.

O. Whenever an application is received from a person previously licensed in another jurisdiction, the department may request a copy of the driver's record from the other jurisdiction. When received, the driver's record may become a part of the driver's record in this state with the same effect as though entered on the driver's record in this state in the original instance.

P. Whenever the department receives a request for a driver's record from another licensing jurisdiction, the record shall be forwarded without charge.

SECTION 1. Section 22-11-29 NMSA 1978 (being Laws 1967, Chapter 16, Section 152, as amended) is amended to read:

"22-11-29. RETIREMENT BENEFIT OPTIONS.--

A. Upon retirement pursuant to the Educational Retirement Act, a member may elect, and, except as provided in Subsection D or E of this section, such election shall be irrevocable, to receive the actuarial equivalent of the member's retirement benefit, as provided in Section 22-11-30 NMSA 1978, to be effective on the member's retirement in any one of the following optional forms:

(1) OPTION A. An unreduced retirement benefit pursuant to Section 22-11-30 NMSA 1978;

(2) OPTION B. A reduced annuity payable during the member's life with provision that upon the member's death the same annuity shall be continued during the life of and paid to the beneficiary designated by the member in writing at the time of electing this option; or

(3) OPTION C. A reduced annuity payable during the member's life with provision that upon the member's death one-half of this same annuity shall be continued during the life of and paid to the beneficiary designated by the member in writing at the time of electing this option.

B. In the case of Options B and C of Subsection A of this section, the actuarial equivalent of the member's retirement benefit shall be computed on the basis of the lives of both the member and the beneficiary.

C. In the event that the named beneficiary of a retired member who elected Option B or C of Subsection A of this section at the time of retirement predeceases the retired member, the annuity of the retired member shall be adjusted by adding an amount equal to the amount by which the annuity of the retired member was reduced at

retirement as a result of the election of Option B or C. The adjustment authorized in this subsection shall be made as follows:

(1) beginning on the first month following the month in which the named beneficiary of a retiree dies applicable to an annuity received by a retiree who retires after June 30, 1987; or

(2) beginning on July 1, 1987 applicable to an annuity received by a retiree who retired prior to July 1, 1987 and otherwise qualifies for the adjustment; provided, however, no adjustment shall be made retroactively.

D. A retired member who is being paid an adjusted annuity pursuant to Subsection C of this section because of the death of the named beneficiary may exercise a one-time irrevocable option to designate another individual as the beneficiary and may select either Option B or Option C of Subsection A of this section; provided that:

(1) the amount of the annuity under the option selected shall be recalculated and have the same actuarial present value, computed on the effective date of the designation, as the annuity being paid to the retired member prior to the designation;

(3) the retired member shall pay one hundred dollars (\$100) to the board to defray the cost of determining the new annuity amount.

E. A retired member who is being paid an annuity under Option B or C of Subsection A of this section with a living designated beneficiary other than the retired member's spouse or former spouse may exercise a one-time irrevocable option to deselect the designated beneficiary and elect to:

(1) designate another beneficiary; provided that:

(a) the retired member shall not have an option to change from the current form of payment;

(b) the amount of the annuity under the form of payment shall be recalculated and shall have the same actuarial present value, computed as of the effective date of the designation, as the amount of annuity paid prior to the designation; and

(c) the retired member shall pay one hundred dollars (\$100) to the board to defray the cost of determining the new annuity amount; or

(2) have future annuity payments made without a reduction as a result of Option B or C.

F. In the event of the death of the member who has not retired and who has completed at least five years' earned service credit, the member shall be considered as retiring on the first day of the month following the date of death, and the benefits due the surviving beneficiary, computed as of that date, shall, except as provided in Subsection J of this section, be commenced effective on the first day of such month in accordance with the terms of Option B of Subsection A of this section. If the benefit is thus deferred, it shall be calculated as though the member had retired on the first day of the month in which the beneficiary elects to receive the benefit. In the event of the death of the beneficiary after the death of the member and prior to the date on which the beneficiary has elected to receive the beneficiary's benefit, the estate of the beneficiary shall be entitled to a refund of the member's contributions plus interest at the rate earned by the fund during the preceding fiscal year, reduced by the sum of any disability benefits previously received by the member.

G. In the event of the death of a member who has not retired and who has completed at least five years' earned service credit, but who has not designated a beneficiary in writing pursuant to the Educational Retirement Act, the eligible surviving spouse or surviving domestic partner shall be the surviving beneficiary eligible for benefits in accordance with the provisions of Subsection F of this section.

H. In the case of death of a retired member who did not elect either Option B or C of Subsection A of this section and before the benefits paid to the member have equaled the sum of the member's accumulated contributions to the fund plus accumulated interest at the rate set by the board, the balance shall be paid to the beneficiary designated in writing to the director by the member or, if no beneficiary was designated, to the eligible surviving spouse or surviving domestic partner of the member or, if there is no eligible surviving spouse or domestic partner of the member, to the estate of the member.

I. No benefit shall be paid pursuant to this section if the member's contributions have been refunded pursuant to Section 22-11-15 NMSA 1978.

J. In the case of death of a member with less than five years' earned service credit or death of a member who has filed with the director a notice rejecting the provisions of Subsection F of this section, which notice shall be revocable by the member at any time prior to retirement, the member's contributions to the fund plus interest at the rate set by the board shall be paid to the beneficiary designated in writing to the director by the member or, if no beneficiary was designated, to the eligible surviving spouse or surviving domestic partner of the member or, if there is no eligible surviving spouse or domestic partner of the member, to the estate of the member." _____

Chapter 174 Section 4 Laws 2019

SECTION 4. Section 22-8B-6 NMSA 1978 (being Laws 1999, Chapter 281, Section 6, as amended) is amended to read:

"22-8B-6. CHARTER SCHOOL REQUIREMENTS--APPLICATION PROCESS-- AUTHORIZATION--STATE BOARD OF FINANCE DESIGNATION REQUIRED-- PUBLIC HEARINGS--SUBCOMMITTEES.--

A. A local school board has the authority to approve the establishment of a locally chartered charter school within that local school board's district.

B. No later than the second Tuesday of January of the year in which an application will be filed, the organizers of a proposed charter school shall provide written notification to the commission and the school district in which the charter school is proposed to be located of their intent to establish a charter school. Failure to notify may result in an application not being accepted.

C. A charter school applicant shall apply to either a local school board or the commission for a charter. If an application is submitted to a chartering authority, it must process the application. Applications for initial charters shall be submitted by June 1 to be eligible for consideration for the following fiscal year; provided that the June 1 deadline may be waived upon agreement of the applicant and the chartering authority.

D. An application shall include the total number of grades the charter school proposes to provide, either immediately or phased. A charter school may decrease the number of grades it eventually offers, but it shall not increase the number of grades or the total number of students proposed to be served in each grade.

E. An application shall include a detailed description of the charter school's projected facility needs, including projected requests for capital outlay assistance that have been approved by the director of the public school facilities authority or the director's designee. The director shall respond to a written request for review from a charter applicant within forty-five days of the request.

F. An application may be made by one or more teachers, parents or community members or by a public post-secondary educational institution or nonprofit organization. Municipalities, counties, private post-secondary educational institutions and for-profit business entities are not eligible to apply for or receive a charter.

G. An initial application for a charter school shall not be made after June 30, 2007 if the proposed charter school's proposed enrollment for all grades or the proposed charter school's proposed enrollment for all grades in combination with any other charter school's enrollment for all grades would equal or exceed ten percent of the total MEM of the school district in which the charter school will be geographically located and that school district has a total enrollment of not more than one thousand three hundred students.

H. A state-chartered charter school shall not be approved for operation unless its governing body has qualified to be a board of finance.

I. The chartering authority shall receive and review all applications for charter schools submitted to it. The chartering authority shall not charge application fees.

J. The chartering authority shall hold at least one public hearing in the school district in which the charter school is proposed to be located to obtain information and community input to assist it in its decision whether to grant a charter school application. The chartering authority may designate a subcommittee of no fewer than three members to hold the public hearing, and, if so, the hearing shall be transcribed for later

review by other members of the chartering authority. Community input may include written or oral comments in favor of or in opposition to the application from the applicant, the local community and, for state-chartered charter schools, the local school board and school district in whose geographical boundaries the charter school is proposed to be located.

K. The chartering authority shall rule on the application for a charter school in a public meeting by September 1 of the year the application was received; provided, however, that prior to ruling on the application for which a designated subcommittee was used, any member of the chartering authority who was not present at the public hearing shall receive the transcript of the public hearing together with documents submitted for the public hearing. If not ruled upon by that date, the charter application shall be automatically reviewed by the secretary in accordance with the provisions of Section 22-8B-7 NMSA 1978. The charter school applicant and the chartering authority may, however, jointly waive the deadlines set forth in this section.

L. A chartering authority may approve, approve with conditions or deny an application. A chartering authority may deny an application if:

- (1) the application is incomplete or inadequate;
- (2) the application does not propose to offer an educational program consistent with the requirements and purposes of the Charter Schools Act;
- (3) the proposed head administrator or other administrative or fiscal staff was involved with another charter school whose charter was denied or revoked for fiscal mismanagement or the proposed head administrator or other administrative or fiscal staff was discharged from a public school for fiscal mismanagement;
- (4) for a proposed state-chartered charter school, it does not request to have the governing body of the charter school designated as a board of finance or the governing body does not qualify as a board of finance;
- (5) for a proposed charter school on tribal land, it fails to receive approval from the tribal government; or
- (6) the application is otherwise contrary to the best interests of the charter school's projected students, the local community or the school district in whose geographic boundaries the charter school applies to operate.

M. If the chartering authority denies a charter school application or approves the application with conditions, it shall state its reasons for the denial or conditions in writing

within fourteen days of the meeting. If the chartering authority grants a charter, the approved charter shall be provided to the applicant together with any imposed conditions.

N. A charter school that has received a notice from the chartering authority denying approval of the charter shall have a right to a hearing by the secretary as provided in Section 22-8B-7 NMSA 1978."

Chapter 174 Section 5 Laws 2019

SECTION 5. Section 22-8B-12 NMSA 1978 (being Laws 1999, Chapter 281, Section 12, as amended) is amended to read:

"22-8B-12. CHARTER SCHOOLS--TERM--OVERSIGHT AND CORRECTIVE ACTIONS--SITE VISITS--RENEWAL OF CHARTER--GROUNDS FOR NONRENEWAL OR REVOCATION.--

A. A charter school may be approved for an initial term of six years; provided that the first year shall be used exclusively for planning and not for completing the application. A charter may be renewed for successive periods of five years each. Approvals of less than five years may be agreed to between the charter school and the chartering authority.

B. During the planning year, the charter school shall file a minimum of three status reports with the chartering authority and the department for the purpose of demonstrating that the charter school's implementation progress is consistent with the conditions, standards and procedures of its approved charter. The report content, format and schedule for submission shall be agreed to by the chartering authority and the charter school and become part of the charter contract.

C. Prior to the end of the planning year, the charter school shall demonstrate that its facilities meet the requirements of Section 22-8B-4.2 NMSA 1978.

D. A chartering authority shall monitor the fiscal, overall governance and student performance and legal compliance of the charter schools that it oversees, including reviewing the data provided by the charter school to support ongoing evaluation according to the charter contract. Every chartering authority may conduct or require oversight activities that allow the chartering authority to fulfill its responsibilities under the Charter Schools Act, including conducting appropriate inquiries and investigations; provided that the chartering authority complies with the provisions of the Charter Schools Act and the terms of the charter contract and does not unduly inhibit the autonomy granted to the charter schools that it governs.

E. As part of its performance review of a charter school, a chartering authority shall visit a charter school under its authority at least once annually to provide technical assistance to the charter school and to determine the status of the charter school and the progress of the charter school toward the performance framework goals in its charter contract.

F. If, based on the performance review conducted by the chartering authority pursuant to Subsection D of this section, a charter school's fiscal, overall governance or student performance or legal compliance appears unsatisfactory, the chartering authority shall promptly notify the governing body of the charter school of the unsatisfactory review and provide reasonable opportunity for the governing body to remedy the problem; provided that if the unsatisfactory review warrants revocation, the revocation procedures set forth in this section shall apply. A chartering authority may take appropriate corrective actions or exercise sanctions, as long as such sanctions do not constitute revocation, in response to the unsatisfactory review. Such actions or sanctions by the chartering authority may include requiring a governing body to develop and execute a corrective action plan with the chartering authority that sets forth time frames for compliance.

G. Every chartering authority shall submit an annual report to the division, including a performance report for each charter school that it oversees, in accordance with the performance framework set forth in the charter contract.

H. The department shall review the annual report received from the chartering authority to determine if the department or local school board rules and policies from which the charter school was released pursuant to the provisions of Section 22-8B-5 NMSA 1978 assisted or impeded the charter school in meeting its stated goals and objectives. The department shall use the annual reports received from the chartering authorities as part of its report to the governor, the legislative finance committee and the legislative education study committee as required by the Charter Schools Act.

I. No later than two hundred seventy days prior to the date in which the charter expires, the governing body may submit a renewal application to the chartering authority. A charter school may apply to a different chartering authority for renewal. The chartering authority shall rule in a public hearing on the renewal application no later than one hundred eighty days prior to the expiration of the charter.

J. A charter school renewal application submitted to the chartering authority shall contain:

(1) a report on the progress of meeting the academic performance, financial compliance and governance responsibilities of the charter school, including

achieving the goals, objectives, student performance outcomes, state standards of excellence and other terms of the charter contract, including the accountability requirements set forth in the Assessment and Accountability Act;

(2) a financial statement that discloses the costs of administration, instruction and other spending categories for the charter school that is understandable to the general public, that allows comparison of costs to other schools or comparable organizations and that is in a format required by the department;

(3) a copy of the charter contract executed in compliance with the provisions of Section 22-8B-9 NMSA 1978;

(4) a petition in support of the charter school renewing its charter status signed by not less than sixty-five percent of the employees in the charter school;

(5) a petition in support of the charter school renewing its charter status signed by at least seventy-five percent of the households whose children are enrolled in the charter school;

(6) a description of the charter school facilities and assurances that the facilities are in compliance with the requirements of Section 22-8B-4.2 NMSA 1978; and

(7) for charter schools located on tribal land, documentation of ongoing consultation pursuant to the Indian Education Act.

K. A charter may be suspended, revoked or not renewed by the chartering authority if the chartering authority determines that the charter school did any of the following:

(1) committed a material violation of any of the conditions, standards or procedures set forth in the charter contract;

(2) failed to meet or make substantial progress toward achievement of the department's standards of excellence or student performance standards identified in the charter contract;

(3) failed to meet generally accepted standards of fiscal management;

(4) for a charter school located on tribal land, failed to comply with ongoing consultations pursuant to the Indian Education Act; or

"1-19A-13. AMOUNT OF FUND DISTRIBUTION.--

A. By September 1 of each odd-numbered year, the secretary shall determine the amount of money to be distributed to each certified candidate for the election cycle ending with the next general election, based on the type of election and the provisions of Subsections B through G of this section.

B. For contested primary elections, the amount of money to be distributed to a certified candidate is equal to the following:

(1) for the office of public regulation commissioner, twenty-five cents (\$.25) for each voter of the candidate's party in the district of the office for which the candidate is running; and

(2) for the office of justice of the supreme court and judge of the court of appeals, fifteen cents (\$.15) for each voter of the candidate's party in the state.

C. For uncontested primary elections in which another candidate has filed a declaration of candidacy for nomination in another party's primary for the same office and that candidate's primary is contested, the amount of money to be distributed to a certified candidate is equal to twenty percent of the amount specified in Subsection B of this section.

D. For uncontested primary elections in which another candidate has filed a declaration of candidacy for nomination in another party's primary for the same office, but no primary for the office is contested, the amount of money to be distributed to a certified candidate is equal to the average of the amount each candidate would receive pursuant to Subsection B of this section.

(1) for the office of public regulation commissioner, twenty-five cents (\$.25) for each voter in the district of the office for which the candidate is running; and

G. Once the certification for candidates for the primary election has been completed, the secretary shall calculate the total amount of money to be distributed in the primary election cycle, based on the number of certified candidates and the allocations specified in this section. The secretary shall also prepare an estimate of the total amount of money that might be distributed in the general election cycle. If the total amount to be distributed in the primary election cycle and the estimated total amount to be distributed in the general election cycle taken together exceed the amount expected to be available in the fund, the secretary shall allocate the amount available between the primary and general election cycles. This allocation shall be based on the ratio of the two total amounts.

H. If the allocation specified in Subsection G of this section is greater than the total amount available for distribution, then the amounts to be distributed to individual candidates, specified in Subsections B through F of this section, shall each be reduced by the same percentage as the reduction by which the total amount needed has been reduced relative to the total amount available.

I. At least every two years after January 1, 2007, the secretary shall evaluate and modify as necessary the dollar values originally determined by Subsections B through F of this section and shall increase the amounts by the percentage of the preceding two calendar years' increase of the consumer price index for all urban consumers, United States city average for all items, published by the United States department of labor.

If the secretary makes a determination that a violation of that act has occurred, the secretary shall impose a fine and transmit the finding to the attorney general for criminal prosecution pursuant to Subsection B of this section. In determining whether a certified candidate is in violation of the expenditure limits of that act, the secretary may consider as a mitigating factor any circumstances out of the candidate's control.

B. A person who willfully or knowingly violates the provisions of the Voter Action Act or knowingly makes a false statement in a report required by that act is guilty of a fourth degree felony and, if the person is a certified candidate, shall return to the fund all money distributed to that candidate."

"22-24-4. PUBLIC SCHOOL CAPITAL OUTLAY FUND CREATED-- USE.--

A. The "public school capital outlay fund" is created. Balances remaining in the fund at the end of each fiscal year shall not revert.

B. Except as provided in Subsections G and I through Q of this section, money in the fund may be used only for capital expenditures deemed necessary by the council for an adequate educational program.

C. The council may authorize the purchase by the authority of portable classrooms to be loaned to school districts to meet a temporary requirement. Payment for these purchases shall be made from the fund. Title to and custody of the portable classrooms shall rest in the authority. The council shall authorize the lending of the portable classrooms to school districts upon request and upon finding that sufficient need exists. Application for use or return of state-owned portable classroom buildings shall be submitted by school districts to the council. Expenses of maintenance of the portable classrooms while in the custody of the authority shall be paid from the fund; expenses of maintenance and insurance of the portable classrooms while in the custody of a school district shall be the responsibility of the school district. The council may authorize the permanent disposition of the portable classrooms by the public school facilities authority with prior approval of the state board of finance.

D. Applications for assistance from the fund shall be made by school districts to the council in accordance with requirements of the council. Except as provided in Subsection K of this section, the council shall require as a condition of application that a school district have a current five-year facilities plan, which shall include a current preventive maintenance plan to which the school adheres for each public school in the school district.

E. The council shall review all requests for assistance from the fund and shall allocate funds only for those capital outlay projects that meet the criteria of the Public School Capital Outlay Act.

F. Money in the fund shall be disbursed by warrant of the department of finance and administration on vouchers signed by the secretary of finance and administration following certification by the council that an application has been approved or an expenditure has been ordered by a court pursuant to Section 22-24-5.4 NMSA 1978. At the discretion of the council, money for a project shall be distributed as follows:

(1) up to ten percent of the portion of the project cost funded with distributions from the fund or five percent of the total project cost, whichever is greater, may be paid to the school district before work commences with the balance of the grant award made on a cost-reimbursement basis; or

(2) the council may authorize payments directly to the contractor.

G. Balances in the fund may be annually appropriated for the core administrative functions of the authority pursuant to the Public School Capital Outlay Act, and, in addition, balances in the fund may be expended by the authority, upon approval of the council, for project management expenses; provided that:

(1) the total annual expenditures from the fund for the core administrative functions pursuant to this subsection shall not exceed five percent of the average annual grant assistance authorized from the fund during the three previous fiscal years; and

(2) any unexpended or unencumbered balance remaining at the end of a fiscal year from the expenditures authorized in this subsection shall revert to the fund.

H. The fund may be expended by the council for building system repair, renovation or replacement initiatives with projects to be identified by the council pursuant to Section 22-24-4.6 NMSA 1978; provided that money allocated pursuant to this subsection shall be expended within three years of the allocation.

I. The fund may be expended annually by the council for grants to school districts for the purpose of making lease payments for classroom facilities, including facilities leased by charter schools. The grants shall be made upon application by the school districts and pursuant to rules adopted by the council; provided that an application on behalf of a charter school shall be made by the school district, but, if the school district fails to make an application on behalf of a charter school, the charter school may submit its own application. The following criteria shall apply to the grants:

(1) the amount of a grant to a school district shall not exceed:

(a) the actual annual lease payments owed for leasing classroom space for schools, including charter schools, in the school district; or

(b) seven hundred dollars (\$700) multiplied by the MEM using the leased classroom facilities; provided that in fiscal year 2009 and in each subsequent fiscal year, this amount shall be adjusted by the percentage change between the penultimate calendar year and the immediately preceding calendar year of the

consumer price index for the United States, all items, as published by the United States department of labor;

(2) a grant received for the lease payments of a charter school may be used by that charter school as a state match necessary to obtain federal grants if required;

(3) at the end of each fiscal year, any unexpended or unencumbered balance of the appropriation shall revert to the fund;

(4) no grant shall be made for lease payments due pursuant to a financing agreement under which the facilities may be purchased for a price that is reduced according to the lease payments made unless:

(a) the agreement has been approved pursuant to the provisions of the Public School Lease Purchase Act; and

(b) the facilities are leased by a charter school;

(5) if the lease payments are made pursuant to a financing agreement under which the facilities may be purchased for a price that is reduced according to the lease payments made, neither a grant nor any provision of the Public School Capital Outlay Act creates a legal obligation for the school district or charter school to continue the lease from year to year or to purchase the facilities nor does it create a legal obligation for the state to make subsequent grants pursuant to the provisions of this subsection; and

(6) as used in this subsection:

(a) "MEM" means: 1) the average full-time-equivalent enrollment using leased classroom facilities on the second and third reporting dates of the prior school year; or 2) in the case of an approved charter school that has not commenced classroom instruction, the estimated full-time-equivalent enrollment that will use leased classroom facilities in the first year of instruction, as shown in the approved charter school application; provided that, after the second reporting date of the school year, the MEM shall be adjusted to reflect the full-time-equivalent enrollment on that date; and

(b) "classroom facilities" or "classroom space" includes the space needed, as determined by the minimum required under the statewide adequacy standards, for the direct administration of school activities.

J. In addition to other authorized expenditures from the fund, up to one percent of the average grant assistance authorized from the fund during the three previous fiscal years may be expended in each fiscal year by the authority to pay the state fire marshal, the construction industries division of the regulation and licensing department and local jurisdictions having authority from the state to permit and inspect projects for expenditures made to permit and inspect projects funded in whole or in part under the Public School Capital Outlay Act. The authority may enter into contracts with the state fire marshal, the construction industries division or the appropriate local authorities to carry out the provisions of this subsection. Such a contract may provide for initial estimated payments from the fund prior to the expenditures if the contract also provides for additional payments from the fund if the actual expenditures exceed the initial payments and for repayments back to the fund if the initial payments exceed the actual expenditures. Money distributed from the fund to the state fire marshal or the construction industries division pursuant to this subsection shall be used to supplement, rather than supplant, appropriations to those entities.

K. Pursuant to guidelines established by the council, allocations from the fund may be made to assist school districts in developing and updating five-year facilities plans required by the Public School Capital Outlay Act; provided that:

(1) no allocation shall be made unless the council determines that the school district is willing and able to pay the portion of the total cost of developing or updating the plan that is not funded with the allocation from the fund. Except as provided in Paragraph (2) of this subsection, the portion of the total cost to be paid with the allocation from the fund shall be determined pursuant to the methodology in Subsection B of Section 22-24-5 NMSA 1978; or

(2) the allocation from the fund may be used to pay the total cost of developing or updating the plan if:

(a) the school district has fewer than an average of six hundred full-time-equivalent students on the second and third reporting dates of the prior school year; or

(b) the school district meets all of the following requirements: 1) the school district has fewer than an average of one thousand full-time-equivalent students on the second and third reporting dates of the prior school year; 2) the school district has at least seventy percent of its students eligible for free or reduced-fee lunch; 3) the state share of the total cost, if calculated pursuant to the methodology in Subsection B of Section 22-24-5 NMSA 1978, would be less than fifty percent; and 4) for all educational purposes, the school district has a residential property tax rate of at least seven dollars (\$7.00) on each one thousand dollars (\$1,000) of taxable value, as

measured by the sum of all rates imposed by resolution of the local school board plus rates set to pay interest and principal on outstanding school district general obligation bonds.

L. Upon application by a school district, allocations from the fund may be made by the council for the purpose of demolishing abandoned school district facilities; provided that:

(1) the costs of continuing to insure an abandoned facility outweigh any potential benefit when and if a new facility is needed by the school district;

(2) there is no practical use for the abandoned facility without the expenditure of substantial renovation costs; and

(3) the council may enter into an agreement with the school district under which an amount equal to the savings to the district in lower insurance premiums are used to reimburse the fund fully or partially for the demolition costs allocated to the district.

M. Up to ten million dollars (\$10,000,000) of the fund may be expended each year for an education technology infrastructure deficiency corrections initiative pursuant to Section 22-24-4.5 NMSA 1978; provided that funding allocated pursuant to this section shall be expended within three years of its allocation.

N. For each fiscal year from 2018 through 2022, twenty-five million dollars (\$25,000,000) of the public school capital outlay fund is reserved for appropriation by the legislature to the instructional material fund or to the transportation distribution of the public school fund. The secretary shall certify the need for the issuance of supplemental severance tax bonds to meet an appropriation from the public school capital outlay fund to the instructional material fund or to the transportation distribution of the public school fund. Any portion of an amount of the public school capital outlay fund that is reserved for appropriation by the legislature for a fiscal year, but that is not appropriated before the first day of that fiscal year, may be expended by the council as provided in this section.

O. Up to ten million dollars (\$10,000,000) of the fund may be expended in each of fiscal years 2019 through 2022 for school security system project grants made in accordance with Section 22-24-4.7 NMSA 1978.

P. The fund may be expended in each of fiscal years 2020 through 2024 for a pre-kindergarten classroom facilities initiative in accordance with Section 1 of this 2019 act.

Q. The council may fund pre-kindergarten classrooms with a qualifying, awarded standards-based project; provided that pre-kindergarten classroom space shall not be included in the project prioritization calculation adopted by the council pursuant to Section 22-24-5 NMSA 1978. The council shall develop pre-kindergarten classroom standards to use when funding pre-kindergarten space."

Chapter 179 Section 3 Laws 2019

The authority may enter into contracts with the state fire marshal, the construction industries division or the appropriate local authorities to carry out the provisions of this subsection. Such a contract may provide for initial estimated payments from the fund prior to the expenditures if the contract also provides for additional payments from the fund if the actual expenditures exceed the initial payments and for repayments back to the fund if the initial payments exceed the actual expenditures. Money distributed from the fund to the state fire marshal or the construction industries division pursuant to this subsection shall be used to supplement, rather than supplant, appropriations to those entities.

K. Pursuant to guidelines established by the council, allocations from the fund may be made to assist school districts in developing and updating five-year facilities plans required by the Public School Capital Outlay Act; provided that:

(1) no allocation shall be made unless the council determines that the school district is willing and able to pay the portion of the total cost of developing or updating the plan that is not funded with the allocation from the fund. Except as provided in Paragraph (2) of this subsection, the portion of the total cost to be paid with the allocation from the fund shall be determined pursuant to the methodology in Subsection B of Section 22-24-5 NMSA 1978; or

(2) the allocation from the fund may be used to pay the total cost of developing or updating the plan if:

(a) the school district has fewer than an average of six hundred full-time-equivalent students on the second and third reporting dates of the prior school year; or

(b) the school district meets all of the following requirements: 1) the school district has fewer than an average of one thousand full-time-equivalent students on the second and third reporting dates of the prior school year; 2) the school district has at least seventy percent of its students eligible for free or reduced-fee lunch;

3) the state share of the total cost, if calculated pursuant to the methodology in Subsection B of Section 22-24-5 NMSA 1978, would be less than fifty percent; and 4) for all educational purposes, the school district has a residential property tax rate of at least seven dollars (\$7.00) on each one thousand dollars (\$1,000) of taxable value, as measured by the sum of all rates imposed by resolution of the local school board plus rates set to pay interest and principal on outstanding school district general obligation bonds.

L. Upon application by a school district, allocations from the fund may be made by the council for the purpose of demolishing abandoned school district facilities; provided that:

(1) the costs of continuing to insure an abandoned facility outweigh any potential benefit when and if a new facility is needed by the school district;

(2) there is no practical use for the abandoned facility without the expenditure of substantial renovation costs; and

(3) the council may enter into an agreement with the school district under which an amount equal to the savings to the district in lower insurance premiums are used to reimburse the fund fully or partially for the demolition costs allocated to the district.

M. Up to ten million dollars (\$10,000,000) of the fund may be expended each year for an education technology infrastructure deficiency corrections initiative pursuant to Section 22-24-4.5 NMSA 1978; provided that funding allocated pursuant to this section shall be expended within three years of its allocation.

N. For each fiscal year from 2018 through 2022, twenty-five million dollars (\$25,000,000) of the fund is reserved for appropriation by the legislature to the instructional material fund or to the transportation distribution of the public school fund. The secretary shall certify the need for the issuance of supplemental severance tax bonds to meet an appropriation from the public school capital outlay fund to the instructional material fund or to the transportation distribution of the public school fund. Any portion of an amount of the public school capital outlay fund that is reserved for appropriation by the legislature for a fiscal year, but that is not appropriated before the first day of that fiscal year, may be expended by the council as provided in this section.

O. Up to ten million dollars (\$10,000,000) of the fund may be expended in each of fiscal years 2019 through 2022 for school security system project grants made in accordance with Section 22-24-4.7 NMSA 1978."

building system that, in the opinion of the school district, the repair, renovation or replacement of which would extend the useful life of the building itself.

C. The authority shall verify the assessment made by the school district and rank the application with similar applications pursuant to a methodology adopted by the council.

D. After a public hearing and to the extent that money is available in the fund for such purposes, the council shall approve building system repair, renovation or replacement projects on the established priority basis; provided that no project shall be approved unless the council determines that the school district is willing and able to pay the portion of the total cost of the project that is not funded with grant assistance from the fund.

E. The state share of the cost of an approved building system repair, renovation or replacement project shall be calculated pursuant to the methodology in Subsection B of Section 22-24-5 NMSA 1978.

C. The authority shall verify the assessment made by the school district and rank all applications it receives for school security system project grants according to the methodology adopted by the council for that purpose.

D. After a public hearing, and to the extent that money is available in the fund for the purpose, the council shall make school security system project grants to school

districts that the council determines are willing and able to pay for the portion of the total project cost not funded with grant assistance from the fund and according to those applicants' ranking.

E. The state share of the cost of an approved school security system project shall be calculated according to the methodology outlined in Subsection B of Section 22-24-5 NMSA 1978.

F. A school district that receives a grant in accordance with this section shall expend the grant money within three years after the grant allocation. Money not spent in that time shall revert to the fund."

(a) the total of all legislative appropriations made after January 1, 2003 for nonoperating purposes either directly to the subject school district or to another governmental entity for the purpose of passing the money through directly to the subject school district, and not rejected by the subject school district, is calculated; provided that: 1) an appropriation made in a fiscal year shall be deemed to be accepted by a school district unless, prior to June 1 of that fiscal year, the school district notifies the department of finance and administration and the public education department that the school district is rejecting the appropriation; 2) the total shall exclude any education technology appropriation made prior to January 1, 2005 unless the appropriation was on or after January 1, 2003 and not previously used to offset distributions pursuant to the Technology for Education Act; 3) the total shall exclude any appropriation previously made to the subject school district that is reauthorized for expenditure by another recipient; 4) the total shall exclude one-half of the amount of any appropriation made or reauthorized after January 1, 2007 if the purpose of the appropriation or reauthorization is to fund, in whole or in part, a capital outlay project that, when prioritized by the council pursuant to this section either in the immediately preceding funding cycle or in the current funding cycle, ranked in the top one hundred fifty projects statewide; 5) the total shall exclude the proportionate share of any appropriation made or reauthorized after January 1, 2008 for a capital project that will be jointly used by a governmental entity other than the subject school district. Pursuant to criteria adopted by rule of the council

and based upon the proposed use of the capital project, the council shall determine the proportionate share to be used by the governmental entity and excluded from the total; and 6) unless the grant award is made to the state-chartered charter school or unless the appropriation was previously used to calculate a reduction pursuant to this paragraph, the total shall exclude appropriations made after January 1, 2007 for nonoperating purposes of a specific state-chartered charter school, regardless of whether the charter school is a state-chartered charter school at the time of the appropriation or later opts to become a state-chartered charter school;

(b) the percentage used for the subject school district for the applicable fiscal year pursuant to Paragraph (7) of this subsection is subtracted from one;

(c) the value calculated pursuant to Subparagraph (a) of this paragraph for the subject school district is multiplied by the amount calculated pursuant to Subparagraph (b) of this paragraph for that school district;

(e) the amount to be distributed from the fund pursuant to Paragraph (7) of this subsection shall be reduced by the amount calculated pursuant to Subparagraph (d) of this paragraph;

(10) the amount calculated pursuant to Paragraph (7) of this subsection, after any reduction pursuant to Paragraph (9) of this subsection, may be increased by an additional five percent if the council finds that the subject school district has been exemplary in implementing and maintaining a preventive maintenance program. The council shall adopt such rules as are necessary to implement the provisions of this paragraph;

(11) the council may adjust the amount of local share otherwise required if it determines that a school district has made a good-faith effort to use all of its local resources. Before making any adjustment to the local share, the council shall consider whether:

(a) the school district has insufficient bonding capacity over the next four years to provide the local match necessary to complete the project and, for all educational purposes, has a residential property tax rate of at least ten dollars (\$10.00) on each one thousand dollars (\$1,000) of taxable value, as measured by the sum of all

rates imposed by resolution of the local school board plus rates set to pay interest and principal on outstanding school district general obligation bonds;

(b) the school district: 1) has fewer than an average of eight hundred full-time-equivalent students on the second and third reporting dates of the prior school year; 2) has at least seventy percent of its students eligible for free or reduced-fee lunch; 3) has a share of the total project cost, as calculated pursuant to provisions of this section, that would be greater than fifty percent; and 4) for all educational purposes, has a residential property tax rate of at least seven dollars (\$7.00) on each one thousand dollars (\$1,000) of taxable value, as measured by the sum of all rates imposed by resolution of the local school board plus rates set to pay interest and principal on outstanding school district general obligation bonds; or

(c) the school district: 1) has an enrollment growth rate over the previous school year of at least two and one-half percent; 2) pursuant to its five-year facilities plan, will be building a new school within the next two years; and 3) for all educational purposes, has a residential property tax rate of at least ten dollars (\$10.00) on each one thousand dollars (\$1,000) of taxable value, as measured by the sum of all rates imposed by resolution of the local school board plus rates set to pay interest and principal on outstanding school district general obligation bonds;

(12) the local match for the constitutional special schools shall be set at fifty percent for projects that qualify under the educational adequacy category and one hundred percent for projects that qualify in the support spaces category; provided that the council may adjust or waive the amount of any direct appropriation offset to or local share required for the constitutional special schools if an applicant constitutional special school has insufficient or no local resources available; and

(13) no application for grant assistance from the fund shall be approved unless the council determines that:

(a) the public school capital outlay project is needed and included in the school district's five-year facilities plan among its top priorities;

(b) the school district has used its capital resources in a prudent manner;

(c) the school district has provided insurance for buildings of the school district in accordance with the provisions of Section 13-5-3 NMSA 1978;

(d) the school district has submitted a five-year facilities plan that includes: 1) enrollment projections; 2) a current preventive maintenance plan that has

been approved by the council pursuant to Section 22-24-5.3 NMSA 1978 and that is followed by each public school in the district; 3) the capital needs of charter schools located in the school district; and 4) projections for the facilities needed in order to maintain a full-day kindergarten program;

(e) the school district is willing and able to pay any portion of the total cost of the public school capital outlay project that, according to Paragraph (7), (9), (10) or (11) of this subsection, is not funded with grant assistance from the fund;

(f) the application includes the capital needs of any charter school located in the school district or the school district has shown that the facilities of the charter school have a smaller deviation from the statewide adequacy standards than other district facilities included in the application; and

(g) the school district has agreed, in writing, to comply with any reporting requirements or conditions imposed by the council pursuant to Section 22-24-5.1 NMSA 1978.

C. After consulting with the public school capital outlay oversight task force and other experts, the council shall regularly review and update statewide adequacy standards applicable to all school districts. The standards shall establish the acceptable level for the physical condition and capacity of buildings, the educational suitability of facilities and the need for education technology infrastructure. Except as otherwise provided in the Public School Capital Outlay Act, the amount of outstanding deviation from the standards shall be used by the council in evaluating and prioritizing public school capital outlay projects.

D. The acquisition of a facility by a school district or charter school pursuant to a financing agreement that provides for lease payments with an option to purchase for a price that is reduced according to lease payments made may be considered a public school capital outlay project and eligible for grant assistance under this section pursuant to the following criteria:

(1) no grant shall be awarded unless the council determines that, at the time of exercising the option to purchase the facility by the school district or charter school, the facility will equal or exceed the statewide adequacy standards and the building standards for public school facilities;

(2) no grant shall be awarded unless the school district and the need for the facility meet all of the requirements for grant assistance pursuant to the Public School Capital Outlay Act;

(3) the total project cost shall equal the total payments that would be due under the agreement if the school district or charter school would eventually acquire title to the facility;

(4) the portion of the total project cost to be paid from the fund may be awarded as one grant, but disbursements from the fund shall be made from time to time as lease payments become due;

(5) the portion of the total project cost to be paid by the school district or charter school may be paid from time to time as lease payments become due; and

(6) neither a grant award nor any provision of the Public School Capital Outlay Act creates a legal obligation for the school district or charter school to continue the lease from year to year or to purchase the facility.

E. In order to encourage private capital investment in the construction of public school facilities, the purchase of a privately owned school facility that is, at the time of application, in use by a school district may be considered a public school capital outlay project and eligible for grant assistance pursuant to this section if the council finds that:

(1) at the time of the initial use by the school district, the facility to be purchased equaled or exceeded the statewide adequacy standards and the building standards for public school facilities;

(2) at the time of application, attendance at the facility to be purchased is at seventy-five percent or greater of design capacity and the attendance at other schools in the school district that the students at the facility would otherwise attend is at eighty-five percent or greater of design capacity; and

(3) the school district and the capital outlay project meet all of the requirements for grant assistance pursuant to the Public School Capital Outlay Act; provided that, when determining the deviation from the statewide adequacy standards for the purposes of evaluating and prioritizing the project, the students using the facility shall be deemed to be attending other schools in the school district.

F. It is the intent of the legislature that grant assistance made pursuant to this section allows every school district to meet the standards developed pursuant to Subsection C of this section; provided, however, that nothing in the Public School Capital Outlay Act or the development of standards pursuant to that act prohibits a school district from using other funds available to the district to exceed the statewide adequacy standards.

G. Upon request, the council shall work with, and provide assistance and information to, the public school capital outlay oversight task force.

H. The council may establish committees or task forces, not necessarily consisting of council members, and may use the committees or task forces, as well as existing agencies or organizations, to conduct studies, conduct surveys, submit recommendations or otherwise contribute expertise from the public schools, programs, interest groups and segments of society most concerned with a particular aspect of the council's work.

I. Upon the recommendation of the authority, the council shall develop building standards for public school facilities and shall promulgate other such rules as are necessary to carry out the provisions of the Public School Capital Outlay Act.

J. No later than December 15 of each year, the council shall prepare a report summarizing its activities during the previous fiscal year. The report shall describe in detail all projects funded, the progress of projects previously funded but not completed, the criteria used to prioritize and fund projects and all other council actions. The report shall be submitted to the public education commission, the governor, the legislative finance committee, the legislative education study committee and the legislature."

Chapter 180 Section 6 Laws 2019

SECTION 6. Section 22-24-5.4 NMSA 1978 (being Laws 2004, Chapter 125, Section 10, as amended) is amended to read:

"22-24-5.4. RECALCITRANT SCHOOL DISTRICTS--COURT ACTION TO ENFORCE CONSTITUTIONAL COMPLIANCE--IMPOSITION OF PROPERTY TAX.--

A. The council may bring an action against a school district pursuant to the provisions of this section if, based upon information submitted to the council by the authority, the council determines that:

(1) the physical condition of a public school facility in the school district is so inadequate that the facility or the education received by students attending the facility is below the minimum required by the constitution of New Mexico;

(2) the school district is not taking the necessary steps to bring the facility up to the constitutionally required minimum; and

(3) either:

(a) the school district has not applied for the grant assistance necessary to bring the facility up to minimum constitutional standards; or

(b) the school district is unwilling to meet all of the requirements for the approval of an application for grant assistance pursuant to Paragraph (13) of Subsection B of Section 22-24-5 NMSA 1978.

B. An action brought pursuant to this section shall be brought by the council in the name of the state against the school district in the district court for Santa Fe county.

C. After a hearing and consideration of the evidence, if the court finds that the council's determination pursuant to Subsection A of this section was correct, the court shall:

(1) order the council to expend sufficient resources necessary to bring the facility up to the minimum level required by the constitution of New Mexico;

(2) order the school district to comply with Paragraph (13) of Subsection B of Section 22-24-5 NMSA 1978 and to take all other actions necessary to facilitate the completion of the project ordered pursuant to Paragraph (1) of this subsection; and

(3) enter a judgment against the school district for court costs and attorney fees and the necessary amount to satisfy the school district share, as determined by the formula prescribed by Subsection B of Section 22-24-5 NMSA 1978, for the project ordered pursuant to Paragraph (1) of this subsection.

D. The amount of a judgment entered against a school district pursuant to Paragraph (3) of Subsection C of this section is a public debt of the school district. If the court finds that the debt cannot be satisfied with available school district funds, other than funds needed for the operation of the public schools and other existing obligations, the court shall order the imposition of a property tax on all taxable property allocated to the school district at a rate sufficient to pay the judgment, with accrued interest, within a reasonable time as determined by the court. After paying court costs and attorney fees, amounts received pursuant to this subsection shall be deposited by the council into the fund."

Chapter 180 Section 7 Laws 2019

SECTION 7. Section 22-24-5.7 NMSA 1978 (being Laws 2006, Chapter 95, Section 7) is amended to read:

"22-24-5.7. LOCAL MATCH PROVISIONS FOR QUALIFIED HIGH PRIORITY PROJECTS.--

A. For a qualified high priority project, if money has been specifically appropriated for the purposes of this section, and if the school district so requests, the money may be used to pay both the state share, as calculated by Subsection B of Section 22-24-5 NMSA 1978 and all or a portion of the district share, subject to the following criteria:

(1) the amount paid as the district's share plus any amount added pursuant to Paragraph (3) of this subsection shall be recouped by offsetting future allocations that otherwise would be made from the fund for the state share of projects qualifying for a grant award pursuant to Subsections B and C of Section 22-24-5 NMSA 1978;

(2) except as provided in Paragraph (6) of this subsection, once a project within a district has been funded pursuant to the provisions of this section, then, until the amount paid as the district's share plus any amount added pursuant to Paragraph (3) of this subsection is fully recouped, no standard-based grant awards from the fund shall be made to the district and the district shall be solely responsible for using its local resources to bring those facilities, that would otherwise be eligible for allocations from the fund pursuant to Section 22-24-5 NMSA 1978, up to the statewide adequacy standards;

- (7) limit and prorate production of crude petroleum oil or natural gas or both as provided in the Oil and Gas Act; and
- (8) require either generally or in particular areas certificates of clearance or tenders in connection with the transportation of crude petroleum oil or natural gas or any products of either or both oil and products or both natural gas and products.

B. The oil conservation division may make rules and orders for the purposes and with respect to the subject matter stated in this subsection:

(1) to require dry or abandoned wells to be plugged in a way so as to confine the crude petroleum oil, natural gas or water in the strata in which it is found and to prevent it from escaping into other strata; pursuant to Section 70-2-14 NMSA 1978, the division shall require financial assurance conditioned for the performance of the rules;

(2) to prevent crude petroleum oil, natural gas or water from escaping from strata in which it is found into other strata;

(3) to require reports showing locations of all oil or gas wells and for the filing of logs and drilling records or reports;

(4) to prevent the drowning by water of any stratum or part thereof capable of producing oil or gas or both oil and gas in paying quantities and to prevent the premature and irregular encroachment of water or any other kind of water encroachment that reduces or tends to reduce the total ultimate recovery of crude petroleum oil or gas or both oil and gas from any pool;

(5) to prevent fires;

(6) to prevent "blow-ups" and "caving" in the sense that the conditions indicated by such terms are generally understood in the oil and gas business;

(15) to regulate the disposition, handling, transport, storage, recycling, treatment and disposal of produced water during, or for reuse in, the exploration, drilling, production, treatment or refinement of oil or gas, including disposal by injection pursuant to authority delegated under the federal Safe Drinking Water Act, in a manner that protects public health, the environment and fresh water resources;

(16) to determine the limits of any area containing commercial potash deposits and from time to time redetermine the limits;

(17) to regulate and, where necessary, prohibit drilling or producing operations for oil or gas within any area containing commercial deposits of potash where the operations would have the effect unduly to reduce the total quantity of the commercial deposits of potash that may reasonably be recovered in commercial quantities or where the operations would interfere unduly with the orderly commercial development of the potash deposits;

(18) to spend the oil and gas reclamation fund and do all acts necessary and proper to plug dry and abandoned oil and gas wells and to restore and remediate abandoned well sites and associated production facilities in accordance with the provisions of the Oil and Gas Act, the rules adopted under that act and the Procurement Code, including disposing of salvageable equipment and material removed from oil and gas wells being plugged by the state;

(19) to make well price category determinations pursuant to the provisions of the federal Natural Gas Policy Act of 1978 or any successor act and, by regulation, to adopt fees for such determinations, which fees shall not exceed twenty-five dollars (\$25.00) per filing. Such fees shall be credited to the account of the oil conservation division by the state treasurer and may be expended as authorized by the legislature;

(20) to regulate the construction and operation of oil treating plants and to require the posting of bonds for the reclamation of treating plant sites after cessation of operations;

(21) to regulate the disposition of nondomestic wastes resulting from the exploration, development, production or storage of crude oil or natural gas to protect public health and the environment; and

(22) to regulate the disposition of nondomestic wastes resulting from the oil field service industry, the transportation of crude oil or natural gas, the treatment of natural gas or the refinement of crude oil to protect public health and the environment, including administering the Water Quality Act as provided in Subsection E of Section 74-6-4 NMSA 1978."

SECTION 7. Section 70-2-31 NMSA 1978 (being Laws 1981, Chapter 362, Section 1) is amended to read:

"70-2-31. VIOLATIONS OF THE OIL AND GAS ACT--PENALTIES.--

A. Whenever the division determines that a person violated or is violating the Oil and Gas Act or any provision of any rule, order, permit or authorization issued pursuant to that act, the division may seek compliance and civil penalties by:

(1) issuing a notice of violation;

(2) commencing a civil action in district court for appropriate relief, including injunctive relief; or

(3) issuing a temporary cessation order if the division determines that the violation is causing or will cause an imminent danger to public health or safety or a significant imminent environmental harm. The cessation order will remain in effect until the earlier of when the violation is abated or thirty days unless a hearing is held before the division and a new order is issued.

B. A notice of violation issued pursuant to Paragraph (1) of Subsection A of this section shall state with reasonable specificity the nature of the violation, shall require compliance immediately or within a specified time period, shall provide notice of the availability of an informal review and the date of a hearing before the division and shall provide notice of potential sanctions, including assessing a penalty, suspending, canceling or terminating a permit or authorization, shutting in a well and plugging and abandonment of a well and forfeiting financial assurance pursuant to Section 70-2-14 NMSA 1978.

C. If the notice of violation is not resolved informally within thirty days after service of the notice, the division shall hold a hearing and determine whether the violation should be upheld and whether any sanctions, including civil penalties, shall be assessed. In assessing a penalty authorized by this section, the division shall take into account the seriousness of the violation, any good faith efforts to comply with the applicable requirements, any history of noncompliance under the Oil and Gas Act and other relevant factors. When a decision is rendered by the division after a hearing, any party of record adversely affected shall have the right to have the matter heard de novo before the commission pursuant to Section 70-2-13 NMSA 1978.

D. Any civil penalty assessed by a court or by the division or commission pursuant to this section may not exceed two thousand five hundred dollars (\$2,500) per day of noncompliance for each violation unless the violation presents a risk either to the health or safety of the public or of causing significant environmental harm, or unless the noncompliance continues beyond a time specified in the notice of violation or order issued by the division, commission or court, whereupon the civil penalty may not exceed ten thousand dollars (\$10,000) per day of noncompliance for each violation. No penalty assessed by the division or commission after a hearing may exceed two hundred thousand dollars (\$200,000); provided that such limitation does not apply to penalties assessed by a court.

E. The commission shall make rules, pursuant to Section 70-2-12.2 NMSA 1978, providing procedures for the issuance of notices of violations, the assessment of penalties and the conduct of informal proceedings and hearings pursuant to this section.

F. It is unlawful, subject to a criminal penalty of a fine of not more than five thousand dollars (\$5,000) or imprisonment for a term not exceeding three years or both such fine and imprisonment, for any person to knowingly and willfully:

(1) violate any provision of the Oil and Gas Act or any rule, regulation or order of the commission or the division issued pursuant to that act; or

(c) omit or cause to be omitted from any such record, account or memorandum full, true and correct entries; or

(d) remove from this state or destroy, mutilate, alter or falsify any such record, account or memorandum.

G. For the purposes of Subsection F of this section, each day of violation shall constitute a separate offense.

H. Any person who knowingly and willfully procures, counsels, aids or abets the commission of any act described in Subsection A or F of this section shall be subject to the same penalties as are prescribed in Subsection D or F of this section."

"74-6-4. DUTIES AND POWERS OF COMMISSION.--The commission:

A. may accept and supervise the administration of loans and grants from the federal government and from other sources, public or private, which loans and grants shall not be expended for other than the purposes for which provided;

B. shall adopt a comprehensive water quality management program and develop a continuing planning process;

C. shall not adopt or promulgate a standard or regulation that exceeds a grant of rulemaking authority listed in the statutory section of the Water Quality Act authorizing the standard or regulation;

D. shall adopt water quality standards for surface and ground waters of the state based on credible scientific data and other evidence appropriate under the Water Quality Act. The standards shall include narrative standards and, as appropriate, the designated uses of the waters and the water quality criteria necessary to protect such uses. The standards shall at a minimum protect the public health or welfare, enhance the quality of water and serve the purposes of the Water Quality Act. In making standards, the commission shall give weight it deems appropriate to all facts and circumstances, including the use and value of the water for water supplies, propagation of fish and wildlife, recreational purposes and agricultural, industrial and other purposes;

E. shall adopt, promulgate and publish regulations to prevent or abate water pollution in the state or in any specific geographic area, aquifer or watershed of the

state or in any part thereof, or for any class of waters, and to govern the disposal of septage and sludge and the use of sludge for various beneficial purposes. The regulations governing the disposal of septage and sludge may include the use of tracking and permitting systems or other reasonable means necessary to assure that septage and sludge are designated for disposal in, and arrive at, disposal facilities, other than facilities on the premises where the septage and sludge is generated, for which a permit or other authorization has been issued pursuant to the federal act or the Water Quality Act. Regulations may specify a standard of performance for new sources that reflects the greatest reduction in the concentration of water contaminants that the commission determines to be achievable through application of the best available demonstrated control technology, processes, operating methods or other alternatives, including where practicable a standard permitting no discharge of pollutants. In making regulations, the commission shall give weight it deems appropriate to all relevant facts and circumstances, including:

(1) the character and degree of injury to or interference with health, welfare, environment and property;

(2) the public interest, including the social and economic value of the sources of water contaminants;

(3) the technical practicability and economic reasonableness of reducing or eliminating water contaminants from the sources involved and previous experience with equipment and methods available to control the water contaminants involved;

(4) the successive uses, including domestic, commercial, industrial, pastoral, agricultural, wildlife and recreational uses;

(5) feasibility of a user or a subsequent user treating the water before a subsequent use;

(6) property rights and accustomed uses; and

(7) federal water quality requirements;

F. shall assign responsibility for administering its regulations to constituent agencies so as to assure adequate coverage and prevent duplication of effort. To this end, the commission may make such classification of waters and sources of water contaminants as will facilitate the assignment of administrative responsibilities to constituent agencies. The commission shall also hear and decide disputes between constituent agencies as to jurisdiction concerning any matters within the purpose of the Water Quality Act. In assigning responsibilities to constituent agencies, the

commission shall give priority to the primary interests of the constituent agencies. The department of environment shall provide technical services, including certification of permits pursuant to the federal act, and shall maintain a repository of the scientific data required by the Water Quality Act;

G. may enter into or authorize constituent agencies to enter into agreements with the federal government or other state governments for purposes consistent with the Water Quality Act and receive and allocate to constituent agencies funds made available to the commission;

H. may grant an individual variance from any regulation of the commission whenever it is found that compliance with the regulation will impose an unreasonable burden upon any lawful business, occupation or activity. The commission may only grant a variance conditioned upon a person effecting a particular abatement of water pollution within a reasonable period of time. Any variance shall be granted for the period of time specified by the commission. The commission shall adopt regulations specifying the procedure under which variances may be sought, which regulations shall provide for the holding of a public hearing before any variance may be granted;

I. may adopt regulations to require the filing with it or a constituent agency of proposed plans and specifications for the construction and operation of new sewer systems, treatment works or sewerage systems or extensions, modifications of or additions to new or existing sewer systems, treatment works or sewerage systems. Filing with and approval by the federal housing administration of plans for an extension to an existing or construction of a new sewerage system intended to serve a subdivision solely residential in nature shall be deemed compliance with all provisions of this subsection;

J. may adopt regulations requiring notice to it or a constituent agency of intent to introduce or allow the introduction of water contaminants into waters of the state;

K. shall specify in regulations the measures to be taken to prevent water pollution and to monitor water quality. The commission may adopt regulations for particular industries. The commission shall adopt regulations for the dairy industry and the copper industry. The commission shall consider, in addition to the factors listed in Subsection E of this section, the best available scientific information. The regulations may include variations in requirements based on site-specific factors, such as depth and distance to ground water and geological and hydrological conditions. The constituent agency shall establish an advisory committee composed of persons with knowledge and expertise particular to the industry category and other interested stakeholders to advise the constituent agency on appropriate regulations to be proposed for adoption by the commission. The regulations shall be developed and adopted in accordance with a

schedule approved by the commission. The schedule shall incorporate an opportunity for public input and stakeholder negotiations;

L. may adopt regulations establishing pretreatment standards that prohibit or control the introduction into publicly owned sewerage systems of water contaminants that are not susceptible to treatment by the treatment works or that would interfere with the operation of the treatment works;

M. shall not require a permit respecting the use of water in irrigated agriculture, except in the case of the employment of a specific practice in connection with such irrigation that documentation or actual case history has shown to be hazardous to public health or the environment or for the use of produced water;

N. shall not require a permit for applying less than two hundred fifty gallons per day of private residential gray water originating from a residence for the resident's household gardening, composting or landscape irrigation if:

(1) a constructed gray water distribution system provides for overflow into the sewer system or on-site wastewater treatment and disposal system;

(2) a gray water storage tank is covered to restrict access and to eliminate habitat for mosquitos or other vectors;

(3) a gray water system is sited outside of a floodway;

(4) gray water is vertically separated at least five feet above the ground water table;

(6) gray water is used on the site where it is generated and does not run off the property lines;

(7) gray water is applied in a manner that minimizes the potential for contact with people or domestic pets;

(8) ponding is prohibited, application of gray water is managed to minimize standing water on the surface and to ensure that the hydraulic capacity of the soil is not exceeded;

(9) gray water is not sprayed;

(10) gray water is not discharged to a watercourse; and

(11) gray water use within municipalities or counties complies with all applicable municipal or county ordinances enacted pursuant to Chapter 3, Article 53 NMSA 1978;

O. shall coordinate application procedures and funding cycles for loans and grants from the federal government and from other sources, public or private, with the local government division of the department of finance and administration pursuant to the New Mexico Community Assistance Act;

P. shall adopt regulations to be administered by the department of environment for the discharge, handling, transport, storage, recycling or treatment for the disposition of treated produced water, including disposition in road construction maintenance, roadway ice or dust control or other construction, or in the application of treated produced water to land, for activities unrelated to the exploration, drilling, production, treatment or refinement of oil or gas; and

Q. may adopt regulations to be administered by the department of environment for surface water discharges."
